Every precaution should be taken to prevent contamination of milk used for human consumption.

DEVOTED TO THE INTEREST OF FRIONA AND PARMER COUNTY

Vol. 12

FRIONA, PARMER COUNTY, TEXAS, FRIDAY, MAY 6, 1938.

No. 40

COGITATIONS and APHORISMS of JODOK

I hear of new irrigation wells being drilled all over the Plains country. Mr. McGrew just last week brought one in about four miles northwest of Friona that, I understand, has been only partially tested and showed up about 800 gallons a minute production. One over east of town was brought in last fall of about 1000 gallons a minute. So, it seems that there is plenty of water under ground on the plains.

I wonder if people generally know just what it means, or may mean to this part of the country to have this supply of good water at their door or more properly, at their feet.

We have an annual rainfall of about 23 inches of water on the average. But it quite frequently comes too late in the spring for planting a spring crop. But, with a supply of water that can be procured at will, a great many crops can be planted here that without this early supply of water would be so late starting that failure would be almost a certainty.

Then there is the matter of fruits. Peaches, plums, apricots, cherries and strawberries can be raised here successfully if water is supplied to them when needed. With the added water from wells, when needed, all of these fruits may be raised here in a commercial way as successfully as in regions of more rainfall.

It would mean a great deal to the plains country to have a supply of these fruits produced here at home so that they would be available in season at a reasonable price. And the growing of them would put some extra money in some pockets long needing some extra change.

This early water would make it possible to raise crops like flax and barley that would add some very desirable additional crops for the farmers. As to the water supply being permanent, only time alone will tell. There is too much dry sand above the water-bearing stratum in which this water is found to indicate that it depends on local rainfall. It must come from a remote source that may well be permanent. Let's hope so, anyway.

The cost of this supply of water is not prohibitive by any means. In many irrigation districts, it costs as much as \$75 per acre to level the ground to fit it for irrigation. Most of this cost will be saved here. Then only less than 12 inches of irrigation in addition to the normal rainfall will have to be pumped to produce a plentiful supply of water for crops. It seems like irrigation here is practicable and not unreasonably expensive.

This thing they call "Sympathy" is something great and really amounts to more than the word implies—the fact of the matter is that one can hardly get to the bottom of it. Meaning. But if one can stand on the street corner all day long and keep his eyes open, he will see the thing exemplified in many, many ways, and while it does not all go along the line of "A feller feelin' there is quite a lot of it along that line.

In other words, the old sympathize with the old; the young sympathize with the young; the rheumatic sympathize with the rheumatics, etc., etc. For instance—I saw two or three elderly men sitting on the bench in front of Mr. Sprine's store Saturday afternoon, and another old "feller" came along and seemed to be just about to expire, and he sat down on a vacant place on the bench and seemed to be in conversation with the others for a few minutes.

Then, apparently, he seemed to think it was time for him to be moving on, and he made one or two feeble efforts to rise, and the elderly gentlemen on either side of him got their hands under his arms and gave him a boost and he got on his feet and went on his way, not knowing where to. It was just one of the many ways of expressing sympathy.

And I have often heard people talk to each other telling about their rheumatism, and seem to get lots of pleasure from it—I mean the pain, not the rheumatism. And from what I have heard from folk that have it, this disease seems to have just as many and just as varied freaks as a bout of meningitis or a cholera, affecting each sufferer in different places and in different ways. As far as my own rheumatism is concerned, Continued on Page Four

FAIR ASSOCIATION COMMITTEES FRIDAY NIGHT

The meeting of the various committees of the Parmer County Fair Association, which was held here last Friday night, was well attended, and while lots of work was accomplished, and the committees showed results of having gotten their work well under way as to preliminaries, there was still little to report to the public.

(From State Line Tribune)

At a meeting of the committees of the Parmer County Fair Association, held at the Friona grade school building the past Friday night, plans were laid for a financial drive to begin over the county this week, toward raising funds for the permanent home of the county fair.

L. P. Lillard, as chairman of the building committee, made the first report of the evening, listing the estimated costs of various types of construction, and it was voted by those present that a semi-circular building of steel should be erected as the fair building.

Prior to this consideration, Lillard reported the estimated cost of an adobe building, with plastered walls, at \$2175, the type of construction that had first been considered. In this arrangement, WPA officials had looked with favor on the project, and were expected to furnish labor, plus \$6 per man per month toward relieving the cost.

The semi-circular type of building, it was pointed out, would be to the advantage of display stalls and pens inside for animals, owing to the fact that the building would be constructed without supports marring the floor space.

The cost of the sheeting material has been placed by one county merchant at \$650, with the framework at about \$100. Adding the set for cementing some 20 feet in one end of the building for a floor in the club women's department, it was believed that a 40x150 foot building could be erected at a cost of approximately \$1000.

Voting toward erecting this type of home for the fair was practically unanimous, following a discussion of just what the WPA could be expected to do, and as to when such work from that organization might be realized. It was discussed by those who had had connections with the WPA that help from this source was uncertain, and committee members agreed to dispose of this consideration entirely.

Howard Morris, as temporary chairman, then instructed the finance committee, headed by W. H. Gammon, of Lazbuddy, to make a concerted drive for funds over the county during this week and the next, after which a meeting will be held and further discussions as to the matter of building the fair home taken under consideration.

The manner of raising funds is to be through a sale of stocks, with every man, woman or child in the county eligible to participate. Bonds will be offered those over 18 years of age at \$5 per share, while the younger people interested are offered a special price of \$1 per share.

Morris stressed the fact that every share-holder was entitled to a vote in the incorporation of stock owners, stating that a meeting of such would be held following the final financial drive, at which time officials would be chosen.

The incorporation of share holders will be a non-profit paying establishment, with buyers merely investing their money in the fair association for the purpose of promoting a Parmer county show, it was learned. Money taken from those wishing to buy shares will be deposited either in the Friona State-Bank or the Security State Bank, Farwell, with no stocks being issued until after the corporation is formed.

Those persons who might wish to buy several stocks, but at the time of selling feel financially able to afford only one, will be asked to pay for the one, with their desired being listed for additional stock. Mer is added, and at the time of final incorporation, the holdings of the association will be made large enough to include the additional selling of more shares as members desired.

The building, provided funds are raised, will be erected on a 300 square foot block west of the gin in Friona, as the association is already in possession of the land. Discussion of building a showing ring with seats for spectators, inside the building was also given considerable thought by those attending the meeting.

Any person in the county wishing to participate in establishing a home for the fair and livestock show is urged to contact some member of

ORIGIN, PURPOSES AMERICAN LEGION TOLD BY VET

The next regular meeting of the local Post of American Legion will be held Tuesday night, May 10th. It is very necessary that all War Veterans attend. We hope to have some plans, which we are about to establish, discussed and we want your influence and support.

We thank the people in Parmer County for their loyal support and influence given us so far in this building of our new home. While it is not yet complete, we want all to know we are working at the job, and in time we will try to give you something you will be proud of, as well as the Legion boys. Congratulations to you.

The National Commander will be at Pampa, May 21st and 22nd. Don't forget a big surprise and lots of fun is waiting for you, and every Legion member is urged to be there. And if you plan to go, better get your emblem for your car, to get your parking space, otherwise you may have trouble. See your Post Adjutant.

Recently so many have asked how and when the Legion was first organized. It will require a considerable amount of space to give this in full, so I will give some data and objectives set forth at that time.

The Legion was incorporated by act of Congress, September 16th, 1919, and was organized in local posts, departments and so on; the local post to act as a clearance of all claims to the various government facilities, but back to the origin.

It was March 15th, 1919, that a great number of men over-seas, met in Paris, France, and outlined the constitution, leaving further organization for the caucus to be held in St. Louis, the following May, and it was at this meeting we received our National Charter; and since that date we have been fighting continually in behalf of disabled veterans, widows and dependent children; and the early part of 1920 and 1921, even built and equipped a hospital for veterans, to prove to our president and congress the need of appropriations, and care of our "buddies." It has been a hard fight, due to radicalism, "big business," Wall Street and other financial controlling agencies; and at all times the Legion does not wish to be a burden upon our government, and at the same time the American does not feel responsible for creating the World War, and if such has to happen, it becomes the duty of someone to care for the sick and crippled for life.

The American people do not as a body, half-way realize the horrors of wars. I, personally, visited one hospital in France, where there was said to be over 5,000 men and women that were even praying to die from injuries and disease, and the sad part of it all is, that only a very few of this number could ever be sent back home, and less than ten per cent could ever leave this hospital alive. Dying by the hundreds daily. Oh, what a crime to see our good people suffer and without the care of even a kind word.

This very thing is why the American Legion is today working day and night, enduring criticism, hardships and all sorts of things, to bring a word of cheer in the hour of distress. The Legion has made many mistakes, and so have you. Why condemn the other fellow when you are equally as guilty?

BACCALAUREATE SERMON SUN NITE

It is announced that the baccalaureate sermon for the Senior Class of the 1937-38 term of the Friona High school will be preached in the auditorium of the grade school, Sunday night, beginning at about the usual church service hour.

Rev. C. Carl Dollar, pastor of the local Congregational church, has been invited to deliver the sermon. Rev. Dollar has been in Friona but about three months, and is, therefore, practically a stranger to most of our people, but owing to his popular personality he has made friends of all with whom he has met. He is a young man of high scholarly attainments, and it is stated that he is the first local pastor who has been accorded the honor of delivering the baccalaureate sermon, and his sermon is being looked forward to with a high degree of interest.

The finance committee, which includes Gammon, G. T. Watkins of Oklahoma Lane, G. B. Buske, of Friona, Chas. McLean of Friona and Gabe Anderson, of Farwell.

Mr. Boyd Knox of Harford, was a business caller here, Monday.

PAVING PROBABLY ASSURED FOR MAIN STREET

The following letter has been received from Julian Montgomery, State Highway Engineer, by County Judge Walter Lander, relative to the paving of a strip on Main Street in Friona, which will throw some light on the situation: Hon. Walter Lander, County Judge, Farwell, Texas. Dear Sir:

This is to advise that the following action was taken by the State Highway Commission on April 19th, regarding the surfacing of the spur connecting U. S. (State Highway 33) with the town of Friona:

"In Parmer County, due to ineligibility under the 1933 Secondary Program of Item 8, Division 5, providing for surfacing of spur connecting U. S. 60 (State Highway 33) with the town of Friona, a distance of approximately 1.0 mile, at a total estimated cost of \$4,000, and acting on advice from the U. S. Bureau of Public Roads, it is ordered that this project be transferred to the 1938 Regular Federal-aid program and the State Highway Engineer is directed to submit a request to the U. S. Bureau of Public Roads providing for this proposed transfer. Minute 14882.

Yours very truly, Julian Montgomery, State Highway Engineer. By T. H. Webb, Assistant.

SENIOR JUNIOR HOLD BANQUET

The Senior and Junior Classes held their annual Senior-Junior banquet in the corridors of the High School building last Friday night, with the following program and menu:

Program: Toastmistress, Nell Chiles. Welcome, Nell Chiles. Response, J. D. Jones. Senior Will, Connie Matthews. Quartet, "A Tiny Seed Became A Shrine." "Ti Pi Tin" Charline McFarland, Virginia Guyer, Ted Houlette, Roy Hueshe. Senior Prophecy, Grace Miller. Violin Solo, Connie Matthews. "Hitch Your Wagon to a Star," Mr. Stroud. Menu: Pineapple Cocktail. Meat Loaf With Tomato Sauce. Parsley Potatoes. Fresh Green Beans. Buttered Carrots. Fruit Salad. Hot Rolls. Butter. Strawberry Cream Angel Food Cake. Iced Tea.

FRIONA WOMAN'S CLUB

Mesdames A. H. Boatman and Leo McLelland were hostesses to the Friona Woman's Club Wednesday afternoon, May 4, in the Boatman home.

Mesdames J. E. Stover, delegate, R. H. Kinsley and L. R. Dilger reported on the District Meeting of Clubs held in Childress recently. It was announced that Friona Woman's Club won two third places in the district. The music program won third and Mrs. W. B. Stark won third place in an essay contest on "Training For Citizenship" which was conducted by Mrs. R. H. Kinsley, Chairman of American Citizenship Department of the seventh district.

The resignation of Mrs. Tommy Galloway was accepted.

"Mother's Day" was the general theme of the program and the following discussions were given: "New Meaning of Mother's Day," Mrs. W. H. Attaway. "A Tribute To Mothers," Mrs. V. B. Whitley. "The American Home," Mrs. M. C. Osborn. Refreshments were served to the following: Mesdames W. H. Attaway, H. W. Matthews, L. R. Dilger, Minnie Goodwine, J. A. Guyer, Buford Hueshe, R. H. Kinsley, M. C. Osborn, F. W. Reeve, L. N. Ritter, Bert Shackelford, J. E. Stover, V. E. Weir, Fred White, John White, V. B. Whitley, L. P. Lillard, P. B. Schlenker and Miss Ossie Hadley.

A COUNTY-WIDE POLITICAL RALLY

The Woman's Missionary Society of the Methodist Church, announced a political rally, to be held at the school auditorium, on Thursday evening, July 21st, at 8:30.

All county and district candidates are extended a cordial invitation to be there. There will be pie galore! Fun for everybody! and an interesting out-of-town speaker.

FINE ART RECITAL WILL BE GIVEN TONIGHT

The piano and voice students of Mrs. M. Burrough will be presented in recital Friday night, beginning at 8:30 o'clock. The numbers will be both classical and popular. Miss Jacquelyn Wilkison will present two costume numbers. A brief list of numbers is as follows:

Keyboard Song: Gertrude Euler. Betty Lou Talkington, Jacquelyn Burrough.

Waltz, The Zoo, Brother John, Raindrops, Gertrude Euler.

The Elephant's Baby, A Waltz, Hickory Dickory Dock, Ding Dong Bell, Betty Lou Talkington.

Bobby and Babsy, Kiddie Car, Twinkle, Twinkle Little Star, Merrily, Jacquelyn Burrough.

Master A. V. Warren will sing the following numbers: Cricket and Katy Did, Toy Soldier, Last Round-Up, in cowboy costume.

Veda Whitley will sing the following popular numbers: Ten Pretty Girls, Rosalie, You Can't Keep Me From Dreaming, The Dipsy Doodle, I Double Dare You.

Gertrude Short will play the following piano numbers: Dreaming, Birdland Waltz, Mexican Rose, Blue Danube, Grace Waltz (duet).

A. J. Routh will sing "Ebb-Tide" and others.

Jansen Warren will sing: Remember Me, There's A Gold Mine in the Sky, Thrill of a Lifetime, Singing Alone, Just A-Wearin' for You, Still Unexpressed.

Wanda Wood will play: Twitting of the Birds, Ripples, Narcissus, Grace Waltz (duet).

Jacquelyn Wilkison will sing: I Can Sing, Josephine, Be the Best of Whatever You Are, three little Spanish numbers with finger cymbal accompaniment: Chiquita, Ti Pi Tin and Lady of Spain, dedicated to Miss Nancy Shackelford, our absent member; Hop! Grasshopper, Hop! Its' free. You are invited to attend.

JR WOMEN'S CLUB PLAY SUCCESSFUL

The play "Cherio My Dearie," which was sponsored and presented here Tuesday night by the Junior Woman's Club, was pronounced a splendid success by those who had the privilege of seeing it; but owing, probably, to the fact that the play had not been extensively advertised, the attendance was not so large as it should have been for so meritorious an entertainment.

Humorous and ludicrous conditions kept occurring throughout the entire play and the whole affair became more deeply enshrouded in mystery as the plot progressed, the mystery only to be cleared away at the very terminus of the play.

Each character played his or her part so well that one could hardly help but believe the affair was real rather than imaginary, and the actors are receiving the compliments of their friends for their displayed ability.

LAZBUDDY STUDY CLUB

Mrs. Orhel Jennings entertained the Lazbuddy Study Club in her home Thursday afternoon. Nine members and seven visitors were present.

During the business hour Merle Styles was accepted as a new member, and Mrs. Frank Hinkson, Mrs. Manuel Jennings and Mrs. Robert Prather presented their names for membership.

The club decided to work the trees at the cemetery Thursday afternoon.

Mrs. Rudolph Pyritz and her daughter, Mrs. Gertrude Wilson, both of whom have been in the hospital at Lubbock, sent their thanks for the flowers which the club had sent them.

The program for the day was a "Children's Day" program. Roll call, "Cute Quips From Cute Children" from various members, caused quite a few chuckles.

"We, the Children, Speak," Mrs. B. H. Wagnon.

Song, "Little Things," D. Riley Jennings.

"Fun For Our Girls and Boys," by Miss Freda Paul, was very interesting and constructive. Miss Paul stated that the old adage, "All work and no play makes Jack a dull boy," is very true indeed. Then she proceeded to show how we can plan a specific time for play as well as work. Miss Paul suggested plans for groups as well as individuals.

Next meeting, May 8th, will be a "Mothers-Fathers Day" program, in the home of Mrs. O. M. Jennings. Bring your mother or a friend.

ANOTHER IRRIGATION WELL FOR PARMER COUNTY

Carl H. Mangum, of the Mangum Motor Company, at Plainview, stopped into the Star office Wednesday afternoon, to inform us that there is now one more successful irrigation well in Parmer county, the well having been cleaned of sand and thoroughly tested, and is located about four miles northwest of Friona.

The land on which the well is located belongs to Mr. McGrede, of Plainview, and lies immediately east of the M. Lady farm, on the land formerly belonging to F. L. Reed.

The well is 235 feet deep, and water was first struck at a depth of 150 feet, with the pump resting at 180 feet. It is equipped with a Johnston pump made by the Johnston Pump Company. The pump throws a nine-inch stream bearing 1,100 gallons per minute, or 1,400 gallons when given its limit. There is a 20-foot section of 8-inch pipe extending below the pump for the purpose of giving it added suction.

Mr. Mangum, who installed the pump and assisted with the completion of the well, which was drilled by Ware & Hainey, says there is no question but that this is one of the best wells yet drilled in this territory, and is apparently the strongest. He has had a vast experience in the irrigation well business near Plainview, and is of the opinion that there is little or no danger of decreasing the underground water supply of this territory, regardless of the number of wells that may be put in.

He says that in the Plainview territory, they have been using wells for irrigation purposes for the past twenty-five years, but there has been no perceptible difference in the amount of supply, and it is his opinion that the territory surrounding Friona should be, if anything, better than it is near Plainview, owing to the fact that it is evidently nearer to the original source.

FRIONA CHIEFS PLAY SIX MAN FOOTBALL HERE THE NITE

Following is the line-up for the 6-man grid game, played here last night, with no results available before the Star went to Press:

Starting Line-up: Whites—l. e., Calvin Bradely; c., Joel Landrum; r. e., Roy Routh; l. h., Earl Schmitz; r. h., Lyndon Stephens, capt.; f. b., Denham Smith; Reds—l. e., James Watkins; c., Ralph Thomas; r. e., Merin Schmitz; l. h., Truett Johnson, r. h., Jim Roy Roden; f. b., Jack Williams, capt.

Substitutes: Whites—Tilden Slagle, C. L. Lillard, George Wingert, Fred Barker, and John Renner; Reds—Paul Frost, Bert Beene, John Key, James White and Dallas Coldiron.

Six-Man Football Rules: Field 80x40; four downs to make 15 yards; pass anywhere behind line of scrimmage; the ball must be passed before a player can cross the line of scrimmage; all players are eligible for a pass; field goal counts 4 points; place kick after touchdown counts one point; kick off from twenty yard line; at least three men must be on the line of scrimmage; playing time is ten minute quarters. Otherwise regular football rules apply.

SCHOOL CLOSURE NEXT WEEK FRI, MAY 13

Friday of next week will witness the closing of our present term of the Friona schools, following which at least a few of our teachers will leave us for other fields of labor. It is understood that the entire faculty was re-elected, but some of them have already tendered their resignations, and it is not now known how many of them will accept for another term.

The past two weeks have been quite filled with school festivities of various kinds, such as picnics, lunquets, etc., in which all the different grades and departments have had their share of participation and pleasure.

Next week will witness the baccalaureate, the commencement exercises for the Seniors, and the promotions that will be made in the grades, including the promotion of the seventh grade from the grade school to the high school.

The commencement ceremonies will be held for the Seventh Grade on Thursday night, and for the Seniors on Friday night of next week. The Star was unable to learn the names of the speakers for these two occasions.

CHAPTER XVI—Continued
—13—

So, amid great grumblings from Angustias, whose pet Chichi had developed a dangerous cold from the fogs and sea air of Monterey, the gubernatorial party embarked on the San Antonio for the Mission and Presidio of San Francisco. Angustias had at last settled herself in some comfort in the Governor's palace, and had, she confided to the Gobernadora, just got the cramps out of her bones from the long journey she had made, when she must needs pack and move on again. As she fussed over the little trunk that held the layette, she scolded, "A rolling stone gathers no moss."

Eulalia laughed. "And a dog that stays at home never finds any bones!" she countered.

The San Antonio was drifting between Points Lobos and Bonita that guard the gates of the great Bay of San Francisco. It was sunset, and as the Governor stood on the bridge of the clumsy ship, he looked west into the sky, all vivid with color, where islands called the Farralones could be seen rising dimly above the water.

When she landed at San Francisco, leaning heavily on the Governor, all the people of the presidio and mission were there to greet Eulalia. But her pride and pleasure in the royal greeting were interrupted by a feeling of great uneasiness, followed by acute discomfort. The Governor, busy greeting his old friends, was just shaking hands with the genial Fray Palou when he felt his lady's fingers clutch

"A Rolling Stone Gathers No Moss."

him convulsively. He looked into her face. It was ivory white, with wide-staring, black eyes, and white drawn mouth.

"Eulalia. Eulalia . . ."

"Pedro . . . Oh, merciful God," she whispered.

A day later Fray Palou, with a pleased expression on his kindly face, drew toward him the great Register of the Mission Dolores at San Francisco, and inscribed in his fine scholarly hand, that was to record so many priceless records for the annals of California, these words:

"Born, on August the Third, 1784, to Dona Eulalia Celis de Fages, wife of Don Pedro Fages, Gobernador-General of the Californias, a daughter."

Some ten days later the young daughter of the Governor, his little flower as he called her, was christened with as much pomp as was possible in the shabby little mission church. Fray Palou proudly pointed out, however, the cornerstone already laid for a new temple to be erected.

Then the party returned gaily to the mansion of the Commandante of the Presidio of San Francisco, Don Jose Moraga, and his wife, Maria del Pilar de Leon y Barcelo, who were the padrino and padrina of the baby.

There was a christening feast, with Don Jose as the host. Dona Maria del Pilar had dug out her dearest treasures to grace the board; the adobe room was a strange background for the rich linen and silver, the sparkling glass and china.

Outside the wind blew great sheets of fog on the pitiful settlement, clinging so precariously over the gray waters of the bay. The rain poured ceaselessly, doing still greater damage to the little houses, and the wall around the presidio which had already, earlier in the year, been partly destroyed by a severe storm.

But in the humble mansion all was gay, and La Gobernadora looked a very queen indeed in her wine red velvet and rubies as she sat beside her husband, her eyes brighter than the candles. And gracefully slim. She ran her hands over her body beneath the table-

cloth and sighed with pleasure. She was free, strong. She could accomplish anything now!

During the festivities an Indian servant announced that a messenger had arrived from Monterey to speak to Fray Palou.

In a moment the shivering soaked boy came into the warm room, and handed the friar a letter.

After obtaining permission to read it, the missionary bent close to a candle and read the words of his brother, Junipero Serra, his heart saddening more and more until he read the last lines that Serra had penned in his dark hour: "Good Padre Palou, come and assist me to die!"

Fray Palou covered his eyes with his hands a moment, then turned a white face toward the company.

The Governor rose slowly to his feet, his face drawn. "Father," he said harshly, "what is it?" Without a word the priest pointed out the last words in the message. Fages read them, and without hesitating spoke decisively.

"Come, Father. Let us go at once. I am ready. There are horses for us, Don Jose? We are going to Carmelo. Junipero Serra is dying."

There was perfect silence for a moment. Outside the wind sighed and moaned, and sea-gulls, circling, screamed as they made their evening flight to aeries among the rocks and crags that overhung the sea.

"Dying . . ." someone whispered, "Junipero Serra dying . . ."

There were sighs and exclamations all around the table.

"It does not seem possible," exclaimed the Commandante.

"But here is the letter, in his own hand," replied Fages. He turned to the messenger. "Was there no word for me?" he asked.

The boy shook his head. Fages tugged at his beard, his head bent. He looked up abruptly.

"You will pardon me if I leave, Don Jose," he said, "but you see I must. Father Palou, I will be ready in a moment. I must change these fiesta clothes for my old leathers. And you, Don Jose, will you see that horses, servants and food are ready for us?"

The Commandante hesitated.

"Of course I will excuse you. But—but does your Excellency think it is necessary to leave"—he stole a glance at La Gobernadora—"just now?"

"By heaven, yes! Nothing on earth could keep me from going to Junipero Serra. Father, are you ready?"

The priest had been standing silently, his beads moving between his fingers.

"Ready, your Excellency. Ready and anxious."

The guests had left their places at the table and were gathered about the letter which Fray Palou had received, leaving La Gobernadora sitting alone, like a ruby madonna with her child in her arms.

The Governor started to leave the room. Then he stopped suddenly before his wife and stared at her as though he had forgotten her existence.

"Eulalia . . ." he faltered.

She turned her face upward toward him, and clasped the child closer to her. She did not speak.

"Eulalia . . . you see I must go."

Everyone was looking at them, arrested by the sudden change in the Governor's manner.

"I do not see it," she said coldly.

"You shall not go."

"I am going."

Still he stood, though she had not detained him even by a gesture. The guests began moving in a shocked silence out of the room. Eulalia saw Fray Palou going as though to join them. She looked at him.

"Do not go, please, Padre. There is nothing we have to say that you may not hear."

The priest bowed silently.

"You shall not go. You will stay here with me, where you should be."

"I should be with Junipero Serra."

"No. I am your wife, flesh of your flesh. I have suffered for you. I have borne you children. I have traveled over a dangerous country that even strong men dread to face to be by your side. And now you are not going to leave me."

Fages tugged at his beard.

"You do not understand a love between men. I must go."

"No, I do not understand such a love. But if it separates you from me at this time, I do not want to understand it. I despise it."

Her voice began rising from its icy, controlled inflections. The arms that pressed her baby to her, trembled.

"What is Junipero Serra to you, that you should leave me, with your new-born child in my arms, still weak and ill from my travail? What is he anyway but a mad-old fanatic? Love! Love! All I have ever heard between you is quarreling and bitterness. Junipero Serra hates and despises you in his heart, as you do him!"

Stung by the words she hurled at-

him, Pedro Fages took a step toward her, his hand raised. She stared up at him without flinching. The baby began to whimper softly, and nuzzle the red velvet of her bodice. Fray Palou moved forward quickly, but the Governor only laid his hand gently on his wife's shoulder.

"You do not understand, my dear. If you did you would see how necessary it is to my honor, my position, my very life that I go to Junipero Serra now. You will not make it any harder for me? Be a brave soldier's woman!"

Her face did not change.

"If you go, I shall never live with you as wife again."

Pedro Fages looked into the shadowed eyes burning so bitterly into his.

"You do not mean that."

"I do."

The Governor shrugged his shoulders and moved toward the door. "Be that as it may." He turned again to the door, and this time walked out without a word.

Hours later Eulalia awoke to see the Governor standing beside her. His leather jacket was running rivulets. His eyes burned out from a wet face.

For a moment she looked up at him in surprise, then she put a hand toward him.

"Al, my Pedro," she cooed. "You did not go! Oh, my love, I am so happy. Look at your little flower."

She pulled the coverlet away and disclosed the child asleep, its tiny mouth still pressed to her breast.

Still he did not speak, nor make a move toward her. The love that she pleaded for from his eyes did not kindle. There was only bitterness in his face. Eulalia grew afraid. "You . . . you are not going!" she whispered pitifully.

"I started. But I came back," he said shortly.

"Ah, my lover." Again she reached toward him.

But Pedro Fages made a slight exclamation of grief, bitterness, revulsion against the woman who held him, and left her room to wander along the bleak cliffs in the rain.

CHAPTER XVII

Fray Francisco Palou sat heavily down in the aliso wood chair the Indians had made for Junipero Serra: the same armchair in which the father had sat to write his farewell letters. Fray Palou's fingers reached for the same quill and, leaning his arms where the missionary's arms had so often rested on the crude table, gave himself up to thought.

For a long while he sat silently, listening to the darting swallows as they flew around the eaves of the tiny cell. Then he took a deep breath, and shaking his head sadly, dipped the quill into the ink and began writing:

"Mission San Carlos.

"September Seventh, 1784.

"Hail Jesus Mary and Joseph!

"Very Reverend Father Guardian, Fray Juan Sanchez:

"On the twenty-eighth of August just passed God was pleased to take to eternity the soul of my ever loved and honored father, the Father President, Fray Junipero Serra."

Fray Palou read the words carefully after he had written them, then continued with a deep sigh.

"As soon as the news was made public, it spread through all the town, everybody mourning the death of their dear father. Everybody crowded to see him, and it was necessary to close the gate in order to place him in the coffin he himself had ordered made. As soon as he died his body was placed in it, tak-

Miniature Ocean, Artificial Sea Water, Controlled Tides, Used to Test Concrete

A miniature ocean with artificial sea water and electrically controlled tides is an important part of the equipment in a research laboratory in Chicago as a means of studying the effects of continuous exposure of concrete to sea water.

The apparatus includes two 11-foot tanks of concrete filled with water of the same chemical composition as sea water, except that it is four times as concentrated. Electric pumps circulate the water and give the effect of tides. Every twenty-four hours it's high tide in one tank and low tide in the other. The rise and fall is one foot.

Small reinforced concrete piles of varying quality are placed in the tanks and daily observations made of their behavior. The depth of penetration of the salt water is checked by daily tests with extremely delicate electronic meters.

Each test specimen contains many electrodes in pairs. An electric current of the intensity of one milliampere is passed between pairs of these electrodes.

The instrument readings record the amount of resistance to the flow of current in several directions and in various parts of the test speci-

ing it from the bed or platform on which he died without removing his habit.

"Then the Indians, whom the dead father had baptized and confirmed brought roses with which to adorn his dead body, and weeping at his death, they did not want to go away."

"At night we took his body to the church with a procession formed by all the town and the six soldiers of the guard, one of whom stayed on watch all night with many neophytes and sailors."

"When the father died all were eager for some little thing that he had used. I promised that I would comfort them all so they might not do anything unseemly, but in spite of all this and of the sentinels at night they cut off bits of the habit that served as a shroud and much of the hair from his tonsure . . ."

"The following day which was

Fray Palou Read the Words Carefully.

Sunday . . . I said mass for the body present . . . In the afternoon, the burial took place with all solemnity. The procession went by way of the Plaza, making four stops and singing at each response. The soldiers carried the body, the rest going with tapers in their hands. When we arrived at the Church we sang lauds with all the ceremony of the ritual of the Order. All were eager to honor the deceased . . . Although I was forgetful of the fact that I had been asked for some mementoes of the deceased father which they said they wanted as relics, they did not forget. On the contrary they importuned me to such an extent that I was forced to give up my tunic which I told them they must make up into scapulars and bring them to me together with their cords. They did this, and when I distributed them, I explained they were scapulars and girdle of Our Father San Francisco in return for which they should pray for the soul of the dead father. In this way I satisfied the eager worshippers and interceded for the soul of the dead father if, indeed, he needs our prayers and petitions."

Francisco Palou read the letter that he had written, added a few formal phrases, and ended the message.

"Your Reverence's most humble servant, and the humblest of your brothers,

"Fr. Francisco Palou."

Star Dust

★ Aces Take to Air

★ Strong Sound Effects

★ Second Fiddle Stars

By Virginia Vale

PUT "Test Pilot" down as one of the pictures that you mustn't miss. Not just because the leading roles are played by Myrna Loy, Clark Gable and Spencer Tracy, with Lionel Barrymore added for good measure, or because the story is a good one, but because of the thrills contributed by the story when it takes to the air.

There is a flight in a bomber for a new altitude record, there is a power drive to test an army pursuit

Spencer Tracy

plane, and there's the Cleveland air race. Paul Mantz acted as technical advisor for the picture, but Metro isn't saying much about that, because he was co-pilot and navigator for Amelia Earhart, and the company didn't want to cash in on her disappearance in order to get more publicity for the film.

Robert Taylor isn't going to be just a "pretty boy" if the studio can help it. He is scheduled for "Northwest Passage," but first he will play the part of a prize fighter in "Give and Take."

Merle Oberon thought that she was being followed by hold-up men when she was in New York; she was sure that they followed her from a theater to a night club, and asked for protection. At least, that was the report—it might have been just another variation of the old idea involving an actress' being robbed of her jewels, all for the dear sake of publicity. Anyway, Miss Oberon wasn't robbed.

You've heard about the struggles of the sound effects men to get just the right sound before the microphone—rubbing their fingers across paper to get the sound of wind in the trees, or something like that. Charles Atlas, "The World's Most Perfectly Developed Strong Man," appeared on Fred Allen's program, and they wanted the sound of a telephone book's being torn in two by him. Tried everything but couldn't get it. Finally Atlas picked up a huge New York phone book, strode over to the microphone, and tore it in two—and the sound was perfect!

Sylvia Sydney refused to be the heroine of "Aigiers," playing opposite Charles Boyer, and Sigurd Gurie, who did so well in "Marco Polo," takes her place. It will be

Myrna Loy Luise Rainer

interesting to see if Miss Gurie follows in the footsteps of some of the other girls who have been second choice under such circumstances. Remember Luise Rainer, who got her chance in "Escapade" when Myrna Loy didn't want to play in it? It made her a star. Remember what happened to Rosalind Russell when she had to pinch hit in "Rendezvous" for that same Miss Loy?

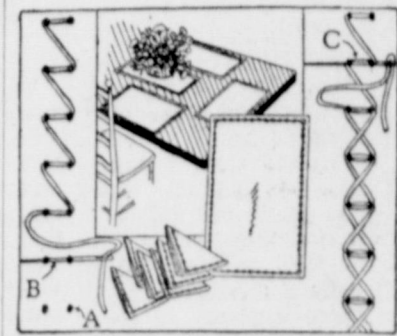

ODDS and ENDS . . . King Christian of Denmark is a movie fan: sees about eight pictures a week . . . Harold Lloyd is one of Hollywood's best bondlers . . . Believe it or not, Bob Burns is learning Spanish for his role in "Tropic Holiday" . . . Deanna Durbin, whose new picture is a honey, is the latest star to have her hand and footprints imprinted in the Lobby of Grauman's Chinese theater, that memory book of Hollywood's famous folk . . . Senator Fishback may return to the air; he's been talking to sponsors in Chicago . . . On May 29th more than two score of the nation's swing bands will be heard in an outdoor concert at Randall's Island stadium, New York, conducted by Martin Block—and broadcast, of course; first time that many swingsters will have played together.

Quick Embroidery For Luncheon Set

By RUTH WYETH SPEARS

HERE an embroidered border is plainly shown. No pattern is necessary. Book offered here-with contains other interesting borders of this type. Space your stitches just as they are here. The embroidery should be done in a light and a dark color. Use all strands of six-strand mercerized embroidery thread. Color suggestions are—dark and lighter blue thread on white material—dark

green and light yellow on light green material—black and bright blue on pale yellow—deep rose and brown on pale pink.

Baste 1/2-inch deep hems around both mats and napkins. Working from right side with double thread, make two rows of running stitches in the dark color, as at A, catching through the hem. Thread a blunt tapestry needle with the light thread and weave through the running stitches keeping needle pointed to the left as at B. Next, weave back again, as at C, still pointing the needle to the left.

Readers who have received their copy of Mrs. Spears' book on Sewing, for the Home Decorator, will be pleased to know that Book No. 2 is now ready. Ninety embroidery stitches; fabric repairing; also table settings; gifts; and many things to make for yourself and the children. If you like hand-work you will be pleased with this unique book of directions for every article illustrated. Postpaid upon receipt of 25 cents (coin preferred). Just ask for Book 2, and address Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

Cleaving Diamonds

Cleaving a great diamond is a delicate operation because it must be done with the grain of the stone, which is sometimes difficult to determine, even after a year's study. When Asscher cleaved the Cullinan diamond in 1908, he had a physician and two nurses with him, fearing a heart attack if he made a mistake. Although successful, he spent the following three months in a hospital, suffering from a nervous reaction—Collier's Weekly.

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you scold those dearest to you? If your nerves are on edge, try LYDIA E. PINKHAM'S VEGETABLE COMPOUND. It often helps Nature calm quivering nerves. For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure. Make a note NOW to get a bottle of world-famous Pinkham's Compound today WITHOUT FAIL from your druggist—more than a million women have written in letters reporting benefit. Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

MAIL THIS COUPON NOW

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—Georges Bonnet, France's new foreign minister, has been a vigorous advocate of a British-French-American alliance.

French May Join Four Power Pact

He is regarded as more in accord with the Chamberlain policies than his predecessors. With the downfall of the Left government, the conclusion of an Anglo-Italian agreement and the appointment of M. Bonnet, interpreters of European politics see an advance toward a four-power pact, possibly five-power, with Poland in, and the further isolation and immobilization of Russia.

The abandonment of the French-Soviet treaty is expected to be an immediate issue in what is regarded as a sharply clarifying outline of dominant conservative policy in France and England.

M. Bonnet, shrewd, suave, dressy, is a somewhat rakish figure, with his hat usually on the back of his head, but a personage of power and dignity in the political forum. He is of the younger school of French politics, and, in that connection, one of the best Jai Alai players in France.

At his country place at St. Georges de Didonne, he spends much time making incredible kangaroo leaps, playing pelota basque, as they call it there.

M. Bonnet Cuts Didos on Estate

But, in statesmanship, he is no rubber-heeled bounding basque. He is rather a wary and adroit fencer.

When he was appointed ambassador to the United States in January, 1937, he brought with him a year's supply of truffles and pate de foies gras. He had to take most of it back, however, as, in July, he was recalled to save the franc in the Chautemps cabinet.

He was supposed to have saved it, but, as usual, it didn't stay saved, and, in the turn of the Ferris wheel, which is French politics, he was down-ender and up again.

He is an economist, but also a philosopher and author, in the chamber of deputies from southwest France at the age of thirty-six and a former minister of budget, pensions and finance. He budgets a few wisps of hair carefully across his bald pate and surveys the world warily through gold-rimmed spectacles.

JAPAN'S strongly authoritarian government, with its feudal carry-over, has never fitted exactly into any of the molds of ultra-modern absolutism.

Spotlight Now on Japan Strong Man

The intensifying issue of fascism which may force out the present government spotlights several likely-looking "strong men" as possible successors to Premier Konoye.

The only one with apparently clearly formulated ideas, and a fluent line of totalitarian talk is War Minister General Hajimi Sugiyama.

After several years of European post-graduate studies in direct action, he returned to talk of "national renovation," "decadent parliamentarianism," "unity and discipline," and the like. More than any other leader, he employs the standard terminology of fascism—if that means anything.

On May 27, 1937, he gave the diet quite a lacing and said that it would have to behave, or "we will dissolve it." Since he was then a member of the ruling military triumvirate, this was no casual editorial "we."

Sugiyama Tells Diet to Behave

While he is fifty-eight years old, he hits big-time politics with a strong momentum, not a contender for high place until 1936, and hence not track-sore, like some of his rivals. He did not become a general until 1936, after the army revolt early in that year. He had been vice-minister of war and head of the military air force.

His heavily underslung face, resting, neckless, on a heavy torso, is asymmetrical, with one eyebrow always cocked, one side watchful and the set of a Benda mask of a dictator. He is of the army caste, graduated from the national military college. He represented Japan at the 1928 disarmament conference at Geneva, remaining in Europe for several years thereafter.

Elephant Remembers

An elephant walked along a road near Rangpur, Bengal, a man in a garden shouted and made faces at it. The beast ambled into the garden, but the mahout restrained it while the mocker fled to safety. When the elephant returned along the road the same night it rushed at its tormentor's house and badly damaged it.

FROM PEN to PLATTER

Forty-five million pounds of steaks, chops, roasts and stews are consumed daily in the United States, the product of five and one-half million farms which now hold 133 million head of cattle, hogs and sheep. So immense is the industry that 24 cents of every farm dollar comes from livestock sale, and 29 million people are employed in the

work. From western ranges like that at the right, thousands of carloads of beef are moved each fall to corn belt feedlots (below) to be finished for market. From 13 corn belt states comes 60 per cent of all our beef and much of the feed used in livestock production. Following is a bird's-eye view of the livestock and meat industry.

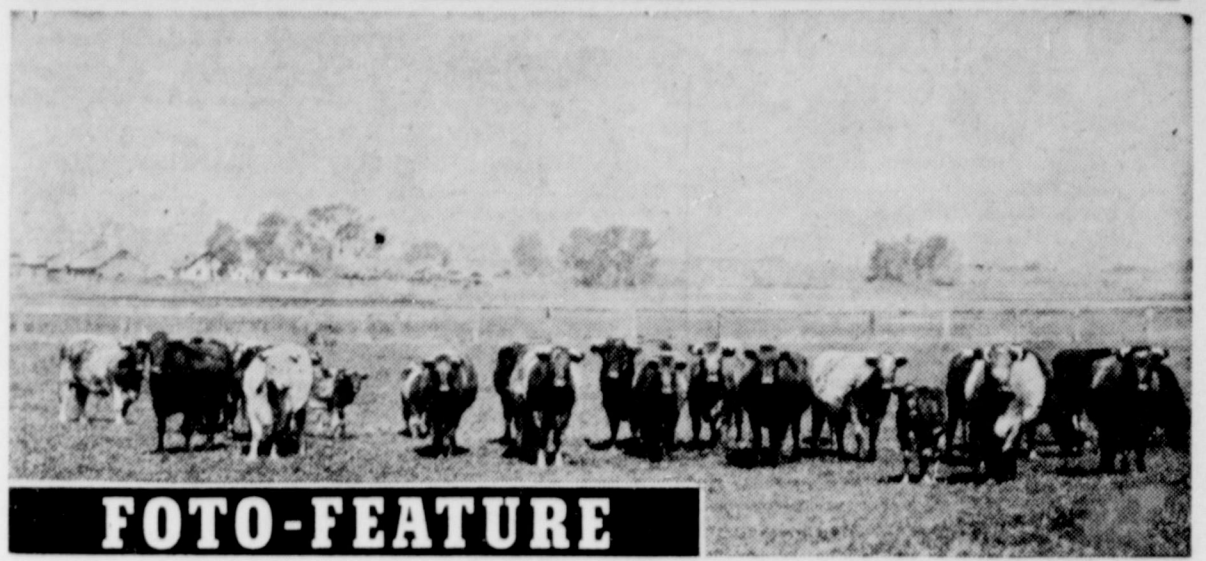

FOTO-FEATURE

Efficient production methods are responsible for "ton litters" of pigs (below) and blue ribbon lambs (right). Expositions and fairs have done much to improve livestock breeding and growing.

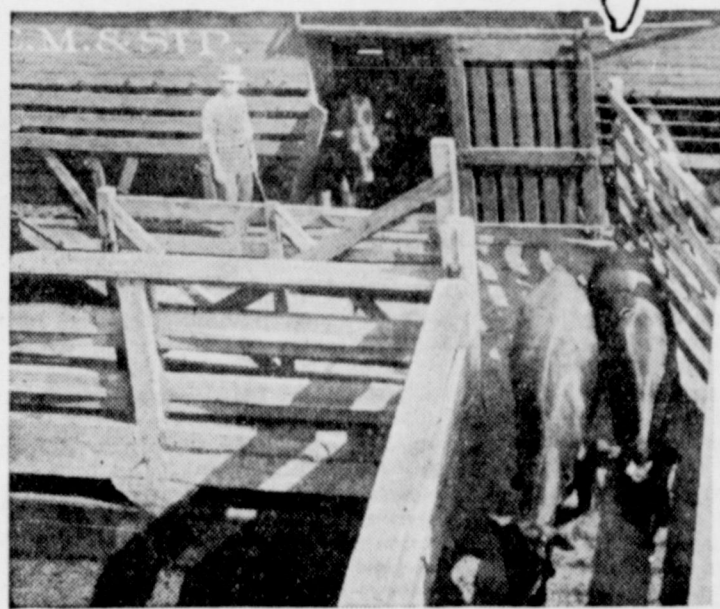

Sponsored by organizations like the National Livestock and Meat Board are research activities to improve meat's quality and palatability. Below are shown tests for tenderness and cooking methods.

The above map shows where our meat is produced. Two-thirds of it is consumed in states east of the Mississippi river.

Livestock shipping is important, for animals must be protected. Trucks join the railroads in this work today, and a steady stream of grunting, baa-ing loads reach terminals daily.

In the old days stockmen accompanied their animals to market. Now railroads work with commission firms which handle the entire transaction. An average car carries 25 cattle, 80 hogs or 250 lambs, the latter loaded in double-deck fashion.

Another factor in better meat production is 4-H club work by farm youths, a bigger item than most people realize.

Efficiency in livestock trading is equalled only by the packing house's efficiency in dressing its meat. Above is a typical scene where buyer and seller transact their business verbally, never in writing until some time later. A significant feature of these transactions is that all animals are paid for in cash and the check in settlement is tendered on the day of the sale.

Soon thereafter, the livestock will be on its way through the packing house. From the time it is dressed, meat is kept under constant refrigeration, going through processing until it appears in wholesale cuts, fresh from the cutting department and ready for the retail trade.

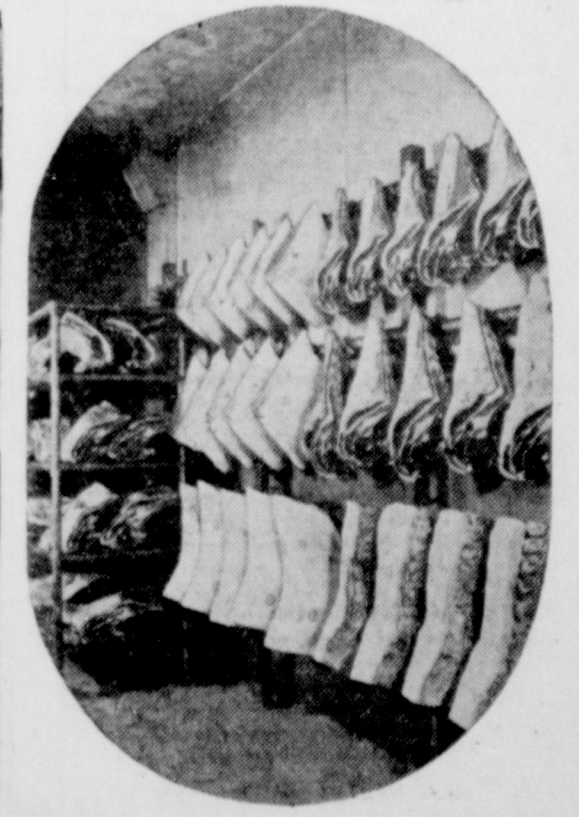

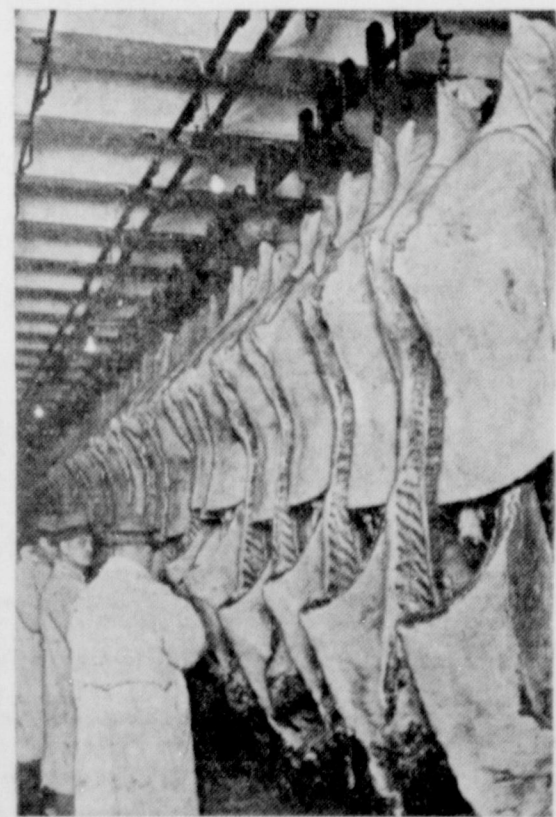

This is the final chapter in the story of another industry where the modern giant, Research, has been of untold importance in improving the product. Yesterday's tough steak, thanks to science, is only a nightmare.

In 1,100 American packing houses inspectors watch over meat as it goes through the plant and on to the retail market.

At 160,000 retail shops American housewives can now buy a different meat cut every day for at least four months, because the modern market caters to women who want variety in their menu. Right: The "finished product" of a nation-wide industry.

POLITICAL ANNOUNCEMENTS

The Friona Star is authorized to announce the following list of persons as candidates for the offices shown above their respective names, subject to the decision of the Democratic Primary Election, to be held on Saturday, July 23, 1938.

- FOR SHERIFF**
A. D. Hinson.
EARL BOOTH (Re-election)
CHAS. LUNSPFORD.
- FOR COUNTY JUDGE**
Walter Lander (Re-election).
LEE THOMPSON
D. K. ROBERTS.
- FOR COUNTY AND DISTRICT CLERK**
E. V. Rushing (Re-election).
A. M. EZELL
LEO McLELLAN.
- For County Treasurer:**
ROY B. EZELL (Re-election)
E. G. (BLACKIE) WILLIAMS.
- For County Attorney**
A. D. SMITH.
- For County Commissioner, Precinct No. 1:**
J. M. W. ALEXANDER (Re-election).
L. F. LILLARD.
A. B. (BEE) SHORT.
W. E. (TOM) FROST.
I. L. (JIM) SHAPPER.

For District Attorney:
JAMES W. WITHERSPOON

JODOK
I do not like it, for it worries me most when I am working, then I would have a little more excuse for not working; but I do not need any excuse for not resting.

Then there are younger men who also have a sympathy for the older men, which fact I had verified recently when our good County and District Clerk, Eric Rushing, asked me to ride with Hereford and return an invitation which I gladly accepted and a trip which I truly enjoyed.

Now Eric is a candidate for reelection, but during that entire trip of forty-four miles (22 over there and 22 back home) he never once asked me to vote for him, nor even intimated such a thing. Now, the fact is, he could almost have forced me to make him that sort of a promise, for he could have stopped his car near Hereford and told me to either agree to vote for him or get out and walk, and you know that when a man gets into his "eighties", 22 miles is just more of a walk than he wants to contract for, and not even younger men care to undertake it, as I can state from experience.

But Mr. Rushing did nothing of the kind, which shows the real gentleman that he is. He was just as nice as he could be and showed me every courtesy in his power during the entire trip. Well, Eric and I have been mighty good friends for a long while, and so far as I am concerned we are going to remain that way.

Mr. and Mrs. Irwin of Rush Springs, Oklahoma, arrived here on Sunday to visit their children, Lawrence and C. H. Irwin, also to visit in the J. P. Wilson home. Mrs. Irwin and Mrs. Wilson are sisters.

GIRL SCOUT NEWS

The Girl Scouts met April 28th. We practiced our play and made arrangements for the Girl Scouts to go to an Amarillo camp on the 33rd and 24th.

MOTHERS' DAY SERVICE AT METHODIST CHURCH

We will observe Mothers' Day at the Methodist Church Sunday in both the church school and the morning church service. In addition to the pastor's Mother's Day sermon there will be special music by a quartet arranged by Mr. W. C. Osborn and a solo by Miss Joyce Olea Barker.

Appropriate flowers have been ordered to supply everyone who attends the services. Let us honor our mothers by attending church on her day.

There will be no evening service at our church, due to the fact that the baccalaureate sermon is to be delivered at the school that evening.

When you attend our services, we do our best to give you something that will help you. Come and worship with us Sunday.

Watch for our program of work. Important and interesting things are being planned in our church and we do not want you to miss them.

C. R. Hardy, Pastor.

ATTENDED FUNERAL OF HER FATHER

Mr. and Mrs. C. A. Turner and family returned Thursday of last week from Wichita Falls, whither they had been called on account of the death of Mrs. Turner's father, Mr. J. H. Elam, whose funeral they attended.

Mr. Elam had reached the ripe age of 75 years, 1 month and 19 days and was the father of nine children, all of whom survive him, and a rather unusual but happy condition surrounds this family of nine children, 23 grand children and 3 great grand children, that no death among them has yet occurred to bring sadness upon them; all of them being still living.

Mr. and Mrs. Gray of Clovis, New Mexico, were Friona visitors, Saturday evening.

Mr. Obe Thurman of Hereford, called on friends here, Saturday.

Ms. Belew was an Estelne visitor the first of the week.

Mrs. J. C. Wilkinson, who has been in poor health for the past few weeks, is reported to have suffered a slight relapse this week.

Mrs. Webb and small son of Dimmitt, Texas, is visiting here, in the home of her sister, Mrs. Fred Rogers.

SAID IT RAINED AT FT. WORTH

E. L. (Smoky) Price, one of our popular barbers, visited with relatives and friends at Gainesville and Fort Worth last week, returning home Sunday.

"Smoky" says it rained almost continually during seven of the days he was down there, and what he means, it rained. It was no drizzle-draze about it, albeit, the rain did not destroy the pleasure of his visit by any means. He really had a joyous visit.

WITH THE CHURCHES

BAPTIST CHURCH ANNOUNCEMENTS

Sunday Services:
Bible School 10:00 a. m.
Preaching Services 11:00 a. m.
B. T. U., 6:45, Evening.
Prayer Meeting, Wednesday Evening, 7:30.
W. M. S., Tuesday, 2:30 p. m.
Joe Wilson, Pastor.

Notice of Services

Summerfield Baptist Church
Sunday school each Sunday at 10:00 a. m.
Preaching each second and fourth Sunday at 11:00 a. m. and 7:30 p. m.

W. T. Legg, Sunday school director.
Thurman Atchley, B. T. U. director.
Rev. H. B. Naylor, Pastor, Evangelist.

Lazbuddy Baptist Church

Sunday school each Sunday at 10:00 a. m.
Preaching services each first and third Sunday at 11:00 a. m. and 7:30 p. m.
G. C. Tiner, Sunday school supervisor.

UNION CONGREGATIONAL CHURCH

"In essentials, unity; in non-essentials, liberty; in all things, charity."

Each Sunday:
Church School at 10:00 a. m. Otha Whitefield, superintendent.
Worship Service and preaching at 11:00 a. m. Carl C. Dollar, minister.
Choir practice each Friday night, Milford Alexander, choirster; Mrs. Floyd Reeve, pianist.

Business meeting on Monday night after the third Sunday of each month.
Young People's meeting each Tuesday night, 8:00.

Next Sunday is "Mother's Day" but the local church will not be prepared to present a "Mother's Day" program on that day owing to the fact that the pastor, Rev. C. Carl Dollar, has been asked to preach the baccalaureate sermon for the school, but he has promised an observance of the day with fitting ceremonies for the following Sunday, May 15th.

Our pastor has been away the greater part of this week in attendance at the Oklahoma State Association of Congregational Churches, that was held Wednesday and Thursday of this week at Carrier, Oklahoma.

The public is cordially invited to attend our Sunday school and worship services each Sunday.

W. C. Norwood spent last week or ten days visiting at and near Fort Worth, returning home the latter part of last week.

Miss Joyce Landrum was shopping in Hereford, Saturday.

COUNTY AGENT'S NOTES

Weekly Schedule:

Wednesday 4: Live-at-Home club, grooming center study.
Thursday 5: a. m., Midway 4-H club, pictures; p. m., Midway woman's club, grooming center.
Friday 6: a. m., Oklahoma Lane 4-H club, pictures; p. m., woman's club, grooming center.
Saturday 7: p. m., 1:30, reporter's association meeting, Bovina Methodist church; 2:30, Parmer County Council meeting; 4:30, section committee to decide delegates to A. & M. Short Course.

Monday 9: p. m., Lakeview club.
Tuesday 10: a. m., Lakeview 4-H club; p. m., Lazbuddy woman's club.
Wednesday 11: p. m., Homeland club.

Community Supper Held

On Friday night of last week, the Lakeview club women held a community supper at the school house in that vicinity, with 125 members and non-members attending, according to information received by Margaret St. Clair, demonstration agent. The women prepared and served a meal featuring dishes which had been studied in recent months.

Oklahoma Lane 4-H Club

Old rugs can be made into something useful by making them into rugs or mats. These rugs or mats can be used in different ways and are cheap and easily made.

An enjoyable club meeting was held by the 4-H club girls of Oklahoma Lane on April 15, directed by Miss Margaret St. Clair, demonstrator.

Rug making from old rugs was the study of the day and each girl was allowed to try her skill. Evelyn and Viola Hromas and Gracie Lee were appointed for the entertainment for the next meeting.

Those present were: Misses Bonnie Kepley, Alene Thompson, Velma Kube, Marie Jones Ernestine Poester, Annie, Viola and Evelyn Hromas, Avis Donaldson, Sula Moore, Lois McGuire, Mrs. E. W. McGuire, sponsor, and Miss St. Clair.

Weekly Schedule:

Wednesday 4: Parwell office.
Thursday 5: a. m., Midway 4-H club; p. m., Parwell, accepting 1938 work sheets.
Friday 6: a. m., Oklahoma Lane 4-H Club; p. m., Parwell, accepting work sheets.
Saturday 7: Parwell office, accepting work sheets.
Monday 9: Parwell office, accepting work sheets.
Tuesday 10: a. m., Lakeview, 4-H club; p. m., Bovina, accepting work sheets.
Wednesday 11: Friona, accepting work sheets.

Behind the 4-H Club Program

I did not know until Thursday of the past week that the business men of Parmer county were so interested in the farm boys. I dislike the idea of asking for money to advance the work, so a 4-H club contest was worked up to provide some useful prizes so the boys would have a lasting remembrance of the contest. I am sure it would have been possible to have offered at least 30 different prizes, because all of the business men were not asked to contribute to the prize list. In behalf of the club boys of the county, I should like to express our thanks to those who were so generous with the prizes.

A brief outline of the rules of the contest follows. For further information see county agent.

Sponsored by the county agricultural council in cooperation with the business men of Bovina, Parwell and Friona, 4-H club boys of the county are offered a contest for the best story on the subject "Best Methods of Farming to Control Wind Erosion."

All boys in the 4-H clubs of the county are eligible to compete, the purpose being to encourage better methods of farming to control water and wind erosion. Entrants must be active club members, enrolled in club work not later than May 6, 1938. The county agent will certify the list of eligible contestants.

Fifteen groups of prizes will be awarded, furnished by the various merchants of the three towns sponsoring the affair, ranging from a Spotted Poland China pig downward. In each group save that of first prize two and three prizes will be given for 2nd, 3rd, and 4th.

The contest opened on May 2 Monday of this week, and will close on Saturday, May 28. All stories must be mailed to the agent's office not later than midnight Saturday. Prizes will be awarded on Friday, June 3, in Parwell, starting at 3 o'clock in the afternoon.

The story must be headed "Best Methods of Farming to Control Wind Erosion." The contest will be conducted so that boys under 13 years of age will have an equal opportunity to win first as boys over 13.

Boys under 13 years shall write not less than 100 words nor more than 175 words, with those over 13 writing not less than 325 nor more than 400 words. Each boy shall

count his number of words, and list the total at the conclusion of the story.

Stories must be in the boys' handwriting, and on regular school paper such as is required where the boy attends. Advice may be asked from members of the family, but credit must be given in the story for these suggestions.

Complete details of the approved farming methods should be listed in the body of each essay, with at least one paragraph about practices followed by some farmer in his community, on controlling wind erosion.

The Agricultural Council will select 30 outstanding papers, with five persons appointed to make the final selection, ranking them according to a specified score card, which is as follows:

Boys under 13—written in ink, 5; correct subject on first line, 56 neatness, 35; type of story, 50; paragraph about outstanding farmer, 5. Boys over 13—written in ink, 2; correct subject on first line, 5; neatness, 25; type of story written, 40; proper credit for outside reference material used, 23; paragraph about outstanding farmer, 5.

May 15 Final Date For Worksheets

The State Agricultural Conservation Committee has set May 15 as the final date for cooperators in the 1938 Agricultural Conservation Program to file a worksheet in the county office. Any worksheet which may be offered Monday, May 16, will be marked NO PAYMENT, and the operator will not receive payment according to the provisions of the program.

The regulations provide a TWO WEEKS PUBLIC NOTICE shall be given to all those operators who may desire to cooperate in the program. Letters are being mailed to all operators who have turned in their legal description of the farms they will operate in 1938. A recent check of the map shows that many acres of land have not been turned in.

Sign-up dates follow (9 o'clock to 5 o'clock each day):

- May 5 through May 9 at Parwell.
 - May 10 at Bovina.
 - May 11 at Friona.
 - May 12 at Lazbuddy.
 - May 13 and May 14 at Parwell.
- Community committeemen will assist in the taking of worksheets, and for that reason enough clerks will be available to accommodate many operators each day. We are not asked to take as much record information as was the case in 1937, which should speed the program.

Each operator who desires to comply with the program should sign up at one of these places.

M. and Mrs. Elvin Johnson of Berger, Texas, spent the weekend here with relatives and friends.

Mrs. Williams, of Amarillo, Texas, was transacting business here, the first of the week.

Mr. and Mrs. Howard Morris and children visited relatives in Amarillo, Sunday.

Mr. Floyd Johnson of Amarillo, was a Friona visitor last week.

Mr. Dick Walker of Hereford, was in Friona, Tuesday.

Mr. L. B. Redwine of Hereford, visited in the O. G. Turner home, Sunday.

Mrs. M. S. Weir was shopping in Clovis, New Mexico, Monday.

COUNTRY CORRESPONDENCE

LAZBUDDY NEWS
Received Too Late For Last Week

Betty Bledsoe, Tech student, spent the holidays with her parents, Mr. and Mrs. R. L. Bledsoe.

Mrs. Cecil Malone, of Friona, visited her parents, Mr. and Mrs. O. M. Jennings, from Wednesday until Friday.

Mr. and Mrs. Morris Childers, of Muleshoe, visited Mr. and Mrs. Morris Whit, Sunday.

Jim Capenter, from Olney, visited in this community this week.

Mrs. J. E. W. Jennings, of Lubbock, is visiting in the home of Ophel Jennings, this week.

This part of the country received about a half-inch of rain Tuesday afternoon, then received a strong wind all night. This will help the wheat along for a while. The rain we are referring to, of course, and not the wind.

LAKEVIEW NEWS

There were 60 present at Sunday school Sunday, and Rev. Ruth preached after Sunday school. There were several new members for Sunday school whom we are very glad to welcome. Any who are not attending Sunday school elsewhere are urged to come and join us.

There were several of this community who went to the singing in Friona, Sunday afternoon.

Miss Ruth Melton spent a few days in the C. A. Guinn home last week.

Mr. and Mrs. E. G. Williams and Mrs. Dunn and baby, of Parwell, were visitors in the Fred Barker home, Friday Mrs. Dunn and baby stayed over until Sunday before going home.

Buel Jordan has been ill with a throat ailment this week.

Fred Barker has been suffering from rheumatism the past week.

Mr. and Mrs. Norris Wesson and baby girl, visited her parents, Mr. and Mrs. James, Sunday.

Mr. and Mrs. C. D. Rundell and children, and Messrs. Edd and Willard May, and Billy Parsons, spent Sunday in the Joe Pittman home.

Mr. and Mrs. Claude Kuykendall have gone to Arizona for a load of fruit.

Several of the ladies gave Mrs. L. M. Crow a surprise quilting Monday afternoon. Those present were: Mmes. E. B. Whitefield, P. Harper, V. F. Parsons, C. A. Guinn, C. D. Russell, Clifford Crow, D. O. Roberson, Roy Johnson, Crow and Elmira Refreshments of ice cream and cookies were served.

Don't forget to come see the play "Deacon Dabbs," to be given at the Lakeview school building, Friday night, May 6th. The admission price is 15 and 25 cents.

Miss Alla May Reed spent Monday night with Miss Polly Parsons.

"Dictator," Roman Word
The word "dictator" is a Roman word to describe a person legally appointed by the senate or governing body for meeting a special crisis during a brief period. He was a constitutional, unselfish statesman, and retired quietly as soon as his brief period ended. There was another title, "tyrant," for men who forced their way to control of the state and tried to remain in power, according to an authority in Pearson's London Weekly. Caesar was assassinated because his enemies said he was a tyrant, not a dictator. Dictators are true statesmen; tyrants are despots.

The African Native Healers
African native healers work with herbs, divining bones (dice), and magic. The more mystic the methods of the medicine men, the higher they are rated in their profession. Those results which are shown by the healers are brought about either by coincidence or the so-called power of suggestion. Yet there are sufficient believers in the magic medicine to make it a lucrative business.

NOT YET INVENTED

The customer walked into the jeweler's shop and asked to see the manager.

"Have you any alarm clocks?" she demanded.

"Certainly, madam," replied the manager. "A new supply is just in. About what price?" "Price is no object," said the customer. "The kind of clock I want is one that will wake the girl in the morning without disturbing the whole family."

The manager shook his head sadly.

"I'm sorry, madam," he told her. "I don't know of any clocks of that kind. We just stock the ordinary ones which wake the whole family without disturbing the girl."—Answers Magazine.

SPRING BREEZES

He—It's like a breath of spring to see you.

"No—nothing more than half-shot, I'm glad to say."

WHAT to EAT and WHY

C. Houston Goudiss Discusses

FOOD PRESERVATION and Explains How to Protect Your Family Against the DANGERS of TAINTED FOOD

By C. HOUSTON GOUDISS
6 East 39th Street, New York.

A DISTINGUISHED nutritional scientist once remarked that it is a small favor to keep people alive on a poorly chosen diet. For with the wrong food, they may not get one-fifth of their potential efficiency into their lives; they will drag themselves through miserable days, never knowing the joys of physical fitness nor enjoying the abundant health that comes from a perfect balance of nutriment.

The Perfect Diet May Not Be Safe to Eat

But even the homemaker who plans an ideal diet may be undermining the health of her family by feeding them spoiled or tainted food which carries the deadly germs of disease.

We frequently hear stories of death or serious illness caused by food contamination. And it is significant that the improper care of food in the home is most often responsible. One physician has gone so far as to state that there is no estimating the number of persons who, while not sick in bed, feel "rather poorly," "not strong," or "kind of run down" because improperly preserved food gives them insufficient nourishment and their strength is exhausted in combatting the action of germs.

Homemaker's Responsibility For Food Sanitation

An enormous amount of time and money is expended to put foodstuffs in your kitchen in a fresh, palatable and safe form. Laws govern the manufacture, transportation and merchandising of every food product and an elaborate system is maintained for the inspection of meat. But all this care can be undone if food is not adequately refrigerated in the home.

From the moment that meats, fruits, vegetables and groceries reach your kitchen, the responsibility is yours, and you will be guilty if your husband and children suffer ill effects from eating tainted food.

Causes of Food Spoilage

Spoilage in food is due to the ravages of a vast army of micro-organisms which cause it to sour, decay or putrefy, depending upon the nature of the food.

There are three classes of micro-organisms which develop in food—bacteria, molds and yeasts. All three are notable for their minute size, rapid growth and wide distribution. Yeasts and bacteria can only be seen with the aid of a microscope.

Not all micro-organisms are the enemies of man; some are useful in the preparation of foods such as cheese, sauerkraut and bread.

These need not concern the homemaker. But the harmful bacteria will flourish wherever conditions are favorable to their growth.

There are two important factors governing food preservation. One is the maintenance of a constant temperature of from 40 to 50 degrees Fahrenheit—under no circumstances should food be stored at a temperature higher than 50 degrees, or bacteria will multiply so rapidly as to make it unsafe to eat. The other is to maintain the proper degree of moisture in the air—neither too much, which encourages the growth of micro-organisms, nor too little, which dehydrates fruits and vegetables.

Appearance of Food May Be Deceptive

The great danger of food that is improperly stored is that it may become spoiled without advertising that fact. Appearance is seldom a reliable guide and unless your refrigerator is efficient, food may become unfit for consumption before spoilage can be noted by sight, taste or smell.

All types of protein foods harbor bacteria which multiply rapidly at temperatures higher than 50 degrees. Under favorable conditions of moisture and temperature, bacteria double their number every 20 to 30 minutes, and a single bacterium can produce a million bacteria in 15 hours.

Safeguard Children's Milk

Milk is the most perishable of all foods, because it is an ideal medium for bacterial growth. If this master food is to be kept safe for children, it must be stored at a temperature not higher than 45 degrees.

Careful studies show that there is very little increase in bacteria when milk is held for as long as 48 hours at a temperature of 40 degrees. But when the temperature was allowed to rise to 50 degrees, almost 30 times as many bacteria developed, and at 60 degrees, the bacteria multiplied more than 8,000 times in the same period.

Foods That Spoil Easily

The rapid multiplication of bacteria also occurs in other foods having a high protein content, including meat, meat broths, fish, gelatin, custards, creamed foods, peas and beans. It is important that all these foods, as well as milk, be kept in the coldest part of the refrigerator, as a few degrees in temperature make a great deal of difference in preventing spoilage.

Once food has begun to deteriorate, it must be discarded or it may endanger health. Cooking will not make spoiled foods fit for consumption.

How to Prevent Mold

Molds are another form of spoilage that the homemaker must constantly battle. Mold will grow on almost any substance, but is particularly likely to occur on acid foods, as lemons, oranges, tomatoes and berries; on neutral foods, such as bread and meat; on sweets, notably jellies and preserves, and on salty foods, including ham or bacon.

Molds may develop quickly or slowly, depending upon the temperature and degree of moisture. They thrive under the influence of warmth and moisture and may remain invisible to the naked eye for as long as 36 hours. All molds are white at first, but as they mature they change color, becoming blue, red, or assuming various shades of brown.

To the bacteriologist, these colors have different meanings. To the homemaker, they all tell the

Have You a Question? Ask C. Houston Goudiss

C. Houston Goudiss has put at the disposal of readers of this newspaper all the facilities of his famous Experimental Kitchen Laboratory in New York City. He will gladly answer questions concerning foods, diet, nutrition, and their relation to health. You are also invited to consult him in matters of personal hygiene. It's not necessary to write a letter unless you desire, for postcard inquiries will receive the same careful attention. Address him at 6 East 39th Street, New York City.

same story—that through improper storage food has lost its appetite appeal and palatability.

Mold growths may be destroyed by boiling temperatures. They may be retarded by keeping food in the cold, dry circulating air provided by an efficient refrigerator.

A good refrigerator is the best investment a family can make. It enables you to take advantage of bargain prices to buy food in quantity. And it safeguards health by preventing contaminated food from finding its way to your table.

An efficient refrigerator also preserves the flavor and texture of meats, fruits and vegetables, so that you enjoy these foods at their best. But its greatest contribution to human welfare is the preservation of food so that it will nourish your body instead of poisoning it.

Questions Answered

Mrs. S. T.—When thoroughly chewed and given a proper place in the diet, cheese is usually well digested. Experiments performed by the United States Department of Agriculture demonstrated that an average of 95 per cent of the protein and over 95 per cent of the fat of cheese were digested and absorbed.

Mr. B. M. G.—Yes, cooking vegetables leads to a reduction of their energy values, as well as mineral salts. In general, there is a reduction of from one-third to one-half of the carbohydrate after cooking in water. Frequent reheating cannot be recommended as thrice-boiled vegetables contain little available carbohydrate, and the greater part of their minerals and flavor is also lost.

© WNU—C. Houston Goudiss—1938—9

New Beauty for the Home

Self-polishing wax for the household is practical—protective—and popular! Its already wide use is increasing yearly, throughout the homes of the country. And it is the efficient, up-to-date homemaker who regularly applies this amazing product to the floors of her home. The unusual feature of a good self-polishing wax is the maximum beauty it affords, with the minimum labor—both in application and upkeep. It's on in a jiffy—dries thoroughly in 20 minutes—and results in resplendent floors that gleam like satin, look like new, and "dress up" the entire house. A quality self-polishing wax is urged, however, for it is more resistant to dust and dirt, its richer content lasts longer, and shows up to more glowing advantage the natural color and pattern of the wood. Yes, a good self-polishing wax is truly a domestic gem that is inexpensive—time and trouble-saving—and definitely beautifying!

FLOORS POLISH THEMSELVES

...with O-Cedar Self-Polishing Wax. No rubbing—simply spread it on and let it dry—then watch your floors sparkle! Non-slippery, long-wearing—eliminates scrubbing—dusting alone keeps floors clean. Full qt., only 85¢.

Do You Want to Know Where to Find the Different Vitamins?

Get This Free Bulletin Offered by C. Houston Goudiss

READERS of this newspaper are invited to write to C. Houston Goudiss at 6 East 39th Street, New York City, for his new "Vitamin Primer" which tells the facts that every homemaker needs to know about vitamins. In simple chart form, the functions of each vitamin are explained, and there is a list of foods to guide you in supplying your family with adequate amounts of these necessary food factors. A postcard is sufficient to carry your request.

"It's Great!" Say Millions About Pepsodent with IRIUM

Irium contained in BOTH Pepsodent Tooth Powder and Pepsodent Tooth Paste

You can't deny facts! Results on millions of people PROVE that Pepsodent containing Irium is more effective... PROVE that modernized Pepsodent can bring about a vast improvement in dull, surface-stained teeth. Once you've tried Pepsodent containing Irium you'll be equally enthusiastic... you'll thrill when you see your teeth gleam and sparkle with all their glorious natural radiance! Pepsodent with Irium is completely SAFE. It contains absolutely NO GRIT, NO FUMICE, NO DRUGS. Try it today!

Picture Parade

HEY THERE YOUNG FELLOW! Wait a minute! During National Baby week it isn't polite to cry your heart out. Maybe you didn't like the cameraman, but you might at least be polite about it. Okay, we'll put you down as a cry-baby and let it go at that. As for the youngster below, he merely frowned at our unpopular cameraman, registering distaste in a more subtle way. We'll classify him as a frown-baby.

These two babies are different as night and day. The little chap at the left is an afraid-baby. Seems our cameraman gets a cold shoulder wherever he goes. But wait! The chap below poses very willingly, even smiles. He's a happy-baby, we guess.

But his parents are proud of this picture.

And this little girl is just a pretty baby . . . no two ways about it. She boasts a sweet disposition, and look at the eyes she's making at our cameraman. Lucky fellow!

Hey! Take that cup out of your mouth! Still, you don't seem afraid . . . guess you're just wondering, so we'll call you a wonder-baby. But the sun bather at the right is a detective-baby, trying to figure out why a fellow has to wear glasses while taking a sun bath. He didn't want a sun bath in the first place but a fellow doesn't have much choice.

And these are just plain babies, six bundles for National Baby Week

Speaking of Sports

Deal for Dean Recalls Jinx On Cub Trades

By GEORGE A. BARCLAY
MORE words have probably been written about the Dizzy Dean deal than any sporting event since the Dempsey-Tunney fight. In all the writing there's a little word called "if" that is going to be important in the months to come. For "if" looms mountain-sized in the trade that brought Dean to the Cubs in return for \$185,000 in cash and Pitchers Curt Davis and Clyde Shoun and Outfielder George Stainback.

If Dizzy returns to great pitching form he will deserve the title of "\$250,000 beauty." Phil K. Wrigley

Jerome "Dizzy" Dean

will be called the David Harum of baseball and Cub fans can start ordering their world's series tickets.

If Dizzy causes Charley Gimm no jitters, if he settles down to business, if he pitches for the best interests of the team, if he gets along well with his teammates and his employers, then Chicago will have cause for rejoicing.

Aids Box Office

The Cubs have acquired a great, but eccentric pitcher, a baseball personality more colorful than anything since Babe Ruth and a box office attraction of first magnitude. But at best he is hard to handle.

Some authorities have viewed the deal with skepticism, for Branch Rickey and Sam Breadon are noted for their caniness.

On the other hand, the Cub record on trades in the last five or six years has been one headache after another. The Dean trade may break the jinx. Only one of those deals was really satisfactory and in the process the Cubs tossed about a million dollars in cash and players around the league. That was the trade that brought Tex Carleton, at present top pitcher on the staff to the Cubs from St. Louis in the off season of 1934 in return for Pitchers Bud Tinning, Dick Ward and a bundle of cash.

Worst bust of all was the Chuck Klein deal. The Cubs laid out \$125,000 plus three players to the Phillies for the National League's then prize slugger. His clean-up attempts were pathetic and three years later a disillusioned management traded him back to the Phillies along with Pitcher Fabian Kowalik and cash for Curt Davis and Ethan Allen. Allen was of little use and went to

Chuck Klein Babe Herman

the St. Louis Browns. Davis developed brittle tendencies that kept him out of action and made him an in-and-out-er.

Another deal that soured was the one that sent Lon Warneke to the Cardinals in return for Pitcher Roy Parmelee and First Baseman Rip Collins. Parmelee has gone to Minneapolis and Collins up until now has not played the brand of ball expected of him by Charlie Grimm.

Camilli Headache

The Dolph Camilli-Don Hurst swap was fine business for everybody but the Cubs, particularly in view of the fact that Hurst didn't last the season out and Camilli became a fence-buster.

The Babe Herman deal added another sour note. He came to the Cubs from Cincinnati for a reported \$75,000 and is now at Jersey City. Another trade was the one that sent Infielder Woody English and Pitcher Roy Henshaw to Brooklyn for Infielder Linus Frey. Frey, far from top-notch caliber, was shunted to Cincinnati this spring. English is still an able ball player.

But dismissing all this gloom, you cannot help but regard this latest deal with optimism. If he does nothing else, Dean will draw a good share of his purchase price back in the treasury via the turnstiles in a few games.

Baseball Centenary

JUST one hundred years ago this spring, Col. Abner Doubleday laid out the first baseball diamond on the commons at Cooperstown, N. Y., and the first game was played. In the early days baseball was called "One Old Cat" and was then re-christened "Rounders."

Although Doubleday's diamond has remained to this day, he did not perfectly devise rules at the same time. The first set of rules was formulated and played under by the Knickerbockers of New York City who were the first team to wear uniforms. They began to play regularly in 1842, and a few years later appeared on the field in blue trousers and white shirts.

In the early days there were eleven players to the side, including two shortstops and two second basemen. They didn't have innings in the old days. The first team to score 21 runs won the game and the batter could keep chasing around the bases and score as many as two or three runs on one hit until the ball was found.

The first extra inning game was played in 1852, the Knickerbockers beating the Gothams 22 to 21. The game was popular during the Civil war and there were hot contests between selected teams of the Union troops and the Confederate army. The games were played on neutral territory and attended by thousands of soldiers.

Al J. Reach was the first ball player to get a salary and the first to be sold from one club to another. Brooklyn sold him to Philadelphia in 1864 for \$275. The Cincinnati Reds were the first team to employ all salaried ball players. George Wright, the shortstop, was the star and drew down \$1,400.

Moody Comeback

OFF to Wimbledon in quest of her eighth tennis championship as well as the first step in an international comeback campaign is Mrs. Helen Wills Moody.

The story still persists that Helen's ultimate goal is the ranks of the professionals. It was whispered a while back that she very nearly turned pro and joined up with a troupe that features Fred Perry and Ellsworth Vines. Then, so the tales go, she considered her long layoff might be a detriment and resolved to fight her way back to the top of the heap in the amateur ranks and then as the ace woman player of the world demand a fat contract from the impresario of the pros.

This would all seem to add up, except that Helen may find her path

Helen Wills Moody

to the comeback filled with a number of tough hurdles, not the least of which are her arch enemy, Helen Jacobs, and Helen Marble who may be playing sensational tennis again in a short time. Then there is that Polish juggernaut, Jadwiga Jedrejowska, who has a habit of steam-rolling any opponent who shows fight.

Have You Noticed—

THAT there are a good many athletes who are standouts at one game who are also mighty handy at others? That would seem to indicate that athlete proficiency is an innate quality. Most big league ball players are expert golfers. Babe Ruth was one of the standouts in this direction, as is Sammy Byrd. On the other hand, Walter Hagen, Lawson Little, Bobby Jones and Tommy Armour are also expert marksmen with guns and pistols. Craig Wood and Eddie Loos, the figure and speed skating stars, are equally at home on a golf links, as are Ellsworth Vines and Fred Perry, the tennis stars, Johnny Weismuller the swimmer and Mush March, the Blackhawk hockey star. Jim Crowley, the coach at Fordham, who was quite a football player in his own day and more than average success as a coach, is a good enough handball player to have competed successfully in championship tournaments.

There are plenty of other examples. Glenn Cunningham, Don Lash, Johnny Woodruff and Joe McCluskey, all of whom set speed records in track events, are better than average swimmers. Birger Ruud, the world's ace skier, is a champion high diver. It's the same way with famous girl athletes, of whom the standout example is Babe Didrikson. Eleanor Sears and Mary K. Browne are as good or better at four or five sports than are most male athletes. Glenna Collett Vere, the golfer, is an expert at blasting crockery pigeons.

Light-Hearted Fashions

THE approach of summer makes us all long to get into bright, easy, carefree clothes, even if we're planning to vacation at home, with occasional week-ends at the lake or seaside. These

both tailor quickly and easily in denim, gingham, seersucker or jersey. Use a brilliant handkerchief print for the topper—any sturdy cotton. Here's a holiday outfit you'll thoroughly enjoy.

The Adorable Dirndl

Nothing is more popular, because nothing is more becoming to slim young figures. It's such a gay, easy-to-wear fashion, and the square neckline is flattering. For a dirndl, choose something in a lively print—linen, chintz and percale are best. Be sure the colors are as complimentary to your skin as that fitted, shirred waistline is to your figure!

The Patterns.

1332 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires 3 3/4 yards of 39-inch material for the bolero and slacks; 3/4 yard for the topper.

1480 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires 3 3/4 yards of 35-inch material, plus 3/4 yards of braid for trimming and 1 3/4 yards ribbon for belt.

Spring-Summer Pattern Book.

Send 15 cents for the Barbara Bell Spring and Summer Pattern Book which is now ready. It contains 109 attractive, practical and becoming designs. The Barbara Bell patterns are well planned, accurately cut and easy to follow. Each pattern includes a sew-chart which enables even a beginner to cut and make her own clothes.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Were you ever alone in a strange city?

If you were you know the true value of this newspaper
Alone in a strange city it is pretty dull. Even the newspapers don't seem to print many of the things that interest you. Headline stories are all right, but there is something lacking. That something is local news.
For—all good newspapers are edited especially for their local readers. News of your friends and neighbors is needed along with that of far off places. That is why a newspaper in a strange city is so uninteresting. And that is why this newspaper is so important to you. NOW is a good time to get to...

WORK ON HIGHWAY 86 CONSIDERED

(From State Line Tribune)
 Construction of another all-weather highway across Parmer county loomed as a possibility here today upon receipt of a letter from District Highway Engineer G. M. Garrett to County Judge Walter Lander, asking that the Parmer county commissioners court agree to furnish the right-of-way on Highway 86 between Bovina and the Castro county line in this county.

This action on the part of the county commissioners is considered the first movement toward paving the Bovina-Dimmitt route, Judge Lander explained, and it is his opinion that prospects for getting the gap between Bovina and the Castro county line paved within the next year or two are very favorable.

Asked what action the county commissioners would likely take on the request of obtaining the right-of-way, Judge Lander opined that "there would be no objection." However, he hastened to explain that that was a matter yet to be taken under consideration by the commissioners and he predicted that this would come up at the regular meeting to be held in Farwell next Monday.

Judge Lander said that the commissioners had at various times discussed the opening of this particular piece of right-of-way and it had been agreed that efforts should be made to obtain additional land on the north side of the present route in order to avoid the necessity of moving the high tension electric line of the Texas Utilities company, which parallels the route across the county.

In his letter to Judge Lander, Mr. Garrett stated that "funds have been allotted for the construction of the underpass on Highway 86 at or near Bovina . . . and it is contemplated that construction will be under way by December, 1938."

Quoting further from Mr. Garrett's letter: "There has been no definite recommendation for the construction of Highway 86 east of Bovina . . . and the funds are not yet available. We are attaching hereto a form for the commissioners to sign so there will be no misunderstanding."

"We would appreciate your attending to this at the earliest possible date so that we may be at liberty to make the survey whenever the resident engineer can send his crew out on this project."

FARM MEETING WELL ATTENDED

The county-wide farm meeting that was called for Friona, Tuesday night, was well attended by farmers from all parts of the county, and an interesting discussion of the farm situation under the new farm law was heard.

The Star has not been able to get a complete and definite report of the actual work and results of the meeting, but hopes to be able to report it.

NEW SUPERINTENDENT HERE MONDAY

It is authoritatively reported that the Board of Trustees of the Friona Independent schools has elected and secured the services of W. L. Edelman, as superintendent of the Friona schools for the coming term.

Mr. Edelman, who was in Friona Monday, has for the past two terms at least, been superintendent of the school at Spring Lake, and comes to Friona highly recommended for the position of superintendent of our schools. He will probably move his family here about the first of July.

RECORD OF WELLS IN PARMER CO. RELEASED

AUSTIN—The Board of Water Engineers and the Geological Survey, United States Department of the Interior announce the release in mimeographed form of the records of wells obtained by the Works Progress Administration ground-water survey in Parmer County, Texas. Copies of these records are available at the offices of the Board of Water Engineers and of the Geological Survey at Austin.

Copies may be consulted at the Chambers of Commerce at Hereford, Friona, Mulshoe, and Plainview, at the Deaf Smith County Library, Hereford, and at the high school libraries of Dimmitt, Olton, Mulshoe, Farwell, Friona, Bovina, Littlefield, Lazbuddy and Amherst.

This Parmer County release contains 46 pages, giving records of 307 wells, drillers' logs of 6 wells, logs of 58 test wells, partial chemical analyses of 151 water samples taken from wells, and 6 cross sections compiled from WPA test wells in dry lakes, sinks, creeks, or draws. The locations of all wells and test holes are shown on a map in the back of the release.

Funds for this project were allocated by the Amarillo office of the Works Progress Administration. The field work in Parmer County was started September 13, 1937, and completed February 16, 1938. L. C. Smyers, a geologist, E. L. Bradshaw and C. R. Pollett, engineers, successively, were project superintendents.

The chemical work was directed by Dr. E. P. Schoch of the Bureau of Industrial Chemistry of The University of Texas. Samuel F. Turner of the Geological Survey was Technical Director and W. O. George of the Board of Water Engineers was Assistant Director.

This project is part of a statewide inventory of water wells started in 1935 being conducted to obtain information concerning existing wells, to ascertain the quantity and quality of water they yield, to put down test holes in areas where no wells or few wells exist, and to compile and publish the information thus obtained.

The inventory is only a preliminary survey, and all information obtained can be used later in connection with a more thorough ground-water investigation by the State Board of Water Engineers assisted by the Geological Survey, United States Department of the Interior.

The Parmer County Commissioners' Court cooperated with the above mentioned agencies by furnishing transportation for the workers during the project.

HAD APPENDECTOMY

Mrs. Carl C. Maurer was an appendectomy patient in the Deaf Smith county hospital at Hereford where she is now recovering from the operation.

Mrs. Maurer was seized with an attack of appendicitis early last week and was taken to the hospital on Tuesday, where the appendectomy operation was performed.

At this writing, Wednesday evening, she is reported as improving rapidly, and will be able to return to her home within a few days.

Strength of a Lion

Naturalists have seen a lion leap over a nine-foot wall with a calf in its mouth, honeybees extinguish the flame of a candle with the breeze created by their wings, and a secretary bird four feet high, kill a venomous snake with one blow of its foot.

HEALTH NOTES

HEALTH
 AUSTIN—May is the month when most Texans take a look at the thermometer, make a dive for their bathing suits and hunt the nearest swimming pool or lake. Swimming is a fine sport but it does involve certain hazards. It is tragedy enough to have a drowning accident but far greater tragedy if no one present knows how to have a life by artificial respiration.

Dr. Geo. W. Cox, State Health Officer, advises that the "Prone Pressure Method" is the accepted one for restoring life from drowning. The method involves the following steps: Place patient stomach down, one arm stretched above the other bent, with face resting on it.

Rescue measures should begin at once and continue rhythmically until natural breathing is established. This may take four or more hours. The procedure is:

1. Kneel, and straddle the patient below the hips, placing hand on small of the back with fingers over the lowest ribs, tips of fingers just out of sight.
 2. With arms straight, while counting one, two, swing forward bearing weight on body firmly but not violently.

3. Swing backwards while counting one, straightening up and thus relieving pressure. This allows air to be drawn into the lungs.

4. Rest in this position for two counts.

5. Repeat these movements rhythmically, forward and backwards without interruption, above twelve to fifteen a minute, until natural breathing is restored.

6. Meanwhile, if assistance is at hand, a physician should be sent for, patient's tight clothing should be loosened at neck, chest or waist, and patient should be kept warm.

Patient should not be moved from this spot until he is breathing naturally and then should be carried in a lying position to a place where he can be kept warm and receive expert medical attention.

FRIONA WEATHER

Since our heavy rain and wind-storm of Tuesday of last week, we have had some three or four short winters, with as many short summers, of two or three hours duration each, but no falling weather of any kind.

Tuesday of this week, was perhaps the dirtiest day of this season here at Friona, the wind blowing all day, and rather fiercely during the afternoon, and carrying more dirt than was picked up locally, than on any other occasion of this year.

This day of wind resulted in a rather sharp tumble in the temperature and Wednesday was rather more than cool—in fact, some folk called it cold—and there was not much sitting in the shade done, during the day.

Wind got back to the southeast during the night and is still from that direction Thursday morning, and cool, but clear, with very little, if any, prospects for an early rain.

JOKE IN ASYLUM

A passenger in an airplane was far up in the sky when the pilot began to laugh hysterically.

Passenger—What's the joke?
 Pilot—I'm thinking what they'll say at the asylum when they find out I've escaped.

WILL FORECLOSE ON COUNTY'S SCHOOL LAND

At a recent meeting of the County Commissioners Court, action was taken demanding foreclosure proceeding on Parmer County's school lands, which are located in Gaines and Andrews counties, and Attorney Wm. Q. Boyce, of Amarillo, was employed as attorney to bring the suit and represent the county in the courts.

These lands, which amount to approximately 1,300 acres, were purchased by the Hereford Stock Farms, Inc., of Marland, Texas, of which Leo Goodmann, is president but the company having failed to make good on its purchase contract, the county has brought suit for repossession of the lands.

AND HOW

She (deeply interested)—And of course your rich uncle remembered you in making his will?
 He—He did that—remembered to leave me out.

No Wonder
 Mrs. Hazel—What dreadful language your parrot uses.
 Mrs. Knutt—Yes; my husband bought the bird in town and took it home in his car. He had three blow-outs and engine trouble on the way.
 —Royal Arcanum Bulletin.

Surely an Ancient
 Ding—So your grandfather is a sure-enough old-timer?
 Dong—Yeah. He says he can remember when baking powder out-sold face powder!

Quite Safe
 Wac—Oh, John! I forgot to turn off the gas ring in the bedroom when we left.
 Husband—All ri', nothin'll burn. I forgot to turn the water off in the bathroom.—Providence Journal.
