

TRINITY FLOODS TO RECENT STAGE

GENOA CONFERENCE COMING AROUND TO POLICY OF THE U. S.

SUCH IS VIEW EXPRESSED AT CABINET MEETING IN WASHINGTON.

RECOMMENDATIONS ARE MADE TO ORGANIZATION

Should Conference Fail Government Expects to Act Independently.

WASHINGTON, May 9.—Definite progress in the negotiations looking to the refunding of eleven billion dollars foreign debt may be expected as soon as the Genoa conference opens...

WASHINGTON, May 9.—A discussion of the Russian problem as it is affected by the negotiations at Genoa occupied most of today's session of the cabinet. It developed an opinion that the attitude of the allied governments toward the soviet state had shaped up at Genoa in virtual agreement with the policies of the United States.

After the cabinet meeting it was said by administration officials that there had been general agreement among the cabinet members that the work now proceeding at Genoa was going forward on a basis of lines which had previously been laid down by the state department.

By the same administration officials it was said that the hope was expressed that the solution of the whole problem which could be endorsed by this government might be reached at Genoa. It was added that should the conference fail the United States would have to go ahead independently in adjusting its relations with Russia.

It was reiterated that the basic principles which had been set forth as conditions for resumption of relations with Russia, remained unchanged. Nothing which had transpired at Genoa, it was said, had changed the position of the United States. As a consequence, the United States at the Genoa conference failed in the solution, the United States, in its relations to the soviet will be exactly what it was before.

On the other hand, work of the conference officials avoided any reference to the differences which had developed between the French and British representatives, confining their remarks to the general work of the conference, as far as it has progressed.

GENOA, May 9.—English and Italian delegates to the economic conference met today in a session which was devoted to the discussion of the restoration of foreign properties in Russia, a subject which has been the subject of the French delegation. The announcement was it was hoped to devise a plan to the Russian members of the conference.

By Associated Press. GENOA, May 9.—Genoa awoke today to another day of uncertainty with Premier Lloyd George optimistic that the conference could be saved, but unmistakable pessimism prevailed in some quarters.

Belgium is the center around which turns the fiercest controversy in the Russian question. It is Belgium's objection to clause seven in the allied memorandum to the Russians behind which France is standing in her opposition to the memorandum. Consequently all eyes in Genoa are on Belgium and on M. Jaspars, foreign minister and chairman of the Belgian delegation.

"The question raised by Belgium about clause seven has two aspects," M. Jaspars said. "One is a question of principle concerning respect for and protection of private property abroad. The other side concerns the economic restoration of Russia by reviving the industry of that country."

"Belgium invested two and a half billion francs in Russian industry and possessed 300 factories, cloth mills, blast furnaces, glass factories, electric street railways, water works and electric light plants."

"No other country is so prepared as is Belgium to restore to Russia if the latter returns to the former Belgium proprietors their old possessions. Money will again pour into Russia. Belgian industrialists already have a billion francs laid (Continued on Page 2, Column 2.)

DEMURRER AND A MOTION TO ELECT BOTH OVERRULED

CASE AGAINST DAN HARDY, CHARGED WITH BRIBERY, GETS UNDER WAY.

SELECTION OF JURY MADE JUST BEFORE NOON

Witnesses From Different Parts of Country On Hand in Answer to Subpoenas.

J. B. Dowell, special officer employed by the Department of Interior for the suppression of liquor traffic among the Indians and the officer alleged to have been bribed by the defendant, called to the stand by the government in the case against D. M. Hardy, who stands charged with conspiracy to and bribing a federal officer.

The jury was not announced until court convened after the noon recess. The members of the jury are: W. Lovell, J. R. Collins, Carl Stokes, A. Y. Beverley, A. P. Howard, W. H. Dellshaw, E. L. Smith, W. R. Belloney, Ben Westmoreland, W. H. Meekins, G. McKlaney and R. K. Cockerell. The prosecution rests in the hands of Henry Zweifel, United States district attorney and his assistant, J. L. Ardnerberry, and H. D. Bishop, representative of the department of justice. The defendant is represented by attorneys J. B. Barwise and Walter B. Scott.

After the indictment was read to the jury, Judge Jack stated that the indictment void of its legal phrases meant simply that on or about March 8, 1919, D. M. Hardy entered into a conspiracy with Leankor, H. M. Spawan and Eugene Flowers to bribe a federal officer and that they did bribe the officer with \$10,000 in money. He explained that the indictment charged that the bribe was offered in order that liquor traffic from Wichita Falls to the Indian Territory might be carried on.

Mr. Dowell stated that he was 53 years of age and was still engaged in the general office of the government. His commission for the year 1919 and his book of instructions were introduced into evidence, as was a map which outlined the territory known as Indian Territory in 1919.

The witness told of his four visits to the witness stand, having been sent here by the chief special officer upon the report that liquor traffic was being carried on from this place to the Indians. He told that on his first three visits he consulted with U. S. Commissioner J. A. Lantz and Representative of the House of Representatives, Charles H. Sawyer. He said at that time he was known and registered under the name of Bruce Meeting Spawan.

On the fourth visit he told of his meeting Spawan who was also employed as an officer. He said he was a map which outlined the territory known as Indian Territory in 1919.

Sixteen witnesses were sworn and excluded from the court room when the defense asked that the rule be invoked.

Judge G. W. Jack of the U. S. district court Wednesday morning overruled a general demurrer in the case against Dan Hardy charged with bribery and government officer. A motion to elect the court in the indictment upon which the defendant is to be tried was also overruled.

Selection of the jury of 12 who will hear the evidence began at 11:30 o'clock Tuesday morning and was completed just before the noon recess.

Many witnesses from all parts of the country are on hand in answer to subpoenas. The prosecution stated that the main witness was also on hand.

The defendant stands charged with offering a bribe and giving the same to a federal officer in connection with the alleged illegal transportation of liquor from Texas into Oklahoma.

The case was tried once before and was reversed by the supreme court of the United States and remanded for trial. The general demurrer in the case was overruled Tuesday morning was the one which accompanied the record on the former trial.

DAUGHERTY DECLARES WAR FRAUD CHARGES WILL BE PROSECUTED

WASHINGTON, May 9.—Attorney General Daugherty, in a statement prepared at the request of President Harding and transmitted by the president to Representative Wendell H. Weir, republican house leader, declared the record of the department of justice in connection with war contract cases calls for no apology and none is intended.

CIRCUMSTANCES ALTER CASES—AND SIGNS

PRESIDENT INVITES RAILROAD EXECUTIVES TO RATE CONFERENCE WITHOUT GLUE TO DRISKILL MURDER; HEAD SPLIT OPEN

GEN. FENG YU LIANG DEFEATS TROOPS OF PROVINCE OF HONAN

HANKOW, CHINA, May 9.—General Feng Yu Liang, the Christian general who was one of Wei Pei-Fu's main supporters in the fighting that resulted in the defeat of Chang Tso-Lin, is reported to have defeated the troops of the province of Honan at Chung Mowshan in the central part of the province and is marching toward Kaifeng in the northern section.

AMOIY, CHINA, May 9.—Two of the Chinese squadrons are reported to have been sent to a point on the coast of Chekiang province by Sun Yat Sen, head of the southern government, the seat of which is at Canton. The voyage of these vessels is believed to be in connection with the Cooedoo Oil company, was perhaps fatally injured, and two others were seriously hurt when an acetylene tank being used in repairing the tracks of the street railway here exploded shortly before noon today.

SNIPERS CONTINUE TO OPERATE IN BELFAST

BELFAST, May 9.—Snipers are continuing their activity in the York street district of Belfast. A woman was wounded last evening and a man on his way to work today also was struck by a bullet, sustaining a slight wound.

BREAK IN A LEVEE FLOODS TOWN WITH 1,500 POPULATION

NEW ORLEANS, May 9.—Flooding of the entire town of Jonesville, La., with a population of about 1,500, by a break in the levee in Catahoula parish today had swelled the total supply of food rations to the approximately 30,000 refugees scattered throughout the flooded area in addition to the 40,000 being cared for at relief camps, still presented a serious problem.

PROTECTION OF THE INHABITANTS of the Mississippi valley from flood ravages was declared by Governor John M. Parker in his message to the Louisiana legislature yesterday to present "a great national problem" which should be handled, he said, by the ablest engineers that could be obtained.

WASHINGTON, May 9.—Fifteen of the leading railroad executives of the country have been invited to a dinner conference May 20 at the White House to discuss rate adjustments.

The interstate commerce commission, which recently concluded an inquiry into general transportation levels has reported to President Harding, it was stated today at the White House, that it does not possess the authority under the act to determine the general policies involved in rate readjustments.

ONE WOMAN KILLED THREE ARE INJURED IN TULSA EXPLOSION

TULSA, OKLA., May 9.—An unidentified woman was instantly killed; Miss Helen Moffitt, daughter of D. W. Moffitt, vice president of the Cooedoo Oil company, was perhaps fatally injured, and two others were seriously hurt when an acetylene tank being used in repairing the tracks of the street railway here exploded shortly before noon today.

SYRIANS CHARGE THAT EFFORTS ARE MADE TO COLONIZE THAT COUNTRY

By Associated Press. GENOA, May 9.—Representatives of King Faisal, king of the Irak region (Mesopotamia), presented to the conference today a memorandum claiming the independence of Syria and Lebanon and protesting against the French occupation.

JOFFRE APPRECIATES WELCOME IN AMERICA

By Associated Press. PARIS, May 9.—Marshal Joffre spent the first morning after his return to France from his world tour at his headquarters at war college greeting friends.

WASHINGTON, May 9.—Federal Judges Rogers, Hough and Mansfield today filed a restraining order against the American Sugar Refining company, and other corporate and individual defendants in the government's Sherman law suit begun 12 years ago.

WASHINGTON, May 9.—Federal Judges Rogers, Hough and Mansfield today filed a restraining order against the American Sugar Refining company, and other corporate and individual defendants in the government's Sherman law suit begun 12 years ago.

URGES GOVERNMENT TO OBTAIN OPINION OF TECHNICAL MEN

WASHINGTON, May 9.—Recommendation that the government obtain the judgment of the nation's business and technical men before giving final decision with respect to its vast power and nitrate projects at Muscle Shoals, Ala., was made today by William McClellan of New York, president of the American Institute of Electrical Engineers, who said he believed the proprieties concerned in the various projects should be carefully studied from the standpoint of the government's interests before final action was taken.

STUDENT KILLS ANOTHER AT STILLWATER, OKLA.

OKLAHOMA CITY, May 9.—Beckham Cobb, a student at the Oklahoma Agricultural and Mechanical college here, was shot and killed on a street bordering the college campus at noon today.

STILLWATER, OKLA., May 9.—Beckham Cobb, 25, of Birmingham, Ala., a student at Oklahoma Agricultural and Mechanical college here, was shot and killed on a street bordering the college campus at noon today.

FORMER MEMBER OF HOUSE ATTACKS THE ESCH-CUMMINS BILL

EDITOR OF "LABOR" SPEAKS BEFORE CONVENTION OF FIREMEN.

EXPECT SOLUTION THAT THE U. S. CAN ENDORSE

Urges Naturalization, Voting and the Establishment of Labor Pajpys.

HOUSTON, May 9.—Edward F. Keating, of Washington, former congressman from Colorado and editor of the official publication of the 15 railway brotherhoods, urged the necessity for organized political action on the part of the brotherhoods, attacked the Cummins-Esch bill and told of plans for the establishment of labor pajpys in his speech today before the delegates attending the 33rd triennial convention of the International Brotherhood of Locomotive Firemen and Engineers.

"Certain interests have discovered that the business of running the government is the most profitable in the world," Mr. Keating asserted. He charged that the Cummins-Esch bill presented a billion dollars to the railroads and placed the employees at the mercy of the labor board.

Mr. Keating made these recommendations: "The members of a union who is not a naturalized citizen become naturalized as soon as possible. That the members of unions be required to register and vote at both primary and general elections."

"That unions see that members are instructed in the mechanics of politics and that the organizations supply information to members concerning the records of candidates for office."

"That the unions get behind the establishment of a labor press for the distribution of news of interest to the brotherhoods and get their story before the public."

"Such papers should be owned and editorially controlled by the members through the organizations, the editorial policy to be determined by a representative committee," Mr. Keating said.

"The subscription cost should be sufficient to cover the cost of editing and publishing," Mr. Keating outlined the policy of the publication he heads. "Labor" is the official Washington weekly publication of the 15 railroad union organizations, which the three groups of the 16 unions, the transportation crafts, the ship crafts and the area assisting of the remaining railroad crafts, each has two members, Mr. Keating being the seventh member of the editorial committee.

Mr. Keating predicted that within five years there would be labor papers, either weekly or daily, in all the principal cities of the United States. The 15 railroad crafts have a membership of 2,000,000 members, he said.

FEDERAL JUDGES FILE A DISSOLUTION ORDER AMERICAN SUGAR CO.

WASHINGTON, May 9.—Winter wheat production this year is forecast today at 341,793,000 bushels by the department of agriculture which announced the condition of the crop on May 1 as 33.5 per cent of normal and the area remaining to be harvested on that date as 31,131,000 acres.

WASHINGTON, May 9.—Federal Judges Rogers, Hough and Mansfield today filed a restraining order against the American Sugar Refining company, and other corporate and individual defendants in the government's Sherman law suit begun 12 years ago.

WASHINGTON, May 9.—Federal Judges Rogers, Hough and Mansfield today filed a restraining order against the American Sugar Refining company, and other corporate and individual defendants in the government's Sherman law suit begun 12 years ago.

WASHINGTON, May 9.—Federal Judges Rogers, Hough and Mansfield today filed a restraining order against the American Sugar Refining company, and other corporate and individual defendants in the government's Sherman law suit begun 12 years ago.

AS MUCH TERRITORY INUNDATED AND AS MUCH DAMAGE RESULTS BUT NO LOSS OF LIFE REPORTED

SOUTH METHODISTS ACCLAIM WILSON APOSTLE OF PEACE

DEMONSTRATION IS STAGED AT CONFERENCE IN HOY SPRINGS.

HOY SPRINGS, ARK., May 9.—Hailing Woodrow Wilson as the "apostle of modern democracy and world peace," delegates to the 13th quadrennial general conference of the Methodist Episcopal church, south, staged a demonstration here today in the former president's honor. The officials said was unique in the church's annals.

The scene resembled a political meeting as those present, even the more elderly bishops, arose and cheered. The officials said was unique in the church's annals.

PRODUCTION TAXES CANNOT BE CHARGED AGAINST THE LESSOR

NEW ORLEANS, May 9.—Taxes on oil production cannot be assessed against the owner of land when the oil rights are leased to others, the supreme court held in the suit of G. T. Shaw, owner of a tract said to be worth \$5,000,000 in the Claiborne oil field against J. R. Watson, tax assessor, to compel his assessment to the value of the land without the oil production being considered.

Shaw brought the suit to compel the assessor to reduce his assessment from the value of his land with the oil value to the value of it without considering the oil production, which he had leased to others with the exception of small royalty.

MEET FOR TRIAL OF LAWTON MINISTER; RECENTLY RESIGNED

RESIGNATION MAY OBLIVATE THE NECESSITY FOR A HEARING.

CHARGE OF ARSON IS OUTCOME OF INQUIRY

Alleged Abduction Believed to Have Been Arranged, Officers State.

LAWTON, OKLA., May 9.—The judicial commission of the El Reno presbytery, which has jurisdiction in this territory, met today to hear charges of "conduct unbecoming a minister of the Presbyterian church of Lawton. Mr. Irwin resigned recently that he would resign from the church and his request for a dissolution of his pastoral relations with the local church was granted this morning. This action, in the opinion of members of the presbytery, will obviate the necessity of a trial.

When Jake L. Hamon was buried at Ardmore more than a year ago, the Rev. Mr. Irwin preached the funeral sermon, and since that time he has been a member of the local church. The pastor had been a constant supporter of Hamon, and this week the funeral sermon, brought down to his congregation, split the church and resulted in part of the congregation leaving. Then last night the minister married a couple in a bathing pool at a summer resort near here, and more discussion followed.

Recently fired, he discovered in that portion of the church built by Mr. Hamon and attempts were made to destroy the motion picture booth placed in the church by the pastor. Later on a Saturday night the pastor was abducted by three unidentified men and found several hours later in a mud hole several miles from the city.

An investigation by county authorities followed, the result being that charges of arson were filed against the pastor and a member of the church board of sessions, which had resigned. Arraignment on these charges is scheduled for Friday. The county attorney announced that his investigation of the alleged abduction led him to believe that it had been arranged and the matter was dropped.

CANCEL ORDER FOR TEXAS RANGERS FOR FREESTONE COUNTY

MEXIA, TEXAS, May 9.—Reports that an uprising was imminent among negroes of Freestone county was a reprisal for the lynching of three negroes there since Friday had been unprovoked, early today.

Local officers say they do not anticipate further trouble, although they have warned a negro to leave the county who was said to have been mentioned by one of the lynched negroes in his alleged confession of the murder last Thursday of Miss Eula Ausley, which precipitated the lynchings. A request to Governor Neff for state rangers to assist in quelling a possible insurrection was made by Sheriff Mayo early yesterday, but was cancelled later in the day when no sign of further trouble revealed itself.

Little excitement has followed the finding yesterday of the fourth lynched negro, whose bullet-punctured body was found swinging to a tree between Fairfield and Kirwin. A heavy rain has served to discourage outdoor activity in the community.

Relatives of the dead girl have joined with Sheriff Mayo in declaring that no further violence will be tolerated.

MID-KANSAS HAS 500 BARRELL WELL NEAR ELIASVILLE

ELIASVILLE, TEXAS, May 9.—The Mid-Kansas Oil and Gas company has a new 500 barrel well on the J. W. Hill lease. It is well No. 3 on the north bound of the lease, just two and one-half miles south-west of Eliasville.

The new well No. 3 of the Texas Pacific, five miles south of the city, has been shot and reported good for 200 barrels.

Activity in this field has been greatly retarded for the last two weeks on account of heavy rains and high water. Many of the water pumps have been under water and many of the gas and oil lines have been washed out by the recent floods.

GENOA CONFERENCE PATTERNS AFTER U.S.

(Continued from Page One.)

away to restore their industries there.

Mr. Jasper denied statements published recently in several European newspapers concerning a military and economic alliance between France and Belgium. He said the purpose of the conference was purely defensive, effected through the exchange of letters which provide that the conference be effective only when mutually agreed upon.

DECLARES LLOYD GEORGE PROFOUNDLY DISCOURAGED

Mr. Lloyd George, in a statement to the press last night, M. Barthou, head of the French delegation, after reiterating that Premier Lloyd George told him that the differences between France and Great Britain meant the end of the enterprise, said respecting their meeting Saturday:

"We had a very long and serious conversation. It is difficult to form an opinion of a book by reading several pages, and that is what happened when false reports of our talk were published in England. Mr. Lloyd George was sad and somewhat profoundly discouraged, but he never uttered a word of menace against France. He did say: 'We are at the turning point of our negotiations.' But this was not said aggressively, but sadly. We are deeply disappointed that France had preferred to side with Belgium rather than with England, which had shown such great affection for France during the war and which with the dominions had made such sacrifices according to the treaty."

"I assured him that there was not a solitary Frenchman who did not have gratitude in his heart for Belgium rather than with England, which had shown such great affection for France during the war and which with the dominions had made such sacrifices according to the treaty."

"I assured him that there was not a solitary Frenchman who did not have gratitude in his heart for Belgium rather than with England, which had shown such great affection for France during the war and which with the dominions had made such sacrifices according to the treaty."

has been or may be must be affected by the American attitude unless and until equality of industrial opportunity in Russia is assured on principles and by means which the United States can recognize.

The correspondent understands that minor British oil interests in south Russia have suggested to the British delegation the expediency of establishing a special petroleum conference alongside the Genoa conference and says that were such a council to be constituted and were it to include the leading companies, its proceedings might speedily eclipse those of the main conference.

TRINITY FLOOD TO RECENT HIGH STAGE

(Continued from Page One.)

river, which had reached a stage of 10 feet at 9 o'clock. Deputy sheriffs in boats were rescuing several families in the lowlands west of the Dallas county court house, who had been succeeded by the swiftly rising waters. They were not in danger, the sheriff's department reported. Unless there is further rainfall the Trinity here will not go beyond the 45 foot stage as the result of yesterday's torrential rains throughout north Texas, the local weather bureau predicted.

Heavy property damage was done in Dallas late yesterday and last night by flooding streets, according to police reports, but there was no loss of life. Local street car service still was hampered in sections of the city early today. All inter-urban service from Dallas has been suspended except on the Denison line.

Rail traffic on the Texas & Pacific, both east and west from Dallas has been discontinued, but officials said the line to the east probably would be opened by noon.

Some of the Katy track is washed out at Waxahachie and trains on that road are being detoured. No trains are being operated on the Houston & Texas Central line.

placed after destruction by the high waters of two weeks ago, have been washed away. It is said. Trains and inter-urban service to Dallas, Waco and other points is suspended. Nine hundred feet of track is reported washed out on the Dallas inter-urban line.

WACO, TEXAS, May 9.—The Brazos river 78 feet above normal here and rising rapidly at 10 o'clock. Advice from above indicates a duplication of the 1913 overflow when it submerged nearly all of East Waco. At Granbury the river was higher this morning than since 1913 and still rising. At Glenrose an eight inch rain fell yesterday. At Kopper the river was ten feet higher than in 1913, but was falling. A six inch rain had fallen there. At Whitney the Brazos bridges was submerged. The Brazos river at Valley Mills and Clifton was higher this morning than it had been in nine years.

TRAFFIC BETWEEN DALLAS AND CORSIANA SUSPENDED

CORSICANA, TEXAS, May 9.—All traffic over the Houston and Texas Central railroad and the interurban line has been suspended between Dallas and Corsicana due to washed out bridges between Garrett and Monroe. Three bridges are reported out on the interurban line and one electric train is reported marooned between two washouts.

CONSIDERABLE DAMAGE TO CROPS IN ELLIS COUNTY

WAXAHACHIE, TEXAS, May 9.—Streams in this section flooded by excessive rains have resulted in much damage to crops, according to unofficial reports and an unverified rumor had one unidentified man drowned near here. Bridges, just re-

placed after destruction by the high waters of two weeks ago, have been washed away. It is said. Trains and inter-urban service to Dallas, Waco and other points is suspended. Nine hundred feet of track is reported washed out on the Dallas inter-urban line.

SHERMAN, TEXAS, May 9.—Five steel bridges in the western and northern parts of Grayson county have been washed away, according to reports here. Five inches of rain has fallen here since Sunday.

PROVES BENEFICIAL TO THE CHANNEL AT THE MOUTH

GALVESTON, TEXAS, May 9.—Floods in the Brazos river have proven beneficial to the channel at the mouth of the stream at Freeport, according to United States engineers. Before the recent flood the channel over the bar at Freeport was barely 17 feet deep and 100 feet wide. Since the recent flood the depth has increased a half foot and the width is now 300 feet.

Plans are under way to tow a sea-

INDICATE DUPLICATION OF THE 1913 OVERFLOW

WACO, TEXAS, May 9.—The Brazos river 78 feet above normal here and rising rapidly at 10 o'clock. CONSIDERABLE DAMAGE TO CROPS IN ELLIS COUNTY

WAXAHACHIE, TEXAS, May 9.—Streams in this section flooded by excessive rains have resulted in much damage to crops, according to unofficial reports and an unverified rumor had one unidentified man drowned near here. Bridges, just re-

placed after destruction by the high waters of two weeks ago, have been washed away. It is said. Trains and inter-urban service to Dallas, Waco and other points is suspended. Nine hundred feet of track is reported washed out on the Dallas inter-urban line.

SHERMAN, TEXAS, May 9.—Five steel bridges in the western and northern parts of Grayson county have been washed away, according to reports here. Five inches of rain has fallen here since Sunday.

PROVES BENEFICIAL TO THE CHANNEL AT THE MOUTH

GALVESTON, TEXAS, May 9.—Floods in the Brazos river have proven beneficial to the channel at the mouth of the stream at Freeport, according to United States engineers. Before the recent flood the channel over the bar at Freeport was barely 17 feet deep and 100 feet wide. Since the recent flood the depth has increased a half foot and the width is now 300 feet.

Plans are under way to tow a sea-

INDICATE DUPLICATION OF THE 1913 OVERFLOW

WACO, TEXAS, May 9.—The Brazos river 78 feet above normal here and rising rapidly at 10 o'clock. Advice from above indicates a duplication of the 1913 overflow when it submerged nearly all of East Waco. At Granbury the river was higher this morning than since 1913 and still rising. At Glenrose an eight inch rain fell yesterday. At Kopper the river was ten feet higher than in 1913, but was falling. A six inch rain had fallen there. At Whitney the Brazos bridges was submerged. The Brazos river at Valley Mills and Clifton was higher this morning than it had been in nine years.

TRAFFIC BETWEEN DALLAS AND CORSIANA SUSPENDED

CORSICANA, TEXAS, May 9.—All traffic over the Houston and Texas Central railroad and the interurban line has been suspended between Dallas and Corsicana due to washed out bridges between Garrett and Monroe. Three bridges are reported out on the interurban line and one electric train is reported marooned between two washouts.

EXHAUSTED NERVE FORCE CAUSES THOUSANDS TO MAKE FAILURES IN LIFE

Doctor Tells What To Do

When your nerve force becomes weakened, all the vital organs of your body lose their normal strength and vigor, and as a result, all kinds of alarming symptoms may appear, such as nervous irritability, heart palpitation, indigestion, pains in the front or in the back of the head, worklessness at the base of the brain, and a general weakened, run-down condition. In such cases it is worse than foolish to waste your time taking stimulating medicines or narcotic drugs. Your starving nerve cells must have more nerve force, the same as a starving person must have food. This is best accomplished by increasing the activity and power of the nerve-force-making organs. This can be done by the use of a medicine which not only increases the activity of the blood-making organs, but it feeds true red blood food directly to the blood itself, thereby helping to create millions of new red blood cells. This wonderfully increases the power of the blood to help manufacture new nerve force, and even enriching the soil increases its power to grow more wheat, corn or oats.

If you are suffering from nerve force exhaustion, you can quickly and easily prove to yourself the power of Sustained Iron to help overcome your condition and make you strong and vigorous again by the following simple test: Make a written memorandum of all your symptoms before you start, then at the end of two weeks, go over your symptoms again and place a check mark after any that are left, and you can see at once what has been done for you. If you have not obtained most surprising results, all the same, more than you expect, the manufacturer will promptly refund your money—adv.

\$4,000.00 in 4 Days! Wednesday, Thursday, Friday and Saturday

HOW CAN WE DO IT?—THE ANSWER IS EASY—JUST READ THIS AD

The Greatest Sensational Clean-Up Sale Ever Here

THE WOMAN'S PAGE

All County Vets Invited to U. C. V. Picnic Saturday

All Confederate veterans of Wichita county are invited to the picnic to be given in their honor by the Daughters of the Confederacy at the home of Judge and Mrs. A. H. Brittain Saturday afternoon, and this notification is made in lieu of invitation, a number of the veterans' addresses not being filed with the Daughters.

BAPTIST CIRCLES HELD STUDY MEETING MONDAY

The First Baptist Mission circles met in regular session Monday as follows:

Circle Two met with Mrs. I. A. Farris, with Mrs. Farris leader of the Bible study, at Mrs. A. G. H. Brittain. During the business meeting reports were given and plans discussed by the following who were present: Madames A. G. H. Brittain, Will Barker, C. F. Milliron, Fred Morris, W. C. W. Brown, W. W. Murphy, J. L. Maxwell and Farris.

Circle Three met with Mrs. Leale Humphrey with six members present. Mrs. Finley led the devotional and Mrs. Jones the Bible study. The meeting closed with a prayer by Mrs. Walter Robertson.

Circle Four met with Mrs. T. M. Murray of Bluff street with eight members present. Mrs. W. L. Robertson conducted the Bible study, and the circle adopted a motion to set aside as Buckner's orphanage month, during which to sew and make collections for the orphanage. The personal secretary department under Mrs. E. Y. Hall's direction made a splendid report.

Circle Six met with Mrs. Gene Lynskey on Eleventh street. The meeting opened with prayer by Mrs. George Bowden, during which Mrs. G. H. Watson led the lesson. Plans were made for an all day meeting Thursday, May 11, at the home of Mrs. C. W. Smith, 1102 Denver, to sew on clothing for Buckner's orphanage. Those present included Madames G. H. Watson, R. V. Lester, L. V. Smith, E. W. Walker, Lynskey, George Bowden, J. L. Fox, O. W. Smith, J. M. Martin, James King, F. D. Stout, Bert King, W. E. Miller, J. L. Elson and W. F. Ferguson.

Circle Seven met with Mrs. Karenbrock with six present. Mrs. Karenbrock led the devotion and an interesting lesson was enjoyed.

Circle Eight met with Mrs. George Howery with Madames T. P. Duncan, E. Y. White, A. R. Cation, C. J. Barnard, McCurdy, F. M. Tuttle, McCarty, B. M. Hester and J. E. Ware present. Mrs. Tuttle conducted the Bible study and several freewill offerings of \$2.45 was taken up.

TWO DIVISIONS MET CHRISTIAN MISSION MEET

Two divisions of the First Christian church met Monday afternoon, the other division meetings being postponed for various reasons, several on account of deaths and illness.

Division One met with Mrs. Effie Curtis. Mrs. Keevil led the devotion and Mrs. Fox made a brief talk on America's attitude toward the conference. The meeting closed with a prayer by the following: Madames Christensen, Anderson, Keevil, Fisher, Thurman (guest), Downing, E. E. Walker, N. E. Rigdon, Fox, Farmer and F. E. McConnell.

Division Six met with Mrs. Shivers and an interesting program was very enjoyable. Mrs. Hollingsworth a reading and Miss Hollingsworth a piano solo. The department decided to make robes for the hospital, which are needed, and several garments for the bazaar. Those present included Madames Patton, Jarvis, Ray, McGrath, Wideman, Gray, Miller, Ferguson, Boyd, Hays, Russell, Henry and Rogers and Mrs. Charles Sloan, a guest.

QUEER FEELINGS AT MIDDLE AGE

Women Should Know how Lydia E. Pinkham's Vegetable Compound Helps at This Trying Period

Sheboygan, Wisconsin. "I was run down, tired and nervous. I could not sleep at night and all kinds of queer thoughts would come to me. Finally I gave up going to the doctor and a friend told me of Lydia E. Pinkham's Vegetable Compound. After the first bottle I could sleep better and I have kept on improving ever since. I have taken several bottles now and am so happy that I am all over the bad feelings."—Mrs. B. LANSER, 1630 N. 3rd St., Sheboygan, Wisconsin.

For the woman entering middle age Lydia E. Pinkham's Vegetable Compound can be of much benefit. During this time of life certain changes take place which sometimes develop into serious trouble.

Melancholia, nervousness, irritability, headache and dizziness are some of the symptoms. Lydia E. Pinkham's Vegetable Compound is a natural restorative, especially adapted to assist nature in carrying you safely through this time. Why not give it a fair trial?

BEWARE OF THE POKE, OR IT WILL BETRAY YOU!

Three faces framed in the same poke bonnet. Of the three Hope Hampton alone (center) has the face that fits well into the frame.

A hat may make or mar the beauty of the most beautiful. And there is much chance that it will do the latter in this season's plethora of designs unless Madams Fashionable takes care.

The poke is, of all hats, the most dangerous.

Only the face which is roundly lovely and has something of childlike about its beauty can wear such a hat.

Here with is a study of faces framed in a study of faces. Faces at the right and left are quite unsuited to this frame, but in the center the round face, pliant nose and general childlike about the members of the Alamo Home and School council have been offered for the best ticket selling reports—some \$50 rise from the council to the Alamo school child who sells the most, and one of a like amount from Miss Knickerbocker to the member of her classes who sells the most. In addition, every child who sells as many as ten tickets will be given one free. The admission has been placed at 50 cents.

A Costume Feast.

The children, in the cast and choruses of the pageant will present a regular costume feast, and work has already been begun on many of the pretty things. Costumes as nearly as possible identical with the best picture-making of the much-beloved story-book people—Little Red Riding Hood, Bo Peep, Little Boy Blue, Old Mother Goose and dozens of others, with Cinderella, Snow-White and the dwarfs, Prince Charming, the Sleeping Beauty, and the like, will be given through the immortal tales of childhood. Will be used. Special scenery is being designed and made for the pageant, and the little folks have begun rehearsals of their parts.

"Trip to Story-Book Land" Will Engage Talent 100 Little Folks

The historic ability and engaging attractiveness of one hundred Wichita Falls little folks will be employed in the presentation on the evening of May 26 of a fairy-tale pageant, "A Trip to Story-Book Land," at the First Methodist church, south.

The pageant will be presented under the direction of Miss Almada Knickerbocker as a benefit for the playground fund of the Alamo Home and School council, and will also combine Miss Knickerbocker's annual spring recital of her own expression class. Forty little folks of the latter will take leading parts in the pretty pageant and the remainder of the group will be drawn from the Alamo school primary children. The play will present more little folks in an all-child cast, it is believed, than has ever been presented here before, the most children used in a previous production with such a case having been in Mrs. E. L. Fulton's staging of "A Garden Cinderella" with between fifty and seventy-five talented little folks. The "Garden Cinderella" was presented as an Austin school benefit at a morning matinee following its "first night," and its rousing success as an all-child production promises well for the "Trip to Story-Book Land" this month.

All of the proceeds of the play, above expense, will be turned over to the Alamo playground fund, and the members of the Alamo Home and School council have organized a ticket-selling campaign with J. E. Park, principal of that work, in charge. Prizes have been offered for the best ticket selling reports—some \$50 rise from the council to the Alamo school child who sells the most, and one of a like amount from Miss Knickerbocker to the member of her classes who sells the most. In addition, every child who sells as many as ten tickets will be given one free. The admission has been placed at 50 cents.

ADVENTURES OF THE TWINS A QUEER KING

By OLIVE ROBERTS BARTON

"Here we are," said the dove, fluttering to the top of the gate that led into King Verdo's palace. "I may not go any further with you. You will have to finish your errand alone."

"But will you wait to guide us back again to the seven valleys?" asked Nick.

"I shall wait, but you will need no guiding," answered the dove. "You will not need to go back over the seven valleys—nor even the seven mountains. It was only necessary for you to make the trip once on foot. Returning, you may wish yourselves there in your magic Green Shoes. I shall fly with you, for I wish to see who is to marry Princess Therna. She is my mistress, you know, and I love her dearly."

"What's all this talking about?" asked a new voice suddenly. "Here I was, enjoying a nice game of croquet by myself in my flower garden and having everything peaceful and quiet, when I'm disturbed by two prattling children and a noisy dove. Who are you?"

"We're Nancy and Nick, the Twins," replied Nick. "All we came to see King Verdo. The dove is our friend."

"Did you say King Verdo?"

"Yes," nodded Nancy.

"Well—I'm him, no, he. Him, he, he, him, him, he!" went on this curious person thoughtfully. "No, I'm not either him or he. I'm he, he went on. "I'm King Verdo."

"Oh!" cried Nick.

"Oh!" cooed the dove.

They were all most astonished at so unkingly looking a person with such unkingly manners.

"Why are you when one would do?" asked the king.

"Kings are three times as important as other people," said Nancy quickly.

"This put King Verdo into a very good humor. "That's so!" said he amiably. "Come in."

OUR FIRST YEAR

CHAPTER XXIV—MARY SMITH ADVISES.

By a Bride

Once and only once did Jack and I discuss our first quarrel. He had not intended to offend me by his order, "Come back here!"

He had surmised that I was deeply hurt by his visit to Mrs. Herrod; he imagined that I was running away from him, and his stern tone and abrupt command were due to his distress and nervousness.

I confessed that my feelings had been terribly lacerated by visions of his game with the beautiful blonde widow; I saw that I was wrong, that I was proving myself unable to live by our futurist radical rules for mutual freedom after marriage.

"You proposed it, Peggina, you know! I admit the theory sounds sane, but isn't it possible that it conflicts with human instincts?"

"I wonder!" I replied. "For really, Jack, I'm getting to be just as jealous as any old-fashioned wife dominated by Mrs. Grundy!"

"Looked at so, I guess we'd better revise our contract."

"Are you never jealous, Jack?"

"I don't think so—I don't think so."

"Then—then we won't revise it!" Alone, I meditated upon the situation. Was jealousy unescapable for the wife?

Jack didn't care whether or not I played love scenes with Bert at the Little Playhouse. Was he not vastly different from most men?

This was all too intimate to discuss with the girls, but I described to them the exciting scene in the park.

"So Jack played the cave-man," commented Jeanne. "He pursued you—laid low your assailant—carried you back home in his primitive style!"

"And might have been shot for his pains!" Mary Smith, the practical, reminded us. "And if he'd been killed, Peg, it would have been your fault."

"Seems to me Jack won every way," Jeanne meditated.

"He did!" was Mary's decision. "A man usually does when a wife sets out to discipline a husband. Peg, you might as well learn now, at any time that you'll never get anywhere with a husband by disciplining him."

"Reforming a husband seems to be a good deal like reforming a criminal," laughed Jeanne, the cynic. "You can't punish humans into being good. Try kindness, Peg. Try to understand Jack!" This from Jeanne was sarcasm.

Brief News Items

The Exclusive Social club will meet Wednesday afternoon with Mrs. Dave Shepherd, 1613 Thirteenth street, at 3 o'clock. All members are invited to be present.

A THOUGHT FOR TODAY

For lo, the winter is past; the rain is over and gone; the flowers appear on the earth; the time of the singing of birds is come.

Sweet daughter of a rough and stormy sire,
Hoar Winter's blooming child, delightful Spring!
Whose unborn buds with leaves
And swelling buds are crowned.

—Anna L. Barbauld.

STANDARDIZATION IN INDUSTRY.

Will standardization in industry destroy the skill and ingenuity of the American workman?

Will it make of the American workman a mere machine doing his work mechanically and without interest in it?

If you have ever visited a great automobile factory or many other of our modern industrial plants this question must have arisen in your mind.

In many of our great automobile factories men stand beside a moving belt all day long, turning a screw, a bolt, striking with a hammer, putting on a wheel or some other mechanical act requiring no particular skill and certainly without much interest to the workman.

In many other industrial plants men are as nearly like machines as they are in some of the automobile factories. In them there is little that calls for skill or that appeals to the imagination or other intellectual powers.

A man might work for years in one of these plants without becoming proficient in any trade. In fact, it looks like the machine-like nature of his work would eventually destroy his capacity for creative work.

A good many workmen who lost their jobs during the recent depression in which many big automobile factories and other standardized plants closed down found that they were without a trade or without training for other than their routine jobs.

Henry Ford, the great automobile manufacturer, has realized that there can't be much inspiration from the work in many departments of his great plants, so he is providing schools and many other diversions for his workmen and is giving them short hours so that they can keep themselves refreshed.

At best this can be but a substitute for the interest and inspiration that a skilled workman receives from his creative work. For there still be abundant opportunities for such workmen and may their number increase.

Standardization gives us a good and cheap product. It benefits everybody but the workman engaged in the industry. Henry Ford and others of the great standardizers may find a way to make it beneficial to the workers themselves.

But there is another kind of standardization that will benefit everybody including the workman. Several of such standardizations would benefit the printing industry. Pick up almost any two daily papers and you will find them of different lengths and widths. This means special sizes in the presses and adds to the stocks of sizes that must be carried by these manufacturers, adding to the capital necessary to carry on the business and increasing to some extent the cost of the product. Presses and paper sizes could be standardized to one tenth the number now used and could serve all purposes as well as the large number of sizes now in use.

This is true in a great many industries and the standardization would not take anything away from the skill or the interest of the workman in those industries.

The Department of Commerce of the federal government has a commission composed of engineers and experts studying these problems and this commission is from time to time making recommendations to various industries. Their work is designed to promote economy and efficiency. They are performing a useful service.

RADIO MOVIES.

Is the day close at hand when moving picture films will be broadcasted by wireless, enabling families to have the best movies right in their homes on a sheet pinned to the wall?

Impossible, you say? Your ancestors said the same thing about the steam railroad, telephone, phonograph, movies, wireless and autos when these inventions were first predicted by clairvoyant visionaries.

C. Francis Jenkins has successfully made the first step toward radio movies.

He exhibits photographs of images, which he transmitted by wireless during his experiments.

This happens in the laboratory of the General Electric Company, at Lynn, Mass., during the annual convention of the Society of Motion Picture Engineers.

Thirty-two years ago, Elisha Gray invented the telegraph. This instrument reproduces handwriting and drawings at a distance, electricity doing the transmitting. Maybe you have seen telephone girls in big hotels use such a device, writing an order on a pad before them, while the writing is simultaneously duplicated by a machine in the kitchen.

This copying telegraph apparatus was expanded into a photograph-sender in 1906 by Carboneilli, the Belgian, who had great success at telegraphing pictures by a system of reproducing dots of black, same as the tiny dots you see all over photographs in newspapers.

Telephotography is extremely complicated. But what its students have in mind has spread out among the people as a vague dream of an attachment by which you would look into a glass and see what the party was doing at the other end of the telephone wire.

Did you ever see a mirage? If not, you know about them—the appearance in the sky of a perfect picture of some distant city, lake or mountains.

That is one of nature's ways of broadcasting pictures.

When you watch the movements of people or objects, you are seeing nature's original wireless-movie system—and it's all as mechanical as operating a camera.

The principle of radio movies exists in nature. That inventors may learn how to copy nature and send movies by wireless, requires no great stretch of the imagination. It may not come in our day. But it will come eventually.

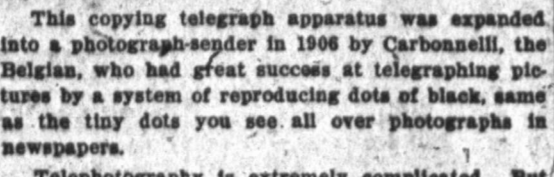

In a movie theater, light waves transmit a moving-picture from the projecting machine to the silver screen, usually about 75 feet. The powerful Hertzian waves may extend that 75 feet to thousands of miles.

Some of these new drivers think a train should take to the woods when it sees them coming.

When a politician sits on the fence you can tell where he stands by watching where he lies.

YOU AND I

By ALBERT APPLE

STRENGTH
An insane woman escapes from the asylum at Poughkeepsie, N. Y. When captured, she has walked 40 miles in one day.

Such spurts of energy are common among the insane. It often requires half a dozen strong men to overpower a maniac and get him into a padded cell.

Take a sane man, a weakling, who cannot lift 100 pounds. Five minutes later, if he suddenly goes crazy, he can easily lift 400.

Strength of muscle and power to accomplish are largely matters of confidence. Weakness is lack of confidence, fear—all in the imagination. You are what you think you are, so more, only occasionally less.

MOTHERS
Fraufru Gertrude Beer arrives from Germany, imported by American women's pacifist organizations.

The lecture, "The woman who ends war is up to women." "A man system controls the world. Women must sacrifice the home to bring about world peace principle. Our supreme principle should be the sacredness of life."

This is a beautiful sentiment. But the quickest way for women to end war is to stop giving their children toy guns and other playthings that awaken the biological instinct for war.

Especially admirable for simplicity, directness and common sense. It was not boastful in any respect, and the home more spiritual than the camped were merely candid evidence of sincere faith. Women are taking part in public affairs, not to revolutionize the world, but as she stands, to make politics, government, manking better. They are interested in great questions, not to abandon the home, but to improve it.

HYPOCHONDRIA
Ralph H. Seaman, freshman at New Hampshire college, got interested in hypochondria and tried it in his room-mate.

It worked so well, in fact, that Seaman couldn't bring his subject out of the hypnotic trance. Druggists and physicians finally wakened the victim from his convalescence to end war is to stop giving their children toy guns and other playthings that awaken the biological instinct for war.

Student Seaman says he is through with hypochondria.

Whether you believe in the occult or not, it is a dangerous business to monkey with hypochondria and psychic research have their scientific value. Like dynamite, they are risky for amateurs, especially in effects on imagination.

DANDELIONS
The crop of dandelions is phenomenal this year—in most parts of the country. Home brewers, gleefully filling their baskets, will chuckle that nature in this instance lines up against prohibition.

Back of this is an interesting piece of vegetable-world biology. The "dandelion" family has been discovered what amounted to a national campaign to exterminate it by robbing it of the blossoms that play "actors" in its continuation.

So the dandelions, fighting back, produce an exceptionally big crop of flowers. Some may scoff at the idea, but it is scientific fact—a working of the instincts of self-preservation and self-propagation. That's why it is so hard to kill weeds.

ART
European artists believe that the United States is on the verge of a great artistic awakening.

"It would develop normally with culture," says William H. Fox, director of the Brooklyn Museum. "Indications are, it is coming fast. As a reaction from the war, widespread interest in the best art works is rapidly developing. Attendance at the Metropolitan Museum of Art has doubled in the last year."

This is both good news and bad. When a civilization develops a great artistic culture, it is ripening to decay.

Fear not, however. It'll be a long time before statues and oil paintings attract as big a crowd as Charlie Chaplin's custard pie.

Frenchman has invented a means of using the leaves and fibrous stems of banana plants as a substitute for flax.

JUST FOLKS

By Edgar A. Guest

THE BANDED TEETH.
When I go back to school again
You bet the kids will look at me,
And I will be a hero then,
With something they will want to see.

My ma, she took me down today
To where the dentist is and told
Him to get busy right away,
And now my teeth are wired with gold.

I've got a hand all looped around
My mouth to hold my teeth in place,
And when I talk a funny sound
Like hissing comes out of my face;
And there's a little screw back here
Which he can turn to make it tight,
And he says it will be a year
Before my teeth are fixed all right.

My pa says not so long ago
Teeth just grew anyhow they could;
If they were bad, they didn't know
There was a way to make them good,
And that's why his buck tooth is plain
Cuz it got crowded out of line,
And never could get back again,
But now I've got a band on mine.

When Jimmy first put glasses on
The kids all flocked around to see
And he just let 'em, every one,
Look through 'em. Now they'll come to me
Cuz I've got something I can show
And talk about that's just as grand
As glasses are, I'd have 'em know.
Inside my mouth I've got a band.

SMILE A WHILE

By TOM SIMS

A Borneo explorer says he has found a race of people with tails; but this may be one of them.

Worse thing about the movies are the people who eat onions.

In a few more weeks now we will smear it all up and say, "Well, there's our inkum tax again."

Health hint: Men who can't fight should not have bad tempers.

Some of these new drivers think a train should take to the woods when it sees them coming.

When a politician sits on the fence you can tell where he stands by watching where he lies.

Texas Viewpoints

Abilene Reporter: Some cartoonist depicted the fate of an ordinary citizen who refused to tell his family that he had seen and talked with long-dead relatives, through the medium of spirits. The unfortunate was sent rushing off immediately to the booby-hatch. Then the cartoonist depicted a big crowd who had paid good money to hear Mr. A. Conan Doyle, who was talking with the dead, and exhibit pictures of himself with spooky figures at his shoulder. The point is that some people can see away with spirits others can't. Mr. Conan is reported to have been leery of accepting the ghostly manifestations of a certain Boston medium, on the ground that everything she did could have been done by external force, or telepathy. But he was wholly convinced when she uttered a word in Latin which he recognized as the first word of the Oxford motto, where his son, now dead, had been educated. He was so convinced that his son was "on the wire." Which calls to mind that the famous Harry Houdini, the handcuff king and escapologist, offered to bet ten thousand dollars that he could duplicate any mediumistic feat ever recorded, and do it, by employing nothing but the ordinary methods of the sleight of hand artist. So far no one has called his bet.

Denton Record-Chronicle: Over in Wichita Falls the city government is testing out gas meters for accuracy of measurements. The results are interesting. When a Wichita Times reporter investigated the testing of machines had been handled. Only 75 were measuring faster than the gas went through them, but 15 of these came within the two per cent variation permitted by city regulations. Sixty were more than two per cent fast. Ten of the fast meters were more than 10 per cent fast and one was over 20 per cent fast. Settlement with the gas company on the basis of the city's tests is to be made between patron and contractor. One of the articles of the Denton city charter provides that meters are subject to measurement at any time by the city. Possibly it is a good idea for Denton's city government to emulate the Wichita example, which includes water as well as gas and which here would include electricity meters. Five meters were tested at Wichita and one was found fast.

Sherman Democrat: If it was opportunity that led Lady Astor, formerly Nancy Langhorne of Virginia, into the British parliament, the cleverest move she had made was displayed in her address and interview with the press. She is reported to have said that she is a native land show that she is capable of being a better citizen than the average. Opportunity is of no value unless it is employed successfully. The speech which Lady Astor delivered in the House of Commons was especially admirable for simplicity, directness and common sense. It was not boastful in any respect, and the home more spiritual than the camped were merely candid evidence of sincere faith. Women are taking part in public affairs, not to revolutionize the world, but as she stands, to make politics, government, manking better. They are interested in great questions, not to abandon the home, but to improve it.

Will standardization in industry destroy the skill and ingenuity of the American workman? Will it make of the American workman a mere machine doing his work mechanically and without interest in it? If you have ever visited a great automobile factory or many other of our modern industrial plants this question must have arisen in your mind.

In many of our great automobile factories men stand beside a moving belt all day long, turning a screw, a bolt, striking with a hammer, putting on a wheel or some other mechanical act requiring no particular skill and certainly without much interest to the workman.

In many other industrial plants men are as nearly like machines as they are in some of the automobile factories. In them there is little that calls for skill or that appeals to the imagination or other intellectual powers.

A man might work for years in one of these plants without becoming proficient in any trade. In fact, it looks like the machine-like nature of his work would eventually destroy his capacity for creative work.

A good many workmen who lost their jobs during the recent depression in which many big automobile factories and other standardized plants closed down found that they were without a trade or without training for other than their routine jobs.

Standardization gives us a good and cheap product. It benefits everybody but the workman engaged in the industry. Henry Ford and others of the great standardizers may find a way to make it beneficial to the workers themselves.

But there is another kind of standardization that will benefit everybody including the workman. Several of such standardizations would benefit the printing industry. Pick up almost any two daily papers and you will find them of different lengths and widths. This means special sizes in the presses and adds to the stocks of sizes that must be carried by these manufacturers, adding to the capital necessary to carry on the business and increasing to some extent the cost of the product. Presses and paper sizes could be standardized to one tenth the number now used and could serve all purposes as well as the large number of sizes now in use.

This is true in a great many industries and the standardization would not take anything away from the skill or the interest of the workman in those industries.

The Department of Commerce of the federal government has a commission composed of engineers and experts studying these problems and this commission is from time to time making recommendations to various industries. Their work is designed to promote economy and efficiency. They are performing a useful service.

Impossible, you say? Your ancestors said the same thing about the steam railroad, telephone, phonograph, movies, wireless and autos when these inventions were first predicted by clairvoyant visionaries.

C. Francis Jenkins has successfully made the first step toward radio movies.

He exhibits photographs of images, which he transmitted by wireless during his experiments.

This happens in the laboratory of the General Electric Company, at Lynn, Mass., during the annual convention of the Society of Motion Picture Engineers.

Thirty-two years ago, Elisha Gray invented the telegraph. This instrument reproduces handwriting and drawings at a distance, electricity doing the transmitting. Maybe you have seen telephone girls in big hotels use such a device, writing an order on a pad before them, while the writing is simultaneously duplicated by a machine in the kitchen.

This copying telegraph apparatus was expanded into a photograph-sender in 1906 by Carboneilli, the Belgian, who had great success at telegraphing pictures by a system of reproducing dots of black, same as the tiny dots you see all over photographs in newspapers.

Telephotography is extremely complicated. But what its students have in mind has spread out among the people as a vague dream of an attachment by which you would look into a glass and see what the party was doing at the other end of the telephone wire.

Did you ever see a mirage? If not, you know about them—the appearance in the sky of a perfect picture of some distant city, lake or mountains.

That is one of nature's ways of broadcasting pictures.

When you watch the movements of people or objects, you are seeing nature's original wireless-movie system—and it's all as mechanical as operating a camera.

The principle of radio movies exists in nature. That inventors may learn how to copy nature and send movies by wireless, requires no great stretch of the imagination. It may not come in our day. But it will come eventually.

In a movie theater, light waves transmit a moving-picture from the projecting machine to the silver screen, usually about 75 feet. The powerful Hertzian waves may extend that 75 feet to thousands of miles.

CATARRH

By DR. R. H. BISHOP.

Just what do you mean by catarrh? This word is one of the commonest in use today for describing certain indefinite ailments that people are afflicted with.

Popular usage has transformed the word from a scientific medical term to a loosely-used, indefinite and often misleading descriptive. The term originated in the days when physicians and medical practice was young. Physicians at this time believed disease due for the most part to the conditions of the fluids or humors of the body. Thus catarrh, originally, was not a symptom.

To Give an overtaxed and tired system a night of refreshing rest, tomorrow is the work of Dr. Williams' Pink Pills. Nature's Remedy keeps body functions regular, improves appetite, relieves constipation. Shred for every one.

Bankrupt Sale

TO THE PUBLIC!
Please Take Notice, Folks:
Every sale we make during this SALE must be final. We positively will not EXCHANGE, REFUND, SEND ON APPROVAL or CHARGE any article whatever.

Beginning this
Wednesday
morning, May 10th

-it's the big
-Baum & Gardner
-stock

'Comonsense'

Two weeks ago Mr. W. A. Ballard of the W. A. Ballard Company personally attended the receiver's sale of the BANKRUPT STOCK OF BAUM & GARDNER. Prior to the hour set for the sale of this stock, Mr. Ballard in company with special representatives made a thorough investigation of the \$100,000.00 worth of merchandise inventoried in this big stock. His investigation revealed the fact that the makers of the BEST WEARING APPAREL IN THE WORLD had permitted a BANKRUPT SALE of their standardized lines. This is something that very seldom happens for in most instances such manufacturers intercede when financial matters become serious with a merchant, thus avoiding court proceedings and preventing their lines of merchandise from being thrown upon the markets for disposition by BANKRUPT PRICES. In this particular instance AMERICA'S FOREMOST PRODUCERS of Men's and Women's Wearing Apparel and Shoes failed for some reason unknown to protect their lines and as a result the BUYING PUBLIC of Wichita Falls and all of North Texas have the opportunity to participate in one of the most unusual SALES ever inaugurated in this section of the State.

The most gigantic merchandising event ever inaugurated in the whole of North Texas. Involving a little over \$100,000 WORTH OF THE BEST MERCHANDISE IN THE WORLD. A sale that will command the attention of the buying public within a radius of over 100 miles. A sale conducted on a high plan of merchandising. People, this is the greatest opportunity ever presented to you. Just think of it—OVER \$100,000 worth of Men's and Boys' Clothing, Shoes, Hats and Furnishings, Ladies' Ready-to-Wear and specialty lines thrown out on the BARGAIN COUNTERS in what is destined to be the MOST SENSATIONAL SALE ever inaugurated in NORTH TEXAS. Every item in the tremendous BAUM & GARDNER STOCK to be offered at prices that are seemingly ridiculous. Clothing of the highest grade sacrificed. Men's fine Shoes unmercifully slaughtered. Ladies' Ready-to-Wear at almost unbelievable prices. An event that merits the serious consideration of every man and woman in North Texas. Don't fail, folks, to take advantage of this golden opportunity. Come to this great SALE with the expectation to BUY. Once you see with your own eyes the BARGAINS we offer, you cannot resist BUYING. No man or woman who contemplates the purchase of any wearing apparel can afford to pass this opportunity. COME and BUY everything you will need for many months. It's the best opportunity you will ever have.

\$100,000 Worth Merchandise Slaughtered
\$50,000 Worth Ready-to-Wear
\$50,000 Worth Men's Clothing, etc.

\$50,000 worth of the best Ready-to-Wear in the world to be unmercifully slaughtered in this gigantic BANKRUPT SALE. Every garment must be sold, finest tailored Coat Suits, wonderful Dresses of Silks, Blouses of every description, thousands of dollars worth of finest Silken Undergarmentry, the season's most advanced style creations in Millinery, in fact, everything one finds in an exclusive woman's store here, all to be sacrificed in this tremendous outpouring of merchandise.

Hart Schaffner & Marx Clothing, Stetson Hats, Nettleton Shoes, Manhattan Shirts, Wilson Bros. Furnishing Goods, these are some of the lines represented in the Baum & Gardner Bankrupt Stock. Every line representing some of America's foremost and most reputable manufacturers. All to be unmercifully slaughtered in this gigantic Bankrupt Sale. Men, there is here for you a complete stock of everything at prices that you never dreamed this merchandise would be offered for. This is your chance.

DUTIES OF CITIZEN SUBJECT OF TALK AT UNIVERSITY CLUB

DR. T. S. PITTENGER SAYS RESPONSIBILITIES CANNOT BE SHIRKED.

S. A. L. MORGAN SPEAKS ON TARIFF QUESTION

Points Out Danger Of Protection - Asks Local Friends to Give Hearty Support.

A brief address on "Citizenship" by Rev. T. S. Pittenger and a short discussion of the tariff issue by S. A. L. Morgan, candidate for congress, featured the regular weekly luncheon of the University club in the Kemp hotel Tuesday noon.

Dr. Pittenger pointed out the necessary characteristics for good citizenship and after quoting several passages to bring out his points, said in part: Civic Obligations.

"The success of democracy is conditioned on the high quality of its citizenship. Carlyle's king is the strong man of his tribe, while in our country the citizen is king. This calls for a high order of manhood."

"The nation in intelligence, in moral and social qualities, in high character, in its legislatures and in its courts of justice will rise to no higher plane of excellence than is furnished by the average life of its citizenry."

"The founders of our republic had such qualities in large measure. Wise, sane, humane and unselfish purposes were the motives of the founders of the republic and they are worthy of undying historical eulogy."

"To overcome the perils of an ignorant suffrage, to get safely past their meshes, it is the task which puts the supreme test upon our national vitality."

"The ideal citizen is always a patriot. He is personally intelligent concerning his relation to his government. He is morally sensitive in his discharge of his political duties. Each citizen, with all his interests, material, intellectual and social, is inseparably bound up with the state. If he has property, the taxes which he must pay are decided largely by the honesty and efficiency of the community government."

"The sanitary conditions of the city, the quality of its streets and walks, the removal of garbage, the sufficiency and safety of sewers, the integrity and efficiency of the police force, the food we eat, and all other constitutions of life are under the direction of the citizenship of a community. The citizen is supreme."

"He is responsible for the kind of rule he is under from the smallest village to the extreme bounds of national life. If a city is ruled by a corrupt ring, whose fault is it? If improvements are made doubly expensive by grafting, who is to blame?"

"Intelligent and alert discharge of civic duties on the part of all citizens would banish political grafting from public office. The citizen who neglects his political duties is defrauding himself."

"A community is no better than the members who compose it. It is a nation, intellectually and morally, is no better than the whole body of its citizens. Every citizen owes a high personal character to the commonwealth. A single vicious character is a source of danger to any community. By all his influence, he lowers the moral and spiritual tone of society. An evil minded citizen is an inevitable corrupter of men, women and children. He cannot avoid it. So in our democracy, if every citizen, however humble, his sphere, owes his best possible self to the community, state, nation and to all people."

Asks Local Support. Mr. Morgan stated that he felt sure of his election if the people of Wichita Falls would stand by him and turn out in large numbers to vote. He has no fear of the outcome if the citizens of Wichita Falls will do their part. He declared that a general review of the situation to date showed that he was sure of every county in this district except Wichita and Wise.

Wichita Falls will have a representative of its own in congress, if its citizens will only give the enough support to overcome Wise. I hope that they do not go to sleep and forget about the election Saturday," he said.

The local candidate discussed a few phases of the tariff question briefly, pointing out that the United States did not need a protective tariff. To bring out his point he told of his trip to Europe when he saw a Singer sewing machine in a shop in Rome which was selling for \$85 and a McCormick mowing machine in Germany which was selling for \$45. Upon his return to this country he found that the sewing machine was retailing at \$95 and the mowing machine at \$125.

"Hence," he declared, "if the United States manufacturers can ship goods over there and then pay additional freight to the destination and still sell them cheaper than the goods of this country, they can compete with the foreign manufacturer here without any tariff."

Dr. Pittenger's address, stated that there were 100 cities within a 50 mile radius of Boston which had a population of over 100,000, and the 50 per cent of the number could not speak the English language. Mr. Morgan used this statement to show that the New England market for cotton, Texas platform, because Europe is financially prostrate. American concerns are loaded up and there is no market for the cotton. Europe cannot send goods here in exchange for the cotton because of the tariff. Europe will not always have to come to the United States for cotton. She will go to the country which gives the the square deal. She won't send empty ships over here to load up with cotton, wheat and meats if she can send loaded ships to some other country and bring back a load. She certainly won't do it with a tariff. Mr. Morgan stated that he had no personal interest in the campaign as one of his opponents had confessed to him to have.

Accompanied by Charles Angel, accompanied by Frank Lowe, were well received.

Indications were Tuesday morning that a big crowd of Wichitans would take advantage of Electra's hospitality Tuesday afternoon and attend the barbecue scheduled to be held on the Douglas lease at 5 p. m.

The Electra folks have extended an invitation to Wichita Falls folks in general and to all folks in particular. There will be oratory and acts in play. It is promised.

The barbecue is held to celebrate Electra's "Wonder week" in which four wells in the new deep sand were completed.

Don't waste your vote on Saturday, May 13. Cast it for S. A. L. Morgan, the only home candidate for congress who can win. (Political ad.)

NEW HIGH SCHOOL TO PROVIDE SPACE FOR 1500 PUPILS

BOARD APPROVES TENTATIVE PLANS OF ARCHITECT AT MEETING MONDAY.

BOND ISSUE TO TAKE 18 CENTS TAX INCREASE

Plans Provide For Educational Plant Complete and Modern In All Details.

With the acceptance by the school board Monday afternoon of tentative plans for the new high school and junior college building and with the \$250,000 school bond election set for next Saturday, the possibility of Wichita Falls having in the near future an educational plant commensurate with its needs was brought another step closer.

The board, after spending practically the entire day in consultation with William R. Ittner, specialist in school architectural work, accepted his plans for a three story high school and junior college building capable of accommodating 1,500 students and to cost in the neighborhood of \$250,000.

The plans as they now stand are of course merely tentative and will be all probably undergo a number of changes before actual construction work begins, but their general outline found favor with the board members.

On the outcome of the bond election Saturday now hinges the entire future of the project. If the election is successfully carried, and those in touch with public sentiment are confident that it will carry, the bonds must be sold and bids secured for construction work, all of which will necessarily require time and trouble. But the really big obstacles will have already been surmounted.

Mr. Ittner's report as submitted to the board went into detail on the plan of the building and showed, among other things, that the structure would provide complete scholastic and vocational facilities in the matter of class rooms, laboratories and study halls and gymnasiums, an auditorium capable of seating the entire student membership, a cafeteria able to serve 500 individuals, and proper recreation rooms for faculty members.

In closing his report the architect said the plan as presented contains a total of 2,100,000 cubic feet of space. Present building cost would warrant the assumption that it can be erected complete ready for its equipment for about 24 cents per cubic foot, or \$504,000. The equipment can be installed for \$75,000.

At the time for the new building has already been acquired by the board in the southwest portion of the city.

Fear expressed in some quarters that the bond issue would impose an additional heavy tax on the city property holders has been scouted by school officials, who estimate that an additional tax of approximately 18 cents on the hundred dollars would be sufficient to care for the issue. This would mean an ad-

ditional \$1.80 tax on the average taxpayer. Funds remaining over after the completion of the high school building are to be devoted to improvements in existing grade school buildings and for the purchase of additional real estate, it is said.

JUDGE BRITAIN TO SPEAK AT LIONS MEETING WEDNESDAY

Judge A. H. Britain will be the principal speaker at school lunch luncheon in the Kemp hotel Wednesday noon, his subject being "Our United States Supreme Court." He will tell something of its history and powers.

"The Roaring Lions," a male quartet recently organized by the club, will furnish musical entertainment for the day.

SCHOOL ORCHESTRA GIVEN HIGH PRAISE AFTER AUSTIN TRIP

High praise for the high school orchestra, which attended the interscholastic league meeting last week at Austin, is sounded in a letter from W. L. McGill, manager of the University of Texas "Longhorn Band" to Hubert M. Harrison of the chamber of commerce.

"It is a remarkable organization for a high school," said Mr. McGill. His letter follows:

"Dear Sir: May we get through you, congratulate the city of Wichita Falls on the excellent advertising which it received by virtue of your high school orchestra to Austin for the University of Texas interscholastic league meet."

"Two thousand delegates joined with 1,000 university students and the citizenship of Austin in hearing and heartily enjoying the concert of this organization."

"The Wichita Falls high school orchestra is a remarkable organization for a high school. It renders the most difficult music in an accomplished manner and its programs are highly entertaining. We were delighted to have the orchestra with us."

TO DECIDE SHORTLY IF JUNIOR COLLEGE STARTS NEXT FALL

Whether or not junior college work will be available in this city next September will be known within a few days' time.

Superintendent Lee Clark stated Tuesday in announcing that if enough seniors at present enrolled in the high school asked for junior college instruction it would be provided. Seventeen seniors have already indicated that they would take college work in the September sessions, and if another dozen or fifteen more agree to the same plan the school board will make provisions for them.

The courses to be offered will be governed by the requests of students themselves. The teaching force, each member of which must hold a masters' degree, can be utilized in teaching high school subjects as well, thereby eliminating much of the payroll cost.

Should the college course be installed, some alterations will be made at the present high school building and all classes held there until the new building is completed.

Questionnaires have been passed out to each member of the senior class asking for their attitude on the matter and the final result will be known in a short time.

SCIENCE TELLS US

By René Bache

Copyright, 1922, by Public Ledger Company

Here is machinery which extracts from coal the valuable by-products and from which we may begin to learn the lesson of anthracite conservation.

Why It May Become Illegal to Burn Coal

THE utilization of coal by-products had its inception 130 years ago, when a Scotch engineer named William Murdoch discovered that by distilling the fossil fuel he could obtain a gas that was an admirable illuminant.

From that epoch-making discovery sprang the utilization of what we call illuminating gas, which, taking the place of oil lamps, revolutionized lighting. The coke left over after the extraction of the gas was a valuable fuel, and municipal gas companies today derive a considerable fraction of their income from its sale. But within very recent years it has come to be known that coal contains other valuable by-products besides gas, and that these, if taken out by suitable chemical

the prediction that before very long the use of coal in a "raw" state—i. e., before its by-products have been extracted—will be forbidden by law.

When that time arrives, instead of coal, we shall burn coke and gas. Already, indeed, we are doing that very thing to a large and rapidly increasing extent. We are using the gas for fuel, as well as for lighting, to the great convenience and comfort of housewives; and, so for the coke, the popular prejudice against it will disappear when furnaces and grates are properly constructed for its consumption. In the meantime, "by-product" coke-ovens, designed and operated that the water thus stored in it can be used for running a turbine and generating elec-

for the recovery of the valuable ingredients from coal, are multiplying in number. Some of them, as part of their business, supply whole towns with illuminating gas. The process employed consists primarily in the distillation of the coal at high temperature in the absence of air, the volatile elements being carried off as vapors through pipes, for subsequent chemical treatment.

A plant of this kind is built on a huge scale, employing a great battery of distilling-ovens, into which the coal is poured from above. A powerful machine is used to push out of the ovens the exhausted coke, which, still very hot, drops into "quenching-cars," wherein it is cooled with water. It is then delivered to dumps, where there are facilities for feeding it to a belt conveyor that carries it to screens by which it is automatically sized into sizes.

The hot vapors from the ovens pass through water-cooled tubes, in which the

coal-tar, naphthalene and water are condensed. Subsequent processes are too complex for brief description. Suffice it to say that the coal-tar yields dyes, medicines and carbolic acid—the last an indispensable basis for explosives. Coal-tar is an excellent fuel, and is largely used in open-hearth furnaces of steel plants. Naphthalene is a source of important dyes, and is familiar to every housewife in the form of moth-balls.

Ammonia, separated from the vapors in the form of ammonium sulphate, which is a valuable fertilizer. From the sulphate commercial ammonia, which has so many varied uses, is obtained. Part of the gas produced by the plant is employed for heating the ovens.

One of the most important by-products derived from the coal is a light oil called "benzol," which yields drugs, dyes, and

photographic chemicals. It is, as everybody knows, a valuable motor fuel, entering into the composition of most of the mixtures used for driving automobiles. From a ton of coal two and four-fifths gallons of benzol suitable for motor fuel can be extracted.

Designs on Stone

A NEWLY patented method of cutting in paving fragments models of the letters or what not on the stone, forming an elastic composition around them, and, when the latter has had time to dry, attacking the stone with a sand-blast. The sand-blast destroys the models and bites away the composition. It is an idea of French invention, and has been adopted in the construction of a large theatre now approaching completion in New York. Replacing the old-fashioned "drop" of blue cloth, which playgoers are accustomed to accept as representing sky, it will give to outdoor scenes on that stage a really wonderful verisimilitude, for the electrician will be able to paint with light upon the horizon whatever effect he wishes, whether of dawn, bright day or moonlight, and, from the viewpoint of the audience, the outlook will seem to be limitless in extent. The typical modern theatre embodies and preserves many conventional ideas that ought to have been done away with long ago. One of these is represented by the stage boxes, seats in which, while always the highest priced, are perhaps the least desirable in the house. In the new playhouse here described there are no such boxes, the space they would ordinarily occupy being taken by two miniature stages. The actors, in response to applause, can step out upon these stages and bow, the time usually lost in raising and lowering the curtain being thus saved. The arrangement, furthermore, is such that when successful, in the case of a big spectacular production, the two minor stages can be utilized as extensions of the main stage, rendering available a platform the entire width of the building.

New Scenery Fools the Eye

NOT long ago, in one of the large cities, a restaurant was opened which attracted much attention on account of the scenic effect which it presented. Though actually situated in the middle of a crowded block, its interior appeared, as viewed by its patrons, to be a large roofed open space surrounded by a high garden wall, above which—i. e., between the roof and the top of the wall—there was nothing to be seen but the distant sky.

This pleasing illusion was produced by the use of a novel device called a "horizont"—a high wall (a few feet back of the counterfeited garden wall) which curved inward toward the top. This wall, a neutral gray in color, was "painted" sky-blue by illuminating it with suitably tinted electric lights invisible to the people in the restaurant.

It is an idea of French invention, and has been adopted in the construction of a large theatre now approaching completion in New York. Replacing the old-fashioned "drop" of blue cloth, which playgoers are accustomed to accept as representing sky, it will give to outdoor scenes on that stage a really wonderful verisimilitude, for the electrician will be able to paint with light upon the horizon whatever effect he wishes, whether of dawn, bright day or moonlight, and, from the viewpoint of the audience, the outlook will seem to be limitless in extent. The typical modern theatre embodies and preserves many conventional ideas that ought to have been done away with long ago. One of these is represented by the stage boxes, seats in which, while always the highest priced, are perhaps the least desirable in the house. In the new playhouse here described there are no such boxes, the space they would ordinarily occupy being taken by two miniature stages. The actors, in response to applause, can step out upon these stages and bow, the time usually lost in raising and lowering the curtain being thus saved. The arrangement, furthermore, is such that when successful, in the case of a big spectacular production, the two minor stages can be utilized as extensions of the main stage, rendering available a platform the entire width of the building.

Supplementing this contrivance is an orchestra pit, of the usual crescent shape, which is a hydraulic elevator. The musicians enter it at the basement level, and, when it is time for them to begin to play, they are lifted into the view of the audience. In the same way the whole apparatus, together with its occupants, can be lowered out of sight. If it be desired, the orchestra pit can be elevated to a level with the stage, serving as a forward extension of the latter.

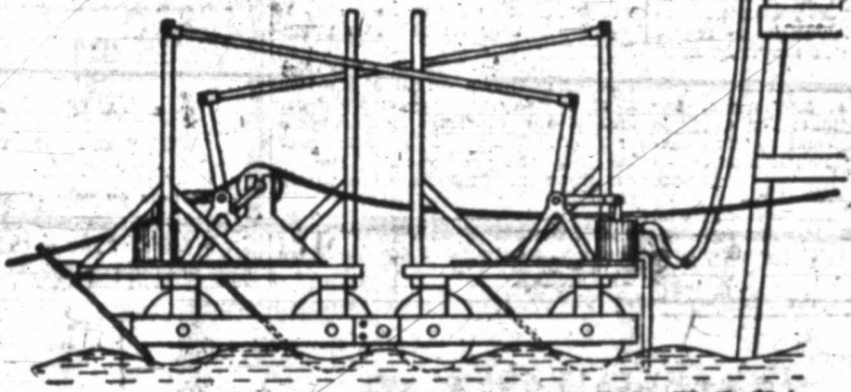

The stage manager and electrician in the new theatre will not be posted in the wings. They will be at the front and center of the stage, though seated below it, with only their heads protruding (through suitable openings) above the stage level. Their heads will not be visible to the audience, because hidden by the footlight reflectors. Thus placed, they can observe the progress of the play to much better advantage.

Ingenious mechanical arrangements provide for the quick and easy lifting aloft of large pieces of scenery, by the help of counterbalanced cables, a few men on a platform sixty-five feet above the stage being thus enabled to do work which ordinarily would call for a score or more of scene shifters. The counterweights used are buckets of buckshot, which, at a moment's notice, can be made lighter or heavier as may happen to be required.

Along the front of the "horizont" wall at the rear of the stage runs a trench six feet deep, which, being below the stage level, enables stagehands or actors to walk from one side of the stage to the other without being seen by the audience. Another novel device takes the place of the proscenium in the curtain, which was old in Shakespeare's day. It is an optical instrument with a lens, which gives a view of the entire audience.

The theatre described has no star dressing rooms on the stage floor, the space they would ordinarily occupy being used for a "green room," which, being spacious and luxuriously furnished, will afford a pleasant lounging and meeting place for actors. There are, in fact, no dressing rooms set aside for stars. All of them are on the second floor and just alike, and their occupants will enjoy the same conveniences and service that they would find in a first-class hotel, including shower baths.

The Old Problem of Using Waves' Power

IF MECHANICAL talent can solve the wave-motor problem, American inventors are determined to do it. Two novel and interesting contrivances in this line have just been patented.

One of them is the idea of Enos C. Kersey, of Newport Beach, Calif. It employs small platforms hinged together in pairs, each of them mounted on two cylindrical floats. The floats are meant to serve as wheels on land, when on occasions the apparatus may have to be withdrawn from the water for repairs.

It is intended that a series of these pairs of hinged platforms shall be strung out seaward from the land, being anchored at the outer end. Each one carries beneath it a couple of inclined planes extended upward and outward in such wise that the incoming waves will impinge upon them, causing each pair of platforms to perform an opening and shutting jackknife movement.

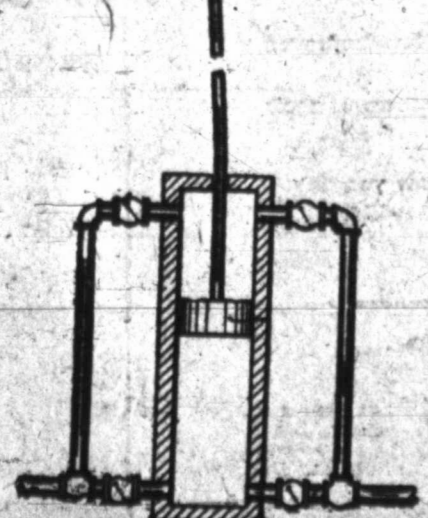

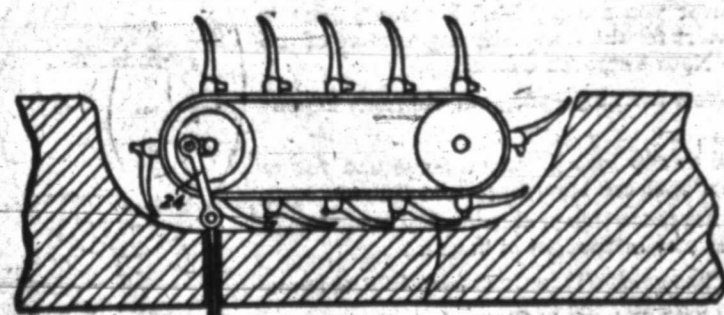

Upon each platform is mounted a pump. The hinged movement of the pairs of platforms actuates the pumps, forcing water from the sea through a pipe to a tank on shore—the tank being at such an elevation means, are worth far more than the coal itself when utilized merely as fuel. Hence

trictly. Inasmuch as the mechanism continues to operate without intermission day and night, the tank can never be emptied, and the power supply will be correspondingly inexhaustible.

Mounted on an auxiliary platform is to be a windlass, on which will be wound a cable connected with the land at one end and with the holding anchor at the sea end. The cable will keep the apparatus in place, and can be used to draw the latter landward or seaward.

The other invention, credited to David R. Olmsted, of Council Bluffs, Ia., is altogether different. It is a hollow structure of great size, the bottom of which is meant to rest flat on the sea-floor at or near the edge of the land. Its upper surface is shaped like the trough and crest of a wave, and mounted in this wave-shaped roof are a number of impact-receiving devices, each of which is a series of broad paddles, carried by an endless belt that runs on a pair of rollers.

One of the rollers (in each pair) is con-

nected by link and pin with a piston rod, which operates the piston of a pump that rests upon the flat base of the hollow structure described. This means, of course, that the pump is inside of the hollow structure, and, inasmuch as there are a number of roller-and-paddle devices mounted in the wave-shaped roof, there is a corresponding number of pumps down below.

The incoming wave strikes the paddles, causing the belts to revolve and actuate the rollers which drive the pumps. The pumps force water up into a high tank, from which (as in the other invention) it can be delivered to a turbine wheel for the production of continuous power.

A tower erected upon the rear part of the structure is provided with a stair descending into the interior in case it is necessary to make repairs or regulate the pumps.

Why Not Be Your Own Puppet?

THE newest thing in the way of a marionette is made of cardboard, without a head and with pivots to provide joints for its arms and legs. It has no head because that feature of its anatomy is to be represented by the head of the person who operates the puppet, and who seats his chin in a cut-out notch in the upper edge of the cardboard (or wooden) background just behind the marionette. This background is painted to represent the drop-curtain of a miniature theatre, and attached to the front of it, at the bottom, is a little platform for the puppet to stand or dance on. The movements of the marionette's arms and legs are controlled by strings which pass through slots in the top edge of the "curtain." Its living head, of course, does the talking, and may be disguised suitably for the various characters represented by a number of such cardboard dolls.

What Is Sound?

THE most wonderful achievement in acoustics that we know of is represented by the violin. Suggestion has more than once been made that an auditorium might be built in the shape of a fiddle; but obvious difficulties in the seating of an audience have prevented the carrying out of the idea.

It is only within recent years that much has come to be understood in regard to sound. Formerly churches and other places of public assembly were designed more or less by guesswork, so far as acoustics were concerned, each such building being a hopeful experiment. Today, however, the architect is able to rely upon definite principles which have been scientifically worked out.

Scientific investigators are still working on problems of the kind, and one of the sections of the Bureau of Standards is devoted to the study and measurement of sound. Often, by its expert advice, the bureau has been able to lend important help in remedying acoustic defects of theatres, assembly halls and churches.

A few months ago a request was received from Johannesburg, South Africa, for help in improving the acoustics of a very large hall in that city, which contains a large hall auditorium. Although the whole matter had to be arranged by correspondence, the bureau was able, from plans and data concerning the structure, to suggest what proved to be a satisfactory remedy for the trouble.

Considering their lack of scientific data, it is wonderful how successful the architects of old-time cathedrals in Europe were in the matter of acoustics. The most remarkable building in the world, in this respect, is the Mormon Temple in Salt Lake City, wherein a whisper can be heard in all parts of the vast auditorium.

Movie By-Products

WHEN motion-picture films are developed, a large part of the silver they contain is deposited in the hypo fixing bath. Until recently the movie laboratories at Los Angeles disposed of their used-up hypo by running it into the sewers, but now they extract the silver from it first. They recover in this way about half a ton of silver a month—enough, if optioned, to make 13,950 early-bird dollars. It pays, the process being simple enough. Sodium sulphide precipitates the metal, and the "mud" scraped from the bottom of the tanks is dried and smelted, the silver thereby obtained being molded into ingots and sold to the mint.

Along the two edges of every film are little holes punched out by machinery. These yield billions of tiny disks, which are burned, the ashes being put into the melting pot to recover the silver they contain. They yield five to six ounces of silver to the ton.

An Ingenious Folding Go-Cart

A GO-CART, newly patented by Clyde A. Pippin, of Chicago, is quite a marvel of ingenuity, inasmuch as its wheels and everything fold into a compact bundle enclosed in a boxlike case which, when opened, forms the body of the go-cart. The box when closed resembles a suitcase and is provided with a handle for carrying it.

Distributing Population

WHY is China crowded? Her population is nearly four times as great as ours. But would this country be crowded if our people numbered 400,000,000? Surely not. And China, be it realized, is one-fourth larger than the United States.

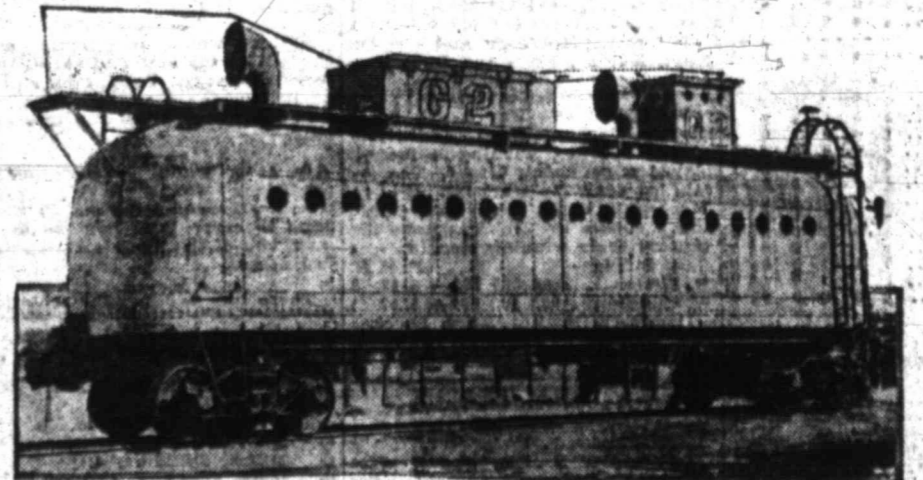

Julian Arnold, our commercial attaché at Peking, explains the matter by saying that there is really plenty of elbow-room and to spare in China. The Chinese are crowded because they are huddled together in a comparatively small area, leaving vast regions, abounding in rich resources, undeveloped and sparsely populated. It is this fact that has created the impression that the country is over-peopled.

The chief reason why the Chinese are thus crowded is lack of railways and other means of transport and communication. Six-sevenths of the population of China today lives in one-third of its area. There are in that country 2,000,000 square miles of territory with an average of less than four persons to the square mile. But China is building railways, and they are altering this condition of affairs. The iron horse is opening up Inner Mongolia, a region which until recently was sparsely populated, and the Chinese are flocking thither by the tens of thousands. Building of railways in Man-

churia has been followed by the migration of millions from over-populated Shantung, who are transforming the Manchurian province into a granary for a very large part of Asia.

The most strangely situated people in the world are 70,000,000 in West China (embracing the province of Szechwan, Shensi, Szechuan and Kansu), who are virtually cut off from economic communication with the rest of China, and hence with the world. But, for this very reason, West China is the cheapest part of the world to live in. Wheat costs twenty-five cents a bushel, and six cents is the price of a dozen eggs.

A Car Proof Against Bandits

THE professional bandit has come in these days to be recognized as a formidable enemy of civilization. We have in this country robber gangs, but in Mexico companies of such criminal adventurers often number hundreds of armed men, who wander from place to place, subsisting at the expense of the peaceful inhabitants and plun-

dering wherever there is opportunity of loot. The Mexican Government is doing its rather ineffectual best to capture, kill or disperse these marauders, and one means to be adopted is illustrated by this formidable armored railway car, newly built, which, manned with soldiers, will travel quickly as the scene of any raid.

ALL THE NEWS OF ALL THE SPORTS ALL THE TIME

Spudders Unable to Find Knight in the Pinches And Lose to Sand Crabs

By PAUL W. LARKIN. Sad business at Athletic park Monday afternoon upon the return of the Spudders. The weather was gloomy. The crowd was small and worky. The Spudder stick work was gloomy. Jack Knight's hurling, however, was exceedingly bright. He hooked and bent his shots around the Salmites' furniture, especially when there were men on bases, in a manner that almost beggars description, and the result was a 4 to 2 loss sustained by Salm's hopefuls. The local athletes continued in the slump, the only real pinch blow of the day being delivered by Al White who laced a double to left field with two men aboard, said field being counting for the only two Spudder tallies. Even this crash would have been an out under ordinary circumstances, but the slippery field prevented Johnny Baggan from moving very fast and the game dropped safely over his head in the mire. The defeat came as a great surprise as the Crabs were supposed to be a truck company and "Jumbo" Ramsey was Salm's first nomination to do the pinching and he got along famously until a few bunts in the fifth chapter sent him up in the air. Before he was withdrawn the invaders had sent three runners over the pan which proved to be the exact amount necessary to win. Hub Brown, who was expected to hold the Crabs at bay and he would have made a perfect job of it had it not been for a bobble by Tex McDonald, who was most satisfactory and he was removed later in the game to make room for Bob Besch's pinch two banger, not because he was faltering. Ruth finished out the contest and though nicked for a bingle in each inning he worked, kept the visitors from scoring.

Knight Supreme in Pinches. Knight permitted only seven safeties, three of which were two-pylopals, but he was extremely firm in the fourth and fifth. Spudder had men on the paths in every inning except the first and last, but only in the fifth did they succeed in pushing any around. These tallies were wholly unexpected, as two men were down when Knight started to waver. He lost the easiest man on the squad when he played Perdue in the seventh. Perdue was a matter of form than anything else. Adams followed with his second single of the game and "White" then "batted" over Baggan, who had which scored the two runners. Don Brown, recently obtained from New Orleans by the Crabs, played his first game in a Galveston uniform with his holding one of the features of the game. Despite the slippery right pasture, he covered acres of territory and the Spudders' error with his arm. The visitors also had wholesome respect for Kitchens' wing before the contest was finished as he disposed of the Crabs' bats as stealers in heavy fashion. The first run chalked up by the Crabs was the result of a drive by "Scrappy" Moore over the left field wall in the fourth. A strong south wind blew across the field and Moore lifted one onto it.

Crabs Put Game On Ice. Their next two came in the following order: Distel, Anderson, Moore, Writly. Distel was the starter. Writly laid one down between Beck and Ramsey and the latter not only failed to pick it up, but got in front of Beck and delayed his throw long enough to allow Distel to reach second in safety. M. Smith followed with a slow roller to Ramsey's right, which he couldn't get to and the bases were jammed. They didn't remain that way long, however, as Knight decided that this was the proper place for him to pitch, and he gave himself a comfortable lead to work on. He did little thing by socking a line drive to right. The pitcher stopped in the mud and Summa was unable to pick it up until Moore cut from the mound and M. Smith over, but he dumped the ball down directly in front of the plate. He was set on seeing Smith cross the plate, however, and kept the ball well covered with his legs. Kitchens was unable to get near it and Umpire Wars promptly called Moore out for interference and sent Smith back to the mound. The bases were grounded to Adams.

A pass, a fumble by McDonald scored for the Crabs' last tally. GALVESTON.—AB R H PO A E Baggan, lf. 4 1 0 1 0 0 Moore, 2b. 4 1 1 0 1 0 McDermott, 3b. 4 0 0 0 0 0 L. By Innings: 000 111 000-3 Wichita Falls. 000 020 000-3 Two base hits, Writly, McDonald, White, Besch, home run, Moore; stolen bases, Adams; double play, Kitchens to White; hits off Ramsey 3 in 4 innings; off Perdue 1 in 1; off Ruth 2 in 2; off Beck 1; hit by pitcher, Beck. Time of game, one hour, 15 minutes. Umpires, Wars and Hill.

Don't waste your vote on Saturday, May 13. Cast it for S. A. L. Morgan, the only home candidate for congress who can win. Special election Saturday, May 13. (Political ad.) 250-11c

CHATS WITH REX BEACH About the Great Out-of-Doors

By MORRIS ACKERMAN. Rex Beach is the best posted big game hunter in America today! Quite an assertion, you say. Well, I don't think so. In fact I'll go a bit stronger and say that Rex Beach is the most experienced all-round big game hunter, small game hunter and angler in America. Incidentally, Beach has no reason to brag about his hunting and angling accomplishments. He hunts and fishes because they are his hobbies, expensive ones at that. Quite a little fame has come to him as a fiction writer. No doubt with fiction writing fame goes some few emoluments. Beach went to Alaska with the "Klondike gold rush '97 to get rich." We don't know what were his fortunes as a seeker of gold. We do know, however, that in Alaska he was well acquainted with an insatiable desire for brown and gray bear hunting, which he maintains is the greatest of all sports. Several times he has returned to Alaska to hunt. Not only bear, but sheep, goat, moose and caribou as well. Next to that he likes duck hunting.

SPORTS SHOTS by Paul W. Larkin

25,000 On Road. The Spudder road trip might have been more successful from a playing standpoint, but from a financial standpoint it was the greatest success of any first road trip. The Salmites played to about 25,000 people in Shreveport, Dallas and Fort Worth. The game at Shreveport was rained out twice. Had the game even approached their opening figures of 1921 the locals would undoubtedly have played to over 50,000. Practically 5,000 turned out this year in Shreveport, 9,000 in Dallas and the remainder in Fort Worth.

Skipper Happy. The Spudder skipper was highly elated when word was received that Wheeler was on his way to Wichita Falls. Monday he felt that the former Southern leaguer could not be obtained. He is hoping that the answers to his other bids will be as favorable. Wheeler's coming will mean the six for someone.

Not much Wrecking. The Spudders' crew has looked like anything but a wrecking outfit by every other club in the circuit. Those five runs that they promised the hurriers have not been forthcoming for nearly a week. Three or four would have looked like a million since the club hit Fort Worth, however, they are all normal .300 hitters and are bound to come through soon. The one supposedly weak link in the offense is making money out of the other. "This is a rare occasion now days when 'Shorty' Adams is satisfied with less than two hits. Adams, Summa and Miller are the only three men in the game every day who are in the select circle. Fred Beck is way below the .250 mark.

Clark and Rigney. The home boys passed up a beautiful chance to recover some lost ground as the Exporters lost their first northern game while the Fort Worth boys, who are all Panthers, will be idle for several days as the park is under water again.

Lost Opportunity. The home boys passed up a beautiful chance to recover some lost ground as the Exporters lost their first northern game while the Fort Worth boys, who are all Panthers, will be idle for several days as the park is under water again.

WESTERN CLUBS GET JUMP ON EASTERN

Take Four Out Of Five Contests In Initial Inter-sectional Glashes. NEW YORK, May 8.—Western contenders in the initial inter-sectional clashes of the major league season took four out of five games. The Yankees and the Giants were the only eastern clubs battling the way of a clean sweep for the west. Pittsburgh came from behind in the eighth and ninth to score six runs and win from Brooklyn 5 to 7 in the only National league game scheduled. Chief Yellow Horse, Indian twirler, got credit for the victory. The rest of the National clubs resume today, on western battle grounds, the Giants meeting their first going rivals, the St. Louis Cardinals. Good pitching and Baker's heavy hitting, which included a home run, helped the Yanks down Chicago 7 to 4. Cleveland slugged three Athletics pitchers for 16 hits and a 14 to 4 victory; Detroit's recruit pitcher, Olsen, turned back Boston, while the St. Louis crew pulled out of the fire in the ninth 4 to 1 triumph over Washington. The Browns called in four pitchers to stop the Senators.

MORVICH EXPECTED TO GO FULL ROUTE WEDNESDAY

LOUISVILLE, Ky., May 8.—After a restful night on Kentucky soil, Morvich, the unbeaten hope of the east in the Kentucky derby, was ready for a work out this morning at the Downs. Trainer Fred Burlew, who arrived yesterday from New York with Benjamin Bloch, owner of Morvich, plans to send the gallant colt around this morning. Tomorrow morning, those who are doing the best guessing on the superlative predict that he will get his first trial over the full derby route. While Morvich easily drew chief attention yesterday he was forced to share interest with My Play, full brother of Man o' War, that also is regarded as a likely prospect in the derby.

JACK FINALLY DECIDES TO LEAVE FOR LONDON

By Associated Press. PARIS, May 8.—After postponing his departure from Paris several times, Jack Dempsey finally made up his mind to break away from the attractions of the French capital and leave for London this afternoon. He spent the morning shopping, and returning the visits of friends. Among his purchases were several quarts of Scotch perfume. "I'm glad it's all over," he said as he returned to pack his trunk.

Star Players All Fussy in Picking Their War Clubs

Workmen are known by their tools and ball players by their bats. You will never find a good hitter who does not take particular pride and care when it comes to his bats. They must be of a certain weight and a certain "mold" or shape. The weight all depends upon the man using the bat. Some of the giants in baseball use light bats, Harry Heilmann, champion batsman of the American league, for instance, and some of the small men use heavy bats. During a batting slump a batsman is liable to change to a heavier or lighter bat, but many of the good hitters refuse to change under any condition. When Ty Cobb broke into the major leagues he had plenty of trouble in Detroit. His success irritated the veterans of the Detroit club and they tried in many ways to handicap the flashy Georgian. One day one of the Detroit veterans broke Cobb's bats into splinters and tossed the remains over the fence. Cobb had brought these two bats from the south to Detroit and used them in all games. The veterans thought that with the bats broken Cobb's luck would be gone. Charlie Schmidt, then first-string catcher for the Tigers, saw the act committed. He felt sorry for Cobb and asked him what he intended doing. "I can hit with a fence rail," said Cobb. Schmidt loaned him his bats and that afternoon Cobb made three hits in four times at bat. But in spite of this success he did not continue using the model that Schmidt favored, but had duplicates of the bat made and used them. Players are superstitious about their bats, for bats are credited with "carrying batting averages."

LEWIS DEFEATS BATTLE

TOPEKA, Kan., May 8.—Ed "Strangler" Lewis, heavyweight champion wrestler, defeated Farmer Battle, champion of the New England championship, here last night in straight falls, the first with a headlock in 23 minutes and the second in three minutes with a reinforced writ lock.

WILL ATTEND THE STATE MEDICAL CONVENTION

CLARENDON, TEXAS, May 8.—Miss Ella Teager, Red Cross health nurse of Donley county, Mrs. H. L. Wilder and T. W. Carroll, all of this city, left this morning for El Paso to attend the state medical convention.

FURNITURE IS BURNED BUT HOUSE IS SAVED

CLARENDON, TEXAS, May 8.—Fire of unknown origin about 1:00 a. m. Monday morning entirely destroyed the furniture in the home of D. Ray Warren. The house was saved by the good work of our local firemen. Contents were partly insured. Arid deserts of western Australia are being irrigated by artesian wells.

Dick Kerr Peevish At Treatment by The White Sox

Dick Kerr, hero of the 1919 world series, is just about convinced there isn't any sentiment in baseball. Followers of the national pastime will remember the White Sox scandal of that year. If it hadn't been for the mastery pitching of Dick Kerr in that series, the affair would have been a very sad event. After Cloutie and Williams had been beaten in the first two games, Kerr made it look worth while by taking the third game. He also won another, causing White Sox fans to perk up and believe their favorites had a chance. Kerr pitched such excellent ball that the Sox couldn't lose back of him, even though some of his teammates tried mightily hard to turn the game. Kerr's loyalty and honesty made the 1919 world series. Eliminate his pitching and the showing of the White Sox would have been a joke. Two years have passed. What has become of Dicky Kerr, the hero of the 1919 world series? Kerr, because of a rather slight salary difference, has refused to report to the Chicago club and has automatically suspended himself. He is pitching semi-pro ball around Chicago. Kerr has good reasons for believing there isn't any sentiment in baseball. His loyalty to the game deserved a better fate.

FILTRATION PLANT TO BE INSTALLED COUNCIL ORDERS

PAID FOR OUT OF WATER EARNINGS—COST ABOUT \$20,000.

METER ORDINANCE IS DELAYED IN PASSAGE

Changes May Be Made at Next Meeting—Two Appointments Are Confirmed.

Installation of a new filtration plant at the water plant was ordered by the city council Monday afternoon, and work on this improvement will start within a short time. The new filter will double the capacity of the plant. The improvement will cost about \$20,000, the amount paid for out of the earnings of the water department.

The filter was badly needed last summer, when it was necessary to use "by-pass" water into the mains without filtering, and members of the council were unwilling to pay for another summer's worth of water purification equipment.

The council engaged in a lengthy discussion of the new ordinance which requires duplicate meters at all meters. P. Rogers, general manager, and Luther Hoffman, attorney, for the electric company, suggested a change whereby readings will be left when requested in writing by consumers. The council passed the matter until the next meeting, and in the meantime, the changes will be worked out.

The discussion of this ordinance waxed rather heated at times. Commissioner Pitts contended that the fact that the measure would work an inconvenience on public service corporations should not be considered as of more importance than the necessity of protecting the public.

The length of time that cars are to be permitted to "double-deck" was discussed by the council. Two complaints had been submitted. It was indicated that the council would permit laundry wagons, ice wagons, express wagons and the like to double-deck long enough to load or unload, with some provision whereby "visiting" on the part of drivers will be punished.

J. W. Bentler, one of the First M. E. church, complained of the condition of a lot across the street from the church, and the council promised an investigation.

The council confirmed the appointment of W. B. Chauncey as city judge and E. H. Gipson as judge of the city court. City Attorney Mann, who is employed in an advisory capacity, Mr. Mann will also handle the city tax collections on a commission basis.

It was decided that the salary of J. E. Dobson, park superintendent, should remain at the old figure, with care of the cemetery added to his duties.

SCOUTS PREPARING FOR SUMMER CAMP MANY TO TAKE PART

Boy Scout activity in the city has recorded a decided increase during the late warm weather, this being especially true of those scouts with whom outdoor camping finds favor. A number of troops, or at least small groups from various troops, have spent the winter in camps along the river or near the lake and this branch of activity gives promise of increasing more and more as hot weather approaches.

Directors of scout work in the city are confident that an even larger number of local boys than attended last year will be on hand for the trip for the summer camp at Cache, Okla., starts in June. Seventy-five scouts enjoyed the ten day camp in the Wichita mountains last summer and it is thought that a hundred or more will take advantage of the camping opportunities this year. Better facilities for camping for the boys have been provided through the erection of a large cabin, while a larger number of adult supervisors will be on hand to look after the welfare of the youngsters.

RAIN INTERFERES WITH PAVING WORK ON COUNTY ROADS

The heavy rain of early Monday morning has interfered with road paving operations in the county. Potts and Prentiss, road contractors who are at work with one mixer on the Burk Burnett road, will begin Wednesday morning provided no more rain falls.

The Tibbatts Construction company which had practically completed all arrangements to begin work on the paving of the clay county road, is also delayed and due to the soft sub-grade will be unable to start work before the end of the week. It is probable that they will not get started until next Monday.

The placing of the steel on the bridge across the highway on the clay county road has also been delayed by the weather.

MORAN AND CAREY TO DRILL TEST ON GIBSON SURVEY
Moran and Carey, contractors of this city, have secured a tract of acreage out of the Waggoner land in the Gibson survey south of Electric, and are to put down a deep test which will practically be an offset to the Melton well to the east.

WATER WITHIN 4 FEET OF GIRDERS SPANNING TRINITY

Officials of the Fort Worth & Denver City Railroad company stated Tuesday morning that at 4:00 o'clock the water in the Trinity river, at Fort Worth was within four feet of the girders of their bridge but that there was sufficient space left for drift to pass under without causing any alarm. The Wichita Valley is unable to get through any traffic between Stamford and Abilene and the Spur line is also impassable. Approaches to a number of bridges have been washed away but it was believed Tuesday morning that barring any further rains that the lines would be open some time Tuesday night.

Several hundred feet of dump at mile post 116 on the Northwestern is out and officials stated that it would be late in the day before any traffic could pass this point. Threatening weather was reported from all points on railroads Tuesday morning. No rain was reported, however, during the night. Locally the high mark of the thermometer Monday was 74 and it is expected that five points during the night. South winds continued.

HOBBS COMPANY GETS GOOP WASH IN SOUTH BURKURNETT'S

The Hobbs Oil company Monday completed No. 1 on the Burdock tract in the Manning and Mouninger pool west of Burk Burnett and is reported swabbing 150 barrels from the 1200 foot sand. The well is an offset to the Tom Hunter well on the west. Location has been made for No. 2 to be 300 feet south of No. 1.

"SHOULD SEND MAN TO PHYSICIAN FOR WHISKEY"—JUDGE

NO MAN IS UNDER OBLIGATIONS TO ANOTHER TO PROCURE LIQUOR.

M. B. LITTLER GIVEN THIRTY DAYS IN JAIL

Federal Judge G. W. Jack Stated No Officer Should Persuade Man to Violate Law.

"The defendant was under no obligations to sell a man some whiskey," stated Judge G. W. Jack of the federal court Tuesday morning in the case against M. B. Littler. "He should have sent the man to a physician to get whiskey when he said that his people were sick and needed liquor."

Littler was sentenced to 30 days in the county jail on his plea of guilty to the charge of selling a half pint of whiskey to J. H. Knight, a special officer of Burk Burnett.

Judge Jack stated that it was wrong for an officer to persuade a man to violate the law but that the law did not intend to prohibit officers from laying a trap to catch violators. Littler pleaded guilty to the charge but stated that the reason he sold the liquor to Knight was because the latter stated that he "would stand on his head for some whiskey" as his wife was sick and needed whiskey badly.

A search was made of the premises of Littler after the alleged purchase was made and four quarts of liquor were found. It was incorrectly stated in these columns Monday that four gallons were found.

FEDERAL COURT TO CLOSE HERE FRIDAY NO JUDGE SECURED

The present session of the federal court of the Wichita Falls division, of the northern district of Texas, will close here Friday afternoon as no judge can be secured to occupy the bench for the following two weeks as was planned.

Judge George W. Jack of the Shreveport, La., district is compelled to return to his district and open court there next Monday morning. He plans to leave at 8:15 o'clock Friday afternoon and court will adjourn Friday afternoon.

A large number of cases, both civil and criminal, will necessarily be continued. The original plans were to have a four-week session.

LARGE CROWD HEARS MORGAN AT DECATUR

Given Assurances of Support by Many Following His Address.

DECATUR, TEXAS, May 8.—A crowd which packed the district court room, filling every seat and the aisles with scores standing at the back heard Hon. S. A. L. Morgan of Wichita Falls discuss the issues in the congressional race here last night. Mr. Morgan spoke for an hour and his address was marked with candor and wit on every issue in the race. He dealt particularly with the tariff and the necessity of reducing federal taxation. He was frequently applauded. At the conclusion of the address many came forward to assure him of their support. W. M. Burck presided at the meeting. Mr. Morgan was introduced by Claude Miller of Wichita Falls.

SCOUTS TO BE GUESTS AT OPENING PERFORMANCE OF SHRINE MINSTREL

All Boy Scouts in Wichita Falls have very generously been invited by Frank Collier, manager of the patrol and band of Maskeat temple, and Chas. Wolen, business manager of the Shrine Minstrel, to be present on the night of May 11, at the Wichita theater to witness the first performance of the show, which will continue for two nights. The minstrels are being staged under the direction of Lewis L. Looney, for the benefit of the band and patrol, and is made up of a cast of 25 local people of prominence.

Further in line with this generosity on the part of those in charge of the show, prices of reserved seats have been announced at one dollar each. This price is quite a variance with some home talent show prices in the past, and should give everybody a chance to see just how many real "actors" and comedy artists the city affords. The "Shrines" have announced that they will also give away a new automobile on the night of the last performance. Just how this is to be accomplished is explained in that every person who purchases a ticket to any of the three performances will receive a free chance to win the car, drawing to be made on Saturday night.

Don't waste your vote on Saturday, May 13. Cast it for S. A. L. Morgan, the only home candidate for congress who can win. (Political ad.)

FOR SALE AT SUTTS SHOE SHOP, 618 EIGHTH STREET

MAY REQUIRE PARKING CARS ON ALL DOWN TOWN STREETS

Police Commissioner Pitts is considering a change in the traffic ordinance as to provide for parking cars on Ohio, Indiana and Scott instead of parking them. At present cars are parked on these streets and are ranked on the numbered cross streets, and the plan has worked so satisfactorily on the latter that the commissioner favors making it a general rule in the business district. The matter will probably be brought up at the next meeting of the city council.

THREE OF CHICAGO LABOR LEADERS NOW UNDER ARREST

ACTION FOLLOWS POLICE WHICH TWO POLICE ARE KILLED

ANNOUNCE THAT OTHER ARRESTS ARE

Do Not Represent Honest Labor, Declares Chief of Police

CHICAGO, May 10.—The today related the building labor headquarters and a three of Chicago's biggest leaders, "Big Tim" Murphy, Madge and Cornelius Shea, who with bombings and fire which early today saw the death of two policemen serious injury of a third.

Murphy, known as a "labor czar," is out on bail having been sentenced to years in the penitentiary section with the \$40,000 union fund robbery. Madge, a dent of the building trades, while Shea heads the tea union.

All records were taken. Chief of Police Fitzmorris during the arrest of Murphy and Shea issued the following: "The slaughter of 10 police officers while they duty was an inevitable result of the tactics employed by Murphy, Madge and the other hoodlum ex-convicts who have been about posing as leaders of labor."

"Now that they want in the police, they shall have it. Just as guilty of the murder of three policemen killed last night were the anarchists of the killing in the Haymarket."

"They no more represent organized labor than the anarchy. Labor does not need of the police department will them around."

Chief Fitzmorris announce records that state impounded in the building trades was under arrest.

TWO POLICEMEN KILLED

CHICAGO, May 10.—Two men were shot and killed, wounded and in building early today in disorders of tributed to labor warfar shootings followed by nine pistol fights in which were slayed police.

Charles C. Fitzmorris, chief of police, immediately ordered 100 men on duty and directed labor leaders of what was brought in.

The deaths: SERGEANT LYONS, 26, Northeast; PATROLMAN THOMAS C. 26.

The wounded man is Pat Moulder.

Although the killings are in different parts of city, police believe they are part of a single plan to express resentment at end of the Landis award, a handed down by U. S. federal judge, which was in a long drawn out dispute, members of the building council and contractors.

GOLDSTEIN REQUESTS THAT HIS NOMINATION FOR PLACE BE REC

WASHINGTON, May 10. Goldstein, whose recent no as internal revenue collector Louis has been the occasion of Senate criticism, has that his nomination be withdrawn.

Goldstein's request, in letter to President. Hard road in the senate by Senator, republican, Missouri, recommended the appointment declared by Senator Spencer the president, indicating the president would meet G request.
