Of course, poise is dependent mainly upon sound health and ateady nerves. If you feel that you are being kept back in this way, why not turn to that great woman's remedy, Lydia E, Pinkham's Vegetable Compound, which was manufactured from a thorough understanding of the nervous system of women? in the recent democratic primary in Texas great many veters voted for or against candidates cause they were or were not members of some sertain church, lodge or klan. Some of the re sults of that kind of voting have been far from satisfactory and if the practice is kept up there is sip and his own soul shrinks at every stage of the no telling where we will get to, or rather it is certain that we will wind up with a church, lodge or

If we are to continue as a free and democratic le we must stop voting for or against candifates because of their lodge or church affiliations Whenever a candidate begins to parade his church or lodge connections it is an indication that he has not much else to recommend him and it is a good dea to let him alone,

It is often charged that Catholics are governed in their voting by the church connections of candi dates. There are doubtless Catholics of that kind ast as there are Protestants, but there is at least one Catholic publication that is preaching "true re ligion" on this subject. It is the Southern Messen ger which is quoted by the Cisco Daily News as fol-

"Amid "the tumult and the shouting" of candi lates for political office, it would be well for all voters to remember that America is the country of all citizens, whatever be the religious faith of each one. Religion is neither a qualification nor a dismalification for public office. To hold a contrary lectrine is treason to America, to the fundamental principles of its constitution and laws. To refuse to vote for a candidate, otherwise deserving of confience, on the ground of religion, is a crime against Yesterday was mine to spend, I owned its every America of which the true American, or the true Catholic, is never guilty. To cast a vote for a Catholic, beyond his civic merit, merely because he is a Catholic, is a crime in the eyes of the country I had the seconds and the hours to buy whate'er and in those of the church; and equally so is it a crime to cast a vote against a non-Catholic, merely cause he is a non-Catholic. The test whereby a ndidate for office is to be judged is his civic merit, his fitness, intellectual and moral, for the duties he pledges himself to perform—that and nothing else.

"Government-national, state and municipalwould be a vastly higher plane and much more efficiently conducted, if every voter should be actuated by these principles. Conscience and judgment should govern one in voting for public servants just as strongly as in any other duty."

President Harding has told Chairman McChord of the interstate commerce commission to insist upon the full enforcement of the law regarding the inspection of railway locomotives. The president takes the position that it is better to get along with restricted service than to attempt to operate locomo tives which are unsafe.

The public generally, we believe, will approve President Harding's attitude.

We are apparently in a long drawn out struggle between the shopmen and the railroads and we must make up our minds to accept restricted service from the railroads, it will hurt but some way we can get along until the strike is settled one way or the other.

THE GOSSIPER.

I was watching a gardner the other day and I noted he was uprooting many plants that looked quite green and beautiful. I asked him why he did it.

"Those are weeds," he replied. "If I left them they would such the life and nourishment out of all of gum drops being my next fathese beautiful shrubs that you see I am trying to protect."

I was reminded then of a friend who had just told me about a person who seemed to delight in gossip -in repeating things about someone else of whom he knew nothing.

The gossip person is primarily a distributer of poison. He is the Devil's best valet.

Like a weed which serve no good purpose, the gossiper in addition to taking away from that which is right and good, creates an atmosphere for him-

If you cannot say good things about someone else say nothing. And when you hear reports of ill against someone else, just believe nothing and go on your way.

I know of a friend who goes out of her way to say nice things about other people. I have never known her to repeat anything of a gossipy nature against anyone. Though she is very talented and needs all the boosting one could give her, still she delights in singing the praises of others, so that her own spirit grows in beauty all the time and she is beloved by all who know her.

The gossiper gets nothing in return for his gos

family world—in which we might all claim a divine relationship, all the time seeking to find beauty and then to distribute it. Seeking to find the good in things and people—and then to increase the stock throughout the world.

But it was necessary to Cayley's plans—to Mark's plans if they were acting in conicet—that he should be thought so to have escaped. At some time, then, while he was hammering (the key in his pocket) at the looked door, he must suddenly have remembered—with what a shock!—that a mistake had been made. It was Cayley's only chance of getting a start on Antony, of getting to the windows first, of working them open somehow before Antony caught him up. Even if that were impossible, he must get there first, just to make sure.

So he had run. But Antony had kept up with him. They had broken in the window together, and gone into the office. But Cayley was not done yet. There was the dressing room window! But quietly, quietly. Antony musn't hear.

And Cayley had agreed that probably that cayley had agreed that probably that was the reason. How he must have chuckled to himself!

They were outside on the lawn again now, Bill and Antony, and Bill was listening openmouthed to his friend's theory of yesterday's happenings. It only gave them another

"What's that?" said Antony.

"Do you mean that he's been hiding in there all the time?"
Antony was silent until Bill had

If he was not so quick in thought as Antony, he was quick enough in action. Thought was not demanded now. To close the secret door safely but noiselessly, to make sure that the books were in the right places, to move away to another row of shelves the difficulty was not to decide what to do, but to do all this in five secnds rather than in six. The Producers well on the Maddox farm after being shut down for some time, resumed drilling last Priday with an increased gas flow.

It is conservatively estimated the well can produce ten million cubic feet of gas. Visiting oil people from the Oklahoms oil fields say for that depth, which is only 800 feet, it is depth, which is only see reet, it is a strong gasser.

The Texas well, onehalf mile southeast of the Producers, when opened up can be heard for two miles, showing the strength of the flow of gas.

Southeast of the Texas the Wil-liams well has the best prespects of an oil well because it was a real producer of oil, estimated to be 75 barrels, but the test was finally abandoned because of ealt water. To sift the prospects down to a conservative basis, north Montague county now has very bright prosfields in Texas.

Southwest of Nocona the Powier test is drilling day and night at 600 feet.

BY ZANE GREY Extra-Jimmy Aubrey in "The Riot"

A Question With Two Sides It is self evident that a public service company is composed of two important elements that must work

together, the public and the service.

The Lone Star Gas Company has a particular service to sell in maintaining a supply of natural gas for your use every minute. This service demands a large outlay of capital, much enterprise and the application of

Whenever one person in a community desires gas thousands of others want it at the same time.

Taxed to Its Utmost

For a few days every winter, every consumer calls for all he can get. At this time the Lone Star Company's facilities must furnish four or five times the ordinary supply. Often this great demand comes on very short notice.

This peak load calls for an enormous plant for use only a few days each winter. It is sometimes taxed to its utmost for

only a few hours.

The consumers should know this, because upon their careful use of gas at such time depends the comfort of thousands. When every consumer wants an abnormal supply, some are likely to run short.

Prepare for It Now

Therefore, we call upon our partners in this enterprise—the public—to prepare now for this winter's load, by the installation of gas saving appliances, by correcting wasteful methods and by rightful use—not neces world's best fuel.

We try at all times to sible. The public—you—

ration court Wednesday evening ne of the women usined her right and and was sworn.

"What is this girl's relation to ou?" she was asked.

"She's, my daughter," was the "She's my daughter," was the reply.

The two could easily have passed as sisters. The daughter, who with the youth, faced a vagrancy charge, was an attractive, womanly individual, looking, far more mature than the 14 years her mother said she had seen. The mother appeared rather distainful of the proceedings and apparently felt no great concers over her daughter's predicament. When the ages of the defendants were ascertained, they were ordered transferred to juvenile court.

There was another vagrancy defendant woman, mother of three children and wife of an invalid husband. Her case was passed for the present.
