CHAPTER XXIII—Continued

He took his seat beside La Gobernadora, ate, drank and replied absent-mindedly to all who spoke. It was only when he felt a light touch on his shoulder, and looking up saw Induzuela offering him a cup of wine, that he roused for a moment from his reveries. She smiled at him reproachfully and moved away, the wine jug poised on her shoulder.

After the feast, one of the Governor's old Catalan soldiers clapped his hands for attention.

"Senores y Senoras! Senoritos y Senoritas! Cabelleros y amigos! Padres! Peones y Indios! I will sing! I will sing a song of our illustrious Gobernador, el Señor Don Pedro Fages!"

"Viva! Viva!" shouted the crowd. Someone placed a vine wreath on his head as the old soldier experimented with his guitar.

"I will sing a song of El Gobernador concerning his prowess as a mighty hunter, and how he saved the Indians of San Luis Obispo from being eaten alive by bears! How he saved his people from starving by giving them the bears to eat, and how a mission was founded because of all these doughty deeds!"

Then he began to sing a long series of coplas.

Dozens of verses sang the old soldier, and at the end of each the audience howled, "Ay-ee, Don Pedro!" The Governor sat with bowed head, covered with confusion, and listened.

The singer went on, telling of the frightened Indians, rushing from their village, afraid of the giant bears that were killing them one by one. And of how Don Pedro faced the savage grizzly bear, and killed him in a fight most fair; and how the Indians feasted him a day and night, praising him for his great might.

"Ay-ee, Don Pedro!"

"Holla!"

"Viva el Gobernador!"

"Viva!" The party gathered in a circle around him, singing and shouting, toasting him in tilting wine-cups, creating more verses for the endless song.

The Governor stood by quietly until the song was finished, but when the circle broke, he slipped away alone to the tree on the hill, and threw himself down on the ground. It was sunset, and color rioted everywhere on land and sea. The voices of the singers seemed to come from a great distance. He closed his eyes.

"Ay-ee, Don Pedro!" someone said softly.

Induzuela dropped on the ground beside him.

CHAPTER XXIV

After the vendimia and the harvest the winter season settled down upon the Royal Presidio of Monterey and the Mission San Carlos at Carmelo. Winter meant rain, days and weeks and months of rain. The Rio Carmelo flooded its banks as it filled, and a hundred rills and streams sprang into being. The trees sighed and dripped dismally, and there was little life astir except the screaming seagulls that, driven from the ocean by storms, came inland to seek food, shrieking and wheeling in the gray skies.

In the Palacio of the Governor all was gloom. Angustias grieved for Chichi, and moved about like a gloomy wraith.

Since the departure of the French explorers La Gobernadora seemed frozen, all except her somber eyes that burned resentfully from her white face. Little lines appeared about her mouth, and drew the corners of her lips down in a perpetual expression of unhappiness that wrung Don Pedro's heart. She spent hours, days, lying upon her bed, staring at nothing, doing nothing; or huddled before the sputtering fire, looking at the flames with a blank far-away expression that frightened the Governor with its hopelessness, its despair.

She no longer spent hours over her hair, or the little cares of her toilet, but wore the same gown, day in and day out, and even adopted the habit of wrapping her head in a scarf. She shivered constantly in the damp adobe house. Sometimes she would look out on the parade-grounds, churned to a muddy lake by the feet of horses and men, and catch sight of the wife of a soldier, a baby hugged close to her in a shawl, running from one house to another.

She almost envied these little soldiers' women, with their endless chatter about nothing, their contentment with empty lives. Sometimes she thought wildly of running out into the rain herself. But if she did, where would she go? So she only shivered and drew her manton closer about her.

Pedro Fages was profoundly distressed. Living in the small palace with the unhappy woman Eulalia, loving her, sorrowing over her and unable to express one word of what he felt, for he had never seen the dreadful night when struck her and dragged her

back from running away, depressed his days and saddened his nights.

His only comfort was in reading over and over again the few books he possessed: "Las Sergas de Esplandian," "Sancho Panza" and the plays of Shakespeare. Long hours he would read, then impatiently order his horse and ride for hours through mud and rain, nowhere.

There was only one light, one spot of warmth in his darkness, and that was not the clear warmth of the sun, or the pure cold ray of a star, a light like a little fire shows from the depths of some murky cave. And that was Induzuela. Time and again he put the thought of the girl out of his mind, only to have her walk into his brain and heart, and through some witchcraft, take possession of him.

And so the winter pressed down on Monterey.

But from the south, from Santa Barbara, came letters from Fray Fermin Lasuen, bubbling with a youthful enthusiasm, that rose perennially in his old heart.

It was summer in the south of California, he wrote. The sun shone all day, and the stars at night. There had been some showers, and the brown hills had turned green quickly. The streams were full, and it was already like spring.

And on the feast day of Santa Barbara, December fourth, the Mission Santa Barbara was to be founded. All was ready. The people at the presidio, as well as the priests who were to found the mission, were

"She Is Sick—the Baby." Murned Eulalia.

waiting impatiently that day, and the arrival of his Excellency with La Senora la Gobernadora.

The feast day arrived. Santa Barbara, the Patroness, sent fair weather. The waters in the channel danced in a fresh breeze, and the blue hills and mountains, faintly tinged with green, rose behind the mission site like a beautiful curtain.

Fray Fermin Lasuen and Sergeant Ortega from the presidio had been anxiously awaiting the Governor. Ortega had sent messengers and an escort far north to meet him, but they had returned without the Governor, and without news of him. Fray Fermin was worried. A great responsibility was in his hands. This was the first mission of his own founding, carried out through the wishes of his beloved brother, Junipero Serra. For over two years the Governor had been planning this day, looking forward to it with great anticipation and anxiety, and now, with everything in readiness, the day already at its zenith, there was no Governor. And the mission could not be officially founded without his presence.

Fray Fermin scanned the distance as far north as his gaze could reach, then, with a patient sigh, sat down on the ground where he could see the little ramada beneath which the altar was erected, and where two bells hung, in readiness to ring out to all the world, the good news of the founding of the Mission Santa Barbara. A recumbent cross was on the ground near by, waiting to be erected on the spot where some day the mission church should arise.

The missionary looked lovingly at the scene. And as he looked, a vision came before his eyes. Instead of the humble ramada and rough cross, a lovely temple rose to comfort him. Glowing pinkly, its square towers and red tiled roofs rose majestically against the mountains. A great establishment stretched itself across the landscape: dormitories, gardens, workshops and wineries. The little group of dirty Canalean Indians who stood about with dumb curiosity became miraculously thousands of clean happy neophytes, who worked, and sang as they worked. The handful of soldiers, who lolled on their horses and eyed the Indian women, became a dashing compa-

ny of devout worshipers, pressing into the church, filling it full of reverence and adoration.

Fray Fermin gazed at his dream, and spoke.

"Ah, Padre Junipero!" he exclaimed gladly, "it has all been worth it, has it not! Sing, O heavens; and be joyful, O earth; and break forth into singing, O mountains; for the Lord hath comforted his people."

"Padre mio . . ."

So steeped was Lasuen in his dream; so real was the vision, that at the sound of the voice he started, really expecting to see the brown figure of his brother Junipero beside him. But it was Sergeant Ortega, who stood, a worried frown on his brow, his hat in his hand.

"Padre mio, it grows late. There is absolutely no sign of his Excellency. Soon the day of Our Holy Patroness will be past. What shall we better do?"

Painfully Lasuen made his decision. "We must go ahead with our ceremony," he said sadly. "And when his Excellency comes, we will have a rededication. There must be some good reason that he is not here." He rose painfully from the ground, sighing, "It is a disappointment, but it is in God's hands."

And so, on December 4, 1786, was founded the Mission Santa Barbara. The standard of Spain waved above the humble altar, and the sacred flags of the Church, Mary's blue banner, and the bloody banner of Christ, the bells rang, prayers were said, incense rose in pale blue clouds. Then it was over. The Indians returned to their villages, the soldiers returned to the presidio. Fray Lasuen was left with three brothers and a few soldiers to guard the shrine dedicated to the Holy Patroness of artillerymen.

Several days before Don Pedro planned to leave for the south for the dedication of the Mission Santa Barbara, he was riding the highlands back of Monterey and pondering how best to approach La Gobernadora on the matter of accompanying him. As he drove toward the presidio, the clouds lifted for a moment from the sea, and, it being sunset time, a rich glow spread over the gray ocean, turning it for a few minutes into molten gold and rosy silver. The Governor paused and admired the scene for a moment.

"A good omen!" he said with a deep breath. "All will turn out well, God willing!" As he cantered into the presidio grounds the guards at the gate smiled at him respectfully, noting the cheerful expression on his face that had for so long been unnaturally gloomy. And as he approached the palace his heart lighted again as he made out gleams of fire and candle-light stealing through the chinks of the closed shutters.

"Holla!" he cried heartily as he stamped into the sala. "And how are all in my household this evening? Did you notice the little bit of sunshine at sunset time?"

A gloomy silence met him. Huddled near the fire sat Eulalia, with the baby girl on her lap. And leaning over the fire, looking like an old witch or Indian sorceress, Angustias stewed some evil-smelling mixture in a pannikin. At Eulalia's feet the Indian nurse crouched and looked fearfully at her charge.

"What is the matter?" asked the Governor, all his cheeriness fading in the gloomy atmosphere.

"She is sick—the baby," murmured Eulalia.

"Ah!" Don Pedro retired anxiously to a corner and watched helplessly while the women doctored the tiny girl, rubbing her little chest with unguents, dosing her with the evil-smelling mixture that Angusti-

as had brewed. The child fretted and cried, but at last became quiet. Her nurse carried her from the room, and Angustias followed.

Don Pedro strode toward Eulalia, and picked her up in his arms, cuddled her on his knee as though she were a child. She did not respond, did not struggle against him. But she was slack in his embrace, inert, unresponsive.

"Is the . . . my little flower very ill?" he asked.

"She has a bad cold. This damp house . . ." She looked about her.

"Oh, a little cold . . . she has had them before. Let us not worry about her. Let us be happy, Eulalia! Let us be happy again!"

He turned her face toward him, and lifted her chin on his finger. There was not a single answering gleam in the black eyes. But he persisted.

"Pack your traveling cantina with jewels, pack a chest with your finest clothes, and let us go south, to the Presidio of Santa Barbara for the founding of the mission. It will be a great affair! There will be feasting at the presidio, a baile, and the Queen of California should be there. And what is more, we will find summer there, Fray Fermin writes me, for the sun shines on the southland and it is already spring! Come with me, Eulalia!"

With scarcely any change in her expression the lady shook her head.

"Ah, come, querida!" He held her closely, and whispered, "Let us make a little moon of honey of the expedition . . . a luna de miel! Yes!"

Eulalia pulled away from him, her face settling in stern lines.

"You should not ask me to go away from my sick child. And I do not think that you should go and leave her either."

Don Pedro loosened his arms. "That is nonsense, of course. She is not that ill, and besides she is in very good hands with Angustias. Nevertheless, I shall have to go anyway, for without me the founding of the mission is not legal." He stood, and she slipped off from his lap on to the floor gazing into the fire. The Governor began pacing the length of the sala.

"Yes, I should go no matter whether it were necessary or not. The Mission Santa Barbara! At last, oh, at long last! It will be a happy day for me, and a happy and significant day for California when that mission is founded. When I think of all the talks and quarrels I had with my poor Padre Junipero about it, I am overjoyed to think that finally the mission is to be founded. Yes, I shall be there."

Eulalia glanced obliquely at him from where she sat. He was tugging his beard and did not see her.

"Junipero Serra!" she thought bitterly. "Can he never be entirely at rest? Is his spirit to follow me always; haunt and punish me?" She shivered.

Pedro Fages delayed preparing for his trip until the last possible day, and with a deep disappointment in his heart, resolved to say nothing more to Eulalia. But he was frightened about her, as she sat hour after hour, saying nothing, doing nothing, but watching the fire and listening to the rain that lashed the little house unmercifully. The baby was no better but certainly no worse, yet he saw it was hopeless to persuade his lady to go with him.

On the morning when he had planned his departure he stood before her, stern, unhappy.

"I must tell you adios, Senora," he said formally. "I will return as quickly as possible."

She said nothing, only turned and looked at him.

"Ah, come, Eulalia!" he exclaimed suddenly, his reserve breaking. "Come with me . . ."

(TO BE CONTINUED)

Captain Kidd Again Thrills English Spirit; New Effort to Find Treasure

Captain Kidd again is thrilling the adventurous spirits of England, as plans go forward for a new effort to recover his treasure.

A map has been found in a London book shop which seems to bear a striking resemblance to Oak Island, six miles from Chester, Nova Scotia, where Captain Kidd is supposed to have buried his spoils. Details of the map are, of course, a deep secret, but money is being raised and plans made to attempt to recover the treasure next summer, reports a London correspondent in the Chicago Tribune.

In all 38 shafts have been sunk in and around that part of the island where there are indications of something having been hidden. Being only 1 1/2 miles from tip to tip, the place is fairly well pock marked.

The early searchers took their tip from an oak block which hung from an oak tree over a depression of about 12 feet in the ground. A platform of oak logs was found and a man-made wall beside it.

The next lot of searchers found the same kind of an oak platform every ten feet and at the ninth an

undecipherable inscription on a flagstone. Metal bars, parchment, coins and ax heads have been found, but all the shafts fill with water at the depth of 100 feet and the new party is planning to offset that difficulty with pumping arrangements.

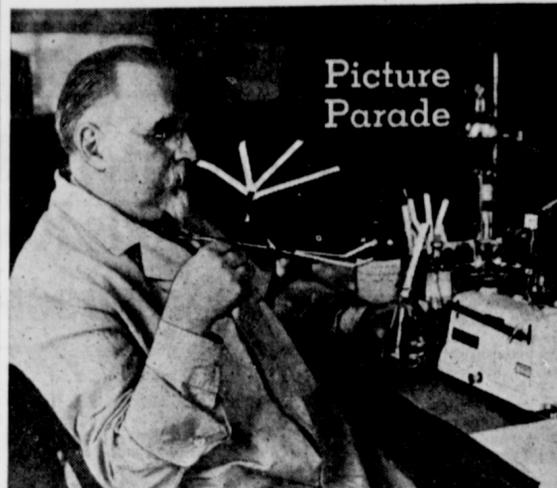

Five well-defined drains have been discovered, built of flat stones and all converging at one point.

From Gardiner's island off the east end of Long Island about \$70,000 was recovered from Captain Kidd's treasure buried there. Kidd was hanged at Execution dock in London in 1701, but he left a wife and child in New York.

The Feet Always Busy

The feet do more work relative to their size than any other part of the body. It is hard to visualize the fact that when a man walks a mile he places an aggregate of 250 tons on his feet. Three out of every four adults in this country have some sort of foot trouble. The blame for this condition is largely due to incorrect footwear, but the jar incident to walking on hard pavements and floors is a contributing cause.

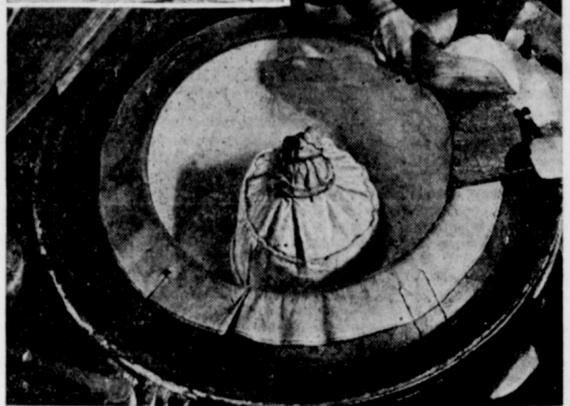

Perfume by Chemistry

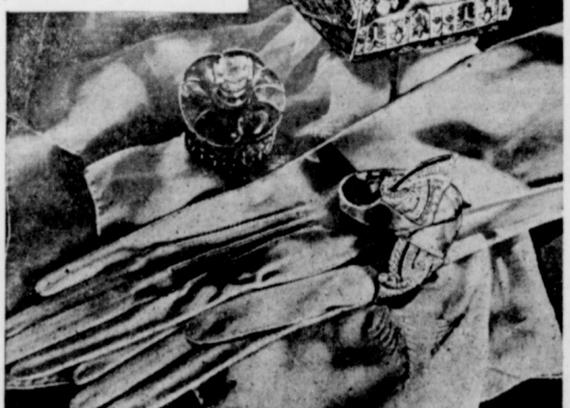

Picture Parade

Modern chemists like Theodore Hoffman (above) have improved on the ancient art of perfume making, an art old as the pyramids, by using synthetic materials to produce odors which man cannot extract from flowers. For example, it takes almost a ton of roses to make one ounce of rose oil. But the odor is now produced in laboratories. And the ultra-sweet musk, once obtained only from the Tibetan musk deer at \$560 a pound, is today available for any perfume. Compounding new bouquets is part of Theodore Hoffman's job. Paper tapers are dipped in basic per-

fumes. When twirled through the air before the nostrils, the blended tapers indicate how this particular bouquet will smell after it has been compounded. These preliminary laboratory tests must precede actual manufacture of the perfume. Not the least incongruous part of this business is that delicately scented perfumes are made by burly workmen in overalls!

Upper photo shows coumarin crystals being broken up to be used in a bouquet which imparts the "new-mown hay" odor. Coumarin appears naturally in certain plants, is segregated and crystallized. Photo immediately above shows borneol crystals being swirled out of a liquid in a centrifugal still. Borneol is the main ingredient of incense in India. Oddly, perfumes are a mixture of pleasant and unpleasant odors.

Perfume, adroitly used, plays an important part in every modern woman's life. Once a luxury available only to the wealthy, it now brings charm to rich and poor alike. But most foolish is the woman who uses it too freely; perfume is meant to be subtle.

Chemicals today; tomorrow, perfume on a thousand boudoir tables.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—It is perhaps just as well that Crosby Gaige is a bachelor. He drags home 200,000 patent models, including a corpse preserver, hog-catcher, burglar alarm, an early Hoe printing press, a dentist's chair, a machine gun, an egg-beater, an engine, a steamboat, a pretzel-bending machine—and so on—and on.

The patent office models had been gathered by the late Sir Henry Wellcome and kept at his estate in 3,251 packing cases. Mr. Gaige bought them.

A friend of this writer, remembering with remorse he hadn't bought a birthday present for his wife, stepped into an auction room. He became confused and bought ten barrels of tin cookie cutters. It almost broke up his home. Mr. Gaige will have no such trouble.

Mr. Gaige was born the son of the postmaster at Skunk Hollow, N. Y., and became a Broadway theatrical producer, with a 300-acre estate at Peekskill on the Hudson, where he indulges his taste for knickknacks such as the above, but with more discrimination than this ensemble suggests.

He is a gourmet, with 300 cook books in his kitchen, has a de luxe machine shop where he makes art objects, is a master of viticulture and a maker and connoisseur of beautiful wines.

He has cattle folds and breeds blooded cattle, a printing plant where he prints typographical knock-outs in limited editions, a huge library with 5,000 reference books, and is distinguished both as a bibliophile and a cook—one of the best cooks in the world, his friends say.

All these concerns are merely extra-curricular. In his 29 years on Broadway, he has hit off his full share of successes, built three theaters and kept steadily out of the red. In Columbia university, he wrote the 1903 varsity show, "Illusia."

He got a job with the late Elisabeth Marbury, famous play broker, reading plays at ten cents an act. He saved his money and headed into the show business with a fast running start.

His life is the fulfillment of every commuter's dream. He is of clerical, almost monkish mien, of somewhat austere countenance, with octagonal pince-nez and, like all epicures, abstemious in all things—saving such things as patent models.

He wears red, white and blue suspenders and is very fussy about his handkerchief pocket. He always has the tailor sew a button on it.

AN ATTACK of laryngitis gave Margaret Sullivan her big start. Lee Shubert saw her in "Three Artists and a Lady" at Princeton, and rushed back-stage with a contract.

Sore Throat Gave Start to Screen Ace "You have a voice just like Ethel Barrymore," he said.

She explained that it was merely laryngitis, but the excited Mr. Shubert wouldn't listen. There was nothing to be done about it, so the helpless girl was signed for five years.

That was a bit of luck which, in Miss Sullivan's career, offsets embarrassing entanglements in some of the most elaborate flops in current stage history. Today, she is at the peak of her career as critics turn cartwheels and back flips over the new film, "Three Comrades," and Miss Sullivan's performance therein.

Her story has none of the up-from-poverty success routine. She is the daughter of a prideful family of Norfolk, Va., a descendant of Robert E. Lee. Her journey to Boston to study dancing was indulged as a passing whim, but there was considerable family eye-rolling when she switched to the theater and began adventuring in summer stock, on Cape Cod and way points.

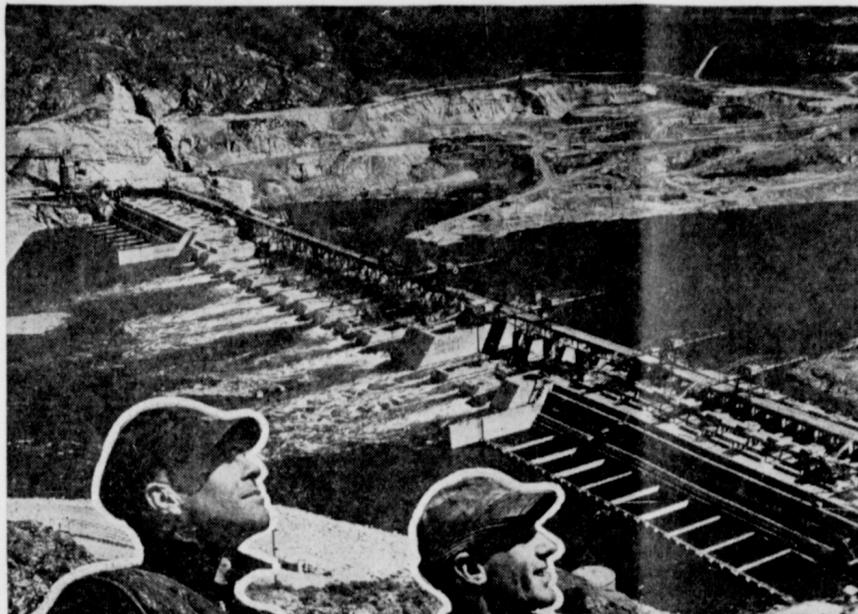

Her father got her home once, but only for a short time. It is to be hoped that her story won't be widely circulated around Hollywood. It would start all the extra girls sleeping in a draft.

The Average Month

We are apt to think of our present months as having four weeks apiece, but that is not true. The average month contains just about four and one-third weeks. The only month with four weeks in it is February, and in leap year even February has one day over four weeks.

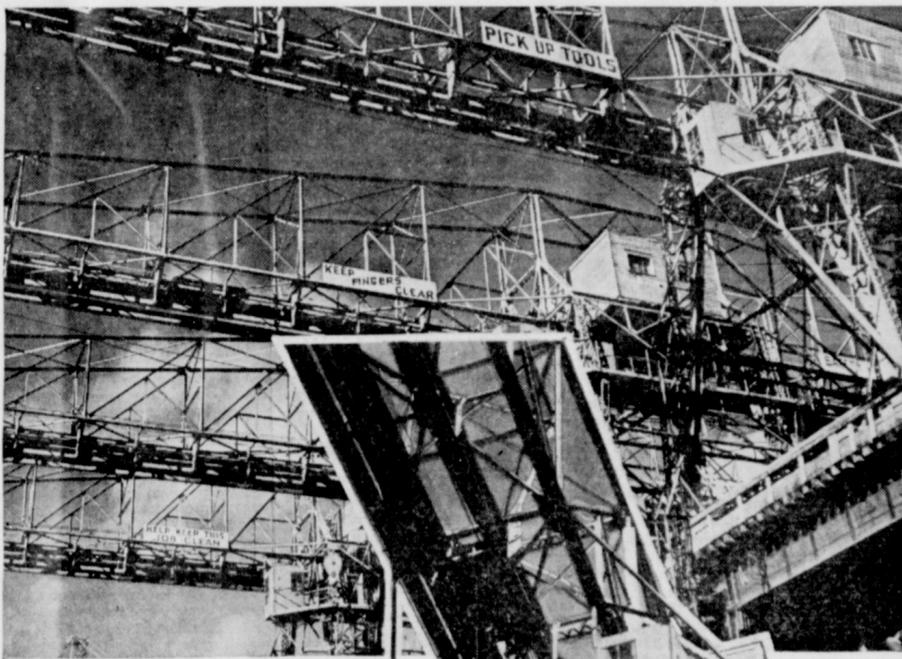

BROTHER BEAVER TAKES A LESSON

Mr. Beaver, the original dam builder, gazes disconsolately at "the biggest thing on earth," Grand Coulee dam rising in the Columbia river 92 miles west of Spokane. Grand Coulee will create a reservoir 151 miles long holding 10,000,000 acre-feet of water to irrigate 1,200,000 acres of fertile land. It will generate 8,300,000,000 kilowatt hours of firm power annually, plus 4,200,000,000 secondary hours. Although man's steel reinforcements (right) surpass Brother Beaver's wooden ones, the furry little dam builder is better fitted for his job than man, who must wear a life preserver on the job (left).

FOTO-
FEATURE

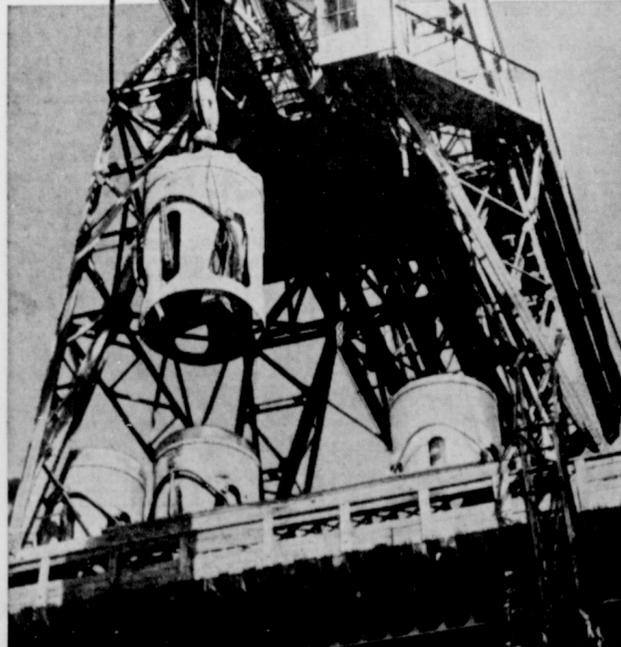

Work has just started on a new contract to place 6,000,000 cubic yards of concrete in the dam and west powerhouse, increasing the height to 553 feet. Successors to the beaver are the form raisers (above) who shift forms

for the yet unlaidd blocks of concrete. Hammerhead cranes are used for concrete placement from trestles at the dam. Inset is one of the 8-cubic-yard buckets which handle this part of the job.

The thousands of men who completed Grand Coulee's foundation last December are now back at work as the job of completing the dam begins. Shown above are the two towns where they live. In the foreground is Coulee Dam, which houses the government's forces, and across the Columbia river is Mason City, the contractor's camp.

**POLITICAL
ANNOUNCEMENTS**

The Friona Star is authorized to
announce the following list of persons
as candidates for the offices
shown above their respective names,
subject to the decision of the Demo-
cratic Primary Election, to be held
on Saturday, July 23, 1938.

FOR SHERIFF

A. D. HINSON.
EARL BOOTH (Re-election)
CHAS. LUNSFORD.

FOR COUNTY JUDGE

Walter Lander (Re-election).
LEE THOMPSON
D. K. ROBERTS.

**FOR COUNTY AND DISTRICT
CLERK**

E. V. RUSHING (Re-election).
A. M. EZELL
LEO McLELLAN.

For County Treasurer:

ROY B. EZELL (Re-election).
E. G. (BLACKIE) WILLIAMS.

For County Attorney

A. D. SMITH.

**For County Commissioner,
Precinct No. 1:**

J. M. W. ALEXANDER
(Re-election).
L. F. LILLARD.
A. B. (BEE) SHORT.
W. E. (TOM) FROST.
L. (JIM) SHAPPER.

For District Attorney:

JAMES W. WITHERSPOON

JODOK

"ballyhoo" I do not know what that
is, and neither does Mr. Webster, so
I suppose it is some new kind of
chemical that has but recently been
discovered.

And maybe he does not run a 3-
ring circus, but he seems to me to
have a multitudinous supply of
'make-ups' that he is using in his
little 'side-show.' But he says he is
going to take good care of our old
people, and I praise him for that, for
who needs it more than they (I am
a little old myself), and the blind,
and the crippled, and indigent chil-
dren.

And Mr. McCray advocated less
tax burdens, as the present burden
is likely to depress heart action, and
thus retard circulation. Evidently
then we are suffering, according to
his diagnosis, from an aggravated
attack of heart depression.

As for Mr. Thomas Self, his great-
est anxiety seems to be the "run-
around" on the little finger—which
may be removed by simply raising
the truck load limit to 16,000 pounds
—and a dull aching pain in the palm
of the hand, which may be removed
by abolishing all elective state of-
fice except that of governor.

WE ARE PLEASED TO SERVE YOU

It is just too bad, but I have for-
gotten the names of the other seven
gubernatorial candidates, neither
can I recall any part of their varied
platform litanies which they prescribe
for the illness of our body public; but
it will evidently take all the thirteen
prescriptions to cure us, so why not

But personally—it occurs to me
that if each of these would-be phys-
icians will include fifty per cent
more invigorants and fifty per cent
less narcotics in his prescription, he
will get us on the road to recovery
much sooner than by anything any
of them have yet prescribed. Such
as: fifty per cent fewer people on the
public pay roll and fifty per cent
more good honest work by those that
remain on. Fifty per cent more com-
mon sense and justice and fifty per
cent less legislation.

Lee Thompson was in Friona,
Tuesday, and I had quite a little chat
with him, and among other things he
told me that he reads my column of
peculiar ideas and expressions and
that he likes them because there is
always something to make him think.
Lee also told me of some of his own
personal views and ideas, and I was
surprised that they coincide so close-
ly with my own personal views. He
said that if he had a million dollars,
he could get no greater pleasure from
them than in using them to do some
good for some less fortunate fellow
being. Lee is a "bully" fellow and I
like him, and I am glad he likes my
column, so

"I have learned one thing
And it cheers a man
In always doing
The best he can."

But there is just one more thing
that I wanted to say about our can-
didates for governor, and that is,
that if half the defamatory things
that each of them has to say, or in-
famous, about all of the others, is
true, I doubt very much if either of
them is fit to be governor of the
great State of Texas.

I have often wondered why people
who are after the same thing, think
they can further their own prospects
by pouring out destructive criticism,
and vituperations upon their oppo-
nents. It never occurred to me that
such a course of action ever got any-
body anywhere or anything worth
being or having.

There's so much good in the worst
of us,
And so much bad in the best of us
That it hardly behooves any of us
To speak any ill of the rest of us.

And that reminds me that I have
never yet heard any one of our coun-
ty or precinct candidates utter one
defamatory word against his oppo-
nents. Hurrah for Farmer County
and its list of candidates!

**IMPROVING SCHOOL ATHLETIC
FIELD**

Considerable work has been done
during the past two or three weeks
on the high school athletic field, get-
ting in A-1 shape for next season.

The ground had become so hard
and thickly set with the Bermuda
grass, that it failed to take sufficient
moisture to keep the grass in good
growing condition, and Prof. Edel-
mon chiseled the land both north
and south, and east and west, and
finished with a good dragging, which
allows it to absorb the moisture in-
stead of running it off, and the grass
is taking on a new growth and now
promises an athletic field in the

**HARVEST TO BE IN FULL SWING
BY NEXT WEEK**

According to reports brought in
by farmers and others who will be
engaged in the work of the wheat
harvest, the harvest locally will be
in full swing by the middle of next week
or, perhaps, a few days earlier.
It is stated that the warm weather
and bright sunshine have been ideal
for the ripening of the crop and that
the wheat is ripening in good condi-
tion.

The Y. W. A. met Tuesday at
the home of Mrs. Magness. We
sang a song and were lead in
prayer.

Mattie Faye read the eighth
Psalm for our devotion lesson.
Then we worked on various in-
vitations to increase our mem-
bership.

We have changed our meet-
ing time from 2:30 to 4 O'clock.

**FIRST LOAD OF NEW WHEAT
TUESDAY**

The first load of the 1938 wheat
crop of this locality arrived at the
Santa Fe Grain Company elevator
early Tuesday morning.

The wheat was delivered by E. L.
Fairchild, of the Hub or Hotel com-
munity, and was of good quality and
test.

G. Cranfill, manager of the eleva-
tor, allowed the market price of 63
cents per bushel and an additional
bonus of 12 cents, making the total
price for the load 75 cents per bush-
el.

**BOILER INSPECTOR HERE WED-
NESDAY**

The State Inspector of steam boil-
ers was here Wednesday making his
annual inspection of all steam boil-
ers in use in Friona, this being a
provision of the State Law.

As a result of this inspection, both
the Helpy-Selfy Laundry and the
Clements Tailor shop were laid off
from business during that day, as
inspection cannot be made except
when the boilers are cold.

SAID IT WAS WET THERE

Frank Truitt, who has been down
near Quanah to work in the wheat
harvest, hauling the threshed grain
to the market, returned the latter
part of last week.

Frank stated that while he was
there it rained most of the time. Not
just showers, but mostly heavy down
pours, and that the over amount of
rain was damaging the crops.

Hon. A. D. Smith, County Attor-
ney, was here Sunday shaking hands
with many of his Friona friends.
While here he attended worship ser-
vices and the church dinner at the
Congregational church.

**COUNTRY
CORRESPONDENCE**

LAZBUDDY NEWS

Mrs. Ophel Jennings, who has been
ill, was surprised last Thursday af-
ternoon by friends, with a lovely
"hanky" shower.

Mrs. Walter (Shortie) Steinbock
had an appendectomy at Lubbock
sanitarium, Friday night. She is re-
cuperating nicely.

Ernest Nowell is building a new
home one half mile south of the J.
E. Vaughn home.

Mr. and Mrs. O. N. Jennings have
been entertaining their cousin, Mr.
Silas Davis, of Chicago.

Raymond Treider and family have
moved to the farm which was for-
merly occupied by the Claude Welch
family. Raymond is now working for
Bill Shirley.

Farmers are now busy getting
their old combines ready for the fast
maturing wheat. Wheat is expected
to yield from three to thirty bushels
on unirrigated land. Some farmers
began combining this week.

The V. A. Nowells are the proud
owners of a new Coolerator.

Mr. and Mrs. Johnnie Steinbock
visited Mr. and Mrs. D. W. Winn, Jr.,
in Plainview, Wednesday.

Mr. and Mrs. Willie Steinbock, Mr.
and Mrs. Alec Steinbock and Mrs.
Alma Steinbock visited Mrs. Shortie
Steinbock at the Lubbock sanitarium
Sunday. Mr. and Mrs. Oren George
and Mr. Macon Propps, the patient's
sister and father, and Mr. and Mrs.
Haskins, former teachers here, were
also visitors.

Mr. and Mrs. Carl Steinbock and
Clifford Pyritz returned Thursday
night from Temple, where they ob-
tained a truck load of chairs for the
Muleshoe theatre.

Mrs. Finis Jennings returned home
last week with her new baby daugh-
ter, Mina Margaret.

MIDWAY NEWS

Father Stanley of Hereford, was a
dinner guest in the J. J. Jesko home
Sunday. Mr. and Mrs. Alex Jesko,
Mr. and Mrs. Ed Jesko, Mr. and Mrs.
Matt Jesko, Mr. and Mrs. Harry Jes-
ko, Mr. and Mrs. Walter Fangman
and their families and Grandmother
Jesko gathered there on Sunday af-
ternoon.

Miss Minnie Mae Coffman visited
her sister, Mrs. Odie Hines, of Black
last week.

Mr. and Mrs. Paul Syms and chil-
dren visited Mr. and Mrs. Juel Trei-
der of Lazbuddy, Sunday.

P. G. York went to Oklahoma on
business, last week.

Mrs. Willard Bewley held a mat-
tress-making Tuesday. Attending
were: Mrs. John Crim, Mrs. Roy Karr
and Mrs. Paul Syms.

Congratulations to Mr. and Mrs.
John Lorraine, on the birth of a son,
June 13th.

Mr. and Mrs. R. C. Wiley were at
home over the weekend. They return-
ed to Lubbock, Monday.

Congratulations to Mr. and Mrs. J.
T. Rubanks on the birth of a son,
Donald Eldred, June 3rd.

Mr. and Mrs. Willard Bewley, Mr.
and Mrs. John Crim, Mr. and Mrs.
Roy Karr and Mr. and Mrs. Paul
Syms were shopping in Clovis last
Friday.

Mr. and Mrs. W. S. Menefee and
daughter, Ruth, went to the Harley
Sadler show in Muleshoe, Monday
night.

Midway farmers are waiting anx-
iously for the fields to dry to begin
planting again. More than two in-
ches of rain and some hail fell here
last week, and most of the crops will
have to be replanted.

LAZBUDDY STUDY CLUB

The Lazbuddy Study Club held its
regular meeting in the home of Mrs.
R. L. Bledsoe, Thursday, June 16th,
with twenty-one members and six vi-
sitors attending. A stork shower was
given Mrs. Elvin Julian.

After the business hour, the pro-
gram "Time Out" was rendered, with
Mrs. Walter Steinbock as director.
"So You're Going Camping!" Mrs.
C. E. Briscoe.

"Vacation Land," Mrs. John Gam-
mon.

"My Last Vacation," described by
several ladies.

Song, "Texas, Our Texas," by the
club.

Songs, "This is My Task," and
"Have You Ever Been to Texas?"

were sung by our charming hostess.
During the social hour a delicious
plate luncheon, consisting of punch,
peach salad, toasts and cookies, was
served by the Misses Betty and Mary
Frances Bledsoe.

prime condition for the opening of
school.
Other improvements that have
been made is the digging of trenches
for the installation of 2-inch water
mains with jets at regular intervals
to permit thorough irrigation from
the sides.

Mrs. J. A. Hodges and daughters,
Edith Helen and Nancy Marie, of
Lubbock, were the guests of Mr. and
Mrs. Ray Landrum Friday and Sat-
urday of last week. Mrs. Hodges
then drove to Clovis and out to the
home of Mrs. C. W. Dixon, who is her
sister, where she remained until Sun-
day.

More Charley Dee from page 4
tegrate. Our country is facing a great
social upheaval. This male and fe-
male drinking at the same bar pre-
sents a problem that never existed
before in this country. Fifty years
ago respectable women never drank
in public. It just wasn't done. Now
women must keep up with the men.
"This intermingling of the sexes in
the saloons, dance halls, and even in
cocktail parties in the home is bring-
ing about strange changes in society.
It is breaking down barriers that
heretofore have stood the test of so-
cial intermingling. Some women
drink to overcome their sex inhibi-
tions. Without some stimulation they
are too modest and reserved to be
good sports and go with the rest
of the party. Under the influence
they find it easy to 'let go' and not
so embarrassingly. Their gentlemen
friends, of course, encourage them.
"Yes, the social drinking of today
under state and federal protection
and direction presents an ignoble ex-
periment.
"Another problem that confronts
the nation is the giving of cocktail
parties in homes where there are
children. Whatever dad and mother
do is all right regardless of what the
Sunday school teacher or the physio-
logy teacher in the week-day school
may say. So long as they are reared
under such environment and influen-
ces what can be expected of homes
they themselves later establish? As
is the home, so goes the nation."
Meet your friends at the cemetery
Monday morning to assist them in
giving it a good cleaning.

REEVE CHEVROLET

Friona, Texas

F. W. REEVE Proprietor

Cut your plowing costs in half with the original M-M big disc Wheatland plow—because of its wide cut and light draft in comparison with any moldboard plow. The Moline does a better job of plowing, from 3 to 9 inches deep. It scours well and is remarkably free from clogging with its big 26-inch discs, spaced 10 inches apart. The plowing job compares favorably with a moldboard plowed field that has been nicely harrowed.

Prepares an ideal seed bed for small grain—BECAUSE it mixes trash and stubble with the soil in such a way that there are no air pockets, and there is good capillary action between subsoil and seed bed.

The Moline Wheatland disc plow is strong, sturdy and rigid, built entirely of strong steel bar angles and castings. Farmers say it "can't wear out or give." Other important points also make it the outstanding plow of its kind on the market today.

Come in and get free literature and complete facts. Let us show you how it cuts your plowing bill. The Moline Wheatland is also ideal for summer fallowing . . . gets the weeds and moves all the ground.

4, 6, 8 and 10 foot sizes

PLOWING AND SEEDING IN ONE OPERATION

Equipped with a Monitor seeding attachment shown above. Your Moline Wheatland plow does the plowing, seeding and harrowing in one trip over the field. . . . A big saving where grain prices are low. This once-over outfit prepares a good seed bed, does an excellent job of drilling or broadcasting, and all in a shorter time and at less expense. Stop in and get all the facts.

FRIONA TEXAS.

"SNOW WHITE" STATISTICS

Walt Disney's "Snow White and the Seven Dwarfs," which runs well over an hour, is composed of over 250,000 drawings, with a musical background provided by an orchestra of 80 musicians.

As many as 750 artists worked on the production, which has been in the making since 1934. These consisted of 32 animators, 102 assistants, 167 in-betweeners (at filling in bits of action), 20 lay-out artists, 25 artists doing water color backgrounds,

65 effects animators (those who drew smoke, water, clouds, etc.) and 158 young women adept at inking and painting the Disney figures on transparent celluloid sheets.

Counting all of the preliminary sketches, and figuring that each was redrawn three or four times, it has been estimated that at least 10 million drawings were turned out during the making of "Snow White." It is estimated that the production has entailed a cost of \$1,500,000.

W. E. Frost and S. Michell are two of the busiest men in town just now. Mr. Frost with his force of blacksmiths is busy repairing combine and row crop implements, while Mr. Michell is busy almost day and night repairing combine canvases.

Mr. and Mrs. R. H. Belew are the proud owners of a new Chevrolet.

Beatrice Buchanan left Wednesday to spend a week with relatives at Plainview.

FRIONA WHEAT GROWERS IMPROVE PREMISES

The directors of the Friona Wheat Growers, Inc., and the manager, Mr. Guy Bennett, have been quite busy during the past two weeks, making some valuable improvements around the two elevators and the large warehouse.

Dirt has been hauled and banked around all the buildings, thus making it easier to approach the elevators with loaded trucks and at the same time guarding against the pits being filled with water in the event of another overflow of Frio Draw.

The machinery has also been thoroughly overhauled and placed in spick and span condition, with new parts where needed and all old parts placed in perfect running order, so that all will be in complete readiness for taking care of the grain during harvest rush.

SANTA FE GRAIN HAS NEW SCALES

The Santa Fe Grain Company has recently installed a new scale, for its use during the coming harvest season, and ever after, for that matter.

This is one of the newest achievements in the production of weighing equipment for heavy weights or loads, and is so sensitive that one can scarcely hold it steady enough to prevent a motion of the dial containing the weight numbers.

It however, requires a quick eye and a good memory on the part of the operator, as the weight of a load can be ascertained while it is passing the platform if the eye of the operator is quick enough, but it must be done instantly as the dial returns to zero the instant the weight rolls off the platform.

There is no shifting of weights or counter poise required as the electrically operated dial shows the correct weight at a glance. This new scale with the other equipment owned by the company for correctly testing and grading the grain makes the Santa Fe Grain one of the best equipped and most up-to-date elevators in the country.

BUSY AND DOING BUSINESS

Among the other busy people in town should be mentioned Carl C. Maurer and George Treider, of the Maurer Machinery Company.

These boys have surely been stepping about and have during the past two weeks sold eight combines, three new and one used tractor, and five 10-foot plows. Going some.

HAS INSTALLED DISPLAY REFRIGERATOR

F. L. Spring, one of our leading grocers, has improved his store equipment this week by the installation of a large and up-to-date display refrigerator.

Ella Marie Landrum spent Wednesday shopping in Amarillo.

Lee Thompson, of Farwell, was Friona visitor, Wednesday.

Mr. O. D. McLellan installed an up-to-date kitchen sink for Roy Sigel, who lives west of town.

Clyde Gillispie, of Amarillo, was a business visitor in Friona, Wednesday.

LUMBER

O. F. LANGE, Manager.

LOCAL PASTOR TO WED

Rev. C. Carl Dollar, pastor of the local Congregational church, departed on the early train Tuesday morning for his boyhood home in North-eastern Alabama, to be gone for a period of two weeks.

It is commonly understood that during this two weeks he will be wedded to Miss Florence Partridge, of his home community, and that he will bring his bride to Friona with him on his return here, to again take up the work of his pastorate.

During his four months stay at Friona, Rev. Dollar has made many friends among our people, who will look forward with interest to his return.

MR. WALKER, T. S. E. S. MAN HERE

A representative of the Texas State Employment Service will be in Hereford for the duration of the harvest and will have lists of the local farm hands wanting work.

Farmers needing tractor drivers, truck drivers, and combine men, may contact this office in the basement of the courthouse at Hereford. No charges are made for this service.

Mr. Walker, who is in charge of this work, was a business visitor here Friday, and while here paid the Star office a short visit.

"SNOW WHITE" PROVES ABOVE A CARTOON

Walt Disney's first feature-length animated production, "Snow White and the Seven Dwarfs," is definitely not an elongated cartoon.

The musical feature is done in soft tones of color, not in the bright hues of the Mickey Mouse and Silly Symphony shorts. Each scene is an exquisite composition of color and shading. Each frame of film could stand alone, comparable in its beauty to the most ambitious painting.

Whereas the Disney short subjects are one continuous laugh from start to finish, his first feature presents all the elements of great entertainment: romance, pathos, suspense and humor.

Although the other established Disney characters are all animals, for "Snow White" he has created human beings with human emotions, intended to be as real to the audience as flesh and blood players.

Do not forget to be at the cemetery Monday morning to help your neighbors cut and remove the weeds afternoon.

Sheriff Earl Booth, of Farwell, was a business visitor here Friday afternoon.

News Briefs

Paul Parr, of Hereford, visited his parents, Mr. and Mrs. J. W. Parr, last week end.

Mr. and Mrs. J. W. Parr were visitors in Muleshoe and Clovis, Sunday evening.

Mr. and Mrs. Harry Taylor and family, of Hereford, spent Sunday at Friona, visiting his brother, Albert E. Taylor, and family.

Mr. and Mrs. Roy Golden, of Portales, New Mexico, spent the week end here visiting Mrs. Golden's parents, Mr. and Mrs. J. W. Parr.

County and District Clerk E. V. Rushing, of Farwell, was a visitor here, Saturday afternoon.

Lon McDonald and his son, Lon, Junior, of Bowie, Texas, were visitors here last week in the home of his brother-in-law, J. W. Parr.

Mrs. J. L. Riddle is having excellent success with the 200 chicks she purchased from the Bell Hatchery.

Apparently all the machine shops in Friona are now rushed with work and all running full blast every day.

Buster Riddle was a Hereford visitor, Saturday, and while there visited the show.

Paul Dish and wife, of Pampa, visited J. L. Riddle and family, Sunday.

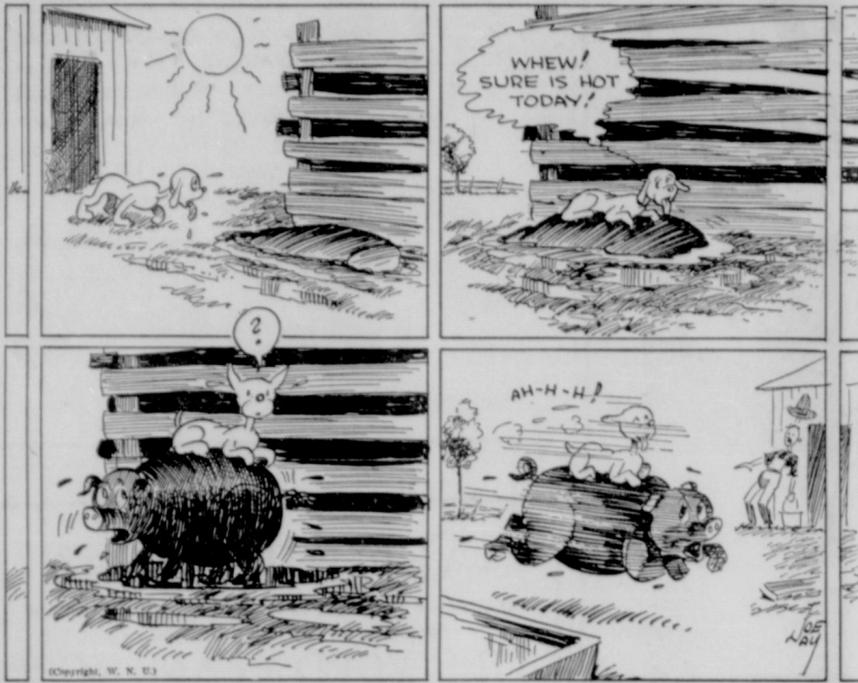

You cannot afford to miss "Snow White and the Seven Dwarfs," to be at the Royal Theatre 1-5 of July. See the ad in another column of this issue.

Do not forget to be at the cemetery Monday morning to help your neighbors cut and remove the weeds

Mr. Ralph Smith was an Amarillo visitor, Saturday.

WHAT to EAT and WHY

C. Houston Goudiss Offers More Advice About Reducing

Describes the Perils of Unscientific Methods for Losing Weight

By C. HOUSTON GOUDISS

6 East 39th Street, New York City

MY RECENT discussion of reducing in these columns brought many letters, indicating that the modern woman is, fortunately, weight conscious. This is an encouraging sign. For it shows that you are alert to the dangers of overweight, which not only destroys beauty but may indirectly contribute to heart disease, kidney disorders and diabetes, which take their greatest toll from among the heavyweights.

Guard Against Unscientific Reducing Methods

Some of these letters caused me great concern, however, because they indicate that in spite of my warning against unscientific methods of weight reduction, many women still cling to the idea that there is some magic in the various pills, powders, capsules, soaps, salts and mechanical devices that are sold at fancy prices and hold out alluring promises of speedy reducing without dieting or exercise.

It is bad enough that most of these fail to reduce. For they may delay the day when the victim of overweight will undertake a sound and scientific program of weight reduction that will effectively take off weight—thus improving appearance, benefiting health and increasing the chances of longevity. But what is far more serious is that some of these preparations may endanger health or cause lifelong physical impairment.

Dangerous Drugs

Drugging is particularly to be condemned, and no one should attempt to reduce by this method except under the advice and watchful eye of a physician. There are many invalids today who would be happy and healthy if they had not attempted to take some "reducing medicine" without consulting a physician.

One preparation that is still bought by foolish women—in spite of repeated warnings against its use—may even result in permanent blindness.

Almost equally objectionable are excessive purging—which may leave you a wobbly wreck—and fasting, which is even more dangerous to women than men.

Don't Diet Without Direction

A carefully regulated diet will not only maintain normal weight, but will banish overweight by forcing the body to burn its own excess fat as fuel. Having heard of this scientific principle, many women frantically and foolishly attempt to prescribe their own reducing diets—in often with disastrous results.

There is always the possibility that one may omit calcium-bearing foods and thus impair the teeth, or leave out foods rich in iron and copper and interfere

with the formation of the hemoglobin or red pigment in the blood.

One of the most common and most serious errors is to omit all bread, potatoes and cereals, in the belief that carbohydrates are "fattening foods." Carbohydrates are required by the body in order to utilize the fats in the diet, and when reducing, they are also necessary to burn up excess fatty tissue.

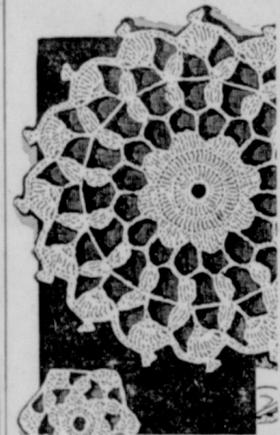

Just as fire cannot burn without air, fat cannot be utilized in the body without the presence of starch or sugar. When the diet contains insufficient carbohydrates, fat burns incompletely, resulting in the dangerous acetone type of acidosis.

Counting Calories the Easy Way to Reduce

The one safe, sure and scientific method of getting rid of surplus weight and at the same time maintaining top health—is to consume a diet that is balanced in every respect, but to count your calories at every meal, making certain that you consume fewer calories each day than your body requires for its normal energy expenditure.

I will gladly send to every reader of this newspaper, a copy of my reducing bulletin. This includes a chart showing the caloric value of all the commonly used foods—plus a week's sample reducing menus. By following this scientific plan for weight reduction, you can easily lose from one to two pounds weekly. A more rapid reduction is not advisable. At that rate, you can lose from six to eight pounds in the course of a month—twenty-four pounds at the end of three months. That is a lot of weight to lose and will make a vast difference in your

Doilies Soon Done In Jiffy Crochet

Pattern 1669.

You'll find yourself so fascinated by this jiffy crochet pattern that you'll turn these doilies up by the dozen in all three sizes. Use heavy perle cotton or four strands of mercerized string to achieve that heavy richness that you usually find only in rare old lace. Use as luncheon set or just as centerpieces. Pattern 1669 contains directions for making these doilies; illustrations of them and of all stitches used; material requirements; a photograph of a doily.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York. Please write your name, address and pattern number plainly.

SEND FOR THIS FREE VITAMIN PRIMER

OFFERED BY C. HOUSTON GOUDISS

Do you want to know where to find the different vitamins?

Just write to C. Houston Goudiss at 6 East 39th Street, New York City, for his new "VITAMIN PRIMER." It tells the facts that every homemaker needs to know about vitamins. In simple chart form, the functions of each vitamin are explained, and there is a list of foods to guide you in supplying your family with adequate amounts of each of these necessary substances.

Are You Overweight?

You can

REDUCE

Safely - Surely - Comfortably

Send for This Free Bulletin Offered by C. Houston Goudiss

Readers of this newspaper are invited to write to C. Houston Goudiss, at 6 East 39th Street, New York City, for his scientific Reducing Bulletin, which shows how to reduce by the safe and sane method of counting calories.

The bulletin is complete with a chart showing the caloric value of all the commonly used foods and contains sample menus that you can use as a guide to comfortable and beautiful weight reduction.

appearance and in the enthusiasm with which you greet your daily tasks.

The Film Stars' Method

This simple and scientific method of controlling the weight is the one used by film stars in Hollywood. It is essential that they keep slim and practically every important film player has a clause in her contract calling for a cancellation if she permits her weight to increase beyond a certain point. But at the same time, film stars must safeguard their health, for their work is the most strenuous of occupations!

Counting Calories Is Fun

In Hollywood they make a game of counting calories. You, too, will find it amusing, as well as beneficial to health and looks. And you will be rewarded by noting a drop in weight every time you step on the scales.

If Your Weight Is Normal Keep It That Way

It has been determined that the ideal weight—that is the weight that best promotes health and longevity—after thirty, is the normal weight for one's height at the age of thirty.

If you are approximately thirty and your weight is normal, you should send for my Calorie Chart and Reducing Bulletin and use it to help maintain your present weight!

If you are over thirty and overweight, you should not lose another day before sending for the bulletin so that you can begin at once to regain your normal weight by the safe, simple, scientific and comfortable method of counting calories.

As the pounds disappear you will feel as though you had stepped out of a prison of fat into a new world of physical freedom.

Questions Answered

Miss L. T. B.—Though it lacks fat and vitamin A, skim milk is a rich source of calcium and phosphorus, and also furnishes high grade protein. A quart of skim milk, plus one and one-half ounces of butter is the equivalent of a quart of whole milk.

Mrs. G. B., Jr.—There is absolutely no truth in the false notion that aluminum cooking utensils may adversely affect health. Numerous experiments have demonstrated that they are perfectly safe.

Mrs. J. M. T.—It is impossible to generalize regarding the diet in asthma. This condition is due to allergy, and the symptoms are produced by different foods in different individuals. Almost all protein substances are capable of causing distress.

Miss A. G.—One tablespoon of cod-liver oil provides about 100 calories, which is equal in fuel value to one slice of bread, one medium potato, or three-fourths of a cup of cooked macaroni.

Scorning Evil
Nobleness of character is nothing but steady love of good, and steady scorn of evil.—Froude.

Rare "Ice Bugs" Found Existing in Mild Place

Kamloops, B. C.—Nine specimens of the "ice bug," a rare insect, have been found near Kamloops at a lower altitude than they were ever before known to exist, according to G. Alan Mail, dominion entomologist.

The bugs were discovered near Mount St. Paul, 1,600 feet above sea level, on a mountain surface exposed to withering summer heat.

Authorities would like to know where the insects go in warm weather.

The "ice bug," or "grylloblatta campodeiformis," has been found in six other places in the world at an altitude of 6,000 feet.

Mail keeps the bugs in a tin can lined with moss at a temperature of 3 degrees above zero and is studying their habits. He said they could not live at over 70 degrees above and would roast to death in a human hand.

The ice bugs are less than an inch long, have a light brown shell, and resemble crickets or cockroaches.

Boats Outnumber Dogs

Decatur, Ill.—According to a report of City Clerk J. J. Heger, Decatur has more boat owners than dog owners.

Earns Living as Boxer at 73

London.—At the age of seventy-three, Frank Craig, London negro, still earns his living as a boxer.

"IRIUM Won Us!" Say New Pepsodent Users

Irium contained in BOTH Pepsodent Tooth Powder and Pepsodent Tooth Paste

Millions of people—many of whom have long suffered the embarrassment of dull, surface-stained teeth—are now enthusiastically applauding—and regularly using—Pepsodent containing Irium!

These millions have learned how wonderful Irium helps Pepsodent better to brush

away dingy surface-stains on tooth enamel—polish teeth to a brilliant natural radiance! Pepsodent can do the same for YOU—help bring you a smile you will be proud to show the world! What's more, Pepsodent contains NO GRIT! NO FUMICK, NO BLEACH! Try it!

Speaking of Sports

Sons of Italy Make Up Star Baseball Club

By GEORGE A. BARCLAY

THERE are enough Italian boys in the big leagues to do a Verdi opera, with principals and chorus warbling in the mother tongue. Not that these fellows are singers. Ball playing is their business and their performance on the diamond is making the brilliance of these second and third generation sons of Italy a tradition in the national game.

Take a census of the Italian-Americans in the National and American leagues and you'll find there are 17 of them and if you add a coach there would be 18 in all.

Put them all together on a ball field and you'd have a team that with the exception of pitching would be able to hold its own with any club in the big leagues. Let's start

JOE DI MAGGIO

behind the plate. Well, there's Ernie Lombardi of the Cincinnati Reds. He is a heavy hitter and a crafty receiver who would be a first-string catcher wherever he went. He'd have plenty of help from Gus Mancuso of the New York Giants. Although Gus is beginning to show signs of wear and tear he is still good enough for a pennant winning team. For third string catcher, Angelo Giuliani of the St. Louis Browns would do nicely.

Star Infield

At first base you would have your choice of Dolph Camilli of the Brooklyn Dodgers or Zeke Bonura of the Washington Senators. Dolph would probably get the call for the job because of his greater speed and superior fielding ability, although Bonura would command respect because of his hitting.

Second base on this Italo-American team might be a problem. To begin with, there's Tony Lazzeri, now utility man with the Chicago Cubs. Tony was a big gun for years in the New York Yankees' offense and defense and that team seems to be feeling his absence this year. Age would probably keep Tony from playing regularly, so the call would probably go to Tony Cuccinello of the Boston Bees whose fighting heart and fielding skill have helped make the Bees a terror for other National league teams this spring. Then there would be Lou Chiozza of the New York Giants, who though crowded out of a regular job by the acquisition of Alex Kampouris by Bill Terry, still can give a good account of himself.

There would be no contest at third base. Cookie Lavagetto of the Brooklyn Dodgers who led the league in hitting this spring would nail down that job without half trying. Shortstop, of course, would go to Frank Crossetti of the New York Yankees, because of his superb fielding and his timely hitting. Frankie isn't as fast as he was a few years ago, but he's still good enough for the big time.

The incomparable Joe Di Maggio, centerfielder of the New York Yankees, would head up the outfield. He would probably be flanked on one side by his brother Vincent of the Boston Bees and by Johnny Rizzo who started the season so sensationally with the Pittsburgh Pirates. Phil Cavaretta of the Chicago Cubs would also be in the fight for an outfield job.

His best chance would be to nose out Rizzo, for Vince Di Maggio is recognized as one of the classiest fielders in the business and he is crowding his way toward the .300 mark. Melvin Mazera of the St. Louis Browns and Tony Bongiovanni of the Reds would be utility outfielders.

The pitching staff would present problems. There isn't a pitcher of Italian ancestry in the big show who compares in skill with the others. It seems that the sons of Italy have preferred positions where their speed and general all-around ability give them a chance to play regularly every day. So only Julio Bonnetti of the St. Louis Browns and Joe Cascharella of the Cincinnati Reds would be possibilities.

Oscar Mellillo, coach of the Browns, would draw the assignment of manager in view of his long experience and his splendid career as a player. Mellillo was one of the first of the American-Italians to demonstrate his race's proficiency on the diamond.

A Champ Passes

THE fight trade is looking to Lou Ambers to provide some stiff competition against Henry Armstrong when they fight for the light-weight championship July 26. Experts who saw Barney Ross bow to Armstrong in New York recently are of the opinion that Ambers will make a creditable showing, but that the tan-colored whirlwind will win.

As long as his speed holds out, Armstrong will probably prove too much for any fighter he meets. Ambers is not as far along the backward trail as is Ross, but he is not likely to prove a match for the swarming tactics of the Negro.

Ross' announced decision to retire is a wise one. "Barney's through," was on everybody's lips the night of his last fight, even though he gave championship exhibition of gameness. Barney, who had never been knocked out, stood the punishment for 15 rounds in spite of the referee's desire to stop the fight. And no champion, when he has come to the end of the trail, could feel a deeper satisfaction in his achievements than Ross.

Bred in the dingy poverty of New York's East Side and reared in the tough ghetto of Chicago, Ross rose to pugilistic eminence by sheer merit. When he won the Chicago Golden Gloves featherweight title in 1929, as an awkward kid, he attracted the attention of Sam Pian and Art Winch, who ever since have been his managers.

They handled him shrewdly and four years later had him winning the lightweight championship from the veteran Tony Canzoneri. In 1934 Barney won the welterweight championship from Jimmy McLarnin. In a return bout with McLarnin, Ross was beaten, but came back in another year to regain that throne. He held it against all comers until he met the dusky little Armstrong, regarded by many as the greatest fighter of his weight since the famed Joe Gans.

Here and There—

CONNIE MACK, seventy-five-year-old manager of the Philadelphia Athletics, continues to surprise the fans. Adding a couple of ex-college boys to a team that was regarded as the laughing stock of the American league, he has made the Athletics a club to be reckoned with. Don Lambeau, 200-pound son of the Green Bay Packers' coach, will enter Fordham in the fall. He's a fullback. Wee Dickie Kerr, former White Sox pitcher who was the hero of the 1919 world series, has returned to organized baseball as an active member of a Mountain States league team. Kerr is forty-five years old.

Bunny McCormick, Notre Dame's right halfback the last two years, will spend the summer delivering ice at Livermore, Calif., before accepting a full time position with an oil company in California. All American league batting champions since 1931 have been infielders. Ted Duay, young New York Giant catcher, turned down a scholarship at Rutgers to play professional baseball. "I'd rather catch Carl Hubbell than be president of Yale," he said.

Flag Insurance?

WHEN Bill Terry, manager of the New York Giants, acquired Second Baseman Alex Kampouris of the Cincinnati Reds recently, he turned a neat deal that makes his team a real pennant-contender. The Giants were stumbling around until they got Alex. Various players trying to substitute for Burgess White-

ALEX KAMPOURIS

head, who is probably out for the season because of illness, gave poor performances at the keystone sack. Kampouris brought an end to Terry's worries.

Little Alex, who is the only Greek boy in the big leagues, is not a heavy hitter, but he does clout them occasionally for extra bases and break up ball games as a result. Alex, who batted only .249 last year, drove out 17 home runs. It is as a sure-fire fielder and a player with dash and fire that he will be of value to the Giants in the race.

Kampouris, who came originally from the Pacific Coast league, is a resident of Sacramento, Calif. He attended the University of Southern California and was the youngest student ever to graduate from that institution.

Wally Berger, whom the Reds got from the Giants in exchange for Kampouris, hit .285 last year and tied Alex's record of 17 home runs.

LONG, STERN CHASE

"The world is a very small place," said the bore, as he took his seat in the smoking-room of the village inn. "Now listen to this: "Last year in Paris I met a man who lives in the same street as I do. Later on I met him in Venice, then in Rome, again in Alexandria, and, finally, I crossed the channel with him on the way to England. Now what do you think of that?" "Well," said the fed-up listener in the corner, "why didn't you pay him what you owed him in the first place?"—Stray Stories Magazine.

Dad Could Use a Loan

The rich young man approached the girl's father with some misgivings. "Er—er I suppose, sir," he began, nervously, "that you are aware I have been making advances to your daughter?" "Father patted him on the back. "Yes, and now what about her poor old Dad, eh?"—Montreal Star.

TELLING HIM PLENTY

Percy—I—aw—wonder if, as they say, cigarettes—aw—enfeeble the mind? I've smoked all my life. Miss Sharp—How can you doubt it, Mr. Sapp?

Wow!

Mrs. Fiery was born with a temper like gunpowder. "Tell me, dear," said her husband, after one of her outbursts, "how it was I never discovered this unhappy weakness of yours during our courtship days? However did you restrain yourself?" "Well," replied his wife, "I used to go upstairs and bite pieces out of the top of the oak dressing-table."—Stray Stories Magazine.

An Effort

"What is the chief river of Egypt?" "The Nile," answered Rebecca, brightly. "That's right," said the teacher. "And what are its tributaries?" "The juveniles," answered Rebecca.

Son, or Sun?

A little boy wrote in his diary: "Got up at seven. Went to bed at eight." His teacher suggested that "Rose at seven" would sound better; would, in fact, "be quite elegant." So the child erased the entry and briefly chronicled: "Rose at seven. Set at eight."

More Ways Than One

Passerby—There's nothing in you or you wouldn't beg. Tramp—You said it, boss. Won't yer gimme ten cents for a meal?—Philadelphia Bulletin.

Hard to Eat

Herbert (finding a piece of rubber in his hash)—There's no doubt about it, the auto is displacing the horse everywhere.

Mountain Topics

Salesman—Say, your shoes are mixed; you've got the left shoe on the right foot. Strawfoot—And here for twenty years I thought I was clubfooted.

TOO HEAVY

Teacher—Two thousand pounds make a ton—can't you hold a little thing like that in your head? Pupil—No-no, ma'am, don't think I can.

He Knew

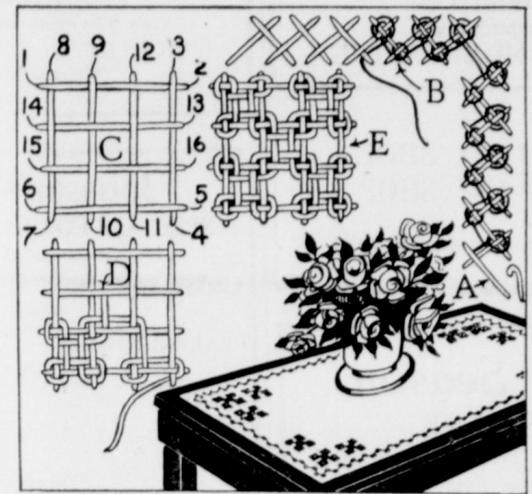

A very old resident of the town was reported to have died. Many people called, only to find that the old man was hale and hearty. He smiled when they told him of the report, saying: "I knowed it wasn't true as soon as I heard it."

Past Events

Gladys—I shudder when I think of my thirtieth birthday. Pamela—Why, dear, what happened?

HOW to SEW

By RUTH WEYTH SPEARS

PINK is the newest color in decoration. It is charming for embroidered mats and table scarves. The runner shown is palest pink linen embroidered in darker pink and deep rose. A pearl cotton embroidery thread, size 5, is used. Cut the mat or runner the desired size allowing 1 1/4 inches all around for hems. Turn the hems and sew them by hand at the corners. Now, embroider around the top of the hem with plain catch-stitching in pink as at A. Next, interlace these stitches with the rose as at B.

Three 1 1/2-inch squares are embroidered in each corner. Mark each square with a pencil. The method of laying the pink foundation threads is shown in diagram C. Bring the needle out at 1, place it in the material again at 2, and bring it out again at 3. Continue, following the numbers and weaving the stitches over and under as shown. Next, interlace these stitches with rose. Start at D and follow the diagrams until all the stitches are interlaced as at E.

NOTE: Mrs. Spears' latest book fully illustrates ninety other embroidery stitches; also fabric repairing; table settings; and many things to make for yourself and the children. The directions in the book are complete—no patterns to buy. Price 25 cents postpaid (coin preferred). Ask for Book 2 and address Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

Cool, Midsummer Fashions

IT'S the simple things that look prettiest in hot weather—dresses like these, with slim skirts, puff sleeves and v-necklines. They're easily made at home, in colors and fabrics that suit you best. The patterns include detailed sew charts so that

you can easily do it, and you'll save enough for that extra frock you always want in summertime.

Dress With Fitted Waistline

This dress has a beautifully expensive, exclusive look—and it's so easy to do! Only six steps in the making. The fitted waistline is topped by soft gathers that fill out the bosom. Darts at the side make the waist hug your figure, and the sash bow in back adds a touch of youthful charm. Linen, silk crepe, dotted Swiss or georgette are pretty fabrics for this dress.

All-Day Long House Dress

Made on modified shirtwaist lines, this dress is simple enough to put on first thing in the morning, and pretty enough to wear all day long. Ricrac braid on the collar, sleeves and pockets makes it especially colorful and flattering. Make up in percale, pique, gingham or linen.

1481 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 3 1/2 yards of 35-inch material.

1529 is designed for sizes 34, 36, 38, 40, 42, 44 and 46. Size 36 requires 4 1/2 yards of 35-inch material; 3/4 yards ricrac braid to trim.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Baron Munchausen

Karl Friedrich Hieronymous, Baron von Munchausen (1720-97) was a German cavalry officer. His tales of his impossible adventures while on service in Russia are classics of their kind. Since their publication in English in 1785 by the baron's friend, Rudolph Erich Raspe, the tales, with later additions, have been many times reprinted and translated into many languages.

CHEW LONG BILL NAVY TOBACCO

5¢ PLUG

GUIDE-BOOK to GOOD VALUES

When you plan a trip abroad, you can take a guide-book and figure out exactly where you want to go, how long you can stay, and what it will cost you. To save you time, the obliging author has marked especially interesting places with asterisks, or two or three—so that when you land in Europe, you know exactly where to go and what to look at. The advertisements in this paper are really a guide-book to good values... brought up to date every week. If you make a habit of reading them carefully, you can plan your shopping trips and save yourself time, energy and money.

HEALTH NOTES **Want Ads**

Austin, Texas—In view of the fact that Governor Alfred has proclaimed the month June 8 to July 6 as Milk and Dairy Products Month, Dr. Geo. W. Cox, State Health officer, urged with this more extensive use of milk that both producer and consumer be concerned as to its quality. The use of clean, safe milk is a health measure.
 Local interest in improved methods of producing wholesome milk has increased greatly in the past two decades and the striking advance in milk control has been responsible for the enormous saving in infant life. Milk is perishable and especially during hot weather. To insure milk of good quality requires cleanliness, sterile utensils, protection against flies, careful bottling and maintenance at low temperature. The presence in fresh milk of large numbers of bacteria, due to insanitary methods of production is a health hazard. Among the diseases which may be transmitted through milk are tuberculosis, typhoid fever, scarlet fever, diphtheria, septic sore throat, undulant fever, diarrhea and enteritis. Numerous milk-borne outbreaks of disease occur every year in this country and from the use of milk that might have been safe with proper care.
 We should firmly insist that the milk we drink be carefully produced so that we will have the maximum practicable protection along the line of the cow to the consumer.
 Mr. Joe Bell, who runs the Bell Feed & Hatchery, moved to the north side of town.
 This refrigerator will be used, not only for the display but for the preservation of his perishable goods and Mr. Spring is deserving of commendation for his progressive spirit.

FRIONA STREETS IN FINE SHAPE FOR HARVEST
 Under the supervision of Mayor F. W. Reeve, City Commissioners Spring and Maurer, Water Superintendent L. G. Sympton and Fire Chief S. Mitchell, with James Bragg and the operators of the County's big grader, the streets of the city have, during the past week, been thoroughly worked and graded.
 The big scarifier was run over that portion of Main Street that was formerly laid with broken stone caliche, and thoroughly stirred up. The street was then soaked from one of the city hydrants and the big roller was put over it until the surface was firm and level.
 The other principally used streets were given a treatment by James Bragg and his big road maintainer until they were scraped down smooth and level and our streets are now in as good condition as unpaved streets can be made, and ready for the heavy traffic of the harvest season.
 Another busy man in town these days is Fred Dennis in his planing mill, as people, since learning that he is in the business, are rushing him with work of all kinds in his line.
 Lee Thompson, of Oklahoma Lane community, one of the three candidates for the office of County Judge, was here Tuesday forenoon and made the Star office an appreciated visit. Lee is a most genial fellow and is making an active campaign for the office.
 Those new Bill of Sale drafts which Clyde Seamonds is using in his business, were printed at the Star office. You can get yours printed there, also We like to print.
 Mr. and Mrs. Roy Man, who lived on the south side of the laundry, moved where Mrs. Mattie Chronister formerly lived.
 A. N. Wentworth seems to be gradually improving and is now able to get about with the help of only one crutch and comes to town almost daily. Mr. Wentworth is one of those men who, although in his eighty-fifth year, cannot be kept still. He is now cultivating a nice garden and raising a nice flock of fine chickens. His example is worthy of imitation.
 Ernestine and Doris Gatlin, small daughters of Mr. and Mrs. Ernest Gatlin, of Homeland, spent last week in Hereford, visiting their aunt, Mrs. Wayne Higgins. They report a wonderful time.
 R. N. Graham, former County Clerk, and now an insurance agent, of Farwell, was a business visitor here, Saturday forenoon.
 Miss Louise Euler who has been employed for the past two weeks in Amarillo spent Sunday here with her parents.

WHAT IS MEANT BY DEPENDABLE PROTECTION

AN insurance policy that is backed by only a minimum of quick assets cannot give you 100% protection against financial loss. CAPITAL STOCK COMPANY FIRE INSURANCE is recognized as the most dependable form of insurance because it provides sound protection at a fixed known-in-advance cost, because its policies are backed not only by legal premium reserves but also by cash capital and surplus, because it operates through authorized citizens of your own community, Local Agents who are always available to render prompt personal service.
 Four out of five people choose capital stock company fire insurance in preference to other types. You, too, want insurance that protects you against community-wide catastrophes. That is the kind you should have on your home, business, automobile and other property. That is the kind of dependable insurance we sell. Consult us on any insurance problem.
