Staples stated he understood from newspaper reports that the injunction was granted under chapter \$8, acts of 1919, which regulates ulates campaign expenses for state and senatorial offices.

Mayfield's campaign expenses, ac-

cording to his statement filed with the secretary of state on September 2, totalled \$9,874.93. Of this amount, \$2,565 was contributed, according to the statement. The maximum expenditure for senatorial candidates under the state act is \$10,000. The chief question which Staples will submit to the attorney general today is whether or not the telegraphic notice is sufficient to prevent him from proceeding with the
certification. Certificates containing during the next \$6\$ hours in the

advertised and we heard of it.

"I began to take Black-Draught, and have used it, when needed, ever since. I use Black-Draught now in my home, and certainly recommend it for any liver trouble.

"I have given it a therough trial, and after thirty years can say Black-Draught is my stand-by. It has saved me many sick spells."

Mr. Cromer writes that he is "never out of Black-Draught," and says several of his neighbors prefer it to any other liver medicine. "I always recommend Black-Draught to my friends." he adds.

This valuable, old, powdered liver medicine is prepared from medicinal roots and herbs, and has none of the bad effects so often observed from the use of calomel, or other powerful mineral drugs.

Black-Draught helps to keep the liver in trim, helping prevent or relieve such troubles as constipation, billiousness, indigestion, sick head-achs.

What Public Service Means

The best results of life are obtained by intelligent co-operation. Especially does this apply to all public service enterprises. One part is service; the other of equal importance, is the public.

The Lone Star Gas Company has been telling the public about its service for the purpose of a better understanding. The Lone Star Gas Company is a producer and wholesaler of natural gas. It does not sell to the individual consumer, but it desires his good will and understanding.

Your Part Therein

This understanding is essential if the service it gives is to be continuously satisfactory. Despite the best efforts the service company can give, unless the consumer does his part, he cannot get all the advantages planned for him.

Wise use, an enlightened conception of the problems of the company, and the prompt meeting of obligations as a consumer and as a citizen, are your part of the effort to maintain good service, for will reflect its benefits whatever affects us or hindrances on you eventually.

If you could come back to earth 2,000 years from w the chances are that you would find every one

There is a new idea for you. It comes from Prof. M. Low, brilliant young inventor who had charge British Fireless control work during the war. His prediction does not seem so bizarre and imble after you follow the way he reasons it out

Our remote ancestors, far back in the mists of e, must have had the strength and endurance of orillas. Otherwise they would have lost out in the raal struggle for existence.

Steadily the human race grows weaker. If we were suddenly thrust into the rough sort of life that our ancestors lived thousands of years ago, we would die of cold and exposure, for our sysical powers of registance are infinitely weaker

Says Low: "We human beings are growing weak er every day. Our teeth are growing worse, our eyes are failing, our limbs are more delicate. We seed parasols to keep off the sun, umbrellas to keep

It is almost pathetic, to watch the extremes of tell to which men in sedentary occupations resort to keep their bodies functioning healthily. Physical exercise is resorted to as an antidote to counteract the weakness that inevitably is resulting from living unnatural lives.

Riding in autos and street cars and sievators, it persisted in, will result in a race with weak, pipestem legs. And eventually by the laws of evolution, legs seldom used will practically shrivel up and van

Millions of men still toll on farms and in mills and factories. But twilight is descending on that day, machinery taking the place of human labor.

What shape will man's body eventually be deformed into by the unnatural life of little or no physical activity? Quite easily he might develop into a spider-like individual, largely head.

It is doubtless a wise policy that limits the po- diary a scrapbook. litical activities of members of our military forces but sometimes the breach of this rule is better than its observance. There are sometimes matters on the way. which military men ought to get to the public. An instance of this was a statement made by General Pershing at the convention of citizens' training camp

General Pershing said in discussing the efforts on the part of some to further reduce the army per- nothing that the absolute minimum ought to be men and 30,000 officers. To go below these figures would be to seriously disturb the skeleton erganization which ought to be maintained.

"It would be false economy," said General Perhing, "to save a few dollars by neglecting commo and billions to make up the deficiency when war

THE FRIENDLY WAY. Let me walk the friendly way And hear what kindly people say; Let me not miss the gentler things, The song the morning robin sings, My neighbor's smile, the maple tree Which casts its shelter over me, While I go seeking lustrous fame. And gaudy pleasures hard to claim.

In him who cares to be my friend; Let me not draw distinction's line Between those trusted hearts of mine And mark by caste or creed or clan The honest worth of any man. To those who love me I would cling Despite the favor of a king.

The friendly way finds good in all, The rich, the poor, the great, the small, The toiler is as fine and true, As good to know and cherish, too, As is the man who walks in pride I would not spurn his friendly hand With rulers of the world to stand.

Lord, teach me this: from day to day To reap the joys along my way; Let me not blindly fall to see The beauty of each flower and tree, Let me not lose the present hour With all its charm, to fawn on power, But firm and faithful let me be To all who would be friends with me. CARE OF THE BABY

By DR. R. H. BISHOP. Silks and satins are not so im-

portant in the life of a baby as sub-shine and amiliation.

Sunlight is absolutely necessary for the young child. The baby's room should be one, in all the house, which has the largest amount of sunlight. Fresh air is quite as re-portant. Pneumonia, bronchitis and colds are more often due to absence of fresh air than to account to it. of fresh air than to exposure to it.
The temperature of the baby's room should be under absolute conroom should be under absolute con-trol. An open grate is an aid toward this.
It is often the case that bables are

brutally over-dressed. This, of course, is done with the best of in-tentions, trying to prevent illness, but it frequently produces just what it is designed to prevent.

it is designed to prevent.

Absolute cleanliness in everything that fouches the haby's food is imperative. This means more than the ordinary cleanliness of a good housekeeper. The utensils used in preparing the food should be in good condition and preferably of enamel or aluminum. They should be bolled for at least 15 minutes before using. The hands and clothing of the person preparing the food should be appetless.

An abundance of more reasons.

An abundance of pure water should, be given the beby. It is safer to boil all water given the child and never to give him very cold water. It should be lugewarm when This road runs west to Ghost Lake. We sleep at the inn there—if you mean to cross the weeds on foot. Stormount nodded, consulted his map and compass, pocketed both, unbuckled his spurs.

When he was ready he gave his beids to Lakens.

"The just like to see what she's up to," he remarked.

The forest was open smid a big stand of white pine and hemicok, and Stormout traveled easily and swiftly. He had struck a line by compass that must cross the direction taken by Bye Strayer when she left Clinch's. But it was a wild chance that he would ever run across her.

Par away in the open ferrest Stornont heard the shot and turned in
hat direction.

But Eye already was very near
when the young man who called himself Hal Smith fired at one of Harrod's deer—a three-prong buck, on
the edge of the dead water.

Smith had drawn and dressed the
buck by the time the girl found him.

He was cleaning up when she arrived squatting by the water's edge
when he heard her voice across the
swelle:

"Emith! The state troopers are
looking for you!"

He whod up, dried his hands on his
breeches. The girl pleked her way
across the bog jumping from one fusseck to the next.

When she told him what had happened he began to laugh.

"Did you really stick up this man?"
she asked incredulously.

THE Autumn and Winter styles display a dignity and fluent grace that place them in a class quite apart from anything designers have given us lately. Simplicity has given way to a sophistication elaborate to the point of gorgeousness in some of the more formal frocks. The new fashion phase appears in swelte draperies, intricately cut sleeves, circular skirts, uneven heme and novel trimming conceits. Even the tailleur shows skirts draped at the side, and some models have the uneven hem generally reserved for dresses. A decided novelty in suits is the entire fur coat, the peltry matching in color the accompanying skirt. Then there are smart suits of satin-surfaced woolens, ciffied and collared with luxurious lux. A YEAR AGO

The Yankees blanked the Glants in the opening game of the world's series a year age, 3 to 9. Mays went the full route for the American league jeam and let the Giahts dows with five hits, four of which were collected by Frank Frisch. Phil Douglas started for the Glants, but was replaced before the game was over by Barnes. One of the outstanding features of the game was MoNally's clean steal of home. Ruth knocked in one run with a single and Bob Meusel drove in the last with a long triple.

Watch For the Hemer.

Will the home run be an important factor in the world's series this year? The lively ball came into prominence last year for the first time and it was predicted throughout the country that the circuit smash would undoubtedly be the determining factor in more than one game of the 1921 series. But it wasn't. The pitching was too good. Babs Ruth and George Kelly were practically helpless. In fact, for a few days Kelly was the goat of the series due to his inability to even hit the ball safely within the enclosure. Kelly will probably find the going rougher than Ruth this year on account of the difference in the pitching strength of the two clubs. But the home run habit was worse the past season than in 1921 and the round trip blow is very apt to play an important role this year.

All Histing In Stride.

Ruth and Kelly aren't the only circuit smashers who will figure in the series. The Meusel brothers cannot afford to be overlooked nor can any of the regulars on either club. The Yankees poled about 100 homers this season and the Giants almost as many. Every man was hitting in his regular stride when the championship season anded and unless another batch of phenomenal world series pitching is uncorked the fans in the right field bleachers will carry away several souvenirs of the 1922 series.

Ruriers Suffer,

A hurler's life has been anything but pleasant the past two seasons. When pitchers' battles held the limelight and the flinger reigned supreme a howl went up for more hitting. The fans were tired of games won by one run. They wanted walloping. The first move the magnates made to safisfy the public was to take away the pitchar's apender of all freak delivery. The abeliahing of all freak delivery. The abeliahing of all freak deliveries, including the spitchal, drove many a big league hurler to cover. Still the public wasn't satisfied. Give us more hitting, was the cry. Then the baseball manufacturer took it upon himself to solve the difficulty and the lively ball was introduced.

He can get a dapable substitute for any positions on his club within the limit of time for transportation. There are two reasons for the—he can make sufficient inducements and he knows where the material is.

Has as rean Paw.

In regard to discipline, McGraw insists on physical litieses. He has an iron paw and is no respector of persons. He never calls a conference of outside powers. The game was brilliantly fielded, both teams played errorless ball and time and again making plays in the field which cut off runs. The finish was especially thrilling, Lamb for Tules making a brilliant throw to the plate from center field to retire Mullen in the last half of the twelfth, thus averting a Mobile victory.

Tulsa started strong at the bat, forcing Acosta's retirement after two innings. Beamett led off with a walk, Thompson sacrificed and Yank Davis, home run kt.g of the Western league, upheld his reputation by parking Acosta's first pitch. Another run came in the second on Stuart's single and Danforth's long double.

A walk to Thompson, Davis' saegfice and Lilivelt's third single produced the only run Henry yielded. This came in the eighth after Mobile had forged about by accoing four times in the fifth and sixth. R. Williams' home run in the fifth accounted for the Bears' first run, Danforth having pitched well high perfect ball up to this point. But in the next fining the Alabamans got the range on the Tulsa southpaw, driving in three runs. D. Williams was hit, Cueto singled, Nishoff purposely passed and Mulvey and R. Williams singled. Why some people sleep 'Lightly'

THE PRINCIPAL REASON is irritated nerves, and the - common cause of nerve-irritation is coffee and tea drinking. For each cup of coffee or tea contains from one and onehalf to three grains of caffeine.

Caffeine has a tendency to agitate the nervous system, when the nerves, normally, should be relaxed. The result is that you fail to get the deep, restful sleep that restores health

If you have any idea that coffee or tea is injurious to your health, drink delicious Postum, instead. Postum is the pure cereal beverage that helps the nervous system, by permitting you get sound, revitalizing sleep.

Serve this fragrant, mealtime beverage. You and the family will be surprised and pleased with its delicious, coffeelike flavor. And better health is worth while.

Postum comes in two forms:-Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages, for those who prefer to make the drink while the meal is being prepared) made by boiling fully twenty minutes.
