Ome Newton Blanchard Is Stripped By Unknown Assailant, Thursday

About 4:30 Thursday, while hunting for cows at his home about 4 miles east of Gatesville on U.S. 84, Ome (Dumpy) Newton Blanchard, son of Mr. and Mrs. John Blanchard, was snatched by an unknown party hiding behind a bush. The man tied the boy's fishing cord shoestrings around his wrists, and stripped all his clothing off except his shorts. Blanchard said the man said he ought to cut him up with a knife, but decided not. His assailant left, and the boy, who heard his mother calling while he was still tied, returned to the house. His hands were blue where the cord had cut off circulation, but he was not injured otherwise. He said he thought the man was a negro, and that he had on khaki trousers. No suspects were found.

Congratulations

GSSB Boys Go Different Ways This Week: One Still Out Monday p. m.

All colors and shades took off the past week, and the guards say they don't like farm work—main reason.

There were Negroes, Mexicans and white boys who made the breaks. One is said to have taken a \$75 pair of boots and a .22 pump target from a renter's house on Kit Carson's place. Two were caught between the Pritchett and Copeland Ranches, one on a barn or shed in Gatesville.

One was caught, and the other ran, when they were trying to start a Mr. Henderson's car west on US 84. They'd rolled it out on the highway and were doing a "wiring job", when a guard rolled up.

Friday night, one stole, it is said, Mrs. Hampton's car at the State. She works there—and a Jonesboro highway bridge was too narrow, and he widened it. With Mrs. Hampton's car.

Last report, still one white boy missing, seen Sat. a. m. at Evant. CCN

America's Greatest Resource

When you enter the gates of our huge factories and industrial plants, do you see what is really there? Whenever I go inside factory gates, the wonder of it all amazes me. Where did all the equipment come from? By what magic was all of it assembled into such a gigantic unit for production? Somebody had to pay for all of it. Do you suppose it was a capitalist?

Nobody's Orders

Yes, capitalists did the deed. It is interesting that they keep doing that type of thing, all along. They keep building steel mills and putting up new oil refineries. New assembly lines are continually set up, and old ones improved. Plant expansions are undertaken. Modern tools are installed to replace worn ones. And one of the most amazing things about it is that nobody has to tell them to do it!

No dictator commands that all this money be spent. No government bureau has to send out a directive. It's all just part of the system that is the mainspring of America. This system of free and individual enterprise has made possible the building of our nation. Whenever the incentive of profit or reward is there, both men and money will be put to work. Capital comes to the job in hope of a reward, just as a man expects a paycheck as the result of his labor. Money and men work side by side, then.

Profits Make Jobs

These things are so common under the enterprise system as we know it in America, that most of us take them for granted. Yet, these capitalists (sometimes attacked so bitterly by unthinking persons) constantly supply the essential ingredient that makes jobs and produces goods.

Actually, the six or seven cents profit out of each sales dollar, which is typical of industry as a whole, does a tremendous job for you and for me. It pays for all the machines that, in turn, do most of the work. This makes it possible for 60 cents or more of this same sales dollar to be given to those who supply the human energy, the workmen. Some three cents, or only about half of this small profit, is used on the average to pay investors for the use of capital that brought these industries into being.

Incentives for Each

The other three cents or so of the profit goes back into the business. This portion of profit is used to pay for worn-out equipment and other replacements, and to keep up with rising costs and increased taxes. Today, that part of the sales dollar called profit is hardly ever enough to meet industry's real and urgent needs. In late years our industry has had to borrow more and more to meet rising inventory and equipment costs.

The nation's industrial enterprises cannot exist now, and never could have been developed, without the use of capital. Capital very effectively teams up with labor and management to bring great benefits to every citizen. Each of the partners—investor, worker, manager—has his own incentive. This system, free and unhampered, brings forth the best effort from each. This enterprise system is our country's greatest resource.

HOW TO SHOOT A RIFLE

By ARTHUR E. COOK
National and Olympic Rifle Champion

Trigger Control

Control of the trigger can make or break you as a shooter. The accepted movie hero technique of yanking at the trigger with hardly more than a glance at the target is bosh. You can't hit anything consistently that way.

When your sights are aligned on the target the only way to get off the shot is to squeeze the trigger with such a smooth and steady motion that you do not disturb that aim. The trigger is squeezed by a steady movement of the forefinger only.

Speed and smoothness in the trigger squeeze can be combined but it takes practice and the best way to practice is with an empty gun. Aim at a small bullseye across the room and carefully let-off each shot. Since the rifle does

not actually fire you can see your mistakes.

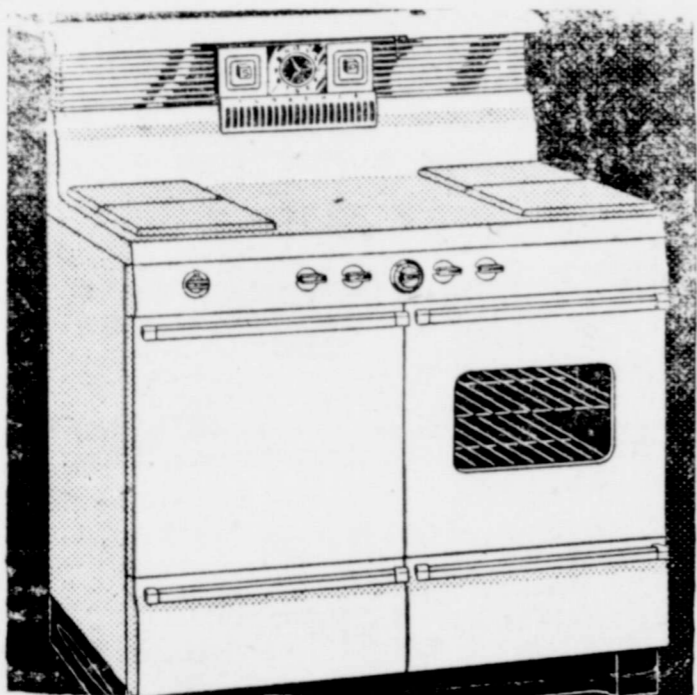

Another thing—while squeezing the trigger stop breathing and relax. The rise and fall of the chest while breathing will throw your sights off the target. Relaxation will reduce your pulse beat, which is another disturbing factor in precision aiming.

One final hint — always follow through. By that I mean keep looking through the sights at the target even after the shot is fired. This prevents movement of the gun before the shot has left the muzzle and often enables you to see where your shot hit when you are shooting in the field.

(This instruction based on the book let, "HOW TO SHOOT A RIFLE," published by The National Rifle Association, Washington D. C.)

Be sure of your target!

The Texas Poll

The Statewide Survey of Public Opinion

By JOE BELDEN,
Director, The Texas Poll

AUSTIN, Texas, May 28.—Most Texas voters don't know how much a member of the Legislature is paid. Lacking this basic information, the public today is not prepared to support a raise in pay for the lawmakers.

This finding by the Texas Poll indicates that a proposed constitutional amendment to be voted on September 24 may be defeated unless its backers conduct an effective selling campaign. The amendment, besides giving each lawmaker an annual salary of \$3,600, would require the Legislature to meet in regular session every year instead of every other year.

Eight out of every ten qualified voters questioned in the latest statewide survey by The Texas Poll were found to be either uninformed or misinformed about how much pay a lawmaker receives from the state. Even so, the weight of opinion among this group was that the legislators are receiving about the right amount or too much. Only 14 percent felt they were being paid too little.

On the other hand, only about two out of every ten qualified voters said they thought the lawmakers are underpaid.

The poll shows that voters, as a group, are slightly better informed than the general public because they pay more attention to what goes on in the Legislature. However, about four out of every ten voters admitted they pay very little or no attention to legislative affairs.

Interviewers in all parts of the state put these questions to a cross section of the adult population:

1. "How much attention do you pay to what goes on in the Legislature—a great deal of attention, some, very little, or none at all?"

Response	Qualified Voters	All Adults
Great deal	19%	14%
Some	42	39
Very little	29	32
None	10	15

100% 100%

2. "Do you think members of the Legislature are paid too much, too little, or about the right amount?"

Response	Qualified Voters	All Adults
Too much	12%	12%
Too little	22	19
About right	41	35
No opinion	25	33

100% 100%

3. "Do you know how much a member of the legislature is paid (if so) How much?"

Response	Qualified Voters	All Adults
Right answer	17%	14%
Wrong Answer	11	8
Don't know	72	78

100% 100%

No direct questions were asked about the proposed pay-raise amendment because not many people are familiar with its provisions. The fact that the amendment includes the requirement of annual sessions may have some effect on its chances of approval. In a special election four years ago, however, Texans voted 3 to 1 against increasing legislators' pay.

The lawmakers are now paid for only the days they are in session. The rate is \$10 per day for the first 120 days of a regular session, and \$5 a day thereafter if the session lasts longer than 120 days. For special sessions, which last 30 day, members are paid at the rate of \$10 a day. Regular sessions are held every other year, while special sessions convene only when called by the Governor.

Your Job Clinic
Auto Industry Wants Grads

By William J. Cronin
Managing Director, Automobile Manufacturers Association

The automotive industry and its related fields offer more job and business opportunities today for trained and enterprising young men than perhaps any other business field in the world.

This spring's college and high school graduates will find employment prospects encouraging in the automotive field in many parts of the country.

More than 41 million cars, truck and buses are in use today on the nation's highways and it takes many different types of businesses and jobs to meet the needs of the vehicles and the people who operate them.

About 600,000 automotive enterprises have been established to serve motorists in cities, towns, hamlets, and along the rural highways. They include gasoline stations, repair garages, trucking concerns and automobile dealerships. Specially-trained individuals are in greatest demand throughout the automotive industry. Vocationally trained high school graduates, for example, are particularly needed today in automotive repair work. From the earliest days of the industry, a good mechanic has always found a ready market for his services.

The high school graduate usually enters the automotive field as an apprentice, but he is entering a field that offers unlimited opportunities for advancement. A thoroughly trained and experienced mechanic can move on to become a specialty mechanic, a shop foreman, service manager, or parts manager.

He also has the background for advancing into sales work or for meeting the needs of automobile manufacturers in such jobs as final assembly inspector, dynamometer tester, experimental driver and many others.

Many other high school graduates will undoubtedly find job opportunities in some phase of the nation's trucking business. Truck drivers alone represent the largest single occupational group in the nation today, except for agriculture.

As in past years, the automotive industry again this spring has many job openings for college graduates. Specifically, graduate engineers and accountants are the most needed.

Many of them have already been hired by automotive companies who maintain active liaison with the nations colleges and universities. But others who can qualify will find opportunities in such manufacturing activities as production control, tool engineering, product development and design, processing methods, testing and research.

Finally, the automobile sales field holds promise of more opportunities in the period ahead than at any time in recent years. For the first time since the end of the war, automotive manufacturers this spring are approaching balance between supply and demand.

ATHENS HORNETS WAS A BREEZE, GALLOWAY GETTING 8-0 SHUTOUT

Ray Pack, cool as a cucumber, even on a hot Saturday afternoon, led his teammates to a 10-8 victory over Gatesville High School Hornets in a second game of the afternoon to take the Regional 5-A Championship. Pack struck out 4, walked 2 and hit 2. His teammates chalked up 14 hits, and 8 bobbles.

The Hornets started Charlie Haferkamp, who was doing okeh in the box, but the Hearne heavy artillery was getting to him, and the Hornets committed 9 costly bobbles. Haferkamp whiffed 5, walked 2 and hit one. J. L. McCarver, southpaw, followed him

and struckout 2, and good old Joe Galloway was sent in in the 8th to stem the tide, but it was too late.

The Eagles opened with a bang, getting 3 hits the first inning, and counting twice, added 1 in the 2d, 3 in the 4th, 2 in the 5th, 2 in the 8th.

The Hornets were scoreless the first, got 2 in the 2nd, 1 in the 4th, tied it up in the 7th, and then, Hearne put over 2 more in their half of the 8th, which the Hornets couldn't match. They were hitless for the first 4 innings.

The top side of the Eagles' batting order came up in their part of the 8th, Bollinger hit long fly to center-right, and the fielders collided, dropping; Brown flies out

Jonesboro Upsets Turnersville, 9-6 Others As Usual

This baseball business is tightening up, and the surprise of the week end, and not, particularly, that they're not capable, it the fact that Jonesboro polished off a favored Turnersville in a hectic contest 9-6. Memorial Day—no mail, and that's the reason no news.

The "count" is getting closer all the time, tho, and Gatesville, could only hand Pearl a 9-6 loss, which is pretty good baseball.

Purmela did a little better with Pidcoke with a 9-3.

Seattle gave Evant a scare with a 3-7 loss to the southeasterners.

Looks like the boys in the so-called "second bracket" or "lower" if you must, are going to see about that, and that's what makes a good league.

Pack singles, Bollinger scores from 2nd; McNeel singles to centerfield. Pack scores to win his own ball game.

Hearne Eagles: Bollinger ss; Brown 2b; Pack p; McNeel 1b; Brooks 3b; Ottea c; Hudson rf; Scott lf; De Stefano cf; substitute, Pardo, rf.

Gatesville Hornets: Davidson, D. 3b; Newman cf; Haferkamp p; Anderson c; Davidson, F. ss; Galloway 2b; Wolf lf; McCarver 1b; Davidson rf; substitute, Neimeier, rf.

Athens-Gatesville

In this one, the Hornets started off with a bang and practically had it in the bag in three innings, having scored 2 in the first, 3 in the third, and wound up with two in their half of the sixth.

Joe Galloway pitched fine baseball, striking out 6, and giving up only 3 hits.

Athens played good baseball, making only 4 bobbles, but the locals got 7 hits off them and made three errors.

Mickey Hall started for Athens, striking out one, and walking 2. Rudy Wesson took over, and struck out 4 and walked 4.

Lineup: Athens, Dean ss; Forehand 2b; Stogner cf; Wesson lf; Hall p; McWharton rf; Hooper 1b; Calhoun c; Russell 3b.

Gatesville: Davidson, D. 3b; Newman cf; Haferkamp 2b; Anderson c; Davidson, F. ss; Galloway p; Wolf lf; McCarver 1b; Davidson, G. rf.

Coach Bob Hall's Athens Hornets had won 17, and lost 3, one of them non-conference and 2 conference games.

SUBSCRIPTION

"There is a little matter that some of our subscribers have seemingly forgotten entirely. As we have stated before the Post Office regulations require that all subscriptions must be paid in advance. To us it is a very important matter. —It is necessary in our business. We are somewhat modest on this subject and don't like to continually speak about such remittance. We must, however, take off our mailing list from time to time, those who are delinquent in their payments. We don't like to do this as we believe this matter has just been overlooked on the part of some subscribers, yet we must comply with the Post Office laws to keep our second class mailing permit. Check the date on the label on your paper to see how you stand on this matter."

Eagles drew a bye in the district play-off, and rushed right on to Regional Champs in a single game.

Officials: Fred Kellerman, behind plate; Jiggs Martin, 1st base; Dan Barton, 3b.
