BRYAN SAYS NO COMPROMISE ON PROH PLATFORM

"Grape Juice" Bryan Says Party Should Be Dissolved If Wet Plank Adopted

WETS PLACE GREAT HOPE IN SOUTHERN DELEGATION

Leaders Favoring Modification of Volstead Act Work Quietly Among Delegates

SAN FRANCISCO, June 26.—Wets and drys today continued their pre-convention battle, but left the outcome still in doubt.

Democratic leaders favoring modification of the Volstead act continued efforts to quiet work among state delegations.

Mr. Bryan asserts there will be no compromise on the prohibition question.

"When we're through," he continued, "the country will know whether the democratic party will be a party of property owners or whether they'll be out of business never to raise their black flag again."

Leave Well Enough Alone. WASHINGTON, June 26.—W. J. Bryan was urged to let well enough alone on the prohibition question.

FIRST BALE TEXAS COTTON SOLD \$1,600

HOUSTON, TEX., June 26.—The first bale of the American 1920 cotton crop, raised here on a special train from San Benito, was auctioned on the stock exchange today for \$1,600.

LEAGUE OPPONENTS PLAN BIG FIGHT

Reed, Bryan and Walsh Plan to Make a Minority Report to Convention

SAN FRANCISCO, June 26.—Plans for opposing the administration treaty and League of Nations plank were formulated at an hour's conference tonight between W. J. Bryan and Senator Reed of Missouri.

He explained that under Missouri rules the congressional districts are permitted to select their own national delegates who are passed upon by the state convention.

The state convention rejected Reed's selection and referred it back to the fifth district without any qualifications or restrictions.

For the administration treaty plank it is pretty generally agreed that it shall offer several substitutes, possibly three or four, to the credentials committee.

Several Substitutes. For the administration treaty plank it is pretty generally agreed that it shall offer several substitutes, possibly three or four, to the credentials committee.

DOWNTOWN BLAZE CAUSES SLIGHT LOSS

Fire of an unknown origin partially destroyed the confectionary store of E. A. Martin, 610 1/2 Seventh street and the stock of goods of the Bell Tailoring company at an early hour this morning.

A messenger boy of the Western Union Telegraph Company discovered the fire while passing on his bicycle.

People rooming at the Savoy Rooms above the Imperial Cafe, adjoining the scene of the fire were forced to abandon their rooms on account of the great volume of smoke.

Fireman soon had the blaze under control. Martin stated to a Times representative that the estimated loss of equipment and merchandise would reach \$5,000.

The Times was unable to ascertain the amount of loss sustained by the Bell Tailoring Company, however, the entire stock of woolen and clothing was saturated with water, and it is thought their loss will run into three or four thousand dollars. It isn't known whether the loss is covered by insurance.

WICHITA FALLS HAS PROBABLY TAKEN RANK AS SIXTH CITY IN POPULATION IN TEXAS

Wichita Falls whose population was announced by the census bureau Saturday as 40,079 is probably the sixth city in Texas in point of population.

Wichita Falls is looking ahead to 1930. A good many Wichitans believe it not improbable that Wichita Falls will make larger a percentage of gain in the next ten years as it has in the past ten.

REED SAYS REJECTED ON LEAGUE STAND BE PLATFORM ISSUE

Other Vital Questions Will Be Injected Into Party Platform

SAN FRANCISCO, June 26.—Senator James A. Reed of Missouri, whose claim to a seat to a convention from the Fifth Missouri district was rejected by the national committee, tonight gave out a statement.

Reed refused to take the seat to the United States senate, acting under his oath of office; he opposed the league of nations.

Reed said he will carry the case before the credentials committee, hoping and expecting a different result will prevail there.

Continuing, Senator Reed said: "The unfortunate part of it is that if the impression gets abroad that men ought to be excluded from participation in the democratic councils because they are not for the league of nations as Mr. Wilson delivered it, then a large percentage of the democratic party throughout the nation may feel that they are in like manner to be excluded."

Reed said he will carry the case before the credentials committee, hoping and expecting a different result will prevail there.

POPULATION OF DELAWARE TO BE ANNOUNCED MONDAY

WASHINGTON, June 26.—The first state population figures of the 1920 census will be announced at 10:30 a. m. The state will be Delaware.

The following places also will announce their population figures today: Higginsville, Mo., Webster Grover, Mo., Plainview, Texas, Oklahoma City, Okla., Call county, Arkansas.

WOMEN'S HATS, PLAIN OR ADORNED ARE NECESSITIES

WASHINGTON, June 26.—Women's hats, plain or adorned, are necessities of life, under the meaning of that term, as used in the Lever act.

The figures announced Saturday are not final, according to advices received by the Times. It is probable they will be revised in a few weeks, but it is not expected they will show material change either way.

Ten years ago Wichita Falls was a small town, a village, a hamlet. Within Texas it was known as one of the pluckiest and most progressive little cities in the state.

Wichita Falls is looking ahead to 1930. A good many Wichitans believe it not improbable that Wichita Falls will make larger a percentage of gain in the next ten years as it has in the past ten.

PROFITEERING WILL BE PLATFORM ISSUE

Other Vital Questions Will Be Injected Into Party Platform

SAN FRANCISCO, June 26.—Bone dry prohibition, profiteering, industrial relations, the League of Nations and the Irish question promise to be headlines in the fight over democratic platform planks.

In this category the prohibition question was easily foremost in the minds of leaders and delegates as the bone drys and anti-bone drys counted off noses at the scale of resolutions.

The League of Nations row was more or less in the background, but it was not forgotten.

Profiteering was another hot issue. As the labor problem and profiteering, only beginnings of a disagreement were in evidence.

On prohibition three courses are open. Mr. Bryan and his supporters want an affirmation of the law for which they say a way has been opened by the supreme court's decision.

GREEK PLANS TO FRUSTRATE TURKS

CONSTANTINOPLE, June 25.—The Greek movements in Asia Minor are the result of a plan conceived by the Bagdad line and Marmora and manifestly are designed to frustrate the offensive being prepared by Turkish nationalists.

The Greek movements in Asia Minor are the result of a plan conceived by the Bagdad line and Marmora and manifestly are designed to frustrate the offensive being prepared by Turkish nationalists.

MEXICO PLANS TO RETURN PROPERTY

WASHINGTON, June 26.—The state department today advised that the American embassy at Mexico City has published a circular of the Mexican treasury department providing for the immediate return to their proper owners of all properties confiscated by the Mexican government, excepting those of Victoriano Huerta and his immediate family.

The circular added that in order to benefit owners must prove ownership within thirty days and must renounce all claims for damages caused during the time the properties were held by the government.

GEORGIA CONTESTANTS WIN A PALMER VICTORY IN SECURING TEMPORARY CONVENTION SEATS

SAN FRANCISCO, June 26.—The democratic national committee voted today to place the Palmer delegates from Georgia on the temporary roll of the convention.

The vote to seat the Georgia Palmer delegates was unanimous, forty-nine votes being recorded in their favor with four committee members absent.

The vote to seat the Georgia Palmer delegates was unanimous, forty-nine votes being recorded in their favor with four committee members absent.

Although only 28 votes were involved in the Georgia contest, the re-election of Clark Howell as a member of the national committee delegates having selected him when they were named.

The democratic national committee plunger directly into the Georgia vote today to place the Palmer delegates from Georgia on the temporary roll of the convention.

The vote to seat the Georgia Palmer delegates was unanimous, forty-nine votes being recorded in their favor with four committee members absent.

The vote to seat the Georgia Palmer delegates was unanimous, forty-nine votes being recorded in their favor with four committee members absent.

DECKER CLAIMS SEXTON DANIELS TWISTED FACTS

Daniels' Statement of Officers is No Discredit to Them, Avers Admiral

WASHINGTON, June 26.—The Sims Daniels row over the navy's conduct of the war was revived today with the publication of a letter from Rear Admiral Benton C. Decker, commandant of the seventh naval district, Florida, in which he charges that Secretary Daniels in his testimony before the senate investigating committee "intentionally and deliberately" misrepresented certain acts of Rear Admiral Sims, Pullam and Fiske.

The letter dated June 17 and addressed to Chairman Hale of the committee, stated that the navy and navy register, a service magazine.

The admiral declared in his letter that from his personal knowledge of Mr. Daniels' character, he is led to believe that whatever is cited in his statement to the discredit of the officers is so perverted and twisted as to give the "truth" a false meaning.

"It is probable and more so like Admiral Decker's letter said, that if these officers had bowed down and served the gods that Mr. Daniels worshipped, they would today have been fattening on the navy as commanders of fleets on active duty or in pleasant jobs in Washington. To me, as to other high officers of the navy, it has come that if we would bow down and do the wish of Mr. Daniels, he would receive the rewards thereof, intimations that come by circuitous routes and underhanded, sneaking ways, so that no one can ask the navy how to follow him."

"My explanation of the incidents set forth by Mr. Daniels is based upon my personal experience with him. This explanation is that Mr. Daniels found those officers who would follow him to the limit of demoralizing and degrading the navy; that, even though they honestly desired the rewards and honors which were the goal of their honorable men reasonably desire, they were not willing to sacrifice their character, their manhood and their country."

As a result Mr. Daniels determined to break them by the use of all the power of his high office, by the use of the power of ridicule, sarcasm and harsh threats, that, as a newspaperman, he has known how to use so skillfully; by the use of strength of publicity secured through his newspaper connections, all the weapons which he has known how to use through the ages to maintain its power.

"In my opinion all credit is due to these men that they have fought until the end and upheld the standard of upright, loyalty to the country, self-sacrifice, hard work and gentlemanly conduct, attributes that the ideal naval officer has always revered."

"I have no desire in this letter to bring out my personal experiences with Mr. Daniels, but he knows of them, and he knows the difference between right and wrong, that he has been dishonest; that he has abused his power; that he has done all this for unworthy motives."

"In any organization of the navy today," Admiral Decker continued, "the needs of the best interests of the country demand that there shall be placed in the navy department a naval officer big enough and broad enough and of sufficient ability to maintain the standards of the navy against the encroachments of the civilian secretaries, who seek to make of the navy a political organization."

"Holler-Than-Thou" Group. In another letter to Chairman Hale, also published in the Army and Navy Register, Admiral Decker assails Assistant Secretary Roosevelt for his references to a "holler-than-thou" group of officers at the navy college at Newport. In a recent communication to the member of congress.

"This is the group of officers," Admiral Decker said, "who have stood out against the introduction of politics into the navy and have sacrificed themselves for the good of the navy and not fattened on it."

"These may be the same officers who were scornfully referred to as 'holler-than-thou' by Assistant Secretary Roosevelt on a previous occasion. Mr. Roosevelt sought to ingratiate himself with the working men and the same to whom the confidential clerks of the navy giving instructions that they dare not give in public with regard to the laboring men."

"But they are not scorned as 'gold laced Gentlemen' when he meets them in rich clubs of New York and Washington."

STRIKE IS SPREADING OVER MEXICO. MEXICO CITY, June 26.—The strike movement in various parts of the republic is growing. Dispatches to the Mexico City newspapers say. Three spinning mills in Puebla City have been closed by a walkout for which no reason was given, according to Excelsior.

FEW REALIZE WORK Y. W. C. A. IS DOING

Cafeteria, Educational Work,
Travelers' Aid, and Summer
Camp Some of Activities

It is not generally known in this city the real extent of the work which the local Y. W. C. A. is doing. The knowledge of the masculine element of the town is limited very largely to the fact that the Y. W. is connected with a splendid cafe, and even this knowledge is more or less superficial, while even in feminine circles the true nature of the institution is to a large extent lost sight of. But be that as it may, the fact remains that Wichita Falls does possess a very complete and efficient branch of the world wide woman's organization.

The new quarters of the "Y" located in the 700 block on Eighth street are arranged and fitted up in a tasteful and pleasing manner, with facilities which insure the comfort of all who are connected with the institution, either as members, patrons, or employees. The lunch room, which is perhaps the largest department of the local institution, caters to over 500 persons daily and the management states that this number is increasing at a substantial rate. Only the best of pure food is served from the counters and this is prepared and cooked in spotlessly clean kitchens. Without exception white help is employed and all cooking is done by home recipes. Rest rooms are provided for men and women and employees are compelled to take a specified amount of rest some time throughout the day.

In addition to the cafeteria the educational branch of the Y. W. is functioning daily. Plans are being made for a summer camp where girls and women may enjoy the pleasures and benefits to be derived from "camping out." The camp will be under the supervision of competent authorities and a fine time is promised for all those who attend. A traveler's aid secretary is maintained at the railway station and any girls or women in need of assistance are cared for by this department. The motives and ideals of the Y. W. C. A. are designed to accomplish the most good possible for the womanhood of the nation and the success of the local institution is evidence enough that these principles and ideals are worthy ones indeed.

GOODFELLOW DESIRES INVESTIGATION ATTACK UPON THREE PRISONERS

Declaring that no police officer, regardless of the provocation, can be excused for attacking a prisoner awaiting trial, Chief of Police Goodfellow stated Saturday night that he will welcome Police Commissioner Bralley's promised investigation of Saturday morning's fight in the city hall corridors.

"If there is evidence showing that any police officer deliberately attacked Lee Carter and his three companions, when they were waiting to be called before the court for trial," the Chief said, "that evidence should be submitted. In 30 years of duty in enforcing the law, this is the first time anything of this kind ever has occurred in connection with prisoners under my custody."

"I want to say further, lest the impression be given that I was falling in my duty in suppressing disorder, that when the fight started Saturday morning I was in the police court engaged in my work there; and it was a physical impossibility for me to break my way through the excited crowd."

"Commissioner Bralley, however, was in the corridor at the time, and he took Detective Johnson's gun away from him. I reached the corridor just as the men were being separated, and ordered Chief of Detectives Lee Huff and several patrolmen to put every man out of the building who had no business there. I also cleared

the court room of spectators. Later, when Lee Carter declared his unwillingness to leave the court alone, I accompanied him a block in order to give him protection, and also sent an officer with him to bring back his gun, as imposed by Judge Ogle.

"I realize that this is a serious matter, and wish the public to know that while I am dead set against permitting offenses against the law to go unpunished, I do not sanction any police officer taking the law into his own hands. I intend to do my duty as an officer, and I intend as long as I am in office to insist upon my men doing likewise."

NEFF SPEAKERS BUSY SATURDAY

FRISCO AUDITORIUM CAN SEAT DEMOCRATIC CONVENTION

SAN FRANCISCO, June 25.—When the democratic national convention meets here June 28 it will have available for the first time accommodations in the Exposition Memorial Auditorium building sufficient to house under one roof not only the convention proper but committee meetings and headquarters for candidates as well.

These are largely to be utilized, according to J. Bruce Kremer of Butte, Mont., vice chairman of the national committee, thus avoiding the inconvenience and delay usually attendant upon holding minor conferences away from the convention hall.

In addition to the main auditorium, the maximum capacity of which Mr. Kremer estimated at 12,500 persons, the building contains two auxiliary halls, one that will seat 900 persons and the other 150. There are 19 rooms that may be used for smaller meetings.

A fence around the entire building, with entrance gates for ticket-holding spectators, delegates, officials and news writers, will be used by police and convention authorities to prevent crowds from rushing doorkeepers to obtain admittance. This has occurred several times during national party conventions.

Noisy Activity.

The auditorium for three weeks past has been a scene of noisy activity. Carpenters have erected the speakers' platform, 30 by 40 feet and 10 feet high on the south side of the big hall just in front of the great organ and opposite the main entrance.

Several feet lower and extending along the greater part of that side of the auditorium is the press section with seats for 516 working newsmen.

Back of the speakers' platform in sound-proof rooms are telephone booths and fully equipped accommodations for press associations and newspaper men.

The central portion of the main floor is reserved for the 1,092 delegates and a like number of alternates. Around this space a solid railing has been raised to keep back spectators that are admitted to this floor. To aid these onlookers a platform one foot high has been built over the entire space they will occupy. The balcony, sweeping around three sides of the auditorium, will seat 4,416 persons.

Covering dome is a canopy weighing 16 tons that forms a false ceiling. This and draperies on the walls and in the corners are designed to improve the acoustics.

Electric Devices.

Telephone system that will enable the with all modern electrical devices, including sound-carrying wires and a telephone system that will enable the chairman to transmit orders from the platform to the sergeant-at-arms and other officials and these in turn to speak to their deputies in any part of the great hall.

A complete hospital under the direction of the Red Cross and a large restaurant and lunch room have been installed.

Despite the fact that the \$2,000,000 four-story granite and concrete structure was erected only five years ago, the interior has been entirely renovated and repainted. Flags are to be used in the decorations, which with a secret decorative effect to be presented the opening day, are described as "typically Californian."

Weather records running back to 1871 indicate cool "top coat" weather for the convention period. Overcoats and hats of spectators and participants may be checked free of charge

in permanent stations scattered throughout the building.

Civic Center.

The auditorium stands in the open civic center that offers much space for parking automobiles. One corner touches Market street, the city's principal thoroughfare, which has two surface street car lines running in each direction, and it is 11 blocks from the Palace hotel, where national committee headquarters are located.

The San Francisco committee that pledged \$125,000 to bring the convention here is headed by Charles W. Fay, postmaster, George F. Mara of Bridgeport, Conn., representing Homer S. Cummings, of Stamford, Conn., chairman of the democratic national committee, has been here for nearly six months overseeing arrangements for the convention.

Cummings is to be temporary chairman of the convention. He will be presented by Kremer, vice chairman of the national committee.

E. G. Hoffman of Fort Wayne, Ind., secretary of the committee, will act in a similar capacity for the convention, being assisted by W. R. Hollister of Jefferson City, Mo., executive secretary of the committee. Col. John L. Martin of St. Louis is honorary sergeant-at-arms.

Wilbur W. Marsh of Waterloo, Ia., is treasurer of the national committee, and W. D. Jamieson of Washington, D. C., is director of finance.

The press section will be in charge of James D. Preston, superintendent of the United States senate press gallery, assisted by William B. Donaldson, superintendent of the house of representatives press gallery.

SPECIAL NARCOTICS TAX PAYABLE BY JULY 1

AUSTIN, TEX., June 26.—A warning is issued by Collector of Internal Revenue A. S. Walker to all persons liable for the special tax on narcotics. The regulations provide that the return and tax shall be in the office of the collector not later than July 1st. For failure to make the return and pay the tax by this date a penalty of 25 per cent is added to the amount of tax.

The rate of tax is as follows: Manufacturers, \$24 per annum; wholesale dealers, \$12 per annum; retail dealers, \$6 per annum; physicians, dentists, veterinary surgeons and hospitals, \$3 per annum.

All remittances should be made by express or postoffice money order or Federal Reserve Bank Exchange and mailed to the Collector of Internal Revenue, Austin, Texas, to reach his office not later than July 1st. Personal checks are not accepted in payment of this tax.

CURETON MAKES SECRET MISSION SOUTH TEXAS

AUSTIN, June 26.—Preparations are being made by Attorney General C. M. Cureton to leave Friday for South Texas on an important mission, the nature of which was not disclosed.

When asked if his mission had any reference to the striking situation at Galveston, he refused to affirm or deny that this was the purpose of his proposed trip to "south Texas." General Cureton made a trip to Galveston several days ago and on his return declined to discuss the cause of his visit to that city.

LEAGUE NATIONS MAY TAKE UP SOUTH AMERICAN DISPUTE

BUENOS AIRES, June 27.—The famous Tacna and Arica dispute involving Chile, Peru and Bolivia, is not the only South American problem which may go before the league of nations for settlement. There has existed for years a controversy between Paraguay and Bolivia over a strip of territory in the heart of South America as big as the state of California. This, it is understood, is on the program for consideration by the league.

It is probably not generally known that when the American peace experts under Colonel Hobbs collected their data on world problems for use at the Paris Peace Conference, they included a report on the issues between Bolivia and Paraguay over the possession of this territory, which is called on Bolivian maps the Bolivian Chaco and on Paraguayan maps the Paraguayan Chaco.

The case of the Chaco is known to have been also brought before the conference by the Bolivian peace delegate, Senator Montes. It was decided, it is understood here, to postpone the question for early settlement by the league.

Bolivia Ambition.

These problems hold for Bolivia, hemmed in on all sides by other states the realization of her greatest political and commercial ambition, her own territorial outlet to the sea. Possession of the port of Arica would give her an outlet to the Pacific, and, curious as it may seem, possession of the Chaco, or at least a part of it, would give her egress to the Atlantic.

For the Chaco borders the great River Paraguay, affluent of the River Plate, and on the Chaco side of the river, 2,000 miles from Buenos Aires, is a little port called Bahia Negra. Here ocean steamships from the United States and Europe could take on cargo transported across the northern edge of the Chaco from the Bolivian mines and farms.

But in the year 1886, a few years after Bolivia had lost in war the Pacific port of Antofagasta and was turning her eyes eastward, Bahia Negra was seized by Paraguay and has been in her possession ever since. Paraguay, furthermore, made land allotments in the Chaco, whose unsurpassed pasture and great quebracho forests were beginning to attract the white man.

A mysterious, unexplored land, stretching northward from the Pilcomayo River on the Argentine border and westward from the River Paraguay into undisputed Bolivian territory, it has not been directly crossed by white man since the days of the Spanish conquerors, since the year 1848 to be exact. Except near the rivers, it is inhabited only by savage Indian tribes to this day, but both nations looked forward to its possibilities, which recently have included that of finding petroleum.

Land Allotments.

Bolivia protested the seizure of Bahia Negra and also made land allotments in the Chaco. It is true that Bolivia had an eastern outlet already by the River Paraguay, but her commerce had to go through the Brazilian River port of Corumba, a little north of Bahia Negra, moving down from the Bolivian city of San Cruz by mule

team, along the northern edge of the Chaco, as it still does.

To uphold their claims both governments unearthened after many archives in Madrid dealing with the expeditions of the Spanish conquerors and the land grants of the Spanish Crown in South America. Various diplomatic negotiations have been initiated between the two governments from time to time looking to a division of the territory, but either one Congress or the other refused to ratify the agreements which the diplomats drew up.

The report of the American peace experts on the question was placed in official archives against the time when the league of nations was ready to take the matter up. Much of the material, it is learned, was supplied by a young American sent to South America to investigate and whose private opinion is that a logical settlement of the dispute would be an equal division of the territory, but which would give Bolivia her coveted port.

There are interesting possibilities in the settlement for those who have received land grants in the Chaco from one government or the other. Some of these are vast in extent. One citizen from Argentina has secured in Paraguayan grants sole title to an area larger than Holland and Belgium combined.

Depositors in the City National Bank of Commerce are conscious of the greatness of their banking institution. The promptness with which the details of their business is handled proves the high state of efficiency of the organization.

Vote For— COL. B. F. GEORGE

The business man's candidate for Representative to the State Legislature from Joint Legislative District.

Subject to the action of the democratic primaries, July 24th, 1920.

A big business man who never takes no for an answer. He has the diplomatic, executive and legal ability and will put over the legislation that all the people want. Consolidate rural schools and add commercial course. Improve the roads, exempt from taxation road and school bonds. Cotton and wool mills, conserve all flood waters for irrigation and commercial purposes. Pay the governor a congressman's salary. Reduce the present number of legislators about one-half. Secure the good state positions we are entitled to in our district.

He will co-operate with the people. The budget system for appropriating state money. (adv.)

TEACHERS WILL GET SUBSTANTIAL RAISE

New school laws enacted by the recent extra session of the 36th legislature will mean a substantial increase in salaries of Wichita county school teachers, according to information received by Burl Bryant, county school superintendent, from Miss Annie Webb Blanton, state superintendent of public instruction.

In speaking of the four million dollar appropriation, Miss Blanton says: "Please note that the purpose of this appropriation is to increase teachers' pay. Please do not let those patriotic teachers suffer, who made contracts before they were aware that this appropriation would be made, as they should not pay a penalty for having been willing to continue in the service of the public without waiting for better offers."

"The four million dollars will be apportioned to all schools on a per capita basis, she continued, and will be subject to the action of the school board of each district. The opinion was expressed by many members of the legislature that the most poorly paid teachers should receive the larger of the percentage of increase."

"The disposition of the additional funds, however, is left entirely to the judgment of each district school board," she said. "I cannot give out, authoritatively, any figures as to next year's per capita amount, but I receive the estimate that it will be \$12.50 to \$13. It may be more than this, if funds from the oil taxes increase, as they are given below, is merely approximate."

"Estimating the same percentage of increase in the scholastic census as for the previous year, we shall have a scholastic census of 1,250,000 children," Miss Blanton said. "The four million dollar appropriation would, then, give an increase of \$2.20 per child, at least \$1 per capita, can be counted upon from the free text book fund, therefore, with no increase in property valuations, we shall have a per capita apportionment of \$12.70, and I estimate that it will not be less than \$13."

Effective September.

The new code offers a choice of subjects for examination, provides for reciprocity with other states, and contains several new features recommended by teachers and superintendents.

State Superintendent Blanton says of the new certificate law: "It was worked out by several committees, and was amended in the course of passage. It has one or two regrettable provisions, in my opinion, but is a better code than the one at present in force."

The so-called "maximum salary law" was amended as relating to districts having no local tax, to permit the following salaries: to teachers holding a second grade certificate, \$190 per month; to teachers holding a first grade certificate, \$125 per month; to teachers holding a permanent certificate, \$150 a month. These amounts represent the maximum which teachers may receive, except from local taxation. This law is effective at once.

ANOTHER SUSPECT WITH 8 REVOLVERS ARRESTED

A second suspect in the burglary of the Quinn Brothers hardware store early in the week at Munday, Knox county, was arrested Saturday afternoon at Springtown by Deputy Sheriff Abe Willey and Tom Crab. The man arrested is believed to be a companion of the man arrested Thursday at Iowa Park. A suit case containing eight new revolvers was taken from the man arrested at Springtown. The suspect arrested at Iowa Park also had in his possession a suit case containing eight revolvers. Managers of the Munday hardware store report that sixteen pistols are among the merchandise stolen from their establishment.

Sheriff John Self of Baylor county and W. S. Britton of Knox county are in Wichita Falls and Sheriff Britton will take the two suspects in charge and return them to Knox county to face trial there, it was learned Saturday.

Sheriff Self of Baylor county asserts that he believed the two suspects were implicated in a series of thefts reported recently at Seymour and vicinity.

RECITAL WEDNESDAY NIGHT BY MISS BABER'S PUPILS

Mrs. J. M. Baber will present her pupils, Elizabeth Cole and Shumake Baber, in recitals Tuesday, June 29, at 8:30 o'clock at 1416 Eleventh street. The public is invited. Both little girls are accomplished musicians, and have many warm admirers in this city. The program follows:

Moonlight Sonata, Adagio—Beethoven; Consolation, Op. 30 No. 9—Mendelssohn; Rondo Capriccioso, Op. 14—Mendelssohn—Elizabeth Cole.

Sonatina, Op. 20, No. 2—Kublan; Pizzicato—Delibes—Shumake Baber; Impromptu, A flat, Op. 90 No. 4—Shubert; Spinning Song, Op. 67—Mendelssohn; Etude, Op. 130 No. 1—Raff—Elizabeth Cole.

Sonata in A Major, Theme, var. 1, 2, 3 and 4—Mozart; Minuet in A—Bach, Op. 14 No. 1—Paderewski; Under the Double Eagle, Op. 153—Wagner—Shumake Baber.

Berceuse, Op. 57—Chopin; Polonaise in C No. minor—Chopin; Spinnet—Liszt—Elizabeth Cole; Nardis, Op. 13 No. 14—Nevin; Grand Valse Brillante, Op. 18—Chopin—Shumake Baber.

Sonata Pathétique Allegro—Beethoven; Duet Polonaise in A minor—Chopin—Elizabeth Cole.

Duet, Foot and Peasant—Supple—Elizabeth Cole and Shumake Baber.

OFFICIALS RAID STILL IN BAYLOR COUNTY

Government and state officials headed by Deputy United States Marshal Jim Allen late Friday raided a still in Baylor county near the Knox county line, seizing 30 gallons of moonshine liquor. The still was hidden in a dense wood and had evidently been operated for several weeks.

Operators of the still had evidently been "tipped off" to the approaching raid as no persons were found in the vicinity.

Deputies in the City National Bank of Commerce are conscious of the greatness of their banking institution. The promptness with which the details of their business is handled proves the high state of efficiency of the organization.

Dental Notice.

My offices will be open on Saturday afternoons. Dr. J. S. Nelson, dentist, 34-tfc.

Fly with Hall today. Call Field.

HORNER COMPANY TO APPEAR CHAUTAUQUA

The Charles F. Horner Company is scheduled to furnish the main attraction at the Chautauqua grounds Sunday, both afternoon and evening. The company, organized and trained by Mr. Horner himself, is reputed to be the greatest musical and dramatic organization on any Chautauqua platform.

The personnel of the company includes 20 artists, every one of which is acknowledged by critics to be a leader in their profession. A number of these were recruited from the play houses of Broadway and were trained by Mr. Horner to suit his special needs.

Others were chosen from various sources because they possessed qualifications which fitted them for parts in the Horner company and without exception each actor or musician has developed into a star in the particular capacity in which they appear.

The company carries a complete set of costly scenery and stage settings in addition to their costumes and these features add greatly to the merit of the production.

In the afternoon the Horner company will present a short sketch and will be followed by Dr. R. E. Pattison Kline, who will lecture on "Strategic America." Dr. Kline is an economist who goes deeply into national subjects and deals with vital questions from an unbiased, non-partisan standpoint. He is a superb orator and enhances this with a forceful personality which gives added charm to his lectures.

In the evening the Horner company will again appear and present another of their plays, this to be in much the same order as "Nothing But the Truth."

PERFORMER HAS NARROW ESCAPE FROM DEATH

BURKBURNETT, June 26.—Ralph A. Miller, who has been performing the feat of escaping from a regulation straight jacket while suspended in mid-air here recently, had a narrow escape from death today, while doing his stunt on one of the high-est derricks in the town. The standard supporting the derrick on which Miller was suspended collapsed and his quick wit and presence of mind was all that saved him.

He had been securely laced in a regulation straight jacket and was starting to escape when the rigging began to snap. He freed himself in less than a minute and reached the ground just as the derrick collapsed. A crowd of about 300 witnessed the performance and several women fainted. Miller, however, was none the worse off for his narrow escape and said, "it's all in the day's work."

Appear At Your Best—Instantly

If you receive a sudden call or an unexpected invitation you can feel confident of always appearing at your best, in but a few moments it renders your skin a wonderfully pure, soft complexion that is beyond comparison.

Gouraud's Oriental Cream

FERD. HOPKINS & SONS

"Confidence of the Public Is A Great Asset to Any Business"

We believe success depends largely upon the quality of merchandise and it must be priced accordingly. **FAIR DEALING AND COURTESY** is the one and only plan in which to prove to our patrons that we are worthy of the confidence of which they have placed in us.

Summer Frocks

A Dress Special that represents the greatest values we have offered this season. In four different lots.

\$14.85, \$19.85, \$24.85 and \$27.85

You must see these dresses to fully appreciate the extent of the values. There are scores of charming styles to choose from—materials of Taffeta, Georgette Crepe, Satin and Crepe de Chine in all imaginable shades, plaids and checks, plain and flowered Voiles and dotted Organdies. We recommend early selection.

Organdie and Voil Blouses in Their Newest Versions

Possibly, because Organdie and Voiles are so airy, so light, so daintily colorful, they have endeared themselves to every woman's heart above all other materials for this summer's wear. These unusual attractive prices 98c to \$3.98.

WAISTS in Georgette and Crepe de Chine—specially made for summer service in the most comfortable and cool materials, and designed to give freedom without losing one jot of smartness. These would ordinarily sell at \$8.50 and \$10.50, **SPECIALLY PRICED at \$5.98.**

We also have a large assortment at **\$8.50 to \$18.95 LESS 10 per cent.**

PETTICOATS

Petticoats in all popular materials and colors **PRICED at \$4.25 to \$12.85 LESS 10 Per Cent DISCOUNT.**

Smartly Styled Separate Skirts For Summer Wear

A wonderful variety of styles and materials have come in with the new styles that we are showing for summer in skirts for sport or dress wear—Wash Skirts \$3.98 to \$11.50. **SILK SKIRTS \$13.85 to \$26.85 less 10 per cent discount.**

A Showing of the Season's New Bathing Suits

Indiana at Tenth St. Phone 3005. Entrance on Tenth.

The CHENEY

Adds to Enjoyment of Music

The Cheney Acoustic Throat like the human vocal organs, gathers and blends tones and overtones and releases them in perfect harmonic balance. Description cannot do justice to the clear vibrant beauty of Cheney reproductions.

The melody of a piece from grand opera may be whistled, but the harmony can only be brought out by a concert of instruments and voices. So, with The Cheney, all recorded music is made more beautiful because of the background of harmony which this wonderful instrument reveals.

By its original methods of reproduction, The Cheney restores each delicate shade and rich overtone, increasing the pleasure of playing your favorite selections.

authority could get done in the way of loading and unloading ships, some of which had lain there idle for months. The Governor has incurred the displeasure of some, including the city administration and the strikers at Galveston and those who can see in the Governor's action only an arbitrary assistance to capital as against labor. But we venture that outside of the city of Galveston itself, the proportion of approval to disapproval is about as ten to one because the governor was right and fair to the whole state, even if it may have been prejudicial to the interests of the striking longshoremen in Galveston.

With Other Editors

The President's Interview. (Dallas News.)

The democrats will escape the embarrassment of entering the campaign on the defensive, which is the natural and usual handicap of the party that has been in control of the government. If the San Francisco convention makes a platform and nomination, adopt the strategy sketched by the president in the interview given to the New York World. The President's statement, in tone and text, is aggressive to the last degree. Instead of defending himself against the assaults which republican orators and editors have made on him and his administration, the President seizes on them as an attempt to divert the mind of the country from the consideration of the League of Nations, and the performance at Chicago. What it is that he thinks they most wish to conceal, the President makes very clear. He reads their declaration on the subject of the League of Nations, not as an insistence on the Lodge reservations as a safeguarding qualification on the membership of the United States, but as the revelation of a fixed purpose on the part of the party's dominating minds to keep the United States out of the League of Nations, and to accomplish, heretofore most republican senators and most republican leaders outside of congress, as notably Mr. Taft, Mr. Root and Judge Hughes, have protested that it was the earnest desire of themselves and their party to have the United States enter the League of Nations, and in accordance with that assurance they have defended the Lodge reservations as necessary to make its entrance both safe and effective. The President cites their platform as proof either that they have recanted that purpose, or that they have deceived the country by professing that purpose without having had it. Thus the President seizes on the opportunity which the republicans have offered to make the issue much more fundamental and sharper than it was when Mr. Lodge welcomed the suggestion of the President, made in his Jackson Day letter, that the question of ratifying the League of Nations with or without the Lodge reservations be submitted to the country. Their task now is, not to justify the Lodge reservations, but to make a larger and more difficult one of defending themselves against the charge of intending to wreck what has been accomplished and to repudiate the pledge of the United States to join other countries in the organization of a League of Nations. That, under this fashioning, the issue is made much more advantageous to the democrats must be obvious. They are not under the necessity of trying to convince the country that the Lodge reservations, several of which collectively nullify the effect of the League, a task which they would not find easy of performance, and one on which they do not even enter with out impeaching a large number of their own leaders in and out of the senate. They have the much easier and safer task of stating to the country that the men in command of the republican party are irreconcilably opposed to having the United States enter the League of Nations under any conditions whatever. For proving that accusation, the performance of the Chicago convention supplies an abundance of evidence and the president has bid his party to seize upon it and make full use of it.

HOROSCOPE

"The stars incline, but do not compel." (Copyright, 1919, by the McClure Newspaper Syndicate.)

Sunday, June 27, 1920.

Jupiter rules strongly for good today, according to astrology. This way is dominant and all the influences should be stimulating and inspiring. Under this rule the mind should be alert and confidence should enable the accomplishment of difficult plans. Ministers of the gospel come to a planetary government that seems to favor their highest ambitions, although they must face disappointment and delays. Educators should profit by this configuration which is believed to aid practical ambitions and to inspire constructive measures. Jupiter is in the sign of Cancer, and this place most auspicious for business and commerce. This day has aspects that lift the mind to a state of high courage, imparting initiative and resourcefulness. Agriculture seems to have some sinister forces that may thwart the efforts of farmers and gardeners. A greater vogue than ever before will be attained for flowers and their cultivation will become one of the fashionable amusements of the winter. Again warning is given that the culmination of Mercury in square to Mars threatens libel suits in which persons who occupy high place will be involved. The stars that are supposed to impart an appreciation for color gain sway at this time when there is an extraordinary interest in painting. Appreciation and honors for the United States because of some wise diplomatic move are foreshadowed. Danger or accident to American women traveling in Europe is indicated. Persons whose birthdate it is may benefit unexpectedly, but they should not relax attention to business. Children born on this date will be very popular in all probability. These subjects of Cancer are likely to hold important positions and to attain success rapidly. Girls have the forecast of the most romantic career.

THE MENACE OF THE FLY

Dr. A. D. Patillo of the city board of health has made public the following statement regarding the common house fly: "Did you ever stop to figure on the dangers to come from the flies? Did you ever stop to figure what you have accomplished when you swat a single fly? Did you know that a fly was hatched and developed into a full grown adult in 14 days and that it is then capable of laying eggs itself?"

"Suppose we reckon that a single fly lays 10 eggs and that in 14 days these 10 flies lay 10 eggs each. We then have 100 flies capable of laying 1,000 eggs in 14 days. These 1,000 flies in 14 more days will lay and hatch 10,000 full grown flies and in 14 more days will lay and hatch 1,000,000 flies. Suppose these figures are multiplied by 10, for a fly will lay nearer 100 than 10 eggs. This will give 10,000,000 flies in two months and this is figuring only on the first generation, not taking into account the succeeding generations which these same flies may produce. "In this climate there are about eight months in which the fly is active, so it is apparent that the mathematicians will have to invent some more figures before the number of flies hatched in a single season by a single parent can be computed. "It is very essential to kill the fly and not be satisfied with merely driving him out of the house two or three times a day, hoping that he will go over to a neighbor. Your own kitchen or back door may smell worse than your neighbor's and that is what attracts Mr. Fly, for wherever there is filth and refuse Mr. Fly invariably stays. Don't forget that Mr. Fly usually likes things that have an offensive taste and smell to human beings. "Flies may be responsible not alone for typhoid fever, but for many diseases, pneumonia, influenza, diphtheria, whooping cough, scarlet fever, measles, small pox, chicken pox, pellagra, infantile paralysis, meningitis, bubonic plague, Asiatic cholera, Entero-Colitis in babies and many others which it is not necessary to mention. The fly carries germs on its feet and tongue from garbage pails, manure piles, toilets, etc. into the house, and there deposits them on the butter, in the milk, on the pie, or any other article of food which may be left uncovered. Keep all refuse or waste cleaned away. Try to starve Mr. Fly. Every woman should know that flies in the house are an unfavorable criterion as to her good housekeeping.

WHY?

Are the Months So Named? (Copyright, 1920, by Wheeler Syndicate, Inc.)

The names of all of our months, as we know them today, date back to the days of the Caesars and several of them show the influence of the belief in the pagan deities who were supposed to preside over the destinies of time and space. January is named from Janus, the two-faced god, in order to signify the idea that this month looked forward to the new year as well as back upon the old. February takes its name from the Latin februa, to purify, because in that month ceremonies of funeral purification were held in Rome. March was called after Mars, the god of war—presumably on account of its harsh, blustering weather—while April was derived from the Latin aperire, to open, this being the period of the year when the earth opens its bounty to the world and trees commence to bud. May was named for Maia, the goddess of growth, and the three following months—June, July and August—were named in honor of the three of Rome's famous men—Julius, Julius Caesar and Augustus Caesar. The Roman calendar originally began with March, the month which we know as September was seventh, and owes its name to this fact, as do October, November and December, which were the earlier Romans the eighth, ninth and tenth months.

Tomorrow—Why do hail-storms occur?

Just Folks

By EDGAR A. GIBST

Heart's Courageous. Courage is something which you may find

Wherever you go and in every It is being helpful and being kind. It is meeting the world with a smiling face. It isn't of gold or of high degree. It isn't God's gift to a favored few. Woman's as brave as a man can be. And a boy can shine with its glory, too. Hearts courageous are everywhere. The man who stands to his task by And does his best with his bit of care. And still helps others along life's way. Is doing all that a brave man can. Oh, the world is peopled with souls like this. Who are humbly serving some lofty With never a sigh for the joys they miss. Who are braver than mothers fair. Who go to the door of death and smile. With scarcely a moan for the pain they bear. And whose thought for themselves is the white? Courage is born of a thousand deeds. It throbs today in uncounted It is keeping up with the daily needs And ringing true with the sternest tests. It is playing fair when a trick would win. It is being friendly and kind and true. It is keeping clean when lured by sin. It is serving the many and not the few. It is keeping on when the goal you miss. It is being cheerful in spite of care— And when people are doing this Round about us and everywhere.

RIPLING RHYMES.

By WALT MASON.

The Winners. Have you read the helpful stories which are printed now and then, dish-tasting, dazzling, glories of the big successful men, that one made a million dollars, that one made a million seeds; so the awe-struck author holds up one living in a palace, built of pink imported rock, and from out a golden chalice he consumes his private stock. And I think it rather funny, and I think it rather the measure's always money, always the big man's wad. For there are some four-time winners, you have heard of once or twice, men who went without their dinners when they

Encouraging the Profiteer. Do you encourage profiteering? I can well imagine the indignation which that question would arouse, if you took it seriously. Encourage profiteers? Hardly! No more than you would encourage mosquitoes or the flu or—"crimson rambler."

LITTLE BENNY'S NOTE BOOK

By LEE PAPER

THE PARK AVE. NEWS. Spoats. The invisible wanted a little practice last Thursday afternoon and it was too late to go out to the park so a delegation was elected to go and see Flatfoot the cop and ask him if it would be all right to have a game of ball in the street perviding nobody break any windows, but Flatfoot looked so mad about something that the delegation waked rite past him without even stopping. Among those in the delegation was Benny Polts, short stop, Skinny Martin, pitcher, Puds Simkins, catcher, and Ed Wernick, first base.

Why Women Are More Willing to Bargain.

I think, as a rule, women are better about asking the price than men. Men expect to seem careful about money, while women, even women with some means, do not mind bargaining. I noted this very strongly in a couple whom I know, and fell to wondering about it and trying to work it out. My conclusion is this: Men's business is the getting of money and a man expects other people to measure him by the money he makes; therefore, he wants to seem free with money as if he made a good deal. Women, on the other hand, are the money-spenders, more than the money-makers. Their business is to get as much as they can for the money; therefore, they do not mind being bargain-hunters. Doesn't that seem reasonable to you?

MEXICAN AND AMERICAN COMMANDERS MAKE VISITS

EAGLE PASS, TEX., June 26.—Colonel Paul Giddings, commander at Camp Eagle Pass and General Jesus Morales, commander of the Mexican military district in Piedras Negras, exchanged social visits today. When the American commander entered the Mexican town he was greeted with the Star Spangled Banner played by a Mexican military band. The third infantry band played the Mexican national anthem as General Morales entered Eagle Pass, to return Colonel Giddings call. The incident caused much favorable comment on both sides of the border here.

JOHN N. SIMPSON, PIONEER CATTLEMAN, IS DEAD

DALLAS, June 26.—Colonel John N. Simpson, aged 75, pioneer banker and cattleman, died at his home here today. He had been ill two weeks. Smoke Peters' "Experience." For sale at all cigar stands. Stehlik & Baber, distributors. 345-tfc

THE PARK AVE. NEWS

Spoats. The invisible wanted a little practice last Thursday afternoon and it was too late to go out to the park so a delegation was elected to go and see Flatfoot the cop and ask him if it would be all right to have a game of ball in the street perviding nobody break any windows, but Flatfoot looked so mad about something that the delegation waked rite past him without even stopping. Among those in the delegation was Benny Polts, short stop, Skinny Martin, pitcher, Puds Simkins, catcher, and Ed Wernick, first base.

Why Women Are More Willing to Bargain.

I think, as a rule, women are better about asking the price than men. Men expect to seem careful about money, while women, even women with some means, do not mind bargaining. I noted this very strongly in a couple whom I know, and fell to wondering about it and trying to work it out. My conclusion is this: Men's business is the getting of money and a man expects other people to measure him by the money he makes; therefore, he wants to seem free with money as if he made a good deal. Women, on the other hand, are the money-spenders, more than the money-makers. Their business is to get as much as they can for the money; therefore, they do not mind being bargain-hunters. Doesn't that seem reasonable to you?

MEXICAN AND AMERICAN COMMANDERS MAKE VISITS

EAGLE PASS, TEX., June 26.—Colonel Paul Giddings, commander at Camp Eagle Pass and General Jesus Morales, commander of the Mexican military district in Piedras Negras, exchanged social visits today. When the American commander entered the Mexican town he was greeted with the Star Spangled Banner played by a Mexican military band. The third infantry band played the Mexican national anthem as General Morales entered Eagle Pass, to return Colonel Giddings call. The incident caused much favorable comment on both sides of the border here.

Warning to the Public

After a careful study of the typhoid situation by the Board of Health and the City Sanitary Department the conclusion has been reached that there is no specific cause, but several general causes of the epidemic, the most dangerous and likely one being that typhoid is carried by flies. One fly after having been around a typhoid excreta is able to distribute the germs over a large and varied area.

There are typhoid cases in our city where the patients have been using milk from their own or neighboring cows. The dairies have shown a disposition to co-operate, and it is not believed that the milk alone is causing all our present malady. There are some cases where milk perhaps is the cause.

The water company has shown an unquestionable disposition to eliminate all danger possible; however, there is some contamination. According to the city chemist's report only one water in town is shown to be free from contamination. A watchman with police powers is being instructed to act as sentry on the water ditch between the plant and lake. In addition to this, the water company is removing weeds from the water ditch.

The most dangerous carrier of typhoid, and one which the Board of Health is inclined to believe the most potent is the fly. There have been complaints made to the Department that it was a reflection on the intelligence of the people of our town to insist on "swatting the fly." Regardless of public opinion this attitude displays nothing but ignorance in the rankest form. The fly is even more dangerous than the mosquito. It cannot be emphasized too forcibly that this "agent of the devil" should be sent to the lower regions. Every citizen of our town can aid in this by removing all causes for flies and annihilating those already in existence.

The City Board of Health are designating one day next week as clean-up day. All city teams will be taken from the streets and used to haul trash or do other work to eliminate unsanitary conditions. A petition will likely be circulated to the stores of the town to close for at least one-half day. This will enable the employees as well as the employers to clean up their own premises.

Any aid which you may desire from the city or any condition which you feel should be improved, may be reported to telephone 15, 1909 or 2100. The name of the reporter will not be divulged.

The City Health Officer has ordered cards printed and placed on property which needs attention from a sanitary standpoint. These cards will be placed on such property without notification to the owner and without malice to him. They will be sufficient legal notice to have the premises cleaned of trash, garbage, weeds and other objectionable features.

ESPECIALLY IS THE PUBLIC URGED TO TAKE ANTI-TYPHOID INOCULATION. This can be had at a nominal cost and with practically no pain whatever. The process has conclusively proven beneficial and profitable, as demonstrated by every army of the country. Ask any ex-soldier if you want testimony.

The typhoid situation in our city is extremely serious. We now have about 60 cases within the city limits, and yet the usual season of typhoid is several months away. Unless every effort is made by individuals to take precautions for themselves and families we may expect a wave of this dangerous epidemic to sweep our town and have results equal to any influenza wave ever experienced.

M. O. McDOWELL, Health Commissioner.

M. M. WALKER, Health Officer.

JACK REEVES HOPES TO ADD "MYSTERY MAN" TO HIS LONG LIST

MORE EXPLANATIONS REGARDING INCREASE IN BATTING STRENGTH

Ehmke, Speaker and Collins Discuss Increased Slugging

Discussion continues on the hitting in the major leagues this season, and some interesting reasons have been introduced by close students of the game.

"As it is now," Ehmke says "a ball no sooner gets to a pitcher can use it effectively than a umpire throws it out.

Manager Tris Speaker of the Indians ascribes the increase in hitting to the fact that outside of the few spit ball pitchers, no hurler is allowed to tamper with the ball, saying that nearly every pitcher in the league last year was committing some illegal act in preparing the ball for a pitch to the batter.

"From Cicotte down, says Speaker, practically every pitcher was doing something to the ball he had no right to do.

Every Washington pitcher with the exception of Walter Johnson was imitating Cicotte, so says Sam Jones of Boston.

"I have been whirled around by hard hit grounders more often this year than ever before.

Eddie Collins, captain of the White Sox, and credited with being a student of the game, declares he is positive the ball is different.

On no other condition would he consent to the go although he was most anxious to meet Reeves. At Edwards, club manager, agreed. There are a lot of oil operators and oil workers who may recognize this Smith person—but they're supposed to be discreet about it.

It happens right along in the movies. You know how it goes—Young Hopeful leaves the grieving family's side to make his way; there are days of stress and nights of storm; then comes the opportunity; he seizes it; under an assumed name he enters the ring against Champion George Whoozie; he wins and goes home with the bankroll to a misty fade-out with the only girl.

That's the idea. It's old and hackneyed—in the movies. But in life it's something new, yes?

Well, that idea—the real goods and the whole truth—will be carried out from a slightly different angle down at the Camel Athletic Club Monday night when "Joe Smith of Denver" meets Jack Reeves from the coast in a 12-round bout.

"Joe Smith of Denver" happens to be a successful business man, one who has made a name for himself in the ring and is quite likely to give Reeves a rapid time of it as the Californian has had in his snappy ring career. But just now "Joe Smith of Denver" wants to be known only by that name.

On no other condition would he consent to the go although he was most anxious to meet Reeves. At Edwards, club manager, agreed. There are a lot of oil operators and oil workers who may recognize this Smith person—but they're supposed to be discreet about it.

It's a good thing Gibson's run in the eighth didn't bring any material difference in the score. Sentell doesn't miss them very often, but it is our opinion that he missed that one.

Brown turned in the fielding gem of the day when he speared Miller's drive in the ninth with his bare hand and held the clot to a single.

Freddy McDonald has set a new Texas League record and he's still going strong. Including yesterday's game he has hit safely one or more times in the last 24 games. He became his long run in Dallas July 4 and no pitcher has been able to stop the Buff infielder yet. Silva held the previous record with 21 consecutive games.

Carl Stoeker, one of the popular Stoekers Bros. who run the "buisest cigar store in town," which store, by the way, is the mecca for the players after the game, left for Shreveport last night to run another scoreboard. He is interested in the Aldrome board here and thinks that the Gasser fans are now ripe for entertainment while the team is on the road.

Wonder what was the matter with "Babe" yesterday? The Yankees crossed the pan 14 times, but we didn't see Ruth's name in the headlines. Rip Collins, former Texas League, captured all the honors. The eastwile Marine held the Red Sox to 1 lonely bingle.

It wins in a big year for the Crimson. They topped everything off by winning the baseball series with Yale yesterday 6 to 5.

"JOE SMITH" WHO MEETS JACK REEVES AT CAMEL ATHLETIC CLUB MONDAY NIGHT, HIDING IDENTITY

"JOE SMITH," OF DENVER

It happens right along in the movies. You know how it goes—Young Hopeful leaves the grieving family's side to make his way; there are days of stress and nights of storm; then comes the opportunity; he seizes it; under an assumed name he enters the ring against Champion George Whoozie; he wins and goes home with the bankroll to a misty fade-out with the only girl.

LASKER GIVES UP CHESS CHAMPIONSHIP TO CUBAN

AMSTERDAM, June 26.—The decision of Dr. Emanuel Lasker to yield his title of world's champion chess player to Jose R. Capablanca, the Cuban expert, instead of playing a

match they had arranged, was made known in a letter he wrote Capablanca, in which he said: "From various rumors I must infer that the chess world does not like the conditions of our agreement. I can not play the match knowing that its rules are widely unpopular. I therefore, resign the title of world's

champion in your favor. You have earned the title, not by the formality of a challenge, but by your brilliant mastery. In your further career, I wish you much success."

The officers of the City National Bank of Commerce intend to give every customer a full measure of service regardless of the size of the depositor's balance. That is the reason the City National Bank of Commerce has taken a place prominent in the city's financial world.

"THE SATISFACTORY STORE"

TEXAS ATHLETES ARE AMONG LEADERS IN TRYOUT FOR OLYMPICS

NEW ORLEANS, June 26.—Texas Athletes made a wonderful showing at the Olympic tryouts held here today. Athletes from all over the South competed in an effort to win places on the team that will be sent from the South to participate in the final tryouts.

Only one southern record was broken in the Southern Olympic tryouts at Tulane Stadium today. This was made by Lenon of Dallas, with a jump of 22 feet 8 inches in the running broad jump. Lenon was one of the stars of the tryouts.

Coughlin of Sewanee ran a fine race in the 440 yard hurdles, going over the stick in 23.5 seconds. Wolf, Baylor, who won both sprint, while Skidmore, Sewanee, won two weight events.

Summary. One hundred yard first, Wolf, Baylor; second, Wilson, Baylor; third, Stack, St. Stanislaus, time 10 3-5.

120-yard high hurdles; first, Moss, Texas university; second, Frazier, Baylor; third, Mauer, V. M. I., time 13 seconds.

Hammer; first, Phillips, St. Stanislaus; second, Mauer, V. M. I., distance 118 feet, six inches.

High jump first, Barker, Dallas A. C.; second, Chisholm, Birmingham A. C. (two starters) height 5 feet 9 1-2 inches.

100 yard run; first, Bredland, Y. M. G. C., New Orleans; second, Montgomery, Y. M. G. C., New Orleans; (two starters) time 4:41.

Shot put; first, Dodson, Baylor; second, Bentz, Y. M. G. C., New Orleans; third, Mauer, V. M. I., distance 41 feet 7 1-2 inches.

440 yard hurdles; first, Coughlan, Sewanee; second, Frazier, Baylor University, time 49 3-5.

220 yards; first, Bold, Baylor University; second, Stack, St. Stanislaus, time 22 4-5 seconds.

Javelin throw; first, Butler, Louisiana; second, Phillips, St. Stanislaus; third, Meehan, Dallas A. C.; fourth, Mauer, V. M. I., distance, 162 feet.

Running broad jump; first, Lenon, Dallas; second, Kinckle, Rice; third, Butler, Butler, La., distance 22 feet 8 inches (new southern record).

Pole vault; first, Browns, Texas; second, Ives, Louisiana State; third, Young, Independent, distance, 1: foot 9 inches.

Running hop, step and jump; first, Lenon, Dallas; second, H. Johnson, Y. M. G. C., Dallas, distance 22 feet 30 3-4 inches.

10,000 meters not run.

Sport Comment By Paul W. Larkin

Fuller will step to the plate at 2 o'clock tomorrow. In the future all Sunday games at Athletic Park will be called at that hour.

It was a case of going to the mill once too often. Burch had made monkeys out of his former teammates all year until yesterday. He can't turn 'em back all the time.

Fincher clinched his own game with a slashing double. It's pretty hard to beat that boy when he's right—an he's right most of the time.

Frank Kitchens can't get away from the Bell Tailoring sign in left to save his life. His double bounced off the sign yesterday and Frank is to collect 25 more iron men.

It's a good thing Gibson's run in the eighth didn't bring any material difference in the score. Sentell doesn't miss them very often, but it is our opinion that he missed that one.

Brown turned in the fielding gem of the day when he speared Miller's drive in the ninth with his bare hand and held the clot to a single.

Freddy McDonald has set a new Texas League record and he's still going strong. Including yesterday's game he has hit safely one or more times in the last 24 games. CLUB MANAGERS ON WORRIED LIST DUE TO EXCESSIVE GAMBLING

Followers of Chance Around Texas League Circuit Go Unmolested

Now that the Texas League clubs have gotten away to a new start, it is to be hoped that the league moguls will use a little concerted effort to wipe out the taint of gambling that is fast becoming linked with the pastime around the circuit. The big leagues have a fairly good grip on it now and the recent action taken in the Pacific Coast League shows what can be done if the men higher up go at it in the right way.

Gambler among the Texas League circuit are having things just about their own way and it is a well known fact that those mixed up in the actual game itself are indulging to no little extent.

No evidence has cropped up as yet around Wichita Falls that the men are being tampered with, but such evidence has cropped up in at least one other city. It is quite a temptation to a player to grab off a goodly sum for a dumb play or an error at a critical moment. Players have been offered sums far in excess of their monthly salary to bet a game, but the vast majority have turned the offers down. A few hundred means practically nothing to some of the gamblers around the circuit, and if they get a chance to slip once, they have him on the hip for all time. The players are not the only ones who have been approached, either.

Every club manager is on the worried list for fear his men are going to slip, as they never can tell whether or not the man has been bought. Something ought to be done and done quickly, before the game is ruined. That there will always be betting on all kinds of sports is a foregone conclusion, but there is no sense in allowing it to assume such huge proportions.

WICHITA FALLS IS PROBABLY SIXTH CITY

(Continued From Page 1.) three years the city more than doubled its population again. Public Improvements. Wichita Falls has just caught up far enough with its growth where it can look around a bit and see what ought to be done. That is what the leaders in Wichita Falls are doing and a great amount of public improvements is being outlined. Expansion of the city's industries is also being carefully studied and a program for strengthening the city will carry Wichita Falls steadily ahead. It is expected that the proposed irrigation system will be one of the big factors in the future growth of Wichita Falls. It is believed that the irrigation system will assure the permanency of the prosperity of a much larger population than Wichita Falls now has. Wichita Falls' growth in population has not exceeded, and in many particulars has not equaled the growth of the city in other things. Wichita Falls has grown to be the leading financial, wholesale, railroad and manufacturing center in Northwest Texas. In several of these things it ranks higher than any other city of Texas, and its rank in population, Wichita Falls is confident that it will continue to move forward in all these things.

THE SIXTH BIG TEXAS CITY

When things are runnin' ragged, And the world's a slipshod place, When in various business matters We have made a mistake, Then we like to chew this cheerin' cud And sing this comfort ditty: Wichita Falls, the census shows, Is the sixth big Texas city. The fact's well known to most folks That it makes a small town rub. Likewise a "village hick," And that's why the report to us is so doggone cute and pretty: Wichita Falls, the census shows, Is the sixth big Texas city. It wasn't the oil we found That boosted the good old town— That was a help, but what counted most Was a spirit that wouldn't down, Which is why the factory men today, And the merchants sing this ditty: Wichita Falls, the census shows, Is the sixth big Texas city. All things come to him who waits, And the old town waited long For a chance to exercise its lungs In a population song. So don't blame us if we chortle a bit, At others' expense grow witty: Wichita Falls, the census shows, Is the sixth big Texas city. The time may come (we hope not) When we won't have much to say, So we're grabbing the chance we've won To roar: "This is our day!" And the whole darn town's a-rarin' to go. To join in the jubilant ditty: Wichita Falls, the census shows, Is the sixth big Texas city.

SKY PILOT "MOONSHINERS" PUZZLES FEDERAL OFFICERS

DALLAS, June 26.—Federal prohibition agents moved today to curb suspected distribution of liquor by airplanes. A professional pilot was held at Dallas pending investigation. His detention came following evidence of distribution of liquor by airplane. The pilot was held at Dallas pending investigation. His detention came following evidence of distribution of liquor by airplane.

BURNEY APPOINTED RECEIVER OF TWO ATHLETIC CLUBS

KANSAS CITY, MO., June 26.—Judge Clarence E. Sponting appointed receiver for the Kansas City Athletic Club and the Athletic Building Association, the club's building corporation. Louis P. Rothchild and Howard Fitch were the receivers named to assume charge of the club's affairs including the incomplete building at Eleventh and Baltimore.

KITTY GORDON ENDS JOE HACK'S STAGE DAYS

CHICAGO, June 26.—Kitty Gordon, actress and sister-in-law of Lady Decies, who accidentally shot Joe Hack, another actor, during her act in a theater here yesterday, ended Hack's stage days, here and in hospital, where he was slowly recovering. Hack is a "hand balancer" in an acrobatic troupe, and the bullet pierced through his arm as he raised his feet in the air.

EMIL BERLINER, OF WASHINGTON, FIGURED PROMINENTLY IN THE EARLY DEVELOPMENT OF THE TELEPHONE, WORKING WITH HIS SON HARRY A. IN endeavoring to perfect a helicopter, which is an airship ascending and supported in the air by revolving horizontal blades, and they have been encouraged to a degree which leads them to hope for ultimate success. They have built a machine which weighs 570 pounds and is equipped with an eight horsepower motor.

BRIGANDS KIDNAP AMERICAN CITIZEN

BOSTON, June 26.—Confirmation of the reported kidnapping of Mrs. Harriet F. Nilson by brigands at Tarsus, Cilicia, was received by the American board of commissioners for foreign missions today in a cable from its Constantinople office. Mrs. Nilson is the wife of a missionary, the Rev. Paul E. Nilson, and taught a mission school in Adana, Turkey, for several years before her marriage. She is a native of Illinois and as Harriet Fischer was graduated at Wheaton college in 1912. The average airplane has lift of only eight pounds per square foot, while tests of the Berliner machine shows a lifting capacity of sixty pounds per square foot, while the Berliner machine shows a lifting capacity of sixty pounds per square foot of effective lifting surface. When this machine is tilted forward it will fly horizontally and its tilting is accomplished by changing the centre of gravity. Tests made with some machines built on this principle have done very good stunts in the way of lifting, but while it is not regarded as a practical success at this stage of its development, it is looked upon as a very important step in the advance which may lead to important developments. Extensive Water Power Development in Italy the authorities are planning the electrification of 3736 miles of railroad, Portugal plans to electrify all its railroads, South Africa and South America are also interested in hydro-electric developments.

POLITICAL HAND BILL IS DISTRIBUTED HERE

What friends of Neff, Thomson and Looney say is a patent and gross attempt to stir up prejudice against the candidacies of these men appeared in Wichita Falls Saturday in the form of a hand-bill printed in red ink. The bill bore the following: "Are you a union man? Then vote for Neff or Thomson or a vote for Looney will put the open shop in Wichita Falls. It will mean labor will rule in Texas, and not the so-called public business men or business interests. Vote right, let labor rule in Texas." The circular bears the signature of "Labor's political league in Texas campaign committee." It could not be learned Saturday night who had been responsible for the circulation of the hand-bills here. The bill was designed not to influence members of labor organizations in favor of Neff, Thomson or Looney but rather to stir up prejudice among those who do not belong to labor organizations against them.

CANDIDATES SHOW NO GAIN IN STRENGTH

SAN FRANCISCO, CALIF., June 26.—The forces at the Democratic national convention move into position for the opening Monday there is apparent no more definite alignment of strength for candidates than there has been since the last caucus. W. J. Bryan epitomized the situation in language with which most observers seemed to agree. "There will be a lot of tickets put up and put down before this convention nominates one," he said. The closing hours of the pre-convention sessions are much the same as characterized the last minute processes of the republican convention. There is a marked similarity in many respects. Seven hundred fifty-six of the ten hundred and twenty delegates are uncommitted. Their personal preferences cannot be assembled in composite review. It seems certain some balloting on the convention floor will be necessary to disclose the lines of strength and weakness, clear the ground of favorite sons and complimentary candidates, and narrow the situation down to the real contenders. Small strength. No democratic candidate comes with any such showing of pledged strength as was brought to Chicago by Woodrow Wilson. But as at Chicago, the situation at the opening reveals about a rivalry on issues rather than for the moment on candidates. How much influence W. J. Bryan will have on the making of the party's platform and its choice of a candidate will be shown soon after the opening session of the convention Monday. The first evidence of how much of a force he will be, will come in the making up of the resolutions committee, which will draft the platform and in the choice of the permanent organization of the convention. Issues will bring about a direct contest between the administration and Mr. Bryan's forces. If Mr. Bryan finds on the resolutions committee a majority of men sympathetic with his views on prohibition, the league of nations or other questions, the chances of a fight at the outset will be minimized. If the administration control and insist on a declaration for the league of nations or other questions, the chances of a fight at the outset will be minimized. If the administration control and insist on a declaration for the league of nations or other questions, the chances of a fight at the outset will be minimized.

WICHITA FALLS MALE CHORUS ORGANIZED

The Wichita Falls Male Chorus was organized last Friday night, and the following officers elected: E. C. Huckabee, leader; Baldwin Moninger, vice president; Milton Johnson, secretary; and H. S. Gordon, secretary-treasurer. There are some very good voices in the chorus, and it is hoped that music will be given some rare treats in the near future. Several numbers will be given today at the First Methodist church, 217 Commercial building. It is the intention to make the chorus larger than it is at present and those desiring to join will please take the matter up with E. C. Huckabee, First Methodist church, or Harry S. Gordon, 217 Commercial Building. The following members were present at the meeting Friday night: Jim E. Chambliss, E. J. Crow, J. S. Gordon, E. C. Huckabee, Harold E. Johnson, Milton Johnson, Wallace E. Lowry, W. O. Masscott, R. D. Madgett, Baldwin Moninger, Joseph H. Morgan, R. W. H. McCulloch, L. L. Smith, Paul von Allman, W. W. Weeks and Ambrose Yeager. J. P. Roadhouse, acting vice-president of the First National Bank of Burkburnett, has ended his vacation in Illinois and other points.

KNIGHT BOARD MAKES LIST OF WAR AWARDS

WASHINGTON, June 26.—Except for the addition of new names, practically no change has been made by the Knight board in the original list of recommendations for award of war service decorations, members of the board said today. The board was reconvened by Secretary Daniels more than six months ago to reconsider its recommendations after the medal awards controversy between Rear Admiral Sims and the naval secretary which resulted in a senate investigation. The board's second report was submitted to Mr. Daniels last week and left for San Francisco to attend the democratic convention and he has not yet thoroughly examined it. When he returns to the office, the secretary said he would transmit the second report to the president without amendment. Original Plan. Members of the board said that in the new list they had followed their original plans with regard to officers whose names had been recommended for medals or mines, each case having been decided on its merits. Of the 10 officers in this group, only six of whom were in the original list, were recommended for the Distinguished Service Medal on the original list. Secretary Daniels changed these awards on the second list. Although Mr. Daniels added approximately 30 names for award of the Distinguished Service Medal, and more than 100 for the Navy Cross, many of these, it was explained today by members of the board, were officers and enlisted men who engaged in post-war mine sweeping operations and whose claim for honors did not come before the board when the first list was prepared. Practically all of these have been added to the second list, it was said, as have others whose records were available for the first time.

SOCIETY AND CLUBS

BOONE DUTTON AND MISS BETT WISDOM WED. A very pretty home wedding was solemnized last evening when Mr. Boone Dutton and Miss Bett Wisdom were united in marriage. The ceremony was performed at the home of the bride's parents, Mr. and Mrs. W. J. Bryan. The bride was accompanied by her father, Mr. W. J. Bryan, and the groom by his best man, Mr. J. P. Roadhouse. The wedding was a simple but elegant affair, and the couple left for their honeymoon at the home of the bride's parents.

TEXAS DELEGATION ARRIVES FRISCO

By W. C. EDWARDS, Times Staff Correspondent. SAN FRANCISCO, CALIF., June 26.—A tired but happy Texas delegation arrived here at 8 o'clock tonight and opened headquarters immediately at the Argonaut hotel. There is an evident firmness and solidarity among the forty delegates from the Lone Star state that was lacking prior to yesterday's caucus. All talk of second place choice has been abandoned. A good deal of talk of William G. McAdoo has been renewed and Texas has reiterated its determination to present McAdoo's name to the convention. The steering committee, originally comprising nine members, has been increased to twenty and divided equally between the district delegates and the delegates at large. This action came after several of the district delegates had started an insurgent movement against what they termed the "hogish plans" of the at-large delegates to grab all the honors in eight. The convention will be held here tomorrow morning and delegates further differences, as some of the district delegates are demanding that at least one of the at-large appointments be accorded to them. It is more than likely the demand will be granted for necessity, if not from courtesy, as the district delegates have thirty-six of the forty votes. W. A. Palmer, of Canadian, is the panhandle member of the enlarged delegation. An unexpected feature of today's journey was the reception at Oroville, for which Gov. Hobby and Cone Johnson expressed the delegation's thanks.

KEMP STUDIES CAL. IRRIGATION SYSTEM

By W. C. EDWARDS, Times Staff Correspondent. SAN FRANCISCO, CALIF., June 26.—J. A. Kemp, prominent Wichita Falls banker and business man and a delegate to the Democratic convention, is quietly keeping both eyes on the all matters affecting irrigation—a subject that is especially interesting to him as he is the recognized "father" of the huge irrigation project now under way in Wichita County, Texas. "The Sutter Basin Company, which has 60,000 acres under irrigation in the Sacramento valley, has already spent \$170 an acre in getting water onto the land," he told the Times representative today, "and we will attain the same results in California. It is a magnificent project at an expense of not over \$35 an acre and with a plant capable of irrigating 100,000 acres." Mr. Kemp made the statement after an investigation at the office of the Sutter Basin Company, which is headed by Ogden Armour of Chicago and which has 25,000 acres planted this year to barley, wheat, alfalfa and other crops. He is expected to ship four or five hundred crows this year. The Sacramento valley had eight inches of rainfall last year. Mr. Kemp said, "and their surface rainfall is not a factor whereas we have very material assistance from rains in normal years in the Wichita district." Mr. Kemp is a member of the Sutter Basin Company, which is headed by Ogden Armour of Chicago and which has 25,000 acres planted this year to barley, wheat, alfalfa and other crops. He is expected to ship four or five hundred crows this year. The Sacramento valley had eight inches of rainfall last year. Mr. Kemp said, "and their surface rainfall is not a factor whereas we have very material assistance from rains in normal years in the Wichita district." SALVATION ARMY PLANS SERVICE FOR EVERY PERSON IN NEED

"Service that will reach every person in the nation, who is laboring with some form of personal need," sums up in a clause the spirit of the Salvation Army home service program for 1920, according to Lieut. Col. George Wood, at the head of the division composed of Texas, Oklahoma and Louisiana, with headquarters in Dallas.

"It is a demand that the Salvation Army is meeting when it thus offers to every community its home service program," continued Colonel Wood.

"The Salvation Army in this program is offering its 16 major activities without any strings. The demand is two fold. First, because it is an ethical one upon the army; second, it is an insistence upon the part of the public, and therefore the program is nothing more than an enlargement of the army's present activities. Effort is rapidly going forward in this division toward the establishment of the home service in each county and I venture that by the early fall nearly every county in the division will be actively co-operating with the Salvation Army in this form of social endeavor."

It is further explained that in its present program the Salvation Army is not changing its long-established policy but is merely widening its efficiency and seeking to be of broadest possible individual and community service—bringing to each center all of the 16 major activities and making them available for its practical use, particularly for the cure of individual and collective distress.

Emergency Organization.

In this connection attention was called to the emergency bureau and its work, wherein in the event of disaster, floods and the like, the Salvation Army has a well defined and well organized department to take care of such emergencies.

To put the program into effect advisory boards composed of leaders of the county are established. These boards, which are the outgrowth of purely voluntary effort upon the part of the community, act as the official representatives of the Salvation Army in home service work. The functions of the board are to keep vigilant lookout for cases that come under the program service. It was added by Colonel Wood that the Salvation Army does not obtrude itself upon any community, but offers itself and its service, leaving the determination as to service entirely with the citizens. If the opportunity afforded by the Army and its institutions is accepted, a board is organized. No new corps are established unless an invitation to do so is extended or an adequate demand is apparent.

The program offers the facilities and functions of such institutions as the Maternity and Rescue homes, the industrial homes for men, the working men's hotel, the Anti-Slavery bureau which it is stated has done wonderful work, the bureau of missing persons, young women's boarding homes and other advantages of that sort.

It is further explained, for instance, should a youth feel that his country home falls short of what he thinks should be his opportunity and the city calls him, the Salvation Army then has a function to perform. The youth has the advantage of a home or hotel of the Army and also the service of the free employment bureau. Indeed, every safeguard and help that experience in such cases has taught the Army are at his disposal. Or should a girl seek a wide world of the city she has at her command the girls' boarding homes—institutions which are declared to be homes, indeed. She may be given every safeguard and facility to gain employment and live well and economically at the same time.

Maternity Homes.

In San Antonio and El Paso are maternity homes which serve this territory. The girls range in age from 14 to 23—the average age being close to 16 years. They are not all of the "primrose" path, but many are daughters of good families. It is the policy of the army to require that the prospective mother agrees to keep her child with her and after it is born she shall remain in the home for three months at least.

"When she is ready to go out into the world, she is given employment if it is necessary and otherwise helped to make a comfortable and respectable living for herself and child. It was remarked by Colonel Wood that a very small percentage of the girls who have left the home here have gone astray. Stories of deeper and more touching interest than fiction are related by the score, and more than one home in this state owes its happiness to the care and foresight of the officers of the Maternity home.

The missing friends' bureau has accomplished what might seem to be

marvelous things. In finding men, women and children. Husbands have been restored to wives and families, boys and girls to their parents and many tragedies of the "saddest way" have been averted for girls with a too keen sense of false pride, or fear to let their parents know of failure.

"There is hardly an erroneous social condition with which the Salvation Army has not come in contact during its 45 years in this country," concluded Colonel Wood. "There is hardly as well, a single phase of distress for which the Army has not some specific remedy. Therein do we feel that by experience and especially through the earnest desire to serve is the Salvation Army equipped to give to the Nation a home service that is all the expression implies. We are grateful to be able to offer such service."

ODD FELLOWS WILL CONFER DEGREES MONDAY NIGHT

The Odd Fellows will confer the Third Degree upon a large class of some 25 candidates at the hall tomorrow night, and at the first meeting in July, it is fully expected that the work will be conferred upon a class almost as large as that which has taken the work this month.

At the last meeting of this lodge, the committee on by-laws submitted a greatly changed set of by-laws, and it was put on its first reading. As this is of such vital importance to the membership, it is much desired that every member be present to hear this read tomorrow night, and that they likewise be present at the first meeting in July when it will have its final reading. The new by-laws provide among other things that the dues be slightly adjusted, and the coat to get into the lodge will be materially raised, but in addition to these extra costs, the benefits for sickness or death will be much larger, and it is felt that the new by-laws in substance as made will be of great benefit to the lodge here.

The Odd Fellows have also appointed a committee to look into the possibilities of securing a building site, and it is thought that it is not at all improbable that within the course of the next few years the Odd Fellows will be owners of a fine home here which not only the Odd Fellows but the whole city may well be proud.

PLAN TO INSTALL MODERN PLAYGROUND APPARATUS HUFF-MCGREGOR PARK

A second meeting of the families living between Brook, Broad, Fifth and Eighth streets was held Friday evening at the home of Mrs. Dell Shoemaker, 513 Holliday. Although the greater part of the evening was devoted to a social program, yet some attention was given to plans for securing civic improvements and a playground for the children of that community. George Dobson, superintendent of streets, was present and pledged his support in the movement to establish a recreation center in that part of the city.

Present plans call for the installation of several pieces of playground apparatus in the Huff-McGregor Park on Sixth street, provided satisfactory arrangements can be made with the city authorities. A meeting to discuss this project has been called for next Thursday evening, July 1, at the home of Mrs. Shoemaker, neighborhood chairman. In order that a definite program of work for the entire community may be started at once, every family in this district is urged to attend this meeting.

All of our best \$1.50 silk ties placed in one lot at each \$1.00.

VAUDEVILLE

Amusement Calendar for Coming Week

MOTION PICTURES

THE OLYMPIC, WICHITA FALLS' LARGEST AND HANDSOMEST THEATRE OPENS ON JULY 1

Wichita Falls' largest theatre will be opened Thursday, July 1 when the initial presentation of Mary Pickford in "Suds" will be made at the Olympic, 900 Indiana. Finishing touches are being made and everything will be in readiness by Thursday. The appointments and fixtures of the new theatre are tasteful and pleasing. The color schemes and decorating has been carefully selected and no expense has been spared in obtaining for the entire house the best equipment possible. The walls are painted and are finished in light brown with borders and trimmings in white. The ceiling is in the same paneled style and is finished entirely in plain white. In arranging the seating, care was taken to place all seats that an unobstructed view of the entire screen might be obtained from any part of the house. The seats themselves, of which there are 1650, are all cushioned and upholstered in green leather. Four large chandeliers will be in attendance at all shows and will see to the seating of patrons.

The ventilation of the Olympic will be as thorough and complete as possible. Two typhoon ventilating systems have been installed and these with the aid of twenty-five wall fans will insure a constant purification and circulation of the air. Another distinguishing feature will be found in the large orchestral organ which has been installed and which will furnish music at all shows. This instrument combines all the features found in a full symphony orchestra and as is said to be the largest in this part of the state an abundance of good music may be looked for in the projecting room the same high quality which characterizes the rest of the house is to be found. Two simple spot light and various other features will be used, all designed to give the highest degree of efficiency possible. Another factor which will contribute to the popularity of the new show place is the rest room which is located on the second floor. This is a large room, artistically decorated and furnished with easy chairs, lounges, tables and other articles of comfort. Here line and theatre parties may assemble and wait for the beginning of the program but it is not restricted to this alone and will serve as a waiting room for all who wish to avail themselves of its privileges. This room as well as the whole theatre is fireproof throughout and the opening shows are expected to draw large crowds.

WICHITA POLICY PROVING POPULAR

1920 Revue and Pantages Vaudeville Summer Attractions at Theatre

The 1920 Revue of 22 people and the big Pantages road show program of vaudeville which is the week's offering at the Wichita is daily proving popular with the many patrons that fill the theater each night. For the first three days of this week the 1920 Revue will present a musical western farce comedy, entitled "The Boss of Bar Z Ranch." This skit will prove quite novel and different from anything which has been seen at this theater for many weeks. It will be a specially costumed frivolity featuring Billy Maine as "Old Doc Rye," a character which is bristling with cleverness and is very capably handled. New chorus numbers and song specialties will be interwoven throughout the piece in keeping with the western atmosphere. Elder's orchestra continues to furnish a splendid musical program at each performance with the movies which make up an afternoon and evening program well worth a visit to the Wichita theater.

DR. JEKYLL AND MR. HYDE EMPRESS MONDAY AND TUESDAY

John Barrymore has added another to the list of remarkable dramatic portrayals that he has been offering on the stage and screen during recent weeks. The vehicle is the photoplay version of Robert Louis Stevenson's famous story, "Dr. Jekyll and Mr. Hyde." It will be shown at the Empress theater Monday and Tuesday.

The story, as is well known, has as its central character a young London physician, Dr. Jekyll. He discovers a fluid by which he can transform himself into a wicked creature, Hyde—the bad side of man's nature in a human body. The liquor also allows Jekyll to regain his normal form at will. Gradually Hyde gains the ascendancy over Jekyll, and the unfortunate doctor, to save the innocent girl to whom he is betrothed, takes poison.

The appearance of Mr. Barrymore in the picture, of course, recalls the late Richard Mansfield's success in the stage version of the classic. The films, with their ready and clever resort to "double exposure," make the story more convincing, especially in the scenes showing the transition from Jekyll to Hyde and vice versa. The understanding of his role is perfect. He imparts a sincerity, as well as a keen sense of dramatic values to his portrayal that makes it unique in modern film literature.

Martha Mansfield is wholly adequate as the innocent, fragilely beautiful Millie, and the rest of the company also strikes a high standard. Clara Beranger adapted the story from the original, and John S. Robertson directed. It is a Paramount Artcraft picture.

The Telephone Day.

A chart representing the telephone business of the average day shows that from midnight to 6 a. m. business is small and getting smaller; that as the retail stores and other "early" businesses begin to shake off their slumbers it starts to mount. As offices open and clear for the day's action the rate of increase gets faster and faster, until in the one hour between 9 and 10 the calls are three times as numerous as during the 60 minutes immediately preceding. As the day's business gets into full swing with everybody at work calls continue to increase thought at a much less alarming pace; and the peak-load for the day is carried by the hour between 10 and 11, with 428,000 calls in New York city.

Card of Thanks.

We wish to express our heart-felt gratitude to our friends who so kindly ministered to our beloved husband, other and brother during his recent illness and death, and also for their words of sympathy and beautiful floral offerings. Respectfully, Mrs. T. W. Zeigler, Mr. and Mrs. Herbert Zeigler, Leroy Zeigler, Mrs. Herbert Little and relatives.

Notice.

Drs. Pattillo and Collard announce the removal of their offices from 402 First National Bank building to 607 S. 9-10 City National Bank building. Phone 222.

JOHN BARRYMORE and MARTHA MANSFIELD in a scene from "DR. JEKYLL and MR. HYDE" A PARAMOUNT ARTCRAFT PICTURE

SHOWING AT THE EMPRESS THEATRE MONDAY AND TUESDAY.

KESSLER ADVOCATES BUILDING OF BEAUTIFUL CITY PARK

Emphatic approval of the plan for a park at the intersection of Holliday road and Holliday creek was voiced by George E. Kessler, city planner, following a visit to the proposed site. The tract is that selected by the business council committee for a tourist camping ground and park.

"I think the city should acquire this site without delay," said Mr. Kessler. "It is admirably adapted for park purposes, and can be made into a most attractive place. Comparatively little space would be needed for a camping ground, and the remainder can readily be transformed into a very pretty park."

"It is time for Wichita Falls to be locking more sharply to her park situation. This particular tract would make a splendid municipal golf course, such as are being established in many cities, and it would be a wise thing to acquire it for that purpose. In cities where such golf courses have been established, folks soon get away from the idea that it is a rich man's game, and you see people from all walks of life, who can get at nominal expense the recreation and exercise that a game of golf gives. I think Wichita Falls is plenty large enough to be giving some attention to such a matter."

ought to be made a public playground for all the people." Mr. Kessler will submit a definite recommendation for the park. He returned late in the week to St. Louis.

BURKBURNETT MAN CHARGED WITH AIDING JAIL DELIVERY

B. W. Acuff of Burkburnett is in the Wichita county jail here charged with aiding in a general jail delivery alleged to have taken place early in the week at Burkburnett. A complaint charging assistance to prisoners in escaping has been filed in Justice C. J. Arrington's court against Acuff who waived preliminary hearing and was bound over to await action of the grand jury in bond to the sum of \$1,000.

Wayne Summerville, assistant county attorney, says that Acuff broke the bars of the Burkburnett city jail by means of a heavy hammer. Several of Acuff's friends had been placed in the county jail on charges of disturbing the peace and Acuff aided them to escape by battering the bars, it is charged.

Three prisoners escaped, it is said. The prisoners were held on minor complaints.

TWO FIRE ALARMS ON FRIDAY NIGHT

The fire department answered two calls Friday night, both being for outdoor sports. It can and

WICHITA COUNTY IN SECOND COLLECTOR'S DISTRICT

Wichita county has been assigned to the newly second internal revenue district of Texas. Headquarters of the district are at Dallas, according to official notice received at the Wichita Falls office.

The new district will be established on July 1 and will include payments of income and revenue tax should be made to the Dallas office. The headquarters of the first district will remain at Austin. All the counties in this section of the state are included in the second district with headquarters at Dallas. The second district is made up of the following counties:

Anderson, Andrews, Angelina, Armstrong, Archer, Baylor, Bell, Borden, Bosque, Bowie, Briscoe, Callahan, Brown, Camp, Carson, Castro, Cherokee, Childress, Clay, Collins, Cochran, Coke, Coleman, Collingsworth, Comanche, Concho, Cooke, Correll, Cottle, DeWitt, Donley, Dumas, Dallas, Dawson, Deaf Smith, Delta, Denton, Dickens, Donley, Eastland, Ellis, Ector, Erath, Falls, Fannin, Fisher, Floyd, Foard, Franklin, Freestone, Gaines, Garza, Glasscock, Grayson, Gray, Gregg, Hale, Hall, Hamilton, Hansford, Hardeman, Harrison, Hartley, Haskell, Hemphill, Henderson, Hill, Hockley, Hood, Hopkins, Houston, Howard, Hunt, Hutchinson, Jack, Irion, Johnson, Jones, Kaufman, Kent, King, Knox, Lamar, Lamb, Lampasas, Leon, Limestone, Lipscomb, Loving, Lubbock, Lynn, McCulloch, McLennan, Marion, Martin, Menard, Midland, Mitchell, Montague, Moore, Morris, Mills, Motley, Navarro, Newton, Nolan, Ochiltree, Oldham, Palo Pinto, Panola, Parker, Parmer, Potter, Randall, Baines, Reagan, Red River, Roberts, Rockwall, Runnels, Sabine, San Augustine, San Saba, Scurry, Schleicher, Shackelford, Shelby, Sherman, Smith, Somervell, Stephens, Sterling, Stonewall, Swisher, Tarrant, Taylor, Terry, Throckmorton, Titus, Tom Green, Trinity, Upshur, Upton, Van Zandt, Ward, Wheeler, Wichita, Wilbarger, Wilcox, Winkler, Wise, Wood, Youkum, Young.

JURY FEES COST COUNTY \$3,000 DURING JUNE

It has cost Wichita county approximately \$3,000 to employ jurors for various courts during the month of June. It was announced on Saturday by County Treasurer McMillan. The county treasurer has already paid out \$2,518 in jury fees and the grand jurors together with the jury setting in Judge Weldon's court and several petit jurors in the 78th district court remain yet to be paid.

HOW THE AMPICO PLAYED GODOWSKY'S ENCORE

They had come in skeptical mood—those 800 or more musicians and critics who attended that first Godowsky-Ampico recital at the Hotel Biltmore in New York. Many of them were themselves artists of note—drawn perhaps by curiosity as to what had happened to Godowsky's recital in a public comparison of his art with a "player piano," however marvelous.

SKETCH OF NEW \$175,000 FLORAL HEIGHTS METHODIST CHURCH

The accompanying cut shows the beautiful new church building now being erected by the youngest church organization in the city. The Floral Heights Methodist church came into existence with the appointment of Rev. W. L. Tittle as its first and only pastor last November. This new building furnished will cost about \$175,000. The church is so arranged that the first story above the basement can be thrown into one large auditorium, thus giving a large seating capacity at a minimum cost. There are 27 separate class rooms which are enclosed and cut off from other classes. There are two sets of ladies' parlors, a complete kitchen and a large banquet room. In addition to the separate class rooms there are also departments for beginners, primaries and juniors, which are capable of meeting any reasonable needs.

LOCATION FOR TEST NEAR ST. JO, TEXAS

NOCONA, TEX., June 26.—In oil circles, when the next big bet in development is discussed, and that is a live topic just now, Montague county will not be overlooked as being entitled to head the list or be pretty close to the top. In other words, attention in the Red River district is again turning to this county. It certainly contains a great undeveloped area on the Pennsylvania uplift and will be increasingly attractive from now on. This county lies across Red river to the south-southwest of the big Headton oil field. The Nocona well had a number of oil and gas showings, and these were found in sands and some of these were sufficient to indicate that very good wells might reasonably be anticipated when the right place is found. Southern Jefferson county, Oklahoma, will also come in for a good play.

The American Oil and Refining Co. test near Illinois Bend is working around 900 feet. This well is considered to have a favorable location. It is reported the Warner Oil Co. has made a location out north of St. Jo, but the survey on farm on which it is located has not been given out. It may be presumed the intention is to move from the present test, provided the broke stem cannot be recovered or drilled past. The new location is said to have been made by a geologist who made a survey of the territory. Colorado capital is reported to have

Society and Clubs

MISS JEWEL WILSON WEDS GEORGE T. DAVIS Friday evening at 7:30 o'clock, at the manse of the Central Presbyterian church. George T. Davis and Miss Jewel Wilson were united in marriage in the presence of only a few of the intimate friends of the bride and groom. The Rev. Guy Davis solemnized the rites, using the beautiful ring ceremony. Mr. and Mrs. Davis will be at home in Electra after a brief honeymoon.

WOODMAN CIRCLE GIVES BOX SUPPER

Woodman Circle No. 1447 gave a box supper at the hall Friday evening, with many members present and a generous supply of "eats" to add gastronomic satisfaction to a general good time. A basket picnic will be held July 5 by the grove. All members are urged to meet at the hall at 4:30 o'clock that afternoon, bringing well-filled baskets, and ready to go in a body to the lake, where the picnic supper will be served.

RUTH SOWELL GIVES BIRTHDAY PARTY

Ruth Sowell, daughter of Mr. and Mrs. W. L. Sowell of 309 Elm street, was hostess Wednesday afternoon at a party given to her friends in celebration of the little girl's sixth birthday. Games were played, and ice cream, candy, birthday cake and homemade contributions generously toward the good time. Among the guests were Annie Belle Delameter, Madie Ruth Owen, Jewell Givens, Jesse Gatlin, Bernice Cartwright, Lorraine Knox, Mabelene Duncan, Lofone Duncan, Lowana Presley, Francis Jones, Herman Cartwright, Dearwood Gatlin, Earl Hutchinson, Leon Givens, Marvin Hutchinson, Pal Hamilton, Billie Jones, Jack Mitchell and Mrs. Fred Marza.

The Misses Daisy and Hazel Wharton left Thursday for Chicago where they will enter summer school. Miss Daisy Wharton will enter the Musical College at Chicago, while Miss Hazel Wharton will take a summer course at the Northwestern University.

The Brotherhood of American Yeomen Lodge will have a truck party Wednesday evening. Members will meet at the Hall, 603 1/2 court street, at 7:00. All ladies will carry sandwiches. Rowen Circle will meet with Mrs. C. S. Taylor, 1205 North Indiana street at 2:00 o'clock Tuesday afternoon, with Mrs. Louise Chatterton as hostess.

FRECKLES

Don't Hide Them With a Veil; Remove Them With Othine—Double Strength. This preparation for the removal of freckles is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold if it fails. Don't hide your freckles under a veil; get an ounce of Othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely. Be sure to ask the druggist for the double strength Othine; it is this that is sold on the money-back guarantee.

DALLAS AUTOMOBILE MAN BUYS STOCK IN AUTO TIRE CO., INC.

Coincidental with the purchase of the stock of C. T. Shook by P. B. Cox, a wealthy automobile distributor of Dallas, the Auto Tire Company of West Texas has changed its name to The Auto Tire Co., Inc., and will continue in business with greatly enlarged facilities at their former address, 549 Scott street. This firm is one of the oldest automobile concerns in Wichita Falls, having been here for seven years. A recent fire on the premises did considerable damage but this handicap has been more than overcome by the purchase of new and improved vulcanizing machinery so that E. V. Lasky, manager, states they are now in position to do better work than ever before.

TO DRILL 3500 FOOT TEST IN BAYLOR

SEYMOUR, TEX., June 25.—Harry B. Dawson, W. A. Newton and A. J. Peters of Wichita Falls have secured a block of about 5,000 acres of oil leases 10 miles west of Seymour in Baylor county and north of the Brazos river, on which they have contracted to make a 3,500-foot test, drilling the first 2,000 feet with a rotary machine and will then standardize and complete the well with standard tools. Messrs. Dawson and Newton visited the lease today and made the location for the test well on the south central part of Section No. 149, B. B. & C. Ry. Co. the land being owned

by G. L. Musick. The rig timber was secured locally and is now being moved onto the lease and the work of the erection of the derricks will begin the latter part of this week. The test is located about six miles southwest of the Clint Wood's deep test and about the same distance northwest of the Harry Van Ness syndicate well, which is now reported to be 25 feet in the black kimberlite, having entered the lime at 3,375 feet.

WICHITA FALLS PASTOR RETURNS TO HIS WORK

Rev. Guy Davis, pastor of the Central Presbyterian church, returned yesterday from Mineral Wells, after several weeks absence from his pulpit on account of sickness. The Rev. Davis states that his health is very much improved and that he will occupy his pulpit Sunday morning at 11 and Sunday evening at 8 o'clock.

NEARLY 600 CASES ON NEW COURT DOCKET

Judge Martin Makes Assignments of Cases for First Week in New Court

When Judge P. A. Martin opens the 87th district court of Wichita county on Tuesday, July 5, he will find a docket of 520 cases transferred from the 30th district court and probably half a hundred more filed since the docket for this court was opened. This would be a fairly sizeable docket even for a matured court, but the new court will face the heavy docket without dismay for Judge Martin is an experienced judge and knows how to get cases through.

He has assigned the following cases for trial during the first week of the new court beginning Tuesday, July 5:

- 6234. August Wahl et al vs. J. W. Swanson.
- 6235. L. F. Wilson vs. Bankers Trust Co.
- 6311. J. Ray Cordon vs. Adams Express Co.
- 6321. E. J. Hindman vs. N. G. Poe.
- 6323. A. A. Waggoner vs. Joe Art.
- 6379. M. B. Hurley vs. Jack Kelly, Bagnall & Engle.
- 6465. Perry Browning vs. Sanders Oil Co.
- 6483. R. S. Allen vs. W. J. Sheldon et al.
- 6539. Frank King vs. F. H. Loomis.
- 6540. L. L. Taylor vs. EdKaylor et al.
- 6344. D. W. Bird vs. S. H. Jones.
- 6345. D. W. Bird vs. National Bank of Commerce.
- 6546. Blanche Pipes vs. Rosa Powell.
- 6571. F. L. Powell vs. Middle Tennessee Oil and Gas Co.
- 6587. Amelia Legois vs. Sam Hurst.
- 6603. C. R. Staley vs. J. R. Laws and T. A. Martin.
- 6606. A. E. Crosslin vs. C. A. Walling et al.
- 6622. C. H. Steele vs. Archer, Hart, Lake & Co.
- 6625. Wichita State Bank vs. Prince Baxter.
- 6628. Royal Oil and Refining Co. vs. Imperial Petroleum Co., Ltd.
- 6630. Acme Drilling Ass'n vs. E. M. Meebe.
- 6634. J. D. Copeland et al vs. T. H. McCoy et al.
- 6638. Burkburnett Refining Co. vs. Prince Baxter.
- 6647. W. S. Langford vs. H. D. Andrews.

- 6648. W. S. Langford vs. First National Bank of Burkburnett.
- 6654. John Pohlman vs. Dell Shoemaker.
- 6655. F. E. Curtis vs. L. S. Brannon.
- 6682. Jay W. Nelson et al vs. P. E. Glenn et al.
- 6697. L. A. Crew vs. H. C. Poe et al.
- 6958. C. C. Glenn et al vs. C. D. Hart et al.
- 6960. Chas. F. Noble vs. American National Bank of Tulsa.
- 6716. H. I. Duncan vs. J. M. Evans.

- 6899. W. E. Rogers vs. Farmers State Bank of Burkburnett.
- 6908. F. F. Ham vs. W. W. Fagg et al.
- 6946. Thrift Oil and Gas Co. vs. Lulu Pearl Oil Co.

The officers of the City National Bank of Commerce intend to give every customer a full measure of service regardless of the size of the depositor's balance. That is the reason the City National Bank of Commerce has taken a place prominent in the city's financial world.

ARRANGEMENTS MADE TO SPRINKLE LEE ST.

At a meeting of Lee street residents on Friday evening definite plans were made for the sprinkling of that street together with adjoining streets during the present summer.

Committees appointed at a previous meeting to investigate the relative cost of sprinkling, oiling and paving reported the results of their conferences with city officials. After consideration of the various plans of improvement, it was decided to sprinkle the streets daily for the present. The city will install a crane hydrant and will furnish the water while the residents of that part of the city will meet the expense of the sprinkling. Phil Abela has been employed for this work and is now canvassing that entire section lying just north and east of the tracks to secure the names of all residents who desire to take advantage of this temporary relief from the dust and mud. It is estimated that the cost to each family for the combined sprinkling and dragging will be \$1 per week.

With this means of temporary relief decided upon, agitation for paving will be continued with a view to getting up all property owners for permanent improvement so that work may be done this fall. Specifications for Lee street are outlined by the engineering department call for 30-foot pavement of special reinforcement to carry the unusually heavy oil field traffic going over this thoroughfare.

Another meeting has been called for next Tuesday evening, June 29, at the Travis school. All those living on Lee and Adams streets and all cross streets between Third and Seventh are urged to be present. Although the property holders on Lee street have taken the lead in this matter so far, it is hoped to make this a neighborhood affair so that one plan of improvement may be worked out for the entire community, thus bringing about a more effective piece of work and at the same time reducing the cost to each individual tax payer.

The City National Bank of Commerce is one of the largest banking institutions in the southwest, and as such, plays a very important part in the business of Texas and neighboring states. Its resources of more than \$2,000,000 enable it to contribute its share of the financial support which banks must necessarily extend to commerce.

Monday Marks the Beginning of the Second Week of Greatest Sale Since 1914

SIMMONS BEDS Built for Sleep

Buy a Simmons Bed and a Simmons Spring and be sure of that deep, restful sleep which makes for renewed vigor, enthusiasm and efficiency.

Any Simmons Bed you select here is designed and built with proper regard for sleep. You will also find that, in refinement of design and elegance of finish, it is in perfect accord with modern style ideas—in harmony with the accepted good taste standard of bedroom decoration.

Simmons Beds

Are Built for Sleep

Thousands of people will tell you that they never realized how deep and sound sleep can be, until they discarded wooden beds and ordinary metal beds for a Simmons Bed—noiseless, restful, sleep-inviting.

Simmons Company are pioneer makers of Metal Beds built for sleep—Makers of those wonderful Simmons Springs, that really do invite the body to lie out flat, every muscle relaxed—

Specialists, too, in TWIN BEDS—that fine principle of a separate bed for every one, so that one sleeper does not disturb the other, or communicate a cold or other ailment. Ask us to show you our display of Simmons Steel Beds, Brass Beds, Springs, Day Beds and Children's Cribs.

A solid carload just received. They cost little if any more than ordinary beds and springs.

AUTOISTS HELD UP BY MASKED ROBBERS

A holdup which barely escaped being fatal to one of the victims was perpetrated Friday night near Gilbert creek on the road to Burkburnett. Charles Mercer, a service car driver, with six passengers left Wichita Falls at 10:45. At 11:30 as they were approaching Gilbert creek they encountered a large pile of junk and rubbish squarely in the middle of the road and as one of the men went forward to investigate a gun flashed and a bullet shattered the wind shield of the auto.

Mercer and the man in the front seat with him were cut about the face and hands by flying glass. Two masked men then appeared from out of the darkness and ordered that the car be backed into the ditch at the side of the road. An approaching machine caused an interruption in proceedings at this point and the high-jackers marched their victims into an adjoining field. They kept them under cover until the passing auto was at a safe distance. All seven men were then relieved of their money and other valuables. After warning their victims to get into the low brush, the robbers climbed into the service machine and disappeared in the direction of Burkburnett.

Although Mercer and his companions immediately secured the aid of several machines and searched until daylight no trace of the robbers was found. The abandoned service car was located at 3:30 a. m. about four miles northeast of Burk on the Red river road.

Mercer described the two holdups as being between 22 and 26 years of age. One, he said, was about 5 feet 4 inches tall and the other was perhaps four inches taller. Both were dressed in brown overalls and wore slouch hats.

CITY HAS SPRAY TO KILL INFECTIOUS TREE INSECTS

In order to co-operate with property owners in the campaign to rid this city of bag worms and other insect pests that are destroying shade and fruit trees, the city has obtained a spraying equipment. It was announced today. The machine will be operated at cost to the public, and every street in the city will be systematically "covered" in the drive against the worms.

Any citizen who wishes to have his trees sprayed is urged to have his to the chamber of commerce. Although it will be impossible to move the equipment at call from one section of the city to another, an attempt will be made to reach in turn every citizen who wishes to avail himself of the service.

The Knights of Pythias will have an open social session in their lodge room, 608 Scott avenue, next Tuesday evening, June 29th, at 8 o'clock. All members of the order, and all members of the Pythian Sisters, whether in good standing or not, are urgently requested to be present, and bring with them their wives, daughters, mothers and sisters, as a Pythian Sister Temple will be instituted at that time. For further information phone Dr. J. W. DeVal, at 195.

JOHNSON'S VIEWS PUBLIC QUESTIONS

Declaring that he has never held office, is not a politician and that his attitude upon legislative matters is that of a business man, B. F. Johnson, prominent Wichita Falls realty operator, granted his first interview Saturday on public questions affecting his candidacy for the state legislature. Johnson is a candidate for the democratic nomination from the 101st district, comprising Wichita and Wilbarger counties.

While stressing that, if elected to the state legislature, he would not favor the practice of economy to a point that would endanger the welfare of the state, Mr. Johnson declared that "operating expense in any business, governmental or otherwise, is a most important question."

"Every thinking man realizes," he said, "that the expense of operating the business of the state of Texas is excessive. To reduce this, without sacrificing efficiency in any way, is a most important question. It shall seek, wherever possible, to stop lost motion, unnecessary jobs and offices, duplication of effort among departments and agencies, and among heads of departments and institutions. Higher efficiency and greater production along all lines are essential at this time. A practical budget system would aid in bringing this about."

Educational matters should receive more attention from the state in Johnson's opinion.

"I feel very keenly the humiliation of having my native state rank 39th among the states and territories of the union in educational matters," is Johnson's viewpoint. "I would favor a thorough survey of our educational institutions in order to find out exactly where our educational system could be strengthened, and then work for the passage of such laws as would bring this about. No effort should be spared until every boy and girl within the borders of our state shall have the opportunity to secure the best education obtainable, to the end that our future citizens shall be 100 per cent Americans, and thoroughly equipped for life's battles. Well paid teachers are, of course, essential to this."

Where do you stand on the question of capital and labor? Mr. Johnson was asked.

"I am fair to all labor, and believe in the right of men to organize when the organization is directed with regard to the rights of the man outside the organizations," was the answer. "I further believe that all organizations, like all individuals, should respect contracts and be financially responsible for damages inflicted where the business, person or property of others. I hope to see the day when a card showing a membership in a labor organization is a guarantee to all concerned that the holder is an expert at his trade and an honorable, upright American citizen. That day will see every man who labors striving to obtain a union card, and every man who employs labor anxious to have none but union men in his service."

"I believe that labor unions have the right to strike when such a

strike is not in violation of a contract and does not bring suffering and hardship to an innocent public. Employers owe to their employees comfortable living and working conditions, educational and social advantages and the highest salaries or wages which the business will permit, based upon the ability and efficiency of each individual employee; and a minimum wage consistent to the cost of living."

Mr. Johnson is opposed to a state income tax law, and also to the single tax idea; nor does he favor the taxation of oil production, unless all other production, mineral, agricultural and industrial is taxed equally—and such a plan, he believes, "is neither feasible nor necessary."

The agricultural industry of Texas is its greatest asset, in Mr. Johnson's opinion.

"A marketing system should be devised," he suggested, "which would insure to the producer a price more closely resembling the price paid by the consumer for the same product. To have better farms and a greater production we must have profitable farms and a happy farm life. Jefferson said that the best citizen was one who produced the bread for his country. Our farm boys and girls will continue to go to the cities as long as the Texas farm homes are cheerless, unattractive dwellings, situated on impassable roads, many miles from schools and churches, with community social centers unknown."

The Wichita Falls man also has a plank in his personal platform calling for the development of the state's natural resources by irrigation, drainage, conservation of flood waters and by the building of good roads; while he stands, with reference to elementary institutions, in favor of putting

into practice the recognized fact that human beings are not brutes.

"Criminals incarcerated in our penitentiaries, and juvenile training schools, are there to be cured; they are human beings to be given a wise admixture of work and play so that instead of arousing every atom of brutal passion and releasing them as full-fledged criminals, we shall release them as good citizens, an asset to the state instead of a liability. And our institutions for the insane should also be managed to effect cures where possible, and when it is impossible then the management should be such that the last days of the insane might be spent in comfort amidst pleasant surroundings."

Mrs. L. B. Haynes, special prison worker, recently came to Wichita Falls from San Antonio, to speak at the Floral Heights Methodist tabernacle Sunday evening. Along with her husband she has had wide experience in special evangelistic work in many of the large prisons.

Rev. W. L. Tittle, pastor of the church, says of them: "These people come to us with the endorsement of Rev. C. Wesley Webb, pastor of the famous old Travis Park Methodist church at San Antonio where Mr. and Mrs. Haynes were both used as teachers of two of the largest classes of this historic Sunday school." In the Sunday evening message Mrs. Haynes will take occasion to speak briefly of her experience in prison work.

Lamar Avenue Baptist church meets at Labor Temple Sunday school 10:00 a. m. Preaching at 11:00 a. m. and 8:15 p. m. Subject for the morning service, "These Feeble People." Subject for the evening service, "Sodom, Ancient and Modern." Women's meeting Tuesday afternoon. Prayer meeting Wednesday evening 8:30. We extend to the public a most cordial invitation to worship with us at these services.—A. J. HOLT, Pastor.

MORE PAVING WANTED ON ELEVENTH STREET

A number of Eleventh street residents have manifested a desire to have that street paved between Ohio and Grace, and petitions will probably be started within a short time.

This street is scheduled for early improvement, in the city's paving program, and many owners of property on it favor paving at once.

Work on the Ninth street petition is progressing favorably but slowly. A number of blocks are 100 per cent signed, and it is hoped to complete the petitions within a few days.

MILLION DOLLARS PAID BY ALIENS

NEW YORK, June 26.—Between nine and ten millions of dollars have been gathered from outgoing aliens who were too modest to declare the full amount of their earnings for income tax payments and many thousands more are being collected from delinquent aliens who boast of their simple incomes to immigration inspectors to convince those officials that they can easily care for incoming dependents, according to a statement made public here by Colonel Daniel L. Porter, supervising internal revenue agent of the federal income tax collecting service.

Forty-five agents have been kept busy at the piers and elsewhere in the city collecting the millions from outgoing aliens. A small squad in a bureau established close by the courts of special inquiry at the Ellis Island station, lend attentive ears to the boasts of the aliens.

\$30,000 Collected.

For the month of February, March and April the reports show that more than \$30,000 was collected at Ellis Island from alien tax dodgers, while three times that amount was traced to other localities and the collectors there notified. The reports for May are not yet filed, but the amount collected is said to have increased with the increasing flow of immigration.

"A resident alien," explained Colonel Porter, "goes to the immigration station to sponsor a relative or friend of special inquiry to this country, knowing the government's requirements that a responsible person must guarantee that the immigrant will not become a public charge.

The resident alien goes prepared to state on oath that his income is ample to safeguard the public against such dependents. Whether or not this resident alien has paid his income tax becomes the immediate subject of interest for our agents. They call the delinquent into a conference and, after allowing such exemptions as he may be entitled to, levy tax on the remainder of his sworn statement of income.

"When the tax dodger is a resident

of some city or town not in our district his sworn statement is forwarded to the local collectors, who make the collections. In other cases they are made here and the money sent to the collector of the district wherein the tax dodger resides. Most money so collected range in amounts of from \$15 to \$500 and represent taxes due the government on small business concerns and on wages."

DULUTH MOB HAD A KEEN WORD BATTLE WHEN VICTIMS WERE LYNCHED

DULUTH, MINN., June 26.—Mob psychology as evidenced in the rioting here when three negroes were lynched, showed many peculiar traits. It was at first a picnic ground, that mob of 5,000 persons, many of whom were mere girls or young matrons.

Horror, perhaps, would have transfixed any one of the young women had she observed a lynching as a lone spectator, but the mental attitude of the mob made it a holiday affair.

Youths are declared to have started the recruiting of the mob—boys of high school age from the section of the town in which the girl victim of the negro assault lived.

Girls and boys made up a large part of the mob when it stormed the police station; they cheered and joked as the three negro victims were swung to their doom. In a state of mild hysteria, shown by many girl spectators, crude wit from immature mouths became excreting comedy, and the death groans of the negroes were unheard in the chorus of jibes that followed each straining of the death rope.

"See what you are coming to!" cried one.

"Now, do try to hang gracefully," admonished a girl in her teens.

"The less you kick, the less it hurts," brought forth much approving laughter.

A theater crowd was emerging half a block from the electric light pole, just as the first negro was yanked upward. Many among those from the theater joined in the applause as some one yelled, "Kick him again!" And far up on the pole a young man, hardly more than a boy, struck out viciously at the face of the dying negro.

CABRERA REPORTED HIDING TEXAS TOWN

MEXICO CITY, June 26.—Luis Cabrera, secretary for foreign affairs in the cabinet of former President Carranza, is reported to have been heard of in Texas City, near Galveston.

Movements of Luis Cabrera since the death of Venustiano Carranza have been shrouded with considerable mystery. It was reported on May 24 that he had been captured at Villa Juarez, state of Puebla, and sent to a military prison in Mexico City, but subsequent dispatches from Mexico failed to confirm this rumor.

Later there were unconfirmed reports that Cabrera was trying to reach the United States in disguise and that he would endeavor to go to Europe. Cabrera is said to have large sums of money on deposit in New York banking houses and in Europe.

SANITARY ENGINEER TO INVESTIGATE TYPHOID HERE

AUSTIN, June 26.—Typhoid cases are reported in a number of towns in the northwest oil belt, according to C. W. Goddard, state health officer, who has dispatched L. O. Bernhagen, sanitary engineer, to investigate. Prompt report of all typhoid outbreaks are urged by the state health officer, who says:

"If the state board of health is to render efficient aid, it is absolutely essential that these reports be sent in promptly."

The City National Bank of Commerce is one of the largest banking institutions in the southwest, and as such, plays a very important part in the business of Texas and neighboring states. Its resources of more than \$22,000,000 enable it to contribute its share of the financial support which banks must necessarily extend to commerce. 45-1tc

GERMANY FILES CLAIM WITH COMMISSION

PARIS, June 26.—Germany has filed with the reparations commission a claim that 215,000,000 marks should be deducted from the 7,000,000,000 gold marks due France as her share of the indemnity fixed by the Versailles treaty, says the Petit Parisien. This sum, it is asserted, is the value of improvements made on French roads by German prisoners of war.

In an interview published here today, Marshal Foch is quoted as declaring that the real danger to be encountered in German disarmament exists in the "hostile and military spirit of the people." Berlin advises report great uneasiness in labor centers, especially in the Ruhr region.

GALVESTON SITUATION IS REPORTED NEAR NORMAL

GALVESTON, TEX., June 26.—Galveston waterfront shipping conditions were declared nearly normal today by Mallory and Morgan steamship line officials.

Although striking longshoremen continued to work since martial law was before, several hundred non-union men are at work and more are applying for employment, it was declared.

GERMAN PROFITEERS REDUCE PRICES TWENTY PER CENT

COBLENZ, June 26.—German merchants in the area along the Rhine occupied by the Americans recently held a meeting and decided to reduce their prices 20 per cent after the army had placed 23 stores in the district "off limits" for American soldiers because of profiteering.

The army authorities in an investigation conducted recently found that the profits in some stores were reaching 700 per cent. In consequence of the meeting there was a reduction of 50 per cent in some articles overnight.

POLICE SEARCH FOR MURDERER OF BABIES

ST. LOUIS, June 26.—Search for the murderers of three babies in St. Louis county within the last week was begun today by county officials. Following the finding of a dead infant in a pasture by children yesterday, it was revealed that the bodies of two other babies, each a few hours old, had been found under similar circumstances earlier this week. In each instance, coroner Deary announced death had been caused by strangulation.

MEXICAN JURIST SOON LEAVES FOR WASHINGTON

MEXICO CITY, June 26.—Alberto M. Gonzalez, justice of the Mexican supreme court, will leave soon for

Washington and New York, according to the Excelsior, to study the United States judicial system and explain proposed Mexican legislation relative to petroleum.

Why hens never lay half an egg!

The usual method of feeding mostly grain, makes yolks but not enough whites to complete the eggs. As the hen cannot lay these half-made eggs she absorbs the back into her system. Missouri Experiment Station tests showed that 100 lbs. of wheat, corn, oats, barley and kafir corn make (above bodily maintenance) an average of 224 yolks but only 154 whites. Based on data from the same experiments, Purina formulas produce, (above bodily maintenance) as follows:

Purina Scratch Feed	247.49 yolks	142.11 whites
Purina Chicken Chowder	182.05 "	282.55 "
Combined Ration	429.54 yolks	424.66 whites

Note the perfect balance of yolks and whites and the large number of each. This combination of Purina Feeds makes the maximum number of complete eggs, eggs a hen will lay. That's why we can absolutely guarantee

more eggs or money back

on Purina Chicken Chowder if fed with Purina Scratch Feed as directed. You take no risk.

YOUR CHANCES
OF LOSING ON
Your Texas Oil Investment
Shown By Our \$10,000 Statistical Map

Experts have been busy for weeks preparing the most complete Geological and Statistical Map of Texas ever compiled.

This Map is Now Ready For You. It Costs \$10,000 to Prepare and is Worth it

On the face of the map, which measures 15x24 inches, are shown geological surface structures, with brief explanation of their character in every-day language.

All known oil and gas fields, accurately located, with average production of each field.

Location, size and ownership of oil refineries operating or under construction.

Location of all principal pipe lines and ownership.

Railroads, county lines and principal towns.

On the reverse side appears the following tables and charts:

Table showing increase in crude oil and gasoline consumed and number of automobiles in use from 1910 to 1918, inclusive.

Chart showing increase in production of crude oil from 1910 to 1917, inclusive, comparing production of United States, Texas and the world.

Table showing number of wells drilled and number producing for each field from 1912 to July 1, 1919.

Table showing approximate production for each of the principal Texas fields in 1918 and first five months of 1919.

Table showing dividends paid by principal North Texas companies from date of organization to March, 1919, inclusive; also dividends paid by large, old-established oil companies over a long period of years.

Free to the Readers of this Paper

This map retails for one dollar, but we have a limited supply which will be sent absolutely free to readers of this paper, upon request, stating that you are interested in Texas. Send for your copy today. Use coupon below.

DEMOCRATS PLAN TO PROFIT G. O. P. ERROR

By United Press
SAN FRANCISCO, June 26.—Though it is not certain whether Senator Glass of Virginia or Senator Wash of Montana will head the resolutions committee, party leaders are determined that the democratic national platform, whoever writes it, shall take full advantage of what they regard as the mistakes of the republican platform.

They intend, therefore, to make the labor plank especially strong and clear, although some difficulty is anticipated in satisfying all factions of organized labor.

They are also prepared to put in many "humanitarian" planks by an appeal to the women voters. These will include anti-child labor laws, more pay for school teachers, women's bureau, equal pay for equal work without sex discrimination, and federal aid in providing employment.

Democratic women's views of what the platform should contain were practically ready today for presentation to the resolutions committee. They drew up a number of their planks at a meeting yesterday but postponed consideration of other suggestions along labor lines as well as discussion of the Irish question until today.

DEM. PLAN ACCEPT WILSON PLATFORM

SAN FRANCISCO, June 26.—Administration democrats predicted today that the Wilson League of Nations plank will be overwhelmingly accepted by the national convention.

This plank will sidestep any mention of the records of democratic senators, or as not to embarrass or offend those who voted for some or all of the League reservations. It will consist simply of an affirmative declaration that the League of Nations covenant is the best hope of the world for lasting peace and that it therefore should be ratified immediately without reservations that would impair its essential integrity.

Bryan and those with him, who want a reservation plank, were busy among delegates, educating them on the subject. The delegates for the most part seemed unable to understand the vital difference between the Wilson and the Bryan viewpoint, and a large majority of them seemed to favor standing by the president on the question.

TAYLOR HUDSON OPENS NEW AGENCY

Will Handle Sterns-Knight and Another High Class Automobile Here

Taylor Hudson, who came here less than two years ago with the Willys-Overland Company and later entered the oil business, has this week opened his new place at 808 Lamar where he will handle the Sterns-Knight and another high grade auto for which he is distributor.

Mr. Taylor came here with practically no money but through industry and perseverance has accumulated enough to establish one of the most modern and up-to-date automobile businesses in Wichita Falls.

UNION HEAD TRYS GET OUTLAWS BACK

CHICAGO, June 26.—W. G. Lee, president of the Brotherhood of Railway Trainmen, today began work in an effort to bring back into the brotherhood ranks the 15,000 workers expelled for taking part in unauthorized strikes during the past year.

"With the promise of a wage scale decision before July 20, retroactive to May 1, there is no reason for further dissension in our ranks," said Lee. "Already we have taken back 15,000 of the 30,000 men who were expelled and we will take back others who make proper amends."

Lee remained in Chicago while other heads of the big four brotherhoods returned to their homes. He was in wire communication with leaders of his organization all over the country and declared that efforts to take out trainmen and yardmen on strike at midnight would prove futile, as a result of the promise of an early wage decision by the federal railroad board.

It is reported that the board, which has been in executive session three weeks, has agreed on a tentative average wage increase for the various crafts of 22 per cent. Members of the

ATTY. GEN'L. HOLDS INFIRMED VOTERS CAN RECEIVE AID

AUSTIN, June 26.—Answering an inquiry from the district attorney of Webb county, it was held today by the attorney general's department that in both general and primary elections when a voter, because of bodily infirmity such as to render him physically unable to write, he may be given assistance in the preparation of his ballot.

It is also pointed out that in primary elections such voter is required to make known his wishes in the English language, and the judge in aiding him can use only the English language. If a voter can prepare his own ballot, but cannot read or write English, he is entitled to vote, it is said.

ATTORNEY GENERAL RULES WOMAN CAN'T BE LEGISLATOR

FORT WORTH, June 26.—Because the attorney general held today that a woman cannot be a member of the Texas legislature, Mrs. Claudie High-

tower, W. C. T. U. leader in this district, withdrew from the race. She had two men opponents.

TO THE CITIZENS OF THE 30th JUDICIAL DISTRICT OF TEXAS

It is with regret that I cannot get to see all of the voters of this district in person, owing to the fact that the 30th district court convened the 14th day of June at Wichita Falls, Texas. There are a large number of criminal cases now pending on the docket of this district that will have to be tried and a large number that will have to be investigated which will require most of my time and attention. It will be almost impossible for me to see every voter in person and I wish to say to the people of this district that I am now making my race for my second term for the office of district attorney for the 30th judicial district of Texas. During my last term which is the present term I have tried to make the people of this district an efficient district attorney. I have tried to be fair and fearless in all my prosecutions. I have tried to be conscientious and have kept my mind open at all times. I have done my very best to perform the duties of my office to the best of my ability.

I now leave it to the people of this district to be my judge. Under all the principals of the democratic party, where a man has done his best to perform the duties of his office to the very best of his ability he is entitled to a second term of office.

This is all I ask of the people of this district:

If you feel that I have made you an efficient officer under the conditions that I have had to work against, then I respectfully request your support in the general democratic primary election to be held upon the 24th day of July, 1920.

I now submit to you my candidacy.

Sincerely, FLETCHER S. JONES.

CHIROPRACTIC STRAIGHTENS CROOKED JOINTS

Dear Doctor

I am so well pleased with Chiropractic Adjustments that I would like for every one suffering to know just what you have done for me. I have had rheumatism and deformity of the knee joints for more than ten years. During this time I took medicine from twelve (12) different doctors, but none of it did me any good. I also took every patent medicine that was recommended to me by my friends, but none of it did me any good. I had got to where I could not walk any more than a block at a time when I began the adjustments. When I began the adjustments I left off all medicine and have not taken any since. Today I go where I please, work every day, and the more I walk the better I feel. When I began taking the adjustments I only weighed 88 pounds, today I weigh 124. I sincerely recommend Chiropractic Adjustments to all who are suffering from any trouble whatsoever, as I have seen different cases come to you with different ailments and get relief, to convince me that Chiropractic is one of the greatest health systems today.

Yours very truly,
FITZHUGH LEE FINNEY,

I AM

I am the faithful slave who answers your call in the morning, the evening, or at the noontide of the night. I am the world's utility man; my office hours are any hour of any day in the year. My mission is one of service to humanity. My work is a skilled one on which the well-being of the afflicted must depend, and in which there is no place for a drowsy brain or a bungling hand, lest they take human life. I feel the weight of responsibility and note that age is creeping upon me ahead of my years, but when I have answered your last call and the long vigil is over, methinks I shall hear the wee small voice saying: "He helped the world by his service to mankind," and this shall be my reward. I am your skilled servant, your friend in time of need, and a link in the sprocket chain that drives the machinery of the universe.

Open For Complete Banking Service 9 A. M., Thursday, July 1st.

Our judgment of the present, substantial, fundamental prosperity of Wichita Falls and our confidence in the future of this city formed the basis of our decision to organize the Security National Bank.

As a new Bank, officered by experienced and successful bankers, we have cast our lot in Texas' most rapidly growing city, with the object of growing with you.

Our observation has been that banks can by their policies contribute substantially to the growth of a city, so you will always find our shoulder to the wheel in building a greater Wichita Falls.

Many of us are well known to you—others of us, like many of you, are comparatively new-comers. Let us all get acquainted and all work together.

Our Policy—A service that makes friends as well as patrons

SECURITY NATIONAL BANK OPENS JULY 1

New Banking Institution Backed By Strong Financial Men and Officered by Experienced Bankers

Backed by strong financial interests and officered by men of successful banking experience, the Security National Bank, Wichita Falls' sixth banking institution, will open for business on July 1.

The bank was organized by J. I. Staley, well known banker and oil man and C. C. Cabiness, Burkburnett banker. Its officers and stockholders include many of the county's leading citizens and strongest financial men.

The capital of the bank is \$400,000 and it will have a surplus of \$100,000 at the start, placing it in a strong position for a new bank.

The new bank has been fortunate in securing quarters in the Kemp and Kell building in the heart of the business district. New fixtures have been installed in the banking room which has been redecorated and refurnished for the new bank.

On Wednesday afternoon and evening from 4 to 10 p. m. the bank will hold open house for the public which it cordially invites to visit it.

The officers of the bank include the following: J. I. Staley, president; C. C. Cabiness, active vice president; J. W. McReynolds, active vice president; W. M. Priddy, vice president; J. A. Richolt, vice president; N. M. Clifford, cashier; R. B. Rubottom, first assistant cashier and Earl Breedlove, assistant cashier.

J. I. Staley, president of the new bank, is well known as one of the leading figures in oil and banking circles in North Texas. For a number of years he was Vice-President of the First National Bank of Burkburnett. The oil business early engaged his attention and he entered the oil business on a large scale and soon became one of the most successful operators in North Texas. His operations developed on a large scale and he is reputed to have made more clear money than any operator in the Burkburnett district. He has a wide acquaintance in oil and banking circles. Mr. Staley is a director in the First National Bank of Burkburnett and also a director in the bank at Devol, Okla.

C. C. Cabiness, active vice-president and a director, came to Wichita Falls from Burkburnett, where for four years he was vice president of the First National Bank. Previous to that he was vice president of the Bank at Erick, Okla., and also at Sayre, Okla. He has been actively engaged in the banking business for more than fifteen years and his successful conduct of the First National Bank at Burkburnett in the busy and trying rush of the past four years marks him as a banker of exceptional ability. Mr. Cabiness is a vice-president and director in the First National Bank of Burkburnett and is a director in the National Bank of Commerce at Fort Worth.

J. W. McReynolds, active vice-president and a director, for five years before becoming associated with the Security National, was a national bank examiner, with headquarters at Dallas and Wichita Falls. Before becoming a national bank examiner he was assistant cashier of the American National Bank of Paris, Texas, a bank and which his father is president and which his father organized. His banking experience has covered a period of fifteen years and an extensive range and has given him a wide acquaintance among the bankers of this section.

W. M. Priddy, vice-president and a director, has been one of the leading business men of Wichita Falls. He is head of the Priddy Grain Co. and for a number of years has been one of the leading grain men of this section. He is the owner of valuable oil properties and has engaged extensively and with marked success in oil operations.

J. A. Richolt, vice president and a director, has been one of the men who have had a large part in the development of Wichita Falls. He is a member of the firm of Moore & Richolt in which his constructive ability and his wise counsel made him invaluable. Mr. Richolt is a man of large affairs and wide experience.

N. M. Clifford, cashier and director, comes to the new bank from the City National Bank of Commerce, of which he was assistant cashier. Mr. Clifford is one of the best known young men of Wichita Falls. He has made his own record and it has been a good one. For about 10 years he was employed by the Fort Worth and Denver in various capacities, resigning as joint ticket agent here two years ago to become connected with the City National bank.

ford is one of the best known young men of Wichita Falls. He has made his own record and it has been a good one. For about 10 years he was employed by the Fort Worth and Denver in various capacities, resigning as joint ticket agent here two years ago to become connected with the City National bank.

R. B. Rubottom, first assistant cashier, comes to Wichita Falls from the Robert J. Kieberg & Co. bank at Kingsville, one of the leading banks of the Gulf Coast country, where he was assistant cashier. Mr. Rubottom was with the Kieberg bank for more than 12 years and came to that institution with three years of banking experience. He was prominent in the church and social life of Kingsville and was one of the leading members of the chamber of commerce there. His associates in the bank here believe that he will be a valuable addition to the city.

Earl Breedlove, assistant cashier, comes to the Security National from the City National Bank of Commerce. He has had a number of years' banking experience and is a young man who has demonstrated his adaptability and qualifications for the banking business.

Jack Barnard, director, is one of the leading young merchants of North Texas, being manager for the P. B. M. company. He is an executive of unusual ability as has been attested by his successful work with the great store with which he is connected. No merchant in Wichita Falls has greater personal popularity than Mr. Barnard.

Linn A. Boyd, director, has been a resident of Wichita Falls all his life. He is a leading real estate man and has probably built and sold more houses than any man in Wichita Falls. He is a man of large financial interests.

J. W. Bradley, director, is head of the North Texas Furniture company, and for a number of years has been a prominent merchant of Wichita Falls. Mr. Bradley has been active in civic affairs and for several terms was a member of the city council. No man in Wichita Falls has a higher reputation than Mr. Bradley.

E. S. Good, director, is president of the Lawton Oil company, also of the Reboerson Petroleum company and is manager and principal owner of the Good Davis oil interests. He owns a large dairy farm near Lawton, Okla., and wheat lands in Canada. For 22 years he has been a practicing physician and surgeon. For several years he has lived on his oil leases at Burkburnett, maintaining his office on his lease to oversee their development. A few months ago he moved to Wichita Falls.

Dr. J. C. A. Guest came to Wichita Falls some 12 or 13 years ago to engage in the practice of medicine. He has a large practice and a very wide acquaintance. He has oil and other property interests.

Henry Hobbs, director, is president of the Texas Chief Oil company, and is extensively engaged in oil operations. He has extensive cattle interests and banking interests in West Texas. He is a resident of Wichita Falls.

J. G. Hardin, director, is one of the pioneer citizens of Wichita county and is one of its wealthiest citizens. His name is a synonym throughout this section for thrift and solid worth. He is one of the largest landowners in Wichita county, owning many acres of rich oil lands. He is president of the First National bank at Burkburnett. Mr. Hardin probably has larger cash resources than any man in Wichita county. In recent years he has made princely philanthropic gifts.

Thomas F. Moody, director, is head of the Moody Oil and Refining Company and has extensive oil interests. He has been actively engaged in the banking business for the past twenty years and has large banking and cattle and land in west Texas. He is a member of the executive committee of the Texas Cattle Raisers' Association and vice-president of the Panhandle and Southwestern Cattle Association. Mr. Moody is now located in Wichita Falls.

R. W. Ramming, director, is owner of tracts of the famous Ramming lands including some of the richest oil bearing lands in North Texas, and is extensively engaged in oil operations. Mr. Ramming has been an oil operator for a number of years and is known as one of the most successful in this section. He engaged in the oil business when operations were begun on the Ramming farm seven or eight years ago. He is known as a business man of exceptional ability and high integrity.

J. A. Staley, director, is the father of J. I. Staley, president of the bank. Like his son, Mr. Staley is a banker, oil man and land owner and has won prominence and success in all these fields. He has been a resident of this section for many years and is a man of wide influence.

S. W. Sibley, director, is a banker, oil man and real estate operator. He owns a controlling interest in several banks in East Texas and has extensive interests in the oil fields in this section.

of the Moody Oil and Refining Company and has extensive oil interests. He has been actively engaged in the banking business for the past twenty years and has large banking and cattle and land in west Texas. He is a member of the executive committee of the Texas Cattle Raisers' Association and vice-president of the Panhandle and Southwestern Cattle Association. Mr. Moody is now located in Wichita Falls.

R. W. Ramming, director, is owner of tracts of the famous Ramming lands including some of the richest oil bearing lands in North Texas, and is extensively engaged in oil operations. WATCH THE ESSEX THIS WEEK

A Demonstration of Essex Dependability and Endurance

For the entire week beginning Monday, June 28th at 6 a. m., and continuing until 6 p. m. Saturday, July 3rd, an Essex, specially marked and with a glass hood to show the working of the engine, will be driven through the streets of Wichita Falls on a NON-STOP RUN. The motor will be operated continuously day and night. After 10 o'clock p. m. the Essex will be in our show room at Ninth and Travis with motor running until the next morning, when it will be placed on the streets.

We invite you to take a ride. Hail the Essex anywhere you see it and we will gladly take you where you want to go within the city limits.

On starting the motor of the above Essex, speedometer will be set at naught. The glass dial on the speedometer head will be painted over with a heavy coating of paint, so that it will be impossible to get any reading during the non-stop run. Saturday evening at 6 o'clock the speedometer reading will be announced at our show room.

To the persons guessing nearest to the number of miles shown on speedometer when announced we will award prizes as follows:

- 1st Nearest Correct Guess \$50.00
- 2nd Nearest Correct Guess \$30.00
- 3rd Nearest Correct Guess \$20.00

Stop the Essex on streets and file your guess with driver or turn in at our office. All guesses must be filed by 12 M., Saturday, July 3rd.

Don't fail to turn in your guess and watch the Essex this week.

THE STARRY SKIES IN JULY

By PROFESSOR DOOLITTLE of the University of Pennsylvania.

In this mid-summer month the striking Scorpion, with its fiery red Antares, is found exactly on the meridian in the south. Almost overhead are the great groups, Hercules and Bootes, with the delicate little Northern Crown between them, while the Fall groups of Cygnus and Delphinus have risen well up from the ground in the east.

The observer can now trace out Serpens and Ophiuchus, the very extended, though rather faint, groups of the Serpent and the Serpent Holder, and the whole eastern borders of these

present month. They will not, however, entirely disappear until next November. At that time Saturn will be a morning star.

On July 4, 7 hours 10 minutes a. m. (Eastern standard time) the earth will be at its greatest distance from the sun. It will then be 3,230,000 miles farther away than when it was nearest the sun on last January 3.

The Spherical Cluster of Stars.

If the observer will look in the constellation Hercules, now almost overhead, he will see, in a straight line between the stars E and F, a little misty

variable displacement as we pursue our yearly path about the sun. Our position in space changes 156,000,000 during each six months, as we go around the sun, but if a heavenly body is so far away that its light occupies more than 156 years in coming to us, its displacement owing to this change of position is too small to be measured, even in our largest telescopes. In fact, at this distance away, a star will be displaced in a little "Parabolic Orbit," the distance across which is almost exactly the same as the thickness of the finest spider thread.

Since, therefore, we can detect no displacement of the stars of a spherical cluster directly, we must have recourse to indirect methods of finding their distances from us. One of the most reliable of all methods is by a study of the variable stars which many of the clusters contain. No less than 25 years ago, 127 of these variable stars were found in the cluster at C, 55 were discovered in the cluster at D, while 122 were found in a cluster in Centaurus. This last is the largest and finest cluster of our entire heavens, but it is not visible from the United States. Some of the clusters contain but very few or no variable stars at all; the cluster at B, for example, has but seven.

Many of these variable stars belong to a type known as Delta Cepheid variables, because the typical variable star of this kind, discovered 240 years ago, is the fourth brightest star of the constellation Cepheus. This star will be found at A, Figure 1. Its light at a perfectly regular interval increases quite suddenly to three times its usual amount, and then it fades away somewhat more slowly. The intervals between the greatest brightness of most stars of a cluster range from 10 to 14 hours, the average period being a little more than 12 hours. It is believed that a Cepheid variable is a pulsating star, and that it is its periodic change in shape that causes its outbursts of light.

It is remarkable that there has been established a definite connection between the absolute brightness and period in Cepheid Variables.

A similar, perfectly round cluster may be found in the constellation of the Hunting Dogs, in the position C, Figure 1, and another is at D, just above the greenish star G, of the Balance. Altogether, 55 spherical clusters are now known. They are most beautiful and remarkable objects in the telescope, but the discovery of their true nature and of their position in space and distances from us has only very recently been made. All of these things are now known, at least approximately, and it is at first, almost startling results of the long investigation and interest of astronomers.

In the first place, it may be said that no spherical cluster is so near us that any of its stars suffer any meas-

graph: Sirius, the greatest Dog Star, would appear of magnitude 17.5 and would be just visible.

Moreover, the stars in any spherical cluster are very much crowded together. Within a sphere so large that it includes 20 stars in the vicinity of our sun, there are no less than 15,000 stars in the cluster at C. These are, indeed, marvelous aggregations of stars. Apparently it is only in empty space that the stars of an irregular cloud can, as the ages go by, arrange themselves in a perfectly spherical form. Within our Milky Way cloud, the disturbing pull of innumerable other suns would make this impossible. It is, therefore, not surprising that although the spherical clusters are found upon the borders of our universe of stars, none are found within it.

Figure 1. Showing the situation of the spherical clusters with reference to our Milky Way cloud of stars.

The first cluster appear to us about six times as bright as those of the second, because they are so much nearer to us.

In this way (and by several other methods, which we have not space to describe, the absolute distances of the spherical clusters are found. The results by all different methods are in excellent agreement. They all concur in showing that these clusters are entirely outside of our Milky Way cloud of stars, the nearest of all being the cluster in Centaurus, whose light requires 21,300 years to come to us. The most distant of all so far discovered is so far away that even in the largest telescope it appears only as a nebulous star; its true nature was not discovered until 1912. The distance of this cluster is about 200,000 light years.

Figure 3, from a drawing by Harlow Shapley of the Mount Wilson Solar Observatory, shows a section of our greatly extended, but very much flattened, Milky Way cloud, with the positions of the spherical clusters projected on the plane of this section. Every cluster is so very far away that we see only its brightest stars. Thus, in the cluster at C Figure 1, the average brightness of the stars which we see is 100 times that of our sun. Our own sun, were it removed to this cluster, would appear to us of magnitude 21.5, and would not appear on any photo-

Figure 2. Relation between absolute brightness and period in Cepheid Variables.

urely outside of our Milky Way cloud of stars, the nearest of all being the cluster in Centaurus, whose light requires 21,300 years to come to us. The most distant of all so far discovered is so far away that even in the largest telescope it appears only as a nebulous star; its true nature was not discovered until 1912. The distance of this cluster is about 200,000 light years.

Figure 3, from a drawing by Harlow Shapley of the Mount Wilson Solar Observatory, shows a section of our greatly extended, but very much flattened, Milky Way cloud, with the positions of the spherical clusters projected on the plane of this section. Every cluster is so very far away that we see only its brightest stars. Thus, in the cluster at C Figure 1, the average brightness of the stars which we see is 100 times that of our sun. Our own sun, were it removed to this cluster, would appear to us of magnitude 21.5, and would not appear on any photo-

graph: Sirius, the greatest Dog Star, would appear of magnitude 17.5 and would be just visible.

Moreover, the stars in any spherical cluster are very much crowded together. Within a sphere so large that it includes 20 stars in the vicinity of our sun, there are no less than 15,000 stars in the cluster at C. These are, indeed, marvelous aggregations of stars. Apparently it is only in empty space that the stars of an irregular cloud can, as the ages go by, arrange themselves in a perfectly spherical form. Within our Milky Way cloud, the disturbing pull of innumerable other suns would make this impossible. It is, therefore, not surprising that although the spherical clusters are found upon the borders of our universe of stars, none are found within it.

STORES OF CITY WILL BE CLOSED JULY 5

The Retail Merchant's Association announced yesterday that all stores would be closed at least part of Monday, July 5. Meat markets will probably remain open half a day to supply the restaurants and their customers, but the others will be closed all day.

FOR POLISHING FURNITURE, PIANOS WOODWORK, LEATHER GOODS, ETC.

Apply Johnson's Liquid Prepared Wax with a cloth and in a few minutes polish with a soft woolen or mutton cloth. It imparts a beautiful, durable polish which will not collect dust or show finger prints. It will quickly and permanently remove that bluish, cloudy film from your piano and mahogany furniture. Johnson's prepared wax liquid is splendid for touching up varnished floors. For finishing new floors we recommend Johnson's Paste Prepared Wax. This wax does not freeze or deteriorate. If it becomes too thick, stir.

Figure 1. The Constellations, July 1, 9 a. m. (If facing south hold the map upright. If facing east hold east below. If facing west hold west below. If facing north hold the map inverted.)

constellations, and the whole Summer branch of the Milky Way, from Sagittarius to Cepheus, will well repay examination with a small telescope.

In short, the whole summer sky though so much fainter, will be found no less interesting than that of Winter. Having traced out many of the brighter constellations with the grip of Figure 1, the observer may select any region of the heavens for exploration and study, confident that he will find much of interest in any part. But for this work he should have a good star atlas, which will show him the location of innumerable colored, double and variable stars, as well as the brighter star clusters, nebulas and star clouds.

The Planets in July.

Mercury is so far north of the equator and its eastern elongation, which occurred on June 29, was so great that it may still be seen for many evenings during the first part of July. It should be looked for low in the northwest, just after sunset. In the telescope it will be seen to be very rapidly narrowing to a crescent, as it approaches the sun's rays. It will enter the morning sky on July 24.

Venus enters the evening sky on July 3, but it will be much too close to the sun to be observed during the present month. It will, however, steadily withdraw from the sun's rays and by end of the year it will set more than three hours after sunset. It will then be a very conspicuous object in the western sky.

Mars during the month will move out of Virgo and into Libra. It may be seen approaching the interesting, golden, double star at H, but it will not pass this star until August 9. As the distance of Mars is steadily increasing, it will lose one-third of its brightness occulta of the Red Planet will occur at 1 a. m. on July 23, but this will, unfortunately be invisible throughout the United States, as Mars will have set by this time.

Jupiter is midway between Leo and west that it can be viewed for but a few hours after sunset. On August 22 it becomes a morning star. There are but four phenomena of its satellites which can be seen during the present month as follows: On July 5, 9 hours 2 minutes, the second satellite will enter upon a transit; on July 12, at 8 hours 26 minutes, the first satellite will emerge from transit; on July 18, at 8 hours 18 minutes, the third satellite will disappear behind the planet, and on July 19, at 8 hours 10 minutes, the first satellite will enter upon a transit. (All times are Eastern standard time.)

Saturn is near the center of the constellation Leo. Still in excellent position for observation in the early evening. We now see its rings so nearly edge-wise that they appear very narrow in the telescope, and their width will diminish one-quarter during the

Great achievements - Firm foundations

A great engineering achievement and a successful manufacturing enterprise have one fundamental in common—a solid foundation.

As an engineering feat, Chicago's new bascule bridge is the greatest of its kind. Standing open, its two massive sections reach into the sky like the blades of a giant jack-knife. Closed, it is the main artery of communication between two sections of a vast city.

To carry the tremendous weight of these immense "blades" with their countless tons of steel girders requires a firm foundation—reaching into the very vitals of the earth itself.

As this great bridge typifies solidly founded engineering accomplishment, so does the realm of industry afford two outstanding examples—the houses which manufacture and distribute O and G Inner-Locked Belts.

The principles upon which O and G Inner-Locked Belts are built are deep rooted, basic, founded upon years of practical

experience in oil country conditions, on years of boring deep in the fundamental science and knowledge of belt making.

Among the daily needs of mankind, oil and its by-products are paramount; without them, no machine could run; without them man would remain primitive; for nearly everything that man eats, wears or uses in his daily work at some stage in its manufacture or distribution depends upon oil.

As the bascule type excels the old drawbridge in eliminating waterway obstruction and speeding up traffic, so do O and G Inner-Locked Belts excel all other types in eliminating obstruction to a dependable flow of power in drilling, pumping and compressor service.

They establish at once minimum overhead, a marked discounting of troublesome stretching, slipping "come and go"—a guarantee of maximum production.

DIRECTOR SMITH WARNS AGAINST WIDER USE OF FUEL OIL IF NAVY'S NEEDS TO BE MET

With domestic production of gasoline and fuel oil doubled, and consumption more than doubled, so that Mexican oil has become an absolutely necessary part of our supply, Director George Otis Smith of the United States geological survey warns that this situation cannot long be maintained. The last 10 years, he says, might be called the "petroleum decade." The war depended upon American oil wells for motive power, and the result that these 10 years mark a transition from over-supply to over-demand.

"Ten years ago," he continues, "the wells of the United States were adding to our reserve stocks 15,000,000 barrels in the year; now the current is in the other direction, for in the last nine months our stored petroleum has been drawn upon to the extent of 15,000,000 barrels. In 1919 our imports of oil were an insignificant item, but in 1919 we were obliged to import nearly 47,000,000 barrels of crude oil more than we exported. Ten years ago Mexico was our customer for crude oil as well as for refinery products, but now we realize too keenly our dependence upon the Mexican wells; without the 6,500,000 barrels imported from Mexico in March our present situation would be indeed critical.

In terms of oil, then, the decade 1910-19 is best described as a transition from oversupply to over-demand. And figures already available indicate that in both production and consumption the present year promises a record that will further emphasize this discordance between supply and demand. The first three months of 1920 have established a rate of domestic production that if unchecked will

ad stores of oil—more than 10 per cent gone in nine months—tells the story that we are living beyond our means; and it all leads us to ask ourselves, in this day of apparent plenty, where will our children get the oil they need?

"The response that the petroleum industry has made to the pull of demand during the last few months may be taken by optimists as a measure of what we can expect in the future. An intensive drilling campaign has been the practical response to high prices for crude oil, just as the orgy of newspaper advertising of questionable oil stocks is the reflection of popular interest in the petroleum situation, but even the most wisely directed drilling can give only temporary relief; energetic pushing forward of the production curve only hastens the coming of the year when that curve must turn downward. How soon we may expect the peak of domestic production becomes a very practical question, inasmuch as no one can see any prospect of any let-up in demand.

"The fuel reserves of a nation are

no less essential to its future industrial welfare than the gold reserves are essential to its present financial stability, but once lowered, these reserves of coal and oil in the ground can never be replenished. The official estimate of less than 7,000,000,000 barrels of oil as the quantity remaining available in the ground in the United States is believed to be liberal; but even if we inflate such estimate to be far from ample when we

That has been favorably known and used by millions of Americans in the past 60 years is Dr. Pierce's Golden Medical Discovery. Made of roots and barks, some of which were known and used by the American Indians for centuries, such as blood root, Oregon grape root, stone root, sacred bark, cherry bark. Made in a scientific laboratory at Buffalo, N. Y., and without alcohol. If you want pure, rich, red blood ask at the nearest drug store for Dr. Pierce's Golden Medical Discovery in either tablet or liquid form. You will soon feel the energizing effect and your blood will be recharged with vim, vigor and vitality. Blood poisons are stamped out by this alterative extract.

It's a medicine that starts from the beginning. It rouses every organ into healthy action, purifies and enriches the blood, and through it cleanses and renews the whole system. Blood, Skin, and Scalp Diseases are eradicated. For Tetter, Salt-rheum, Eczema, Boils and Carbuncles it's an excellent remedy.

"Golden Medical Discovery" works equally well at all seasons. Everywhere some neighbor will tell you the good it has done:

GLENDON, WYO.—"When I was twenty years old I had the scarlet fever which left me with a cough and failing health. I was married after that and by the time I was the mother of two children I was a complete wreck—a mere skeleton. I learned of Dr. Pierce's Golden Discovery some way and got three bottles. My strength came back, my cough left me and I found myself well. That was in Nebraska near Fremont, we lived on a farm. Since then whenever I feel ill I get Doctor Pierce's medicine and it builds me up."—MRS. ALICE E. ROBERTS

CHANDLER SIX Famous For Its Marvelous Motor

The Chandler Adds Much to Out-Door Life

JUNE is here and all out-doors calls to us. The long roads to the country and hillside and stream and woods open their arms to us. If you would have a full enjoyment of your trips and tours, make them in the Chandler, a car distinguished for its powerful, flexible and dependable motor, and equally distinguished for its roominess and comfort. Nearly eighty thousand Chandler owners know what a good car it is. They know what it has meant to them, that the Chandler organization for seven years has devoted all its engineering skill and manufacturing experience to the development of the one standard Chandler chassis. They know that Chandler policies have resulted in a chassis which today approximates perfection.

On this one Chandler chassis are mounted six beautiful types of body.

HOW THE CHALMERS HOT SPOT AND RAM'S HORN HAVE INFLUENCED A NATION

SO definite has been the public's acceptance of Hot Spot and Ram's-horn and so highly efficient has the Chalmers become as a result of their use that these two devices now influence a nation.

- 1—They have made buyers of cars insist on an engine that would get out the power that nature stored away in gasoline.
- 2—They have caused a decided demand for less vibration in a car with the attendant results of longer life and more comfort.
- 3—They have caused an insistence for the elimination of frequent spark plug fouling, burned bearings, scored cylinders—eliminations which lower the cost of maintenance.
- 4—They have caused an emphatic demand for cool running on a hot day and quick starting on a cold day.

In other words, the acceptance by the public of Hot Spot and Ram's-horn have recast standards of judging motor cars and this influence now is felt wherever cars are built.

For Hot Spot and Ram's-horn accomplish much by transforming raw, heavy fuel into fine, smooth power and providing new virtues that buyers now seek in a motor car. Hence the growth in public belief that Chalmers is one of the few great cars of the world.

sources of the world has just been published by the chief geologist of the United States geological survey, David White, and his figure of 60,000,000,000 barrels for the whole world is doubtless exact enough to enable us to see the oil situation of the United States in fairly true perspective. Using within our own borders fully half of the world's annual production of petroleum, we seem to possess only about one-seventh of what remains.

"When we come to construct substitutes for petroleum products the capacity of your own steel industry for furnishing benzol and alcohol as by-products deserves first mention. I am informed by Mr. Walker of the Steel Corporation that plants now in operation and under construction have a capacity of 95,000,000 gallons a year; that is, if the output of light oils is converted into motor benzol. Such an annual contribution of less than 2,000,000 barrels, however, is equivalent to not much more than a week's output of gasoline at the refineries of the United States and the alcohol and recovery of alcohol from your coke ovens has not yet begun, but British experience seems to show that the maximum alcohol capacity of the coke ovens of the United States might be less than their benzol capacity. Apparently, then, the benzol and alcohol possibilities of the steel industry cannot be regarded as promising enough motor fuel even to meet the present

increase in demand. It must be recognized, however, that this country, as the world's greatest consumer of coal, has not fairly begun by-product recovery. With the higher cost of coal and this increased demand for by-products more efficient practices must result in the natural course of economic events.

"It is high time for us to begin to weigh the essential uses of petroleum. Oil was first used as an illuminant, but today, whether in the kerosene lamp or the modern front lamp or as gas oil to enrich the gas of the city, this use of a petroleum product is not increasing on the same scale as the industrial uses. In power generation oil takes on much larger economic values, whether as gasoline or as fuel oil. The demand for gasoline seems to obey no law of normal increase, and the higher cost of coal in recent years has greatly stimulated the use of fuel oil under steam boilers. Fortunately, the rapid increase of the consumption of fuel oil by locomotives seems to have been checked at about the same time that it has found a wider use in stationary steam plants.

"Last year the public steam plants, plants of the United States consumed 1,000,000 barrels of fuel oil in generating electricity, nearly half of it in coalless California. In the East the present oil shortage has doubtless started a reaction in the popularity of fuel oil caused by the coal shortage in

the war years. The more adequate and reliable supply of coal must in the long run give coal the advantage for use under stationary boilers, for despite the labor economy attained through use of oil the assurance of an unfailing supply of fuel is of first importance in industry.

"In any weighing of the uses of petroleum, certain changes in practice appear inevitable. The use of gasoline to serve our pleasure cannot go on unchecked—the joy ride is not the kind of 'pursuit of happiness' regarded as an 'unalienable right' by our Revolutionary fathers. The use of fuel oil as a substitute for coal must be discouraged, for our navy and our merchant marine need the fluid fuel for reasons that do not apply to stationary boilers or even steam locomotives. On terra firma a power program can be

worked out that will hitch up coal mine and waterfront efficiently, and both industry and transportation can be fully electrified to the end that except perhaps on the Pacific Coast, not a barrel of oil should be used under boilers. The necessity of caution in enlarging the field of fuel oil is the more apparent when we realize that, as suggested by the Bureau of Mines, every increase in demand for other petroleum products for a higher use entails a loss in the percentage of fuel oil produced.

"This need for oil to insure our industrial life inspires the call for pioneering on other continents by American oil companies. In the world estimates we credit South America with a third more oil reserves than the United States, so that one guidepost for the explorer and developer points to the south."

Why the Sands Sing.
The singing sands of Lake Michigan are found everywhere near the water's edge throughout the dune region, which borders nearly the whole eastern side of the lake from Gary to Mackinac. The characteristic sound is heard when one walks in the sand or pushes a stick or other object through it, but only when the sand is dry. The

sound-producing sands only extend back from the water as far as the line of driftwood, indicating the boundary reached by waves during storms; beyond this limit sand having exactly the same appearance, microscopic as well as macroscopic, produces no sound. W. D. Richardson in Science suggests that periodical wetting by the water of the lake deposits a thin

film of salts, including calcium and magnesium carbonates, upon the grains of sand. This film creates considerable friction when the grains are rubbed together and thus causes the sound, the effect being similar to that of rosin on a violin bow.

Proving Essex Reliability
A Fact Not to be Disregarded

One cannot ignore the Essex performance of 3037 miles in 50 hours when considering light car endurance.

In fact no car ever was driven at top speed for such a distance or for so long a period of time.

But if any doubt remained after that official proof made with a stock Essex, the 40,000 cars in service each shows the degree of Essex reliability.

Thousands of Essex cars show in excess of 25,000 miles service each.

And owners by their testimony are daily establishing the Essex not only as the most amazing light car from the standpoint of performance, but also as the equal of the costly large cars in the question of endurance and freedom from mechanical attention and expense.

KNOWLEDGE FOR CAR OWNERS

Interesting and Important Facts That Every Motorist Should Know.

To secure long service from tires be sure that they are properly inflated.

Soap should never be used on the body of a car except for removing grease and oil spots.

Remove grease, oil and acids from your tires at once by using a cloth moistened with gasoline.

When oiling the front wheels, take off the dust cap and remove the wheel and pack the bearings in a medium hard cup grease. This should be done once in every 500 miles of driving.

This is the time of the year to renew the rubber tubing in the cooling system. This material in time is likely to take off in the water line, partially blocking the flow.

When driving in the mud never try to force the car in high gear, causing the wheels to spin. Always shift to a lower gear, then take it slowly. If the car stops, reverse and back up for several feet. This will give you a chance to gain momentum to overcome the obstruction. Forcing the engine and spinning the wheels, only tends to dig a hole.

Every car owner should check up the alignment of the front wheels at least twice a year. If the wheels suffer a shock, even a crash against the curb, it is advisable to check up the alignment. In case the front tires show signs of excessive wear, it may be assumed at once that the wheels are out of alignment. This condition may be corrected by adjusting the tie rod, which runs from one steering knuckle to the other and has a movable section at each end.

Despite vagaries of some motorists that springs do not need lubrication, spring makers design their product to have a certain amount of "interleaf friction" and when the leaves are spread, cleaned and sandwiched with a heavy graphite lubricant, the riding qualities of a car are noticeably improved. When there is not time enough to do this, some authorities recommend that the sides and bottom of the spring be wiped of all foreign matter and that these faces be painted with used engine oil. This will soon work between the leaves. After a short drive the excess oil should be wiped off.

A very small cut, especially in the rubber tread of a rear wheel, will usually permit the entrance of sand or dirt, which will work along into a pocket between the tread and the fabric and as a result will form a bunch that will soon wear through and make a serious tire injury. Such a bunch should be cut open, the wound be cleaned out and filled with gum, and vulcanized if it is big enough to warrant the operation.

When examining the inside of a casing for a puncture, fabric break or weak spot, most of us try to force the

Cadillac

for sale. Model 55 in fine condition. Victory Motor Co.

908 Scott. Phone 2180

necessary is to remove the cotter pin, turn down the nut, insert the pin again and all is well. If play has developed in the gears, an adjustment is usually provided just above the case in which the gears are housed. Generally this takes the form of a serrated nut, held in place by a pin. The pin is removed by a screwdriver, the nut is turned slightly and the pin is put back. Each time the nut is turned the steering should be tested.

Modern Inventions Suggested by Nature.

The ram of the modern men-of-war is the device of the swordfish of the Indo-Pacific ocean. Its upper jaw has a long beak or ram, by means of which it can pierce not only fish, but the sides of timber-built ships. Even the plants have forestalled human inventions. Nearly everybody, perhaps, has wondered why the stems of nearly all plants and the trunks and branches of trees are round instead of any other shape. The existence of tall plants and trees depends largely on the wind force. And a tree with a square trunk and branches would offer so much resistance to the wind that it would be continually having its branches snapped. It is for the same reason that engineers build tall chimneys and piers for bridges round in section in preference to any other form.

THE RUHR BASIN

WASHINGTON, June 27.—The Ruhr basin was the power plant of Germany's former industrial machine and mighty war engine, hence it is not surprising France should be suspicious of any movement which might lead to jockeying by 'junkers' to regain control there, says a bulletin from the Washington headquarters of the National Geographic Society.

twelfth the size of our own Pittsburgh, comparable in economic importance to that municipal child of the Ohio and Allegheny rivers. The entire region might be likened to western Pennsylvania.

"Between the Rhine and the Ruhr is Duisburg, city of rolling mills, foundries and factories. Once this beehive of industry was a university town, and a grimy memorial fountain to Gerhardt Marcarot, laid out form of Gerhard Kremer, is a reminder that the inventor of the famous map projection method was associated with Cassander who, nearly four centuries ago, was commissioned to found the University of Duisburg. Kremer was not a German, it should be noted, but a Flemish geographer who studied at Louvain.

"But the crown jewel of the 'kultur' which drove the earlier culture of university life out of the Ruhr basin was Essen. Essen, too, experienced a transformation, for it originally was the site of a Benedictine convent. For three centuries preceding its incorporation into Prussia, Essen was gov-

erned by the Abess, who became ex-officio, a princess. Duisburg is connected with the Ruhr by a canal.

"Though the Krupp works were founded in 1812, the year 1848 saw them with only 70 employees. But with the advent of railways and cast steel, guns the Krupp works expanded rapidly and their subsequent story is world famous—or infamous—for their incubation of wars.

"Muhlheim is a railway center, seven miles northwest of Essen, where convergence of rail and water routes brought an enormous traffic. Four miles east of Essen is another Ruhr river port, Steele, a mining town with iron and steel works, also noted for its fireproof bricks.

of Berg when that state was a Ne-Joleonic duchy, and passed to Prussia, with the rest of Berg, in 1818.

"The Ruhr basin coal fields not only were important to the German empire because of their heavy production, but because they alone were accessible for water importation of ores. A canal connected Dortmund, a city of the Ruhr basin with the Enns River, thus affording an outlet directly to the North Sea at Emden.

"A by-product of this development of water transportation to care for the coal mining and the attendant iron and steel industry, was the growth of textile manufactures. In cotton spinning the Ruhr basin held first place in Germany. Nearly a third of the spindles in the empire were located here.

"The Ruhr was made navigable from the Rhine to Witten, some 43 miles, by means of locks. Even then low water frequently hampered navigation."

IF the HUPMOBILE were a living creature, the word devotion would exactly describe the qualities which actually endear it to the average family.

It so seldom sulks; it is so ready and willing; it performs so faithfully, that it repays, over and over, the confidence people place in it.

Without question, these are the underlying reasons for the great good will in which the Hupmobile is held everywhere.

PAIGE

THE MOST BEAUTIFUL CAR IN AMERICA

AMERICAN business has been motorized. For both short and long hauls, the gasoline truck has proven itself a thoroughly efficient form of transportation.

And no intelligent field executive would dream of tackling his job without the proper equipment—a dependable touring car or roadster.

It would amaze you to know

how many lawyers, doctors, architects, contractors and specialty salesmen have adopted the Paige. These men have bought their cars for active service and they have been influenced in their selection by practical considerations only.

They deliberately sought out the car that would offer the greatest dollar-for-dollar value—and they found it in the PAIGE.

The Salvation Army's Home Service

"Just last Sunday we took a little six weeks old baby into our home to be cared for. We will get some good family to adopt it later."

This is but a sample of one of the reports that are daily received by Lieutenant Colonel George Wood, Chief Divisional Officer of the Salvation Army at Dallas, Texas. From the Mississippi River across Louisiana and Texas as far west as El Paso and up to the north till it includes the whole of Oklahoma, Colonel Wood's territory stretches in all these thousands of square miles, day after day, Salvation Army men and women are daily going about their self appointed task of helping make the world a better place to live in.

Even in the sparsely settled districts along the Mexican border the Salvation Army is on the job. Traveling from one settlement to another, from one army post to the next one and from one cow camp to the next one Estelita Roy Mallott is in the field constantly.

But the reports that come in from day to day are the ones that carry the day to day the ones that carry the training college all Salvation Army officers, men and women both, are taught how to do the things they preach themselves. If they find a house that needs cleaning up before the people who live in it are to be cleaned then the Salvation Army officer knows how to take off his coat and do the work himself. If it is a sick man or woman needing careful nursing, then it is the Salvation Army officer who knows just how to go about the case in the field.

With the hapless little youngsters, thousands of whom are cared for by the Salvation Army every year, it is a labor of sheer love.

Cast adrift through no fault of their own, when these little toddlers come into the hands of the Salvation Army they have found friends who are tried and true.

The case cited by Adjutant E. W. Morris at Texarkana occurred only a week ago. The baby has no home but the Salvation Army officer and his wife made one for it. Now Adjutant Morris is busy himself finding a permanent home, possibly with some family that has not been blessed with children of its own, for the child who has been turned over to his care.

In one of the inter-mountain provinces a short time ago a very similar case occurred. A widow brought her young boy to a large city from the rural district. The mother was ill. Within two days she died, died in the Salvation Army officer's own home, for the poor woman had no other place to go. Through the interest of

other, be successfully solved by one or another of the Salvation Army's sixteen major activities. The Advisory boards are in every case the connecting link between the trained personnel of the Salvation Army and those that need their help and assistance. Bankers, lawyers, business men in every line and in fact the best elements in every county have realized that the Salvation Army is ready and

willing to render a service of infinite value and are rapidly taking advantage of the opportunity offered. Already more than a score of county advisory boards have been completely organized in Texas, Louisiana and Arkansas, ready to carry out the tried methods of the army, methods that have in the 40 years of the army's operations in this country, proved successful in nearly every case.

The Tulsa Rear Axle Takes the Punishment---Lots of It

The Rear Axle is one of the most important units in an automobile. It must carry the burden—take all of the hard knocks, bumps and strains. No ordinary rear axle would meet the strength, service and safety specifications laid down by our Engineers for the TULSA. So the nationally famous SALISBURY rear Axle was selected.

Designed to Carry a 4,000-lb. Car—Yet the Tulsa Weighs Only About 2,500

While designed primarily for the "Oil Field Special," this rear axle has given such remarkable service over the rugged Oil Field Roads, that it has been adopted for the Touring and Roadster models. With its pressed steel housing, spiral bevel drive and pinion gears, Timken roller bearings in the differential, and sturdy shafts; this unit is as nearly perfect mechanically as modern engineering skill can produce. But this is only one of the many TULSA features you should know about. Come in and let us tell you more.

THE MOTORISTS' PROBLEMS

By WILLIAM H. STEWART, JR.

Motor Department: I have a 1911 Chalmers car. When it is running on magneto it will jump continually and lose power, while it runs fine on the battery. Please give me the cause and remedy, which I assure you will be appreciated.—Reader.

Clean circuit-breaker points, file them smooth and see that they open not more than 1-64 inch. Clean distributor inside and out. Try car again. If trouble continues the magneto must be sent to a service station. Perhaps the magnets are weak and need re-magnetizing.

Motor Department: It was only a week ago that I cleaned the carbon from my motor, put the head back and tightened the bolts well. I have no leak, but still it has a little knock and will not take a hill. I also have noticed it throws a lot of heat from the motor after running about two miles. This is a Ford car and am supposed to get about fifteen miles, but I never get any more than ten miles to the gallon. Will you kindly let me know if water was sucked in through the manifold would that in any way prevent carbon? If piston rings were worn, how could I tell? Thanking you for this information, I am.—Reader.

If carbon has been thoroughly removed the knock may be in push-rods, connecting rods or main bearings. If engine overheats clean out cooling system with washing soda. Carburetor may be out of adjustment or air valve stuck, which would cause excess carbon, overheating and cut down the mileage. Water fed into the manifold in small and proper quantities has been found to reduce carbon. If rings are badly worn engine loses compression and sucks too much oil up into combustion chamber.

Motor Department: I have had my engine on Overland car, model 49-1915, out and gave it a good overhauling. Magneto was taken apart and cleaned. Everything looked to be in first class shape, but on taking her out today she misses explosions. Engine seems to work well when idle, but just as soon as I increase the gas it misses—and sometimes stops altogether. It loses power when in second speed. Engine is equipped with Schebler carburetor, model L. Had no trouble before taking engine down. Where shall I look for trouble?—V. S.

It is just possible the magneto was not properly reassembled. Disconnect from drive shaft. Turn until the armature resists and then let go. Circuit breaker should open at this point. See that the distributor gear and armature gear meet at points marked, so that brush covers a contact when the breaker points open. Spin armature by hand and see if spark comes from distributor. Then connect to drive shaft and wire up to produce a spark in No. 1 cylinder, exactly on firing dead centre. It is just possible that you have set the spark connections to retard instead of advance, when spark control lever is moved. Adjust spray nozzle for best speed with engine throttled down and then flash throttle open and adjust air valve so that no popping occurs in carburetor. Check valve timing and valve clearance. Also make sure there are no air leaks in carburetor manifold connections. It is assumed that compression is good in each cylinder when engine is heated.

Motor Dept.: My car is a 1916 Oakland six, Remy ignition, single wire, single-bulb lights, with resistance coil for dimming. (1) When engine is idle do the dim lights draw as much current from the storage battery as the full headlights? (2) Do you consider the five-point (electrode) spark plug more effective than the two-point plug? (3) Please give the correct method of refinishing a steering wheel, previous finish of which was ebony black. (4) I am somewhat of a mechanic and do nearly all of my own repair work, but would appreciate your advice as to any part or parts which might have escaped my attention. I believe my car has been driven about 7,500 miles. I thank you in advance.—H. D.

(1) Yes, the extra current is lost in the resistance coil. (2) The five-point plug affords more points from which current can jump as points heat up or burn away. (3) You would best consult your nearest dealer in auto supplies. There are a number of reliable stains and enamels on the market. (4) By carefully watching this department you will obtain many hints.

Motor Department: In overhauling my Model R Continental engine I note there is a small amount of play in the main bearings. It is hardly noticeable

to the "feel," but it can be detected by using a jack. I know it is a difficult and laborious task to tighten these bearings, so I do not want to tackle it unless I know it is absolutely necessary. Can any harm result from this looseness? In installing new connecting rod bushings, do they have to be fitted or scraped if the crank shaft appears to be in good condition?—G. H.

Any looseness in main bearings is a serious matter which tends to grow worse. It will soon develop a knock and may cause a serious break. Have it remedied immediately. New bushings should be scraped to a perfect fit. This involves the use of Prussian blue and a scraper and should be done by a skilled workman.

Motor Department: I have a Studebaker 1915 model, six cylinder, equipped with a Kellogg pump. This pump worked good for about the first year, but since then it has been of little or no service. I took it to the Kellogg people, but they could not fix it. Could you kindly tell me of any other place I could take it to. My lights do not work. Do you think it is a short circuit or a crossed wire? How could I locate the trouble and remedy it? Do you know where I could buy a lens for the front head light? A second hand one would do. I had the cable cord, stolen from my speedometer to the front wheel. Do you know where I could get another? Where could I get some hands for my gasoline gauge? Must I get a new clock? Is the clock movable? Is there any way I could get better mileage on my gasoline? I only average about eight to ten miles a gallon.—E. K.

If the Kellogg service station cannot fix your pump it is probably beyond repair. Have your lighting system inspected by an expert. Locate some lamp repair man in your neighborhood for a lens. The speedometer cable will be supplied by the manufacturer's agent in your neighborhood. The Studebaker Company will supply you with a new gasoline gauge and clock. For better mileage have carburetor readjusted and keep spark well advanced while driving.

Motor Department: (1) How can you tell a Ford oversize piston from a regular piston? (2) When running my Ford car in high speed there seems to be a jerk in it forward and backward. Rear system and transmission bands are practically new. What would you advise as a remedy for this? (3) Are all Fords one hundred inch wheel-base? (4) What would cause the carburetor to spit fire? Spark plugs and timer seem to be O. K. (5) What does a Ford touring car weigh? (6) When running on a straight road is the spider in differential turning or is it stationary to the drive gear?—K. R.

(1) The Ford piston is 3-34 inches in diameter. Oversize pistons are larger. 2) Possibly the front springs are weakening, allowing the motion you mention. 3) Yes. 4) Lean mixture, a leaky inlet valve, or timer may be short-circuited. 5) 1,266 lbs. 6) The spider carrying the bevel pinions in the differential is always turning whenever both wheels turn backward or forward.

Motor Department: What is meant by a "stone bruise"?—J. R.

A stone bruise in a shoe is due to a blow from a stone or other hard substance while running at high speed or at medium speed with tire partly deflated. The shoe is pinched between the stone and the rim and the fabric is broken. This makes a weak spot

in the tread or side wall and soon there is a blow-out. You may demonstrate this as follows: Lay a piece of inner tube on a hard surface, place thin piece of cloth on that, and another piece of tube on top. Use a single thickness of tube top and bottom. Strike a heavy blow with the edge of a hammer. The cloth will be broken where it was hit.

A gauge which can be reached by hand is better, since it may be moved up and down to see if it is free. It gives a striking object lesson when the oil base has not been cleaned out for several thousand miles. On pushing the float down into the heavy oil muck at the bottom it stays there, showing the need of a thorough cleaning.

It is dangerous practice to put kerosene into the crank case and then to run the engine to cut the muck and so drain it out with the kerosene. The bottom of the oil base is covered with grit, metal chips and other fine grinding material which will be stirred up and forced into the bearings. To avoid this remove the oil base and clean by hand.

Fordson Service

Service is the most abused word in the English tongue today.

Proclaimed glibly by thousands without a thought or obligation, the real meaning of Service is little known by many and the actual rendering of Service finds still fewer disciples.

With the Fordson Tractor, real Service is offered in the tractor field of the highest order. As the Ford automobile has built its monument on the cornerstone of Service, so the tractor, a new product of the genius of Mr. Ford, is building—not for a few days or years—but for all time.

The tractor itself is made as durable, dependable, efficient and economical as the best engineering skill, the finest materials and workmanship can make it. That is the Factory SERVICE.

Wherever a Fordson tractor is sold, there you will find parts and mechanical aid as quickly and as easily available as the kerosene you put into your tank. That is the Dealer's SERVICE.

To own a Fordson is to own a tractor that will SERVE you every working day in the year.
