

## CONVENTION IN DEADLOCK

### GEN. WM. C. GORGAS DIES IN ENGLAND

Famous Officer Known as Fighter of Yellow Fever

LONDON, Sunday, July 4.—Major General William C. Gorgas, former surgeon general of the United States army, died at an early hour this morning.

Major General William C. Gorgas was considered one of the world's foremost authorities on military medicine and surgery. He fought and defeated the malaria mosquito in Panama and thus made possible the building of that great waterway. He dispelled yellow fever from its century-old stronghold in Havana, and under the direction of the United States government and the Rockefeller Foundation supervised campaigns against that disease in Central America, Peru and Ecuador.

At the invitation of the British government he went to South Africa in 1911 to establish sanitary conditions in the Rand, as a result of which he received his honors from the medical profession in London and Oxford University conferred a degree upon him.

General Gorgas had been in a critical condition for the past three weeks. He went to London preparatory to a mission to West Africa in behalf of the British government to investigate sanitary conditions, but suffered a stroke of apoplexy and was sent to a hospital for treatment.

General Gorgas was very popular. He was unconscious most of the time the last few days, according to the hospital attendants, and was not even able to recognize Mrs. Gorgas, Brigadier General Robert E. Noble, assistant surgeon general of the army, the only Americans present at the end.

Dr. J. J. Kennedy, medical consultant at the hospital, was in constant waiting on General Gorgas and every facility was afforded by the British military authorities for proper medical attention.

It was stated by General Noble that Bright's disease was the immediate cause of his death.

On the morning of May 30, General Gorgas suffered a stroke of apoplexy and was removed to Queen Alexandra hospital, where his death occurred. For a time there was hope of recovery, but kidney complications developed.

The body will be brought to the United States.

In the last 10 years his services were sought to give battle to plagues in many parts of the world. When the typhoid epidemic broke out in France during the war an effort was made to have him undertake the campaign against it but at that time he was needed to direct the medical service in France.

He was decorated by the French government and made a commander of the Legion of Honor. The king of the Kingdom of Greece, the latter for his services in the Balkans, made him a knight of the Order of the Star of the Danube.

When General Gorgas became general sanitary officer of the canal zone, his annual death toll had been reduced but it was still difficult to obtain the vast army of workmen necessary and to care for those disabled by malaria, yellow fever and dysentery.

In nine years, by a systematic campaign for the destruction of the mosquito, General Gorgas cleaned up the yellow fever scourge and his plans were the work of a major in the great men of medical science.

In recognition of his services he was made a member of the Isthmian commission and served as such until he was made surgeon general.

His work in combating yellow fever in Havana, Cuba, and in the Spanish war, when he remained as sanitary officer of the island, Havana, has again been recognized as the greatest of his life.

When in the canal zone, General Gorgas visited Guayaquil and mapped out a plan to rid that city, long known as the "pesthole of the Pacific," from the yellow fever scourge and his plan was in process of execution when the great war began.

Organized Extensive Stem.

Soon after the United States entered the world war General Gorgas announced the organization of the extensive system devised for the "reconstruction" of the crippled and maimed men which included the establishment of orthopedic hospitals behind the firing lines in France, reconstruction hospitals in the green zone of America, and the restraining of crippled men and preparation for returning their vocations or learning new ones.

General Gorgas reached the age limit while still on duty in France in 1918. When the war was over he was retired from active service in the army. Subsequently in 1919 he was head of the yellow fever commission organized by the Rockefeller Foundation and in that capacity made an extensive tour of Central and South America to direct the work of eradicating yellow fever from some of its breeding centers, notably in Peru and Ecuador.

General Gorgas of England conferred upon him in June, 1920, the decoration of Knight Commander of the Order of Saint Michael and Saint George.

### BAILEY LACKING IN SOLID ACHIEVEMENT

Senator Sheppard Again Cites Former Senator's Record as His Reputation

Special to The Times: WASHINGTON, July 3.—Declaring that former Senator Bailey's record in congress was spectacular, but lacking in solid achievement, Senator Sheppard, answering Mr. Bailey's defense of his (Bailey's) record in congress, made a charge and cited what he declared were the only legislative enactments with which Bailey could be credited.

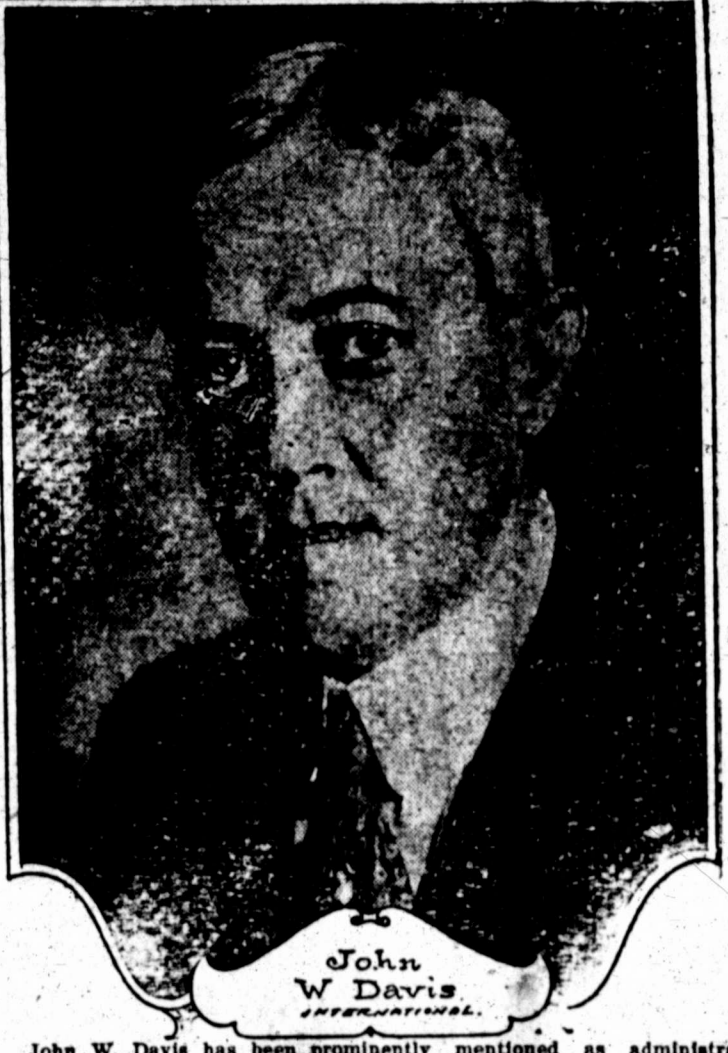

His statement follows: "Mr. Bailey's attempt in his Atlanta speech last Saturday to answer my assertion regarding his legislative record is merely another example of his characteristic recklessness and inaccuracy of statements he said that he put through no constructive legislation because the Republicans were in control while he was in congress. I call attention to the fact that the second congress in which he served, the 53rd, was controlled in the senate and House by the Democrats, and that the President also was a Democrat and yet the sum of his contribution to American legislation during the 53rd Congress, so far as measures of his own were concerned, comprised an act regulating the fees of the United States court for the Indian Territory, an act authorizing purchasers of property and franchises of the Choctaw, Chickasaw and Creek companies to organize a corporation and confer on the same all powers and privileges and franchises vested in that company and a resolution making it a crime for the secretary of the treasury regarding treasury notes.

"Mr. Bailey said in his Atlanta speech that he could not pass any important bills. He said that he introduced later in the same speech a number of bills which he claimed were of great importance. Most of the Bailey bills which became laws during the 53rd Congress were enacted by Republican congresses after having been reported by Republican committees. I have heretofore given a list of these measures in support of the contention that his record is barren of extraordinary legislative accomplishment. Furthermore, let me say that the fact that Republicans are in control of congress does not prevent a Democratic member from introducing measures and thereby showing that he is giving the people his best. Mr. Bailey in both his Republican and Democratic congresses will show the same lack of constructive legislation that he has shown in his excuse, therefore, for his failure to introduce or pass any measures of a great constructive nature in the interest of the people during his service in congress.

"Mr. Bailey intimated that my recent review of his record was not based on personal examination. That is true. My review was based on a personal study which I made of his entire service.

"Mr. Bailey speaks of political honors and committee honors in congress, but he does not mention that too many congressmen seek and fight over at the expense of their constituents and herein lies the trouble with Bailey's record—spectacular but lacking solid achievement."

### POSSIBLE DARK HORSE

John W. Davis has been prominently mentioned as administration choice in event of deadlock between big three.

### COX LEADS CANDIDATES FOR NOMINATION; DEADLOCK MAY GIVE DARK HORSE VICTORY

AUDITORIUM, July 3.—After twenty-two fruitless ballots the Democratic national convention just before midnight gave up hopes of selecting a presidential nominee within the first week of its discussion and adjourned about 10 o'clock Monday morning.

Repeated attempts to adjourn were defeated throughout the early part of the night, but at midnight adjournment was declared and the convention adjourned.

The final ballots of the night were for Cox 28, McAdoo 12, and Palmer 12. Palmer was down to a hundred and sixty-six and a half.

The final ballots of the night were for Cox 28, McAdoo 12, and Palmer 12. Palmer was down to a hundred and sixty-six and a half.

The final ballots of the night were for Cox 28, McAdoo 12, and Palmer 12. Palmer was down to a hundred and sixty-six and a half.

### FACTIONS HOLD CONFERENCES IN EFFORTS TO STRENGTHEN RANKS AND CHECK LEADERS

AUDITORIUM, July 3.—The Cox, McAdoo and Palmer forces and those hoping to develop a dark horse spent the hours between recess and reassembly at 8 p. m. tonight in hurried conferences and desperate efforts to line up a compromise ticket. Word from Washington that President Wilson was pursuing a hands off policy added to the confusion of the situation.

Despite the statement of some administration leaders that it cannot go to Cox, the Cox forces pointed out that the dark horse movement had found no rallying point and that Cox still remained a potential force which from a small number at the start had taken the lead in the balloting and nosed McAdoo out of first place.

The Palmer vote dwindled away much to the dismay of the Pennsylvanians who loyally stood by the attorney general all the way through. The recess averaging that the successful forces would be obliged to concentrate on a dark horse.

Outwardly there was little prospect of a get-together movement between the three leaders and the general indications were that the convention going over next week would be held by many of the leaders planned to hold the convention in session through the night if necessary and said they were sure the would be a nominee before daylight.

### HARDING ON WAY TO MARION, O., BY AUTO

WASHINGTON, July 3.—Senator Harding, the republican presidential candidate, today was on the way back to his home town of Marion, Ohio. Leaving here by automobile at 1:00 o'clock today, the senator and his party planned to spend the night at Cumberland, Md., the 140 mile drive to that city being scheduled as a "no stop" run. All of tomorrow will be spent on the road, the party drawing up during the evening at some Ohio village to spend the night.

Mr. Harding is expected to arrive at Marion at midday today. There the hopefuls are planning an elaborate home-coming celebration to honor the first visit home of the senator since his nomination. No announcement of the candidate's immediate plans preceded his departure but it is expected that he will return to Marion for conferences. This program, interspersed with an occasional "front porch speech" will continue after the notification for Mr. Harding.

### WILSON IS SILENT ON CHOICE OF MAN

WASHINGTON, July 3.—President Wilson has not expressed an opinion to anyone with reference to a particular candidate for the presidency. The president's silence on the subject was noted by a White House spokesman today.

The statement denied emphatically rumors, which it was said the White House had been circulating in San Francisco and said to be to the effect that the president had expressed a preference as to the party's candidate.

President's Statement.

The statement as issued at the White House said: "When a report was brought to Secretary Tumulty's attention of rumors being circulated in San Francisco that the president had expressed an opinion with reference to a particular candidate, he made the following statement: "This is news to me. I had discussed all phases of this convention with the president and had been intimate with him during his continuance, and I am positive that he has not expressed an opinion to anyone with reference to a particular candidate. It has in my way been his policy to refrain from taking any stand that might be construed as dictation."

### M'ADOO REFUSES TO DISCUSS POLITICS

HUNTINGTON, N. Y., July 3.—William G. Bixby, McAdoo's parent, today was unopposed with what was going on at the San Francisco convention. He attended a Shakespearean pageant at the Conklin estate and on his return to his home, again declined to discuss politics for publication.

During the afternoon and evening, friends in New York kept him informed by telephone of the balloting. Other happenings at the convention were supplied by newspapermen who were invited by McAdoo.

Mr. McAdoo got up about 9 o'clock this morning and after going through his personal correspondence, read the platform in the morning newspaper. He then went to bed and assumed he is pleased with the platform. Mr. McAdoo, it is said, did not get news of the two ballots taken by the convention last night until he had read the papers this morning.

### FREIGHT RATE ISSUE IS NEARING CLOSE

WASHINGTON, July 3.—Concluding arguments on the applications of the railroads of the country for increased freight rates to net an additional billion dollars yearly began today before the Interstate Commerce Commission by representatives of shippers.

Shippers generally conceded the need for increased revenues by which the roads might give adequate transportation service, but differed as to methods for providing the return.

R. C. Fulbright of Houston, Texas, representing the southwestern industrial traffic league, advocated a separate tariff and 100 per cent increase of the southwest as distinct from the western classification territory of which they are part.

### SIXTEEN KILLED IN PA. TRAIN DISASTER

SCRANTON, Pa., July 3.—Sixteen people were killed and over fifty injured in a wreck on the Lackawanna & Wyoming Valley electric railroad, near South Pittston station shortly before 8 o'clock tonight.

In a collision between three cars on the Lackawanna & Wyoming Valley railroad near South Pittston station at 7:30 o'clock eighteen people are reported killed and 100 injured. The accident occurred near South Pittston when lightning struck a telegraph pole along the line of the track and the pole fell over the tracks in front of a car bound for Scranton.

A moment later a limited car crashed into the rear of the car that struck the pole and a third car telescoped the second car. All three cars were piled in a heap.

Many of those killed and injured had attended the annual games of the Caledonian Club of Scranton and Pittston at Valley View Park this afternoon. Most of the injured have been taken to the state hospital at Pittston.

### WRITS SERVED ON SOVIET TRADE COMMISSION

LONDON, July 3.—Writs have been served on the soviet trade mission here to secure sequestration of its property for the satisfaction of allied creditors of the soviet government, according to the Herald.

The newspaper adds the action will raise the international question of the right of a revolutionary government to nationalize industry without compensation to stockholders and adjust debts contracted by its predecessor. Sir Edward Carson, the Ulster leader in the house of commons, has been retained by attorneys for the soviet mission.

### OHIOAN INCREASES VOTE ON THIRTEENTH BALLOT

AUDITORIUM, July 3.—Thirteen ballots still found the democratic convention without a nominee. Cox continued to climb and had taken the lead from McAdoo and also the veto power of one-third which his opponent had held throughout the 12th ballot.

Steadily increasing on every ballot, the Ohioan took most of the concessions from many of the large states and scattering votes from the smaller ones.

Despite the gain of Cox, there seemed no prospect of enough of a break to nominate anybody when the convention went into the 14th ballot.

### INSURGENT FORCES HAVE DEFEATED GOMEZ TROOPS

MEXICO CITY, July 3.—Forces commanded by Carlos Osona, insurgent leader, operating in the state of Tamaulipas, have again been defeated and scattered by General Arnulfo R. Gomez, according to an official report to the war department last night.

When he began his uprising a few days ago, Osona had 12,000 men with him, but he is now fleeing with only 80 loyal supporters, it is said.

Jesus M. Guajardo began an insurrection at Barmujillo, state of Durango, some time ago, but he is now fleeing, according to announcement, and federal troops are but 12 miles behind him.

### HOUSTON IS THIRD IN CENSUS REPORT

Announcement of the population of Houston, Texas, as 138,076, increase of 59.276 or 75.2 percent places Houston as the third leading city, from a population viewpoint in Texas, of cities reported.

Several cities have not been announced, however, in all likelihood there is only one city of any size, whose census has not been announced. Fort Worth will probably run the southern city a close race.

Houston, Texas, 138,076, increase 59,276 or 75.2 per cent.

Little Rock, Ark., 64,997, increase 19,056 or 41.5 per cent.

North Little Rock, 14,048, increase 2,910 or 26.1 per cent.

Greensboro, N. C., 19,746, increase 3,951 or 34.2 per cent.

### PA. TRAIN DISASTER

SCRANTON, Pa., July 3.—Sixteen people were killed and over fifty injured in a wreck on the Lackawanna & Wyoming Valley electric railroad, near South Pittston station shortly before 8 o'clock tonight.

In a collision between three cars on the Lackawanna & Wyoming Valley railroad near South Pittston station at 7:30 o'clock eighteen people are reported killed and 100 injured. The accident occurred near South Pittston when lightning struck a telegraph pole along the line of the track and the pole fell over the tracks in front of a car bound for Scranton.

A moment later a limited car crashed into the rear of the car that struck the pole and a third car telescoped the second car. All three cars were piled in a heap.

Many of those killed and injured had attended the annual games of the Caledonian Club of Scranton and Pittston at Valley View Park this afternoon. Most of the injured have been taken to the state hospital at Pittston.

### GENERAL ELECTRIC CO. STRIKE IS AVERTED

LYNN, July 3.—A general strike of the 15,000 employees of the General Electric Company here, which had been voted by all craft unions in the plant, has been avoided by a settlement of differences. It was announced today.

### ALABAMA 24: GLASS 12, DAVIS 5, COX 6, McADOO 12

Alabama 24: Glass 12, Davis 5, Cox 6, McAdoo 12.

Arizona 8: Cox 3, McAdoo 3, Glass 13.

Hawaii 6: McAdoo 2, Palmer 4, Philippines 6: Palmer 1, Cox 1, McAdoo 4.

Porto Rico 6: Cummings 1, Palmer 2, Davis 1, Glass 1, McAdoo 1.

Canal Zone 2: Palmer 1, McAdoo 1.

The tenth ballot as officially announced follows: Total votes 1081-12. Palmer 257; Cummings 18; Owen 37; Smith 7; Davis 32; Glass 25; Marshall 12; Clark 5; Gerard 1.

### CONVENTIONALITIES

"I would rather," cried Bryan, "have the gratitude of one soul saved from drink than the applause of a drunken world." He got applause but it was from the dregs. The jovial gallery joined in with "save me, Bryan."

When Bainbridge C. By declared that the policy of a republican convention was to get a man for the office first, and let anybody draft a platform, even the democrats, if they wanted to, Hiram Johnson's smile was almost appreciative.

Every time Bryan helped himself from the water pitcher during his discourse upon the liquor plank, a gallery god took the opportunity to break out with "Bright Bryan, 's have another drink."

The 100 police officers who are holding their lines stubbornly against all comers are beginning to understand what the 1,000 Chicago policemen did to occupy their time during the late republican fireworks there.

"You can get me, but you won't get by the fellow at the other door," said a doorkeeper at the auditorium to a talkative, but ticketless stranger who had "budded" his way into the auditorium.

The second doorkeeper closely scrutinized the gilt-tongued stranger without a ticket, without a pass, without credentials of any kind but his nerve.

"That first doorkeeper said it was all right; if it wasn't he wouldn't have let me in," argued the stranger once.

"Well, if he let you in, I guess it must be all right," said the second doorkeeper, "so ahead."

What one can not understand is the number of old men wearing messenger badges, the number of dignified gentlemen wearing pass badges, the youths and high school girls wearing delegate badges.

Several tired newspaper men cursed roundly when they returned to their room to find the following note at 11:30 p. m. after the convention adjourned:

"If you want drink come up to room 1234 before 11. After that 'twill be too late."

The Texas crowd generally was reported to have cashed in heavily when McAdoo led in the first balloting. Someone was heard to offer a wager that the former secretary would lead the field on the initial contest.

"Who's got all that money?" came a voice from the crowd. "It magnate could have it," was the reply.

Few men in the United States have taken the punishment that William J. Bryan has during his political career. Yet no politician in the country's history has proven so good a loser as Bryan.

When he finished what many believed to be the greatest oratorical effort of his life—his plea for a sober nation—applause thundered and roared through the convention hall. From the demonstration it seemed surely that he had won his case. And yet—when the final roll call came, Bryan's bone-dry plank was squashed by a vote of 6 to 1. Then it was that he characterized self-control. Only a few before

the vast auditorium had reverberated with acclamation of Bryan. Now he had been crushed in full view of thousands of applauders.

His jaw muscles seemed embossed in the glaring spot light. His eyes shone with determination even in so utter a defeat. But those in the press section, close to the rostrum, saw those eyes grow moist—and two tears drip slowly down his features, the great audience saw—only Bryan.

### MOTOR CAR PASSENGER TRANSPORTATION EXCEEDS THAT OF RAILROADS

That motor car passenger transportation greatly exceeds the transportation furnished by the railroads of the country is shown by a recent article in the Marmon News published by the manufacturer of the Marmon 24.

Extracts from the article follows: "Until the gasless Sundays of 1918, followed by the coal famine of early 1919, few realized how greatly the automobile figured in city and rural transportation. These economic trials, however, gave us a glimpse at the real facts of the case. It was shown then that the 4,000,000 cars, serving between twelve and fifteen millions of people, saved more than a hundred million tons of coal a year, which would otherwise have been burned in steam locomotives or in power plants of electric lines to carry the millions who habitually traveled by automobiles.

It is in passenger travel, however, that the great transportation force of the automobile is seen. How huge a part this plays in the work of the nation has not graphically been shown. Even a conservative statement of the vast travel service the motor cars of America perform will astonish the layman. Motor car passenger transportation now more than doubles that of the railroad. The proof of this can be easily shown.

By the middle of 1920 approximately 4,500,000 motor cars will be in the hands of owners. Figure that only an average of four ride in each car. Allow, further, that each car does 4,000 miles of travel a year, an estimate that is at least 50 per cent too low. From this we see the motor cars of the United States could carry 25,000,000 people, 4,000 miles of 100,000,000 people 1,000 miles this year.

This is fully twice as great a transportation service as the railroads give. The latest report of the Interstate Commerce Commission shows that the railroads last year carried slightly in excess of a billion people who rode at an average of about 43.2 miles.

In other words, with 100,000,000 people traveling, the train would carry the passengers but 432 miles against a possible 1,000 mile; by motor car carrying the proportion still further the figures show as that the gasless passenger cars would carry 200,000,000 persons 500 miles, against but 10,000,000 train travelers going but 4 miles each.

How Much is in the Jar? Tell us and you will be given \$10. See the jar on display in the Security National bank and put in your order before 3 p. m. Wednesday, July 7. Open to everyone.

### TEXAS DELEGATION MAY VOTE FOR DAVIS

By W. C. EDWARDS Times Staff Correspondent

Coalition of forces opposed to Cox, forced recess by roll call vote at five-thirty this afternoon until eight o'clock after sixteen ineffectual ballots had been taken to nominate a candidate for the presidency.

Recess came after Cox had reached highwater mark of four sixty-eight and one half votes on fifteen ballots and had fallen back to four fifty-four and half on sixteenth ballot through Tennessee giving twenty-four votes to John W. Davis of West Virginia, American ambassador at London, fifteen of them were D. K. The Cox forces still professed confidence in their ability to get the necessary votes and some McAdoo supporters still declared he is in the running, but impartial observers believe that the leaders have shot their bolt and that a dark horse, very probably Davis will come into strength on succeeding ballots tonight.

Omission of dry plank for which delegates now supporting Cox's candidacy among delegates from dry states, some of whom probably would have supported him as second choice on a dry platform.

Wet and dry fight showed strongly beneath the surface today with New York, New Jersey and other wet states going successively to Cox, apparently for no other reason than his attitude on prohibition, the question McAdoo led on first nine ballots gaining strength on each until the tenth.

Cox, whose gain began noticeable on the seventeenth when New York threw sixty-eight and New Jersey twenty-five votes from Smith and Edwards, respectively, into his column the Ohioan took lead on the ballot with forty-four votes from Illinois and twenty-six from Iowa and continued

to gain steadily throughout the ballot with a setback in on the sixteenth ballot. West Virginia delegates declared before convention reconvened their man would be nominated before adjournment tonight, asserting they had promise of enough second choice votes to put him in the lead within a few ballots.

Most of the Texas delegation friendly to Davis is believed and if McAdoo quite the Texas vote probably will go to the West Virginian for second choice. There were also indications during early hours of session that the Owen boomers were also so hopeful that the dark horse mantle might fall upon his shoulders.

### BIG PROFIT IN MILK AND BUTTER

Small Investment Brings Big Return—Mr. Weaver's Plan is Simple. "I bought a package of De LeGear's Stock Powders from my local dealer and after feeding it to my Jersey cow, she increased from six quarts to 12 quarts of milk per day, and after continuing the Powders for 30 days longer, she increased in butter fat from five pounds to 10 pounds per week, and at the end of five months, she was making 12 pounds of butter fat per week."—L. E. Weaver, Grand Rapids, Mich. Mr. Weaver followed the advice of Dr. LeGear, and is money ahead. You can get the same results. Get Dr. LeGear's Stock Powders from your dealer; feed it to your horses, milk cows, steers, hogs and sheep as directed. Satisfaction or money back. Dr. L. D. LeGear Med. Co., St. Louis, Mo. (adv.)

ICE CREAM SPECIAL IN CLEVELAND-WASHINGTON FLIGHT TESTS ICELESS REFRIGERATION

Washington welcomes limousine acceptance guests from Cleveland. Left to right: Arthur A. Chapin, C. L. Fisher, Earl B. Gaddis and Ralph A. Lee. Chapin and Gaddis were on the reception committee of local citizens, while Fisher and Lee drove the plane to the nation's capital.

Keep your look out! The ice cream man may drop in on you most any time. At least, he is flying now delivering ice cream from city to city. The first test of city-to-city delivery of ice cream was made this week and while not made for record purposes, it established a record for the longest flight ever made in a limousine airplane and also an altitude record of 19,710 feet. The flight from Cleveland to Washington was made with only one short stop to repair the plane's water system. The test was observed with interest by Washington scientists

from the fact that no ice was used and yet the cream, after the three-hour flight from Cleveland to the National Capital, was found to be in perfect condition. It was carried under the new scientific method of iceless refrigeration, known as the thermopak, capable of holding either cold or heat for a great length of time. The trip proved to the satisfaction of the scientists that ice is not a necessity in carrying and preserving ice cream. It is understood the new method can be applied to keeping things hot as well as keeping things cold, since even after the flight through the clouds the cream

arriving at Bolling Field was in as good condition as though purchased ten minutes before at the corner drug store. The event proved of special interest to aviators from the fact that the flight was made in a three-passenger airplane limousine. The three men who made the flight were Bernard Whelan, pilot; C. L. Fisher, plane mechanic, and Ralph A. Lee, in charge of the shipment. On arriving at Washington, a portion of the cream was presented to President Wilson and the remainder was distributed to the little sick folk at the Children's Hospital.

COX GAINED 72 ON THE TWELFTH BALLOT

AUDITORIUM, SAN FRANCISCO, July 3.—On the 12th ballot today Cox passed the 400 mark and McAdoo, for the first time, topped 400 votes. McAdoo on that ballot had 375 1/2 votes and therefore a veto power under the two-thirds of the convention. The poll of the Iowa delegation showed 16 for Cox and 10 for McAdoo. Chairman Marsh of the Iowa delegation then under the unit rule cast 26 votes for Cox. An Iowa delegate challenged the vote on the ground that the unit rule had been abrogated despite the fact that the state convention placed them under it. The ruling of the chair was that

NEGRO HOLD UP MAN GETS CASH AND WATCHES

HUTCHINSON, KANS., July 3.—A lone unmasked negro bandit held up the passenger on an incoming inter-urban car two miles east of town at midnight, getting probably \$100 in cash and several watches. The negro piled ties on the track, forcing the car to stop. He then boarded the car, picked one of the passengers to do the searching and lined up all

CHRIS MATTHEWSON TO QUIT BASEBALL

NEW YORK, July 3.—Christy Matthewson, famous New York National pitcher for 15 years, has decided to give up his position as a pitcher to the team and quit baseball, it was learned tonight. Matthewson, who has been with the Giants since 1901, except for

a year as manager of the Cincinnati Nationals, another year in France on military duty, has been suffering for a fortnight from bronchitis, and plans to go to Lake Placid, in the Adirondacks for a vacation. "Matzy" aided the New York club in winning the National League pennant in 1904, 1905, 1911, 1912 and 1915, and the world's championship in 1904. He retired from active service in 1916. GOODYEAR COMPANY OPENS FACTORY AT LOS ANGELES

Los Angeles became the industrial metropolis of the Pacific coast a few days ago when the \$20,000,000 new factory of the Goodyear Tire & Rubber Company of California started operation just ten months after ground was broken. The first tire was built by F. W. Litchfield, vice president and factory manager of the Akron company, who made the long trip west for that purpose. Other high officials of both Akron and California companies participated in turning out the first pneumatic. Word was immediately telegraphed

to Akron, where whistles were blown and fitting observance made of the interesting event. This tire will be placed in the company's museum in its new welfare building—the largest in the world. The California company begins operation with 2,040 employees, of which 700 are in the offices and 1300 in the factory. One-half of the factory employees were experienced tire builders sent from Akron to train the 2,000 men who will ultimately be employed. The new company has erected many bungalows for its workers, financing them in the same manner that has enabled 15,000 Akron employees to enjoy comfortable homes. Adjoining the factory, an aviation field of 300 acres has been laid out,

with a large hangar for airships. This field will later be the terminus of the company's air line between the Los Angeles factory and its cotton plantation near Phoenix, Ariz. Production on the first day was 50 tires, but will increase to 500 daily within a month. Capacity production will be 5,000 tires a day when the plant is in full operation. For Bargains In Real High Grade Clothing and Furnishings Attend the July Clearance Sale At THE GLOBE OHIO AND EIGHTH STREETS

Good Citizens WILL Clean Up---Others MUST Wichita Falls Must Be Cleaned Up Promptly Every minute spent in making this a cleaner city helps to reduce the chances of an epidemic of disease. No better use could be made of your holiday tomorrow than to spend it in freeing your premises from everything that makes for uncleanness. If your block has been organized, there will be a block meeting Monday at 9 a. m. to systematize the work. If you live in an unorganized block, work with your neighbors, or by yourself, to make it absolutely clean. The cooperation of every citizen is essential. Declare war on the fly; it is a busy carrier of disease germs. Filth, garbage and refuse give flies place in which to breed and feed; keep your garbage can covered. The paper in which your meat has been wrapped, an empty vegetable can, give flies a big supply of food; so does a milk bottle that hasn't been washed. How many flies are you boarding? Mosquitoes can't breed unless there is water or moisture; see that all pools are filled or drained, that all cisterns and water barrels are screened. The damp earth under a rank clump of weeds is a favorite refuge of mosquitoes. Pull the weeds up by the roots, then you won't have them to remove again later on. Eliminating weeds means eliminating many insect pests. Rats and mice are disease-carriers. Use rat poison and traps plentifully. Clean out the dusty corners where such vermine build their nests. Pile your trash in the rear of your place, either in or near the alley. On or before July 7 the city wagons will come and get it, without cost to you. The open toilet is a menace to your health and comfort. If you know of one that is reasonably close to a sewer, report it to the city health director, phone 5015. If it is not near a sewer, see that screens and lime are used to make it as nearly harmless as possible. Report the names and addresses of those maintaining unsanitary premises; your name will not be used. Every merchant is responsible for his own store's cleanliness. The wagons will be busy in the residence district and trash from downtown premises must be disposed of by the occupants of the buildings. There will be a thorough inspection on July 8th, in the business section, and the law will be invoked upon those who fail to make their places as clean as possible. Your efficiency as a business man and your pride as a citizen ought to be incentive enough. Failure to clean Wichita Falls promptly, thoroughly and efficiently means more sickness, less comfort; it will cost us in ways that cannot be measured in dollars and cents. Your welfare depends not only on getting clean, but on keeping clean. A Clean City Means a Healthier, Happier, Better City. Do Your Part M. O. McDOWELL, Commissioner of Public Health. W. B. HAMILTON, Chairman, Public Health Bureau, Chamber of Commerce.

THE WICHITA DAILY TIMES

THE TIMES PUBLISHING COMPANY (Printers and Publishers) Published every week-day afternoon and on Sunday mornings.

UNWARRANTED FAULT-FINDING.

Hearty, explicit and unqualified indorsement at San Francisco of the League of Nations being now assured, the fault-finders and the sneerers will soon make their querulous voices heard.

In his speech he made a calm and reasoned explanation and defense of the work of the League during the four months of its existence, and met the objections to it at every point.

RIPPLING RHYMES.

I walk beside the sea and muse, among the surge lashed rocks; the waves roll up and w my shoes, and spelt my green silk socks.

TWINS FALLS MAN TELLS OF IRRIGATION ADVANTAGES HERE

Editor The Times: If there is any one thing that will stabilize Wichita Falls, give it something of a permanent value; give the people that which they now lack; give to the community in general some thing they would feel proud of, it is the proposed irrigation project which much honor has already been expended by Mr. J. A. Kemp.

which in the end will involve American interests in most important and critical ways? Everybody knows the answer. Partisan politics has bedeviled what should have been the plain and easy question of the United States entering the League.

MOROSCOPE

"The stars incline, but do not compel." (Copyright, 1918, by the McClure Newspaper Syndicate.) Sunday, July 4, 1920.

Evil stars rule this day according to astrology. Mars, Jupiter, Saturn and Uranus are all in malefic aspect. It is a time when accidents are supposed to be most prevalent and there is danger of a catastrophe that will affect the whole country.

SEASIDE MUSINGS

I walk beside the sea and muse, among the surge lashed rocks; the waves roll up and w my shoes, and spelt my green silk socks.

Just Folks

July the Fourth, Like men and women, the days are horrid— They come and go and are soon forgot.

Here is a day that shall never die! As that mor when Christ to the manger came.

Like men and men the swift days come, And they fill a place in life's tangled plot.

LITTLE BENNY'S NOTE BOOK

Weather. Fellows wanting to stay out longer after supper. Spite. The all right licking Reddy Merfys father ever gave him happened in 1918.

Side Talks

WHAT IF THE WAR IS OVER. Does patriotism have to stop the minute the war is over? Of course not. What a silly question!

WHY?

Do "Court Cards" Appear in a Deck? (Copyright, 1920, by Wheeler Syndicate.)

The names of four kings in a pack of cards are David, Alexander, Caesar and Charles—the names of the four monarchies of the Jews, the Greeks, the Romans and the Franks under Charlemagne.

amounts each year; but I do not call them thrifty for, though they save money, they waste wealth in appalling ways—buy clothes hastily and have to discard them because they are not suitable; leave good tools out in the rain to rust; let expensive food spoil in the refrigerator.

Here are some of the concrete things that thrift means, according to a very high authority on the subject: "Planning meals that provide the full necessary nourishment at least cost.

# SCOUT EXAMINATION THURSDAY NIGHT

### Tests for First and Second Class Scouts and Merit Badges Will be Given

Scout Executive H. E. Taylor has announced that he has secured an office with the Chamber of Commerce to be used as headquarters for scout work in Wichita Falls and that the new room will be ready for use by the sixth of July. This is expected to greatly facilitate the work of the executive and to enable him to carry on the scouting program more efficiently.

Friday evening Major D. M. Perkins, J. M. Bland, president of the Scout Council, and Executive Taylor made a trip of inspection to all troops in the city. The visit came as a surprise and in the majority of the troops more boys were found attired in civilian garb than in the regulation scout uniform. Major Perkins gave some splendid advice as to the meaning, care and wearing of the uniforms and his talks were supplemented by a few remarks from Mr. Bland and Executive Taylor. Of all the troops visited number 7 made the best showing, both in point of attendance and general preparedness.

On Tuesday evening the scout masters' school is to be held at the First Methodist Church, South, Tenth and Lamar. All scout masters are urged to present as some important business is to be transacted. On Thursday evening the Boy Scout Examination Board will meet at the Methodist church and give examinations to all scouts wishing to take tests for first and second class and merit badges and on Friday night all those scouts who successfully passed the

tests will be awarded their badges in the main auditorium of the church by the Scout Court of Honor.

The boys of troop 6 are planning an all day and all night camping trip next Saturday. Scoutmaster H. F. White is to accompany the boys, the whole bunch leaving here early in the morning and returning some time Sunday.

In connection with camping the scout masters of the city wish to make a statement in regard to the various camping trips and outings which have been held from time to time. They feel that the general public has been misinformed as to these trips and that the prevailing idea that the boys are insufficiently fed and cared for is entirely without foundation. Scout Executive Taylor states that on these trips which are taken from time to time the boys are given as much pure, wholesome food as they can eat and that they are treated with the utmost consideration and care. According to the boys themselves, says Mr. Taylor, they have the times of their lives, enjoy themselves immensely and have absolutely no complaint to make.

With the summer vacation period approaching it is appropriate to consider the storage of valuables during absence from the city. The City National Bank of Commerce has one of the most complete safe deposit vault systems in the south. The safe deposit boxes rent for reasonable fees according to the size of the box. 52-1tc

## GEOLOGICAL LOCATION MONTAGUE, COUNTY WELLS

NOCONA, TEXAS, July 3.—The D'Arnaud test on the Dunn farm six miles southwest of Nocona and the Simms Oil company well on the Budd Reed tract in section 14-7-15-w and located about a mile back from Red river on the Oklahoma side are the first wells in this general region to have geological locations; and on this account, will attract much more than usual attention. They are already pretty tame wildcats.

The Codson company is reported moving in material for a test well on the Grant Reed farm, the location being in the southwest corner of section 23-65-4-w. This well is said to be on an anticline. Word comes from the north side of the river that there is considerable activity in leasing and tracts that were yet open. This well will be about three miles north and two miles west of Spanish Fort.

That this county is attracting wide attention, it may be noted as an incident, but a short while ago a geologist stopped off at Nocona for general reconnaissance work. He was not very communicative, as is the way with the rock hounds. However, he stated, the maps of the mountain states and mid-continent region had been looked over in their New York office before he left direct for Nocona and that it was decided that Montague county was the region likely to furnish the next big development in the oil game. Before leaving, he spoke highly of the favorable conditions he found here. This county is pretty closely leased.

Perhaps the Regu-Yancy man, about six years ago by Anderson, Stalder and Baker, geologists, was in greater detail than any other, though a number of surveys have been made all of which have been favorable as to the possibilities of this locality for the production of oil and it might be added that a good many of the geologists, working independently, took pieces of acreage before leaving. The Regu-Yancy survey began at Elec

tra and extended east in the Red river region to Cooke county. The possibilities of oil and gas at Burk Burnett was shown; the Walters pool was mapped; Petrolia was given its rightful place, and the survey carried on east with a climax of structures in Montague county and overlapping into Jefferson county, Okla., and with the wonderfully productive Headton field about 50 miles to the northeast. Why not anticipate something worth while here when the big show finally opens? One report made by one of the best and most widely known geologists in the mid-continent, field states: "This dome carries all the possibilities as were at Petrolia and Electric," and had this paper not been written before Burk Burnett was opened, no doubt it would have been added. What is said here will bear investigation.

Central Presbyterian Church. Eleventh and Bluff

Rev. Stewart P. MacLennan, pastor of the St. Andrews Presbyterian church of San Pedro, Calif., will preach Sunday morning at 11:00 o'clock, after which the sacrament of the Lord's Supper will be observed. Special attention will also be given to the reception of new members. Mrs. King of Tampa, Fla., will sing at the morning service. The Rev. MacLennan will also preach at 8:15 p. m. We take pride in inviting all of our friends to both of these services to hear Mr. MacLennan, who is an unusually strong preacher of the word, applying the message of the Bible to the needs of today. Sunday school will begin at 9:45 promptly. Every teacher and pupil should be in their place at that minute. The Junior Endeavor will meet at 5:30 p. m. and the Christian Endeavor at 7:15 p. m. Our guests at all of these services must feel at home with us.—GUY DAVIS, Pastor.

## MORTUARY.

Miss Laura Fletcher, aged 17 years, died at the General hospital Friday afternoon at 4:00 p. m. Death came after a short illness of typhoid fever. The body was removed to the Merkle & Lunn undertaking parlors and prepared for burial. It will be shipped to Hastings, Oklahoma Saturday morning and the funeral held in the home of the girl's parents at that place.

Mack Vickers. Mack Vickers, infant son of Mr. and Mrs. T. H. Vickers, died at the family residence, three miles south of town early Friday morning. Funeral services were conducted by Rev. Kirtle in the home Friday afternoon. Burial was in Riverside cemetery.

H. K. Blankenship, 50 years of age, died of Bright's disease at 9:30 Friday evening. He was buried in Riverside cemetery.

Latest appliances, including the pneumatic tubes and intercommunicating telephones, which feature the equipment of the City National Bank of Commerce, enable the depositor to handle his banking business with the greatest possible degree of safety and in the least possible time. 52-1tp

# "It Put Me on My Feet Again" Says Wichita Falls' Man

### After Taking Orgatone Treatment Has New Life and Energy—Feels Great.

"Before taking Orgatone Treatment I had so little life and energy it seemed I was just dragging around at my work," said O. R. Anderson, one of the best known traveling salesmen in Texas who resides at the St. James Hotel, Wichita Falls, Texas, while in Miller's drug store a few days ago, "but Orgatone Treatment gave me new life and strength and my good health is all I could ask." "I suffered with severe stomach trouble and indigestion," he went on, "and I had a very poor appetite and sometimes the very sight of food would nauseate me. I could hardly eat a thing and when I did manage to force down a little something it would sour on my stomach and gas would form and press against my heart so I could hardly breathe. I suffered from constipation and would have severe headaches. I could not get a good night's sleep as

I was so restless I would just roll and toss all night long. "I had tried all kinds of medicines without getting any relief. I heard so many people here in Wichita Falls talking about the good Orgatone Treatment was doing, so I decided to try it. The very first bottle helped me and I began to feel better. I continued to take it and now I am feeling great. My stomach is all right and I have a fine appetite and can eat anything I want and everything I eat agrees with me. I am never bothered with gas or shortness of breath or dizzy spells. I am not bothered with constipation now and never have any headaches or pains in my back. I sleep like a log and get up in the morning full of energy and ready and able to do a big day's work. Orgatone Treatment has put me on my feet again and I would be pleased for anybody who is in doubt to talk to me personally where I live at the St. James Hotel this city, as I cannot say too much for this great treatment." Orgatone is not a so-called patent or secret remedy but a new scientific treatment absolutely free from alcohol in any form and is sold in Wichita Falls by the Young and the Miller Drug Stores, exclusively, under the personal direction of a special Orgatone representative.—ADY.

# Essex Week Proves Great Success

Everywhere throughout America the Essex has been put to every test that requires endurance, economy and dependability.

That the Essex will stand up, and can be relied upon for long service, has been proven by the many wonderful and interesting records it has made.

### The Endurance and Dependability Test

made with the Essex Touring car, by starting the motor at 6 o'clock Monday morning, and continuing throughout the week, here, has demonstrated its great reliability. Many people have seen this car on the streets during the day, and running on our salesroom floor, in circles, each night this week.

The mileage shown on the speedometer, Saturday evening, when the paint was removed from the glass dial, was 339 9-10 miles.

The winners of prizes offered for the nearest correct guess as to the number of miles the Essex had run during the entire week, follows.

This reading was disclosed in the presence of representatives of both local papers.

- FIRST PRIZE—\$50.00, G. F. Hamner, 2402 Filmore St., guessed 342.
  - SECOND PRIZE—\$30, I. V. Ainsworth, 1100 4th St., guessed 345 6-10.
  - THIRD PRIZE—\$20, John W. Harding, 710 1-2 Indiana, guessed 346 4-10.
- "THE ESSEX" the most talked of car today.

Clark went out to right field for Rader's fly. Stansbury cracked one to Miller.

Miller drove a fast one through the box for a single and went up a notch on Grubb's pretty sacrifice. With the crowd yelling like wild Indians for another "ball with a hurrry" to Demaggio, Nixon did not have to budge for Sewell's fly.

Doyle passed by Tanner for the Exporter's second hit and advanced on a neat sacrifice by Breaux. Monroe hit for James and got a lucky hit when the ball hopped over Tanner's shoulder. Doyle came in with the tying run and Monroe went to second when Mokane picked up the ball. Demaggio and Mathes grounded out.

Martina went into the box for the Shippers and Josephon greeted him with a single. Doyle threw to second when the ball hopped over Tanner's shoulder and both men were safe. Snedecor's attempt to sacrifice resulted in a pop to Martina. Clark flew out to right field on a double play in a short right that fell between Demaggio, Doyle and Mathes, and Johnny went around to third while the Exporters were kicking themselves. Joe and Bud walked home. Miller grounded out. Rader to Mathes.

Taylor flew to Mokane. Sewell took care of Taylor's grounder and Rader went out on strikes with his bat on his shoulder.

Grubb hit to Mathes and was beaten to the bag by a strike. Kitchens drove one on hit to Taylor and Stansbury knocked down and held to two bases. Taylor kicked Sewell's grounder long enough for Kitchens to reach third and the Spudders' lead was established for the plate while James had his back turned. When Breaux interfered with Josephon at the plate, Umpire Miller sent Joe to first and Kitchens safe. Sewell taking second. Tanner singled to center, filling the bases. "Pete" Snedecor drove a long foul to left and then sent a long sacrifice fly to Demaggio that scored Sewell. Joe taking third. Clark ended the inning by popping a foul to Breaux.

Grubb hit to Mathes and was beaten to the bag by a strike. Kitchens drove one on hit to Taylor and Stansbury knocked down and held to two bases. Taylor kicked Sewell's grounder long enough for Kitchens to reach third and the Spudders' lead was established for the plate while James had his back turned. When Breaux interfered with Josephon at the plate, Umpire Miller sent Joe to first and Kitchens safe. Sewell taking second. Tanner singled to center, filling the bases. "Pete" Snedecor drove a long foul to left and then sent a long sacrifice fly to Demaggio that scored Sewell. Joe taking third. Clark ended the inning by popping a foul to Breaux.

Mokane took Nixon's short fly. Clark threw out Rader; Stansbury lined straight into Tanner's hands. Demaggio didn't have to move to get Mokane's fly. Miller tried another bunt but was thrown out by James on a nice play. Grubb popped to Breaux.

Sewell took care of Doyle's poor bunt; Breaux ambled to first on four straight wild ones; James fanned; Breaux was caught stealing when Kitchens outguessed him and signaled for a pitch-out.

# HE SWINGS A WICKED BAT

## By Wood Cowan

George Sisler, the clouting first baseman of the St. Louis "Browns," and incidentally one of the greatest first sackers in the world, came to St. Louis in 1915.

He was sold to Pittsburgh by Akron in 1913, but refused to report, playing independent ball with Barberston, Ohio. St. Louis got him by purchase in 1915.

He is a graduate of the University of Michigan and one of the greatest athletes in the world. Yost, ever turned out—surely the best ball player of that famous "U."

Some years ago, as the story goes, Yost of Michigan needed an athlete badly to bolster up an end position on his football team.

"And the toughest part of it all," said the great coach, "is that I have one of the best in the world right here in college, but I won't let him play."

"Why?"

"It's this way," he continued. "He's a graduate of the University of Michigan and one of the greatest athletes in the world. Yost, ever turned out—surely the best ball player of that famous 'U.'"

# The Sportlight

## by Grantland Rice

### The Non-Combatant

Unwearied, cool, along the field.  
He comments on the fray:  
No matter what the contest is  
He has his little say.  
"He should have tried out this—or that—"  
"Why did he make that throw?"  
"I'm quite surprised he did not have  
A better trick to show."

### Concerning War Clubs

Babe Ruth uses a bat varying in weight between 52 and 54 ounces. Rogers Hornsby uses a light bat, almost 16 ounces lighter than Ruth's.

Bob McDonald, the longest hitting golf "pro" in America, uses a light club, weighing from 12½ to 13 ounces.

Abe Mitchell, the hardest hitting "pro" in Great Britain, uses a heavy 17-ounce driver with a shaft like a young tree.

You can rarely prove from what a genius uses the best selection you can make as a normal, average entry in the game.

### On the Battlefield of Deal

Vardon was forty-four years old when he won his sixth championship, back in 1914. The great veteran lost six competitive years by reason of the Kaiser's desire to be open champion at another sport. His renewal with that of Braid and John Henry Taylor, both of whom have reached fifty, is a sporting epoch of no small importance.

It is not so much an individual affair, as it happens to concern championship activities at the half century mark.

### Francis Still Around

The main international comparison of the year are between the United States and Great Britain.

These two turn out the bulk of the international program. But France, after losing 2,000,000 of her men and women in the most destructive war of all time, can still point to these leaders:

Boxing—Carpentier.  
Tennis—Gibert, Decugis and Mile. Lengien.  
Golf—Massey.  
Counting in no others, France still remains upon the sporting map.

### The Greatest Glory

When you shall reach the summit of your travel,  
And start the journey toward your setting sun;  
Can you look back as each deed you unravel,  
And be contented with the race you've run?  
When you have known your last and final inning,  
And dusk begins to blot you from the scene,  
Can you recall that from the first beginning  
Before you get the punch that sends you drifting,  
Before Fate sounds your final curtain call;  
You'll get a chance to do your share of lifting,  
When worn out pale about you stand to fall.  
The dreams we have of fame and fleeting glory  
Are not to be compared with this one plan,  
When we can help the black sheep of the story,  
And give him one more chance to be a man.

—HOWARD A. HERTY.

### Slater and Ruth, the two maces batmen of the American League, also happen to be the two best all-around workers in the profession. Both started out as pitchers, where each proved his effectiveness. Either could have held his own among the top liners of the mound. Both have played the outfield and first base effectively. Slater finally settled down to first basing as a steady diet, while Ruth selected the outfield. But from the beginning both were vivid replies to the ancient query: "Why can't pitchers hit?"

### Professor Cornelius McGillicuddy desires to know the name of the historian who first said, "A man may be down, but he's never out." Professor McGillicuddy wishes to submit documents covering his case since 1914 and obtain verdict thereon. Admitting to being down, if he isn't out he would like to know what he is in.

After waiting fourteen years to get with a hard-hitting, run-makng club, Johnson's arm went bad just as his mates began to bat 300. If this isn't the Sheik's Curse we have never seen one.

# NO PLAYER FOUND WHO COULD FILL PEERLESS TY'S SHOES UNTIL THIS YEAR; RUTH STEPPING INTO THEM

### By HENRY L. FARRELL (United Press Staff Correspondent)

NEW YORK, July 1.—The Cobb sun that has been lighting the ways of baseball for fifteen years sees to be setting behind the clouds.

Slow of late years in getting started on his annual achievement of the greatest in the national pastime, the Detroit star has been so tardy in getting under way this season that baseball is listening for his vaudeville.

Cobb has justly been considered the greatest of all players. His defeats have so far overshadowed his nearest rivals that fandom despaired of ever seeing a youngster from the new school rise and take his place.

"Who will fill the shoes of Cobb when he steps out?" has been the makings of an argument for years.

The question has gone without an answer until this year.

Put the query to any fan today and he'll answer "Babe Ruth" without hesitation.

Filling the shoes of the great Ty is a herculean assignment but the Yankee Babe not only promises to do that but threatens to make a record that will stamp Cobb as the No. 2 of all time.

Cobb has batted over 300 in 14 of his 15 years' career. He has been the leading hitter of the American League in 12 out of 13 seasons. The pop of his gatus was achieved in 1912 when he batted .420, his lowest mark was in 1916 when he finished with an average of .320.

In 1927 games of 14 seasons he has stolen 768 bases. His speed, skill and daring on the bases was a big factor in earning his sobriquet as "The Giant." The same fleetness of foot made him the star fliker of the league.

A great record he has made but the Babe has a record that is more than that. Considering Ruth not as the greatest home run hitter of all time, not as the greatest attraction in the history of the game and the highest priced bit of baseball flesh in the major leagues, but as an all-around ball player and he is almost there.

Babe Ruth is a first class pitcher. Given a regular turn in the major leagues, he is little doubt that he would be the best southpaw in the league. Memory still lingers of his 1-0 victory over Jim Vaughn in the first game of the 1918

world's series when he let the Cubs down with six hits. This season when Manager Huggins was in a bad way for pitchers, Ruth volunteered for box duty with a brief warming up and went in and won his game. He can still pitch.

He is a first-class baseman. He has proved his ability on the first corner and leaves a trail of hits on the infield game by working out almost daily on the initial sack during batting practice.

Babe Ruth is a first class outfielder, also. He's fast on his feet, has excellent judgment, fine wing and wide head. He will rank close to the best right fielders in the league with the exception of coming in for "shoe string" stitches.

As a batter he shines the greatest of course. Cobb scored countless runs by his fleetness in beating out infield rollers. Ruth smacks his "where they ain't." His hits are all clean.

With a terrific swing of football shoulders, Ruth set a high mark last season with 40 runs. This season he promises to run the number to between 40 and 60.

His slugging tendency was a handicap early in the season in one way. He other knocked the ball out of the lot or struck out. In one of the early games he struck at a ball with such force that he strained his back and was out for several days.

He has been less vicious since and connects consistently with the ball. Singles, doubles and triples have been added to his collection until he promises to become a more valuable batter than Cobb.

In addition, Ruth is a good base runner in spite of his rather ponderous physique. He's a fast, efficient slider and carries enough weight behind him to get the way from the majority of basemen. He has stolen 6 bases this year and Babe Cobb 5.

In his palmy days, Cobb was considered the game's greatest drawing card, but Ruth has played to more fans in one third of a season this year than Cobb ever did in any one of his great years.

He is batting .345 this year and in 4 of his past 5 years he has been in the 300's.

New York fans herald Babe as the greatest all-around ball player of all time. The records may bear them out.

Ham Patterson's crew is in no pleasant frame of mind after dropping three straight to television, supposedly the weakest team in the circuit. It looks as if Burch and Dale will hook up.

The Spudders ought to remember "Cuba" Breaux in their flight. He did his best to hand them the last two games.

We can expect almost anything to happen in the National pastime, but who'd ever believe that Kitchens would steal home? Pick up the ball when he's out there, it's the unexpected that wins most a game.

Jim Sewell has won his last three starts, but yesterday's effort was his best. The Spudders gave him such a lead that he did not seem to work to pitch winning ball that he can work on a small margin. A better performance has not been given by any Spudder since the year.

The crowd got after Bill James yesterday when they saw that he was poked over the play at the plate when Kitchens stole home. It didn't bother Bill much, however, as he expected to win. He was expected to send mark. Interest in seeing in general. The football posed of five His quarter by Indiana. While of the 1919 1 sponsor. To handle team, and all tercollegiate sion. The Uni connective. In football, b in all three as a star of De handle known in Va horna. B. D. Bryan was a Washington Philadelphi in the strongest Albert Pen on the 1914

# ST. LOUIS SWATERS ARE STILL LEADING RESPECTIVE LEAGUES

### By Paul W. Larkin

Today's entertainment will be furnished by the Marines at 4 o'clock.

Ham Patterson's crew is in no pleasant frame of mind after dropping three straight to television, supposedly the weakest team in the circuit. It looks as if Burch and Dale will hook up.

The Spudders ought to remember "Cuba" Breaux in their flight. He did his best to hand them the last two games.

The public at large may be more interested in the presidential nomination as is shown by the fact that the wire pays little attention to baseball and is loaded up with campaign dope. But judging from the number of phone calls received to the "Times" office, Wichitaans are far more interested in Texas League results. It makes no difference who is nominated as long as the Spudders win.

White will have to knock out Benny Leonard or win on a foul to grab the hit. This time, 325. Williams, Referee's decisions are allowed in Michigan, but some will be rendered at this hour.

Tilden is the first American tennis player to win the British tennis singles championship and he certainly earned the coveted honor. He moved down the list of tennis experts in the world as there were 128 entrants from 20 European countries, Japan, Australia, United States and other countries.

The latest announcement from Augusta is that Ty Cobb will rejoin the Tigers July 7. He is expected to play for 2½ years. The Georgia Peach has discarded his crutches but his leg is still sore.

During the St. Louis series, Ruth hit a ball out of the park in practice that went across the street and bounded through a store window. The distance was measured and found to be 426 feet. The ball would have kept going if it hadn't bounded into the store. Maybe the "boy" doesn't pole him.

Fly with Hall today. Call Field.

CHICAGO, ILL., July 3.—Roger Hornsby, the St. Louis star, banged out his 100th hit of the season in Wednesday's game against Cincinnati—the first player in the National league to touch the century mark.

Hornsby slipped slightly in his batting, but continues to hold a comfortable lead among the regulars who have participated in 35 or more games, according to averages released today and which include games of Wednesday. The St. Louis career is topping the hitters with an average of .360, which was made the strike-five times in which he was at bat 263 times. His total base mark of 157 is the highest in the league and includes nineteen doubles, ten triples and six homers.

The catchers and pitchers seem unable to stop Max Carey, the fleet-footed Pittsburger, on the paths. He is showing the way to the base stealers with 25 thefts.

Other leading batters: E. Smith, New York, .364 Nicholson, Pittsburgh, .333; Robertson, Chicago, .332; Dauterive, Cincinnati, .325; Williams, Philadelphia, .325; Cruise, Boston, .322; Roush, Cincinnati, .321; Kelly, New York, .314; Myers, Brooklyn, .313; Flack, Chicago, .313.

The batting of "Babe" Ruth the home run king of the New York club, continues to be the chief topic in the American league. The big southpaw slugger bagged a brace of homers in the doubleheader with Philadelphia last Wednesday which gave him a total of 24, only five behind the world's record which he made last year. In addition to cracking out home runs, Ruth is steadily climbing to the top among the hitters of the league who have participated in 35 or more games. The big fellow is hitting .374; just twenty points behind Tris Speaker of Cleveland and Joe Jackson of Chicago who are sharing the honor of runner-up to George Sisler, the St. Louis star, who is batting .413. Speaker and Jackson are hitting .394.

PHILADELPHIA, July 3.—New York made a clean sweep of the six game series by winning both games of today's double header from Philadelphia 5 to 0 and 4 to 0. Errors gave New York a commanding lead in the first inning of the first game, but the second was a battle between Naylor and Collins until the ninth, when errors by Hyatt and Perkins decided it.

First game: New York, 5; Philadelphia, 0. 000 000—3 13 1. Mays and Ruel; Ferry and Perkins.

Second game: New York, 4; Philadelphia, 0. 000 100 063—4 7 0. Collins and Hannab; Naylor and Perkins.

CHICAGO, July 3.—Chicago found Wellman and Letfield for 16 hits totaling 24 bases and easily defeated St. Louis 11 to 3 today. Score: St. Louis, 0; Chicago, 11. 000 000—11 9 1 0. Wellman, Letfield and Billings; Faber and Schalk.

INDIANS HAVE EASY TIME DEFEATING TIGERS

DETROIT, July 3.—By bunching hits in four innings Cleveland notched six runs and easily won the second game of the series from Detroit 6 to 3. Cleveland, 6; Detroit, 3. 000 000—3 6 2. Bagby, O'Neil, Oldham and Stanga; Manion.

# LIGHT LANIER TO GET ANOTHER CRACK AT LEWIS TOMORROW NIGHT

### LOCAL POLO CLUB IS ORGANIZED BY GROUP OF FORMER PLAYERS

Plans for organizing a local polo club have been practically completed and a number of enthusiastic Wichita Falls horsemen have already applied to the Polo Club of America for membership in the national organization. The club will be known as the Wichita Polo Club.

The membership roll of the club includes Dr. Fletcher, Horace Robbins, Col. E. W. Napier, Frank McDowell, Julian McFall, Warren Jennings, John Paskins, Mr. Bagkus and Cecil Wilfong. The members already have a fine stable of horses and a playing field has been built west of the Country Club in the Curlee Addition.

The club has been invited to participate in the September Polo Tournament of the Cheyenne Mountain Country Club, Broadmoor, Colorado, and according to the latest advices, the invitation will be accepted. The majority of members are former polo players and they are getting in trim by holding matches twice a week on Wednesday and Sunday afternoons. Several of the "crack" teams of the country will take part in the Cheyenne tournament, but the Wichita representatives are no novices at the game and will give the other contestants a run for their money.

### BENNY LEONARD SET TO DEFEND CROWN IN CHAMPIONSHIP FIGHT

**BENTON HARBOR, MICH., July 3.**—Benny Leonard, lightweight champion of the world, and Charlie White, Chicago challenger for the title, wound up their training today for their 10 round championship battle here Monday afternoon.

White practically finished his actual boxing work yesterday and today did only enough work to keep his muscles loosened. The challenger is in remarkably fine condition, having been on the ground for the last two weeks.

Leonard, however, may pull on the gloves for the benefit of his admirers tomorrow, when he will continue to do his road work to sharpen his wind. He declares he is as fast as even after his long lay-off. Leonard will defend his title in true championship form.

Officials of the state boxing commission made the prediction today that the receipts of the contest will likely reach \$65,000. The advance sale of seats has been extraordinarily large here and reservations continue to come in from Chicago, White's home, and other mid-west cities.

The huge arena in which the lightweight rivals will battle was turned over to Promoter Fitzsimmons today. The structure is saucer-shaped, 250 feet in diameter and has a capacity of about 18,000 persons. The center of the ring is only 15 feet from the last row of seats, thus affording a perfect view to every spectator. The various sections are fenced off with wire netting to prevent the crowd from rushing into the high priced seats, as was the case at the Willard-Dempsey fight at Toledo last year. The arena is on a concrete foundation. Its ring and ring-side seats are in a huge circle 15 feet below the surface of the ground. The highest seats, is only four feet above the country's level. The arena is built of hard sand, wetted and rolled until it is baked almost as hard as concrete. The structure is located within the city limits and is about a mile from the business center.

### UNIVERSITY OF TEXAS HAS EFFICIENT GROUP OF ATHLETIC COACHES

**AUSTIN, TEX., July 3.**—The athletic activities of the University of Texas during the 1920-21 season will be handled by the largest and most efficient group of coaches that has ever been gotten together by a southern institution. With an attendance which is expected to exceed the four thousand mark, and with the increasing interest in sports, it is evident that this staff will be taxed to the utmost to fulfill the need.

The football coaching staff is composed of five former college stars, headed by Berry M. Whitaker, former quarterback of the University of Indiana. Whitaker was assistant coach of the 1919 team, and is the man responsible for the inauguration and development of varsity intramural activities. His past successes as a coach of well-trained fighting teams led to his selection last spring as the proper man to lead the Longhorns to victory this fall.

As first assistant to Whitaker, Charles E. Seddon will act as head line coach. Seddon was all-Western guard on the Ohio State University's championship team for three years. His playing ability and fighting qualities are shown by the fact that he was recognized as the best guard in the middle West, although he only weighed 45 pounds.

To handle the Freshman football team, and also to take charge of intercollegiate track for the coming season, the University secured Clyde Littlefield. Littlefield made more letters than any other athlete ever made at the University of Texas. For four consecutive years he made his letter in football, basketball and track, and in all three sports he was reckoned as a star of the first magnitude.

To handle the second string team, known in Varsity circles as the Short-horns, B. D. Bryan has been engaged. Bryan was a former football star of Washington and Lee University. He played in the line for four years on the strongest teams ever turned out by that institution.

Albert Penn of Austin will be the coach of the Freshmen. He was on the 1916-17-18 football teams of

### EDDIE LEWIS IS FAVORED TO WIN OVER LIGHT LANIER IN TEN ROUND BOUT AT C. A. C. TOMORROW NIGHT

The fans can take their choice Monday night at the Camel Athletic Club boxing, should be able to trim a newcomer like Lanier with ease. Many Camel Athletic Club fans don't believe he will do it. They think Lanier the type of rising, ready, ambitious young boxer with a hefty punch and a willingness to take them in return, who has often mounted rapidly to the top ranks of notoriety.

Lewis has knocked out such men as Jack Ryan, whom he kayoed in the last round of a 15-round go at Fort Worth last fall when the long routes were allowed there. He obtained a newspaper decision over Red Dolan of New Orleans at Shreveport last summer in fifteen rounds.

Benny Leonard, king of the lightweight division, picked Lewis out as his sparring partner for six months. Lewis cleaned up a lot of dough on that trip. But he is an erratic fighter. After beating Young Lanier here only by a shade in the first fight that the youngster ever had with an experienced man, Lewis came back two weeks later and earned a draw with Texas Kid, who is recognized as one of the topnotchers of the east in the lightweight division.

Lewis ought to win, but Lanier has a fighting chance to turn the tide.

### GUN CLUB MEMBERS' AVERAGE HIGH FOR YEAR; HANDICAPS TOMORROW DEPEND UPON PAST PERFORMANCES

The averages of thirty of the most active members of the Wichita Falls Gun Club are listed below, and they show some excellent records for the club, the general average being very good. These scores include the 400 target shot during the state tournament, May 17-20, and subsequent scores.

The best performance is that of R. A. King, whose average of 97.75 per cent on 400 targets, leads the club by a wide margin. Williams is second with 94 per cent on 500 targets, and Fate is third with over 92 per cent.

Some of the scores are based on a very few targets shot at, and hardly give a fair idea of the skill of those in question. Others have improved since the big tournament, most prominent among them being Adams, Little, A. P. King and Kelsch. Adams has been shooting lately at a 95 per cent clip, Little around 92 per cent and King and Kelsch about 88 to 90 per cent.

Shooters will be handicapped on a basis of 95 in the 100 for tomorrow's shoot. The DuPont system of handicapping is based on scores of 25, 50, or a total of 92 in the 100. It is felt, however, that scratch men should have one target handicap in each event, and accordingly the limit was raised to 95. The maximum limit of added targets is 30 in 100, by vote of the club's officers when the handicap system was inaugurated here. Members are also classified and a limit of handicap placed on each class. This classification, however, is not in effect at the coming shoot, where averages are based on totals, and not on the scores of the preceding week.

Handicaps apply to each of the four events of 25 targets, as there are three prizes to each event. No shooter may win more than one of these prizes. He is eligible, however, to compete for

### MOTORS FROM ARCHER CITY IN 39 MINUTES

Lloyd Weaver burned up the roads between Archer City and Wichita Falls yesterday in an attempt to lower any record that might be held for the distance. Lloyd jumped into the Essex car that had been running all week in his display window and made the round trip in 1 hour and 40 minutes, although he had a blow-out and several other mishaps on the rough road.

He had a puncture when he was 12 miles from Wichita, after covering the distance in 18 minutes. He and his mechanic then changed over to another Essex which was following them, and although it was the first time the car had been out of the shop, he finished the trip in it.

He made the return trip from Archer City in the remarkable time of 39 minutes and 30 seconds. Lloyd still maintains that he can make the trip in an hour or less in the Essex and will try to perform the feat next week.

The volume of deposits indicates the public's measure of a bank. The City National Bank of Commerce has resources aggregating approximately more than \$2,000,000. Industries, men and women of wealth, and wage earners, have found it advisable to entrust their funds to the care of this bank.

### PUTTING CONTEST FOR FAIR SEX FEATURES GOLF CLUB PROGRAM

The Wichita Falls Golf Club will hold its annual holiday tournament tomorrow over its own links and a gala program has been arranged for the club members and out of town guests. In addition to the medal play there will be tennis matches in the afternoon and evening as well as swimming and other events. The golf tournament will start promptly at 1:30.

A feature of the day's program will be the ladies' putting contest in the evening. The attraction is expected to draw out a large number of the

### RAILROAD UNION OFFICIALS TO PASS ON WAGE AWARD

CHICAGO, July 3.—More than 1,000 officials of the railroad brotherhood officials will meet in Chicago July 19 to pass on the wage award of the United States railroad labor board.

This became known today when telegrams to this effect were received by the brotherhood chairmen on all lines running out of Chicago.

A free buffet luncheon will be served at 6:30 and a large display of fireworks will be touched off after darkness has set in.

The size of the account matters little at the City National Bank of Commerce, the employees of which give the same courteous attention to the business of the depositor regardless of the amount of the balance. To the fact that the bank has ever given heed to the matters of lesser consequence, considering the "depositor first" is due the wonderful growth of the City National Bank of Commerce.

15-11c

A conservative painting contractor figured it would take 22 gallons of ordinary good paint for two houses. He used Supreme Quality Paint and brought back five gallons, saying it was the best he had ever used. The Decorators Co. sell Supreme Quality Paint, 715 Ninth street, Phone 5316.

### OUTCOME OF THREE TESTS IN WILBARGER COUNTY IS BEING WATCHED WITH GREAT INTEREST

VERNON, TEX., July 2.—The Sigler No. 2, the Lee Flowers, Brewer, Vaughn and the Garner well in Farmers Valley are the center of interest in oil circles and operators interested in these tests are awaiting with anxiety the outcome of these tests. Unusual interest during the week centered around the outcome of the Sigler well. By the first of next week the result of these wells will no doubt be definitely determined, especially the Sigler and Brewer tests. It will be several weeks, however, before any results can be obtained from the other tests mentioned.

No new announcement has been regarding the Sigler No. 2, which is said to be on the sand, have set their casing and standardizing, preparing to drill in within a few days. Ray Helcher, the superintendent, states that the casing has been seated on the rock, which has been pierced but not passed at a depth of 1900 feet. The hole was rat-tailed about 100 feet ahead of the 1900-foot level and those interested in the test are confident that they have a well. Helcher says the showing for oil is excellent and the formations similar to that obtained in drilling No. 1 Sigler. Helcher says the sand may be one inch in thickness or 20 feet, which will be determined by the standard now over the hole. The well has been washed out and everything in readiness to drill in. The test is not reported from the public. The result of the Sigler No. 2 will definitely determine whether the Sigler pay takes a dip or a rise and prove the extent of the trend of the Sigler structure. The status of the Flowers, Brewer, Vaughn and Garner wells remains about the same as in the last report. The Flowers well is preparing to standardize around 1800 feet. The Brewer test is waiting on orders at 2190 feet, being shut down. The casing has been set in the Vaughn well and drilling in progress. The Garner well passed through a thin sand at 1830 feet, which indicated a probably better showing further on, and they are drilling in progress. The Vaughn and Garner wells have established a precedent in drilling circles by not encountering any water during the progress of the drilling until they reached about 1800 feet.

No new report can be obtained regarding the drilling progress of the Burton & Waggoner well on the Guy Waggoner ranch. Two towers are now at work on this well, day and night. Mr. Burton is very optimistic regarding the future outcome of the test, and much interest is manifested over the test.

The Burk-Waggoner Drilling Co. will complete their contracts this week with the V. O. D. and the Neal-Hamilton wells. The V. O. D. is drilling around 2470 feet, and the Neal-Hamilton around 2980 feet.

**Byars Farm Test.**

The Byars farm test, which has been shut down for some time in order that the contractor might finish another well, has started up again. The test will be drilled to 3,000 feet. The well is now being cleaned and six-inch casing set. This test is still an attraction to operators and the report that drilling is resumed is hailed with delight.

The B. Churchill Oil company is hauling a rig and material from Electric to the Watt's farm, near Doans on Red River, where they will make a test. The same company is drilling a well in the Sigler field.

It is reported that another company has bought acreage from the Waggoner Ranch Oil company and will at once develop the acreage, which is in the Sigler field.

F. H. Robinson reports another well in his shallow field in section 25, block 13, the well coming in for 18 barrels at a depth of 195 feet. The well has been placed on a pump and is producing about 75 barrels daily. Mr. Robinson has successfully drilled four wells on this section and every one of them are small producers. The land adjoining the prolific Piper field, and it will be thoroughly developed, according to a statement of Mr. Robinson. He says that Piper field also will be developed for shallow oil by the Magnolia company. This section was condemned by the Liberty's test which drilled to a depth of 2,500 feet for deep oil, passing up shallow oil at the present price of crude these shallow wells are profitable as no heavy expense in drilling is involved.

Ben C. Koch, the vice president and general manager of the Sigler Oil company, says rigs will soon be on the ground for two new tests in the Sigler field. He says two new locations have been made and five new wells will be drilled as soon as possible and material for same has been ordered. The extent of the field will be more fully determined and defined by the outcome of the Sigler No. 2, which will define the trend of development to be made by this company. They say that the status of the discovery well remains about the same, producing about 85 barrels daily, and it is likely within the next few days the Sigler company will announce their future drilling plans, waiting on the outcome of their second well.

At the Vernon office of the Frank-Kock Oil Co., it is announced that 300-barrel well was brought in Monday morning on their holdings in block 819, Wichita county. This well is being promoted by many interested in the Sigler Oil Co., and another well will be put down at once in an effort to develop the acreage. Lloyd Sigler says the drill is only a foot in the sand and a standard rig has been placed over the hole to test out the sand. The well is being cleaned. Like the Burk-Waggoner, Burk-Cameron, Bowers, Burk-Key, this new territory is being opened by Vernon capital.

Senator Wm. H. Reynolds of New York, while attending the stockholders' meeting of the Sigler Oil Co., at Wichita Falls, of which he is heavily financially interested, consummated a deal whereby he took over the holdings of the Burkburnett-Petrolia Syndicate on the Dale farm, in the Petrolia field. The holdings are 3,700 acres and a drilling well. The sale involved about a million dollars, though no announcement of the exact amount was given out. Reynolds is interested with a New Yorker in the purchase of the property. Senator Reynolds also purchased the holdings of the Prescott-Phoenix Oil company, who have valuable holdings in the Northwest Extension, M. A. and the Sigler fields. Senator Reynolds and associates also purchased 600 acres between the Ryan well in the Northwest field and Electric. This on the holdings will be thoroughly developed by New York capital. The Prescott-Petrolia company, of which Reynolds and associates promoted, brought in the Sigler well.

**WILBARGER DRILLING SUMMARY.**

A summary of the drilling report follows:

American State Oil & Gas company, Kelly, section 54, block 13, 2000 feet, drilling.

McIntosh & Churchill Wharton, drilling 1250 feet.

Apex Oil Company, section 34, block 13, Ferguson, rig down 1888 feet.

Atlantic Petroleum Co., Ltd., Boyd, section 16, block 14, drilling 1800 feet.

Adams et al. Smith, rigging up.

Big Waggoner Oil Co., No. 1, Katherine Waggoner, section 26, block 12, 1700 feet waiting on crew.

Burk-Paton Oil Company, Payton drilling 2400 feet.

Barlow et al., Pyle, section 24, block 13, spudding.

Brewer et al., Wharton, section 29, block 47, shut down 2100 feet.

Border State Oil Co., Boyd, section 1, block 14, moving tools.

Buckeye Oil Co., Waggoner, section 47, block 2, 1700 feet, drilling.

Byars Farm Oil Company, Byars, section 28, block 12, 2370 feet, cleaning out and setting casing.

Heaver Farm Oil Company, Womack, shut down 905 feet.

Crescent Cove Oil Company, J. F. Starr, section 7, block 15, moving tools.

B. Churchill Oil Co., Watta, block 15 moving in tools.

Castlebury Oil & Gas Company, Castlebury, section 47, block 14, location.

Clio Oil Company, section 20, block 13, location.

Cable Oil & Gas Co., Tuttle No. 1, subdivision 182, Waggoner Colony, drilling at 1810 feet.

Edwards Oil & Gas Co., section 58, block 4, derrick blown down.

Federal Oil Company, Baker, section 29, block 5, drilling 1820 feet.

No. 2, Baker, derrick.

Jeffrey-Ayers, et al., Willie Vaughn, section 5, block 15, drilling 1900 feet. Mrs. W. A. Vaughn, Sr., section 29, block 16, derrick.

Flowers et al. Wharton, section 18, block 14, shut down 1900 feet.

Gulf Production Co., McMillan, drilling 800 feet.

Garner Oil Company, Wells, section 48, block 15, drilling 1850 feet.

Guyer-Trisler Oil Company, Guyer No. 1, subdivision No. 122, Waggoner Colony land, shut down 2510 feet.

Gen Oil Co., Wharton, section 27, block 2, rigging up.

Harrington & Robinson, No. 1, McCaleb, section 47, block 15, drilling at 1920 feet.

Harrold-Texas Oil Company, No. 1 Cochran, sections 47 and 48, block 13, drilling 1200 feet. No. 2 spudding.

Home Oil Refining Co., with leases on 250,000 acres in the Waggoner ranch—Guyer, section 1, block 1, 1670 feet. No. 1, Paul Waggoner, section 9, block 1, 1290 feet, cleaning out. Nos. 3, 4, 5 and 7, timber, Nos. 8 to 12, location.

Kansas City Petroleum Company, No. 1, King, section 72, block 12, derrick.

F. P. Langford, et al., Moonshine Hill No. 1, Robb subdivision 1800 feet, drilling.

Lin-Cook et al. No. 1, Webb, drilling 1620 feet. No. 2, Waggoner, 1620 feet.

Magnolia Petroleum Co., Green, section 20, block 13, drilling 1820 feet.

Minnesota Southern Oil Company, C. Hinchworth survey, shut down 1520 feet.

Mitchell Farm Oil Co., Mitchell, Waggoner Colony, drilling 1620 feet.

Neal-Hamilton, No. 1 Neal, section block 11, 280 feet, drilling.

Noble Oil and Development Company, section 45, block 14, Judd, drilling 10 feet.

Pena-Burk Oil Company, West Vernon No. 1, Hurt, section 41, block 14, drilling 140 feet.

Royal Flush Oil Company, section 54, block 16, Randall, location.

Radio Oil Co., Wharton, section 7, block 2, derrick.

Luttrell & Galtney, Richardson, section 88, block 14, drilling 1290 feet.

Star State Oil Co., block 272, Waggoner Colony, drilling 790 feet; section 17, block 2, Waggoner, spudding.

Reed-Hatch Oil Company, Hawley, No. 1 section 22, block 3, 800 feet; Reed No. 1 section 23, block 3, 900 feet; Williamson No. 1, location.

F. H. Robinson, Smith, section 25, block 13, No. 2, 19 barrels at 195 feet; No. 3, 11 barrels at 197 feet; No. 4, 18 barrels at 195 feet; No. 5, spudding.

Sigler Oil Co., No. 1, Wharton, swabbing barrels every six hours. Oil being sold for fuel; No. 2, standardizing 1908 feet; No. 3, spudding.

Staley-Green, Zipperle, section 50, block 14, 1710 feet.

Staley-Green, et al. Dill, section 82, block 14, 1550 feet.

S. & R. Oil Company, Hancock, section 60, block 13, drilling 1920 feet.

S. & R. Oil Company, Hancock, section 60, block 13, drilling 1920 feet.

Etopia Oil Co., Ayers, No. 1, section block 19, spudding.

Smith and Greene, Castlebury, section 100, block 14, drilling 2000 feet.

Schurr Oil Co., Schurr, sections 20 and 2, block 9, location to be determined.

Twin Six Oil Company, Smith well in section 25, block 13, drilling down 1800 feet.

Texas Crescent Oil Company, section 24, block 13, contract completed, 2153 feet.

Tex. Williams, Williams, section 78, block 11, drilling 2200 feet.

Tex-Pee Oil Company, section 34, block 13, shut down 1735 feet.

Texco-O-Wa Oil Company (former Acton) No. 1, Goss, subdivision 28, Waggoner Colony, 1735 feet, shut down.

Texas-Petrolia Oil Company, Wharton, section 58, block 2, derrick.

Vasey-O-Hill Oil Company, Vasey, section 4, block 11, 2210 feet.

Vernon Checkerboard Oil Co., Turbett section 28, block 14, 480 feet, shut down.

Vernon Oil & Development Company, No. 1, Lowe, section 94, block 15, drilling 2470 feet.

Vernon Chief Oil Company, section 44, block 2, material.

Vernon Home Oil Company, Green, section 19, block 12, derrick.

Vernon Winner Oil Co., Milner, section 30, block 9, derrick.

Waggoner Colony Oil Company, Taylor No. 1, section 55, block 13, fishing for two strings of tools, 1910 feet.

Wilbarger-Hardeman County Oil Company, Durham, section 67, block 14, shut down 830 feet.

Wilbarger County Oil Company, Carter, section 21, block 10, shut down around 1040 feet.

Wilbarger-Haley, King, section 8, block 15, 600 feet, shut down.

Burton & Waggoner, section 46, block 14, drilling around 1900 feet.

Wilbarger Southern Oil Co., Molley Cotton Tall, section 105, block 14, Waggoner, drilling 810 feet.

Wilbarger National Oil Co., Guggishberg section 15, B. S. & F. survey, standard derrick completed.

Without et al., section 15, block 14, Point-erent, location.

Lawrence Drilling & Development Company, Robertson, section 25, block 14, location.

Mid-West Petroleum Company, Wheat No. 1, section 134, block 8, reports striking a pay sand, setting casing to avoid sand water 2725. No. 1, Gilliam, drilling at 1100 feet; No. 1, Mulkey 220.

The Agalite Company, drilling on section 207, and another location made.

McReynolds Oil & Gas Company, No. 1 O'Hairry, 850 feet, drilling.

Oil Products Company, derrick and tools down at 1000 feet.

Bimhurst Investment Co., Brock 1200 feet.

Billy Greene Oil Co., material.

Groesbeck Oil Company, Sparks, overhauling machinery.

Victor Oil & Gas Company, spudding.

Walker Oil & Refining Co., Lance, drilling.

Fort Pitt Oil Co., Acma, shut down 80 feet.

Prizell, et al., No. 1, Norton, drilling at 2140 feet; No. 2, Porterfield, 700 feet.

The Great Western Petroleum Co., Hopkins school land, drilling 1000 feet.

C. & H. Oil Company, section 60, block 16, 900 feet, drilling.

The volume of deposits indicates the public's measure of a bank. The City National Bank of Commerce has resources aggregating approximately more than \$23,000,000. Industries, men and women of wealth, and wage earners, have found it advisable to entrust their funds to the care of this bank.

A. A. Dickson, who is now located at Hobart, Okla., where he is manager of the leading hotel, is visiting friends here. Mr. Dickson was formerly manager of the St. James.

Smoke Peters' "Experience." For sale at all cigar stands. Stehly & Baber, distributors. 348-47c.

# DON'T BUY

Tires Until You Have Seen the Best, and the Best Tire that Has Yet Made its Appearance is the One that Bears the Name—

## HOWE

It seems strange that we say they are the best, but in saying so we are making a truthful assertion. When a tire is purchased from the average dealer the only guarantee that unsuspecting consumer gets are mere promises from friend dealer.

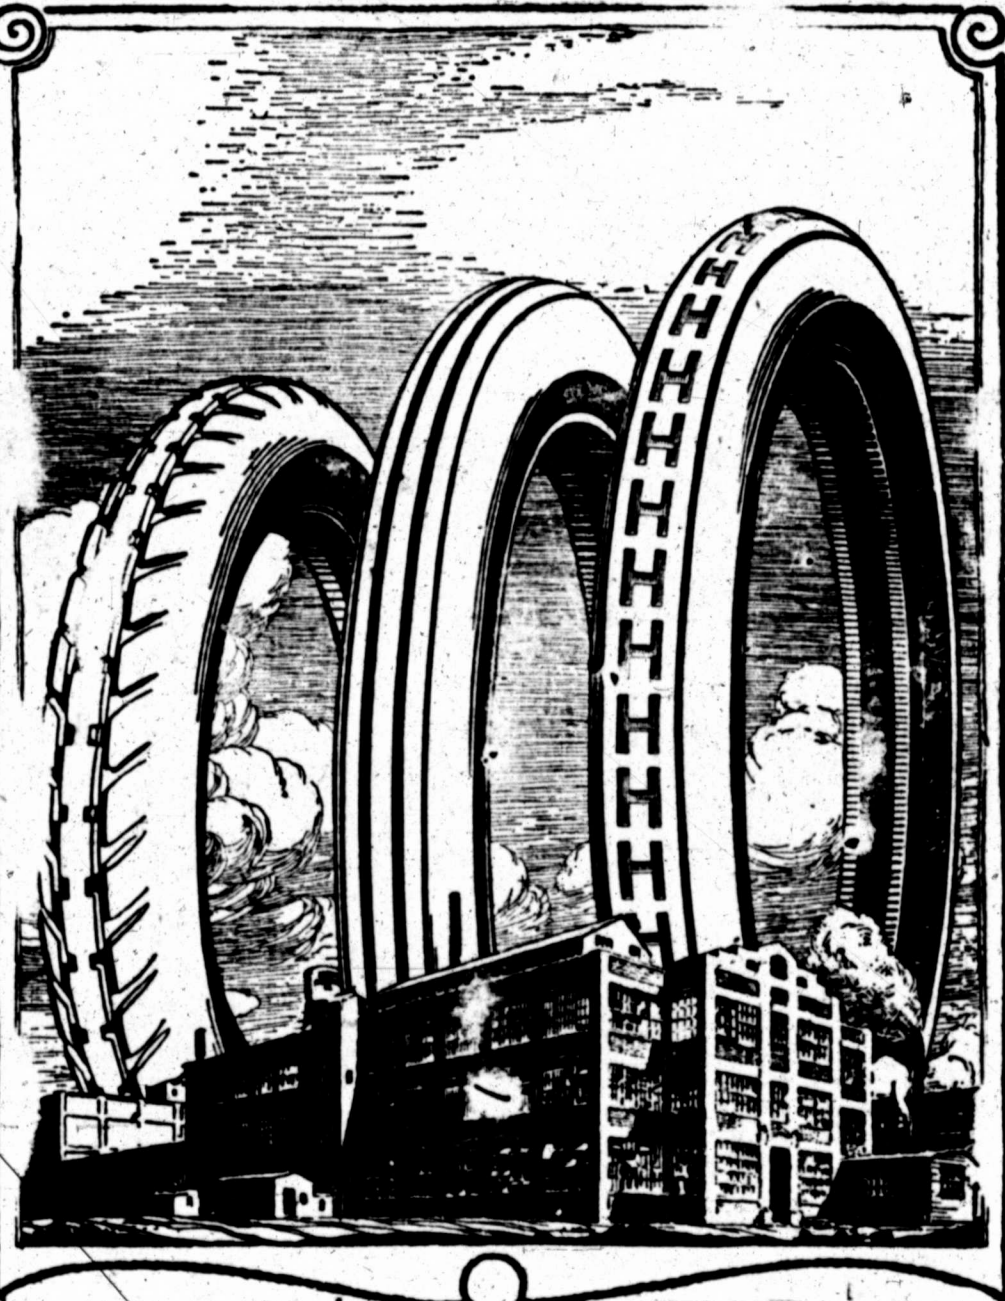

### DO YOU KNOW

That 73% of the tires that become unserviceable and returned for adjustments are refused as soon as the eagle eyes of the adjusters give them the once over and then the owners are notified in a sweet sounding, silver-toned letter that the manufacturers are very sorry that their tires haven't given the proper service and under the existing circumstances an adjustment is impossible.

OUR GUARANTEE ON HOWE CORDS AND FABRICS IS COVERED

### BABY CLINIC OFFERS OPPORTUNITY WHICH THE MOTHERS OF WICHITA COUNTY SHOULD TAKE ADVANTAGE

"Are you your baby's keeper?" might be a pertinent question for Wichita mothers this summer who neglect the opportunity to attend the splendid baby clinic being held under the direction of the local Red Cross organization and the state board of health.

The baby clinic, which is for all children under school age—is held in a room in the basement of the court house, with a physician, trained nurse and assistant nurse in charge, and every mother in Wichita of a babe or child of doubtful health, is urged to bring the child to the clinic, held every Tuesday and Friday morning from 10 to 12, for examination and advice. Friday morning 12 babies were examined, and in several cases advice given which will save both mother and child much suffering. In almost every case the little ones were victims of very minor complaints, for which the family physician would probably not have been called. In the larger cities most of these would have been covered by the visiting nurse, and Wichita is fortunate to have the clinic in the absence of such a worker. There are far too few babies being brought to the clinic, however. With a population of 40,000, Wichita has approximately 2,000 babies. It is beyond reason to suppose that all of those 2,000 babies are in good health during this hot weather. In fact, since the infant mortality figures are, conservatively, one child under 2 years in every 10, meaning that 200 of Wichita's 2,000 babies will die during the year, with the greater majority of deaths in the summer, it is reasonable to say that several hundred of the 2,000 are not up to standard right now, and that the proverbial "itch in time" might save many a death. The deaths are largely from preventable causes, also, according to general health statistics, and a little attention to a babe in the doubtful list right now, during the most dangerous time of the year, would save a possible serious illness—and a baby seriously ill in the summer has a very slender chance for recovery.

Examination at the local clinic is free and thorough. Diseased tonsils, eyes, ears, nose, throat, in fact, physical defects of all kinds, are looked for. The teeth are examined, and heart and lungs "investigated." The baby or child who is put through its paces at the clinic has a better chance for summer health and health for the rest of its life than the child whose heightened temperature is overlooked, whose mouth-breathing is charged to any one of a dozen causes other than the real one—adenoids—or whose digestive troubles are charged to green apples rather than, which is often the case, bad teeth. A beautiful 7-month-old baby girl was at the clinic Friday morning, and might be called an example of the child whose minor ailment could easily be in the way of causing a lifetime of suffering. The baby was round and black-eyed and dimpled—a bundle of energy and interest. But she had a cold and cough, and suffered from intestinal trouble. "She seems full of cold all the time," the young mother explained, "and has had this other trouble some days. Not bad, but I thought I'd bring her to you." "Do you observe a regular schedule for her feeding?" Miss Quinn asked. "Yes. But lately it has been hard to. She wants to break into it quite a lot, and I haven't been as careful. She is so restless if I don't feed her when she wants it." Miss Quinn explained the danger of breaking into the baby's regular feeding schedule, especially during the danger time of the summer months, and talked several minutes with the young mother. It was not a case of carelessness or lack of attention—a lover baby could hardly have been found, or one evidencing more careful mothering. But the hot weather is hard on little kiddies, and when they are restless and uncomfortable, they will cry (perfectly healthy tears, sometimes) and an extra feeding or two had quieted the one in question, and seemed necessary. Result: digestive difficulty which could easily and with terrifying quickness go into the fatal "summer complaint" if the cause were not removed, and a susceptibility to cold and coughing. But the baby's mother found out what she wanted to know, and baby will probably be in the best of health when next heard of. More babies should be brought to the clinic—and more mothers.

### FRECKLES

Now is the Time to Get Rid of These Ugly Spots. There's no longer the slightest need of feeling ashamed of your freckles. Othine—double strength—is guaranteed to remove these homely spots. Simply get an ounce of Othine—double strength—from any druggist and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than an ounce is needed to completely clear the skin and gain a beautiful clear complexion. Be sure to ask for the double strength Othine as this is sold under guarantee of money back if it fails to remove freckles. (adv.)

## Fourth of July Independence Day

This is a day when Patriotism surges in the breast of every true American citizen. A day that commemorates the signing of that wonderful document that gives us the Liberty we enjoy today.

It is good to know on this anniversary of the Declaration of Independence that the whole world is endeavoring to frame a similar declaration whereby all peoples may be equally independent with, for and of each other with a view that National acts shall be guided by conscience.

And the strength of DEMOCRACY is shown by the stars and stripes which is the only national flag that has flown unchanged through the world changes of one hundred and forty-four anniversaries.

Due to the fact the INDEPENDENCE DAY falls on Sunday, our store will be

## WALLACE REID AT EMPRESS TWO DAYS

### Paramount-Artcraft Comedy "Sick-a-Bed" Showing on Monday and Tuesday

A whirlwind of complications overtake Wallace Reid in his latest Paramount-Artcraft comedy, "Sick-a-Bed," the feature attraction to be shown at the Empress for two days beginning Monday, when he attempts to protect a friend by pretending that he is so ill he can not go to court and testify in a divorce case.

Since he is the star witness, Wallace delays the proceedings, but he has a hard time getting away with the deception. Two quack doctors, one a physician, a beautiful nurse, a homely one who snores, a wife love sick for every man but her husband and the husband himself all rush to his bedside.

The deal was going fine for a time. After much complaining the "patient" was soothed into a blissful joy at the sight of the wonderful nurse, who has to attend his needs and he promptly decided to remain very ill. The husband, who had concocted the scheme of having Wallace sick so he could not give the testimony needed to grant the plaintiff her divorce, was delighted, and the case was being delayed as per schedule.

The wife begins to get suspicious, however, and suspecting that her all-but-forgotten husband is still in the hospital, she goes to the examination. What were they doing when their "patient" was a perfectly well man. It was the nurse who saved the situation, and the nurse by the way is none other than the charming Bebe Daniels, in enough to give any man a case of accelerated heart action. When the doctor got out his instrument for testing the heart the nurse got on the job. As the machine was placed over Wallace's heart and the doctor watched the pulse, Bebe bent over and kissed the patient full on his lips. Small wonder the doctor exclaimed, "Great Gosh! What a heart the man has got!"

It transpired, however, that the only illness existent was a case of love for life between the white "patient" and his pretty nurse.

## NEW SKIT THIS WEEK BY 1920 REVUE

### "Her Gloves" Topic for Farce Featuring Billy Maine in Impersonation

"Her Gloves," a farce with music numbers and singing specialties featuring Billy Maine in a feminine impersonation will be the offering for Monday, Tuesday and Wednesday of the week at the Wichita. Mr. Maine will be at his best in this skit which is claimed to be one continuous laugh from the time the curtain rises to the finale. In this comedy farce the remainder of the cast will have excellent parts which should make "Her Gloves" one of the best bills yet presented by this combination which has been delighting the capacity houses nightly. The quartet will be heard in new harmony numbers as well as many novel musical numbers by other members of the cast. For the last half of the week Pantages vaudeville and vaudeville will hold the boards, Matinees on Wednesday and Saturday with two shows nightly.

## "SOUTHLAND'S SWEETEST TENOR" AT THE OLYMPIC STARTING ON MONDAY

Mr. Hampstead Bentley, "Southland's Sweetest Tenor," late of the Al G. Fields Greater Minstrels, opens a week's engagement at the Olympic theatre, commencing Monday.

Mr. Bentley needs no introduction to local theatre goers, as he will be remembered as one of the feature soloists with the Fields show that have delighted Wichita show goers, season after season.

Mr. Bentley comes to the Olympic with a song programme of late hits that range from a selection of Opera, to the "Jazziest of Jazz," and to Judge from his vaudeville notices, he will doubtless offer something decidedly worth while.

He carries his own pianist and the two are making a tour of the better class picture theatres in the South. Among the features they will offer will be the latest Broadway song hits illustrated in Motion Picture Film, a that has never before been seen here.

Antonio Express, has this to say of their ability: "Hampstead Bentley and his very capable pianist who are filling a return engagement at the Empress, offer the cleverest fifteen minutes of clever singing that has been heard here in many moons. They come here direct from a long run at the Circle theatre Indianapolis, bringing with them, a song programme that one rarely hears off the "Big Time," and their ability to "put them over" shows very clearly that they have been used to playing the big ones.

Special mention should be made of their film songs, which they are the first to introduce here. The photoplay program at the Olympic Monday, Tuesday and Wednesday is headed by Marshall Neilan's production of "The River's End."

No play has given the public a more decided insight into life as it is lived in the "Great Northwoods" than "The River's End," the first of Marshall Neilan's independent productions taken from the story by James Oliver Curwood and distributed by First National Exhibitors' Circuit.

Mr. Neilan's superb touch as a director has brought out the life in the northwest, as also has the selection of the "location." The life about which we know little or nothing is brought home to us in a most vivid manner. Leading the show cast are Lew Stone, Marjorie Daw, Jane Novak, Barney Sherry and Charles West.

## HAYAKAWA AT PLAZA ON NEXT WEDNESDAY

### Japanese Star Will Appear in Photo Drama Dealing With Inter-Racial Problem

Hayakawa, the Japanese star, will appear in the photo-drama, "His Birthright," at the Plaza Wednesday. The play deals with inter-racial problems in an engrossing way.

Marin Sals, leading woman of the cast, who is known throughout California as "the Marin County beauty," is a Notre Dame girl, who graduated from the famous academy directly into a theatrical career, becoming one of the best known of the younger stock actresses on the Pacific coast. After four years of regular stage training Miss Sals joined the Vitagraph forces and has since been given lead roles in productions by Vitagraph, Bison, Kaleim and other companies before she joined the Haworth forces.

Howard Davies, the English actor who has the second lead, was for many years with Wilson Barrett on the London stage, and his screen career in the United States, includes leads in productions by most of the principal companies.

Mary Anderson, the pretty Brooklyn girl who made a hit in "The Hoyden" and "La Paloma," and Tauru Aoki, the dainty Japanese girl who is Mrs. Hayakawa in private life, with Harry Meyer, who was formerly with Henry Kolker in "Help Wanted," make up the cast.

## Movie Calendar

Monday and Tuesday—Wallace Reid and Bebe Daniels in "Sick-a-Bed," also George Ovey comedy. Wednesday—"The World of Folly," featuring Vivian Rich; also "Fatty Aruckle in 'The Waiters' Ball." Thursday—Shirley Mason in "Molly and I," with Hank Mann comedy. Friday and Saturday—William Desmond in "A Broadway Cowboy," also Fox News, Rolin comedy and "Jigs and the Social Lion."

Olympic. Monday, Tuesday and Wednesday—Marshall Neilan presents "The River's End," Hampstead Bentley, tenor, Larry Semon in "School Days." Thursday, Friday and Saturday—Douglas Fairbanks in "The Malloyed," Hampstead Bentley singing; News Week, y and Herbert Kaufman's Weekly.

Majestic. Monday and Tuesday—The Wichita Falls Round-Up in motion pictures; Bray pictograph; Literary Digest topics; Cartoon comedy. Wednesday and Thursday—Antia Stewart in "The Fighting Shepherdess"; Pathe news; Christy comedy. Friday and Saturday—"Blind Youth," also two reel Big V comedy.

Plaza-Airdome. All week—Al Shaffer's boys and girls, Tabloid musical comedy. Monday and Tuesday—Eugene O'Brien in "Broken Marriage." Wednesday—Sessue Hayakawa in "His Birthright." Thursday—George Walsh in "Last Straw." Friday—William J. Flynn in "Change and the Law," and Margery Wilson in "Marked Cards."

## Screen Sittings

By JEAN DARNELL

The Talmadge sisters, Norma, Natalie and Constance, with their mother and Norma's husband, Jos. Schenck, expect to open their summer lodge at Debago Lake, Maine, about July first.

Mildred Harris Chaplin is looking forward to a pleasant visit to England this summer as the guest of a titled English lady, who met the little actress at Santa Barbara while filming some scenes there. So charmed was the distinguished visitor with the fair Mildred, she insisted on her making an extended visit to Great Britain as soon as her present picture contract will permit.

Rex Beach, the eminent author and president of the Goldwyn entertainment, is spending several months in the oil fields of Texas. Mr. Beach is looking for material for his next book, from word received from him in the wilds of the oil country he is finding plenty of copy.

Douglas Fairbanks, Jr., is expected on the coast to visit his famous daddy, and even more famous step-mother (Mary Pickford) just as soon as school is out in the east. Young Fairbanks, from word of the old block, and he and his dad have great times.

Ethel Barrymore is working in a special production for Robertson-Cole. Did you know Miss Barrymore is the mother of three of the most beautiful children in New York society. Master Sammie Colt, Ethel Barrymore's son, is a busy engaged making pictures for Jessa Lasky.

"What has become of Bill Hart?" "Everybody is asking where their favorite 'cowboy hero' is hiding. The answer is in Dallas shortly to make arrangements for the famous associated producers to open an exchange in that city."

Barrymore's husband is the son of Samuel Colt, of the Colt firearms fame.

Vivian Martin had firmly made up her mind to retire from pictures, but the call was too strong, so little Miss Martin's next release, "The Song of the Soul" will shortly be seen in a local theatre.

Alice Joyce is quite interested in Hotels. Miss Joyce owns the Hotel Joyce on Central Park West in New York and is married to James B. Reagan, Jr., manager of the great Knickerbocker Hotel in New York. She should worry how high rates go!

Christina Pereda, the Spanish beauty who supports Lew Cody in "The Butterfly Man," is planning to go to Mexico to look after some property just as soon as conditions become more settled as all of her family's property has been in the hands of Carranza for several years.

James Cruze and his company have returned to the Lasky Studio after three weeks sojourn at Big Bear Valley on location. Director Cruze is delighted with results obtained up there, and promises some really wonderful scenes.

It is reported that F. B. Warren, who represents the "Big Six," composed of Thos. H. Ince, Marshall Neilan, Maurice Tourneur, Allen Dwan, Mack Sennett and Geo. Loane Tucker, is expected in Dallas shortly to make arrangements for the famous associated producers to open an exchange in that city.

"What has become of Bill Hart?" "Everybody is asking where their favorite 'cowboy hero' is hiding. The answer is in Dallas shortly to make arrangements for the famous associated producers to open an exchange in that city."

## MOTION PICTURES WICHITA FALLS ROUND-UP WILL BE SHOWN AT MAJESTIC THIS WEEK

The motion picture of the Wichita Falls great round-up and cowboy athletic sports will be shown at the Majestic theatre Monday and Tuesday. This picture has been in the making since the Round-up was held and is said to be full of interesting and thrilling scenes. It is full of action and thrills and is even better than the round-up itself as all the action, many of the scenes being close-up is in full view of the audience. It is a Wichita Falls production and many Wichitans will no doubt avail themselves of this opportunity of seeing themselves and their surroundings in motion pictures.

The stereotyped motion picture character of the man who keeps the western dance hall and saloon gives place to a new type in "The Fighting Shepherdess," starring Antia Stewart, to be seen at the Majestic theatre two days commencing Wednesday. In this picture Miss Stewart plays the part of the daughter of the proprietor of a questionable tavern in the California sheep

stream from Broadway with several trunks filled with the latest styles in clothes, footwear and headgear, Miss Stewart laughed when the garments that she was called upon to wear were pointed out to her. Goodnaturedly she laid away her finery and donned high-heeled boots, buckskin shirt, broad brimmed hat and shootin' apron to play "the fighting shepherdess."

With the summer vacation period approaching it is appropriate to consider the storage of valuables during absence from the city. The City National Bank of Commerce has one of the most complete safe deposit vault systems in the south. The safe deposit boxes rent for reasonable fees according to the size of the box. \$2.00

### GERMANS TO REFUSE TERMS UNABLE MEET

By CARL D. GROAT  
(United Press Staff Correspondent)

BERLIN, July 2.—Germany will not agree to any allied proposal made at Spa which the German people feel they will be unable to fulfill, Foreign Minister Simons told the reichstag foreign affairs committee today. He said the most pressing problem facing Germany was restoration of a normal economic basis and return of the German people to their work.

Simons outlined the internal situation showing the need of raw materials and credits.

Herr Heilferich, speaking before the reichstag meeting, caused a stir by declaring the treaty would not have been so drastic if the entire German nation had stood behind the government leaders who held out against signing the document. He blamed Matthias Erzberger for the harsh terms, saying Erzberger had promised that the treaty would be signed in any event.

Finance Minister Wirth declared such talk at the present time was against the national interest.

The government has not named the bankers and business men who will go to Spa.

The German delegation to Spa will number 25 and will include the ministers of foreign affairs, food, economics and reconstruction.

A memorandum, signed by a number of business men, has been prepared for submission at Spa, pointing out that Germany's ability to pay a large indemnity has been limited as a result of surrendering of many territories. This has also lessened the sources of revenue open to German government, the memorandum sets forth.

### LOMESA HAS SHIPPED 300 CARS OF 1920 GRAIN CROP

LAMESA, TEX., July 3.—Lamesa to date has shipped out 300 cars of grain with 100 more cars to ship, according to a statement made by C. T. Watson, secretary of the chamber of commerce, to the West Texas Chamber of Commerce.

The crop acreage for 1920 has been increased 50 percent above that of last year. Prospects are flattering for a bumper crop. Last year the county averaged one ton of milo maize to the acre and made 10,000 bales of cotton from 22,000 acres.

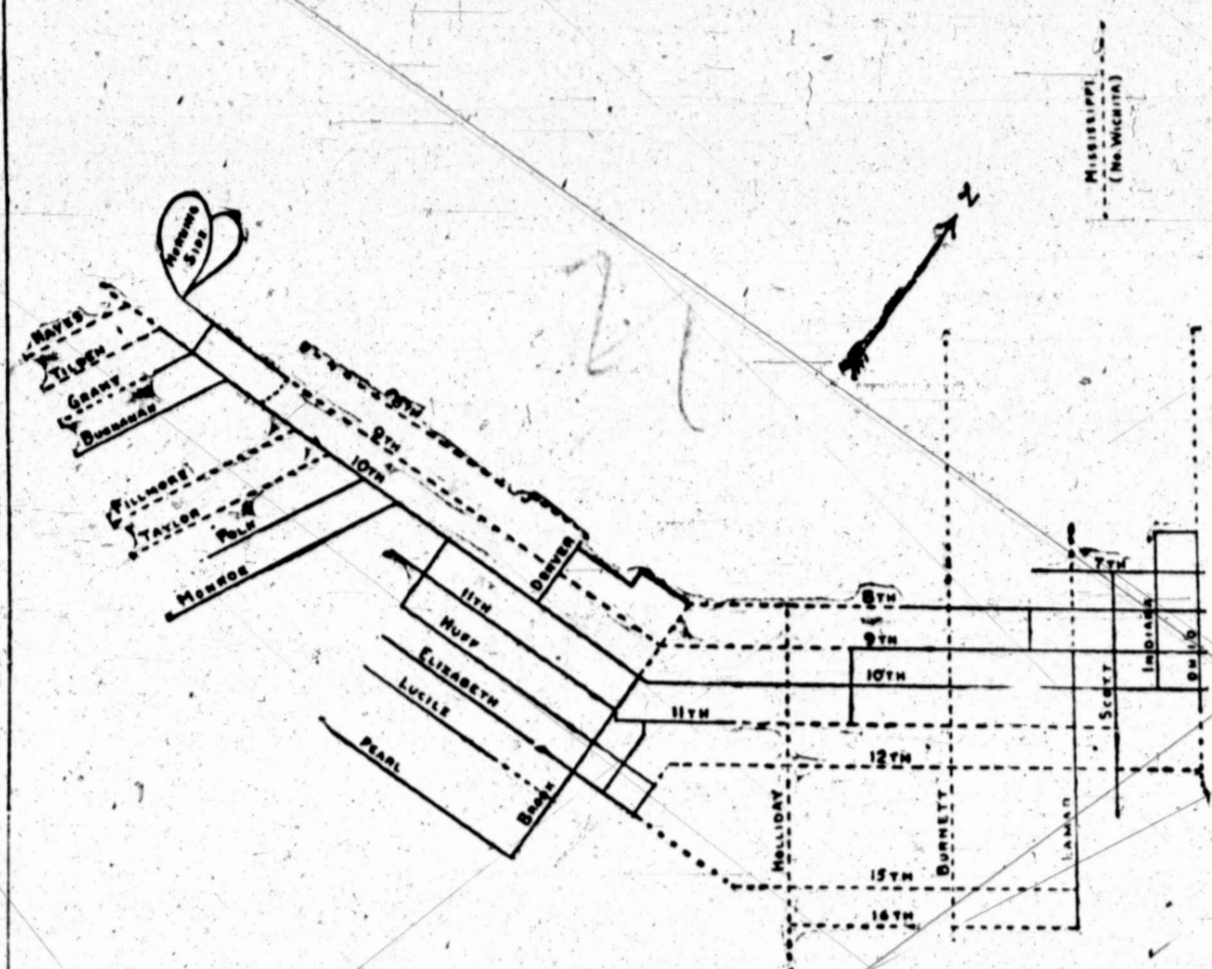

This town has two banks with deposits twice as large as any other South Plains county with the exception of Lubbock county. It has three groceries, three drug stores, three dry goods houses, two hardware establishments, two furniture enterprises, three hotels, one paper plant, three garages, two lumber yards, a \$100,000 court house, one railroad, twenty-seven business houses, one brick moving picture show building, one large brick warehouse, four kind, one ice plant, one electric light plant, one mattress factory, one plow factory, four churches and bonds have been voted for one of the most commodious high school buildings on the south plains.

Lamesa recently renewed its affiliation with the West Texas Chamber of Commerce by taking out an increased membership.

Mr. and Mrs. H. L. Hunter have returned from a three weeks' trip through the eastern states. They spent some time in Philadelphia and then made short visits in a number of the larger cities of the east. Mr. Hunter is connected with the City National Bank of Commerce.

Picture frames at Decorators Co. 57-7tc

### MAP SHOWING STREETS INCLUDED IN STREET PAVING PROGRAM FOR THE YEAR

On the accompanying map, streets already paved, or on which paving is definitely contracted for, are shown in black lines, and those included in Councilman Curlee's paving program for this year are shown in dotted lines.

Completion of the program will more than double the paved mileage, and will put every portion of the city within easy reach of pavement. The consummation of the program depends largely upon the co-operation of property owners, and it is believed that the working out of some plan whereby installment payments for paving can be arranged will greatly facilitate the program.

The program calls for paving of Eighth, Ninth, Eleventh, Twelfth and Fifteenth streets, giving new high-ways between the eastern and western parts of the city; the paving of Burnett and Holiday streets, giving two additional paved routes to the southern part of the city; paving of Ohio and Lee, so as to reach North Wichita, via the lower bridge, and a large amount of other paving.

### MEREDITH MAY ACCOMPANY TEXAS FARM BOYS SPECIAL

DALLAS, TEX., July 2.—Edwin T. Meredith, U. S. Secretary of Agriculture, may accompany the Texas Farm Boy Special over a part of its itinerary according to Alexander Jackson of Chicago, agricultural agent for the Chicago, Rock Island and Pacific railroads, who writes to Walton Petzet, agricultural manager of the Texas Chamber of Commerce, that he is making an effort to this end.

The Texas farm boys will be entertained on the Meredith farm at Des Moines, Iowa, and Mr. Jackson believes that Secretary Meredith will accompany the boys part of the way.

"The Texas Farm Boy Special is attracting wide attention and comment in the north and east," states Mr. Jackson who has been aiding H. Williamson of A. & M. College, in routing the boys through the Central States. He says:

"The Texas Farm Boy Special is going to be a big thing for Texas as well as for the states visited. It will be of great advantage to Texas both from publicity and educational standpoint. The trip has been an eye-opener to all agricultural colleges so far visited; they are astonished at the magnitude of the undertaking and the foresight of the people of Texas in establishing such a precedent."

### DICKENS COUNTY KILLS THOUSANDS OF PRAIRIE DOGS

SPUR, TEX., July 3.—The prairie dog of Dickens county has long since gone to the "happy hunting ground." Not willing to stand by and witness his depredations Spur business interests employed a force of about fifty men and boys steadily for three years clearing the Spur county of the animal. Literally, millions were killed by poisoned grain and carbon and the land once so pervasively infested is today without the menace.

### CAR SHORTAGE ON STATIONS ALONG FT. W. & DENVER ROAD

CHILLICOTHE, TEX., July 3.—A grain car shortage of between 75 and 100 cars daily is reported at stations along the Fort Worth & Denver railroad. Each station is receiving its pro-rata of cars coming to this line, and the West Texas Chamber of Commerce has taken up with the Interstate Commerce Commission the allocation of sufficient cars to take care of the great movement.

### Let De Berry, Albritton & Montgomery insure you against loss by fire or even death. Phone 39. 213 Commerce Bldg.

### Crowell Needs Cars CROWELL, TEX., July 3.—The Crowell Chamber of Commerce today wired the West Texas Chamber of

# MOVEMENT TO DENATURE FOURTH OF JULY HAS TAKEN MUCH OF JOY FROM YOUNG AMERICA

By C. F. CARTER.

The writer of what follows was born on July 5—wherefore he claims to be better posted than most men on the inalienable right of the small boy to raise Ned on July 4th.

Do you see the small boy of Wichita Falls raising Ned to any considerable degree today? You do not, nor will you see him raising the said Edward to any marked degree tomorrow. And why? Ah, there's the question that can only be answered by one who was born on July 5, and is therefore well posted on a subject that once was very, very dear to the heart of American boyhood.

The friend who first raised his voice in a wild cry for a "safe and sane Fourth" is responsible today for the subdued spirits of the boys of Wichita Falls. Let the editor and publisher of the Times shake his head, and gently remind us that we are running contrary to the common sense of a great nation—we defy him to refute the statement, or to cut one word from this masterful story in defense of the American boy! If he does, we'll resign—perhaps!

That miserable man who shouted for a "safe and sane Fourth" had friends. He shouldn't have had, but doggone it, he did. And they got together, stroked their gray beards, forgot they ever were boys and decided that the noise and turbulence usually connected with the Fourth of July constituted a menace to life and limb, and a horrible danger to property. They agitated at length, and they agreed this cruel doctrine and the result is that today the boys of Wichita Falls are a quiet, subdued lot to whom the grand and glorious Fourth means mighty little.

For the Fourth of July was a habit. If as a boy you lived through one riotous Fourth, crammed full of noise, glittering fireworks, exploding cannons, missing fingers, stung eyebrows, powder burns in the palms of your hands, terror to your grandmother, and wise counsel from your dad regarding what he did on the Fourth when he was a boy—if you lived, escaped with your boyish life, through just one Fourth of that description, then you awaited the next Fourth of July with a holy spirit of anticipation that beggars description; a divine thrill that is only an American man's boy.

For this generation of American boyhood, thanks to the saters and saners, lacks the Fourth of July habit. The boys of Wichita Falls, to be sure, are exploding a few firecrackers—but shucks! they have so few to explode that they're even using matches! Can you beat that? Betcha you can't find a boy in Wichita Falls with a regular stick of punk all aglow, and five pockets stuffed full of crackers; c'mon, now, betcha!

And, anyway, see what, how can a fellow celebrate a Fourth when firecrackers and Roman candles and pinwheels 'n' everything cost so much? Once upon a time the American boy could save up 10 cents from selling papers, or cutting Mrs. Rideout's lawn, or, maybe, working one day in Bill Temple's drug store selling "sodys"—and say, he could buy a whole bushel basket full of fireworks, couldn't he? But today a fellow just has to depend on his dad's generosity—and half of the fathers

don't own any oil wells or banks, and the other half, most likely, are "afers and saners" themselves.

This is the Fourth of July. It's Sunday, hence tomorrow, July 5, is the recognized legal holiday. The banks and business houses of the city will be closed, the streets will be deserted, and those who can afford it will climb into their touring cars, runabouts, coupes, sedans and roadsters and drive out into the country some where and eat sandwiches and drink lukewarm beer that is not beer, and exclaim occasionally, "Oh, quick! Look at 'he jackrabbits!"

Why, the Times will even get out its regular edition tomorrow, in complete and utter disregard of the fact that tomorrow is legally the Fourth of July; that it is the birthday of this writer and that it is the day on which John Gould, publicity manager of the chamber of commerce returned to his beloved state of Texas after spending a year in France during the Teuton horde to do their dirtiest.

In faith, friends, we have fallen upon evil days.

Auto Paint at Decorators Co. 57-11c

## ALL ENGINES ON KATY WILL BE OIL BURNING

W. N. Whitenton, transportation and maintenance manager of the Missouri, Kansas and Texas railroad, has announced that all Katy locomotives on the Texas lines of the company are to be transformed from coal-burners to oil burners. There are nearly 150 oil burning engines on the Texas lines now and Mr. Whitenton states that the remaining 215 in use will be converted into the latter type by the first of next year. Experiments conducted by the Katy officials showed that the use of oil as fuel for motive equipment was so much more economical and satisfactory in every way that the expense required to make the changes was more than justifiable.

It is estimated, Mr. Whitenton said, that it will cost approximately \$700,000 to complete all changes necessary. To convert a single locomotive from coal-burning to oil burning costs \$1,600, and the erection of oil stations and storage tanks along the lines is an expensive proposition when it is considered that both storage and filling stations must be placed at practically every location of coal stations.

In making the contemplated changes the Katy is following the example set by a number of the larger railroads of the south. The Southern Pacific system has used oil-burners exclusively for some time and the Santa Fe and the Texas and Pacific also have a number of oil burning locomotives.

## DR. DOUGLAS DECLARES BAND RESPONSIBLE FOR SHRINE DISPENSATION

His lips swollen, and his wind all but vanished completely, Dr. A. H. Douglas, city chemist, has returned to the fair vale of Wichita Falls—and his smile is broad, and his heart beats high.

"Doc's" lips are swollen because he played the slide trombone in the Shrine club band on the recent memorable trip to Portland, Ore. that resulted in bringing a Shrine temple to this city. "Doc" said today he didn't know what happened inside the building; where the Imperial Council held its session that resulted victoriously for the crusading Wichita Falls clan—because the Shrine band of 50 musicians was kept outside in the street going at full blast. "Doc" adds that he "seen his duty and he done it," and kept on "umpa-umpa-umping" through his good old slide trombone just as long as the weary bass drummer could swing his drumstick.

"The band claims credit for the temple," added Dr. Douglas, modestly. "The Imperial Council discovered the only terms on which we would lay down our weapons and lift the musical barrage was the granting of that dispensation—so they weakened."

## PAUPERISM IN WICHITA COUNTY IS VERY SMALL

Pauperism in Wichita county is far below that of any other populous county of Texas and has held this rank for the past four or five years, according to Lewis Jernigan, superintendent of the county farm. There are at present but ten inmates of the county farm on account of poverty.

Superintendent Jernigan placed that practically all paupers in the county's care are men who spent their lives wandering over the county and failed to prepare for old age.

There are but few cases of small-pox in the county, Superintendent Jernigan said.

North Side Services. It is announced that Mrs. Haynes will conduct services at the North Side church Sunday evening at 8:00 o'clock.

## BANK CLEARINGS GAIN \$1,699,845.44

An increase of \$1,699,845.44 over the preceding week was recorded in Wichita Falls last week when the clearings totaled \$4,862,971.74.

Figures for the past six months of 1920 show bank clearings in Wichita Falls of \$112,961,894.97. This was an increase of \$19,028,442.68 over the first six months of 1919, when the total was \$93,933,452.29.

The clearings by days last week were as follows:  
Monday ..... \$1,113,282.09  
Tuesday ..... 464,067.52  
Wednesday ..... 595,097.80  
Thursday ..... 791,767.92  
Friday ..... 1,032,779.30  
Saturday ..... 845,087.11

## YOUNG COUNTY MAN BOUND OVER TO FEDERAL COURT

Olin Wharton of Graham was arraigned before J. A. Lantz, United States commissioner here, Friday afternoon on a charge of violating the federal liquor law. He was bound

over to await action of the federal grand jury in bond to the sum of \$1,000, which he succeeded in furnishing and was released from the county jail late Friday.

Wharton is alleged to have had intoxicating liquor in his possession. He was arrested several days ago by M. M. Wallace, sheriff of Young county.

First Baptist Church. Rev. O. L. Powers of the First Baptist church has returned from Durant, Oklahoma, where he held a revival recently, and will preach at both morning and evening services at his church Sunday, W. G. Work, baritone singer from Buffalo, N. Y., is here also and will sing at both services at the church: "The Ninety and Nine" (Campbell) at the morning service, and "O Saviour of the World" (Dudley-Buck) at the evening service. The public is invited to both these services.

ELKS MEET FOR CONVENTION IN CHICAGO MONDAY. CHICAGO, July 3.—Registration of Elks began today, among those arriving for the national convention which officially commences Monday.

### EXPLAINS OPERATION AUTOMATIC SYSTEM

#### Manager Kirby of Telephone Co. Tells Why Numbers Changed in Directory

The new directories being distributed by Southwestern Telephone Co. contain changes in practically all numbers of subscribers. The changes have been made to permit their use when the automatic system is installed. It is expected to have this in operation about February 1, 1921.

When this system is installed, each telephone will be equipped with a dial like arrangement by which the telephone user will make his own calls. In connection with the proposed change, Manager Kirby of the telephone company made the following statement:

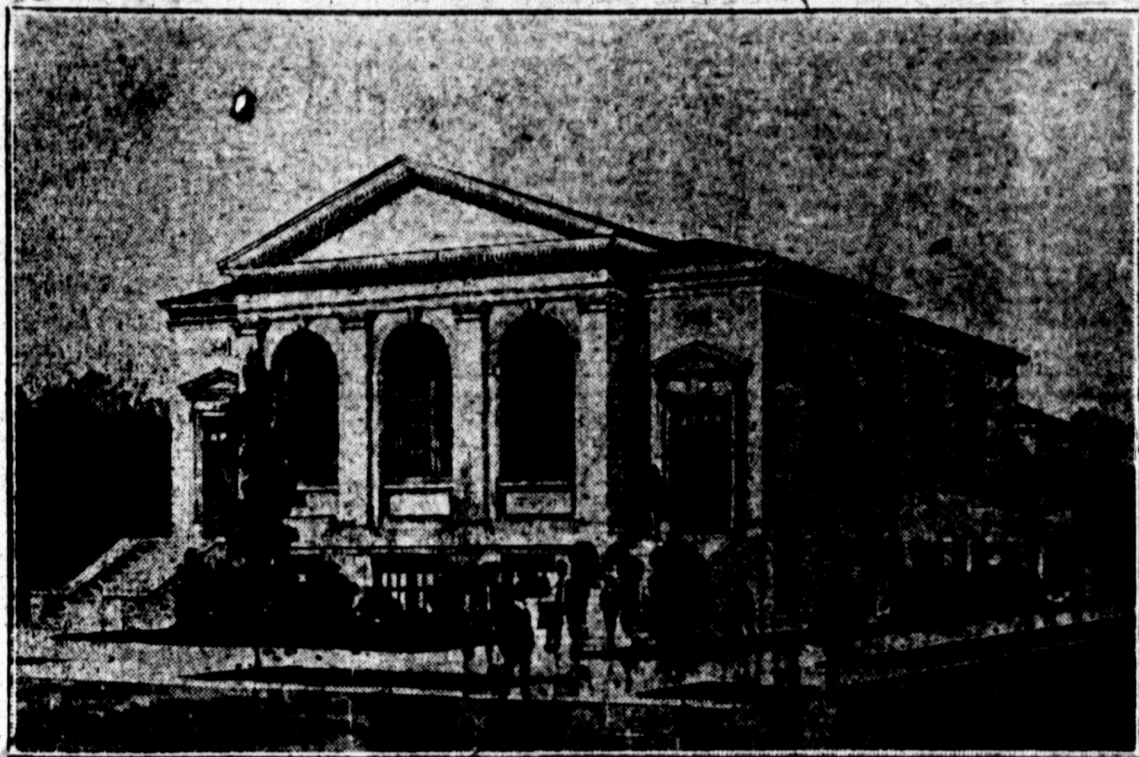

"It is necessary to change all telephone numbers in Wichita Falls, below 2000, and the numbers of such other lines as require group service."

"In connection with the proposed later change from manual to machine switching service, it is necessary to make certain number changes. In machine switching practice, it is impracticable in an exchange the size of Wichita Falls to have subscribers numbers with less than four digits as the connection is built up step by step through the office, the operation of the dial for each digit of the number causing the mechanism to make that step in completing a connection. Dialing the first digit of a number causes the machine to pick a trunk to the proper thousand. The second digit then being dialed, the machine makes connection to the proper hundreds in that thousand and so on until all digits are dialed, when the connection is completed."

"It has been found undesirable where no office prefixes are used to have subscribers numbers beginning with the numeral one because of certain peculiarities of machine switching equipment. It is also necessary to provide equipment in order that when a subscriber has more than one line or trunk, connection will be completed to the other lines of a group when the first one is busy without having to call the other numbers. The equipment which will accomplish this is special and is provided only in connection with certain series of numbers, and groups of lines on which service is desired on other lines of group when the first busy must be given numbers for which such equipment is provided."

"It is desirable to make these changes at this time as with the manual equipment it will be possible to arrange that when calls are received for the subscriber's old number, the calling party can be told the subscriber's new number and the call completed at once, where, if the number changes

### New Lamar Avenue Baptist Church to be One of Prettiest in City

Construction is progressing on the new Lamar Avenue Baptist church at the corner of Fourth street and Lamar avenue. The concrete work has been completed for the basement and work is now in progress on the outside walls.

The new church will be one of the prettiest in the city and will be admirably adapted for its congregation. It is being built to provide accommodations for a congregation and Sunday school of approximately 1,000.

The building will be 55 by 100 feet and will be of most substantial construction. It will be finished with light gray faced brick.

The basement will be 55 by 83 feet. Class rooms in the basement will be sufficient to accommodate a large Sunday school.

The floor of the auditorium will be inclined. Quarters for the choir, baptistry and robing room are conveniently arranged.

the percentage of gain would be close to 25 per cent.

The total of the receipts for the second quarter of 1919 was \$55,330.48.

#### A. W. ALLEN CLAIM AGENT OF W. F. AND S. R. R.

The appointment of A. W. Allen as claim agent for the Wichita Falls & Southern has been announced. Mr. Allen will handle this work in conjunction with his other duties as superintendent of the Morgan building and claim agent for the traction company.

#### ODD FELLOWS TO CONFER THE INITIATORY DEGREE

The Odd Fellows will confer the initiatory degree on a large class of candidates at their meeting tomorrow night, and the new by-laws will be up for the second reading which was postponed at the last meeting, owing to the late hour.

### POSTAL RECEIPTS GAIN IN QUARTER

#### Thirteen Per Cent Actual Gain Over the Same Quarter in 1919

Wichita Falls postal receipts for the quarter ending June 30 totaled \$28,523.04, a gain of \$7,142.56. This gain was registered despite the fact that three cent postage was in effect during the same quarter in 1919, while two cent postage was in effect in 1920.

The gain in percentage is approximately 13 per cent. It is estimated that when the three cent postage of 1919 is taken into consideration that

### TRAINING COURSE STARTS THIS WEEK

Work will be started during the present week on the training course to be offered by Wichita Falls Community Service for the training of leaders in community activities recently launched by the neighborhood and block organizations.

Mr. Burton H. Twichell of Community Service, Inc., the national agency which is directing the national movement for the better utilization of leisure time, arrived in the city Friday afternoon and has already mapped out a well filled schedule of classes for the next three weeks. A meeting was held on Saturday afternoon at the Chamber of Commerce with the special committee appointed some time ago to arrange for the course and final details were worked out for the several classes to be held at well distributed points throughout the city.

Separate classes will be given at the Parkin, Washington, Houston and High schools and Call Field.

The first class will be held for the colored people at the Washington school at 8:00 o'clock Monday evening. On Tuesday evening the first class for the North Wichita Falls community will be held at the home of Mr. and Mrs. J. A. Buel, 310 Missouri street. On Wednesday evening at 7:30 the residents of the Houston school district will meet at the home of Mr. and Mrs. J. A. Pierce, 2407 Grant street, one block north of the Houston school.

Call Field residents will meet at the M. E. hospital at 9:30 Tuesday morning. The class at the high school will be held at 8:00 Thursday evening.

Among the community meetings held during the past week was that at the home of Mrs. Dell Shoemaker, 502 Holliday, for the neighborhood between Fifth, Eighth, Brook and Broad. Dr. J. F. Reid, city park commissioner, was present for the purpose of discussing plans for the placing of playground equipment on the Huff-McGregor park.

Messrs. Geo. Jackson, Degrough and Franzel Davis were appointed a committee to inspect some of the other playgrounds in the city and prepare recommendations as to the most suitable apparatus to be placed in the Huff-McGregor grounds. Mrs. Geo. Dobson, Mrs. Geo. Jackson and Mrs. Carroll Fields were appointed a committee to secure volunteer supervisors. Another meeting will be held Thursday evening at the home of Geo. Dobson on Eighth street.

# CHIROPRACTIC IN FEVER CASES

## By Eliminating the Cause of Disease It Lets Nature Cure Itself

A few days ago a man said to us: "I can understand how you can straighten a spine, but I do not understand how that would have any effect on a fever, or how you could hope to effect a cure of a fever by adjusting the spine." Breaking up a fever is just about the easiest thing that the chiropractor does. A fever is nothing but the beginning of a diseased condition in any organ, due in nine cases out of ten to an impinged condition of a nerve. Persons apparently in the best of health seemingly contract fevers without cause. It is attributed to many causes, and most every patient can think up some occasion where he might have been exposed. But the fact is that it is nothing more or less than a lack of life force in the organ, due to a subluxation in the spine. In most cases the fever shows so soon after the subluxation occurs as to become acute without the contraction becoming serious, and the subluxation responds to the adjustments so easily that the fever subsides within a very short time. Many cases are on record where typhoid patients, with very high temperatures, have responded to adjustments with-

in a very few hours, due solely to the fact that the supply of life force necessary for the proper health had been restored to the organ.

Not only will chiropractic adjustments reduce fever, but they will put the body in proper condition to resist fever, or in fact almost any other character of disease. The fact that it is a mechanical action, performed with the hands of the operator alone, it has much the same effect on the body as proper, regular, daily exercise, in keeping the body in perfect health and protecting it against the inroads of any kind or character of disease. By its application the body is placed in such perfect condition that nature takes care of itself and cures any disease that may by accident be contracted. For the sake of convenience we often say that chiropractic cures disease, when in fact it is always nature that cures itself, and this is just as true of medicine as it is of chiropractic. No agent can cure the body, it can only put it in condition for nature to do the curing, and by adjusting the spine so that the nerve supply to the organs is uninterrupted the foundation is laid for nature to do its work.

### Study the Chart below and you will see where most of the diseases have their seat

#### The Palmer School

We take pride in the fact that we are graduates of the Palmer School of Chiropractic. Chiropractic was discovered rather accidentally by the father of B. J. Palmer, who taught the son the rudiments of it. B. J. Palmer created a real science of it and organized a school at Davenport, Iowa, to teach Chiropractic to others. From a small beginning twenty-five years ago this school has grown to be one of the largest in the world, so that it has an annual enrollment of 1500 and its graduates are practicing in almost every state in the Union and in many foreign countries. At one time the science was bitterly fought by medical men, who considered it an experiment, but it is now recognized as a legitimate health agent in twenty-seven states and laws will doubtless be passed in all the others within the next two years.

- 1 Slight subluxation at this point will cause so-called headaches, eye diseases, deafness, epilepsy, vertigo, insomnia, wry neck, facial paralysis, locomotor ataxia, etc.
- 2 A slight subluxation of a vertebra in this part of the spine is the cause of so-called throat trouble, neuralgia, pain in the shoulders and arms, goitre, nervous prostration, is grippe, dizziness, bleeding from nose, disorder of gums, catarrh, etc.
- 3 The arrow head marked No. 3 locates the part of the spine where subluxations will cause so-called bronchitis, felons, pains between the shoulder blades, rheumatism of the arms and shoulders, hay fever, writers' cramp, etc.
- 4 A vertebral subluxation at this point causes so-called nervousness, heart disease, asthma, pneumonia, tuberculosis, difficult breathing, other lung troubles, etc.
- 5 Stomach and liver troubles, enlargement of the spleen, pleurisy and a score of other troubles, so-called, are caused by subluxations in this part of the spine, sometimes so light as to remain unnoticed by others except the trained Chiropractor.
- 6 Here we find the cause of so-called gall stones, dyspepsia of upper bowels, fevers, shingles, hicough, worms, etc.
- 7 Bright's disease, diabetes, floating kidney, skin disease, boils, eruptions and other diseases, so-called, are caused by nerves being pinched in the spinal openings at this point.
- 8 Regulations of such troubles as so-called appendicitis, peritonitis, lumbago, etc., follow Chiropractic adjustments at this point.
- 9 Why have so-called constipation, rectal troubles, sciatica, etc., when Chiropractic adjustments at this part of the spine will remove the cause?
- 10 A slight slippage of one or both innominate bones will likewise produce so-called sciatica, together with many "diseases" of pelvis and lower extremities.

#### Use of the Ex-Ray

In our offices we have installed the most modern and perfect X-ray machines and every case that comes to us of a serious nature is examined with the aid of X-ray pictures. These pictures of course show the exact condition of the spine, and reveal to the eye the position of the vertebrae and the extent of the subluxation, so that there is absolutely no guess work about it. No charge is made for consultation and spinal analysis, nor for X-ray pictures. If you are suffering from any chronic or acute trouble we will be glad to talk with you and show you how Chiropractic adjustments will help you.

This picture shows a spine when the muscles are contracted and the nerves impinged. With a spine in this condition you are bound to be sick.

### July Business Letter, City National Bank of Commerce

"After months of perilous balancing, business appears to be regaining its equilibrium," says the July business letter of the City National Bank of Commerce.

"Definite and concerted efforts are being made to check unwise credit expansion, deflation is in progress, prices in many lines have shown marked tendencies to permanent declines."

"Best of all," continues the letter, "the movement is an orderly one and there are many reasons for believing it will continue so. It is another instance where instructive optimism of the American people has justified itself."

"Money is tight, of course, and the demand for credit remains insistent, but business conditions are fundamentally sound and readjustment proceeds apace. While it must be months before we call conditions normal again, it is gratifying to observe that leaders in commerce and finance are agreed that business is moving in the right direction. Thrift and hard work, will speed up the movement."

While crop reports from many sections of the United States indicate substantial reductions in acreage devoted to small grains and other staples, due in large measure to anticipation of continued shortage of farm labor, conditions generally are to be regarded as favorable. The farmers of the nation make no secret of their reluctance to work 16 hours a day to produce cheap food for city dwellers who work half as long of less, but they know that work brings its reward, and they are out to get it.

The winter wheat report, particularly from Canada, is especially favorable. Depth of snow and a tardy spring have afforded unusual protection from alternating frosts and thaws and the winter kill is estimated at only 4 per cent—even less than that in the exceptionally mild winter of 1918-19, and far less than in the severe winter of 1917-18 when the loss approached 60 per cent in some sections. In view of the prospects of continued European shortage, the farmer is facing the prospect of satisfying price levels.

**Fuel.** Industrial difficulties, both rail and shipping, have interfered seriously with the available fuel oil demand, and the United States shipping board has suffered along with private operators. The Mexican supply, fortunately, has not been interrupted, despite the chronic disturbances in that section, but the lack of bunker oil has kept scores of vessels in Atlanta harbors when freight rates are at the peak, and the demand for American raw materials and finished products is unprecedented.

Tank car movement has, of course, been seriously interfered with and is still far below normal. Stock of oil fuels and lubricants in many cities are very low and it may take months to correct conditions.

Oddly enough coal has been more readily available at the seaboard than oil, since it could be shipped in train loads despite the switchmen's strike, and many private vessel owners have transformed oil burners into coal burners because of it. Throughout the country generally coal has been hard to get, but very definite improvement in this situation is now apparent.

**The Labor Shortage.** For 30 years or more this country has been largely dependent upon Europe for its unskilled laborers, and industrial expansion has depended in great measure upon the rate of immigration. Just now, when the demands of the world's markets would seem to make increased production peculiarly timely, a shortage of common labor developments which is altogether without precedent.

For months past unskilled male workers have been leaving the country almost five times as fast as others have come in from Europe—and most of the emigrants carry with them considerable sums. As a result the iron and steel industry, the textile industry, the railroads, construction enterprises of all kinds and, in some measure, agriculture, are seriously affected.

Congress, in its consideration of an immigration policy, must evolve some system which will provide labor for essential industry without encouraging such a rush of aliens as to endanger living standards—a task which offers many difficulties.

**Railroad Valuation.** Investors in railroad securities must rejoice in the submission of valuation figures on 50 railroads by the valuation division of the interstate commerce commission. The government's own figures indicate that the stock of these railroads, at least, is not watered, and that their properties exceed in value the par totals of their stocks and bonds.

The report, on the whole, should prove gratifying to holders of railroad securities, and should materially reduce the amount of destructive criticism to which the roads have been subjected in late years.

**Cotton.** The world is short of cotton goods, and the 1920 crop has a poor start. These two factors will sustain the market for at least two years, according to New York advisers.

There has been some price cutting in the retail trade in many sections, but hardly enough to lead to cancellation of orders and the forcing back of finished goods upon the producer.

#### DECREASE IN CRIME IN OIL FIELDS NOTED

The past two weeks has witnessed a marked decrease in the number of felony complaints filed in justice courts of Wichita county. Not more than eight cases have been filed during the past 14 days, which is a marked decline in the usual number of criminal cases filed. No criminal cases of felony degree have been filed in Justice C. J. Arrington's court during the past week and but few criminal cases of any nature.

Reports from all field towns indicate that crime is on the decline at Newtown, Kemp City and other places that only a short time ago were threatened with a crime wave almost without parallel in the history of the southwest.

"Things are extremely quiet at Waggoner City, Bridgetown and other settlements in the northwest extension region," said Deputy Sheriff Abe Willey, who came in late yesterday with a contingent of prisoners taken in custody at Newtown.

"There's absolutely nothing doing at Kemp City," said Deputy Sheriff Leo McDonald, on duty in the K. M. A. field "crime has greatly decreased in the Kemp-Munger-Alton during the past six or seven weeks."

## HORSE SENSE in horse feeding.

It is showed common sense to feed a horse a balanced feed, which will develop every part of its body. Analysis of Purina O-Molene Feed shows that it contains in proper proportion all the elements for muscle, blood, hair and hide making, as well as a large percentage of Nitrogen free extract, which supplies heat and energy. There is no 15 to 10 percent waste as in feeding the whole oats, due to swallowing whole.

Purina O-Molene Feed is highly digestible.

### BOWDEN APPOINTED CHIEF FIELD MAN

Deputy Collector Wampler Made Head Local Office— Shields on Special Work

A. F. Bowden, for over a year division chief of the internal revenue department's Wichita Falls office, is leaving this city tonight to become chief field deputy in Collector Scott Reed's office in Dallas. Deputy Collector Henry Wampler will succeed him as head of the local internal revenue bureau.

### BANK CLEARINGS FOR FIRST SIX MONTHS OF YEAR TOTAL \$112,961,894; INCREASE 20 PER CENT

Wichita Falls' bank clearings for the first six months of 1920 increased about 20 per cent over the amount for the same period in 1919, according to figures of the Clearing House Association.

The total for the first half of 1920 was \$112,961,894.97, as compared with \$93,853,462.45, the increase being \$19,108,432.52.

June, 1920, showed a decline from the same month in 1919, the figures being: June 1920, \$18,247,000; June, 1919, \$20,835,000.

T. E. Graham, of Ranger, has been appointed a deputy collector in the local office to succeed L. E. Scharnberg, who was transferred recently to Galveston.

Deputy Collector L. Shields is continuing his work as an assistant to Supervisor Rogers, of the Washington office, in checking up the taxes owned by pipe line companies on oil runs.

### FIVE CARS OF WHEAT GO INTO THE DITCH

South Bound Passenger Trains on Denver Held Up Saturday Morning

Five freight cars loaded with wheat consigned to Wichita Falls and Fort Worth went into the ditch three miles southeast of Vernon at about 1 o'clock Saturday morning when several cars of the southbound Childress local left the Fort Worth and Denver tracks, according to a report received in Wichita Falls Saturday noon.

At the evening services, the congregation will worship jointly with that of the First M. E. Church, South.

WANTED TO BUY OR LEASE National or Star Drilling Machine, must be complete and in good condition. Phone 1348.

er passenger train No. 8 was held up behind the wreck for seven hours, reaching Wichita Falls at 9:30 o'clock Saturday forenoon. Practically all wheat contained in the five freight cars that left the track was scattered along the road bed and a vast percent of it is a total waste, according to reports reaching Wichita Falls. There were no persons injured in the accident. The cause of the accident is being investigated by railway officials.

Smoke Peters' "Experience." For sale at all cigar stands. Stebbins & Baber, distributors. 348-tfc

### CARTER AND COLLINS ACQUITTED THEFT CHARGE

George Carter and Levi Collins, charged by indictment with felony theft, were acquitted by a jury in the 30th district court Saturday forenoon. The defendants were charged jointly with the theft of oil field tools valued at over \$50. The jury was out but a few minutes before reaching a verdict of not guilty.

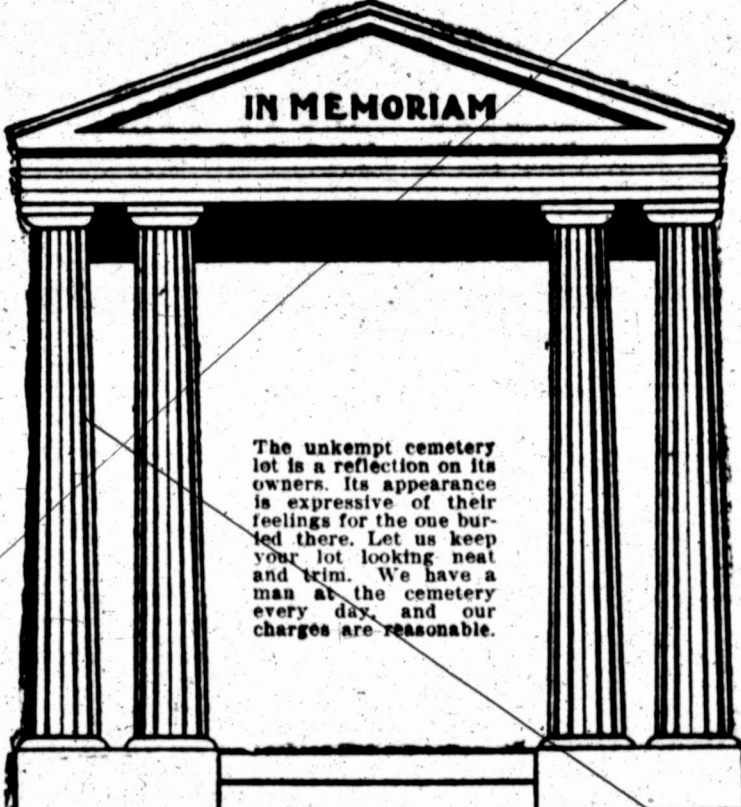

### DIVORCE RECORDS WILL BE PASTOR'S THEME

Divorce records, or why women leave home will be the subject discussed at the First Methodist church, Seventh and Lamar, Sunday evening at 8:00. Last Sunday evening the pastor, Dr. P. E. Bingman, addressed a capacity house on the theme, "Why Men Leave Home." The records show that about 42 per cent of the suits filed for the next term of court are divorce cases, the major number being brought by women. What's the cause? One thing: Give the county and city officers a helping hand, and they will clean out the flats, etc. Come and hear the rest.

### WOMEN FROM FLATS IN POLICE COURT

Saturday morning was a busy time at the police court and the docket showed fully as many cases as it has at any time recently. Five women taken in the police raid on the flats Friday morning were brought into court and their cases set for 3:00 o'clock Monday afternoon. Traffic ordinance violators were again in evidence and a large number of fines were imposed by Judge Ogle on these offenders.

**NEW TRANSCONTINENTAL RECORD MADE BY TRUCK**

A new world's record for 13 days, five hours for the 3,500 mile transcontinental trip from Los Angeles to New York has been made by a pneumatically equipped motor truck of the Goodyear Tire and Rubber Company. The previous record of 17 days and two hours was established in 1913 by a light weight Maxwell truck. When the three-ton Packard that had hung up the new coast-to-coast record rolled into New York City, it had traveled from the Atlantic to the Pacific four times since 1918 and rolled a total of 130,000 miles. Driven by Howard Sholder and Herbert Temple, the big freighter traveled 2,000 miles over the Santa Fe route to Kansas City in eight days and 13 hours despite 32 hours lost because of bad roads and detours in New Mexico. Just 12 days after leaving Los Angeles, the big truck rolled into the factories at Akron—a distance of 2,900 miles. The drivers relieved each other every six hours, one sleeping in a comfortable cab behind the driver's seat, while the other maintained the schedule. The truck made its first transcontinental run from Boston to San Francisco in September, 1918—3,700 miles in 21 days. The same truck traveled with an army transport train over the Lincoln highway in 1919 and since then has been giving demonstrations along the Pacific coast. Company officials believe that the new record, with its average daily run of 236 miles, will stand for some time.

**REPORT OF SALES OF CLEVELAND AUTOMOBILES**

The Wilhelm-Moulder company has recently made the following sales: Cleveland touring cars to M. Smith, Iowa Park, and Fred Woolsey, Marriott and Gates, C. W. Carey and Herbert Spencer of Wichita Falls and Cleveland roadsters to Marriott and Gates and Teshoma Oil and Refinery company of Wichita Falls. D. M. Smith, who purchased one of the Cleveland touring cars, started immediately for an eight month trip to Yellowstone park. Mr. Woolsey, who purchased a car of the same make went to Cleveland to get delivery and from there will drive it through to New York and return to this city.

**GOODYEAR PRESIDENT LINCOLN HIGHWAY HEAD**

A. Selberling, president of The Goodyear Tire and Rubber Company, has been elected president of the Lincoln Highway Association, succeeding H. B. Joy, who was named head of the association last December. Mr. Selberling did not accept reelection at the annual meeting because of the press of business affairs, but with the inability of Mr. Joy to serve longer than four months because his time was entirely taken up with business, the Goodyear president agreed to again devote part of his time to the development of a project in which he has always been deeply interested.

**CARLOAD OF PREST-O-LITE STORAGE BATTERIES RECEIVED BY BENROD**

That there will be no slowing down of the automobile industry in Wichita Falls during the summer months is borne out by the preparations for a busy season by E. Benrod Auto & Supply Co. who have received an entire carload of Prest-O-Lite storage batteries. This is perhaps the largest shipment of its kind ever received locally.

The same firm has also just received a carload of Maxwell autos. With the gradual relieving of the railroad congestion automobile firms which have been considerably handicapped by their inability to get cars and accessories, see great possibilities for good business in the immediate future.

**C. J. WHITE BUYS INTEREST IN THE W. W. COMPANY**

An item of interest to the automobile public of Wichita Falls is announced by the W. W. Co., 811 Tenth street who advise that the stock formerly held by C. J. Hunter has been purchased by C. J. White, a local oil man. The change of the firm's personnel will mean a general expansion of business which can be well taken care of in the company's new and commodious quarters. The changes contemplated include the handling of Goodyear, Goodrich, Firestone and Kokomo tires and the installation of a gasoline and oil filling station.

**TEXAS PAPER STOCK CO. OPENS AGENCY HERE**

The Texas Paper Stock company has established an agency here for the collection and forwarding of waste paper, a commodity which has lately been found to have some value. The company has a warehouse on Barwise street, and will make regular collections, using several trucks, in the business and residential sections. Those selling their waste paper to the company will be required to tie it in bundles, for which the trucks will call on regular schedule. Charles Tills and Michael Epstein are in charge of the agency here, and they expect to make waste paper a source of profit, instead of an unsightly and dangerous nuisance, to Wichita Falls.

**GERMAN PILOT CUTTER DISTURBS THE BRITISH**

LONDON, June 16.—In spite of the publicity given to her in press and Parliament the obnoxious German pilot cutter continues to patrol and out off Dungeness, and there seems to be no way of getting rid of her, says the Evening News. "The pilotage fees quoted are high in marks, but very low in real money, the paper adds. The result is that practically all the neutral and American ships bound for the continent take a pilot from her instead of from the British Trinity cutter which patrols alongside her. Many of the American skippers who were at sea during the German submarine campaign are very outspoken on the subject, but they have their direct orders. "But in blaming others for having short memories it is as well to mention that certain British companies are also ordering their masters to patronize her on the score of economy, with the result that practically the whole of the temporary Trinity pilots are receiving their notices. They were allowed to run the risks during the war, but now it is only a proportion of the British companies—the large majority, happily—who care whether they are thrown out or not."

**GOVERNMENT EXPERTS TO EMULATE "JIMMY VALENTINE"**

WASHINGTON, July 3.—Government experts are emulating the "Jimmy Valentine" of the underworld at the Bureau of Standards in their effort to decide upon the type of vault to be selected for the protection of deposits of the Federal Reserve Board. A number of vaults, embodying in their construction the latest anti-burglary ideas have been completed and tests

are now under way to determine if they are sufficiently "proof" to be entrusted with the millions of dollars which the board distributes among members of the reserve system. The specimen vaults are of concrete reinforced with various materials guaranteed to discourage the most patient drill pusher. In some of them sheets of case-hardened steel have been inserted between layers of concrete, while iron rails, arranged in tiers, have been placed in others. A quantity of hard glass is to be tested

in one vault, the opinion having been expressed that this material will dull the sharpest drill, while fusing before an oxy-acetylene torch. Dynamite and the more strenuous "soups" will be used by the government experts, as well as every mechanical method yet put forward by the masked cult.

**Bathtub Goes to Patient's Bedside.**  
A bathtub on wheels is now made use of in hospitals and similar institutions for the purpose of saving patients from unnecessary exertion in going to and from a bathroom. The tub is filled with water and then rolled up to the bedside.

That 22 per cent of the metal-filament bulbs and 70 per cent of the carbon-filament bulbs exported from the United States in 1918 came to Canada. A Mormon temple was recently dedicated on one of the Hawaiian islands. It is said to be the only Mormon temple outside of Continental United States.

Probably most people in buying automobiles think first of economy, durability and performance. It is natural that they should, for an automobile is first of all, an investment, the soundness of which depends upon the car's ability to deliver service at a minimum cost. It is natural, too, that such people should find the Hupmobile the answer to their problem. For in the Hupmobile the qualities of economy, durability, and performance exists to a degree so remarkable that the possession of them has long ceased to be a matter of argument.

### THE MOTORISTS' PROBLEMS'

By WILLIAM H. STEWART, JR.

Motor Department:—I have installed a little attachment on a Ford car that is recommended to make better lights, and it makes a fine light for a Ford. It is cut in on the regular light wires and is generated from the magneto and works fine, but I have been advised that it would finally take all the power out of the magneto. I would appreciate your kind-ness very much if you will give me your advice on same.

It is impossible to answer your question without knowing more about the device. Please give more particulars. We shall be glad to investigate the merits of the device upon receipt of further details.

Motor Department:—I am going on a very long cross country trip that will be over some bad roads and sand and very steep grades. I want to take a camping outfit with me and have thought of getting one on a trailer, but have been told trailers are not very satisfactory for long trips, as they are hard on the car, that they jerk, and in some ways they are dangerous. The trailer I had in mind is a two-wheeled outfit with a pole to hook on the back of the car and weighs about 500 pounds. Any information you can give me along these lines will be very highly appreciated by me.

If you operate your car carefully you should have no trouble. Of course, the additional weight will cause a greater load on your engine. Your car is not designed for the use of a trailer and care in operation is necessary. The needed camping equipment should offset other inconveniences.

Motor Department:—I have a six-cylinder 1915 model Studebaker and would like to know why the engine knocks when going about 20 miles per hour or more providing I have the spark advanced to the point where the engine seems to run the fastest for any given amount of throttle. If I am going along at 20 miles per hour and I move the spark lever to the point where the engine will give the greatest velocity, there is a knock present. When I retard it considerably the knock disappears, but my speed is also decreased to about 10-12 M. P. H. If I go 10 miles per hour I can move spark lever where I please and no knock is present. If this was a spark knock it would be great at slow speed, would it not? There is a great difference in fuel consumption when traveling at considerable speed. When knock is present I get about 15 miles per hour when not present about 11 or 11 1/2 miles. O. R.

Perhaps your engine is considerably carbonized. The cylinders must be free of carbon to avoid knocks. The spark advance must be regulated according to load and throttle opening. With no load the spark may be well advanced at speed and the engine will not knock even though carbonized. However, when your engine is pulling in response to the throttle, then the spark must be regulated accordingly. The more clean and healthy your engine, the more advance at spark and economy of operation will result.

Motor Department:—I have a four-cylinder car which has been run fifteen thousand miles. Have had the valves ground, bearings all tightened, carburetor cleaned, breaker points of distributor filed, spark plugs have been cleaned, but collect carbon very fast; everything put in first class condition and have run the car about six hundred miles since. Driving from twenty to thirty-five miles per hour, it fires perfect, has unusual good compression, good power on hills, not very good getaway, but starting the car in the morning it acts very strange. Have a Stromberg carburetor. Pull out the choker and after the motor turns over several times it will start, after a few explosions will stop, then the gas will pour over the side of carburetor. Start it again, after several such times as this, and considerable coaxing will succeed in getting it started. Unless I thoroughly warm up the car before starting out, it will backfire at the carburetor, and if I pull out the choker a little, then it seems to get too much gas and begins to bump and jerk. Have to drive two or three miles before it will begin to go right, either at low or high speed. If I give it a richer mixture, then I only get twelve or fourteen miles, when I have always averaged about twenty. The car is supposed to average about twenty or more. Will you kindly tell me what the trouble is and how to remedy it? —M. C.

Evidently your trouble is caused by poor carburetion. You cannot expect as many miles per gallon of gasoline as you did formerly. The present day grade is much inferior and your carburetor must be adjusted accordingly. The installation of an exhaust stove to obtain a hot air intake will help carburetion considerably. Look over your carburetor carefully and adjust it to meet the new conditions.

Motor Department:—I have a car in which the engine acts contrary to any engine I have ever run. When the engine is cold and

MADE BY SCOTT & BOWNE, PHARMACEUTICALS, CHICAGO, ILL.

primed it starts on the first spin, but after running long enough to become warm and is then stopped, it is almost an impossibility to start it again until the engine cools off. I figure that the trouble is caused by the cylinders being scored or so badly worn that they lose compression through expansion after becoming warmed up. The carburetor in good shape and properly adjusted, likewise the magneto in first class condition and no short circuits. The ignition was originally a Bosch Dual system, at the coil was short circuited and I took the coil out and bridged the magneto so as to run on it exclusively. This same trouble existed before the coil had become short circuited. The valves were recently reground, and the tension of the springs increased without any improvement. I figure that the cylinders

need regrounding, also new pistons and rings. Would appreciate your opinion on this. —V. W.

Perhaps the valves do not seat properly when the engine is hot, thereby reducing the compression. When the engine is hot each valve lifter should have sufficient clearance to insure positive seating of the valve. The magneto should not be subjected to much heat otherwise it will become less efficient. Look over the magneto carefully and note whether or not a defective installation is the cause of your trouble. If you have good coil tension in all the cylinders regrounding and new pistons should not be necessary.

Motor Department:—I have a 1917 Oakland. I purchased this car second handed, and have run it about 1,000 miles. There has been a dead knock in the car since I bought it, that I am unable to locate. The knock is a dead knock, and does not sound like a bearing, it appears to be in the right rear wheel. By laying on running board the knock appears to occur about every revolution of the wheels, but it cannot be heard as plain from

the left side as the right side. The knock can be heard when coasting down hill with clutch released, but gets louder when pulling on a hill. I have had both rear wheels off and examined bearings in wheels and they appear to be O. K. There is a little side play in wheels after they are tightened up, possibly as much as one-sixteenth of an inch. Also brake bands on my car do not seem to be worth much, since they do not hold car as they should. When they are applied they have a gripping effect, and will not brake gradually. Bands appear to have a hard glazed surface on them, is there any way to remove this and make brakes O. K. without renewing the lining. Would also like for you to advise me, what candle power or what volt bulbs to use in my headlight to get the best lights. J. G.

Perhaps you will find the axle housing out of alignment on the side where the knock occurs. Then again, the axle shaft may be sprung and hitting the inside of the axle housing. It is possible that some one had a collision which damaged the axle before

you came into possession of the car. Only a careful inspection by a competent mechanic will locate the cause of the knock. It is best to renew the brake lining and to readjust the brakes accordingly.

Motor Department:—I have a 1918 model Ford that has recently devel-

oped a growling noise when car is pulling on level or down hill. But when climbing a slight grade the noise disappears. There is plenty of grease in differential and universal is well greased. If you can give me any information as to a remedy for same I will be very thankful. J. H.

It appears that the growling noise is caused by the differential gears. When out of adjustment a growl of this kind occurs. Perhaps the bolt at the forward end of the propeller shaft is broken permitting the shaft and pinion gear to work backward and forward. When you have the differential ring gear and pinion gear

properly adjusted, the growling noise will disappear. Motor Dept. Battery is the material, the material is in the sediment and wash it this does not take it out. Motor Dept. Why does it little smoke? rest and then it is anything and may it handling of it seems all right recommended.

This is not due to the combustion effect lasts appreciably. Motor Dept. On removal of circuit breaker, the spark plug is opened. The to be good as the points at first, I was serious. You know that Texas is a great cotton state.  
You know that Texas is a great oil state.  
You know that Texas is a great live stock state.  
But do you know that the motor truck that has the widest distribution of any truck made anywhere in the world is the product of a Texas company?  
Wichita Trucks, made by the Wichita Motors Company, with factories at Wichita Falls and Oklahoma City, Okla., have been on the market for ten years.  
Wichita trucks are today in use in 88 foreign countries.  
Wichita Trucks are using Texas Petroleum products and are hauling fabrics made of Texas cotton in every part of the world.  
Wichita trucks have gone through the seasoning period and for many years have been proven trucks.  
Wichita trucks are utility vehicles. They are made to give returns that are capable of being reduced to a dollars and cents basis.  
Super-service is assured Wichita Truck owners in the Southwest by a chain of factory branches maintained.

Full stocks of parts are always on hand at Dallas, Fort Worth, San Antonio, Houston, New Orleans, Shreveport, Oklahoma City, Tulsa and Wichita Kansas.

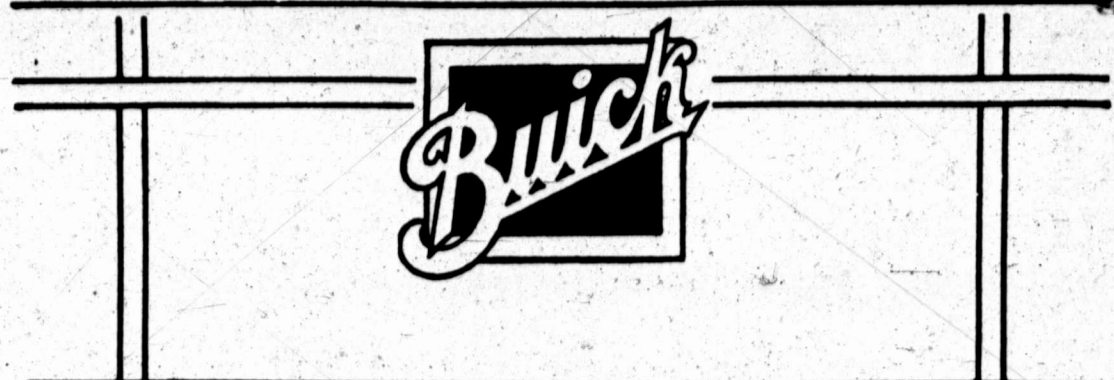

A wire today means the needed part tomorrow.  
No wearying wait for lagging trains to come with the part wanted from distant points, with an idle truck on your hands yielding you no returns.

Your telephone is handy. Call us up and let us tell you about Wichita Trucks. Our phone number is 5438. Demand the strongest kind of proof. We make good our statements; Wichita trucks have and will continue to make good as your servants.

If "the line is busy" a postal card, letter or telegram will bring our organization to your service.

properly adjusted, there should be no growl such as you mention.

**Motor Department:**—My storage battery will not hold the charge as long as it used to. I have no charging plant on the car but must take the battery to a garage. It used to last me 1,000 miles on a single charge, but now it only runs 300 or 350. What trouble does this indicate? R. A.

Battery is growing old, loss of active material, plates badly sulphated, sediment in bottom touching plates. Sediment removed by pouring out and washing with distilled water. If this does not remove the trouble have it taken apart at a service station.

**Motor Department:**—Why does my engine always give a little smoke when starting up after a rest and then stop? Should it do this? Is it anything I should guard against and may it be corrected by proper handling of the engine? The oil level seems all right and I am using the oil recommended by the manufacturers.

This is a habit with some engines and is nothing to worry about. It is due to the oil being drawn into the combustion space and burned. The effect lasts too short a time to add appreciably to the carbon present.

**Motor Department:**—On removing the cover of my magneto circuit breaker I noticed an unusual sparking when the breaker points opened. The sparks at the plugs seem to be good and the engine runs alright. As the points did not spark that way at first, I wish to ask if it is anything serious.

Sparking may be due to dirt, corroded points, improper contact, weak spring, punctured condenser, or loose condenser wire. As the engine has full power, your trouble is probably due to dirt or corrosion. Give a piece of fine sandpaper between the points several times and see if sparking has stopped. A magneto file is excellent for this work, but care must be taken to file the points evenly. Then they should be properly adjusted.

**Helpful Hints**  
The priming cups on top of the cylinders hold about the right amount of priming fluid to do the work. If more than that amount is supplied to the cylinders the mixture may be too rich and the starting be difficult instead of easy. With priming cups closed fill them with a priming fluid, consisting of half gasoline and half ether. Then open and allow the fluid to run down into the cylinders. This explosive mixture should start any motor.

Avoid trouble in your carburetor by opening the bottom occasionally and drawing off any water or sediment which may have accumulated there. This is possibly done if a drain valve is provided, but if there is only a plug this operation is apt to be neglected until trouble occurs. Have a drain valve fitted and do not neglect to use it.

Quite often carburetor trouble can be traced back to the intake valves. If one of the intake valves does not seat properly, or if the valve stem sticks in its guide occasionally, it will be a difficult matter to obtain satisfactory adjustment of the carburetor.

If the carburetor catches fire do not give way to panic. Shut off the gasoline at the tank and spin the engine with the self-starter. This draws some of the flame into the carburetor, where it will do no harm. If the gasoline supply is shut off, the fire at the carburetor will soon burn itself out.

Clean strainer in gasoline line once a month. In spite of the best care some dirt is constantly getting into the gasoline tank, and it soon lodges on the strainer. This will eventually clog it, shutting off the gasoline and stopping the engine. As this is a trouble-

some occurrence it is best to avoid it by cleaning the strainer occasionally.

**Motor Department:** Have a Student-Union 1918. When the clutch engages it jerks and jumps. Investigation shows it is not in the clutch leather. With the engine not running I disengage the clutch, put the gear-shaft lever in any of the four speeds, and by taking hold of the clutch I can turn it about three-fourths of a turn before it picks up the load. In driving, after it has taken up that lost motion, the engine pulls the car smoothly and steadily. Is the universal joint so constructed that there could be that amount of motion there? If you think the trouble is in the gear-set or differential, please tell me what parts need replacing. The gears shift easily. I have not taken it apart as yet, as I want some advice first.—N. E.

Undoubtedly most of your trouble is in the universal joint, although there will be some lost motion among the bearings of a car that has been in use five years. A complete universal joint should be installed. Drive pinion and crown gear on differential should also be inspected. There should be very little lost motion between the clutch and driving wheels when all the driving members are properly fitted.

**Motor Department:** I have a 1918 touring car which has the battery distributing system, but I seem to have trouble quite often with the engine skipping. This is noticeable on hills. The other day I got it back from the service station with this same trouble. Evidently they didn't know how to overcome it. Do you think that some of the ignition system is defective? Any advice you may care to give will be greatly appreciated.—Owner.

The battery system of ignition needs frequent attention. The spark plug points and the distributor points must be kept clean and properly adjusted. The distributor points will pit after a few hundred miles' use and must be cleaned and readjusted frequently. Likewise the spark plug points burn away and must be resurfaced. A little attention in this respect will forestall unnecessary annoyance. Also see that carburetor is kept clean and free from any water or foreign deposits which may tend to clog the spray nozzle.

Make sure your oil gauge is free to move, as a wrong indication is fatal. Sometimes the wire is bent and the

gauge does not fall as the oil is used up. The inexperienced driver does not realize this and his engine runs dry.

Few people realize that oil deteriorates under heat and that the spoiled oil in the crank case thickens, accumulating carbon from the cylinders and making a thick, pasty mass that will not pass through the pump. When necessary to change the oil, say every thousand miles, it should be drained out carefully. Some of the muck remains and mixes with the new oil, reducing its lubricating qualities. This is unavoidable unless the crank case is removed for cleaning.

**TO THE CITIZENS OF THE 30th JUDICIAL DISTRICT OF TEXAS**

It is with regret that I cannot get to see all of the voters of this district in person, owing to the fact that the 30th district court convened the 14th day of June at Wichita Falls, Texas. There are a large number of criminal cases now pending on the docket of this district that will have to be tried and a large number that will have to be investigated, which will require most of my time and attention. It will be almost impossible for me to see every voter in person and I wish to say to the people of this district that I respectfully request your support in the general denunciate primary election to be held upon the 24th day of July, 1920. I now submit to you my candidacy. I am a resident of this district, a native born citizen of the United States, and a member of the Democratic Party. I have been a member of the Democratic Party since my majority. I have been a member of the Democratic Party since my majority. I have been a member of the Democratic Party since my majority.

If you feel that I have made you an efficient officer under the conditions that I have had to work against, then I respectfully request your support in the general denunciate primary election to be held upon the 24th day of July, 1920. I now submit to you my candidacy. I am a resident of this district, a native born citizen of the United States, and a member of the Democratic Party. I have been a member of the Democratic Party since my majority. I have been a member of the Democratic Party since my majority.

**E. E. BOYLE OPENS OFFICE FOR COLLECTION OF AGENCY**

The vast amount of waste paper that accumulates daily in Wichita Falls is to be put to good use hereafter, through a system of regular collection, being shipped to manufacturers who will use it to make new paper.

E. E. Boyle of this city has established an agency for the collection of the paper, and will have trucks make daily visits to business houses; later a regular collection schedule for the residence district will be inaugurated. Mr. Boyle's warehouse is in the factory district near Ball Brothers. Mr. Boyle expects to ship about three cars monthly, each car containing 15 tons. The paper is shipped to agencies at other Texas points, where it is graded and forwarded to paper mills.

**DOWNTOWN HEADQUARTERS FOR BOY SCOUTS OPENED**

Downtown headquarters for the Boy Scouts Council have been established in the Chamber of Commerce rooms, in order to have a central place for the business activities of the organization. H. E. Taylor, Boy Scout executive, is in charge of the office.

A scheme being advanced to make the hair grow consists of a miniature dynamo mounted on the back of a hair brush and as the implement is made use of it is claimed that a current of electricity is sent through the hair and scalp.

**CLEVELAND SIX**

**All You Could Hope For And In Full Measure**

The Cleveland Six gives all, in every-day year-around performance, and gives it in full measure, that you could hope for from the car you buy.

It combines so many good features, power, sturdiness, comfort, sty. and economy of operation, all worthy of discriminating consideration, that it has come into a place of distinction among light cars.

The exclusive Cleveland motor, of the over-head valve type, quiet and powerful, gives real life to the car. It has flexibility of power and ease of driving that cannot be found in many cars.

"It handles like a feather," says one owner. "It steps out as fast as any car ever built," is another's comment. "It fairly glides over the long mountain climbs," writes a Colorado enthusiast.

The sturdy Cleveland chassis is featured by low-underlung spring construction, positive brakes, and other factors of comfort and safety.

On this one standard chassis are mounted four bodies of unusual beauty and dignity, all handsomely finished and splendidly upholstered.

### EXPEDITION LOOKS FOR REPTILE BONES

EDMONTON, ALTA., June 18.—Another expedition to look for the bones of great prehistoric reptiles in the Red River valley of Alberta is on its way here. This time it is under the direction of Dr. W. A. Parks of the University of Toronto and the Royal Ontario museum. For a number of years these expeditions have been an annual summer journey for three months. Two years ago the almost perfect specimen of the kritosaurus incurvimanus, which has just been finally clipped free from the rock and presented to the museum, was found, making a distinct addition to the records of science, and giving to Toronto the only specimen of this species yet discovered. Three incomplete skeletons of the kritosaurus and a great horned head of a brontosaurus, four feet six inches in length, were found by the professor, but have not yet been carved from the rock. It is the hope of Professor Parks to collect ultimately for the Royal Ontario museum one of the finest exhibits of dinosaurs in existence.

The locality and the method of finding the specimens are described by Professor Parks. The river cuts right through the flat prairie to a depth of 400 feet, forming a whole lot of broken buttes, and it is among these that the bones are discovered. One of the most interesting and complete specimens is that the bones cannot be obtained until they are partly exposed by the action of natural degrading causes. Sometimes, but have not yet been carved from the rock. It is the hope of Professor Parks to collect ultimately for the Royal Ontario museum one of the finest exhibits of dinosaurs in existence.

The Red River valley, 3,000,000 years ago was near the coast of a great inland sea that stretched from the Gulf of Mexico to the Arctic ocean. The sand along the shallow, brackish shores of this great body of water formed a splendid preservative for those huge reptiles which inhabited the world at that time. Our kritosaurus was found in what we call the Belly river formation of the Upper Cretaceous system," explains Professor Parks.

### JAMACIA RUM LOVERS PROTEST ON PROHIBITION

KINGSTON, JAMAICA, June 17.—Thousands of residents of this island, the home of Jamaica rum, have united in a protest to the government and legislative council against prohibition, state control of the liquor trade or alteration of the present licensing system.

A measure has been introduced in the legislature by the government providing for state control of the trade after the legislative council had been asked to consider also the questions of prohibition and licensing.

Those opposed argued in a memorial to the government that the manufacture of rum, a by-product of sugar, had been carried on in the island for hundreds of years and formed a very important industry which would be seriously affected if prohibited and imposed. They objected also to state control chiefly on the ground of expense and risk involved.

To handle fruit without bruising it, western fruit growers are making use of a ladder-like construction on wheels with an endless belt arrangement. The fruit is lowered from the top as picked and gently deposited in a suitable receptacle.

### CLIFF DWELLERS ONCE LIVED IN STONE HOMES IN PANHANDLE

DALLAS, July 1.—That the change from the buffalo lodge teepee to stone construction by the Pueblo cliff dweller began in the Texas Panhandle and in Oklahoma and, as the culture developed, the Indians moved westward and perfected the cliff dweller pueblos in the valleys of the Colorado and the Rio Grande, is the conclusion of W. K. Moorehead, director of an archaeological survey, now working in the Canadian and Cimarron valleys.

In a letter, made public by C. E. Lombardi, Dallas newspaper publisher, Mr. Moorehead said ancient ruins, hitherto unknown, had been discovered in four northwest Texas and Oklahoma counties. In addition, he said, ancient irrigation ditches had been found in Clark county, Kansas, and in the valleys of the Beaver and Canadian rivers. The newly discovered ruins extend through some 200 miles of almost inaccessible canyons, according to the letter.

For 25 years Mr. Moorehead has been engaged searching Indian remains. In his present researches he is associated with T. B. Thoburn, secretary of the Oklahoma Historical Society; Eldredge R. F. Johnson of the University of Pennsylvania; Ralph Dorr, a Maine guide, and Norwood Eldridge and George Maclean. For more than two months the party has been excavating and photographing the Indian ruins.

"These have been unknown to archaeologists," said Moorehead in his letter. "The expedition has worked in four counties in northwestern Texas and two in Oklahoma and has observed more than a hundred stone foundations of small buildings.

"These are scattered through almost inaccessible canyons and are usually located in very wild places. There are a few exceptions, notably on Wolf Creek, in Ochiltree county, where the ruins lie on an open plain. These have been noted by travelers in the past years.

"But large groups of these ancient stone buildings on Cottonwood, Tarbox and Antelope creeks were unknown and unexplored. The same is true of many small buildings on the Archie King ranch, 40 miles above Canadian, Texas.

"A number of these ruins were dug out and it was found that the founda-

foundations reveal broken pottery, bone implements, stone knives and other Indian stone tools. It is the belief of members of the expedition that these small structures mark the beginning of the Pueblo cliff dweller culture; that the change from buffalo lodge tipi to stone construction began in the Panhandle of Texas and Oklahoma. As the culture developed the Indians moved westward and perfected the cliff dwell Pueblo culture in the valleys of the Colorado and the Rio Grande.

**DON PEDRO II, BONES BE TAKEN BACK TO BRAZIL.**

**RIO DE JANEIRO, June 10.**—Recommendation that the descendants of Dom Pedro II., the last Emperor of

Brazil, be invited to allow his remains to be brought to Brazil during the Centennial Celebration in 1922, has been made by President Pessoa in a message to Congress.

The president paid high tribute to the work in Brazil of the former Emperor, especially in regard to national literature and defense of the country.

An extensive refrigeration plant with the most modern equipment has been built by the United States government in the Canal zone. It has accommodation for 5,000 beef carcasses, bottles milk, makes ice and ice cream and performs other similar functions.

Gears and edge tools which were

formerly so laboriously ground from banks are now cast in an almost finished shape ready for use with very little finishing. A new alloy of steel makes this possible.

(W) I I Phone

**GOOD TREATMENT TIRES WILL PAY BIG DIVIDENDS ECONOMY AND SATISFACTION**

It sounds like a fairy story but it was, and but a few years ago, when a motorist started out for a Sunday afternoon's ride with fast new tremblings, least his tire should be before he got back. Tire trouble was the bugaboo that constantly reared its head to ruin his pleasure in motoring.

Today, however, the dependability and easy riding qualities of pneumatic tires permit him to start out without a single thought for his tires. He rarely gives the terrific punishment they undergo a moment's consideration, feeling sure they will bring him home. From terrified concern, according to the Miller Rubber Co., Akron, Ohio, the pendulum has swung too far towards careless indifference.

The fact that tire manufacturers have made wonderful strides in the last few years and has kept well abreast of automobile development, is often forgotten unless attention is called to it. For instance, Miller tire mileage has doubled.

A faithful servant, tires deserve well of the car owner. They might often tell strange tales were they given the power of expression—tales of cruelty, abuse and carelessness, of service brought to an untimely end and of ill-treatment and exposure.

It pays big dividends in motoring comfort and in freedom from tire trouble to run slowly over jagged stones and glass; to avoid bumping into curbs; to promptly plug tread cuts before sand blisters and mud bolts start fabric separation.

It makes two miles grow where one would otherwise be, to guard against rim cutting by keeping out of car tracks and maintaining proper inflation; to have wheels tested for alignment rather than uselessly grinding away tires on an emery wheel. It cuts down tire expense to avoid stone busting them by reckless driving, only to curse them when the over-strained cords break down.

Tire conservation is, indeed, the need of the hour. The movement for educating the motorist to careful driving, to have his tires regularly inspected by his dealer and to guard against the ills to which tires are heir by a little care in advance of trouble, is gathering momentum throughout the country.

**NO SIGNS SLACKENING IN AUTOMOBILE BUSINESS**

There will be no slackening of the automobile business, but on the contrary, it will continue more brisk than ever, is the opinion of Mr. Eckman, of Eckman & Von Aliman Auto Company. "The trouble has been," Mr. Eckman said, "that we have been unable to secure sufficient cars and accessories. We are now just beginning to get our supplies in and there is no doubt in my mind that the summer months will be most successful ones from the automobile standpoint."

**KNOWLEDGE FOR CAR OWNERS**

Interesting and Important Facts That Every Motorist Should Know.

Do not delay repairing tires, even if the cut is not serious enough to make use impossible.

Always be sure of a good back red light and that it is working properly, as some country towns are very particular about this and make things mighty unpleasant and bothersome to the offender.

Do not wedge in too close behind another truck or car, as sometimes a car may stop suddenly in front without giving warning, or perhaps the car behind you may not stop quick enough when there is sure to be a collision if not a smash-up.

A great deal of clutch trouble is caused by the fact that the clutch shaft is out of true with the center of the flywheel. This causes one side of the cone clutch to bind, while the other is free; in the case of the disc clutch the plates tend to hold only on one side. The result is that the clutch grabs when engaged. If persistent treatment and adjustment fail to help give the clutch the proper clearance, the cause mentioned above should be looked for.

Stuck tire valves or which cannot be removed with a valve tool, can be removed in the following manner: Take a small three-cornered file or grind a large one down on the emery wheel, and with a hammer drive the point down in the center of the valve core and use the file as a handle with which to screw the core out.

A weaving noise in the differential case may be taken as an indication that the master bevel gear of the unit is running out of alignment. A slight catch, which occurs several times during each revolution of the driving wheels, is the sign of a chipped tooth in the drive shaft pinion or ring gear.

In drying the body of a car, a clean chamois skin should be used, the rubbing being done in straight lines. If spots of tar or road oil are found on the body, it is best to spread salt butter over them and allow it to remain for half an hour.

**NOTICE TO THE PUBLIC.**

Our business has grown so in the last year that we were forced to enlarge our telephone number from 630 to 5360.

But we are still at the same old stand, doing business on the same old plan. Moving freight, furniture and pianos.

With quick service and best of care. We crate and pack anything from a peanut to a trucking machine.

MORRIS TRANSFER CO. Office 510 Ohio Ave. Phone 5360

This softens the deposit so that it may be wiped off easily.

If cotton waste is used to clean the engine, often the lint from it sticks to the parts and when the hood is down is sucked into the carburetor. This causes the fuel to flow irregularly and sometimes stops the flow altogether. Cotton cloth, therefore, is better for this purpose.

To park a car parallel with the curb in a space but little larger than the length of the car is comparatively easy if you know just what to do. Drive into the space and then cut, then "cut" the front wheels sharply to the left and back into the space. You can then get close to the curb by driving the car backward and forward in the space a few times.

One of the commonest causes of overheating is due to a slipping fan belt. It is absolutely necessary for the fan to cause sufficient air draft to cool the water as it flows through the radiator. A slipping belt reduces the fan speed and thus cuts down the draft. The belt should be tight, but not tight, as a tight belt will wear fast and break and also wear on the pulley bearings.

Every motorist should carry a trouble lamp with a long flexible cable in his car. If the car is not equipped with an electric lighting and starting system, he should get a large-sized flashlight. By carrying such a lamp it will be found handy in case of a puncture which is done at night, and besides the convenience of the lamp when tires or other repairs are to be made, there is a risk of groping blindly for a piece to fit the jack head, when a wheel is to be removed and a spare one fitted.

Here are some of the things needed:

for emergency when preparing for a long trip: Set of ignition brushes; wrench for interrupter points; file for cleaning points; hydrometer or volt-meter for testing storage battery; set of fuses, if used; box of pluggers for tube valves; three-in-one valve tool; tire pressure gauge, patches, cement and viscenter. These should be wrapped together and properly labeled. Other essential needs are: Box each of assorted nuts, grease cups; lock washers and cotter pins; spool of copper wire and one of soft iron wire; tow rope; jack and handle, and two blocks of wood to place jack on; oil squirt can, filled; extra set of electric light bulbs; bag of clean waste or rags; folding canvas pail, and a full set of tire chains.

High Speed Steel Without Tungsten A new high speed steel of British origin, is without tungsten in its composition and advantages of both a practical and economical nature are claimed. It is cobalt-molybdenum steel, the cobalt apparently acting as a stabilizer and as correcting certain disadvantages said to exist in molybdenum-tungsten steels. The new steel is claimed to possess the highest point of efficiency ever obtained. The hardening is said to be more definite as well as simpler since the hardening temperature required is only in the neighborhood of 2,000 degrees Fahrenheit. The steel is also reported to machine exceptionally soft and easily. The specific gravity of como steel is reported to be equal to that of the old carbon tool steels, and so 10 per cent. less than that of the tungsten high-speed steel. As a result it is estimated that a given weight of como steel will produce 10 per cent. more tools than the same weight of regular high-speed steel.

C. D. SHAMURGER

Paris has always had places where poor imitations of the great American drink could be obtained but not until this spring when the tourists trade revived, did the real thing make its appearance. An amusing feature of the French premier of the soda has been the popularity it has attained with the Parisians.

**ICE CREAM SODA CRAZE INVADERS FRENCH CAPITAL**

PARIS, June 16.—The ice cream soda has invaded Paris. With the arrival of the first of the American tourists have sprung numerous shops which boast that within may be ob-

tained "real American ice cream sodas." Prices for this American drink range from three to six francs according to the character of the shop. Paris has always had places where poor imitations of the great American drink could be obtained but not until this spring when the tourists trade revived, did the real thing make its appearance. An amusing feature of the French premier of the soda has been the popularity it has attained with the Parisians.

At first quite skeptical, the French later tried the drink and liked it. One

large cafe on one of the famous boulevards was frequented by French people who had even attempted the sale of sodas but they haven't achieved success of the sodas.

\$100 Reward. To the person guessing the amount of money or the nearest to the correct amount of money contained in a glass jar on display in the Security National Bank for one week. It costs nothing to guess. Contest open to everyone. File your guess before 3 p. m. Wednesday, July 7. 48-1c.

For valuable literature and medical advice absolutely free, write today to the Medical Dept., Swift Specific Company, Swift Laboratory, Atlanta, Ga.

**Marvel: what makes you so cross?**

Poor mother, has backache, dizzy spells, headache and is nervous, which are all symptoms of woman's trouble.

Most women neglect their health, and for this neglect they pay the penalty. Any woman who suffers thus will find that she loses flesh faster than Nature can put it on. She will find that neglect does not pay. A little more attention to health would brighten up her life and make her worries fewer. If she asks her neighbors she finds that Dr. Pierce's Favorite Prescription benefits a woman's whole system. It not only acts upon the troubles and weaknesses peculiar to women, but is an all-around vegetable tonic that braces the entire body, overcoming nervousness, sleeplessness, headaches, dizziness and a run-down condition.

Dr. Pierce put his Favorite Prescription in the drug stores in 1870. For fifty years it has stood the test, and thousands upon thousands of women all over the United States can testify that this non-alcoholic tonic made them healthy and well. Send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y. for trial package of Favorite Prescription tablets.

**At the Churches**

**First Presbyterian Church.**  
The pastor will speak at both hours. Subject for morning sermon: "The Three Steps in Prayer." At night: "Memories." Miss Treva Veale will sing both morning and evening. The choir will give a delightful musical program. Our music is the best ever. Both Christian Endeavor societies will give patriotic programs at 3:30 and 7:00 o'clock p. m. Mr. Underwood and his helpers have something unique in way of programs and you will enjoy them.—N. F. GRAFTON, Pastor.

**Church of the Good Shepherd.**  
Holy communion 8:00 a. m. Sunday school 9:45. Morning service 11:30. The pastor will take for his subject: "The Hand of God in American History." This will be the concluding sermon in the present series on "Americanism." Evening service 8:15. Everybody cordially invited to the services of this church.—FRED T. DATSON, Rector.

**Floral Heights Methodist Church.**  
Sunday school 9:30. Preaching at 11:00 a. m. and 8:15 p. m. League at 7:00 p. m. subject, "Loyalty." Pastor's evening subject is, "A Great World War—No Exemptions—No Neutrality." Leave off your coat and come to our big open tabernacle at Tenth and Denver. Folders containing pictures of new church distributed at morning service. Be with us for every service.—W. L. TITTLE, Pastor.

**The Evangelical Church.**  
Corner Fifteenth and Broad. Sunday school at 10:00 a. m. Preaching at 11:00 a. m. Junior League at 3:00 p. m. Young People's Alliance at 7:15, followed by preaching service. We realize the weather is hot, but we forget the hot weather when we go in the midst of a good spiritual meeting. We urge you to come. If you come once you will want to come back. We extend to you a hearty welcome.—REV. GEO. TRABANT, Pastor.

**International Bible Students.**  
Sunday at 10:30 a. m. Bible study, "The Present Inheritance of the New Creation." At 7:45 a study of "The Tabernacle in the Wilderness." You are cordially invited to attend these Bible studies. Room 5, Labor Temple, 703 Travis street.

**Floral Heights Epworth League.**  
A splendid program will be carried out at Floral Heights Epworth League service Sunday evening at 7:00. The meeting will be held under the tabernacle at Tenth and Denver where it is cool. The young people of Floral Heights are urged to attend this live-wide-awake service.

**St. Paul's Lutheran Church.**  
(Mo. Synod.)  
Eleventh and Holliday streets.—Sunday school at the usual hour, 9:30 a. m.; morning services with holy communion at 10:30 o'clock; preparatory services at the same hour. All who wish to partake of the Sacrament are kindly requested to announce before. Berea Bible class will have their Bible study meeting at 7:30. Come, and bring your friends with you! Everybody is cordially invited to worship with us, especially all strangers should make our church their place of worship. One of the main reasons why our Lutheran church should appeal to you is: The true word of God is preached in all its purity and no side issues. If you long to become acquainted with Christ your Saviour, here is your chance. Come!  
C. M. BEYER, Pastor.

**The Free Methodist Church.**  
Corner Fifth and Adams.  
Regular service: Sunday school 9:45 a. m. Preaching 11:00 a. m. and 8:30 p. m. Sunday. Prayer meeting 8:30 p. m. Wednesday. Costas prayer meeting 8:30 p. m. Thursday with Sister Patrick, Front street. Ladies prayer meeting 8:00 p. m. Friday. All are invited to attend these services. Bring your children to Sunday school.
