

DR. GLENN L. SNEED ELECTED MODERATOR WEDNESDAY EVENING

RETIRING MODERATOR PRESTON DELIVERS AN INSPIRING ADDRESS.

MAYOR WALTER CLINE WELCOMES DELEGATES

Danquet Will Be Served by Ladies of The Church on Thursday Evening.

An inspiring address by Rev. W. B. Preston of Teague, Texas, retiring moderator, and the election of Dr. Glenn L. Sneed, pastor of the Trinity Presbyterian church, as moderator for the coming year, featured the opening session of annual meeting of the Texas synod, now in session at the First Presbyterian church. The main auditorium of the church was filled with delegates from all corners of the state, while a liberal sprinkling of Wichitans was scattered through the church.

The meeting opened with a musical programme by the church choir, followed by prayer by Mr. Sneed, the usual invocation, and the reading of the evening text by Rev. J. S. Hodges of Denison, Texas. Dr. P. B. Fullerton of St. Louis offered prayer.

In welcoming the delegates to Wichita Falls, Mayor Cline spoke humorously for a short time and then, on behalf of the city, expressed pleasure at having the visitors as guests.

Dr. R. L. Davis of Fort Smith responded to the mayor's talk.

Dr. Preston's address held the audience in rapt attention and, in part, was as follows: "If you will look in the middle of the 23rd verse of the first chapter of Colossians you will find five words which will suggest what I want to say to you, 'the hope of the gospel.' My only desire is to leave the thought that will encourage some child of God and will inspire that child of God with new hopefulness.

"Three of the greatest words in the human spirit are these old fashioned Bible words, faith, hope and love. These words bear a very close relation to one another; they are mutually dependent upon one another.

"We must not underestimate the two great graces of faith and love, nor must we underestimate their value and influence in human life. At the same time we must not underestimate the importance of the worth of hope. I want you to think with me for a little while about this old fashioned grace of the gospel, hope. In the Bible, the word hope is the strength of confident expectation. Let us think of the value of hope in this gospel of hope worth anything to you? If you have it, what will you take for it? I have heard of people who have not experienced the value of hope and who would barter it, but I never have heard of anyone experiencing it who would be willing to part with it. We can't get along in this life without hope.

The gospel of hope is a purifier. It shields and protects; it calms the storms of life. I believe if we are to recognize the value of the hope of the gospel that we should magnify and cherish it in our lives.

"What are the things that are included within the hope of the gospel? The final entrance of the soul into that everlasting inheritance. Do you know that the one thing that distinguishes the believer from the unbeliever is this hope of the gospel. Out in this audience there may be two men, one a believer and the other an unbeliever. They may differ in wealth; they may differ in commercial activities and

Twins Score College Honors

BEATRICE AND BERNICE BRAY

By N. E. A. Service. NORMAN, OKLA., Oct. 5.—Twins will be graduated from the Oklahoma university at 16. They are Beatrice Bray and Bernice Bray, now 14, of Norman.

When 10 they completed the eighth grade and entered the Ada high school, which they finished in three years. Then they entered the Eastern Normal school, Ada, though advised by professors that the work was too difficult for pupils of their age. And they

completed two years' work with honors. Now they have entered the University of Oklahoma. They have a junior standing there and with summer work will matriculate in 11-12 years.

The twins' father did not begin his education until he was 23, at that time being unable to read or write, his wife teaching him these rudiments. At present he has two degrees and will finish the law course at the Oklahoma university this year. His wife has three degrees.

day night and the following meetings Thursday found a large number of high Presbyterian officials among the synod delegates. Many of the distinguished churchmen were present for the initial meeting, while others arrived during the night and Thursday morning.

Included in this list were Dr. J. E. Clark of Nashville, Tenn., secretary of the Presbyterian board of education and editor of the Presbyterian "Advocate"; Dr. P. B. Fullerton of St. Louis, head of the Assembly's Board of Home Missions; Rev. W. M. Cleveland of St. Joseph, Mo., assistant to Dr. Fullerton; Dr. C. L. Overstreet of St. Louis, district superintendent of the New Era; Dr. J. C. Bruce of Philadelphia, field secretary of the board of church erection; Dr. W. S. Holt of the Oregon synod, secretary of the board of ministerial relief; Dr. E. Province of Nashville, secretary of the assembly's committee on evangelism; Mr. McMillan, a missionary from China, who is in this country on furlough, and Professor Nixon, a musician from Arkansas.

POSTAL RECEIPTS FOR QUARTER SHOW A SLIGHT DECREASE

Receipts at the United States post-office in this city for the quarter ending September 30, 1921, show a slight decrease over the preceding quarter, according to Postmaster Ed. Howard. The total receipts for the months of July, August and September were \$42,115.21.

A year ago during the same period of time the postoffice was also much busier as were practically all other places of business in the city. The receipts last year were considerably larger.

MAILING AN HOUR EARLIER GAINS 12 HOURS AT DISPATCH

Advantages of complying with the "mail-as-you-sign" and "mail early" campaigns as conducted by the postoffice department throughout the United States, are pointed out for Wichita Falls people by the local postoffice officials.

Officials state that mailing a letter an hour earlier in the afternoon for points east would mean that a gain in time of from 12 to 14 hours is effected. As is the habit of practically all business houses in this city as well as in others, the outgoing mail for the day is permitted to stack up until evening when the messenger boy is dispatched to the postoffice, arriving around 6 o'clock.

The postmaster states that it is not necessary to bring the mail to the postoffice building but by posting the letters in the mail boxes in the office buildings and the street corners a gain is made not only for the postoffice department but also in service to the public.

o'clock in the evening misses the Katy train and consequently will arrive on dispatch 12 hours later than if it had been mailed at 5 o'clock. By distributing the mailing of letters and packages through the day, a service is also done to postal employees and the night work would be cut down considerably.

The foolish man who built his house on the sand

He gave an example in folly which anybody can understand. It isn't so easy, however, to sense the mistake of trying to build the body on foods which lack essential nourishment. Here, again, is a foundation of sand which gives 'way when the test comes. Many a food that tastes good lacks honesty of nourishment to equal its taste. Thus it tempts the appetite into mistakes that often are costly.

Grape-Nuts is a food which helps build bodily endurance for life's stress and storm. The full nourishment of wheat and malted barley, together with the vital mineral salts so necessary to bone structure and red blood corpuscles, with phosphates for the brain, is retained in Grape-Nuts. The long baking process by which Grape-Nuts is made gives the food a natural sweetness and an unusual ease of digestibility and assimilation.

Served with cream or milk, Grape-Nuts is fully nourishing, and whether eaten as a cereal at breakfast or lunch, or made into a pudding for dinner, Grape-Nuts has a particular delight for the appetite. Sold by grocers.

THE WOMAN'S PAGE

BETA DELPHIANS HOLD FIRST MEET WEDNESDAY

The Beta Delphian club, which recently changed its meeting date from Thursday to Wednesday, held its first meeting for the fall Wednesday afternoon at the home of Mrs. E. T. Bagler, 1205 Tenth street.

Members answered roll call with a brief discussion of current events preceding the opening program on the "History of Art," and a number of especially interesting news reviews of the day were introduced. In the art program, the discussion of Greek architecture was led by Mrs. T. L. McEise, who also presided in the absence of Mrs. S. L. Conn, president. Mrs. L. P. Amason read an interesting paper on Greek sculpture, and a general discussion of Greek painting closed the program.

Because of the changed date and previously made engagements, as well as illness, only nine of the regular members of the club were present at the meeting and late in the afternoon the hostess served a dainty ice course with cake to these, with two guests: Mesdames T. L. McEise, Dan Thornberry, George Thornburn, O. W. Harvey, Amason, Porter-Oakes, T. L. Barker, Dave Shepherd and John C. Kay; J. L. Dasher and F. C. Miller.

ALAMO HOME AND SCHOOL SOCIETY TO MEET FRIDAY

Parents and teachers are asked not to forget the Alamo Home and School society meeting, Friday evening at the Alamo auditorium at 3 o'clock. An interesting program has been prepared, with songs and readings, and there will be several profitable discussions for the parents and teachers.

CATHOLIC DAUGHTERS TO GIVE ICE CREAM SUPPER FRIDAY

The Catholic Daughters of America will give an ice cream supper Friday evening at the church hall, to which the general public is invited.

FASHIONS

By LENORE

For the little maid of 10 or 12 is this trimmest of blue serge frocks with a bolero front and cherry red worsted stitching around the edges. The back is softly biased. Red, too, are the half bone buttons and the graceful ribbon girle which encircles the waist, tying under the bolero in front.

And for her party frock nothing can be smarter than a frock of peach tinted crepe de chine with two tiers of pleating for the very brief skirt. What the frock lacks in sleeves is more than made up in the exquisite blending of color, for the ribbons which tie with such piquant butterfly bows on the shoulders

MAYOR GAULT DOES HOUSEWORK

MRS. A. K. GAULT

By NEA Service
ST. PETER, MINN., Oct. 6.—Mrs. A. K. Gault gets breakfast, does her ironing or dusts and straightens up the house and then slips into her jacket and trots off down to the city hall where, from the mayor's office, she manages the affairs of the city of St. Peter.

Mrs. Gault is mayor of St. Peter. And she's an excellent mayor that the general impression is that she can have the office as long as she wants it.

Mrs. Gault believes that every one should be busy all of the time. That's why, when she took office as mayor, she surprised her friends with the planning of her household duties so that she could attend to all of them in addition to filling her executive position.

"I see no reason why any woman should not enter politics," says Mrs. Gault. "I have found the conducting of the affairs of a city of 10,000 very interesting, as well as a responsibility. Running a city is much like running a household. A good housekeeper and a good mother ought to make the best kind of a mayor."

One of Mrs. Gault's first official acts was to visit all of the pool rooms and soft drink places of the city and lay down strict rules by which they should be run. The penalty of disregard for them, she informed them, would be the passage of a restrictive licensing ordinance.

DRIED FRUITS IN DELICIOUS DESSERTS

By SISTER MARY.
Learn to use dried fruits as well as canned ones. If during the canning season it was impossible for you to can, there are all kinds of dried fruits on the market that will make quite as delicious desserts as the rather expensive factory canned fruits.

Dried fruits lose none of their sweetness and minerals during the preserving process and retain their natural richness of flavor to a greater extent than canned fruits do.

Apricot Souffles.
One-half cup dried apricots, flaky pie crust, sugar, 1 cup whipping cream. Wash fruit thoroughly through five waters. Cover with like warm water and let stand overnight. Cook fruit in the same water for two hours. Rub through a coarse sieve. Measure and add three-fourths as much sugar as there is fruit puree. Cook until the syrup jellies when a little is tried on a saucer. Pour this into individual baked shells. Top each with a spoonful of slightly sweetened whipped cream.

Apricot Biscuits.
One-half cup dried apricots, 1 1/2 cups stale bread crumbs, 1 cup sugar, 1 1/2 cups milk, 2 eggs, 1/2 cup lard. Wash fruit and let stand in water to cover overnight. Stew in the same water for two hours. Let the water cook away as much as possible without burning the fruit. Rub the fruit through a fine sieve. Add sugar, lemon juice and the yolks of the eggs well beaten. Mix well. Scald the milk and pour over the bread crumbs. Let stand half an hour. Combine the two mixtures and pour into a buttered baking

dish. Bake in a moderate oven until set. Then cover with the whites of the eggs beaten till stiff and dry with 4 tablespoons of sugar. Put in the oven to brown the top. Serve warm or cold.

Apricot Souffle.
Three-quarters cup apricots, 1-1/2 cup flour, 4 tablespoons butter, 1/2 cup sugar, milk and apricot juice to make 1 cup, 2 eggs.

Wash and drain apricots. Cook two hours and strain from juice. Rub through a fine sieve. Measure the juice and use as much more milk as is necessary to make 1 cup liquid. Melt butter, stir in flour and when perfectly smooth add the fruit juice slowly, stirring constantly. Add milk and cook until the mixture is very stiff and leaves the sides of the pan. Let this cool while beating the yolks of the eggs till thick and lemon-colored. Then beat in yolks, sugar and apricot pulp. Fold in the fruit juice slowly, stirring constantly. Pour into a buttered baking dish and bake in a moderate oven for twenty-five minutes. Serve at once with stewed apricot sauce.

Apricot Sauce.
Rub stewed apricots through a sieve. There should be 1 1/2 cups. Add the juice of 1 lemon, 1 cup sugar, 1 tablespoon cornstarch. There should be some juice with the apricots, but if there isn't, add enough water to make 1 1/2 cups of apricot puree. Mix the cornstarch well with the sugar and stir this into the fruit. Stir and cook until the sauce thickens.

(Copyright, 1921, NEA Service)

are a lovely shade of faded old blue edged in silver. Both frocks are from French designs.

PATTERN NO. 27.
A pattern for the above models (No. 27, 1 and 2) can be had in sizes 4, 6, 8, 10 or 12 by sending to Lenore, 8 West 42nd St., New York City, your name, address, and number of pattern, style number, and number of pieces (25 cents apiece) in postage stamps. Be sure to keep this newspaper clipping of the sketches and description of the garments to use as a working model when the patterns (or pattern) reach you—which will be within two weeks' time.—The Editor.

THOM-MITCHEM WEDDING WEDNESDAY EVENING AT 8

Ed Thom, son of Mr. and Mrs. Fred Thom of 1513 Eleventh street, and Miss Treon Mitchem, daughter of Mrs. Mitchem of 1401 Monroe, both members of well known families, were married Wednesday evening in the home of Mrs. W. D. Cline, 3 o'clock. The bride was attended by Mrs. T. S. Pittenger. Rev. Mr. Pittenger said the ceremony, and immediately afterward the young people were entertained informally at the home of the bride. Refreshments were served to Mr. and Mrs. Fred Thom, Mr. and Mrs. M. A. Park, Mrs. Mitchem, Misses Billie King, Lucile Arnold and Vera Hardwick, and Messrs. Russell Feyer, Felt Morton and M. A. Taylor.
Mr. and Mrs. Thom will be at home on Lamar street after November 1. They are at 1401 Monroe at present.

MUSIC STUDY CLUB TO MEET SATURDAY WITH MRS. CLIFFORD

The Music Study club, newly organized last year, will hold its opening meeting Saturday afternoon at the home of Mrs. N. M. Clifford, 1503 Thirteenth street.
All members are asked to be present.

Personal Mention

Mrs. Harrison Bachman has returned from a month's visit with her parents in Nashville, Tenn.
Mrs. Lucille Brooks Huff left Thursday for Bellevue to assist Mrs. Tremayne Doyle, soprano, in a benefit recital to be given there Friday evening.
Mr. and Mrs. C. B. Parquhorson of Tulsa, Okla., are the guests of Mr. and Mrs. S. D. Kaim of 2151 Ninth street.
The Sorosis club started off its year's work with the meeting Wednesday afternoon at the home of Mrs. Ernest Archambeau, when every member but one reported present.
No formal program had been planned for the opening meeting, but year books were distributed and the year's

The Longer Your Earrings the Better!

By MARIAN WALE.
NEW YORK, Oct. 6.—The longer the earrings the better.
The "drip" ear ornament seems to have outlasted, for length, any of the antique forefathers fashioned by prehistoric jewelers for cave-dwelling belles.
Earrings, indeed, reach pretty far this year, for these long pendants are to be worn not only with "dress" costumes but with tailor-made.
Up to date, the strictly tailored woman has confined herself to the small button earring. But now she can go to any length she wants in ear pendants.

The new earrings are shown in every form, shape and color. Jet, of course, is always effective.
The three-division pendant formed in links is good.
The variations in the pendant range from the oblong hoop with inner loops, to the big circle. These often bear much ornamentation.
Tassels of pearls, often bejeweled with rubies or emeralds, are replicas of antiques. One stunning pair shows a pear-shaped pendant, from the center of which a long tassel of pearls is indeed fortunate, for most of the moderns follow the antique styles.

Standard time was established in 1852.
Finland has 207,000,000 trees.

"Rally Season" and "Mobilization Day" at Heights Church

The Floral Heights Methodist church, instead of having merely a rally day, is having what they call a "Rally Season." They are enlisting workers who are to be permanently identified with the work. Next Sunday, October 10, they are to have what they designate as "Every Member Day." They insist upon the presence of every member of the church and Sunday school for the purpose of laying far-reaching plans for the enlistment of those who are not being reached.

Rev. W. L. Tittle, pastor of the church, says that next Sunday might be called "Mobilization Day." It is the day when the forces are to be numbered and lined up for aggressive warfare. With a successful "Every Member Day" next Sunday, it is thought that the Sunday following should witness a large gathering of the out-lying members of the church, the purpose of which is to lay far-reaching plans for the enlistment of those who are not being reached.

It is confidently expected that next Sunday will witness the breaking of all past records. With this new high watermark having been reached, the Sunday school will then begin its activities in real earnest and leave past records as a matter of ancient history. The establishment and growth of this new church and Sunday school are given up to be one of the notable church achievements of the present year.

Pennywort, a weed, was imported from Asia.
Japanese trains are on time and run at a profit.

DYED HER FADED CURTAINS AND A SKIRT LIKE NEW

"Diamond Dyes" add years of wear to worn, faded skirts, waists, coats, stockings, sweaters, coverings, hangings, draperies, everything. Every package contains directions so simple any woman can put new, rich, fadeless colors into her worn garments or draperies even if she has never dyed before. Just buy Diamond Dyes—no other kind—then your material will come out right, because Diamond Dyes are guaranteed not to streak, spot, fade, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Adv.

The New McCall Pattern
"it's printed"

IT'S as big a piece of news as the invention of the sewing machine—a step forward in the history of home sewing.

Where the old-style pattern had dots and dashes, you find printed instructions, so that you can read how to sew. Everything you need to know about the cutting and putting together of the garment is printed right on the pattern—an arrow for the straight of the goods, numbers to show the joining of parts, words always, instead of puzzling perforations.

Full directions are printed on every piece, so that home sewing becomes an easier, pleasanter task for women who now make their own clothes. And it makes home sewing possible for the many women who have always wanted to sew, since it is truly the pattern with the puzzle taken out.

If you are among the many women who have lacked the courage to cut into a fine piece of fabric, you may depend on this wonderful new, improved pattern, since the simple, printed instructions make it difficult for even an amateur to go wrong.

A visit to our New McCall Pattern Department will be well worth while to every woman interested in home sewing.

"SPRINGTIME" CAST WILL CONTAIN 350 FROM LOCAL TALENT

BEING STAGED BY THE BUSINESS WOMEN'S CLUB OF THIS CITY.

AT WICHITA THEATER OCTOBER 21 AND 22

Much Interest Is Being Manifested And Success of Play Is Assured.

Three hundred and fifty persons will comprise the cast of the Business Women's big musical comedy, "Springtime," which is to be presented at the Wichita theatre the evenings of October 21 and 22.

Dates for the play, originally to have been presented at the Palace theatre October 27-28, were moved up Wednesday morning when it was found that the Wichita theatre, the most popular local theatre auditorium, could be secured for the earlier dates.

The big musical comedy is expected to be one of the entertainment events of the winter in this city. Training of the chorus began with a section of the children who are to take part Wednesday afternoon, and of the cast proper Wednesday night at the F. W. C. A. hall. About a score of persons make up the dramatic personnel of the comedy, while the choruses, bound together by the slenderest threads of romance, comprise about three hundred boys, girls, young men and young women. The best talent in the city among the singers and artistic dancers has been enlisted in the production, and the business women are being assisted by a dozen or more local organizations, including the chamber of commerce, local business men's clubs, the Y. W. C. A. board and half a dozen Y. W. C. clubs, the public schools and others.

The Play. The little bit of plot which binds the singing and dancing together is said by those who have read the play and heard the music to introduce the prettiest and most complete aggregation of amateur and semi-professional production. The story covers a period of more than half a century, with the opening costumes and choruses appropriate to the days preceding the civil war. Special lighting and fade-out effects are used at the opening of each of the three acts, and the costumes throughout the production furnished by the Rogers Co. are among the loveliest things ever seen here.

One of the most attractive and unusual scenes in the play is in the second act—when a group of talented local children ranging from five to thirteen years, present a section of the pretty romance—unhappily hindered by grownups. Included at the close of the act is a beautiful child dance in which a score or more of children take part. The play is "made" happily, and the finale is a magnificent spectacle of song and dance and color.

The Cast. The cast for the play proper was completed Wednesday, with the exception of the placing of those doing special song and dance numbers. Miss Ruth Chandler, niece of Mrs. L. R. Buchanan and popular young visitor who is here to spend the winter, will be "leading lady" in the character of Priscilla Brewster. Charles Angle, who recently adopted this city for home, and who has had two years' professional stage and song work, will be leading man, in the character of Jack Wainwright. C. F. (Nick) Carter, sporting editor of the Record-News, will handle the comedy as Bobby Brewster—both young Bobby and Old Bobby, fifty years later—and Miss Bruce Dickson will take the part of Elvira Higgins, the "yamb." Others in the cast include: Primrose Standish, Miss Hetty Thompson. Thankful Standish, Mrs. Charles Greenburg. Mrs. Ekins, Miss Juanita Kinsey. Mr. James Brewster, Baldwin Montgomery. Zenobia Brewster, Miss Grace Higgins. Tom Hibbing, Paul Pearson. Joyce, Desiree and Sue, three girl friends of Priscilla, Mrs. Paul Pearson, Miss Irene Davidson and Miss Deryl Knickerbocker, respectively. Little Priscilla, Madeline McCarty, daughter of Mr. and Mrs. H. A. McCarty. Young Jack, Master Harold Simmons. Little Daisy, Mary Jane Black. Little Vera, Jolline Wood.

It's Easy to Break into the Movies—If You Know How

By N. E. A. Service. NEW YORK, Oct. 6.—It's a saying in movieland that every man, woman and child in the United States old enough and intelligent enough to construct sentences and put them into writing has written, or is writing, a scenario.

Based on these statistics, it is figured that at least five per cent have tried, or are trying, to get a regular job writing scenarios.

According to the census returns of Hollywood, Calif., a very infinitesimal fraction of one per cent of these ever achieve their purpose.

Among those who did are two young women who turned the trick so easily they wonder why everybody thinks their feat so remarkable.

They are Hazel MacDonald, formerly of Chicago, and Vienna Knowlton, ex-Bostonian.

Now don't rush out and buy a ticket for Hollywood just because they walked right in and got jobs without a struggle.

Hazel and Vienna are heroines of a fairy tale—for it is almost a fairy tale situation which two unknowns can capture jobs that millions haven't a ghost of a chance to get.

They are both in the scenario department of the DeMille studio, and they have just finished collaborating upon a screen version of Rita Weiman's story, "After the Show."

Miss MacDonald was a reporter for a Chicago paper. She was sent to interview Cecil DeMille and Adolph Zukor at a meeting in Chicago. She got the interview and as she was leaving DeMille jokingly asked her why she didn't try motion picture work.

"I don't know if I dare try," she replied. "Then I dare you to try," said DeMille.

And the next thing he knew—about two weeks later—she turned up at Hollywood and demanded a job. She got it, too.

"Maybe it was my nerve," suggested Miss MacDonald.

Miss Knowlton didn't want to be dared. She stormed Hollywood after studying playwriting under Professor Baker at Harvard. She had been an actress, a professional dancer and a writer and producer of pageants. Just to prove scenario writing was easy compared to this, she won a prize in the scenario contest held by Thomas H. Ince. Now she has a job with DeMille.

Norma Off to Orient. Foreign travel lures the movie stars. Norma Talmadge is going to the Orient, following completion of "Smiling Through." She is going to Honolulu and then to Japan and may decide to continue around the world, with a special stop at Algeria. She will not return until after the first of the year and her next productions probably will be "The Voice on the Minaret" and "Snake Bite," both by Robert Hitchen.

Cinegrams. Tom McNamara and Clive Weed, cartoonists, have gone into movies. "The Blacksmith," a two-reel comedy. Charles Ray's new comedy, "Gas, Oil and Water," has the Mexican border as local.

An old Lincoln J. Carter thriller, "The Fast Mail," is to be screened with Buck Jones as the star.

Tom Mix is working on "The Go Getter," a picture written and directed by Lynn F. Reynolds.

Will Rogers has been drafted from his two-reel comedies to play the leading role in "The Melancholy Spirit."

A burlesque on Fairbanks' "Three Musketeers" is being produced, called "Three and a Half Musketeers."

Mother and daughter in the same film. May Beth Carr, daughter of Mary Carr, has a role in a new picture in which the mother is starred.

Cecil DeMille dared Hazel MacDonald (left) to write scenarios, so she made him give her a job. Vienna Knowlton (right) is her collaborator.

MOTHER, QUICK! MOVE CHILD'S BOWELS WITH "CALIFORNIA FIG SYRUP"

Hurry mother! Even a sick child loves the "fruity" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If all-pleasant, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig-syrup—adv.

THIN, FADED HAIR NEEDS "DANDERINE" TO THICKEN IT

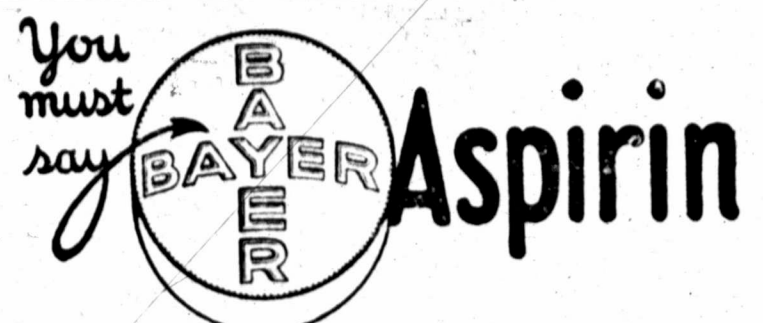

25 cents buys a bottle of "Danderine." Within ten minutes after the first application you can not find a single trace of dandruff or falling hair. Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them, helping your hair to grow long, thick and luxuriant. "Girls! Girls!" Don't let your hair stay lifeless, colorless, thin, scrawny. A single application of delightful Danderine will double the beauty and radiance of your hair and make it look twice as abundant—adv.

YOUR COMFORTS

Something that probably has puzzled you often is expressed in this letter from a reader of The Times:
"Years ago I paid 25 cents to have a trunk hauled by a baggageman with horse and wagon. Inventors gave us motor trucks, which now charge me \$1 for the same haul. I claim that the notion, that mechanical inventions make for cheap production, is a fallacy. In the last 50 years, so-called labor-saving devices have been applied to coal mining, cloth weaving, transportation, farming and other industries. What is the net result? Have these inventions given us cheaper products? They have not. Prices have steadily advanced. Every time an inventor makes a short-cut in the production of an article, the price tends upward. My notion is that the solution of the cost of living is to go back to the old-fashioned system of making things by hand. Let us discard our burdensome machinery. In the matter of prices, the writer of the above is right. On general principles, he is wrong. He makes the mistake, common to most business men and workers, of measuring prices in terms of dollars instead of the fraction of his total buying power that each article demands. He overlooks the fact that, though prices have gone up with the introduction of machinery, so have incomes mounted. The reward you get for your daily toil is expressed in what you are able to buy—in the furnishings of your home, the food you eat, the luxuries you have, and the pleasures you obtain. Your ancestors, in those "glorious" days before the coming of machine production, had none of the luxuries you regard as necessities. Where you push an electric button, they read by dim candle light. You eat, as a result of machine refrigeration foods that were denied the richest kings of a century ago. You see a movie every day if you want to. Your grandfather went to the circus once a year. Time was when only the nobles could afford horses. Now millions can afford motor cars. Individual articles cost more than in the days of hand production, but machine production enables us to have 1,000 comforts to every one that was in common use before the mechanical age. If the writer, who complains against machines, wants a really sound argument, let him ask this question: "Would we be better off, and happier, if we discarded most of the devices made necessary by congested civilization. Junked our machinery and cities and went back to the simple life? The standard of material living constantly advances, but is the price worth it?"

FIRE PREVENTION WEEK.

The annual fire loss in the United States exceeds \$500,000,000—more than half of the expenses of the federal government beyond the world war. The loss of life from fires in the United States is between 15,000 and 20,000 annually. The buildings destroyed by fire annually are equivalent to those of a city of 100,000 population. The foregoing are a few of the striking items of our annual fire bill. They are a formidable and shocking exhibit, the more so when it is considered that 75 per cent of them are due to carelessness and negligence. Our fire bill for carelessness is something like \$350,000,000 annually and horrible death to approximately 12,000 persons. That is the bill the American people pay for such careless practices as permitting trash to accumulate, throwing ashes in wooden receptacles, conveying gas through rubber hose connections, throwing cigar and cigarette butts carelessly about and similar practices. This waste ought to be stopped. It must be stopped if America is to continue to be prosperous. The waste is nearly equal to the accumulation of the wealth and savings of the country. It cannot go on indefinitely. This has been recognized by economists and leaders in the nation. The National Fire Protection Association has been organized to carry on a campaign of education to arouse the people to the seriousness of this waste and loss. Through national, state and city governments, proclamations have been issued setting apart next week as Fire Prevention Week. During that week the attention of people everywhere will be called to the terrible total of the fire loss of the country, rules and precautions for the prevention of fire will be laid before all the people and everywhere there will be discussion of fire prevention methods. The National Fire Protection Association is engaged in a great and patriotic work. Fire prevention is a field for the st. ly and effort of the best of our men. It is something in which every citizen can have a part.

SENATOR SHEPPARD AND THE GERMAN TREATY.

The treaty of peace with Germany may be ratified by the senate but it won't be because anybody is pleased with it except those who still think that our government was all wrong in the war and that Germany was all right. It has been pointed out that the German reichstag that the treaty contains no word of admission of guilt on the part of Germany. It contains no word of sympathy for the allies of the United States in the war. On the contrary it lays claims to all the advantages but scrupulously avoids any of the responsibilities they have accepted. It is about as cold and disheartening a document as was ever penned. There are some senators who can't stomach the treaty and they ought to be honored for it. One of them is Senator Sheppard. On Wednesday Senator Sheppard reviewed the work of the league of nations and the treaty with Germany which the senate is now asked to ratify. He declared: "I cannot vote for any enactment in which, once more asserting our isolation from the league, we emphasize our desertion from humanity."

TODAY'S TALK

By GEORGE MATTHEW ADAMS

LEARN TO WALK PAST FAILURE.
I remember, as a boy, I was afraid to walk past certain dark or mysterious places in the town where I lived. I do not know why I was afraid. We do not know so many things. As I have thought of it since, however, I have reasoned that we are inheritors of fears—from where or whom we cannot figure out. Perhaps that one great fear—Failure—is one of the fears which we have all inherited. All right—learn to walk right by it! I have noticed that when a dog runs out to bark at me, if I ignore it and walk right on, it soon gets discouraged and stops barking and running at my heels and discourages to its home. If you desire to win strong enough, you cannot fail. Failure is always around, though. It is always peeping its sneer our way. But laugh at it—walk right past it—and what do you care whether it is near or not? Keep a warm heart and you need never be afraid of "cold feet." What most of us long for right along is to have someone come to us and tell us that we are worth while and that we must use the faith that we have to face the thing toward which we aspire—and learn to walk past failure. We need discouragement to contrast our bright days with. But we also need the courage to lead us safely through our greatest successes. The artist becomes great only through long waiting and weariness of soul. He walks over set-backs. He rises into days of darkness—to stream them with the light of his sublime faith. Sometime we miss God and wonder where He keeps Himself. And just then we discover Him strolling with somebody who long ago—learned to walk past Failure. And what an inspiring person that one is! JUST FOLKS

By—Edgar A. Guest

BUCK UP.
Buck up when you're discouraged.
Buck up when things go wrong.
Buck up and face the battle.
Care doesn't last for long.
What though disaster taunts you,
And hope seems lost in doubt?
Buck up and face your problem,
You still can work it out.
Buck up and fight still harder,
Tomorrow waits for you;
Until the game is ended,
There's something you can do.
And even after failure,
If but your faith be stout,
And you remain undaunted,
You still can work it out.
Buck up when you are tiring,
Your foes are tiring, too;
Buck up, the fight's not hopeless
Until they've conquered you.
Buck up, though bruised and battered,
Still battle, tooth and nail;
Though flesh and muscle failer,
Don't let your spirit fail.
Buck up, the will within you
Unconquered must remain,
For man must face his duty
In spite of grief or pain.
There still is time to conquer
However dark the view,
Unless you let misfortune
Destroy your spirit, too.

There are too many self-made widows and widowers.
"Kills Walter"—headline. Dumb waiter, perhaps!

Current Comment

TARIFF LEGISLATION WILL BE POSTPONED.
(Denton Herald.)
The administration has made it plain that it is not going to deliberately commit hari kari, so to speak. It has no compunction of conscience about shelving platform demands and pledges when necessary, as it has several times demonstrated since the present session began. And that is what it has done with the permanent tariff question which was so strenuously emphasized as needing attention during the campaign. The president is quoted as saying there is at present no vital need for permanent tariff legislation at this session, that the emergency bill passed during the early days of the present session meets every demand and renders unnecessary further readjustments. A simple resolution extending its operation until conditions demand further enactments will be all sufficient, according to white house announcement. No doubt the conviction that conditions do not warrant legislation of the character mentioned owes its life to the ever widening wave of protests against the Fordney bill that have reached Washington. These protests came not only from the farmers—the producers, but from manufacturer, wholesaler, jobber and retailer—all have had the vice of the proposed bill pointed out to them and the judgment is unanimous that its passage at this time would wreck American business from the highest to the lowest. No wonder they prefer the present emergency act which while discriminating between nations to a degree is far less objectionable and not near so calculated to cause disaster as the proposed Fordney act. The republican program has been considerably reduced since the fourth of March last. Then, flushed with victory and an over-confidence in their ability to work miracles, the president and his advisers announced a program of legislation that would immediately restore the country to a normal basis, revive business and insure national prosperity. The vehicle to be employed in that most commendable undertaking was a thorough revision of the tariff. But the president and those acting under him failed to take into consideration international conditions against which legislation by this country could have no remedial effect. Blindly it was attempted, but now it is apparent that the United States can not hope to establish and maintain satisfactory trade relations with foreign nations under a prohibitive tariff policy, and that would have been the result of the Fordney act had it been allowed to become a law. The Herald is of the opinion that even the republicans will never again contend for a high protective tariff. Such a policy might have been justified when American industries were in their infancy and required the fostering hand of the government to negotiate the uncharted seas of commercial life. But conditions have undergone radical change. America to succeed must find outlet for its surplus products. It must go into the markets of the world and barter and exchange. It can not barter or exchange when it completely destroys the home market for foreign-made goods. Hence, the policy of protection as embodied in the Fordney act is so destructive of business that the administration has been forced to yield the ground it occupied and defended for several months. It is a hopeful sign that some business men taking a hand in governmental affairs. Too long has it been entrusted solely to the politicians whose manipulation and control has proven hurtful to the country's best interests. Perhaps it means, after all, that we are going to have more business in government and less government in business.

YOU AND I

Learn From Edison That Fear Is Our Greatest Enemy.

The National Consumer's League, working against long hours for women employees of hotels, says the real blame is with the people who patronize the hotels in question. That is worth thinking over twice, worth talking about. Industrial evils cannot exist without the financial support of consumers. Evil will cease to exist when we reward good and refuse evil our patronage.
FORGOTTEN.
In 1653 two important skeletons were discovered near Tournai, France. They have just been identified as Mr. and Mrs. Childeric. Ever hear the name? Few have. Yet Childeric was king of the Franks (ancient French) in the year 481 when the Franks and their allies stopped Attila and his invading Chinese armies at the Marne. That battle determined that Europe was to have a white instead of Mongolian civilization. Three hundred thousand dead were left on the field. Childeric and his legions are nearly forgotten. History has a poor memory.
ROADS.
The federal aid road act has been in operation five years and three months. The result is that 7,469 miles of good roads have been completed and 17,977 miles are under construction. The total, roughly, is equal to a road around the world or about eight times across the continent. Before the act, there was a heritage for the future, that this generation can be mighty proud of. Civilization, progress and prosperity follow the road builder.
YANKEES.
The thrift of the New England Yankee, and the inventive ingenuity which has made him world-famous for centuries. Bankers now say that Massachusetts people still are the thriftiest in the United States, 67 per cent having savings accounts. What is it that, despite immigration, makes one section of the country persist in thrift while others are noted for extravagance and profligacy for crime, fast life, bad health, etc.? Climate and drinking-water have something to do with that.
EXPORTS.
We do things on such a big scale in this country, with so many millions helping, that we do not realize their magnitude. Southern Railway figures out that American exports in six months of 1921 were \$4,911,000,000. That would fill a train of freight cars 10,206 miles long or nearly half way around the world. The figures also show that tonnage of goods shipped by the highest exports were bigger than in the corresponding six months of 1920. Losing our foreign trade? No. Just a fall in prices.
RECORD.
At Dayton, Ohio, Lieutenant McCready goes up in an airplane 49,500 feet over the ground, the highest ever reached by the thousands of billions that so far have lived on earth. Then gravity made him come down. Watch for the stars of the future in aviation—an invention to counteract the law of gravity. When we get that, we'll fly unlimited distances out among the stars, electricity sent by wireless furnishing the power. Oceans used to keep man jailed on land. He got out by inventing the boat. Now escape is man's prison. He may soon escape.
AESOP.
The Greek slave, Aesop, about 540 years before the Christian era, was so profound that they won him his freedom and have traveled through history without an equal. Now these fables are making a big hit in the movies, proving that the average American has philosophical mind. The Aesop fable movies are illustrated by comic pictures, which help popularize them. Headache science could be popularized by re-writing it in the language of ordinary folks. The vehicle of expression is as important as the message, if results are sought. All people crave knowledge.

SOME SERVANTS ARE WORSE THAN NONE AT ALL

Little Benny's Note Book

Ma was sewing on the sewing machine and I was playing with the pin tray full of pins pertaining it was a army transport and the pins was all soldiers from pinyanvina, ma saying, Now Benny for the 5th and last time put those pins down before you spill them. G. heck, ma, I want spill them, I sed. Wich jest then wat did I do but conter-dict myself by spilling them, and they went all over the floor and under the bed and everywhere, ma quick saying, Ill pick them up, ma, Ill pick them up. You certny will, sed ma. Wich I did, picking up all I could find but not finding as many as wat I spilled, judging by the looks of the pin tray, and then I went out and sat on the front steps and after a while Pude Sinking came up saying, Hay Benny, can you get a dime to go to the movies, go in and ask your mother. It wouldnt be any-use, she's mad on account of me spilling all her pins about half a hour ago, I sed, and Pude sed, Half a hour ago, G. she's forgot all about it by this time, you go in and see if she hasent. Me having my doubts but I went in anyway and ma sed, Are you back again, wat would you like to spill now? Me thinking, G. she must be still thinking of them. And pritty soon I sed, Hay ma, do you want to hear a good joke? Is there anything about pins in it? sed ma, and I thant, Gosh I bet that is wat she's still thinking about, all rite. And after a while I sed, Wats that your making, ma, it certny looks pritty. Now these fables are making a big hit in the movies, proving that the average American has philosophical mind. The Aesop fable movies are illustrated by comic pictures, which help popularize them. Headache science could be popularized by re-writing it in the language of ordinary folks. The vehicle of expression is as important as the message, if results are sought. All people crave knowledge.

COMMON SENSE WAYS TO KEEP WELL

DIPHTHERIA

By DR. R. H. BISHOP
Health departments all over the country are now girding themselves for their annual battle with the dread disease, diphtheria, which causes more deaths in the United States than scarlet fever, whooping cough or measles. It is a distinct menace to children despite its specific curative agent, antitoxin. Diphtheria is, however, a curable disease and to a great extent preventable. It is one of the few diseases for which we have a curative agent in antitoxin. Before science had discovered and applied antitoxin, more than half of the diphtheria cases died. Today only one out of every eight cases proves fatal and a great many of these deaths are the result of negligence on the part of the parents to treat the cases properly in the early stages. It has been pretty well proved that every case of diphtheria could be cured by giving the antitoxin during the first 24 hours of the disease. In order that this remedy may be administered early in every case it is necessary for parents or guardians of children to call in the family physician when suspicions of the disease arise. If the child has a sore throat with white faky deposits on the tonsils, is suspicious, one should not wait for further symptoms such as fever and marked physical depression, as these are signs of an advanced stage. Diphtheria is rapid and may prove fatal if treatment is not given at once. A croupy cough is a suspicious symptom. When the disease attacks the voice box, hoarseness and a ringing cough result and the victim may soon strangle, from obstruction of the wind-pipe, caused by the diphtheritic membrane. Even if a case is cured in which diphtheria has attacked the voice box, the infection may last for many months and even years, because the antitoxin was not administered before the disease got a strong hold on the larynx or voice box. Surgeons are often obliged to provide artificial means for breathing by introducing a tube into the wind-pipe which sometimes remains for a long period, in order to sustain life. A running nose is another suspicious symptom of diphtheria. Parents should look out for the dirty white material which forms in cases of diphtheria and obstructs the breathing. School children may "catch" diphtheria from another in many ways—by drinking from the same cup, by putting pencils and marbles to their mouths, by turning pages of books with wet fingers, by kissing, spitting, coughing, sneezing by using

SUBMIT REPORT ON PANAMA CANAL ZONE

Recommends Open Shop Policy Be Put into Effect On The Isthmus.

WASHINGTON, Oct. 6.—Thorough reorganization of the administrative machinery in the Panama Canal Zone with radical changes in existing policies affecting employment of labor, physical operation of the canal and railroad, pay of employees and other important subjects, is recommended in the preliminary report submitted to Secretary Weeks by the commission which recently investigated conditions in the canal zone at his request.

The commission estimates that an annual saving of \$5,000,000 would result from adoption of its suggestions.

Chief among the recommendations is that the governor of the canal zone be directed "not to make agreements or understandings with the canal employees or any class thereof for any period of time, but that the wages be periodically adjusted in accordance with the law which bases the canal wages on the pay of similar employees in the government service in the United States," and that the governor shall "not deal with labor organizations as organizations, but shall deal with committees of employees."

"It is further recommended," the report says, "that the open shop principle be actually put into effect on the

FORD RUNS 34 MILES ON GALLON OF GASOLINE

Start Easy in Coldest Weather—Other Cars Show Proportionate Savings.

A new carburetor which cuts down gasoline consumption of any motor and reduces gasoline bills from one-third to one-half is the proud achievement of the Air-Friction Carburetor Co., 2333 Madison street, Dayton, Ohio. This remarkable invention not only increases the power of motors from 30 to 50 per cent, but enables every one to run slow on high gear. It also makes it easy to start a Ford or any other car in the coldest weather. You can use the very cheapest grade of gasoline or half gasoline and half kerosene and still get more power and more mileage than you now get from the highest test gasoline. All Ford owners can get as high as 24 miles to a gallon of gasoline. So sure are the manufacturers of the immense saving their new carburetor will make that they offer to send it on 30 days' trial to every car owner. As it can be put on or taken off in a few minutes by any one all readers of this paper who want to try it should send their name, address and make of car to the manufacturers at once. They also want local agents, to whom they offer exceptionally large profits. Write them today.—Adv.

DONLEY COUNTY IS CREDITED WITH A PHENOMINAL GAIN

CLARENDON, TEXAS, Oct. 6.—Figures received from the department of commerce of the United States bureau indicate a gratifying increase in the farm and ranch values and general improvement in Donley county between the census of 1916 and 1920. The increase in the value of the land and buildings amounts to 190.2 per cent, the figures going from five and one-half million almost to 16 million dollars. Other notable figures are those of the cotton acreage which increased almost four times, while the number of bales produced increased almost 10 times, which figures themselves show that not only has the acreage been greatly increased, but the standard of production highly increased.

The number of farms operated in 1919 were 601; in 1920, 810, thus giving the percentage of increase as 34.8, while the percentage of increase of farms owners is 23.2. The actual acreage in farms is slightly decreased from almost four times, while the number of bales produced increased almost 10 times, which goes to show that, although the acreage increased less than five times, the production increased almost nine times. The corn acreage in 1919 was less than half of that in 1920; the figures being 9,810 acres for 1919 as against 18,435 for 1920; but the amazing thing is that the yield in bushels increased from 160,321 bushels in 1919 to 295,761 bushels in 1920. Thus the crop is seen to have grown from a yield of 8.1 to 21.3 bushels per acre.

The wheat acreage has grown from

576 in 1908 to 3,371 in 1920, while the average yield per acre has increased from 5 to 13 bushels per acre.

The number of farms reporting domestic animals were 779 in 1919 as compared with 128 in 1908. There were 340 less cattle in the county in 1919 than in 1908, 692 more horses, and 1,300 more hogs. These figures do not show up the livestock situation in this county to the best effect due to the fact that the 1916 census was taken in April, the middle of the breeding season, while the present census was taken in January, which was before the breeding season had begun. In this way, the bureau reports that of the number of livestock in 1919 many calves and colts were reported, while such was not the fact in 1920. But the seeming smallness of the figures of increase is offset by the great increase in value, due not only to the change in market but to the higher values caused by the much larger number of pure bred stock.

The increase of almost 200 per cent in the values of realty, not considering the chattels, is a growth that is beyond belief, and one of the unique facts is that with the increase of the numbers of farm operators, more than one-third of them are farm owners, which figures are high above the average. This with the increase of more than 33 per cent in the improved acreage of the county supplements the other figures that have been stated in going to show what Donley county has done.

In the rural parts of Sweden the people wear no shoes in summer.

California produces more borax than any other state.

Laudanum is a preparation of opium.

Spitbergen has only four months of light in a year.

QUIT TOBACCO

So easy to drop Cigarette, Cigar, or Chewing habit

No-To-Bac has helped thousands to break the costly, nerve-shattering tobacco habit. Whenever you have a longing for a smoke or chew, just place a harmless No-To-Bac tablet in your mouth instead. All desire stops. Shortly the habit is completely broken, and you are better off mentally, physically, financially. It's so easy, so simple. Get a box of No-To-Bac and if it doesn't release you from all craving for tobacco in any form, your druggist will refund your money without question.—Adv.

SHERWIN-WILLIAMS PAINTS AND VARNISHES

Would you spend a nickel to save a dime?

Sure you would—and you can do it. Sherwin-Williams paint products are at pre-war prices! Every nickel you spend now to protect property that's exposed to weather or wear, will save you ten cents that you risk spending on repairs in the spring.

The Fall's the Time To Paint!

The wood is dry, painter's are not so busy, no bugs around and our stocks are full again. The shelves are loaded with paints in all colors and shades. And our advice is yours for the asking. Don't delay! Paint the fly screens before you put them away—the porch steps, the garage, anything and everything that needs protection. Don't let another day go by!

Fall Wall Papers are here. Come in and see them.

Announcing the New Exide Junior BATTERY FOR FORD CARS

\$25.00

F. O. B. Philadelphia

THIS new battery is designed especially for Ford cars. It is powerful, rugged, and dependable.

From design to finished product the Exide Junior is the work of the oldest and largest manufacturers in the world of storage batteries for every purpose.

Exide Batteries send your voice over the telephone wires; they run mine locomotives, propel beneath the waves a majority of the world's submarines, light railroad trains, operate fire alarm systems.

The longest experience and the largest facilities in the battery business were brought to bear on making a thoroughly efficient battery for Ford cars at the lowest possible price.

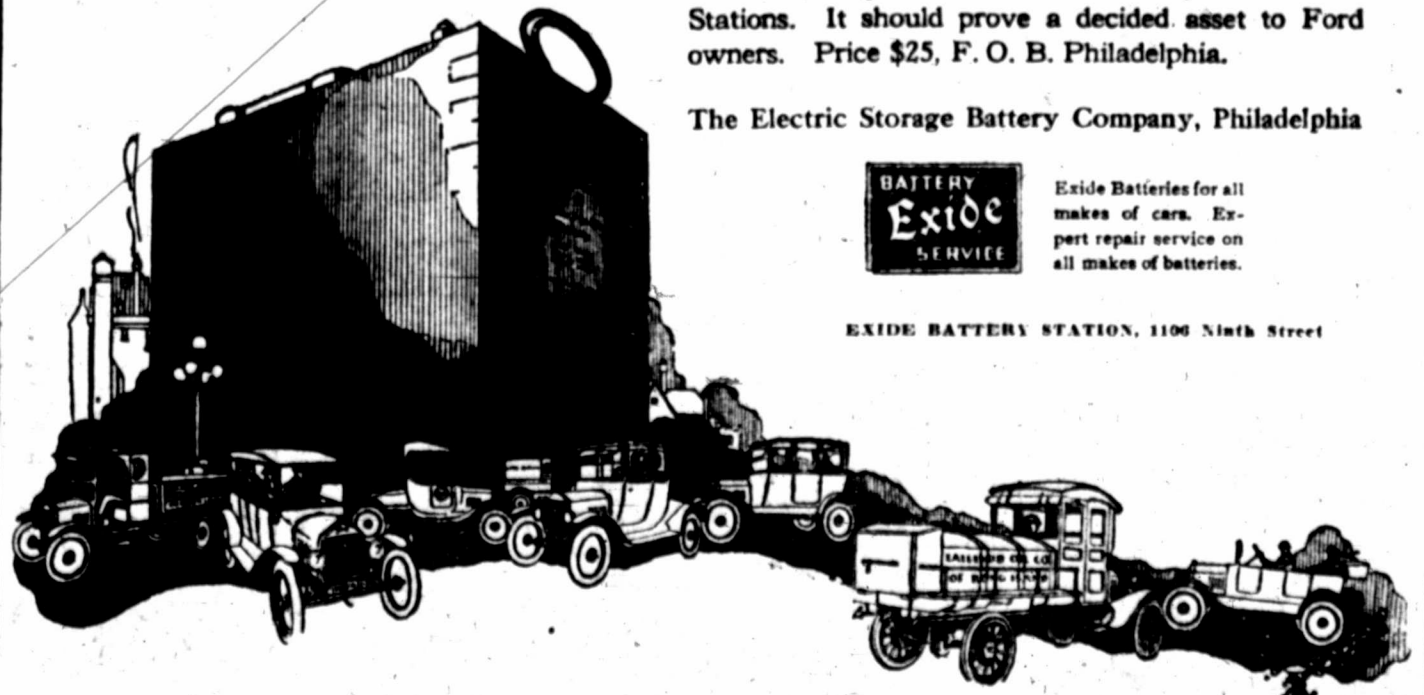

The Exide Junior is now on sale by our Service Stations. It should prove a decided asset to Ford owners. Price \$25, F. O. B. Philadelphia.

The Electric Storage Battery Company, Philadelphia

Exide Batteries for all makes of cars. Expert repair service on all makes of batteries.

IMMIGRATION SEEN AS ONE BIG FACTOR IN UNEMPLOYMENT

WISDOM OF RESTRICTIVE LAW RECOGNIZED BY THOSE WHO OPPOSED.

FURTHER RESTRICTIONS NOW FAVORED BY MANY

Washington Believes Number of Aliens Admitted Should Be Further Curtailed.

By MARK SULLIVAN
National Political Correspondent of the New York Evening Post and Wichita Daily Times.
(Copyright 1921 by the New York Evening Post.)

WASHINGTON, Oct. 6.—In connection with the unemployment conference, the question of immigration has been brought up. There is an element among employers who opposed the limitations made when the present immigration bill was passed last spring. Their theory was that the need for labor in America was so great that it could absorb all the immigrants likely to come. Theoretically this is true, but the unemployed resources justify the theory. Many of those who opposed immigration restriction were honest about it.

A smaller group belongs to the not very elevated class of employers who are not displeased to see a considerable quantity of unemployment on the theory that this enables the employer to fix wages more satisfactory to himself.

In any event, the outcome has justified those who advocated restriction. We have had the surprising spectacle of a maximum unemployment, and at the same time the maximum immigration allowed by the law. The reason, of course, is obvious and was foreseen by the advocates of restriction. However great is our unemployment in America, and however unsatisfactory our industrial conditions, compared with most of Europe, we are an industrial paradise. From several parts of Europe the immigrants have been coming just as fast as the law allows them and these are precisely the parts of Europe from which the least desirable immigrants come.

The situation invites further restriction. The present law provides that the number of immigrants from any one country shall be restricted to not more than three per cent of the number of persons from that country who were already in the country at the time of the census of 1914. This law was passed for one year and will expire next spring. When it does, there will undoubtedly be movement to reduce the figure from three to one per cent.

The disposition on the part of the mass of the people of the United States to be rigid about immigration restriction is undeniable. Any effort made to good faith to express the wishes of the public generally would result in a limitation more severe than the one in the present law. Moreover, when the matter comes up for discussion, the advocates of immigrant restriction will be able to show so many dubious practices on the part of many elements interested in more immigration as will be convincing to the country.

Deny Application for a Charter for the Ku Klux Klan

CHARLESTON, W. VA., Oct. 16.—In formal application for a charter of incorporation was made yesterday by the realm of West Virginia, Knights of the Ku Klux Klan, according to Houston G. Young, secretary of state. Mr. Young declined to issue the charter and said he made it plain to the applicant, who did not give his name, that the organization will not be granted a charter in this state.

"KLAN" INVESTIGATION WILL AWAIT ACTION BY CONGRESS

WASHINGTON, Oct. 6.—Decision by the department of justice as to investigation of the Ku Klux Klan will await action by congress on the proposed inquiry, Attorney General Daugherty said today.

Mr. Daugherty asserted that the congressional inquiry, if made, should develop the facts in the case, after which his department would take cognizance of the situation. He added that after the facts had been ascertained, it would be necessary for the department to examine them carefully in order to decide whether federal laws had been violated.

Booker T. Washington once stated that he believed his father was an Italian.

According to ancient teachings, man has seven senses.

PAVLOWA BRINGING US DANCES WITH PLOTS

PAVLOWA
By JAMES W. DEAN
NEW YORK, Oct. 5.—Anna Pavlova, premier danseuse of the world, is coming to America with a new series of ballets that have plots such as a screen or stage play of the simpler sort might have.

One ballet will be based on fairy tales. Included in this repertoire are terpsichorean depictions of "Little Red Riding Hood," "Fuss-in-Boots," "The Blue Bird," "Cinderella" and "Princess Fiorina."

In "Dianthus" Pavlova employs the invention of Nicolas de Lipky, Russian painter, which changes both scenery and costumes by the reaction of their colors to variously colored lights. The first scene shows a Grecian temple, with the statue of the god Dionysus on a pedestal in front of it. It is evening. The high priestess joins the others in a ritual before the image. The light grows deeper. The high priestess is left before the statue. As the light changes, the temple and its statues dissolve into a fantastic garden. The god appears in person.

The god tells her he loves her. She struggles between her religious vows and a sublime love. She falls exhausted before the pedestal.

Rays of the morning sun dissolve the garden. It is once more the temple. Revisited, the priestess would offer the god her love, but the object of her love is now a cold, unresponsive statue.

Another new ballet is a Norse idyll. Girls flee when they see a wrecked fisherman's boat upon the rocks of a Norwegian fiord and a man's body beside it.

One girl remains. She learns that the man is alive. She assists him to recovery. Love at first sight.

CONTROVERSY OVER THE LUCKY BALDWIN ESTATE SETTLED OUT OF COURT

LOS ANGELES, Oct. 6.—That a settlement had been effected out of court by the heirs of the estate of the late E. J. (Fucky) Baldwin, sportsman and landowner, became known today with the filing in the superior court here of an agreement between Mrs. Clara Baldwin Stocker, daughter of E.

Corns, Bunions, Callous and all foot ailments scientifically treated.

PLAN TO INCREASE MEMBERSHIP OF THE SONS OF VETERANS

APPEAL IS MADE BY JUDGE SCURRY ON REQUEST OF COMMANDER.

SONS ARE URGED TO GIVE NAMES FOR MEMBERSHIP

Plan Strong Rally at the Reunion to Be Held at Chattanooga, Tennessee.

Judge Edgar Scurry, commander of the Trans-Mississippi department of the Sons of Confederate Veterans, has received a communication from Adjutant and Chief of Staff Carl Hinton, urging that the membership of the organization of the Sons of Veterans be increased in order that a strong rally may be made at the Chattanooga reunion and all that is possible done to contribute to the comfort of the remaining years of the Confederate Veterans.

Following receipt of the communication, Judge Scurry has issued an appeal to the Sons of Confederate Veterans asking them to comply with the request.

The letter from Mr. Hinton and Judge Scurry's appeal follow: "Hon. Edgar Scurry, Commander of Trans-Mississippi Dept. Sons of Confederate Veterans. Dear Comrade: I am in receipt of a letter from General Booth, adjutant general and chief of staff, United Confederate Veterans. He asks that the sons be advised that since the Houston reunion in 1920, 275 out of the 1,000 active camps of the U. C. V. have gone out of existence. This is due to the rapidly growing death list of the Confederate veterans. He makes the plea that the sons rally and show the remaining veterans at Chattanooga that they expect to make up for this loss of membership in the veterans by adding to the membership of the sons to carry on the work of the veterans. It is up to all of us to add at least two members to our roll so that we may be able to answer this powerful appeal. I am sure that we can count upon you to devote enough time securing two members yourself. (Signed) Fraternally yours, Carl Hinton, Adjutant in Chief and Chief of Staff."

"To the Sons of Confederate Veterans: I am just in receipt of the above letter from the adjutant of the Sons of Confederate Veterans, Carl Hinton. It shows the loss of membership in the veterans by adding to the membership of the sons to carry on the work of the veterans. It is up to all of us to add at least two members to our roll so that we may be able to answer this powerful appeal. I am sure that we can count upon you to devote enough time securing two members yourself. (Signed) Fraternally yours, Carl Hinton, Adjutant in Chief and Chief of Staff."

PLAN SAND TEST ON LUKE WILSON TRACT

Tennessee Florida Oil Co. Will Running String of Casing at 1600 Feet.

In the Archer County district known as the old Panther pool the test of the Tennessee-Florida Oil company on the Luke Wilson tract, is running a string of casing to test out a good sand encountered around 1,600 feet.

On the Taylor land about 600 feet east of the Texoma pool, the No. 2 test of S. D. Harper has reached the top of the sand and has set casing to scrape. This is the second test on this acreage. No. 1 is still producing around 100 barrels.

COLONEL GEORGE WILL BE IN RACE FOR LEGISLATURE

Col. B. F. George, member of the Burkburnett city council, was here today en route to Mexia where he will open a coal and feed yard. He will maintain his headquarters at Burkburnett, where he is engaged in the coal and feed business. Colonel George, while here, announced to friends that he would be a candidate for representative for one of the places in Wichita county.

Inspection of the Hawaiian islands is made by airplane.

Dr. and Mrs. M. W. Hoover came in Thursday morning from New Orleans and New York and are at home in their apartment at Brook Manor.

THE TIMES' DAILY PAGE OF COMIC FEATURES

What's the Matter With Us, Anyway

BY WILLIAM FELLOWES MORAN, President, The Merchants' Association of New York.

There are two main causes, in my opinion, for the prevailing business stagnation.

The first and most important is the readjustment incident to a return to normal conditions. During the war the entire economic structure was disarranged. In many instances the government took control of existing agencies, such as the railroads and shipping, and introduced innovations with respect to management and wages which, while doubtless necessary at the time, are unsuited to peace conditions.

All our energies were bent toward production necessary to winning the war, and prices rose to abnormal levels. Now that the stimulus of producing for national life has been withdrawn, the law of supply and demand prevails and deflation is in progress.

Demand Shortage.

The shrinkage of demand curtails production and creates a situation which is equally hard for employer and employee, causing strikes and unrest. The second is the great difficulty of finding markets abroad for our products. It would be very helpful if we had such an outlet for our industry, but the other nations of the world are going through an even severer course of readjustment than we are and, furthermore, since practically all of them are in enormous debt, the rate of exchange is so heavily in our favor that it is practically impossible for them to purchase of us.

Thus the loss of our foreign market comes at a time when our domestic market is at its lowest ebb.

The present business depression must terminate sooner or later just as the boom period which followed the war came to an end. Such radical fluctuations in our national prosperity are inevitable, and the economic structure brought about by the war.

Buying Encouraging.

Moreover, it is as likely that similar changes will occur in the future until we devise some method of keeping more accurate account of the world's stocks on hand and of measuring prospective demand for our products so that we can better anticipate needs and operate our industries accordingly.

Present stagnation, however, should not be made the occasion for undue pessimism. Although the prohibitive exchange rates of European countries are still preventing the rapid development of the foreign market, domestic buying is proceeding at an encouraging rate.

In fact, for some time the volume of retail sales has been large, in spite of present unemployment. Merchandise stocks have been considerably depleted and the demand for manufactured goods shows promise of improvement. Figures from savings banks indicate that the average man has saved more than 15 or 20 per cent, above or below the normal standard when fairly good times prevail.

It is encouraging to remember, however, that even at the point of greatest depression the total volume of the nation's business is after all but little affected. The most radical fluctuations do not carry the prosperity curve more than 15 or 20 per cent, above or below the normal standard when fairly good times prevail.

Although we have been at a comparatively low point for some time, the country is still doing more than 80 per cent of its normal business.

Next—Dr. E. F. Ladd, senator from North Dakota.

CALOMEL GOOD BUT AWFUL TREACHEROUS

Next Dose May Salivate, Shock Liver Or Attack Your Bones.

You know what calomel is. It's mercury, quicksilver. Calomel is dangerous. It crawls into your bile like typhoid, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tonic for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tonic straightens you right up and you feel grand. No salts necessary. Give it to the children because it is perfectly harmless and does not salivate—adv.

In Bed Over Half Time Five Years

"I was in bed over half my time for nearly five years with what my local doctor called gall stones," said Mrs. Mary A. Taylor, residing at 1303 Linden avenue, Tinker, Colo. "My case seemed hopeless," she continued, "and I had almost consented to an operation when my husband saw Mendon's Hall's Number 48 advertised at Dr. Bartley's Drug Store and brought me a bottle for trial. It did me so much good that I continued taking it until I had taken six bottles and now feel like myself again and cannot cease praising 'Number 48' to my friends."

"Number 48" is recommended for blood troubles from any cause; chronic constipation, rheumatism, eczema, stomach troubles, skin troubles, etc. acts on the liver, removing waste matter from the system, thereby cleansing the blood of all impurities and doing away with the need of cathartic pills and tablets. Sold by Palace Drug Store, adv.

HUSBAND'S STORY WILL AMAZE WICHITA FALLS

He says: "Adler-i-ka helped my wife get gas on the stomach and sour stomach in twenty minutes. It works beyond greatest expectations. Adler-i-ka acts on both upper and lower bowels removing foul matter which poisoned stomach. Brings out all gases and warms, deysing food. Excellent for chronic constipation. Guards against appendicitis. Adler-i-ka removes matter you never thought was in your system and which may have been poisoning you for months. Winston Drug Co., 704 Indiana avenue, adv.

McGraw Disappointed But Claims Men Always Come Back Strong After Defeat

EMIL AND BOB WAGER THANKSGIVING DINNER FOR MEUSEL FAMILY

Brother Who Makes Least Hits in Series Will Foot The Bill.

NEW YORK, Oct. 6.—The Meusel family is sure to have a good Thanksgiving dinner, but the question of who will foot the bill remains an issue between the two brothers, Emil and Bob—to be settled by their batting in the world's series.

Emil, the elder of the two left fielders for the Giants and a National League batting star, let it be known today that he had proposed to his brother Bob, hard hitting Yankee right fielder, a little series of their own, the one who makes the least hits in the series to supply the dinner for the whole Meusel family next month. The younger Meusel willingly accepted.

Today the brothers enter the second game of the series on even terms so far as officially recorded hits are concerned. The Yankee representative member of the family made a strong bid for leadership when he hit the ball for what had the earmarks of a triple. He neglected the little formality of touching first base, however, and was declared out after he reached third the ball being thrown to first to complete the technical out. Although deprived of a hit, Bob's drive sent a run over the plate.

Emil was at bat three times and failed to connect safely. Bob was at bat four times and also stands even with brother with a .000 batting average.

FAILS IN QUEST FOR U. S. GOLF CROWN

CECIL LEITCH British Champion

Though she has twice defeated the American champion, England's golf champion was put out of the running in the United States title event yesterday by Mrs. F. C. Letts Jr. of Chicago in a sensational match which won at the final hole by the Windy City golfer.

Syracuse U. Boasts of Smallest Player in College Ranks

SYRACUSE, N. Y., Oct. 6.—A few years back Syracuse university boasted of the largest football player in college ranks. This was when Harold "Babe" White, who tipped the scales at 270 pounds and who stood six feet six inches in stocking feet, was a guard on the Orange eleven.

Now Syracuse boasts of the shortest and probably the lightest player to make any big college team. This player is Benny Moses, who stands five feet tall and who weighs 133 pounds.

As one would naturally guess, Moses is a quarterback and now he has the inside track on the position of the big Orange eleven.

He has had more experience than any other quarterback in the college as he has been directing teams and calling off signals for five years. Four of the years were at Scott high of Toledo, O., and during the other he ran the Syracuse freshman team.

The way he handled the yearlings made the Orange coaches sit up and take notice. He seldom made a mistake in selecting the plays to shoot at the opposition and he kept the men on the jump so fast that he has earned the nickname of "Speed" Moses.

Moses is so short that he has to almost stand on his tiptoes to look over the backs of the rangy linemen to see just what is going on in the ranks of the enemy.

Coach Meehan is sweet on Moses and it is a pretty safe bet that when Syracuse plays Pittsburgh, Dartmouth, Colgate, Brown, Washington and Jefferson and the other teams of the Orange schedule that Moses will be directing the team's play.

FURNISHED YESTERDAY'S THRILLS

MAYS Yank Hurler

To Carl Mays, Miller Huggins' submarine hurler, goes the lion's share of the glory of the opening contest. His underhanded shoots had the Giants, with the exception of Frank Frisch, completely baffled from the outset and only once was he in real danger of being scored on. That was when Frisch reached third with only one down, but Carl forced the slugging George Kelly to fan the breezes and the next man grounded out to the infield. Mays buried one of the best world's series games on record.

BOB MEUSEL Yank Right Fielder

To Bob Meusel may go the crown of pulling the 1921 series home. There's one every year, usually, and Bob did not wait long to turn his in. The Yankee right fielder caught one of Douglas' slants squarely on the nose and belted it for what would ordinarily have been a triple, but Bob forgot that all the bases must be touched in order. He overlooked the initial corner and was called out when the ball was returned to Kelly. Though he did not receive credit for the hit, the drive chased a runner over the plate.

FRISCH Giant Thirdbaseman

Frank Frisch, known to Gothamites as the "Fordham Flash" was the outstanding figure in a Giant uniform. The speedy third sacker was the only National leaguer who could do a thing with Mays. He poled out three singles and a terrific triple out of four trips to the plate and had a few of his mates done as well as he, there might have been a different tale. Incidentally, he showed the Yanks home he became the leading base stealer in the National circuit, by purloining a base.

McNALLY Yank Thirdbaseman

What Carl Mays contributed to the Yankee defense, Mike McNally contributed to the offense. The Yankee third sacker carved his niche in the Hall of Fame by stealing home—a feat that had been accomplished in world's series only once before. In addition to that theft, he stole second just to show the dopsters that the Yanks are not so terribly slow on the paths. He also led the Yankee attack with two safe blows, a single and a double. His work on the offense alone was sufficient to give the Yanks a victory.

ORIOLES OUT TO REVENGE WORST DEFEAT SUFFERED BY THEM IN FOUR YEARS

LOUISVILLE, KY., Oct. 6.—Victorious in the opening game, the champion Louisville club of the American association was out today to make it two in a row from Baltimore, pennant winners of the International league, in the second game of the Junior world's series. Manager McCarty of the Colonels planned to start Pitcher Ben Tincup, the Indian, who did not lose a game during the season, or Ernie Koohe, a former major league star. His selection depended upon the pitcher chosen by Jack Dunn, pilot of the vanquished Baltimore team. Jack Bentley was Dunn's probable choice, although Groves, who worked the first three innings of yesterday's game, also was under consideration.

The 16 to 1 defeat Louisville handed Baltimore yesterday was the worst beating the Orioles have taken in four years. Nick Cullon, the veteran left hander, displayed cunning guile in holding the Orioles in check when hits would have meant runs and his teammates supported him admirably in the field and at bat.

Left Earful

The bowling rookie laughed and said: "Why, this is soft as sin, boy!" He gave the ball a wicked curl—And nearly killed the pin-boy.

Right Earful

He raced down toward the five-yard line. And landed with a thud. They tried to find who made the goal. But all they found was mud.

There are about 3,000 stars that are visible to the naked eye.

Mail Peevish at Bob

Bob Meusel's only putout in right field was made off his brother, Emil, when the Giant left fielder hit a liner in the second inning. Emil gave his brother a serious look as the catch was made.

Ruth and Jennings Coach

When Ruth was not at bat during the Yankees' time on the bench, he was coaching at third base. He kept up a continual line of chatter of encouragement to his fellow batters. For the Giants, Coach Hughie Jennings occupied the box behind third base. He picked the customary amount of grass in his customary snappy style.

Glad They Didn't

A demoralizing statistical fan announced that if the Giants all batted like Frisch, who made four hits in as many times at bat, the teams would still be playing the first inning.

SPORT SHOTS by Paul W. Barkin

There's one you can't take away from us.

When John McGraw sent Shufflin' Phil to the mound instead of Art Neff he fooled everybody but the Yankees. At that Phil fooled 'em considerably, but not extra enough. He didn't cross them when he should have. About the only satisfaction he received was when he fanned Ruth twice.

A fan called us up yesterday and asked "How many home runs did Babe get?" He evidently took it for granted that he would get at least one.

The majority of the forecasters said that if the Yanks won it would be through their slugging while if the Giants copped it would be through their hurling. Well, the Yanks didn't do much slugging yesterday yet they won. Also, the Giants got better than average pitching and they lost.

What will happen when the Yanks do start slugging?

A few "firsts":
First hit: Miller.
First run: Miller.
First extra base hit: McNally.
First stolen base: Frisch.
First boner: Bob Meusel.

Wonder if Phil Douglas will stick around long enough to hurl another game? He's just as apt to take French leave and drown his sorrow as not.

The first upset in the women's national golf championship occurred yesterday when Cecil Leitch, the British champ, succumbed to Mrs. Letts Jr. of Chicago. The Windy City golfer accomplished a feat which champions have been unable to do and one which was entirely unexpected. It was almost a foregone conclusion that Cecil would get into the finals. She died fighting, however, and forced the American to the home green before losing. Looks like Alex again now.

Danny Clark is back from Amarillo and says he's through wallowing circuit clouts for the year. Nothing but the cleaning and pressing game for him from now on. He knocked two out of the lot in the series with Oklahoma City and led the winners in hitting.

The White Sox copped the opener from the Cubs in the Chicago city series and are picked by the Chicago sport scribes to win the majority. There's no reason why they shouldn't now. Alexander is out of the way while Faber and Kerr should win all their starts. Still, who cares about the Chicago "serious"? The question is "Will Mays and Shawkey win all their starts?" Yes, bo.

Trial by jury is said to have existed in 2090 B. C.

The Marvelous Compound Eyes of Tiny Insects

ON THE top of a fly's head are three little eyes, set above and between the huge compound eyes. Their usefulness has long been a puzzle. As a result of recent experimental study, it is believed that they are for long-distance vision, thereby supplementing the compound eyes, which appear to be for close-at-hand vision.

The three "ocelli," set in triangular arrangement, are not peculiar to flies; a great many species of insects have them. They are simple eyes, like ours, whereas the compound eyes are made up of thousands of tiny eyes, called ommatidia, each with its own cornea, retina and optic nerve.

Strange it seems that nature should provide a fly with a seeing apparatus so incomparably more ingenious and complex than

that with which a human being is equipped. If it be true, as supposed, that the compound eyes of a fly are powerful magnifiers, the insect must be able to see with distinctness things which are made visible to us only by the aid of a microscope.

It has often been said that the human eye is a very imperfect optical instrument. So it is, undoubtedly; but it is an excellent all-around instrument for general purposes, adapting itself to a great variety of uses.

Apparently, of all the mammals, man has the best long-distance vision. A cat can see better in the dark owing to the wide expansion of its pupils to take in as much as possible of what light there is. In absolute darkness a cat could see no better than a man. Anybody who knows dogs is aware that they are near-sighted.

Marcel Your Own Hair

THE "ondulation Marcel," as they call it in gay Paris—in other words, the Marcel wave—is expensive and bothersome. If one must go to a hairdresser to get it. How desirable, then, to do the thing for oneself, if one could? An inventor of Malden, Mass., Henry M. Siegel, has newly patented a contrivance which, he asserts, will enable any woman, no matter how unskilled, to marcel her own tresses. No heat need be used, and thus possible injury to the hair is avoided. The curling iron is dispensed with. Assistance of another person is not required. A woman employing this new device can do the whole business for herself. It is speedily accomplished, and her hands are left free for other occupation while the bends or undulations are impressing themselves upon her flowing locks—or, in a word,

while the waves are becoming "set." The instrument is a simple affair, cut out in one piece from a sheet of thin metal, and bent into a curve that accommodates it to the shape of the head. In form it is a zig-zag of "staggered" cleats, around which a tress of hair is passed to and fro and in and out, wave-fashion. One end of it is made to grip the tress close to the scalp with half a dozen teeth. The other end carries a clasp about which the tail of the tress, so to speak, is secured with a twist or two. In practice, the teeth are first firmly secured. Then the tress (which has been moistened with water) is wound back and forth around the cleats and secured at the clasp. The device is left in place until the hair dries, or a little longer, and then is removed; a perfect marcel wave is the result.

Grape Juice a Big Industry

PROHIBITION has given a wonderful boom to the grape-juice business. The manufacture of this kickless beverage has become within recent years a very important industry—so important, indeed, that the smallness of its early beginnings is curiously interesting.

Two men squeezing Concord grapes in a kitchen at Vineland, N. J., started it forty-two years ago. They put up a dozen bottles of the stuff, which was used for sacramental purposes by the village church. Other churches heard about this "unfermented wine," and were eager to buy it; so that before long the two men were bottling it in large quantities, and found it worth while

to buy a hand press to squeeze the grapes. Soon there came to be a demand for grape juice as a beverage, and it grew so fast that machinery had to be installed. There were not enough grapes grown in the neighborhood of Vineland to supply the factory, and so it was removed to Westfield, Mass., where there were more to be had. Before long the factory was consuming several thousand tons of grapes annually.

Nowadays the product of whole vineyards is purchased under contract, and the picking is done under the eye of the factory's inspectors. After picking the grapes are not touched by hands. All the processes are performed by machinery.

Moors Made Fine Tiles

THE Spaniards have been fighting the Moors for the last 1000 years, but the Moors, during the centuries of their occupancy of the Iberian Peninsula as conquerors, developed much in the way of art and architecture that is most highly valued today.

Them we owe, for one small item, the tiles which so beautifully adorn our bathrooms and which, utilized in various ways, contribute so much to the artistic finish of dwellings and other buildings. The Moors established at Seville great tile factories, and at the present time that city is a very

important tile-making center. In its neighborhood are deposits of a clayey earth highly suitable for the purpose, which is ground fine, sifted, dampened and stamped with designs, then burned with a slow fire. Colors are applied and the tiles are finally baked with high heat for twenty-four hours.

Many of the designs are artistic, representing scenes from Don Quixote, bull fights, etc. Sacred paintings are reproduced in tiles for churches. In fact, thanks to their ancient enemies, the Moors, the Spaniards have developed art in tiles far beyond anything with which we are familiar.

Mules That Operate Electrically

SIX mules are required to drag a big warship, such as the Pennsylvania, through the locks of the Panama Canal. They are electric mules, which run on tracks at either side of the lock, each of them equipped with a powerful motor.

Four of these mules (two on each side) do the pulling, cables being attached to them for the purpose; the remaining two merely attend to the business of keeping the stern of the vessel midway in the inclosed water-space, in order that she shall go straight ahead without wobbling.

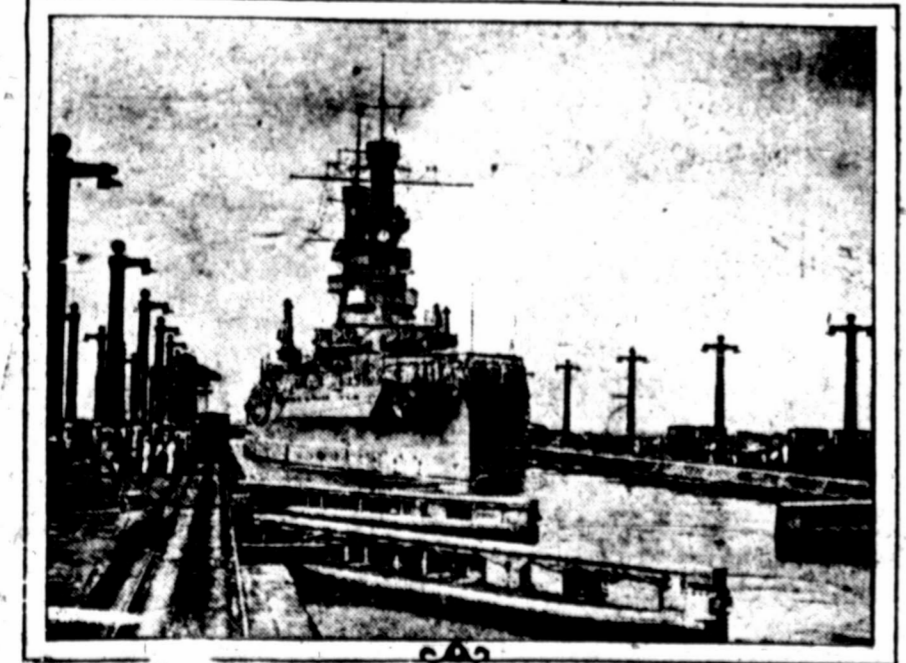

When it is desired to bring the ship to a stop, the second pair of the forward quarter of mules drops behind and joins the rear two in a strong pull, while the pair in front studies the bow.

Along both sides of each lock are rows of tall tower-like posts which support powerful arc lights, to illuminate the surroundings brilliantly at night. Thus the

machinery may be operated as efficiently in the nighttime as by daylight. The huge lamps do not throw their light directly upon the ship, however. They are concealed from view, and the illumination they afford is indirect, so as to avoid dazzling the eyes of those steering.

When a ship goes through a lock, there is no shouting and no noise of any kind. Everything moves in silence and as if by clockwork, the operation being directed by a man on board the vessel, who makes signals with his arms. If it be nighttime, he holds in each hand a rod with a small electric lamp on the end.

The canal is lighted throughout its length by electricity, like a street, light-buoys marking the channel across the great expanse of Gatun Lake, an artificial body of water which covers 187 square miles, and which extends two-thirds of the voyaging distance from ocean to ocean.

U. S. Navy Official Photo

One of the uses of the ingenious illuminated pencil

A Pencil That Lights Its Way

AN "ILLUMINATED pencil" is the novel idea of Ferdinand Stridinger, of St. Michael, Pa. It enables one to write in the dark. The pencil itself may be of the ordinary kind. It is the holder that is elec-

trically equipped. Tubular in form, so that a pencil will fit into it (being secured by a ring), the holder carries at the writing end a tiny lamp and socket, the latter provided with a reflector. The lamp socket is con-

nected by flexible wires with a little battery which may be carried in the waistcoat pocket. A touch of the finger turns on the current and the reflector concentrates the light rays upon the sheet of paper.

New Clock Fine Aid to Poor Memory

ESPECIALLY to be recommended for absent-minded persons is a "reminder clock," newly patented by Harry Bates, of New York City. On the base that supports it is a row of twenty-four little compartments, marked in front with figures indicating hours and half-hours. Directly beneath the compartments, and corresponding in number thereto, is a series of small porcelain handles which actuate electrical switches.

Behind the face of the clock is a disk, with electric contacts arranged in a circular series corresponding to the hours and half-hours on the clock face. In other words, they are spaced thirty minutes apart. The hour hand is provided with a metal spring arm which, as the hand goes round the clock face, "wipes" the fixed contacts in rotation. When one of the porcelain switch handles is pushed down, it closes a circuit, and the hour hand, on reaching the corresponding contact point, will start a buzzer and light a lamp above the clock face.

The above-mentioned compartments are meant to receive memorandum cards. Suppose, for example, that the user wishes to be reminded of engagements for 3 and 5 o'clock P. M. He places a memorandum card containing the 3 o'clock engagement in the compartment marked "3," and another card relating to the 5 o'clock engagement in the compartment marked "5," thereupon pushing down the switch handles corresponding to those numbers. When 3 o'clock arrives, he may have forgotten all about the appointment for that hour, but the hand of the clock closes the circuit, causing the buzzer to buzz and the lamp to glow. Thus he is reminded. The same thing happens at 5 P. M.

Iron From Rust

IT IS waste of iron that gives to your blood its brilliant red color. If blood contained no iron, all men and women would look like walking corpses.

Nowhere in nature is iron found in a "native" or pure state. It occurs only in the form of oxides—that is to say, as iron rust. Man's greatest triumph was achieved when he discovered how to "undo" iron rust and get the iron out of it. But for that, our civilization today would be no further advanced than that of ancient Egypt or Assyria.

Edwin E. Slosson, in his remarkable new book, "Creative Chemistry," says that every year the blast furnaces of the world release 72,000,000 tons of iron from its oxides; and every year one-fourth of that quantity reverts to rust. Should man cease his efforts in this direction for a generation, there would be little left to show that he had ever

Where Moonshine Is Brightest

THE busy outdoor chemists of the Southern Appalachians, engaged in the production of "moonshine," are adopting new methods in their warfare with revenue agents. They set bear-traps for them.

The moonshiner indigenous to that region no more esteems himself a criminal than

does the Philadelphia housewife who puts up a few bottles of "home brew." He has always considered that in making whisky from his own corn he was exercising a right which no government could justly take away from him. The "revenuers" are his natural enemies.

One hundred and fifty stills captured in Northern Georgia by Government agents in five months

Washington Plans Reserve Water Supply

THE city of Washington, being chronically threatened with a shortage of water, is somewhat perturbed by the prospect of being obliged to keep filled the great reflecting pool which is to adorn Potomac Park, extending from the new-built Lincoln memorial temple toward the Washington Monument.

Today, in viewing the excavation being made for the purpose, one is impressed by the vastness of the thing. It is shallow, but of enormous area, having a length of 2900 feet and a width of 190 feet. This does not take into account a supplementary pool which is 235 by 190 feet.

It was originally intended that the pool should have the form of a gigantic cross, but when we went into the big fight the War and Navy Departments erected the two largest buildings in the world in Potomac Park, regardless of the fact that they occupied part of the land required for the cross-

Thus it has been necessary to alter the plan, and the reflecting pool will be simply a very much elongated rectangle, supplemented by a smaller one of an irregular oval shape between the west end of the main pool and the foot of the hill on which the Lincoln memorial stands.

The big pool and the smaller pool will together hold 1,150,000 cubic feet of water, or about 7,000,000 gallons. The water will be only three feet deep, and it will have to be renewed every two weeks, lest it assume the unpleasant appearance of a stagnant pond.

How to Care for Baby

TO HANDLE a baby properly is an art so important that nowadays mothers take lessons in it from expert instructors, regular classes being formed for the purpose.

Not always is it convenient to have a baby on hand to serve as a model. Besides, the infant may manifest disapproval of the performance by howls and struggles.

Hence the obvious usefulness of a specially designed manikin which is the inven-

Wonders of the Air

ONE of the newest contrivances for flying is a gyroscopic device, which shows an artificial horizon line always in front of the pilot, telling him instantly when his machine heels over too much. A tiny model plane, elevated above the line, mimics exactly the movements of his own mechanical bird.

Another idea, for safety in mist or fog, is to lay along the airway route on the ground a powerfully charged electric cable which will automatically send up into the air a continuous series of signals. By steering so that he keeps on getting the signals, the aviator will be sure that he is not off his course.

Yet another notion, to insure safety in landing when the ground is not visible, is to suspend from the airplane a long wire with a weight attached. When the weight touches the earth the birdman is warned that it is time to "flatten out."

A newly formed British company plans a daily airplane service between London and Paris, London and Brussels and London and Amsterdam—the machines to be entirely of metal, and so designed that they will float in case of a forced landing at sea. They will carry parachutes.

The same concern contemplates a twice-a-week service between London and New York by airship, which will make the trip in forty-eight hours, carrying fifty passengers and a crew of fifteen men. They will have sleeping cabins, dining and smoking rooms and a lounge. The fare will be the same as that now charged for first-class passage by steamship.

Whether this ambitious scheme is carried out or not it is bound to be realized in fact before many years have passed.

Heart Disease Leads

THE latest figures gathered by the United States census show that heart disease is steadily increasing its lead over all maladies as a killer. Tuberculosis, which so long held first place, is slowly but steadily losing its grip, though it took 197,000 lives in this country last year.

Bright's disease came next, killing 69,477 persons; cancer followed with 68,531, then apoplexy with 62,351 and pneumonia with 64,453 deaths.

It appears, then, that these four diseases now stand about equal as destroyers of human lives in the United States. Cancer, however, is gaining so steadily and rapidly that it threatens before very long to rival heart disease as a killer of masses. A frightful prospect, truly.

Apoplexy, which means brain hemorrhage, shows a tendency to increase. It attacks at all ages, but most commonly after sixty, the heaviest death rate from this cause being between seventy and eighty.

Prohibition has boosted the business of moonshine manufacture in Georgia and Alabama, and at the present time "corn liquor" is as easy to obtain in that part of the country as it ever was. Grocery stores in the villages sell it almost openly, and at a price relatively moderate.

HOYT WINS PITCHERS DUEL FOR THE YANKS

(Continued from Page 1)

out Hoyt at first. McNally also tried to score, but was caught at the plate one run, one hit, no error.

First Inning.
GIANTS: Kelly up. Foul, strike one. Strike two. Kelly struck out. Schang throwing him out at first. Mousel up. Ball one. Strike one. Foul strike two. Ball two. Ball three. Mousel walked. Rawlings up. Rawlings flied out to Mousel. Smith up. Foul strike one. Ball one. Strike two. Miller came in fast and took Smith's fly. No runs, no hits, no errors.

YANKS: Miller up. Strike one. Foul, strike two. Frisch knocked down Miller, hot grounded and threw him out. Peck up. Ball one. Strike one. Strike two. Ball two. Bancroft threw out Peck. Ruth up. Ball one. Ball two. Ball three. Ruth walked for his third time. Mousel up. Ball one. Ball two. Ruth stole second. Ruth stole third. Strike one. Bancroft threw out Mousel at first. No runs, no hits, no errors.

Sixth Inning.
GIANTS: Neff up. Strike one. Ball one. Ball two. Ball three. Strike two. Neff walked. Burns up. Foul, strike one. Ball two. Strike two. Ball three. Foul. Burns flied out to Ward. Bancroft up. Foul, strike one. Strike two. Hoyt threw out Bancroft. Frisch up. Ball one. Strike one. Strike two. Frisch went out. Pipp unassisted. No runs, no hits, no errors.

YANKS: Pipp up. Ball one. Neff threw out Pipp at first. Ward up. Strike one. Strike two. Ball one. Kelly took Ward's grounder and beat the batter to the bag. McNally up. Ball one. McNally fouled out to Frisch. No runs, no hits, no errors.

Seventh Inning.
GIANTS: Young up. Ball one. Strike one. Ball two. Ball three. Strike two. Young walked. Kelly up. Kelly fouled Young at second. McNally to Ward. Mousel up. Ball one. Foul, strike one. Mousel fouled Kelly at second. Ward to Peck. Rawlings up. Ward threw out Rawlings at first. No runs, no hits, no errors.

YANKS: Schang up. Ball one. Ball two. Strike one. Schang went out a long one to Young. Hoyt up. Ball one. Strike one. Neff took Miller's hopper and threw him out at first. No runs, no hits, no errors.

Eighth Inning.
GIANTS: Smith up. Ward threw out Smith at the initial one. Neff up. Neff was given a cheer. Strike one. Strike two. Foul. Ball one. Ward threw out Neff. Burns up. Ball one. Ball two. Foul, strike one. Ball three. Foul strike two. Burns stroked to first. Bancroft up. Burns went out stealing. Schang to Ward. No runs, no hits, no errors.

YANKS: Peck up. Ball one. Strike one. Foul, strike two. Peck popped to Frisch, who dropped the ball. Ruth up. Ball one. Ruth forced Peck at second. Kelly to Bancroft. Mousel up. Ball one. Mousel singled into center field. Ruth going to third on the throw in. Mousel went to second. Pipp up. Ruth scored while Rawlings was throwing. Hoyt at first. Mousel went to third. Ward up. Mousel stole home and Smith had a short passed ball. Strike one on McNally. Two runs, one hit, one error.

Ninth Inning.
GIANTS: Bancroft up. Strike one. Ward threw out Bancroft. Frisch up.

MRS. LETTS IS DEFEATED IN GOLF TOURNAMENT

(Continued from Page 1)

DEAL N. J., Oct. 6.—Mrs. F. C. Letts, Jr., of Chicago, conquerer of Miss Cecil Leitch, was defeated in the woman's national golf tournament today by Miss Marion Hollins of New York, four and three.

Miss Alex Stirling defeated Mrs. Latham Hall of England, in the woman's national golf tournament today by one up at the home green.

Miss Elaine Rosenthal of Chicago defeated Miss Edith Leitch of England, one up, in 19 holes.

ELECTRA MAN SUCCUMBS TO STRIKE OF PARALYSIS
Walter Potts, aged 38, died in a local hospital at 8 o'clock Thursday morning after a month's illness brought on by a stroke of paralysis. He came to the local institution for treatment from his home in Elvira but failed to recover from the effects of the stroke.

The body was removed to the Merkle and Lunn undertaking parlors and is being held there until the arrival of a brother from Elvira, after which it will be sent to Owenboro, Ky., for burial.

Mr. Potts was unmarried.

PAT CARRIGAN'S BODY WILL ARRIVE SUNDAY FOR FUNERAL HERE

The body of Lieut. Pat Carrigan, which reached New York this week, will arrive in Wichita Falls next Sunday according to word received Thursday afternoon.

The funeral will take place Monday afternoon at 4:30.

FORT WORTH MAN IS ROBBED AND THEN SHOT

PAOLA, Kan., Oct. 6.—Three stockmen riding in the cab of a Missouri, Kansas and Texas freight train were held up and robbed of \$127 by a habit near here early today, and one of them, who attempted resistance, was shot through the left foot.

The injured man is H. W. Myers, 29 years old, of Fort Worth, Texas. He said he could not resist the temptation to attack the robber after his money had been taken, but that the man was too quick for him. Myers' injury is not dangerous. The robber escaped.

ARMY OFFICERS ADDRESS ROTARY LUNCH THURSDAY, LARGE CROWD PRESENT

With a large number of Presbyterian ministers and visiting Rotarians as guests, the Rotary club meeting Thursday was one of the best attended in some weeks. Music by the home band and choir was a pleasing feature of the meeting.

General Wolfe of the Ninth Infantry, and Maj. W. L. Culbertson, national guard inspector, addressed the Rotarians briefly. Major Culbertson has been elected to honorary membership in the club.

MAJOR GEN. DICKMAN RETIRES FROM ARMY

Ends Continuous Record of More Than 45 Years in Military Establishment.

WASHINGTON, Oct. 6.—Major General Joseph T. Dickman, commander of the eighth corps area, with headquarters at Fort Sam Houston, Texas, and former chief of the army of occupation in Germany, retired today from active service in the army, ending a continuous record of more than 45 years in the military establishment. In announcing his retirement, Secretary Weeks said the vacancy in the grade of major general would be filled by Brigadier General Samuel D. Sturgis, commanding the Panama canal division.

Both generals served with distinction in the world war. General Dickman directed the third division in the Aisne defensive, in the Chateau Thierry sector, the Champagne-Marne defensive and the Aisne-Marne offensive. Later he commanded the Fourth army corps in the St. Mihiel offensive, the First army in the Meuse-Argonne operations and the Third army in Germany. He was awarded decorations by the United States, France, England and Belgium. Before the world war he participated in the Philippine campaign and was chief of staff of the China relief expedition.

General Sturgis trained and commanded the Eight-seventh division in this country and in France, served with the First and Forty-second divisions during the Meuse-Argonne offensive observing operations, and took charge of the Eighteenth division after the armistice. He, too, participated in the Philippine campaign.

She told of her work on the farm in the early days. "I had to take a man's place," she said. "I plowed and cut feed and cultivated and did what had to be done."

Questioned about "Gott Island," Mrs. Morgan said it was there when she first saw the river; she did not know how it got its name.

She reiterated that no one did the flood of 1891 encroach on her mother's land.

Mrs. Morgan would not attempt to estimate the distance from the bluff to the north line of the farm.

"My mother said they measured miles with a galloping horse in Texas," she said.

The Turkish name of Constantinople is Stamboul.

Adrian IV was the only Englishman to become pope of Rome.

Wednesday was named after the god Woden.

Henry George advanced his single tax theory in 1887.

Police were searching Thursday afternoon for three small boys, who are believed to be implicated in the theft of \$40 in cash from the janitor of the San Jacinto school Wednesday. The youngsters did not show up for classes Thursday morning and police declared that clues have been obtained which have thrown suspicion on the trio.

Funeral services for Oscar Rigby, former resident of this city, who died in Tulsa early this week, will be held in the Merkle and Lunn funeral parlors at 4:30 Thursday afternoon. Rev. W. C. Ashford, assistant pastor of the First Baptist church, will officiate. Burial will be in Riverside cemetery.

GRAIN DEALERS' NATIONAL ASSOCIATION HAS ENDED
CHICAGO, Oct. 6.—The Grain Dealers' National association closed its convention here today by re-election of its old officers, including President B. E. Clement of Waco, Texas.

Rawhide is the untanned dressed skin of cattle.

A camel can go without drink for only about four days.

MRS. MORGAN TAKES THE STAND THURSDAY

(Continued from Page 1)

large pecan tree, some distance north of the bluff, and said there was other large timber still further north; much of this timber had been removed since oil was discovered, and much was cut in earlier days for fence posts and for firewood.

The last time she saw the valley, about a year ago, Mrs. Morgan said, it looked much the same as in 1881, except for the trees. She was living on the ranch in 1891 at the time of the big rise, when a wave of water rolled down the river in a vast, white torrent. Mrs. Morgan said; the river turned to its old channel, practically, after the flood, she said.

Her mother and she cultivated the land under the bluff, raising good crops there, she said.

She said she herself did much of the necessary farm labor. She testified to the existence of numerous good springs at the foot of the bluff. She said nothing was ever lost on the farm as a result of high water, not even in the flood of 1891. There were pools in the lowland, apart from the river, she said, and these pools had dried up in them. "Evans Lake" was the largest of these pools, she said.

"Up to the time oil was discovered there, did you know of anyone claiming land out there under a Texas or Oklahoma title?"

"I never did."

Questioned by Judge J. T. Montgomery, Mrs. Morgan said that a family named Bowers occupied the land before her folks moved there. Her mother claimed to be the Philippine campaign and was chief of staff of the China relief expedition.

General Sturgis trained and commanded the Eight-seventh division in this country and in France, served with the First and Forty-second divisions during the Meuse-Argonne offensive observing operations, and took charge of the Eighteenth division after the armistice. He, too, participated in the Philippine campaign.

TIMES DAILY MARKETS

New York Stocks—Grain and Provisions—Cotton—Livestock

COTTON MARKET.

	Open	High	Low	Close
NEW YORK Cotton	1.10 1/2	1.14	1.10 1/2	1.13
Dec.	1.10 1/2	1.14	1.10 1/2	1.13
May	1.15	1.18 1/2	1.14 1/2	1.17 1/2

NEW YORK, Oct. 6.—The cotton market was unsteady early today, owing to continued liquidation and scattering pressure. The opening was steady at an advance of 2 points to a decline of 3 points and the active month sold 2 to 3 points above last night's closing after the call. This was better than due on the week showing of Liverpool and the opening of New Orleans, however, and prices soon weakened with December selling off from 19 1/2 to 19 1/4, or about 12 points net lower for January, or about 48 to 50 points for the active month. This was better than due on the week showing of Liverpool and the opening of New Orleans, however, and prices soon weakened with December selling off from 19 1/2 to 19 1/4, or about 12 points net lower for January, or about 48 to 50 points for the active month.

The advance on trade buying and covering extended to 20 1/2 for December and 27 1/2 for January, or about 48 to 50 points above the early low level. Trading then became quiet and there were reactions of some 15 to 20 points from the best, although prices held fairly steady during the early afternoon, away from the market.

Passing of the quarterly dividend on Sumatra Tobacco stock effected a decline of 2 1/2 points. Mexican Petroleum lost 1 1/2, although Pan-American Petroleum with which it is affiliated gained one point. Prominent rail, shipping and agricultural stocks, as featured by Delaware, Lackawanna and Western, Southern Railway, Chesapeake and Ohio, and Atlantic Gulf and Steam-Boat, also were irregularly lower. Early quotations for foreign exchange indicated an extension of yesterday's advance.

Liberty Bonds.
NEW YORK, Oct. 6.—Liberty bonds closed: 2 1/2, 3 1/2, 4 1/2, 5 1/2, 6 1/2, 7 1/2, 8 1/2, 9 1/2, 10 1/2, 11 1/2, 12 1/2, 13 1/2, 14 1/2, 15 1/2, 16 1/2, 17 1/2, 18 1/2, 19 1/2, 20 1/2, 21 1/2, 22 1/2, 23 1/2, 24 1/2, 25 1/2, 26 1/2, 27 1/2, 28 1/2, 29 1/2, 30 1/2, 31 1/2, 32 1/2, 33 1/2, 34 1/2, 35 1/2, 36 1/2, 37 1/2, 38 1/2, 39 1/2, 40 1/2, 41 1/2, 42 1/2, 43 1/2, 44 1/2, 45 1/2, 46 1/2, 47 1/2, 48 1/2, 49 1/2, 50 1/2, 51 1/2, 52 1/2, 53 1/2, 54 1/2, 55 1/2, 56 1/2, 57 1/2, 58 1/2, 59 1/2, 60 1/2, 61 1/2, 62 1/2, 63 1/2, 64 1/2, 65 1/2, 66 1/2, 67 1/2, 68 1/2, 69 1/2, 70 1/2, 71 1/2, 72 1/2, 73 1/2, 74 1/2, 75 1/2, 76 1/2, 77 1/2, 78 1/2, 79 1/2, 80 1/2, 81 1/2, 82 1/2, 83 1/2, 84 1/2, 85 1/2, 86 1/2, 87 1/2, 88 1/2, 89 1/2, 90 1/2, 91 1/2, 92 1/2, 93 1/2, 94 1/2, 95 1/2, 96 1/2, 97 1/2, 98 1/2, 99 1/2, 100 1/2.

New York Money.
NEW YORK, Oct. 6.—Call money easier, high 4 1/2, low 4 1/4, closing bid 4 1/4, offered at 4 1/4. Call loans against acceptance 4 1/4. Time loans steady: 60 days 5 1/4, 90 days 5 1/4, six months 5 1/4, prime mercantile paper, 5 1/4 to 5 1/2.

Kansas City Livestock.
KANSAS CITY, Oct. 6.—Cattle, receipts 3,000 head, steady mostly 15c higher, top \$9.50; others \$7.00 to \$7.50; grassers steady to strong, other classes generally steady, cows \$2.00 to \$2.50; common and medium \$1.50 to \$2.00; canners \$2.25 to \$2.50; good cutters \$3.25 to \$3.50; best vealers \$10.00 to \$11.00. Hogs, receipts 2,000 head, 15c to 25c higher, bulk \$7.00 to \$8.00; pigs steady to strong. Sheep, receipts 1,500, all classes generally steady, best ewes \$4.50, top western lambs \$8.00; most sales \$5.25 to \$6.50.

Chicago Produce.
CHICAGO, Oct. 6.—Butter, higher; creamery extras 44c; Eggs, higher; receipts 3,322 cases; firsts 29 1/2c; poultry, alive, lower; fowls 14 1/2c; springs 20c.

NEW YORK STOCKS

NEW YORK, Oct. 6.—Shorts met with little opposition in their further depression of prices at the opening of today's stock market. Passing of the quarterly dividend on Sumatra Tobacco stock effected a decline of 2 1/2 points. Mexican Petroleum lost 1 1/2, although Pan-American Petroleum with which it is affiliated gained one point. Prominent rail, shipping and agricultural stocks, as featured by Delaware, Lackawanna and Western, Southern Railway, Chesapeake and Ohio, and Atlantic Gulf and Steam-Boat, also were irregularly lower. Early quotations for foreign exchange indicated an extension of yesterday's advance.

Liberty Bonds.
NEW YORK, Oct. 6.—Liberty bonds closed: 2 1/2, 3 1/2, 4 1/2, 5 1/2, 6 1/2, 7 1/2, 8 1/2, 9 1/2, 10 1/2, 11 1/2, 12 1/2, 13 1/2, 14 1/2, 15 1/2, 16 1/2, 17 1/2, 18 1/2, 19 1/2, 20 1/2, 21 1/2, 22 1/2, 23 1/2, 24 1/2, 25 1/2, 26 1/2, 27 1/2, 28 1/2, 29 1/2, 30 1/2, 31 1/2, 32 1/2, 33 1/2, 34 1/2, 35 1/2, 36 1/2, 37 1/2, 38 1/2, 39 1/2, 40 1/2, 41 1/2, 42 1/2, 43 1/2, 44 1/2, 45 1/2, 46 1/2, 47 1/2, 48 1/2, 49 1/2, 50 1/2, 51 1/2, 52 1/2, 53 1/2, 54 1/2, 55 1/2, 56 1/2, 57 1/2, 58 1/2, 59 1/2, 60 1/2, 61 1/2, 62 1/2, 63 1/2, 64 1/2, 65 1/2, 66 1/2, 67 1/2, 68 1/2, 69 1/2, 70 1/2, 71 1/2, 72 1/2, 73 1/2, 74 1/2, 75 1/2, 76 1/2, 77 1/2, 78 1/2, 79 1/2, 80 1/2, 81 1/2, 82 1/2, 83 1/2, 84 1/2, 85 1/2, 86 1/2, 87 1/2, 88 1/2, 89 1/2, 90 1/2, 91 1/2, 92 1/2, 93 1/2, 94 1/2, 95 1/2, 96 1/2, 97 1/2, 98 1/2, 99 1/2, 100 1/2.

STUDEBAKER

LIGHT-SIX TOURING CAR NOW \$1150

This is a Studebaker Year

The car that is converting thousands to the SIX

The popularity of the six-cylinder automobile is universal. Everyone admits that there is great pleasure in driving a Six, and the six-cylinder motor is now recognized as the most satisfactory unit of power.

The Studebaker LIGHT-SIX motor embodies the most advanced engineering developments—

—it is powerful. Its 40-horsepower motor supplies much more than the usual power per pound of car weight.

From the first moment you sit behind the wheel you get that velvety feeling of a strong, continuous flow of overlapping power impulses.

—it picks up quickly and smoothly, affording a quick getaway in traffic; it throttles down to a snail's pace in high gear.

—it is freer from vibration, up to 55 miles per hour, than any car of its size and weight yet produced in Europe or America.

The LIGHT-SIX is the most evenly balanced car you can buy. Its light weight (only 2500 pounds) is so equally distributed that if the chassis were halved or quartered each section would weigh practically the same. This means tire economy, and steady road-holding at high speeds.

See this car—drive it—test it. You will be won by it. You will understand why it is the Studebaker ideal of what a light, six-cylinder car should be.
