No. 38

COGITATIONS and APHORISMS of JODOK

It just seems, like I am always saying the wrong thing at the right time, or the right thing at the wrong time, or some other complication worse than either of these, and I am at a loss to know the reason for this melody, which is almost daily denoting me out a lot of mortification.

It may be old age; but I doubt it. Although I have heard that when a man gets into his "eighties" he should not always be held responsible for everything he may say; but I really do not think I have become so dotty as all that.

But my latest catastrophe along this time, was just a few hours ago when I met a lady here in town, whom I do not remember having met before, although she has been living here for some time and I pass by her door each day. She told me who she was, and I intended to ask her if she was my neighbor "so-and-so's" wife, but instead I asked her if she was his mother, and she said: "No, I am his wife. Do I really look old enough to be his mother?" Well, you may imagine my embarrassment and mortification, but I assure you, you cannot measure it.

And, such is life, especially with me; and that is only one sample of my absent-mindedness, but I will not lay it to old age, for I have always been more or less so afflicted. At least, I can remember an occasion away back in my early twenties or late teens, when one time I had performed a favor for a young lady and she thanked me for it, I replied: "You're much obliged."

And another example of this fickle-mindedness is that just the other day, while talking with —doh, one of us uttered a quip which really had some point to it, and I fully intended to use it with me by springing it on my readers—if any such there be—but I did not write it down and "the thing has gone from me," apparently never to return; and to make it so much worse —doh has forgotten it also; and I know it is not due to "old age" on his part, for his mind is, apparently, as young and supple as it ever was.

I become most weary of reading about all this war scare and probability of war, that is continually going on through our newspapers and over the radio. Why cannot people talk peace and brotherly love instead of war and hate, and lend the "aid" and helping hand, rather than the one that is constantly trying to get at the other fellow's throat. As people talk, so will their minds travel in thought, and peace could just as well be talked and the public mind be reverted toward it, as to talk war and have the public mind constantly traveling toward it. If peace was talked as much as is war, the war spirit would die a natural death, almost overnight.

"Why not try this motto: "Let this mind be in you which was also in Christ Jesus, that ye love one another." I believe that quotation is from the holy scriptures, but I may not have it exactly as it is in the original, but anyway, it bears out what I have in mind, and that is that if everybody would be as solicitous of his neighbor's welfare as he is of his own, there would be no occasion for all this turmoil and agitation about wars and armaments and defenses and all such uncanny and harrowing things.

Of course, it is not expected that the common run of people such as I and the people I associate mostly with, should ever reach such majestic heights of moral aptitude and mental rectitude; but surely those who have attained the greatest heights of political authority should have enough of this moral, mental and spiritual clarity, to be above such knavish ideas and propensities and thus be able to lead their nations into a spirit of love and tolerance for each other that would forever annihilate the spirit of war and hatred.

As I have often said, I know but little other than which I read in the papers or hear on the streets, and judging from what I read and hear on the streets here at Friona, Governor O'Daniel is not losing any friends in this part of the state on account of the abuse and slight that is being heaped upon him by the members of the State Legislature. On the other hand, they are being roundly criticized for the manner in which they have dawdled away their time and fruitlessly taken the opportunity of...

RETAIL CREDIT ASSOCIATION NOTES

The next best thing to paying one's bills is to keep our accounts and notes from becoming past due, by renewing them before they reach the past due date, according to the Retail Credit Association.

Implement and finance companies always pass more quickly and freely upon orders of individuals with no past due indebtedness. It is always the little things in credit, as in everyday life, that usually count most.

ENGLISH IV CLUB HAD INTERESTING PROGRAM

The English IV Club of the Friona High School held one of its most interesting meetings on Friday of last week, April 14th, in the High School building, with Miss McAllister, English instructor, as its sponsor, and the entire high school student body as its guests.

The most distinguished and interesting feature of the program was a book review by Mrs. Simon D. Gray, of Sudan.

Mrs. Hay has won considerable distinction in the literary world through her unusual ability as a writer and reteller of stories, as well as ability to define or explain. Her effort in reviewing the book entitled "Gone With The Wind," was highly satisfactory and thoroughly appreciated by her audience on this occasion.

AMERICAN LEGION NEWS

Since we have now dedicated our new home it paves the way for greater things for our community. Thousands of Legion Posts have been active in their community serving for a number of years, but the field has only started to develop. Every project completed points to another and even greater one.

Every town and community needs things done and we, as Legion members, stand ready to help in any movement for the betterment of all concerned. And we are, in particular, interested in the welfare of our afflicted "buddies," and the wives and children of all veterans. We as veterans do not know very much about the advantages we are eligible to receive, and it is very much misunderstood among the citizenship as to the demands of war veterans organization, if I should say "demand," and that is where the misunderstanding commences.

The first thought is treasury raiders, grafters, and all sorts of things. Even veterans themselves make these statements. I too, sympathize with these faults, but first, the boys were forced to leave a nice home, mother, father, wife or sweetheart, and were by force made to do these things. Now we demand adequate care for those disabled, regardless of money. You who are passing criticism did not have to go and leave the treasures of youth at home; and even now you would give unlimited wealth, if placed in such position, to keep from doing so, and in this critical situation in Europe today, mind you there is now over one million veterans who are doing their utmost to keep out of a war. They know what it means and influences like this cannot be denied, or given in dollars and cents a valuation to this end.

We have a service to do, and with the aid of all who will cooperate, the job will be easy, and since this new home is about completed, as a permanent monument ready for service, the membership and Post officers welcome invitations to help serve in this community in any movement for the betterment of the people.

Our membership is gradually growing—and Buddies, have a serious thought—you should fully be alert as to these activities, sponsored by the Legion, and know the things in which we participate. Meet with us on the second and fourth Tuesdays of each month. You are welcome. Come along.

Service Officer, Roy Price.

W. M. U. REPORT

The Woman's Missionary Union met in its various circles Tuesday, April 18th, for the regular weekly Bible study. The lesson is in the book of Psalms.

Circle No. 1 met in the home of Mrs. Joe Wilson, with members present, and Circle No. 2, met in the home of Mrs. V. J. Whitley with eight members present.

On Tuesday, April 25th, Circle No. 1 will meet with Mrs. Dilger and Circle No. 2 will meet with Mrs. Newman.

Reporter.

TO ORGANIZE OLD SETTLERS ASSOCIATION

A letter was received at the Star office from Mrs. Minnie O. Aldridge, of Farwell, authorizing the Star to announce that there will be a meeting at Bovina on Sunday, April 30, at 4:30 p. m., for the purpose of organizing an "Old Settlers Association" for Parmer County.

This meeting will be for the purpose of organizing, solely, and later it is hoped to have annual picnics and develop a genuinely interesting organization, and everyone interested in such an organization is urged to be at this meeting, Sunday afternoon.

All persons interested, including the local paper, are asked to give this matter as much publicity as possible and to work up as much interest in and around Friona, as possible.

It is also requested that anyone in touch with former residents of the county, will let them know so that there may be as large a gathering of oldtimers as possible.

Remember that this meeting will be held in the school building at Bovina, on Sunday, April 30th, at 4:30 p. m.

AN INTERESTING FARM MEETING

Monday night of next week, April 24th, will be the regular meeting date for the Friona Farmers Association, according to the announcement of Leo McClellan, chairman of the organization.

Mr. McClellan further stated that there will be many things of great interest to the local farmers, brought before the meeting for discussion and adoption or rejection.

Among these matters of prime importance and interest will be the proposition to be presented by T. G. Moore, Parmer County, Farm Security Administrator, who will be one of the speakers at the meeting.

The proposition to be presented by Mr. Moore is, as to whether or not the people of this community are desirous of accepting the proposition of the Federal Government to establish a community meat preserving or meat curing plant, or abattoir at Friona. This is a matter well worth the careful consideration of our people, and a large attendance at the meeting is hoped for.

LLOYD POPE TO OKLAHOMA

Lloyd Pope, who has been under treatment for heart trouble for the past year or more, departed last week for Ashley, Oklahoma, where he has entered a private sanitarium for further treatment.

Lloyd spent last summer at Marlin Springs in an effort to regain his health, with but little, if any beneficial results; but in placing himself under the present treatment, he has the assurance of his physician that he can restore him to perfect health again within the next five months, which fact is most encouraging. His many friends here wish for him a speedy recovery.

RETURNED TO HOME IN ARKANSAS

Mr. and Mrs. E. M. O'born, who have been visiting their sons and other relatives in and near Friona for the past ten days, departed Saturday for their home at Hope, Arkansas.

They are the parents of Sloan and Claude Osborn of this community, and Jess Osborn, of Muleshoe; and Mr. Osborn is a brother of Frank M. and Willie C. Osborn, of Friona.

WINNING DISTINCTION AT COLLEGE

LUBBOCK, Texas, April 17—Lillian Tarter, arts and science student at Texas Technological College, has qualified for membership in the Freshman Honor Society. She is the daughter of Mr. and Mrs. Dan Tarter, of Friona.

Sponsored by Forum, honorary organization, and the Association of Women Students, the Freshman Honor Society requires a "B" average.

Peterson Jack, son of Mr. and Mrs. E. M. Jack, of Friona, made the fall semester honor roll at Texas Technological College with an average grade of "B".

Tra Penger, son of Mr. and Mrs. John Penger, of Friona, made the fall semester honor roll at the Texas Technological College with an average grade of "B".

SCOUTS TO HAVE COOKY SALE

The Girl Scouts have announced that they will hold a "Cooky Sale," here on town on the 4th, 5th and 6th of May. They will sell the cookies from house to house at 25 cents a package, the girls to receive a commission on all the cookies they sell the funds thus received to be used in their scout work.

CELEBRATED 80TH BIRTHDAY

Mrs. R. Truman, who reached her 80th milestone of life's journey on Monday of this week, April 17th, celebrated the affair with a family birthday dinner at the home of her granddaughter, Mrs. P. L. London, a few miles southeast of Friona.

Mrs. Truman is now making her home just among and with her children and grandchildren, and has been in this community for the past year at the home of one of her daughters, Mrs. P. E. Truax, a mile and a half southeast of town.

No outside guests were present at the birthday dinner, which was served at the home of Mr. and Mrs. London on Sunday; but a real feast was spread and the dinner table was decorated with the large birthday cake with its 80 lighted candles, representing the years of the honoree.

Her other children and grandchildren are scattered in many directions and far away, the nearest being a granddaughter that lives in Amarillo, but lines of one of her children prevented her being present at the dinner.

Mrs. Truman is a native of Kansas, but has been living in Texas for the past fifteen years and likes Texas as might well. She is the mother of ten children, eight of whom, two sons and six daughters, are still living. She is in apparently perfect health and gets about unusually well for one of her years, being able on occasions to attend the meetings of the Ladies Aid Society.

She was visited on Monday at her home with Mr. and Mrs. Truax, by Mrs. Minnie Goodwine and daughter, Miss Lola, who came there to pay their respects and to bring tokens of regard for her birthday. Her many friends of Friona and community wish for her many more happy birthdays.

OFF TO NASHVILLE, TENN.

Rev. C. Carl Dollar, pastor of the local Congregational Church, departed Saturday for Nashville, Tennessee, where he is spending this week in attendance at a "Rural Church and Community Conference" for pastors. His plans were to return to Friona the latter part of this week.

TO KANSAS CITY WITH CATTLE

Clyde V. Goodwine departed Friday afternoon of last week for Kansas City, with a shipment of cattle, which he is placing on the market there.

Before leaving home, Mr. Goodwine had been suffering intensely from some sort of malady in one of his toes, which was giving him a great deal of pain. A letter, however, was received from him Monday evening, which was written shortly after he arrived in the city, which stated that while his toe was still dealing him a great deal of misery, it was no worse and he was receiving treatment from a physician. Otherwise he was all right.

FRIONA WEATHER

The weather here during the latter part of last week, became again quite pleasant, without any further moisture, but on Sunday another norther struck us, and the temperature again began sliding downward, to the extent that by night it was entirely too cool for comfort without some fire in the rooms.

It continued getting colder and some moisture in the form of a light shower fell about dark, and a light ice formed during the night. Monday and Tuesday continued cold but clear, with ice forming each night. Wednesday, however, was again clear and the temperature climbed back to a nice balmy, pleasant spring temperature.

Continued getting colder and some moisture in the form of a light shower fell about dark, and a light ice formed during the night. Monday and Tuesday continued cold but clear, with ice forming each night. Wednesday, however, was again clear and the temperature climbed back to a nice balmy, pleasant spring temperature.

PREACHING AT RHEA

Rev. Joe Wilson, pastor of the local Baptist church, has authorized the Star to announce that he will preach at the Rhea school house this coming Sunday at 2:00 p. m. Every body invited.

In the same manner if wheat is not planted for three years straight.

Learn about the rooster show, Blackwells.

HONORED AT BIRTHDAY DINNER

Miss Juanita Crow was the honor guest at a birthday dinner given in the home of Mr. and Mrs. Wriah Williams, Sunday.

Other guests of the occasion were Misses Iva and Pauline Williams, sisters of the host; Miss Theo Merrill, and Messrs. Shelton Hardin, Steve Struve and Ray Jones, all of Abernathy; and Misses Seva Welch and Ann Johnston and Messrs. J. B. Crow and T. A. Williams, of Friona.

Among other things, Miss Crow received a bouquet of beautiful tulips.

ATTENDED DISTRICT P. T. A. MEETING

Superintendent W. L. Edlemon, of the Friona Schools, attended the District meeting of the P. T. A., that was held at Borger, Wednesday and Thursday.

Mrs. Edlemon was the chosen delegate, and Mrs. M. W. Ataway was alternate for the local organization, but neither of them could attend. No other representatives from here were in attendance.

P. T. A. LAST MEETING OF THE YEAR

The Friona Parent-Teachers Association will hold its last meeting of the school year next Thursday afternoon, at 4:00 o'clock p. m., in the Grade School Auditorium.

A very interesting program has been arranged, including special entertainment by the 4-H club. Everyone is invited.

REGAL TO MOVE TO NEW HOME

Word was received at the Star office to the effect that Ray Landrum is planning to have the Regal Theatre installed in its new home in the Truitt Building on Sixth Street, in time for his opening on Saturday of this week.

As the Star understands it, this will be accomplished if the new equipment arrives at Friona in time for such installation.

FARM SECURITY NEWS

Farmers unable to participate in the 1939 AAA soil conservation program because of lack of funds for material to carry out soil building practices, are reminded that they may obtain Farm Security Administration loans for this purpose through the local AAA committee.

This announcement was made today by Thomas G. Moore, FSA's rehabilitation supervisor in Parmer County, with office in the court-house building.

"The entire amount of the loan must be used for practices to comply with approved soil building practices," Mr. Moore said. "Amounts up to 50 per cent of the approximate AAA payment to be earned by the farmer can be loaned. The loans will be secured by an assignment of the AAA benefit payment."

Mr. Moore said that in order to be eligible for these FSA loans, an applicant must be recommended by the AAA county committee, and unable to secure credit elsewhere.

This policy is in line with the FSA's program of making loans only to farmers unable to secure financial aid from any other source.

All applications for loans must be made at the Parmer county AAA office in Farwell, Texas.

According to the eligibility requirements outlined by Mr. Moore, loans to cooperate in the AAA program will be made only to farmers who meet the following qualifications:

(1) Farmers who without such a loan would be unable to participate in the AAA program;

(2) Farmers whom the county AAA committee recommended from the standpoint of character and integrity;

(3) Farmers who agree to use the full amount of the loan for the purchase of equipment and materials to be used in carrying out soil building practices;

(4) Farmers who have not executed and agree not to execute an assignment of their payment other than to the Farm Security Administration.

Additional information may be obtained from the local AAA committee or at the FSA office.

A. A. A. NEWS

Recent changes in the provisions of the Agricultural Conservation Program make it possible to receive full conservation payment on cotton and wheat allotments without having any of the allotment planted. Previously, it has been necessary that 80% of the acreage allotment be planted in order to draw full payment. As the program now stands full conservation payments will be made on all allotments provided that the allotment is not overplanted.

If any operator does not choose to plant his cotton or wheat allotment this acreage will be eligible to be planted to general crops in addition to the regular general allotment acreage. The only requirement regarding unplanted cotton or wheat acreage allotments is that normal farming operations be carried out on the farm. This means that the farm cannot be idle and draw full payment.

All farm operators who do not intend to plant the farm cotton or wheat allotment should understand that if no cotton is planted for three years no allotment will be issued to the farm. This applies to wheat in

WHAT ADEQUATE NATIONAL DEFENSE MEANS TO AMERICAN YOUTH

A few weeks ago, the ladies of the Friona Post of American Legion Auxiliary, sponsored a county-wide contest in essay writing on the above caption as a subject.

As a result of this contest, several of the high school students of the county entered the contest, with most complimentary and satisfactory result as to the merit of their manuscripts.

These manuscripts were then judged by local persons qualified to pass on such matters, and the various manuscripts were given places according to their merit. The essay given first place was the one written by Miss Charline McFarland, of the Friona High School.

These essays have been handed to the Star by Mrs. V. L. Todd, who was in charge of the contest, with permission to print them in its columns for the benefit of its readers who have not had the opportunity of reading them or hearing them read. The Star plans to print one of these each week until they have all been used. The one given this week is the one by Miss McFarland, which was accorded first place. This paper was also sent to Austin to be entered in the State contest, since this contest is nation-wide. The essay follows:

For centuries and centuries, national defense has been one of the greatest problems that the individual nations of the world have had to deal with. Primitive man fought to establish the principle of individual freedom, and since that time all nations have had forces with which to guard their boundaries. The national defense of the United States consists of the army, the navy and the air force.

Strong-bodied men make up the guarding power of any country, and in case of war, the strength of the nation is conscripted. Then why should not the youth of America think seriously of national defense?

Not so very long ago, people were saying that modern methods of communication were making the world just one big neighborhood. Now we see in the elimination of time and distance, sufficient reason for locking the door and increasing the police force. Suddenly we realize that there is no real friendliness in the hearts of men—not men organized as nations with something to get or defend.

The distance between capitals is measured by the time it takes fast bombing planes to cover it; points where death from the skies will do most harm are known and ready to be marked on the pilot's maps. Civilization is on the march—forward with the most devilish mechanisms for mass killing that man can devise.

What does all this mean to us? This, at the very least, that we must be prepared to defend ourselves against any, who, envious of our liberty, may dare to come against us.

There must be no mistake about protection, anywhere, at any time; every American is entitled to demand that much of his government. Conversely, the government is entitled to expect from every citizen, support for such a program. It should be given ungrudgingly, thankfully, even in the knowledge that nowhere else under heaven are men so free, so secure, in the things that make life something that may be enjoyed grandly and lived gloriously.

But there is another side to this defense picture. The possibilities of our being attacked must not be exaggerated to the point of absurdity. That will lead to a defense program that may result in our swagging down on the world, telling other nations where to get off, or else, everything for defense and nothing for aggression, should be our program.

In spite of our defense, the people of America are living in an age of fear—of war and all that goes with it, in its terrifying and ruinous races. Have we ever stopped to think what war means to the world? It means the broken hearts of fond mothers and wives, who give their sons and husbands to be slaughtered while they wait in misery at home.

Twenty-one years have passed since the people of America, high with hope and believing their cause to be right, went into the World War. It was on April 2, 1917, that President Wilson addressed the houses of congress and called for war against the Government of the German Empire; not against the German people. The President chose his words carefully. "We have no quarrel with the German people," he said. "We seek no indemnities; no material compensation. We desire no conquest; no dominions. The day has come when America is privileged to spend her blood and her might for the principles that save her birth." To save democracy! This was said to have been the reason for entering the war, but did we

CHAPTER IX—Continued

Hale was pondering the resolution and finding additional grounds for it when he re-entered the Camp after midnight. He had walked further, been away longer, than he realized. The house was very quiet. He glanced into the living-room and study. Both rooms were dark. In the lower hall the sole remaining light was that which burned all night in a single amber-tinted bulb. Approaching the staircase he realized that the upper hall was similarly dim. The members of the family were all in bed, or at least were shut away in their rooms. Joan and Bert must have returned long ago.

His foot was on the lowest step when the telephone bell in the hall closet rang insistently. Its shrillness was stifled by the closet's closed door. He doubted if Banks or anyone else would hear it. He went to the closet, closing the door behind him in an instinctive consideration for the sleeping household. The voice of an operator came to him.

"New York wants Mr. Hale," it said.

"Hale is speaking."

"All right, Mr. Hale. Please hold the line."

During the instant that he waited Hale glanced at his wrist watch. Twenty minutes to one. He could not imagine who had called him up at that hour, unless it was Kneeland. What could Kneeland want, unless there had been some accident? But the voice he heard next was not Kneeland's. It was a man's voice, anxious, yet apologetic.

"Mr. Hale," it said, "this is Kaufman. I'm sorry to disturb you at this hour. But did you get the telegram I sent you today?"

For an instant Hale could not remember who Kaufman was. His thoughts had been far removed from anyone named Kaufman. His mind busy with that problem he answered automatically, "No, I haven't received any telegram."

The voice became more urgent, less apologetic. It said:

"That's what I was afraid of. I've been pretty busy ever since I sent the telegram this noon. But after I got to bed I remembered that you told me you were several miles from a telegraph office. You said messages weren't always delivered promptly, or even telephoned. When I began to think that over, I decided to call you up."

"Yes?" Hale's scalp was prickling. He had remembered now who Kaufman was. "What was in that telegram?" he jerked out.

"I told you in it that the analysis of the milk you sent me showed a small quantity of bichloride of mercury. It wasn't much. It wasn't anywhere near a killing dose. But, you see, I remembered that water you sent me for analysis. That was pretty serious and—"

"Never mind the water," Hale interrupted. "Tell me about the milk. Bichloride of mercury is a deadly poison, isn't it?" He did not recognize his own voice.

"Yes, it is. That's why I telegraphed. It was a small quantity, but it has no place in milk. After that water analysis—" At an exclamation from Hale the voice went on hurriedly, "Well, it's the sort of thing that suggests to a suspicious mind like mine—taken in connection with the water analysis—that someone who doesn't like you is giving you very small doses of poison. They're so small they may not show any serious effects for some time. You looked pretty husky the day I saw you. Still, if they're kept up long enough—"

"They'll kill in the end? I see."

"There's no immediate danger," the voice went on, "unless the doses are increased. But I telegraphed you at once. Then when I thought it over I got fussy."

"Thank God you did. Thank you, too, Kaufman. I won't forget it. Is there anything else you ought to tell me about it?"

"Only to lay off milk for a while, and keep both eyes open." Kaufman's voice was now quite cheerful. Having done his duty as he saw it he was ready to drop the matter and get back to bed.

"Wait a minute. There's one thing more on my mind." Hale asked his next question in a voice that was not quite steady. "You say there was only a little poison in that milk. How many such doses could a person take before—"

"Before it killed? Oh, quite a lot. If I'm right in my guess, the plan was to give it in such small doses, over a long period, as to cause a very gradual falling in the patient; something that would look like what used to be called 'a slow decline.' The effects vary in different patients, but they're the same as those of any slow poison—gastric disturbance, indigestion, lassitude, that sort of thing. The special effect is on the kidneys. It might go on for weeks or even months before an acute marasmus developed. The

plan in such cases is to have the patient die a seemingly natural death by gradual stages. Have you had many doses?"

"No. Thanks again, Kaufman. Good-night."

Hale hung up the receiver. He seemed to be in a dream—a nightmare. The whole situation had unfolded before him and he was numbed by it. He put it to himself in unconsciously melodramatic terms: "My God, there's a killer among us!" The words echoed in his brain like a refrain, while his hurrying feet carried him to Joan's door. He remembered the strange visitor to that room—the visitor who had seemed a nightmare. He remembered Joan's symptoms, the

seen Joan sit up in bed as she herself leaned over the small table at the head of that bed. She had expected recognition, discovery? Then, as now, her distorted face must have shown not so much fear as frenzy, even fury, at the interruption.

She tried to push past Hale, but he held her firmly.

"What have you got in your hand?" he asked in a low voice. It was something she was trying to conceal by twisting her right arm out of his grasp and hiding her right hand behind her back. Taking a stronger grip on her left arm, he seized that struggling left hand and wrenched from it the bottle it held. A glance at the label was

Looking back at her, trying to grasp the incredible fact that it was really Miss Hosanna who sat opposite him, Miss Hosanna from whom he had taken that bottle, Hale told himself the tableau was grotesque.

Miss Hosanna's plump form was encased in a dark dressing gown, shapeless and rather heavy for so warm a night. On her head was a gray set, evidently designed to keep in position a ring of curling pins in her hair. Her face shone with the remains of a coating of retting cream, which had not been wholly wiped off. The purplish color that had suffused it during her brief struggle had faded almost to its normal hue. She would have looked as harmless as the pink-soft cush-

"Isn't it a far stranger thing that you are doing, Miss Hosanna?" asked Hale.

doctor's uneasiness. He remembered everything . . .

He did not know what he was to do when he reached her door. He stood before it, considering the question. Wake her up and ask her if she was all right? Idiotic. He had no reason to believe she had drunk any milk that night. Indeed, now that he considered the matter, he had every reason to feel that she had not done so. His warning to her had been imperative, and she had promised to heed it. From tomorrow she would be safe. He would take her to Doctor Crosby early in the morning. Both would have to know what he had learned. That much was certain. In the meantime, she was safe. Or was she? He could not leave the door. His feet would not carry him away. His brain would not direct him to move. He could not stir until he knew that all was well with her. How could he get that knowledge without disturbing her?

His hand closed on the door-knob, turned it softly. He did not expect that the door would open. She had promised to lock it regularly, and the memory of that nightmare she had dwelt on would surely make her do so. But, incredibly, the door opened. He widened the opening slightly and noiselessly, and peered in, looking toward Joan's bed. He gave no thought to the possibility of being discovered in such a situation, but he did not cross the threshold. Indeed, the narrow opening did not allow that. He would merely make sure that Joan was sleeping, and go back to his quarters with an easier mind.

CHAPTER X

The room was so dark that for a moment he could see nothing. Then, as his eyes became accustomed to the blackness, he saw the dim outlines of the two windows opposite him. He glanced toward the bed. It was occupied and he heard quiet breathing.

It was not until then that he saw something else. Something very close to him, at his right, between him and the head of the bed. It turned with a low gasp, came toward him with a little rush, wrenched the door-knob from his hand by a strong pull on the inside, and slid through the opening, closing the door behind it. It had moved with such rapidity that it struck against him as it came. He recoiled a step, then caught its arm and held it. For an instant it struggled frantically but in silence. Then, under his unyielding grip, it collapsed. In the hall's dim light Hale stared down into the convulsed face of Miss Hosanna.

He knew now what face Joan had seen in her nightmare—that face familiar, yet terrible, whose identity she would not confide to him. Then, as now, Miss Hosanna had been startled during her . . . She had

enough. He dropped the bottle into his pocket, kept his hold on her wrist, and drew Miss Hosanna along the hall toward his own quarters. When they had reached his room he stopped, opened the door, and motioned her to precede him. She held back.

"What do you want?" The question was almost inaudible. She had trouble in forming the words with her stiff lips; but her head was erect and her pale eyes burned into his. He answered under his breath. "A little talk with you, Miss Hosanna. We can't talk here in the hall, you know."

She hesitated another second, then crossed the threshold. When they were inside the room he closed and locked the door. He drew forward a chair for her, and seated himself facing her.

"Now," he said very quietly, "we'll get to the bottom of this. What does it mean?"

Miss Hosanna was already getting herself in hand. She straightened in her chair, and stared at him with icy resentment.

ion to which her brother had compared her, if it had not been for her burning eyes. Her manner had something of its usual dignity. He had always known that she had courage. Now she proved that, aside from her moment of panic, she also had self-control. She took the aggressive at once.

"This is a strange thing for you to do, Mr. Hale," she said between straight lips.

"Isn't it a far stranger thing that you are doing, Miss Hosanna?"

Hale asked the question very quietly, holding her eyes. He sat facing her like a gray rock, but he was inwardly shaken and appalled. Miss Hosanna! Miss Hosanna!

"I suppose I was walking in my sleep." Her head was erect now, her shoulders back. She radiated defiance. "I guess you've heard of sleep-walking before," she ended.

"I have. But I don't remember hearing of anybody who went about poisoning others in their sleep."

(TO BE CONTINUED)

Milk Churned by Lurching of 'Ship of Desert,' Was Early Way of Making Butter

Camels may be ugly and ill-tempered, but those of us who like plenty of butter on our bread owe them a debt of gratitude nonetheless, asserts Martha Harmon in the Philadelphia Record.

More than 20 centuries ago, men used goat and sheep milk butter. According to tradition, the Arabs made the first butter accidentally aided by the aforesaid camels. Milk was carried in skin bags on journeys across the desert and the jolting of the camels as they lurch along churned the liquid into a buttery mass. Not the sort of butter we are accustomed to use, we'll admit, for it was fluid enough to be poured slowly from the skins.

The people of India still make butter by shaking milk in bottles, producing a day's supply at a time, because the poorer folk there have no means of keeping foods fresh in refrigerators or even in running streams of cold water, as do our campers.

Just because Americans have a prejudice in favor of butter made from cow's milk, with margarine or oleomargarine as substitute when the family purse grows lean, doesn't imply that the rest of the world shares our taste. Even in this country there is considerable importation of goats' milk butter for persons of Greek or Italian origin, as well as others from the Mediterranean regions.

Olive oil is another favorite for a bread "spread" in lands where olives grow. Many vegetarians insist on nut butters. Up in the Arctic

the Eskimos have a decided penchant for blubber as the family fat supply.

Where butter is made in quantity for commercial purposes, the separator has superseded the old method of allowing milk to stand in shallow pans in a cool place until the cream rises and then putting the latter into a hand churn to work and stir about in a modern version of the original camel method.

They Have Teeth Pulled In Finland, and Like It!

Ah! One spot under the sun where there is peace between the sexes. The men don't beef when the ladies take their jobs. They don't write to the newspapers. In fact, they rather like it.

This strange state of affairs exists in Finland and the profession the women have taken over is dentistry.

Women have practically a monopoly on the dental offices in Finland, it is said. It's a country where you don't need an advertising campaign to get you to see your dentist at least twice a year.

But the girls don't stop at dentistry in Finland. Most of the banking jobs are held by women. They are also stenographers and secretaries. And politics has attracted many women.

More and more Americans are coming to Finland as tourists. And a lot of them like Lapland, where you can play golf 24 hours a day in the sunshine.

Just a Little Smile

OFFERING THE PROOF

The Woodhull Dispatch tells of a zealous man who was showing a prospective tenant a house, and the would-be renter said, "You say that this house has been occupied all along, but most of the windows are broken. How does that happen?"

Said the real estate man: "Well, you see, my partner is very enthusiastic, and every time he shows a customer he insists on proving to him that it is only a stone's throw from the railroad station."

Very Good

A lady entered a trolley, and a gentleman promptly got up and offered her his seat.

"You're a jewel," said the lady, gratefully.

"No, miss," replied the gentleman, gallantly. "I'm a jeweler; for haven't I just set the jewel?"

The Choice Is Yours

Bill—A man can always console himself for most anything but getting someone's old hat after a big dinner.

Gus—How about a top-coat, an umbrella, or maybe a wife? Florida Times-Union

COURT PROCEDURE

There isn't a woman in the room.

"Just before you came in the judge said that on account of the nature of the case, all women under twenty-five would have to retire."

Till We Meet Again

The Irishman had been having great argument, and meant to finish off his opponent once and for all.

"The sooner I never see your face again," he said, "the better it will be for both of us when we meet."—Houston Post.

Might Have Been Worse

Father—Aren't you glad now that you prayed for a baby sister?

Small Son (after viewing his twin sisters)—Yes, Pop, and aren't you glad I quit when I did?

The Little Fixer

Warren—Did you sew a button on my coat, Jennie May?

Jennie May—No, honey bunch. I couldn't find the button and so I sewed up the buttonhole.

The Right Road

School Teacher—Where do all bad little boys go who do not put their pennies in the missionary box?

Small Boy—Please, Miss, to the pictures.

Not Bad Now

Angry Dad—Why, hang it, girl, that fellow earns only \$20 a week.

Pleading Daughter—Yes, but Dad, the weeks will pass so quickly because we're fond of one another.

Too Much Education

Waitress Lulu—Don't you like your college pudding, sir?

Kickbush—No, I'm afraid not. There seems to be an egg in it that ought to have been expelled.

Strife Ended

"I hear that the ten-year fight between Kelly and Murphy is ended. Did they bury the hatchet?"

"No. They buried Murphy."—Telephone Topics.

Smart Girl

Bobby—Notice how Jane's voice fills the auditorium?

Betty—Yes. Let's go now and make room for it.

WHY NOT?

When he was asked all those questions his manner suddenly grew flat.

"Well, wasn't he being pressed for a reply?"

Good Strategy

Mr. Smith—Daughter, I'm sorry to tell you that you'll never see that young man of yours here again.

His daughter—Oh, I shall scream! Tell me what has happened to him!

Mr. Smith—Nothing. I've just lent him \$10.

An Undertaking

Father to future son-in-law—Are you prepared to support a family?

Son-in-law—Yes.

Father—Now, be careful. There's 10 of us.—Minneapolis Journal.

Migraine Held Direct Result Of Tenseness

By DR. JAMES W. BARTON

I WRITE frequently about migraine—a one-sided headache—because thousands suffer with it and the only relief usually obtained

is by going to bed for two or three days to a week, by which time the attack passes. As the cause has been believed to be due to overwork—mental and physical—rest would thus seem to be the logical treatment.

Perhaps the most efficient treatment that has been discovered is that of ergotamine tartrate, full details of which were given by Dr. Mary O'Sullivan some months ago in the Journal of the American Medical Association. The ergotamine tartrate is given by injection into the muscles by a physician or may be taken in tablet form by mouth. Even when taken

Dr. Barton

month, however, the size of the dose should be as ordered by the physician, the dose usually depending upon the severity of the attacks.

This drug is given different names by the different drug manufacturers, but druggists know these names.

Physicians have found that migraine occurs in families and in individuals who work hard or do things in the hard or "tense" way.

Migraine Causes.

Some further information on migraine is given by Dr. W. H. Riley, Battle Creek, in the Michigan State Medical Society Journal, who, among other points, mentions the following:

1. Among the exciting causes of migraine are depressive emotions such as those associated with worry, anxiety, fear, anger, fatigue, exhaustion, loss of sleep, eyestrain, excessive use of eyes, using the eyes in a bright light.

2. Being sensitive to certain foods—eggs, fat rich foods, milk, cream, ice cream, wheat and others.

3. Increased alkalinity of the blood. These individuals often work so hard they starve themselves and often do not eat enough meat and fish.

4. Spasm in the blood vessels in the brain. In the opinion of Dr. Riley the spasm of the arteries of the brain, which of course prevents a proper supply of blood from reaching the brain and removing wastes, is responsible for many other symptoms besides the headaches, such as temporary loss of sight and speech and also dizziness.

Those individuals who have this tendency to migraine should learn then that it is tenseness that causes the spasm of the blood vessels, and thus the migraine.

Gland Changes Cause Many Skin Eruptions

I find myself writing very often about acne—pimples, not because the condition is painful or dangerous, but because it is spoiling the lives of many boys and girls just when manhood and womanhood is opening up to them. They avoid playing games, going to parties or enjoying other forms of amusement.

Physicians now agree that as acne appears about the time of puberty, gland changes in the body cause the skin eruption. Just how gland changes cause the trouble is unknown, but in some manner the body processes find it difficult to handle various foods, and this improper burning or handling of foods results in the change in the skin.

For years the results of X-ray treatment of acne have been excellent; in fact, the X-ray treatment has been considered the best single treatment of acne." It would seem, however, that this top position or standing of the X-ray treatment is to be challenged by the treatment of which I have written many times, that is, the treatment by viosterol. The viosterol treatment of acne was first given to the profession by two members of the staff of the University of Chicago, who cured themselves and many of their students by this method.

255 Acne Cases Reviewed.

Dr. M. T. R. Maynard, San Jose, Calif., in California and Western Medicine reviews 255 cases of acne treated since 1930. Of these, 123 patients were treated by other means than the use of viosterol; 86 were treated by X-ray. The diet and application of lotions or ointments were the same in the two groups.

Of the 86 patients treated by X-ray the acne was better in 30 at the end of three months; in 13 it was much better and in 26 the condition was healed, and of the 132 cases treated with viosterol, eight were better, 20 were much better and 32 cured. Of those cured or helped by the X-ray there were 26 in whom the acne returned, whereas the acne returned in only one case where viosterol was used.

THE mail-order catalogues were really to blame for the whole business, thought Leila, bitterly. For had the disgusting catalogues not tempted her so alluringly with their brilliant array of purchaseable—nay, needable things—Leila would never have even thought of making up the list of things she might buy.

The dingy old kitchen where Leila spent a goodly portion of each day with a portion of its rehabilitation with a portion of that magic sum. The broken, much-mended, warped, old kitchen range was to be replaced with a shining blue-enamelled affair, exactly duplicated in the alluring sketch in the catalogue.

The kitchen plans done, Leila always held her breath with a tiny gasp as she turned to the ladies' outfitting department. Such an array of finery! Luxurious silk underthings for best; dainty hand done Porto Rican lingerie for every day; smart-looking gingham for every day, and a complete afternoon, evening and street "costume" as listed by the Fifth avenue shops and copied accurately for the discriminating customers of Searles Gordon company!

To dream of possessions was one thing, to make the dream come true still another problem. So Leila schemed and dreamed and kept on keeping the home of her beloved father cheery and immaculate.

A country minister's salary is far from opulent, and Leila had all she could do to keep the cellar filled with canned goods, the garden free of weeds, the chickens well fed and laying and the one cow they afforded producing daily.

The Rev. Lyle Dinsmore, however, was utterly unlike his energetic daughter. He believed that God would provide—and he was too much of a dreamer to aid Him in the stupendous task.

Leila was deep in a fit of moody rebellion as she walked from the market to the postoffice for the morning mail. As she turned away with still another brilliantly advertised catalogue from Searles and Gordon she saw posted in a prominent place a poster advertising \$1,000 reward for the capture of the man pictured. He was alleged to be a daring train robber and had been awaiting trial when he escaped and was reputed to be heading for the border and the Canadian wilds.

Leila shuddered. A bandit—a robber! And heading for Sleekport! She hurried home and worked feverishly all day, the picture of the youthful bandit haunting her and the \$1,000 reward tantalizing her equally. By nighttime she was in a nervous state close to hysteria.

There was no moon and a slight wind sighed about the house. Leila, still worried over the bandit, was in the cupboard putting away a few last things when she saw the kitchen door slide noiselessly open. A heavily bearded face peered at her and a shaking hand warned her to silence. It was the hunted man. Leila never knew where the courage came from that caused her to bid him enter, but she knew she must have done it by the flash of deep gratitude in his face as he sat wearily down. And as she prepared a lunch for him and watched him eat it the thought of the \$1,000 reward was almost stifling her. Her dreams come true!

Silently the man ate wolfishly, as though he were famished. Leila's heart constricted. He was so young—and, somehow, he didn't look vicious or weak. Just poor. Now he was speaking, and his voice rang with truth and conviction. "You won't believe me, ma'am, any more than the officials down there will—but those yeggs hired me and my car. I wasn't one of 'em. I was just earning a good night's pay and I didn't know anything about the robbery at all till I read the papers next day. Then I knew they'd hired me to drive 'em away just as a blind. And nobody will ever believe that I wasn't a member of that gang. It'll mean twenty years! And I was going to get married next year. I'd saved enough to buy my car and I'd built up a good trade—" The boy's head dropped to the table. He wasn't crying; he wasn't the whining sort. He was just sunk in the misery of life's cruellest mistake, circumstantial evidence.

And suddenly Leila saw it all, saw how little poverty was after all compared to dishonor, bad luck and the thousand and one other trials of the world, and she moved impulsively.

"There's a long-distance moving truck that goes through Sleekport every Saturday night. It unloads part of the provisions at Keller's. I'll hide you till they come and you can go to St. Albans with them playing hooky. You'll catch a bumper out of there and make the border safely, if you're careful. I'm going to give you things to shave with, but leave a mustache and it'll work a wonderful disguise. The Canadian harvest of wheat is on and they need men!"

And after she came down from the attic after making up a spare bed and safely hiding her unwelcome visitor she walked with high determination to the dining-room and, taking down the last Searles and Gordon catalogue, stuffed it into the glowing kitchen range and, smiling tenderly, watched it burn.

Stubble Digger Displaces Hoe In Cane Fields

Mechanical Devices Prove Efficiency in Fields Of Southland.

NEW ORLEANS.—The roar of tractors and the rattle of strange machinery sounds the death knell of the hoe, the plow, the mule, the machete and the Negro in this nation's broadest sugar cane fields.

The latest of additions to sugar's "machine age" is the mechanical hoe and stubble digger invented by G. D. Longman, owner of a 200-acre plantation near Franklin.

Longman's 100-pound machine performs a delicate task it was believed the Negro and his sharp hoe never would surrender: It breaks the crust around cane stubble in the spring, it combs out the grass and it gives the young cane "air" to grow.

Successful Tests. Allan Ramsey Wurtele, Annapolis graduate, announced last year the successful tests of a mechanical cane cutter that cut, topped and trimmed the cane as fast as 100 Negroes could do the work.

Mechanical plows never have been a problem on sugar plantations. Tractors and gang plows work perfectly on the level, long rows. Several years ago "plow hands" felt the growing competition of the tractor and plow.

Now the mechanical "hoehand" and the cane cutter offer insurmountable opposition to the 60,000 or more Negroes who make their living from sugar cane.

Mechanical cultivation obviously is cheaper. It ends a time element that is important in the growth of cane. In the spring it is necessary to hoe cane as soon as possible that it may attain as much growth as possible before summer drouths set in. In late fall, a freeze can plunge a planter deeply into debt overnight. Sometimes in the spring and fall, labor is not plentiful and money is lost. It has always been thus—a successful crop was dependent upon available labor.

The hoeing machine does the work of 50 Negroes and 100 mules; the cutter the work of 100 Negroes.

Thomas Babington Macaulay of Rockhampton, Queensland, Australia, and Alby J. Stevens of Buena Vista sugar plantation and factory near Tucuman, Argentina, along with 100 sugar planters recently watched a completely mechanized sugar plantation demonstrated near Franklin. The two men will introduce the machine in their countries.

Name Collector Finds

New Ones for Babies

BLOOMINGTON, ILL.—W. E. Richardson is a collector of one of the most common things in the world, but probably no other person has a hobby similar to his. He collects names, the odd, the unusual, the different.

Feminine names not commonly heard include Clydyl, Amrial, Wilme, DeMilla, Berdeen, Lieta, Venece, Painline, Camolia, Wando, Vilita, Glennia, Balla, Nome, Showanda, Harpolic, Dace and Suda.

Among the more unusual names given boys are Merando, Vesselius, Oralandia, Ineal, Valda and Relyea.

But West Point Was Never Like This

Lawrence Breckedorff, one of 20 West Point cadets who recently spent a week-end as guests of the National Park college at Forest Glen, Md., gets the very best of service from Niki Manos, Jean Fox, Betty Bevan and Hilda Cato, left to right, students at the girls' school. The future generals reported a very entertaining trip.

ODD REQUESTS FLOOD DEPARTMENT OF INTERIOR

WASHINGTON.—The department of the interior, custodian of the public domain and a great deal else, is one of the greatest recipients of requests for freak information in the United States government. Nearly a million and a half letters come in each year asking for something or other, and a very large number of these want to know where to find a divining rod.

For 90 years, ever since the de-

partment came into existence, eager demands have come in having their inspiration in the persistent belief that wealth can be obtained by hocus-pocus. About 700 of these letters are received each year.

Various phrases, they all ask for nearly the same thing. One says: "Please tell me whether there is an instrument known as a 'divining rod' with which I may locate

minerals which I feel sure must exist in this region."

Other letters inquire, "How do you find water wells with a forked twig?" or "I want to know how to go about getting a government machine to hunt hidden treasure."

Another run-of-mine inquiry asks: "How may I secure a permit to search for lost treasure? I have information to the effect that a large quantity of silver bars were being

transported by the Spaniards in the vicinity of Santa Fe in the 1600s. Being beset by Indians, the Spaniards buried the treasure at a place, the general locality of which I have learned by consulting an old map that came into my possession."

Others, ethnologically minded, want to know whether Indians are citizens and whether the department can furnish a list of present-day Indian chiefs.

'Stork Special' Wins Close Race to Hospital

When Postmaster William M. Jones of Villa Grove, Ill., found roads closed by floods, he appealed to the Chicago & Eastern Illinois railway to rush his wife, expecting the stork momentarily, to Tuscola where the nearest hospital was located. Having no other equipment handy the division superintendent hooked up this caboose, tender and locomotive and rushed the stricken mother to Tuscola. The baby, a boy, arrived two hours later, attended by Dr. R. W. Taylor, railway physician. Postmaster Jones waves "all's well and thanks" to Engineer William Mercer who piloted the "stork special."

Reddy Fox, Hunting for Food, Frightens Little Mite Mouse

By THORNTON BURGESS

LITTLE MITE, the smallest and smartest of the four babies of Dandy Meadow Mouse, who had run away to see the Great World, wished with all his might that he never had thought of leaving his dear, safe home. He had been so sure that he was smart enough to take care of himself, and now already he had had three dreadful adventures, and the fact that he was still alive was not because of his own smartness, but because of good fortune. He had been lucky; that was all. The Great World, which, as he had peeped out at it from the safety of

And right under his own tail lay Little Mite Meadow Mouse, and Reddy knew nothing about it.

his home, had seemed such a wonderful place, now seemed a very dreadful place.

First he had had all his breath knocked out of him by Bossy the Cow. It was an accident, but he didn't know this. Then he had been caught by Black Pussy, and had escaped only because the Merry Little Breezes had helped him. He didn't know this, either. Then Miner the Mole had almost caught him when he had taken a nap in Miner's underground house. Now he wondered what would happen next. He had begun to think that there wasn't

any safe place anywhere for a little meadow mouse. He wasn't doing any harm to anybody or anything, and yet it seemed as if the whole Great World had turned against him. He shivered with fright as he wondered what he should do next and what would happen to him next.

"The first thing to do is to find a safe hiding place," thought he, "and I believe I'll do it at once." This was the very wisest thing that Little Mite could possibly do, and it showed that at last he really had begun to learn. He was just about to start out to look for a hiding place when he heard footsteps. He pricked up his little ears and listened with all his might. He wondered if it might be a friend who would help him. The trouble was he didn't know who were friends and who were enemies. Nearer and nearer came those footsteps. Somehow they didn't sound like the footsteps of a friend, because—well, because they had a stealthy sound as if whoever was making them was trying to make no sound at all.

Nearer and nearer they came. Little Mite didn't know what to do, so he did nothing. He just sat still, his heart going thump-thump-thump-thump-thump-thump. Now, it happens that sitting still was just the wisest thing to do. Nearer and nearer came the soft, stealthy footsteps. Then quite suddenly something big and red loomed up right in front of little Mite. He didn't know for sure who it was, but he guessed. You see, the handsome red coat was enough to make Mite quite certain. And then there was a smell that somehow made him quite sick with fear.

"It's Reddy Fox," thought poor Little Mite.

He was quite right. It was Reddy Fox. Reddy had seated himself, his back to wee, frightened, Little Mite, and was watching something which Mite, down among the grasses, couldn't see. But he could see Reddy's sides go in and out, in and out, as he breathed, and he could hear Reddy lick his chops every few minutes. It was a perfectly dreadful situation! Here he was so close to one of those he most feared, the very one about whom his father, Dandy Meadow Mouse, had warned him against most, that he could touch the long hairs of his tail! He couldn't run, because there was no place to run to. All he could do was to sit perfectly still and try to hold his breath. He wished his heart wouldn't thump so. He was afraid that Reddy would hear it.

What if Reddy should happen to turn around and look behind him? Mite made himself flatter than ever at the thought. He hoped that Reddy would keep interested in whatever it was that he was watching so intently. How he did wish for something to cover him up—something to hide under. And almost with the thought something did cover him up. What do you think it was? Why, it was the great, plumy tail of Reddy Fox himself! He had swung it around so that it lay right over Little Mite Meadow Mouse and Reddy knew nothing about it. Little Mite held his breath and wondered if he ever would see home again.

Bed-Into-Chest Proves Useful In Small Home

By BETTY WELLS

FOLDING beds are literally as old as Egypt . . . they're mentioned in most all early stories of furniture. So we needn't think we're being so modern when we get some trick number that vanishes when you say "abracadabra." And we've called attention before to that early chair-bed of England—from all I can gather it was a cross between the wing chair and the Morris chair. Just the same we were impressed to death with a new bed-in-a-chest that turned up at the recent furniture market in Chicago. It is as trim as you please by day, hidden away in a small dignified chest,

Bed-into-chest.

but at night, out comes a full length comfortable bed. Fine for unexpected guests in the small menage, or in a push a member of the family could use it all the time.

And Egypt never had the likes of the sofa-beds that are available today. Well tailored, with smart slender lines of period design, they open out easily into full sized comfortable beds. There are now love seats that open into beds, as well as chairs that stretch out to make amazingly comfortable beds. The in-a-door beds are holding their own, and of course the studio couch that turns into a double bed or two single beds is a hardy perennial.

What a far cry are these from the old folding bed of our childhood. Remember those imposing wardrobe-beds, the kind that would start closing up if you got too far down at the foot of the bed?

© Betty Wells.—WNU Service.

SAFETY PRECAUTIONS

The British government's new gas mask for children under two years of age as it was demonstrated recently in London. The mask has a bellows attached to furnish the baby with air. A window allows the child's face to be seen. English manufacturers have perfected gas masks for pets as well as human beings.

Small Waists and Becoming Necklines

THE neckline is a very important detail in making your dress becoming. Thus No. 1719, designed for large figures, has a plain, deep v-neckline which is especially slenderizing. Darts at the waistline tend to make you look inches slimmer. This is a particularly comfortable dress to work in, with its deep armholes, slashed sleeves, and easy waist. It's easy to put on and to iron, too, thanks to the button-front. A

diagram design, it may be all finished in a few hours. Calico, gingham, percale or seersucker are nice for this.

For slender, youthful figures, the heart-shaped, frill-trimmed neckline of No. 1726 is perfectly charming and as flattering as can be! The pointed basque bodice diminishes your waistline to practically nothing, and the wide-shouldered sleeves and flaring skirt accent the slender youth of the silhouette. Make this pretty dress of silk crepe, taffeta or prints, and see if it doesn't win you many compliments!

The Patterns.

No. 1719 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 4 1/2 yards of 35-inch material; 4 1/2 yards of braid.

No. 1726 is designed for sizes 12, 14, 16, 18 and 20. Size 14 takes 4 1/2 yards of 39-inch material; 1 1/2 yards of pleating or ruffling.

Send your order to The Sewing Circle Pattern Dept., Room 1324, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

SAFETY TALKS

Defective Cars in Accidents

COMPILATION by the National Safety council of state motor vehicle accident reports shows that 9 per cent of the motor vehicles in fatal accidents were reported as defective.

In non-fatal accidents defective vehicles numbered 4 per cent.

The council commented that "it seems certain that mass statistics understate the true importance of this problem. A careful study made several years ago indicated that vehicular defects were at least a contributing cause in 15 per cent of the accidents.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 38 to 42), who fears she'll lose her appeal to men, who worries about hot flashes, loss of pep, dizzy spells, upset nerves and moody spells. Get more fresh air, 8 hrs. sleep and if you need a good general system tonic take Lydia E. Pinkham's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vitality to enjoy life and assist calming jittery nerves and disturbing symptoms that often accompany change of life. WELL WORTH TRYING!

Overlive Remarks

When men speak ill of thee, live so as nobody may believe them.—Plato.

CONSTIPATED?

Here is Amazing Relief for Conditions Due to Sluggish Bowels. If you think all laxatives are alike, just try this all vegetable laxative. No mild, through, refreshing, invigorating, dependable relief from sick headaches, bilious spells, tired feeling when associated with constipation.

Without Risk get a 25c box of N.H. from your druggist. Please the test—then if not delighted, return the box to us. We will refund the purchase price. That's fair. Get N.H. Tablets today.

JODOK

What we fought for? If democracy is ever to gain the virility that it had only a generation ago, we have to learn to sell it to our people, to dramatize it, and to make it tangible and visible to the average citizen. The superiority of the totalitarian states, lies only in the fact that leaders are far better masters of human psychology. They knew that people not only want a high standard of living and adequate purchasing power, but also, myth, ritual and glory. They want to feel themselves to be a part of something which is great and eternal.

Our forefathers spent generations destroying our myths and holding our rituals up to ridicule, and they wonder why the Youth of America does not love liberty. People who yearned to improve our democracy, have gone around trying to get the pledge of the flag taken out of our schools, because it is "chauvanistic," but why in the world any American should not be proud to say, "I pledge allegiance to the flag of the United States of America, and to the republic for which it stands, one nation, indivisible, with liberty and justice for all," is something I can't understand. As a platform for reform, it could not be better. Have we liberty and justice for all? No. Then let us go about getting them, for we are pledged to it. Thus you unite tradition with progress, which is one way in which urbanity can be united with change, and the whole process titled to much more respect as our governor, than any of them are inclined to show him. The governor is honest in his efforts to have the will of the people of the state enacted into law, and laws that may be permanent, and it is little better than actual robbery for these men to take the people's money and fool away their time in all manner of attempts to frustrate the people's desires. Shame on 'em.

I have just been talking to Hiram Attaway, proprietor of the Attaway Variety Store, and who is also chairman of the Chamber of Commerce "Community Betterment Committee", and he stated that his committee had just had a meeting in regard to an effort to have our people do all they can toward beautifying their yards and gardens, by growing decorative flowers and shrubs in their yards and good vegetables in their gardens. He said the committee is offering a prize of five dollars for the most beautiful yard, three dollars for the second best and a dollar and fifty cents for the third best yard, and like prizes for the gardens in the same order, and those wishing to enter the contest should call at his store and register.

And that is not the only way our people can assist in making the city more beautiful, for there are a number of old offensive "eyesores" in some of the alleys and at the back doors of many of the business places, which can easily be removed and which removal will add immensely to the city's appearance. He did not say that his committee will offer any prizes to the owners of these places to have these "eyesores" removed, but the committee is making a demand upon their civic pride to have such changes made.

Now, Hiram has a bunch of bully fellows on his committee, and the duties of his committee are, perhaps the most thankless of any of the list of standing or permanent committees, and they are not doing this work for their own pomp and glory, but it is being done for the good and safety and enjoyment of all the people of the city. Now, honest, feller citizens; do you not think they are deserving of your cooperation in the matter? If you do, prove it by getting busy and doing your part of the work. Let us all get busy.

And I just want to mention the ladies of the Legion Auxiliary, who have sponsored the county-wide essay contest among the students of our high schools, on the subject of "What Adequate National Defense Means to the Youth of America." It is to be regretted that only seven of the schools of the county entered this worthwhile con-

Young People's meeting held each Wednesday evening, 8 o'clock.
Monthly business meeting, Monday night after each third Sunday.

THE G. A. REPORT

The G. A. of the Friona Baptist church met in the home of the leader, Mrs. Joe Wilson, Tuesday, with thirteen members and two new members present.

Two hymns were sung, after which Imogene Newmon led in prayer. Mrs. Wilson led in a study of the Forward Steps. "I Am Resolved" was sung and Mrs. Wilson dismissed with prayer.

Reporter, Winona Simpson

The Misses Iva Williams, Theo Merrill and Pauline Williams and Messrs. Roy Jones, Shelton Harvin and Steve Struve, of Abernathy, spent Sunday in Friona. They visited in the A. A. Crow, Wright Williams and Nat Jones homes.

test, but the efforts of these seven are worthy of the consideration and emulation of all the students of the county and adults as well, and these ladies are deserving of your thanks for their efforts.

And last, but not least, is the efforts and work of the splendid young lady, who has charge of the work in English in the Friona High School, and who has given such able and efficient instruction to these young people in enabling them to prepare these splendid essays in such a scholarly manner. She has been faithful sincere in her work, and it is her earnest desire that each of these young people under her tutorage shall be led to do some real thinking for themselves, and that this thinking may be along lines that will not only add luster and self-satisfaction to their own lives; but will make their community a better community, and their state a better state, and their nation a better nation, and the world as a whole a better world.

I had the very great pleasure of a short conversation with her this afternoon, and I must say that I was deeply impressed by her sincerity of purpose, and while she yearns for deeper and better thinking among her students, she probably does not object to a certain amount of frivolous thought by them, as this seems to be mandatory in our human nature, to a well balanced mentality, and I commend her heartily in her efforts and the sincerity of her ambitions. May there be millions more like her.

The day may be drab and dreary,
And the sky obscured by the dust;
But here's to the youth,
Who, in spirit and truth,
Must do something worthwhile—
or bust!

Homade & Boughten

Mr. Roy Golden, of Portales, New Mexico, drove over to Friona, Friday and visited old friends and relatives for a while. He was accompanied home by Mrs. Ernest Gatlin and daughters, the Misses Ernestine and Dorris, who will visit there several days. Mrs. Gatlin and Mrs. Golden are sisters.

Mr. Denny Fogerson, of Clovis, New Mexico, was a business caller here Wednesday.

ADJUST TO SUIT YOUR NEEDS

You can buy the Universal "Z" Middle breaker either as a 2 or 3 bottom unit. For a 2-bottom unit all you need buy later to make it a 3-bottom unit is the center beam and bottom and you are all set to go.

The beams can be spaced on the 2-row Middlebreaker to plow either every other row or rows right next to each other.

To change to lister planter merely add cans, beam and tubes using small Middlebreaker bottoms or lister bottoms—adjust bottoms for spacing—and you are set to go.

LOOSE GROUND LISTER ATTACHMENT

Loose ground lister attachment available in 2-4 row sizes. May be attached to either Z Duchess or Z Lister planters.

EASIER TO SERVICE

The new "Visionlined" "Z" is so built that the operator has full "vision" ahead. Every

inch of the tractor is made simple and very compact in design and construction—all parts are more accessible. Practically the whole interior of the engine may be serviced from the side by removing the side inspection plates. Valves are horizontal with vertical rocker arms. One piece combination base pan and crankshaft housing affords very rigid and long life construction. 5 speeds forward to suit any need. The "Z" is adapted to all farm jobs.

Adjustable rear wheel tread without attachments of any kind.

WOMEN'S CLUBS

JUNIOR WOMAN'S CLUB

Federation Day was observed by the Junior Woman's Club, Tuesday evening, at its meeting in the home of Mrs. Ruth Edelman.

The program was opened by a reading of the Club Collect, "The Importance of Federation to Our Club" was discussed by Neida Bragg. Irene Osborn gave a survey of "Famous Women in the Federation."

May 9th was set as Guest Day, at which time each member of the club is to invite one guest. The Senior Club will be honor guests. The following committees were appointed to serve next year:

Program—Ufala Ethridge, Gypsy McLean, Lola Goodwine, Florence Dollar, Finance—Jane Williams, Ruth Edelman, Martha Clements, Carolyn Dwight; Membership—Irene Osborn, Lila Payne Gee, Mattie Faye Crow, Esther O'Rear.

Flower and Community Beautification Committee—Melba Miller, Irene McFarland, Jewel Wells.

Social and Community Recreation—Ferre Cox, Allo Reeve, Christine Holmes, Seva Welch.

Public Welfare and Safety—Mary Spring, Neida Bragg, Tom Lewis, Inez Welch.

Hub Club

The Hub demonstration club met in the home of Mrs. Clarence Day, Friday, April 14th.

Miss St. Clair gave a demonstration on "Butter Cakes."

The next meeting will be with Mrs. V. E. Adams and Mrs. Bill Gibson, on April 28. The program, "Being a Good Neighbor," will be in charge of Mrs. Will Jones.

Those present were Miss St. Clair; Mesdames Clarence Day, J. W. Shults, Ausburne Loflin, Russell Loflin, W. R. Scott, Clifford Boatman, A. H. Boatman, V. E. Adams, Will Jones R. F. Jones, Sam Jones, Bill Gibson, and Miss Gladys Jones.

FARM SECURITY NEWS

When the homemaker, at loss to find something for her meals, looks longingly at the meat counter only to find that the high prices of tenderloin and T-bones and an already unbalanced budget prohibit her ambition, she may find that a less tender cut of meat may serve her purpose just as well, and the food value not decreased.

Swiss Steak, which may be made from a tough cut of meat, may be prepared by the following recipe according to Miss Wynona Swebsten, Home Management Supervisor, Farm Security Administration:

Use 1 1/2 lbs. lean beef, 1 1/2 tablespoons melted suet; 1/4 cup flour, 3-4 teaspoons salt, few grains pepper 1 1/2 cups hot tomatoes, 3 or 4 slices onion.

Sift flour with salt and pepper and pound thoroughly into steak. Sear steak in suet in heavy pan. Add onion and tomatoes. Cover and simmer two hours or until meat is very tender. Add water from time to time as needed.

For gravy, thicken the tomatoes and water with a little flour and water, well mixed before adding.

Raymond Baker, who is employed at Floyddada, came up to visit his parents, Mr. and Mrs. George Baker, the first of the week.

RURAL ELECTRIFICATION PROJECT GRANTED

Word was received here last week but too late for publication, in last week's issue of the Star, to the effect that the rural electrification project for Farmer County, that has been under way for several months past, had been granted.

The total project for Farmer County, which totaled 185 miles, has been granted and will be distributed over three main lines, which will cross the county on practically east and west lines.

One line will traverse the north part of the county, not so far south of the county line, while a second line goes west from near Black, to some point near the western county line.

The third line will cross the railroad at Black and go south to some point near Highway 86, and thence west to within a few miles of Bovina, thence south again to a point east of Oklahoma Lane, and then west to within a few miles of Farwell, then north to some point west of Bovina, and then east to within about two miles of Bovina.

At least that is the outline of the coverage as it was given to and understood by a representative of E. Star, last week. The Star has been unable to get an estimate of the number of subscribers the project will have in this county.

made mentally comfortable. Democracy is not perfect, but I don't see how we can ever make it more perfect until we know what it is. And the symbol, the ritual, the heroes, the songs, reveal what it is to the ordinary person.

Youth, or at least, the flower of Youth, in every nation, demands liberty, liberty for the nation in order that there might be liberty for the citizens. Particularly in Italy, from 1820 to 1860, the story of the young men who suffered years of imprisonment, exile and torture in order to forward the cause of freedom, is one of the noblest in all history. The same fight was waged by Cosmth and others in Hungary, the patriots in German States, and elsewhere. These were struggling for liberty to think, speak, write and act as free men in a free state.

In France, England and the United States there has been a marked toying with Communism or Fascism as solution for our ills among the young so-called intellectuals. We may note one or two reasons, among others, for this change of mental temper during the past century. In the first place, Youth with its ambitions, its hopefulness, and, it may be added, its inexperience, demands action. It wants some cause to fight for, some program to put into immediate operation. It makes little difference whether the cause or program be vague, impractical, even hopeless, provided it appeals to the imagination as an ideal. Youth is impatient of cautions or half-measures. Its cynicism, though often expressed now by many, is a pose, and both from physical and mental energy, and from lack of experience, it welcomes the possibility of change and has abounding faith in the capacity of the world to be made over in a day by a new idea or a sudden altering of institutions.

We, the Youth of America, are impatient and like to take short cuts to a goal. The trouble is that all the short cuts proposed or tried out do not solve the economic problems, and so far, indeed, have made these conditions worse than in democracies, while at the same time they demand the renouncing of those liberties which we have spent centuries in acquiring and which, because they have become like the air we breathe, will be sadly recalled only when someone has us by the throat.

What then? If we are not to put on black shirts or brown shirts, or carry red flags and surge forward to place ourselves overnight under the rule of some dictatorship—what are we to do?

It seems to me that there lies directly ahead of us, a great challenge and a great fight, not only for youth, but for all. The challenge is to continue the amelioration of the lot of the ordinary man that has been progressing for some centuries to find, not the perfect, but the best solution humanly possible for the economic problems pressing upon us; to build a better order for the generations to come, but to do this with a realization of the whole nature of men without being led astray by the temporary exigencies of economic difficulties in our own generation, and without sacrificing the precious heritage of liberty won in the past. We want neither the oppressions of that past nor the still greater oppression resulting from the new tyrannies.

The greatest man who ever lived, talked so simply that common people heard him gladly. He went about giving expressions to his creed of love and brotherhood by doing good. He told those who were to follow him, to go out and preach the gospel everywhere. Two thousand years have told away. The Christian world today pays lip service to His life's work and worth, and yet we prepare for universal slaughter. My earnest desire, as one among millions of American youth, is to help cast away fear and to form a chain of Christians around the world, who shall refuse longer to bow the knee to the false gods of force and war; who shall unite to sweep away all causes of war from our lives, both as individuals and as nations.

JODOK
gain what we fought for? If democracy is ever to gain the virility that it had only a generation ago, we have to learn to sell it to our people, to dramatize it, and to make it tangible and visible to the average citizen. The superiority of the totalitarian states, lies only in the fact that leaders are far better masters of human psychology. They knew that people not only want a high standard of living and adequate purchasing power, but also, myth, ritual and glory. They want to feel themselves to be a part of something which is great and eternal.

Our forefathers spent generations destroying our myths and holding our rituals up to ridicule, and they wonder why the Youth of America does not love liberty. People who yearned to improve our democracy, have gone around trying to get the pledge of the flag taken out of our schools, because it is "chauvanistic," but why in the world any American should not be proud to say, "I pledge allegiance to the flag of the United States of America, and to the republic for which it stands, one nation, indivisible, with liberty and justice for all," is something I can't understand. As a platform for reform, it could not be better. Have we liberty and justice for all? No. Then let us go about getting them, for we are pledged to it. Thus you unite tradition with progress, which is one way in which urbanity can be united with change, and the whole process titled to much more respect as our governor, than any of them are inclined to show him. The governor is honest in his efforts to have the will of the people of the state enacted into law, and laws that may be permanent, and it is little better than actual robbery for these men to take the people's money and fool away their time in all manner of attempts to frustrate the people's desires. Shame on 'em.

I have just been talking to Hiram Attaway, proprietor of the Attaway Variety Store, and who is also chairman of the Chamber of Commerce "Community Betterment Committee," and he stated that his committee had just had a meeting in regard to an effort to have our people do all they can toward beautifying their yards and gardens, by growing decorative flowers and shrubs in their yards and good vegetables in their gardens. He said the committee is offering a prize of five dollars for the most beautiful yard, three dollars for the second best and a dollar and fifty cents for the third best yard, and like prizes for the gardens in the same order, and those wishing to enter the contest should call at his store and register.

And that is not the only way our people can assist in making the city more beautiful, for there are a number of old offensive "eyesores" in some of the alleys and at the back doors of many of the business places, which can easily be removed and which removal will add immensely to the city's appearance. He did not say that his committee will offer any prizes to the owners of these places to have these "eyesores" removed, but the committee is making a demand upon their civic pride to have such changes made.

Now, Hiram has a bunch of bully fellows on his committee, and the duties of his committee are, perhaps the most thankless of any of the list of standing or permanent committees, and they are not doing this work for their own pomp and glory, but it is being done for the good and safety and enjoyment of all the people of the city. Now, honest, fellow citizens; do you not think they are deserving of your cooperation in the matter? If you do, prove it by getting busy and doing your part of the work. Let us all get busy.

And I just want to mention the ladies of the Legion Auxiliary, who have sponsored the county-wide essay contest among the students of our high schools, on the subject of "What Adequate National Defense Means to the Youth of America." ADJUST TO SUIT YOUR NEEDS

You can buy the Universal "Z" Middlebreaker either as a 2 or 3 bottom unit. For a 2-bottom unit all you need buy later to make it a 3-bottom unit is the center beam and bottom and you are all set to go.

The beams can be spaced on the 2-row Middlebreaker to plow either every other row or rows right next to each other.

To change to lister planter merely add cans, beam and tubes using small Middlebreaker bottoms or lister bottoms—adjust bottoms for spacing—and you are set to go.

LOOSE GROUND LISTER ATTACHMENT

Loose ground lister attachment available in 2-4 row sizes. May be attached to either Z. Duchess or Z Lister planters.

EASIER TO SERVICE

The new "Visionlined" "Z" is so built that the operator has full "vision" ahead. Every

inch of the tractor is made simple and very compact in design and construction—all parts are more accessible. Practically the whole interior of the engine may be serviced from the side by removing the side inspection plates. Valves are horizontal with vertical rocker arms. One piece combination base pan and crankshaft housing affords very rigid and long life construction. 5 speeds forward to suit any need. The "Z" is adapted to all farm jobs.

Adjustable rear wheel tread without attachments of any kind.

HOME DEMONSTRATION CLUBS

FRIONA HOME DEMONSTRATION CLUB

The Friona Home Demonstration Club will meet on Thursday, April 27th, when we will have our first cake demonstration of the year. There will be a number of these cake demonstrations coming up in our club meetings, and you will be missing something fine if you miss them. Our agent, Miss St. Clair, will be with us and demonstrate the making of "Butter Cakes," so don't miss this very instructive and interesting meeting.

Mrs. B. Hughes, Reporter.

Clyde Goodwine, who departed for Kansas City last Friday, returned home Wednesday morning.

WOMEN'S CLUBS

JUNIOR WOMAN'S CLUB

Federation Day was observed by the Junior Woman's Club, Tuesday evening, at its meeting in the home of Mrs. Ruth Edelman. The program was opened by a reading of the Club Collect. "The Importance of Federation to Our Club" was discussed by Nelda Bragg. Irene Osborn gave a survey of "Famous Women in the Federation."

May 9th was set as Guest Day, at which time each member of the club is to invite one guest. The Senior Club will be honor guests. The following committees were appointed to serve next year:

Program—Ufala Ethridge, Gypsy McLean, Lola Goodwine, Florence Dollar; Finance—Jane Williams, Ruth Edelman, Martha Clements, Carolyn Dwight; Membership—Ene Osborn, Lila Faye Gee, Mattie Faye Crow, Esther O'Rear. Flower and Community Beautification Committee—Melba Miller, Irene McFarland, Jewel Wells. Social and Community Recreation—Ferrel Cox, Alvo Reeve, Christine Holmes, Seva Welch. Public Welfare and Safety—Mary Spring, Nelda Bragg, Tom Lewis, Ivez Welch.

Hub Club

The Hub demonstration club met in the home of Mrs. Clarence Day, Friday, April 14th.

Miss St. Clair gave a demonstration on "Butter Cakes."

The next meeting will be with Mrs. V. E. Adams and Mrs. Bill Gibson, on April 28. The program, "Being a Good Neighbor," will be in charge of Mrs. Will Jones.

Those present were Miss St. Clair; Mesdames Clarence Day, J. W. Shults, Ausburne Loflin, Russell Loflin, W. R. Scott, Clifford Boatman, A. H. Boatman, V. E. Adams, Will Jones, R. F. Jones, Sam Jones, Bill Gibson, and Miss Gladys Jones.

FARM SECURITY NEWS

When the homemaker, at loss to find something for her meals, looks longingly at the meat counter only to find that the high prices of tenderloin and T-bones and an already unbalanced budget prohibit her ambition, she may find that a less tender cut of meat may serve her purpose just as well, and the food value not decreased.

Swiss Steak, which may be made from a tough cut of meat, may be prepared by the following recipe according to Miss Wynona Swepton, Home Management Supervisor, Farm Security Administration:

Use 1½ lbs. lean beef, 1½ tablespoons melted suet; ¼ cup flour, 3-4 teaspoons salt, few grains pepper 1½ cups hot tomatoes, 3 or 4 slices onion.

Sift flour with salt and pepper and pound thoroughly into steak. Sear steak in suet in heavy pan. Add onion and tomatoes. Cover and simmer two hours or until meat is very tender. Add water from time to time as needed.

For gravy, thicken the tomatoes and water with a little flour and water, well mixed before adding.

Raymond Baker, who is employed at Floydada, came up to visit his parents, Mr. and Mrs. George Baker, the first of the week.

RURAL ELECTRIFICATION PROJECT GRANTED

Word was received here last week but too late for publication, in last week's issue of the Star, to the effect that the rural electrification project for Parmer County, that has been under way for several months past, had been granted.

The total project for Parmer County, which totaled 185 miles, has been granted and will be distributed over three main lines, which will cross the county on practically east and west lines.

One line will traverse the north part of the county, not so far south of the county line, while a second line goes west from near Black, to some point near the western county line.

The third line will cross the railroad at Black and go south to some point near Highway 86, and thence west to within a few miles of Bovina, thence south again to a point east of Oklahoma Lane, and then west to within a few miles of Parwell, then north to some point west of Bovina, and then east to within about two miles of Bovina.

At least that is the outline of the coverage as it was given to and understood by a representative of the Star, last week. The Star has been unable to get an estimate of the number of subscribers the project will have in this county.

made mentally comfortable. Democracy is not perfect; but I don't see how we can ever make it more perfect until we know what it is. And the symbol, the ritual, the heroes, the songs, reveal what it is to the ordinary person.

Youth, or at least, the flower of Youth, in every nation, demands liberty, liberty for the nation in order that there might be liberty for the citizens. Particularly in Italy, from 1820 to 1860, the story of the young men who suffered years of imprisonment, exile and torture in order to forward the cause of freedom, is one of the noblest in all history. The same fight was waged by Cosdith and others in Hungary, the patriots in German States, and elsewhere. These were struggling for liberty to think, speak, write and act as free men in a free state.

In France, England and the United States there has been a marked toying with Communism or Fascism as solution for our ills among the young so-called intellectuals. We may note one or two reasons, among others, for this change of mental temper during the past century. In the first place, Youth with its ambitions, its hopefulness, and, it may be added, its inexperience, demands action. It wants some cause to fight for, some program to put into immediate operation. It makes little difference whether the cause or program be vague, impractical, even hopeless, provided it appeals to the imagination as an ideal. Youth is impatient of cautions or half-measures. Its cynicism, though often expressed now by many, is a pose, and both from physical and mental energy, and from lack of experience, it welcomes the possibility of change and has abounding faith in the capacity of the world to be made over in a day by a new idea or a sudden altering of institutions.

We, the Youth of America, are impatient and like to take short cuts to a goal. The trouble is that all the short cuts proposed or tried do not solve the economic problems, and so far, indeed, have made these conditions worse than in democracies, while at the same time they demand the renouncing of those liberties which we have spent centuries in acquiring and which, because they have become like the air we breathe, will be sadly recalled only when someone has us by the throat.

What then? If we are not to put on black shirts or brown shirts, or carry red flags and surge forward to place ourselves overnight under the rule of some dictatorship—what are we to do?

It seems to me that there lies directly ahead of us, a great challenge and a great fight, not only for youth, but for all. The challenge is to continue the amelioration of the lot of the ordinary man that has been progressing for some centuries to find, not the perfect, but the best solution humanly possible for the economic problems pressing upon us; to build a better order for the generations to come, but to do this with a realization of the whole nature of men without being led astray by the temporary exigencies of economic difficulties in our own generation, and without sacrificing the precious heritage of liberty won in the past. We want neither the repressions of that past nor the still greater repression resulting from the new tyrannies.

The greatest man who ever lived, talked so simply that common people heard him gladly. He went about giving expressions to his creed of love and brotherhood by doing good. He told those who were to follow him, to go out and preach the gospel everywhere. Two thousand years have told away. The Christian world today pays lip service to His life's work and worth, and yet we prepare for universal slaughter. My earnest desire, as one among millions of American youth, is to help cast away fear and to form a chain of Christians around the world, who shall refuse longer to bow the knee to the false gods of force and war; who shall unite to sweep away all causes of war from our lives, both as individuals and as nations.

CARTER FIELD

New Deal Democrats talk about possibility of Republican success in 1940 . . . Probably propaganda . . . Whatever is done about the cotton situation will probably be wrong . . . "Appeasement" program apparently profited only two big corporations.

WASHINGTON.—It's rather curious that for some weeks now one hears more talk about Republican victory in 1940 from Democrats, and particularly from New Deal Democrats, than from Republicans.

This is not just a strange situation. There is plenty of logic back of it. Some of it is founded on cold reason. But a good deal of it is propaganda.

The answer to why there is not too much talk of Republican victory from the G. O. P. leaders themselves is that they realize their own weakness. Despite the Republican victories last fall in many states, which had been held by the Democrats for six years, most of the states are still ruled by the Democratic party.

The importance of this lies in organization. It means that the Democrats have the state house crowd, men on the state payroll who want to stay there, and whose main job next year will be carrying their own states for the Democratic ticket regardless of who is the presidential nominee and what may happen to be written in the platform.

Most politicians believe that control of the county governments is more important than control of the state government when it comes to carrying a state in an election. And by the same token the Democrats are in control of a tremendous majority of the county governments in this country.

Most Democrats Don't Want A Conservative Candidate

Then, too, a careful survey of the 1938 election does not present the bright forecast for Republican success which some seem to think. If the Democrats in 1940 can only hold the states they carried beyond question in 1938, leaving out such doubtful problems as Indiana, Iowa and Colorado, they will have a comfortable margin in the electoral college.

Moreover, the Republicans don't like the idea of getting too enthusiastic until they know who their leader is apt to be. Thomas E. Dewey is way out in front now, but there is plenty of talk about Senator Robert A. Taft of Ohio, and Governor John W. Bricker of Ohio, and others.

On the Democratic side there is an entirely different situation. Down in their hearts most of the Democrats, especially of the New Deal variety, believe the Democratic party will be successful again—but they would never think of conceding that the party can win with a conservative as the nominee!

For instance, most New Dealers would regard the nomination of a man like Senator Harry Flood Byrd of Virginia, or Josiah W. Bailey of North Carolina as little short of a catastrophe, and none of them would throw their hats up in the air over the idea of John Nance Garner being nominated.

So the strategy of these New Dealers at present is to keep the Democrats scared about the next election.

Whatever Is Done About Cotton Is Sure to Be Wrong

Only one thing seems sure about the cotton situation. That is that whatever is done will turn out to be wrong. In fact, economists who have studied the situation, who know about the rest of the world as well as about the United States, and whose judgment is not affected by political considerations, say frankly that not one of the proposed plans will work in the long run; that all of them would be expensive as well as futile.

With hindsight, the nonpolitical experts say they could have remedied the situation had they started on it in 1928. Now, they are not sure that anything could be done. But as a matter of fact, this hindsight would have been of no practical value, for the simple reason that even if one could have foreseen the future, back in 1928, it is inconceivable that a politically minded government would have taken the proper course. It would have seemed too brutal—too hard on the cotton farmers—at the time.

The year 1928 is picked not because it was the year before the business crash began, but because in a way it marks the starting of the great cotton producing countries of the world. It was the year before President Hoover began to worry about the farm problem. It was before the farm board of that administration. For there is no doubt whatever that it has been federal interference with the natural course of cotton growing that has raised the present problem.

Let's look at the history of cotton before that. Every now and then there would be a terrible overproduction, the price would go to, and the southern statesmen would scream their heads off about the census bureau issuing misleading figures, or the gamblers on the cotton exchange preying on the poor farmers, or something of the sort. Then, another season would see fairly good prices, and every one in the cotton states would be so happy that no one up north would even hear that the trouble was over. Every time the rest of the country heard about cotton it was the bad news, not the good.

Scheme Was Set Up Which Made the Trouble Permanent
With the Hoover farm board in action, however, a scheme was set up which inevitably made the trouble permanent instead of just every few years. For a century before that the British cotton mill owners had been hoping to develop some other section of the world as a cotton producer. They wanted something which would prove a check on high cotton prices in the short-crop years.

Every one interested in cotton could see that, with the starting of this idea of the government doing something for the cotton farmers, the period of occasional low prices for cotton had gone forever—that is the possibility of the United States dumping a cotton surplus at very low prices had passed. This was made even more clear when the United States government started paying farmers not to grow cotton.

With this "guarantee" of high world prices, development of cotton growing in other areas grew by leaps and bounds. Uncle Sam was holding an umbrella over them. Danger of cheap cotton from the United States in any particular year was averted.

As a result of this, Brazil expanded her cotton growing. She found that she could sell cotton at six cents a pound and make money. There has never been a chance since that she would abandon this expansion, for there is not a state east of the Mississippi where cotton can be produced, at a profit, at any such price.

Appeasement Program Helped Only Two Big Corporations

Curiously enough, apparently the only two big corporations in the country which profited from the "appeasement" program—during this short span of life—were the big electric utility holding companies which President Roosevelt is known to dislike so cordially. One of these is Electric Bond and Share. The other is Commonwealth and Southern.

It will be recalled that one of the most convincing steps in the so-called appeasement program was the agreement on the part of TVA to buy out the interests in Chattanooga of the Commonwealth and Southern, and in Memphis of the Electric Bond and Share (this latter held through a subsidiary).

At the time these agreements were made, Harry L. Hopkins had been talking to senators and members of the house as to the necessity of doing something to encourage business.

One of the main reasons for "appeasement" the electric industry was that Hopkins had been thoroughly sold by the arguments for the preceding 18 months by William O. Douglas, now on the Supreme court, that if something could be done to encourage the electric industry, there would be such a flood of spending that it would be almost enough alone and unaided to produce the return of prosperity.

But a far more important part of the appeasement program, and one which affected all business and new investment instead of merely the electric business, was tax revision.

President Intervenes in Fight for Revision of Taxes

Suddenly the President intervened in the fight for tax revision with an ultimatum which seems to have definitely ended all chance for it. This does not apply, of course, to the postponement of the increase in the social security taxes, but to the levies on corporations.

His ultimatum was that if any reduction should be made in the estimated revenues, this must be made up by adding additional taxes somewhere else—but on the corporations. In short, his verdict is that congress may shuffle the present taxes on business in any way it may deem to be helpful, but that the net result—in estimated revenues—must be the same.

What so many of his lieutenants had hoped, and this goes not only for important members of the house and senate but for the treasury department and the department of commerce, was that the government would take a chance—that it would encourage business by reducing taxes on business, hoping that business would thereupon boom, and the actual revenues of the treasury would be increased by the reduction rather than cut.

This phase of the problem the President ignored completely. He still insists that if estimated revenues are reduced, then government spending, for relief or something else, must be reduced to precisely the same amount. He attacks the problem just as though the federal budget were now balanced, and any reduction of the corporation taxes would throw it out of balance.

This has divided business as to the tax revision, will keep it divided unless congress forces the gamble on the President, which does not now seem likely.

Toothache? Try Sitting on a Stove —Or Solicit Your Neighbor's Opinion

Ancients (and Moderns, Too) Offer Deluge of Panaceas Ranging from Garlic to Zulu Cherries; Even Shakespeare Philosophized About It!

The next time you have a toothache here's what not to do: "Place a snip of garlic ground with oil and salt on the thumb-nail on the ailing side and apply the concoction to the gums surrounding the aching tooth. Be very careful, however, to surround the garlic with dough to protect the flesh from leprosy."

If that doesn't work—and it won't—here's another prescription that's just as useless:

"Gather a number of earthworms and place them in a dish filled with moist sand. Strew over it the minced yolk of one egg. The earthworms shall eat it. After some time they are cleaned, put in a pot, which should be covered well, placed in a hot oven and dried."

"About two egg shells full of this powder are rubbed to form a salve with bloodstone and red sandal, two ounces each, unadulterated musk, two scruples, lard obtained from a he-bear, lard from a boar, five ounces each."

"Smearing" Is Helpful.
"If you wish to use the 'remedy,' you should first scratch the tooth

with a splinter of aspen wood and then smear the salve on it."

If the tooth still aches—and it will—don't bother to try this:

"An eel, a spiny back, True indeed, indeed, True in sooth, in sooth, You must eat the head Of said spiny back, To ease the aching tooth."

This whole business may sound silly, and of course it is, but up until a hundred years ago in most parts of the world, and even in some remote corners today, toothache remedies such as these noted above were and are prescribed conscientiously for the relief of dental pain.

Looking into the history of aching molars and remedies, there is no evidence available that Adam ever had a toothache, nor is there any case history on the dental health of Eve, but it is a safe assumption that there have been sore teeth ever since the time of our common ancestors and it is almost as certain that there have been as many remedies as there have been toothaches.

"Dentists" in Abundance.
One time, history relates, a fellow was asked to name the most widespread profession. With little hesitation he replied there are more dentists in the world than representatives of any other field. When called upon to prove his statement,

CHINESE CURE—Garlic and saltpetre should be applied in the left ear to ease an ache in the right side of the jaw, and vice versa. So runs an ancient Chinese toothache cure.

he tied a handkerchief around his jaw and sat himself in front of a church on a great holiday, moaning and groaning with feigned pain.

Almost everyone who entered the church stopped to prescribe for his distress—practically everybody who entered the church was a "dentist."

He proved that everyone is a "dentist" and what's more he showed that there are as many recipes for toothache relief as there are dental advisers.

Since time immemorial there has been, indeed, a legion of medicines, a host of magics and a startling multiplicity of procedures intended to cure the evil of toothache. All three kingdoms of nature—

plants, animals and inorganic substances, have been called upon to stop dental pain.

But before we learn more about the weird remedies of magic, superstition and ignorance, it is fitting, perhaps, to find out just what a toothache is and how to cure it. Any member of the American Dental association will tell you that toothache is not a disease in itself—rather it is a symptom of disease, the most common of all human ailments, tooth decay.

Only One Way to Stop Pain.
Decay results because there is a break in the hardest substance in the human body, tooth enamel. When decay exposes the nerve of the tooth, pain results. Medicaments will give temporary relief, but modern thought is that the best way to stop a tooth from aching is to relieve its nerve from exposure.

Of course ancient people knew little of the whys and wherefores of toothache and even today many people know little of the pathology of

the teeth, with the result that many of the ancient recipes based on superstition are still being prescribed today. The ancients did know, however, that toothache is a painful thing.

There is a story told of a Turk in Bosnia, who upon encountering a weeping child, asked, "Why are you crying?" When the child replied, "A snake bit me," the Turk said, "That's nothing. I thought you had a toothache."

The English of old had a proverb which pointed out that "He Who Hath Aching Teeth, Hath Ill Tenants." The proverb embodies more truth than the author realized, for modern dental and medical study has shown that aching and diseased teeth can upset other tenants in the human structure, such as the heart, eyes, tonsils, joints, etc.

Shakespeare Was Right.
Shakespeare immortalized aching molars in "Much Ado About Nothing," when he said:

"For there was never yet philosopher That could endure the toothache patiently."

The majority of toothache remedies since time unrecorded have been applied to the aching member of the dental arch, but relief of pain has been sought by the application of toothache cures to cheeks, nostrils, ears and even to more distant parts of the body such as the upper arms, elbows, forearms and wrists.

Folk dentistry in all parts of the world uses almost every type of plant life for relief, from acorns to Zulu cherries. The Polish Jews eat an apple which has been roasted with a species of palm leaf over a fire for tooth comfort. East Indians inhale an infusion of bamboo.

The ancient Greek dentists, believe it or not, prescribed butter-cups. Garlic has been the remedy of many people, while others have used lemon, lily-of-the-valley, wheat, moss, parsnip, tobacco and a host of other types of vegetation.

One Austrian remedy urges the patient to cook garlic in vinegar and to tie a poultice of same on the wrist on the side of the aching tooth. In Bavaria they peel a piece of garlic and place it in the ear. The Chinese made pills of garlic, horseradish seeds, saltpeter and human milk, which they inserted in the nose.

In Brandenburg a dental genius "discovered" tooth ailments could be relieved if the sufferer ran around a church three times without thinking of a fox. The Ruthenians placed their hopes in a concoction of dog tooth powder. Once people were convinced that oral pain would disappear if the teeth were picked with the nail from the middle toe of an owl.

Mice and Lion's Teeth.
Another Central European physician of the Middle Ages advised his patients to bite the head off a mouse and then suspended said head from the neck. It was believed, too, that a youth would be free from aching teeth for the remainder of his life if he wore the canine tooth of a lion around his neck.

Just as "surely" as plants and animals were infallible cures for toothache, so were treatments with

MOST FANTASTIC—According to an anonymous humorist, all one has to do is take a mouthful of cold water and sit on a hot stove until the water boils. The toothache's then supposed to be gone.

human organs and secretions considered sure-fire relief, for example:

"To ease the tooth, you well might, Visit the graveyard at midnight. Make sure you dodge the morning sun—Then bite the bone of a skeleton."

In Prussia it was believed that the index finger of the right hand had greater healing power than the other fingers, so the Prussians, among other remedies, urged that the index finger of a corpse be placed against the aching tooth, with the plea:

"To thee, the deceased, I complain of my pain. Take my toothache from me And keep it in thy grave."

The inorganic substances used for toothache cures run from agate to zinc, with demand for arsenic, iron rust, lead, salt and water. Water, perhaps, is involved in the most fantastic of tooth remedies. All one has to do, according to the advice of an anonymous humorist, is to fill the mouth with cold water and sit on a hot stove until the water boils.

And that advice is just as good for the relief of toothache as any mentioned above.

Modern science, "which has released the mind from the oppressing grasp of mystical bugaboos, which has liberated our surroundings from the presence of spirits and ghosts, of demons and devils" has demonstrated that toothache is merely the symptom of a disease, namely: dental decay.

The moral of our story is that when a tooth aches the nerve is either exposed or in danger of being exposed. Permanent relief is assured only by relieving the nerve from exposure or losing the tooth.

Douglas Brings New Color to Supreme Court

Freckle-Faced Justice Is The Youngest Since Joseph Story

Twenty years ago a sandy-haired young Scotchman pushed a lawn mower and stoked a furnace at Whitman college, Washington. Today the same sandy-haired Scotchman, a little older but still a "kid," is the youngest United States Supreme court justice since Joseph Story of Massachusetts was elevated to the bench at the age of 32, in 1811.

William Douglas, at 40, looks back on a meteoric rise from the day he "mothered" a box-car-full of sheep from Washington to Chicago on his way east from Yakima, en route to enter Harvard law school. With a short-lived teaching career behind him, Douglas changed his mind about Harvard and studied law at Columbia under Harlan F. Stone, who is now his colleague on the court.

After teaching at Columbia, Douglas met Robert Hutchins who was then the "boy dean" of Harvard's law school. Offered a post of assistant professorship at Harvard, he was soon made Sterling professor of law at Yale. In 1936, when he accepted a post on the securities and exchange commission, Douglas was said to be the country's highest paid law professor.

Mrs. Douglas, the girl he kissed good-bye back in Yakima, became his wife the next year. They have two children, Mildred, nine, and William, seven.

Douglas is regarded as the most extraordinary character placed on the Supreme bench in many years. He is a New Dealer and a close friend of Assistant Attorney General Thurman Arnold, a former Yale faculty member whose specialty is opposing monopolistic practices. Although accused of being a "left-winger," the new justice denies radicalism and simply insists government must be "mobile, bold and intelligent."

Lovely Bedspread of Filet Crochet Squares

Pattern No. 1499

Extra lovely—this lacy spread—but yours at no extra cost save that of this simple pattern and the string used to crochet it. One 10-inch filet square, repeated, makes all this loveliness! In spread or cloth—use only four for a square doilie or an inset for a cloth. Pattern 1499 contains directions and a chart for making the square shown and joining it to make a variety of articles; illustrations of it and of all stitches used; material requirements.

Send 15 cents in coins for this pattern to The Sewing Circle, Needlework Dept., 82 Eighth Avenue, New York, N. Y.

Please write your name, address and pattern number plainly.

TIPS to Gardeners

Care in Transplanting
TRANSPLANTING is an important activity in almost every garden, but a gardener will save time and possible disappointment if he knows what should and what should not be transplanted.

The following should not be moved: Celosia, didiscus (blue lace flower), four o'clock, humnema, and perennial sweet pea. Because of their peculiar root growth, these flowers are damaged, sometimes even killed, when transplanted.

Flowers which may be transplanted with little fear of damage, as long as the moving is done properly, include ageratum, alysum, snapdragon, aster, calendula, marigold, pansy, petunia, pinks, salvia, scabiosa, verbenas, Canterbury bells, columbine, hollyhock, pyrethrum and viola.

There is a third division of flowers, according to Harry A. Joy, breeding expert of the Ferry Seed Breeding Station, whose lives will not be endangered by transplanting, but whose growth will be stunted. Both plants and blossoms will be smaller but earlier. Larkspur, zinnia, phlox, nasturtium and bachelor button are in this group.

Selfish End
There never was a man who thought he had no law but his own will, who did not soon find that he had no end but his own profit.—Edmund Burke.

Pull the Trigger on Lazy Bowels, and Also Pepsin-ize Stomach!

When constipation brings on acid indigestion, bloating, dizzy spells, gas, coated tongue, sour taste, and bad breath, your stomach is probably loaded up with certain undigested food and your bowels don't move. So you need both Pepsin to help break up fast that rich undigested food in your stomach, and Laxative Senna to pull the trigger on those lazy bowels. So be sure your laxative also contains Pepsin. Take Dr. Caldwell's Laxative, because its Syrup Pepsin helps you gain that wonderful stomach-relief, while the Laxative Senna moves your bowels. Tests prove the power of Pepsin to dissolve those lumps of undigested protein food which may linger in your stomach, to cause belching, gastric acidity and nausea. This is how Pepsinizing your stomach helps relieve it of such distress. At the same time this medicine wakes up lazy nerves and muscles in your bowels to relieve your constipation. So see how much better you feel by taking the laxative that also puts Pepsin to work on that stomach discomfort, too. Even finicky children love to taste this pleasant family laxative. Buy Dr. Caldwell's Laxative—Senna with Syrup Pepsin at your druggist today! (Adv.)

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—the risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

WHAT to EAT and WHY

C. Houston Goudiss Gives Practical Advice on Feeding Teen Age Child; Describes Some Special Food Needs of Both Boys and Girls

By C. HOUSTON GOUDISS

BEGINNING around the twelfth year in girls and the thirteenth year in boys, the rate of growth is greatly accelerated. Then children require large quantities of food to meet the needs of their rapidly maturing bodies and they usually develop huge appetites. Unfortunately, however, they are often inclined to overlook the foods that are most necessary to health, to eat at odd hours, and to stuff themselves with rich combinations that may severely tax the digestive system.

Mothers may find it exceedingly difficult to deal with their offspring all through the teenage years, physiological changes are taking place which mark the transition from childhood to maturity. For along with the development of his fast growing body, the child's emotional life undergoes a profound and disturbing change. The boy or girl who was formerly amenable to direction suddenly exhibits a desire for independence. He becomes "lumpy" and irritable, and he wishes to direct his own life even to the choice of food.

Mothers must mobilize all the patience and forbearance at their command—must make it their solemn duty to see that their adolescent children have the foods they require for growth, for stamina, and for building resistance to disease. For the stress and strain of adolescence will be far more easily weathered by boys and girls who are properly nourished.

Quality Important as Quantity

During the years of greatest growth, boys and girls frequently require more food than their fathers or mothers. But it is essential that the diet be well balanced and of the highest nutritive value. It should include an abundance of easily digested energy foods, such as breadstuffs, potatoes, cereals and macaroni products, as well as liberal quantities of the more concentrated fuel foods, such as butter or margarine. There must be an ample supply of high quality protein—which is furnished by meat, fish, eggs, cheese and milk—to build the new muscle tissue required to cover the lengthening frames of the boys and help build the rounded contours of the girls.

Need for Minerals and Vitamins

There must be ample amounts of the various minerals—especially calcium and phosphorus for the

teeth and bones, and to help build sound healthy nervous system for proper functioning of the thyroid gland. For building increased quantities of rich red blood, every vitamin must be included in the adolescent's diet to promote normal health and development, but vitamin A is especially valuable at this time of rapid growth, and vitamin B is also required in liberal amounts to meet the extra demands of increased activity and growth.

A Quart of Milk Daily

It is highly desirable that the diet should include a quart of milk daily, because milk is such a splendid source of calcium and vitamin A, as well as other necessary minerals and vitamins. If children have been brought up with a wholesome respect for this master food, they will continue to drink it during their teens. However, if they complain about taking it as a beverage, mothers should see that it is supplied by way of cream soups and sauces, with cereals, and in nutritious puddings, desserts, which can be enriched with eggs, thus providing additional proteins, minerals and vitamins.

Fruits and Vegetables

Fruits should be eaten freely—at least twice a day—and the high-calorie dried fruits, such as prunes and dates, may be used to advantage along with bananas, oranges, grapefruit, apples and other fresh fruits, as well as the many varieties that come in cans. Cooked and raw vegetables should be provided liberally—if possible, at both lunch and dinner. Dressing cooked vegetables with butter or margarine will increase their fuel value, and make them more satisfying for hungry boys. Girls, who are often finicky eaters during their adolescent years, can usually be tempted with crisp, raw vegetables served in the form of salads; and protein can be added by means of eggs, cheese, fish or chicken.

Boys Need More Food Than Girls

There is a marked difference between the fuel requirements of teen age boys and girls. Both must have a well balanced diet. But the boys need many more

calories, and therefore should have a more generous allowance of highly concentrated foods which supply necessary fuel with a minimum tax on the digestive system.

They should have cereals in generous portions—and it's advisable to choose part of the cereals from those retaining the bran and the germ. And they'll welcome nutritious desserts, such as custards, tapioca, bread and corn-starch puddings.

Girls Warned Against Reducing

Girls, on the other hand, may become fussy and try to cut down radically on the fuel foods, with the foolish idea of keeping fashionably thin. This must not be permitted, because it may result in under-nutrition, which opens the way to fatigue and nervousness, and may lead to serious disease. In addition to wholesome, nourishing food, teen age boys and girls should have plenty of rest, sunshine and healthful outdoor exercise. And they also deserve the sympathy and deep understanding of their parents.

Questions Answered

Q. Mrs. S. B. F.—Sea foods are a rich source of iodine, fresh and canned salmon, crab, clams and oysters being especially notable in this respect. Fruits and vegetables grown near the sea also contain varying amounts, depending upon the iodine content of the water and soil.

—WNU—C. Houston Goudiss, 1939-39.

HOW TO SEW

by Ruth Wyeth Spears

YES, a certain grandmother surprised everybody—even herself. She had always enjoyed making hit and miss rag rugs in cheery colors. Then one day her favorite grandson brought home the girl he was going to marry. She was a bright young thing and chattered away about color schemes for her new home.

The living room and hall were to be peacock blue and rust with black. So Grandmother got out her eye-needle and her best wool rags, and she mixed and she dipped and then she made five ovals of the size shown here—3 black and 2 blue. She sewed these together, then around them came 4 rows of rust; 2 rows of black next; then 4 rows of rust; 1 of black; 4 blue; 2 black; then 8 rows of blue around the outside.

When the wedding day arrived this gift was a great surprise; even Grandmother was amazed at

how handsome it looked at the foot of the stairs in the new house. Women everywhere are using their leisure to make their homes more attractive, with slipcovers, chair-covers, bedspreads and lampshades. They are again taking up embroidery and handwork so that they may beautify their homes and there is a revival of interest in old-time hand crafts.

Mrs. Spears' Book 1, SEWING for the Home Decorator, and No. 2, Gifts, Novelties and Embroidery, clearly chart the way for you. If the old craft of rag rug making is your new hobby, you may have free Mrs. Spears' pattern on rag rugs with your order for both books at 25 cents each. Address, Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

SEEDS DON'T LIVE FOREVER!

Plant FERRY'S SEEDS They're Dated!

SEEDS grow old, too! Past their prime, fewer and fewer will germinate. But there's a way to be sure of getting only seeds in their prime. Each year Ferry's Seeds must pass rigid tests for vitality and germination before being packaged. Then—for your protection—each packet is dated.

Be sure your seed packets are marked "Packed for Season 1939." Select them from the convenient Ferry's display at your dealer's.

Popular favorites and new introductions—flower and vegetable varieties—ALL SELECTED FOR YOUR LOCALITY.

FERRY-MORSE SEED CO., Seed Growers, Detroit and San Francisco. Makers of Ferry's Garden Spray—economical, non-poisonous, non-staining.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—On August 2 of this year, Dr. Gustavus Adolphus Eisen will be 92 years old. It was his research that established, so far without authoritative challenge, the Chalice of Antioch as the "oldest surviving record of the faith of the Apostles." The chalice was exhibited during holy week at St. Thomas Episcopal church, New York, with the conjecture that its inner cup may have been the beginning of the legend of the Holy Grail. In a book published in 1926, Doctor Eisen established the use of the chalice in the Church at Antioch not later than the end of the first century of the Christian era.

At the age of 85, Doctor Eisen learned to decipher cuneiform inscriptions, to write a treatise on Mesopotamian cylindrical seals, or glyptics. In 1933, he published 15 volumes summarizing his research in legends of the Holy Grail, and is now at work on studies of early portraits of Christ and the apostles. His eyesight and hearing are still good and he puts in a full working day.

Doctor Eisen has published more than 150 books covering his amazing range of inquiry in a half-dozen sciences, including studies of earth-worms, fig culture, archeology, ancient grass, portraits of George Washington and geological, zoological and botanical subjects.

Born in Sweden, he was a frail child, unable to attend school, frequently in the country, with tutors who stimulated his scientific interests. In the University of Upsala, he wrote a thesis on earthworms which attracted the attention of Charles Darwin. His correspondence with Darwin put him in touch with Alexander E. Agassiz, the American naturalist, and when he obtained his doctorate in 1873 and returned to America, the two men formed a long and fruitful association. For 40 years, Doctor Eisen was on the Pacific coast, working at times with the late Luther Burbank on plant research.

Last year, the California Academy of Science honored him as the founder of the state's great fig-growing industry. Smyrna figs frequently had been taken to California, but there was no yield. Doctor Eisen studied this problem and reached the conclusion that the failure was due to lack of fertilization. Male trees were brought over and California began gathering fig crops.

The chalice, which had been found in the ancient ruins of Antioch in 1910 and placed in the Louvre, in Paris, was brought to this country in 1914, to safeguard it during the war. Doctor Eisen's conclusion was that it had been made by a great Roman artist, Apollodorus, who lived from 50 to 120 A. D.

Doctor Eisen's avid scientific studies continue on, unabated, into his tenth decade. He is a bachelor. None has ranged farther into the past, while pressing eagerly into the future in his zest for knowledge.

ON A cotton patch in the high mountains of North Carolina, a lad leaned on his hoe, and, in his imagination, followed out in the world the 11:15 train, in the valley far below. One day, he did follow the lingering plume of smoke and that is linked, in the long chain of causation, with the Sperry corporation's harbinger of one more spring. The lad with the hoe, one Thomas A. Morgan, president of the corporation, announces a net income of \$4,961,398 for 1938, against \$2,949,880 the year before.

He joined the navy when he hung up his hoe, qualified as an electrician, and, running a gyroscope, sank his career in this magic whirligig. That geared him in with the Sperry company, and, just as the great war was breaking, he chased the Czar's navy all over the far-eastern map to sell it gyroscopes. He caught up with it and rang up a sale, in one of the epics of free American enterprise.

Thereafter he planted gyroscopes on all the great fighting ships of the world and sailed a true course to the presidency of the Sperry corporation in 1928. He became one of the grand panjandrums of aviation. He says he got where he is by thinking of today, and its demands, rather than of yesterday or tomorrow. He had ten months' schooling when he trailed the train in the valley.

ASK ME ANOTHER ?

A Quiz With Answers Offering Information on Various Subjects

- ### The Questions
1. What is the speed of lightning?
 2. What two European contemporary kings are brothers?
 3. How did Wall street, New York, get its name?
 4. Are American vessels permitted to enter the Colorado river at its mouth in Mexican territory?
 5. What is the source of the quotation, "Patriotism is the last refuge of a scoundrel"?
 6. Why is a certain plant called Job's tears?
 7. What is a pourparler?

- ### The Answers
1. The speed of lightning was measured at the Empire State building in New York at 10,000 miles a second.
 2. King Christian X of Denmark and King Haakon VII of Norway are brothers.
 3. From the fact that it follows the line of the palisaded wall or stockade which was built in 1652 across the southern end of Manhattan island.
 4. Yes. En route they merely report to the captain of the port of Guaymas, Sonora.
 5. It is from Boswell's "Life of Johnson."
 6. Its name is derived from the

hard, shining tearlike seeds which resemble bluish white porcelain and are used in making bracelets, necklaces and rosaries.

7. It is an informal, preliminary conference of representatives of different groups, factions, or countries, looking to a formal agreement settling disputed questions among the parties.

Favorite Recipe of the Week

- ### Buttermilk Flakes Waffles
- 1 cup sifted flour
 - 1/2 teaspoon soda
 - 1/2 teaspoon salt
 - 1 cup Grape-Nuts Flakes
 - 2 egg yolks, well beaten
 - 1 1/2 cups buttermilk or sour milk
 - 4 tablespoons melted butter or other shortening
 - 2 egg whites, stiffly beaten
- Sift flour once, measure, add soda, and salt, and sift again. Add Flakes and mix well. Combine egg yolks, milk, and butter; add to flour mixture, beating only until smooth. Fold in egg whites. Bake in hot waffle iron. Serve with maple-flavored syrup. Makes four 4-section waffles.—Adv.

HEALTH NOTES

AUSTIN—The control of typhoid fever in the United States represents an outstanding achievement in preventive medicine. In 1900 the national death rate from this disease was 31.3 per 100,000 population. Today the rate is 2.1 nationally, but 6.5 in Texas. This marked decrease in typhoid's killing power is based on knowledge of its cause, how it is spread, and the application of scientific control measures," states Dr. Geo. W. Cox, State Health Officer. Today no other disease is more vulnerable to scientific attack than typhoid. Indeed, it is no exaggeration to say that, from a public health standpoint, there should be no typhoid fever. Typhoid fever is caused by a germ. The organisms are found only in the excreta of persons suffering from it, or in those of carriers, the latter being persons who harbor the germ but are not ill. If it were possible to prevent people from becoming infected with germs coming from these sources, typhoid would cease to be a problem. "In cities and towns, thanks to safe water and milk supplies, adequate sewage facilities, and environmental sanitation, typhoid has been almost eliminated. Unfortunately, sanitary and environmental protection on a community basis cannot be offered to those living in rural areas. While control methods are the same for both city and country, in rural districts it is essential that not only public health officials but the householder becomes personally interested in them if they are to be effective," Dr. Cox warned. "If every rural dweller in Texas realized his personal obligation in the anti-typhoid campaign and conscientiously took the necessary precautions, the typhoid rate in Texas eventually would come close to the vanishing point. It is an attainable objective. Personal cooperation in eliminating typhoid hazards and wide-spread typhoid immunizations are the key."
