SLAYER OF MRS. BEY MYERS STILL AT LARGE

WICHITA, TEXAS, Jan. 6.—The funeral of Mrs. Ben Myers, shot to death at Arlington Thursday night, was held here today. Her slayer has not been captured according to word received here by E. Perry, father of the dead woman. He is a farmer and until today he had no knowledge that his daughter had been divorced from Ben Myers of Oklahoma City. She had not told the family her troubles, he said.

CAPTAIN BLACK NOT IN JAIL OUT ON BOND

WASHINGTON, Jan. 6.—Captain C. F. Black, in connection with "whoop" revenue to the government five El Paso merchants have been indicted in cases growing out of alleged fraudulent sale of government property at Fort Bliss, is now serving a thirty months term in Leavenworth penitentiary as was stated in the dispatch announcing the indictments, but is at liberty on bail and has six months to perfect his appeal. Black was sentenced to two years and six months.

SEVEN INJURED AT BRECKENRIDGE TOW ROAD TO RECOVERY

BRECKENRIDGE, TEXAS, Jan. 6.—Eleven men were blown from the main building of the Central Glass and Insulating company in New Ellsboro north of here, when a gas explosion wrecked the building, were reported recovering today. Property damage was estimated at approximately \$25,000 by company officials.

Woman Found Dangling From End of Blanket

PORT ARTHUR, TEXAS, Jan. 6.—Dangling from the end of a blanket tied to the ceiling of a cell in the city jail at Port Arthur, Texas, was found the body of a woman who was found in a semi-conscious condition about 2 o'clock this morning by Desk Sergeant Harry Himes, who went into the jail to investigate the screaming set up by the other prisoners in adjoining cells. It was reported at police headquarters.

WEATHER FORECAST FOR COMING WEEK

BORAH IS OUTSTANDING FIGURE IN INTERNATIONAL AFFAIRS

CAN ONLY ESCAPE LEADERSHIP IN THIS COUNTRY BY OWN ACT DECLINING OR MAKING MISSTEP

By MARK SULLIVAN
National Political Correspondent of the New York Evening Post and
Wichita Daily Times
(Copyright, 1923, by the New York Evening Post)

WASHINGTON, Jan. 6.—It would be hard to overestimate the place Senator Borah has come to hold not only within our own country, but in the world. It is not difficult to imagine him stepping into the position Woodrow Wilson had, as the principal leader of world thought in the field of the relations of the nations with each other, a pioneer in the new conception of international relations. Indeed, he might go further and say that Senator Borah can only escape this leadership by some action of his own, either in the nature of deliberate refusal of the crown, or in the nature of an unintended misstep.

This may seem like an extravagant statement. But the hunger of the world for a Moses is so great, and the number of men now in active public life in any country, who have the vision, the degree of confidence on the part of the public, the freedom from limitations, and the other equipment for such leadership, is so small, that it is possible to challenge anyone to name another man equally available for this kind of function.

Probably, one ought not to venture on so sweeping a prediction on an occasion when there is lack of space for complete particulars to support it. One might point to how Borah has the advantage over such men as Hughes and Hoover by reason of that very freedom from the restraints of official responsibility, and equally from the constraints of party policy, which makes it possible for Borah to have no need to think of any consideration except giving out to the world the fruits of his study and reflection. One might point to the fact that at the same time he is able to throw away the advantages of his position. These things, and many more, ought to be set down.

But it is not the intention of the present article to attempt a portrait of Senator Borah, but to point out that anyone who has had much chance to observe the subject of it, and who is not a partisan, will be completely done, would be set down.

The effort of the present article is merely to recall two conversations with Senator Borah which have taken place in the past few years—two which have strikingly important interest and value at the present moment, and which give the reader a picture of Borah's position in the field of international relations, quite different from the one commonly held by the public, a public which has seen Borah only as an uncompromising opponent of the one concept of international relations which has been made in the direction of cooperation among the nations.

One day, about the time the league of nations was in the making—just before the month of June, 1919, I dropped into Senator Borah's office. The general subject of discussion was the personalities and issues likely to come to the front in the presidential election of 1920, which was just then appearing on the horizon a year ahead. I asked Senator Borah what he thought would be the leading issues in the 1920 election. He replied with a few words which indicated that he had given much thought to the question and had arrived at a clear conclusion.

"The issue," he said, "will be the league of nations. I had given but little thought to the question until it had just occurred to me in the course of our conversation over similar topics. The promptness and definiteness of his answer, together with the nature of the answer itself, struck me with a surprise which I probably checked in my manner, and which Borah immediately launched into an earnest exposition of the grounds for his belief. These grounds were early a summary of present facts, and were partly based on historic parallels of the earliest sections of international history, and partly on a personal campaign was fought on the issue of whether we should assent to France's asking that we should join France's than new republic in an alliance against our recent common enemy, Great Britain.

Senator Borah's conclusion, summarized as well as is possible after the lapse of nearly four years, was about as follows:

"The only question involving foreign relations is to the front, that question takes precedence in the interest of the people over all other questions.

I said that I supposed the question of the league of nations would be out of the way within a few months, and long before the election of 1920—that either the senate would have ratified it or rejected it, and in either event, that would be the end.

Borah, speaking with grave earnestness, replied that he did not think it would be the end. If it were ratified and America joined, then there will be a movement to secede from it—of one or more states. I will do it myself, and our action will be the chief issue of the election of 1920. If the senate rejects it, then the advocates of the league will keep up the fight, and they will have the issue of 1924.

I asked the visit and went out from Senator Borah's office to the Capitol grounds in a mood of respectful respect for Borah as a man who would devote himself to history and other study, one who knows exactly what he thinks and why he thinks it, and also one who will not flinch and reflection has been able to reduce much of politics to a little of the feeling that on this subject of the league of nations he had perhaps permitted himself to become a little obstinate.

But how completely right Borah was, everybody now knows.

The other conversation was more recent, and was a discussion of future events just now coming about it happened in the Pennsylvania station in New York when the league of nations had been completely beaten in the senate, and the time was to go before the voters of the country for "that great and solemn referendum" which President Wilson's administration had called the election of 1920 should be. As I recall, the occasion was some time during March or April, 1920, and Senator Borah had just returned to the New York station after spending in New Jersey in behalf of Hiram Johnson, then a candidate before the presidential election.

In the course of the conversation, Senator Borah said something about his position on the league of na-

tion. If West Virginia had refused to pay the money, what would the supreme court do about it? But West Virginia, as a matter of fact, refused to pay the money of the court, obeyed the decree, and paid the money.

This, Borah said, is what would ultimately happen in the case of an international court. In the beginning, when it should hand down decisions favorable to one nation, that nation might demur at obeying the decree. But if the decree were a sound one, the public opinion of the world, in the course of time, would acquire the same dignity and authority as between nations that our supreme court has over America as between states.

The conversation was so illuminating; it revealed Senator Borah as having a clearly thought-out policy of international cooperation, and what limitations of such cooperative internationalism should be, that I said to him:

"If you believe in so large a degree of international cooperation—and the other equipment for such leadership, is so small, that it is possible to challenge anyone to name another man equally available for this kind of function."

Probably, one ought not to venture on so sweeping a prediction on an occasion when there is lack of space for complete particulars to support it. One might point to how Borah has the advantage over such men as Hughes and Hoover by reason of that very freedom from the restraints of official responsibility, and equally from the constraints of party policy, which makes it possible for Borah to have no need to think of any consideration except giving out to the world the fruits of his study and reflection. One might point to the fact that at the same time he is able to throw away the advantages of his position. These things, and many more, ought to be set down.

But it is not the intention of the present article to attempt a portrait of Senator Borah, but to point out that anyone who has had much chance to observe the subject of it, and who is not a partisan, will be completely done, would be set down.

NOMINEES FOR C. OF C. DIRECTORS TO BE VOTED UPON ON JANUARY 16

Six directors of the Chamber of Commerce, one to serve for two years, and the remaining five to serve for three years, will be elected at the annual meeting of the Chamber on January 16. The five directors for three-year terms were nominated and the other nominees placed in the field. George D. Keith, W. E. Norton, J. M. McFall, W. N. Maer and W. F. Weeks, are the five whose terms expire. Two other nominations were made as a result of the vacancy occasioned by the resignation of B. F. Frye. The election will be held at the annual meeting. Holdover members of the directorate are G. C. Wood, T. R. Noble, Frank Kell, J. A. Kemp, W. D. Cline, E. E. Goodner, J. C. Mytinger, R. O. Harvey and G. H. Clark.

SETTLING THE AFFAIRS OF THE WORLD AS THEY SHOULD BE

Well, old New York has just staggered through a holiday gift of pocket flash, and the news which will be in the annals of a law-abiding nation.

The flask has supplanted the necktie as a universal gift as it is both useful and practical for the female than the male.

They are making a copper-lined one now at a small extra fee, that will last two days, until it can be emptied in to the prospective corpse.

On account of New Year's Eve falling on Sunday night, I will say this in favor of the enforcement officers; they certainly acted in a Christian-like spirit and were not a bit annoyed by the fact that they were not to be paid for their services until after 12 o'clock midnight. They certainly took care of the Sabbath and the fact that they were not to be paid for their services until after 12 o'clock midnight.

Last week the worst storms that we have experienced at sea were raging. England's debt cancelling delegation were on one boat, and Ambassador Balfour was on another. But they both finally landed; even the signature is against us. Well, you might know how bad the storm was; but you don't know how bad the signature is against us.

Don Couss has landed here too. He came to practice Auto Suggestion which Mr. Ford originated when he started to build his Synopsic car. They say the Doc's trip here is to be gratis, no money making at all. That feature alone will make him the outstanding novelty of all European visitors.

There is also another Greek King too. Quota on Greek Kings must be about used up this month. This one is going right on to Palm Beach, Fla., to receive a letter from the Queen and the King. He is exhibit A.

American Girls have been striving to marry for years to try to get a quota on Greek Kings. They say the Doc's trip here is to be gratis, no money making at all. That feature alone will make him the outstanding novelty of all European visitors.

Well, when Borah starts, it's just like a lion getting out on a circus ground. Everybody jumps high pole and holds their breath until they hear they got him back in again.

and that that's all if he wasn't there? Ain't the Farmers clamoring for it, especially the Poultry and Artistic Success that in a material way about the only thing scrapped in to see our show this week. I have a scout out and he tells me when we have some Front Page Bird on in front and I always introduce them to the audience and they stand up and bow. Well, last night we had General Pershing. And say, from the reception he got from a packed audience it sounded like the days of 1918. I introduced him, the man that congress won't listen to in regard to preparedness and peace time yet stake our entire future with in war. It seems we may have two more wars to find out who won the last one. But one thing if it hadn't been for him, we would have known who won the last one without any argument.

JURY FINDS FOR DEFENDANTS IN SUIT ON CONTRACT

In all four special issues submitted to it, in the water contract suit, the jury in the 8th district court Saturday found for the defendants.

T. K. Manley had brought action against Potts & Prentice, Toledo contractors and Wichita county for \$1250 which sum he contended was due him for water used and not paid for. He alleged that the contract called for five cents a barrel of water used in excess of 300 barrels a day.

The defendant Prentice contended that the oral contract made was for 350 barrels a day. The jury found that the contract called for 300 barrels a day and that no excess amount was used by the defendants and therefore plaintiff was entitled to nothing.

Vernon Society

VERNON, TEXAS, Jan. 6.—Mrs. L. Moore entertained at the Presbyterian manse on Tuesday honoring her niece, Miss Vera Scales. The evening was spent playing games. Those present were: Misses Thelma Tull, Annie Sue Mims, Allene Ashenburt, Winnie Wafer, Gladys Allison, Mary Weathers, Mrs. J. M. McFall, Mrs. W. N. Maer, Mrs. W. F. Weeks, Mrs. J. M. McFall, C. V. Smith, C. W. Taylor, C. J. Copeland and John Scott.

Sunday School Institute
Miss Maxine Smoot, secretary of Sunday school education for a part of Texas and Oklahoma, gave a Sunday school institute at the Christian church on Tuesday and Wednesday of this week. She was assisted by Rev. Higgins of Frederick, Okla. The institute was a part Sunday school worker and her instructions and addresses were very helpful. The Sunday school workers were very interested. Her explanation of the story telling work in the Sunday school deserves appreciation. It was a wonderful sight to see her hold in almost breathless silence 300 Sunday school children Wednesday afternoon at 4:00 o'clock. The institute was a decided success and is another evidence of the very efficient work of the pastor, Dr. Lewis F. Koip.

A beautiful gift party was given by Mrs. Alice Ashenburt on Friday afternoon in honor of Miss Rasoer who is leaving with her parents for Denton, Texas, where they will make their home. About 20 guests were present and all brought gifts for Miss Rasoer. Miss Rasoer is a high school pupil and is a member of the Y. W. C. A. She would have to leave her many friends in Vernon.

The choral division of the Musicians club met Wednesday morning at the home of Miss Vera Scales. The program was given on a Sunday evening at one of the churches of the city. Also a special service was given at the Methodist Sunday school at an early date by members of the club. The Musicians club of which Mrs. E. C. Harrison is president, is a wonderful work for the music of Vernon. A number of very fine articles will be brought to the club and through the work of the Musicians club some rare treats are in store for the music lovers of the city.

The Missionary Society of the Central church met Monday afternoon at the home of Lewis F. Koip. Mrs. John Smith was the leader of the foreign mission lesson. Those present and taking part in the mission lesson were: Mrs. James C. D. Greene, W. H. Rogers, John Smith, Harry Mason, Fred Thompson, J. M. Denny, R. Yrie, Mrs. L. L. Dickson, Mrs. M. C. Dickson, Mrs. W. F. Webb, Emily Rhodes, Misses Regina Greene, Floy Taaker, Thelma Smith and Mrs. Fergus.

Entertained with Musicians
The Sunday school teachers and officers were entertained at a limited institute at the dining room of the Vernon hotel on last Tuesday evening. The banquet was served by Mrs. J. N. Grimes. After the banquet Mrs. E. C. Harrison discussed the work of the teachers training class which will start at the Methodist church next Monday evening and last for three weeks. Those present and enjoying the banquet were: Rev. R. E. Dickenson, Mrs. R. E. Dickenson, Mrs. Walter Ferguson, Mrs. Fred Schutte, Misses Winnie Jewel Norwood, Winnie Wafer, Leslie Rasmussen and Mrs. Fergus.

2,000 AUTOMOBILES REGISTERED DURING WEEK BY COLLECTOR

During the past week over 2,000 automobiles were registered by County Tax Collector Guy C. Haley and his assistants. The exact number was not obtainable but during the first five days \$15,866.55 was collected for automobile licenses which represents at least 1,400 cars.

All day Saturday there were two continuous lines in evidence at the collector's office and the majority were registered cars. It is believed to be a conservative estimate to say that over 800 were registered Saturday.

Property tax collections for the week amounted to \$26,527.79 while a total of 135 poll taxes were paid during the first five days.

JUDGE E. W. WAPLER TO HEAR WAGNER MOTION

Judge E. W. Wapler of the 16th district court will hear the motion for a new trial in the C. M. Waggoner case this afternoon. Mr. Waggoner, who says his name is really Wagner was convicted on a charge of murder and a five year sentence was imposed. He undertook to get a new trial but the case will be appealed.

Marry for "Dolls"
LONDON, Jan. 6.—Unemployed married men receive a letter from the government than single ones. So all the unemployed are getting married to get the extra money and London mistresses can't keep their errand girls.

Air Pilot Is Fined
LEEDS, ENGLAND, Jan. 6.—Derick A. Shefferman, aviator, broke the air traffic laws when he flew over Leeds at a height lower than 2,000 feet. Magistrate fined him £14.

ORIENT RAILROAD ONE OF BIG PROBLEMS FACING THE STATE

OPERATION OF LINE NECESSARY TO PREVENT GREATEST CRISIS IN HISTORY OF WEST PART OF TEXAS

Movement to Save the Property, Started at San Angelo, Will Be Carried to Congress of United States and to the Legislature of Texas—Extensive Holdings of Line Threatened by Inability to Complete Road to Mexican Border.

ORIENT RAILROAD PROBLEM.—Over 400 miles of west Texas territory, much of which is as fertile as any in the state and on which is located a number of the most enterprising towns and small cities as will be found anywhere. Roadbed in splendid condition, with trains making as good time as many of the older lines in Texas. Having a country with a citizenship as wide awake as any in Texas, and yet for lack of completion to contemplated southern terminals and as a result of alleged antagonism of competing lines it faces this situation. Operated in 1921 at a loss of \$200,000; in 1922 with a deficit of \$250,000. Has available in the treasury only \$17,275 and will be compelled to cease operations on March 1 unless relief is afforded.

By Staff Correspondent
SAN ANGELO, TEXAS, Jan. 6.—It is such a situation as that indicated above that confronts not only W. T. Kemper, receiver for the Kansas City, Mexico & Orient railway, but the citizenship along the line in Texas, much of which is without other railroad facilities and to whom the issue is one of vital importance, depending as does their future development and prosperity on the continued operation of the line. It is then no wonder that the meeting at San Angelo on Wednesday was attended by representative citizens from Chillicothe to Del Rio, never in the history of this state has so many of those in attendance bespoken the sinners interest they had in the successful continuation of the line proposed by Lieutenant Governor Lynch Davidson. There were approximately 300 from among the leading citizens of 14 towns located from the Red river to the Rio Grande, men prominent in the affairs of this great undeveloped section of the state who realized the importance of a con-

STILWELL'S DREAM OF THE ORIENT RAILROAD

ARTHUR E. STILLWELL

Arthur E. Stilwell, who promoted the Orient railroad, is a believer in spiritualism. His actions are largely influenced by "hunches" or dreams impressing him with the importance of certain undertakings. As he expresses it, the "Brownies" tell him what to do and he acts accordingly. The Orient railroad was the outcome of one of these professed visitations. Here are the reasons for the Orient railroad's attempted construction as outlined in the mind of the founder in his "Cannibals of Finance": "The Kansas City, Mexico & Orient railroad is one of the greatest enterprises of today; it opens an empire of wealth; it opens one of the treasure houses of the world in the mines of Mexico. It will build a port that will rival any on the Pacific coast; it shortens the line across the continent; it makes a great short cut to the west coast of Mexico, Central and South America. On the line of this road, when finished, there will be three great smelting centers—the smelters now at Chihuahua, smelters at the border and smelters at the coast. The lumber of the Sierra Madre mountains will find a market far north as northern Oklahoma. It will supply all the steel for western Texas. Along the line of the finished road will be great plants for treating the ore from the dump heaps placed there in the years of long ago; along the road will be two or three cities which will equal Cripple Creek as mining centers. The port of Topolobampo will be one of the great cities of the Pacific; it will have its line of steamers to the Orient, Central and South America, New Zealand and Australia. The early vegetables, those in California, will come in train loads to Chicago and eastern markets, and the 100 miles of the Fertile Valley, as rich as the valley of the Nile, will contribute great earnings to the Orient, Central and South America, New Zealand and Australia. The great manufacturing centers of the middle west to the Pacific coast nearly 400 miles; and likewise that it would connect the tremendous undeveloped wealth of Mexico with the same source."

blance of enthusiasm in connection with his discussion of possible opposition to the movement in the state legislature when he advised that they not be modest in making their request at Austin. "You can ask for \$25,000,000," he said, "and it will be no more than the state is due this section." He reminded his hearers that whole counties in west Texas had been given for the construction of railroads located hundreds of miles from the property involved. He also called attention to the concessions made to Comstock, Christ and Galveston when emergencies were shown to exist. Something of the history of the Orient railroad will be of interest in connection with the effort to save the property, upon which more than \$10,000,000 has already been expended. The road now owns and operates more than 700 miles in Kansas, Oklahoma and Texas. In addition there is a division of the road extending 70 miles this side of Port Topolobampo, Mexico, which it is stated is self sustaining. Also there is a line extending a short distance each way from Chihuahua, Mexico, which is fast developing what is expected to soon be a profitable business. The company has several thousand acres of good timber land in Mexico from which logs are now being shipped to roads in Mexico, and it also includes in its assets a large Mexican ranch.

W. T. KEMPER Receiver Orient Railroad

chine shops at Wichita, Kansas, as will be found anywhere, in which an entire engine can be built from the ground up. With all this the line has suffered and continues to suffer financially because there has not been available money to complete the road to Del Rio in order that it may secure the advantage of shipments to and from Mexican markets. It is a local nature and, like the local passenger traffic, is not of sufficient volume to meet the current operating expenses. This fact is appreciated and understood by the Legislature. Already committees have been organized to investigate the situation. Further emphasizing the importance of closing up this gap was the statement made at the meeting Tuesday by representatives from Del Rio that a short line road required to complete connections into the interior of Mexico was now assured, with much of the line already constructed. This, it was explained, would provide a feeder that would guarantee sufficient revenue to assure the success of the property. Three Ways to Go. There are but three solutions to the problem now confronting the

IRRIGATION BOARD ELECTIONS WILL BE HELD THIS WEEK

An election will be held Tuesday in Wichita Falls water improvement district No. 1 for the selection of a board of directors for the district for the term of one year. The regular term is for two years, but the election is being held for a one year term at this time as that period will see the completion of the project. The present board of directors comprises the following: J. A. Kemp, T. B. Noble, N. H. Martin, G. C. Wood and J. E. Bridwell. Mr. Kemp is president of the board; Mr. Noble, vice president, and Mr. Martin, secretary. There will be one polling place that will be opened at the court house. An election for a board of directors will be held in district No. 1, including the territory outside district No. 1 on Saturday, January 13. The board in district No. 1 is comprised of J. R. Overby, Will Hodges, W. R. Davis, Will Gwinn and C. H. Clark.

Fourteen Girls And Seven Boys Is Birth Record

Two to one—is the birth record for the week ending January 6 show—that is the proportion of girl babies when compared with the male births. During the week, 21 births were recorded with the city physician, 14 of this number were girls. The births recorded for the past week were: Mr. and Mrs. J. F. Hirshey, 1419 Holliday, a girl. Mr. and Mrs. E. S. Marshall, 1408 Sixteenth, a girl. Mr. and Mrs. C. L. McLaughlin, 1708 Taylor, a boy. Mr. and Mrs. C. H. Phillips, 2222 Grant, a girl. Mr. and Mrs. J. A. More, 408 Lake, a boy. Mr. and Mrs. James J. Campbell, Thrift, a boy. Mr. and Mrs. Geo. Sharpe, 504 Chester, a girl. Mr. and Mrs. L. L. Swetnam, 408 Travis, a girl. Mr. and Mrs. Homer C. Jasper, 1327 Huff, a girl. Mr. and Mrs. Ben W. Tipton, Speedway avenue, a girl. Mr. and Mrs. E. C. Stewart, 1023 Fifth, a boy. Mr. and Mrs. G. D. Brollin, city, a boy. Mr. and Mrs. Fred Marley, 303 Elm, a girl. Mr. and Mrs. L. V. Fitzwater, Iowa Park road, a girl. Mr. and Mrs. E. D. Kennedy, city, a girl. Mr. and Mrs. Louis Miller, city, a boy. Mr. and Mrs. G. C. Kennet, 408 Calhoun, a girl. Mr. and Mrs. Dave Russell, city, a girl. Mr. and Mrs. J. L. Channing, city, a girl. Mr. and Mrs. Luther Hull, city, a girl.

CHANGE OF VENUE WILL BE ASKED IN TOUSSAINT CASE

DISTRICT ATTORNEY SCHENCK TO CONTEST ANY SUCH ACTION.

"ANY PLACE WITHIN 100 MILES" SAYS DEFENSE

Defendant's Counsel Contends Case Discussed Too Much to Get Fair Trial Here.

Henry John Toussaint, if his wish is complied with will not be tried again in Wichita county for the murder of his father.

A change of venue will be asked it was learned Saturday and his attorneys state that they are willing to have it transferred to any county in Texas within a radius of 100 miles Wichita Falls.

District Attorney Walter F. Schenck, stated Saturday afternoon that any motion for a change of venue in this case would be contested and strict proof would necessarily have to be made.

Toussaint was tried once before on the charge of murdering his father, O. H. Toussaint a year ago last April. The trial began the latter part of August, 1921 and was concluded on Wednesday, August 1, 1921. On that day the jury returned a verdict of guilty and assessed the death penalty.

The court of criminal appeals reversed and remanded the case for trial on grounds of misconduct of the jury.

It is likely that the case will be set down for trial some time before the second Monday in February and the last of the month.

Judge P. A. Martin has been named by Governor Pat Neff to occupy the bench in the 10th district court when this case is taken for trial. This action was taken after Judge H. H. Wilson had submitted his disqualifications in the case. Judge Wilson was serving as district attorney during the trial and prosecuted the case.

CAN GOV. JOHN M. PARKER WHIP MASKED TERRORISM AS HE DID POLITICAL RING IN NEW ORLEANS?

The writer of the following article, published in the New York Times, was until recently an officer in the regular army. He is a native of New Orleans. For five years prior to the war he was a newspaper man there and part of the time managing editor of a newspaper devoted to John M. Parker's reform politics.

"We have lost this time, gentlemen, but we will keep on fighting." Another New Orleans election for municipal officers had ended; the forces of reform again had been buried beneath an avalanche of ballots. A quiet man, of medium height, with piercing black eyes and a mustache trimmed so neatly as to be almost undetectable, sat in a chair at a table covered with a mass of papers which bore the figures of the candidates.

"Parker's family is one of the best known in Louisiana. He is the head of a large cotton factor business, and is reputed to be a millionaire. There never was the slightest reason for his entry into politics, but enter he did with the casting of his first vote. For years he was on the losing side. During that period of years he consistently refused to have his name placed on the ticket for any office.

"I want nothing for myself. I am a citizen of New Orleans and of Louisiana. It is the duty of good citizens to get good government. If we can get decent men in office I shall be satisfied." The local politicians of the ring, and even those of the reform movement which he sponsored, found him an enigma. He gave liberally of his time, his money and his efforts, and they could not understand why he always dismissed any suggestion to put his name on a ticket with something like indignation. To those who inquired as to his reasons he had one explanation.

"I want the ring whipped, beaten and destroyed," he would say. "I want the decent men and women of this city and state to be in control of their government. I want public improvements. I want a good school system and a city and state steel and every one of the places for us all to live in. We cannot do this with the ring in power. It must be destroyed some day if we only keep up the fight."

Those were the grand old days of fighting men when John M. Parker first decided to become a reformer and nothing of the Ku Klux Klan can do to him will be worse than he has faced. The old restricted district was flourishing in New Orleans. Gamblers and pickpockets, confidence men and thieves made old Rue Royal their headquarters. Gambling dens, saloons and the large vice interests were associated with the politicians and bent on keeping their protectors in power. Certain police officers were growing wealthy. One man who got only \$150 a month salary, in 19 years accumulated \$100,000 real estate. Another was reputed a millionaire and owned a racing stable and a yacht and block after block of city property.

Dominick C. O'Malley owned the old New Orleans Item and the paper was more or less a fortress which issued a bulletin once a day, and as a consequence of his opposition to the ring and the world at large his hands were so crippled by bullets that he could not hold a pencil without difficulty. Every time a municipal election or a state contest came about the line-up usually consisted of Parker leading the reformers in support of one "white collar" candidate or another at the head of the ticket. Usually one paper or another was on the side of the ring and the world at large in New Orleans were

break affairs until a few years ago. Whenever the citizenship turned to ballot a certain secret organization composed of "white collared" men at night was wont to repair to the Washington artillery hall—the armory of the famous veteran organization of the south. In this hall under the charge of old Dan Kelly, the aged armorer, were stored hundreds of riot guns and ammunition. During the days of peace preceding an election these guns were kept in their boxes, but when the citizenship turned out to vote the guns were issued to the members of the organization who had pledged themselves to see a fair count. The patrolling of streets by groups of citizens on the eve of an election was customary. Often enough the casualty list read like a nightmare.

In an atmosphere such as this Parker dared everything hundreds of times. So far as the writer can remember, he never was physically assaulted, although the prospects were that he would be at any time. But, in addition to weapons, the crusader members of the ring had other ammunition—the ammunition of abuse and innuendo, which were freely used against every opponent. But in the bitterest political campaign not once was the personal honor or integrity of Parker questioned. The worst said of him was the charge that he was an amateur.

A few years ago the scale began to turn in Parker's favor. The first thing to tip it was the purchase of the Item by its present owners, James M. Thompson, a son-in-law of the late Champ Clark, and Marshall Ballard, a young Marylander. They joined with the reform element and made the first real newspaper fight to accomplish a change of government in the state.

There was one of the romances of journalism. Thompson, who comes from an old Virginia family, and his brother Paul bought the Norfolk Dispatch just after leaving college. It was said that during their early struggles the two young men burned the exchanges in the stove for fuel. They were joined by Ballard, then on a Baltimore paper. After fighting successfully for a few years they sold the Dispatch and acquired the Item.

Then the fun began. The mayor's office, the courts, the school board and every other single public utility were taken by the ring. The police force was entirely political and had suffered from the administration of Edward Stanley Whitaker, whose greatest exploit was the attempted shooting of an editor before he was sent to jail for unspendable crimes and died there. His successor was William O'Connor, a former policeman, who vainly tried to give his office, a certain dignity; usually, however, winding up his attempted restraint in a flow of language reminiscent of his roundsman days.

It was during O'Connor's regime that the writer began to get personally acquainted with the power of the ring. John M. Parker was fighting. The paper found evidence of inefficiency and occasionally graft and published these, and once in a while descended to "guying" O'Connor and his force in editorials and cartoons. The old man, white of hair and mustache, used to sit in his easy chair. Near at hand was a great chest. In easy reach a queer arrangement, a block studded with push buttons. Outside was a door-man on duty. To this functionary the writer would state that the Item had sent him to see the inspector. Gazing with mild pity in his Irish eyes, the doorman would enter and say: "A man from the Item to see the inspector."

Then the inspector had ordered that the writer's name never be mentioned in his presence. Instantly all the bells in the place would ring. Footsteps would resound through the corridors as detectives and policemen answered, and when the signal had been set and the reporter would be admitted. It was an impressive scene. The old

inspector, seated at his desk, would gaze from his blue, round eyes. His mustache was always bristling and— a dapper sign—his cheeks and chin were turning pink. Seated about him in a dozen chairs were several detectives, all the doormen on duty and several other attendants, most of them armed. Glancing around to make certain that he had enough witnesses on hand to assure his having the better of any case that might develop, he would ask: "What does the Item want today?"

In words laden with the balm of diplomacy, the mission would be explained. He tried to make his answer polite, desperately, officially polite, but he failed always. Fausling on some well-rounded but forced period, his eyes would begin to flash, his jaws would tremble and from his lips would come a flood of curs, words, threats and abuse, which would up with the phrase: "Tell John M. Parker and the Item to go to hell!"

Never in his wildest heat against the newspaper did the inspector forget John M. Parker, whom he blamed for the reform wave. O'Connor was a good fighter, honest and sincere in his beliefs, and with his death the ring lost one of its strongest supporters. In his fight against the ring Parker at the last found his way made easier by the change of circumstances and conditions. Gradually elections became more civilized and the riot guns in the governor's cabinet were taken out. He was permitted to remain there on election night.

Colonel Ewing turned his indignance to bring about a change of conditions. Under the prodding of the Daily States the district was abolished. But while the light of reform seemed to grow in intensity, John M. Parker still refused to permit his name to be used on any ticket.

It took the late Colonel Theodore Roosevelt to convert him from his early ideas that the citizenship was prone to look with suspicion upon any man who could gain personally from the victory of his side in a political matter. Then Parker ran successfully for governor against Ruffin G. Pleasant. When the returns came in which showed that he had been beaten, one of his political opponents grinned wryly. "I wish to heaven that Parker could have won," he said. "Now that he has lost he will be a perpetual candidate until he does win. That man never quits!"

His supposition was correct. Parker received the news of the defeat with a smile and said: "Oh, very well, we shall win—next time." And next time he did. His long political fight made him many enemies and cost him a great deal of money and some friends. But during the term of years which elapsed from the time he cast his first vote Parker never wavered and never gave an inch and as a consequence he won victory from scores of defeats and strange to say, some of the very men who had most bitterly opposed him assisted in placing him in the governor's chair. Leading them all was Colonel "Bob" Ewing who, having found that Parker had been right about the ring, had turned upon

ELEVEN BOYS UNEARTH GUNS MOTORMETERS AND WHAT-NOT FOLLOWING STATEMENT OF BOY

the organization and helped fund it apart. Reports from Louisiana say that the expenses of the present campaign against the Ku Klux Klan are being paid for out of the governor's private purse. That is probably true for Parker has frequently dipped into his purse for such matters as he believed in.

One thing is certain—no matter what the present prospect in Mer Rouge and the strength of the Klan there, the organization is likely to be driven from Louisiana. Parker is just the sort of man to take a great joy in such a job. No man in American politics today so little resembles a fighter as Parker. He is of medium stature and not over strong, but he is game.

We sincerely thank our many friends and neighbors for their words of sympathy and many acts of kindness during the illness and death of our dear mother. We want you to know we appreciate your kindness. We shall never forget you. Mr. and Mrs. A. C. King—adv.

In a recent test three-quarter pounds of dirt was taken from a clean rug 3x11 in eleven minutes with a Royal Electric Cleaner. Doach Electric, 809 Ninth—adv.

others were called. Armful upon armful of property was brought in and stacked on the table.

In the stack were watches, motor-meters, plenty of them, automobile equipment and attachments of all kinds and description, guns, shot guns, revolvers, toy pistols, candies and cigarettes.

Among the collection was a shot gun which it was discovered belonged to the sheriff of Montague county. The sheriff made a trip through this country several weeks ago and stopped off here to report that he had lost a shot gun somewhere between Electra and Wichita Falls.

However it happened that the gun was taken out of his car while he stopped in Electra. All the boys were permitted to return to their parents' home.

RECOVERING FROM RECENT INJURIES SUSTAINED ON RIG

R. F. Henderson of Electra, who was brought to general hospital Friday afternoon suffering from injuries received while working on a rig belonging to Smith and McDonald in the Electra field, is reported from the hospital to be entirely out of danger.

Mr. Henderson was employed by the Smith-McDonald company of Electra and was dangerously injured while working on a rig in the Electra field Friday afternoon. He was brought immediately to the general hospital for treatment. An examination revealed a fractured skull and other minor injuries. It is not thought that his injuries will prove fatal.

PAT CARRIGAN POST FREE AND OUT OF DEBT

LOCAL LEGION POST BEGINS LIFE ANEW WITH BIRTH OF NEW YEAR.

ENTERTAINMENT TO BE GIVEN NEW MEMBERS

Major Culbertson is Given Credit For Bringing Post Back To Life.

On September 1, the Pat Carrigan post of the American Legion did not have a very favorable outlook. The doors to the hall were closed; the lights, water and gas were disconnected and in the office of the adjutant, bills amounting to \$1,200 hung on the file past due. At that time there were 206 members enrolled in the local post.

The heavy debt which grew out of the expenses incurred in the aviation meet, caused men to lose interest in the organization and drop their names from the roll and the very existence of the post seemed doomed.

A few loyal workers banded together to see how they could be renewed the post to its former life. A committee composed of Major Culbertson, Captain D. M. Perkins and Sam Beattie visited the creditors with the statements that remained on the file unpaid, and explained the situation. As a result most of the merchants discounted their bills, some as high as 50 per cent.

With the debt reduced to the minimum and arrangements made for funds to settle the entire debt and with the burden removed, prospects for Pat Carrigan post began to improve. The interest and financial condition of the organization has continued until at present the outlook is encouraging for the post to become one of the best in the state.

The debt is paid and in the future no bills will be honored except those accompanied by a written requisition from the adjutant.

Battery D, the local artillery unit under Captain J. F. Fletcher, has agreed to use the legion hall as their battery. This arrangement enables the post to cut expenses and at the same time the men from the battery are situated in better quarters than would be possible elsewhere.

Allowance from the government for the rental of a battery.

A caretaker is now employed to spend his entire time in the hall; his duties are to care for the hall, keep order and furnish information. In this way it is possible to keep the hall open at all times and to have one of the best in the state; in the main auditorium and in the smaller rooms, pool tables and various games are furnished for the amusement of the men. Rentals received from the dances add the revenue from the city league basketball games also help defray the expenses of the post.

Through the efforts of the United Charities, the legion was listed with that organization and was allowed a quota of \$2,000 for charity among ex-service men that was brought to their attention. Calls are received almost daily from ex-service men for assistance and an effort is being made to disburse the funds where they are most needed. It is the policy of the adjutant when approached for help to require the applicant to use the showers, razors and other conveniences furnished in the legion hall. With this start the men are given a meal and a small amount of money and maybe the prospects of a job and is ready to take a new start.

Next week, the date to be announced later, the legion will entertain the new members who have been added to the roll recently with a banquet. At this time the officers for the year will be elected and plans for the continued progress of the post will be considered.

When asked how he accounted for the remarkable comeback which the post staged, Sam Beattie, post adjutant said that it was the efficient work and attention of Major Culbertson since his induction into the office as post commander which had put the legion on its feet.

The recent membership campaign brought in few applications as a result of the indebtedness of the organization at the time it was launched. Since the beginning of the year applications have been numerous and the post is beginning the new year with about 50 substantial members who are in good standing. With these as a nucleus, and the organization on a sound financial basis, the prospects are bright for a successful year.

CHAPLIN OF 142D INFANTRY SPENDING A WEEK IN THE CITY HAS HISTORY OF ORGANIZATION

C. H. Barnes of Hunter, Oklahoma, who was chaplain of the 142d infantry, and who will be remembered by many on the boys of companies "F" and "G" who were overseas with that regiment, is in the city this week in the interest of his history of the organization.

Barnes has recently published a complete history of the regiment from the time the organization first came into existence officially, on October 18, 1917, through the days in training camps and on the front lines until the signing of the armistice.

The history is unusual in its completeness. Chaplain Barnes acknowledges his indebtedness to Colonel A. W. Bloor, Major Thomas Barton and Sergeant Major Chas. M. Crawford for much of the data used in the publication. There is the inside story that can be told only by a chaplain or someone who was very closely connected with the men in addition to being chaplain. Mr. Barnes served as coach for the famous football squad of the 142d and in this way gained an insight into the lives of the men.

A detailed account of the life in the training camps, the trip across the Atlantic, the graphic descriptions of the engagements in which the regiment took part make the volume interesting and at the same time a storehouse of information. There are 142 men who were buried in one grave is described at length.

Three Distinct Features. The history contains three distinct features: the names of the men who were killed and wounded with statements from eye witnesses, where possible, as to how they met death, their last words and grave locations, is given in the book. A complete list of those who died from disease, wounds and accidents is also recorded; the names of those who were decorated or cited for bravery is included in the history.

The intimate accounts of the deeds of valor, the fighting spirit of the Texas and Oklahoma troops and the careful and interesting way in which it is told, together with the valuable data that is contained in the book have appealed to all men from the regiment who have seen it. Chaplain Barnes has met with remarkable success here as in other towns where men were interested in securing a record that would perpetuate the deeds of the regiment when memory failed. Oklahoma and Texas boys from the 142d have been loud in their praise of the author for his valuable work in compiling this information.

Chaplain Barnes will be in the city for several days and is interested in seeing many who were in this regiment who know him. He is registered at the Marion hotel.

Half Mile of Track Damaged On Santa Fe

PONCA CITY, OKLA., Jan. 6.—Southbound Santa Fe passenger train No. 11, Kansas City to Galveston, was derailed four miles north of Orlando, Okla., at 7 o'clock this morning. No one was injured seriously. All but one car left the tracks but returned to the main line. The engine and one of the passenger cars were damaged and track for a quarter of a mile was torn up. The cause of the accident has not been ascertained.

Several of the cars were smashed and railroad men said it was remarkable that no one was killed. The train is said to be the fastest on the Santa Fe system.

Erwin Bergdoll Will Appear in Fight for Pardon

KANSAS CITY, KAN., Jan. 6.—Erwin Bergdoll, brother of the arch slacker, Grover Bergdoll, will appear in the supreme court to terminate his sentence for draft evasion, his attorney announced tonight.

An application by Bergdoll, for his freedom on the grounds that former President Woodrow Wilson had issued a proclamation that draft dodgers would only be required to serve peace time sentences, recently was overruled by Federal Judge Pollock.

SHOPMEN'S ATTORNEY HELD ON \$1,000 BOND

OKLAHOMA CITY, Jan. 6.—William N. Mahen, attorney for the striking shopmen, who was arrested at Shawnee late last night on a charge of criminal contempt of a federal court order, was arraigned before a United States commissioner here today and held to the grand jury in bond of \$1,000.

LEGISLATIVE PLANS INDICATE A LIVELY SESSION AT AUSTIN

LITTLE TO FORECAST SENTIMENT ON PLAN FOR NEW CONSTITUTION.

A. & M. COLLEGE BILL IS EXPECTED TO PASS

Radical Suggestions of Governor Seem to Have Fallen Flat.

By Staff Correspondent. AUSTIN, TEXAS, Jan. 6.—The legislative program which Governor Neff has been presenting in a series of speeches during the past few weeks will form the basis for his message to the legislature next week, and if "even a smail part" of that program is enacted into law, the session will prove a strenuous and interesting one.

If the move for a constitutional convention is carried out, it will block the progress of other legislation. It is not yet apparent that the movement is going to get very far, for the speakering contest has the right of way until it is determined and there has been nothing in the way of a general letting out of sentiment. In the house, support for a constitutional convention is strong; the senate has only 18 of its 51 members definitely committed for it, and an equal number opposed, with the remainder still on the fence.

Other items on the Neff program are receiving scant attention. His radical suggestions for dealing with the liquor traffic have fallen rather flat in a state that feels that enforcement of prohibition is a federal business. His advocacy of needed changes in court procedure meets with more favor, but in a legislature very largely made up of lawyers such measures are easily passed.

The west Texas A. & M. measure will come in for its share of attention, and has a good chance for passage now that west Texas representation in the house is materially increased. If passed, it again faces the danger of being lost. The governor is understood to oppose establishing any additional educational institutions until after a systematic survey has been made of the state's educational possessions and needs. Two legislatures have refused permission for such a survey, but the very beginning of the state's educational survey has been refused.

Free Abram's Clinics. Are Being Established in Large Cities. Pearson's publication and other organizations, seeking the wonders performed by Abram's electronic reactions, are financing Free Clinics in the large cities. No other method has ever proved as remarkable in the treatment of a wide variety of ailments as this. The results being obtained justify more patronage than can be taken care of. The three un conquerable diseases, cancer, tuberculosis and syphilis, which were increasing each year in spite of conscientious research and treatment, are now being cured in a few weeks. The chronic as well as acute diseases respond as quickly. Diabetes, epilepsy, paralysis, nervousness, rheumatism, stomach, kidney, bladder and liver diseases, hay fever, asthma, female diseases and acute diseases. Diagnosis is a mathematical, scientific method, which detects not only disease, but the very beginning of disease even before patient is aware of symptoms, the organs or parts involved or that will be involved are localized and the potentiality of disease is measured. Dr. Lockman Physio Clinical Laboratories, Waggoner building—adv.

NEW YEAR MESSAGE BY ACTING PASTOR CHRISTIAN CHURCH

Sunday morning at the First Christian church, Mr. Hancock, acting pastor, will speak on the subject, "Where Are You Going?" With a large number of people it would be appropriate for them to stand up and sing, "I don't know where I am going, but I am on my way."

It is really true that many people are not going anywhere. You must be going somewhere if you ever arrive. The pitiful truth back of the glad, empty, wasteful, poverty stricken life is lack of direction, objective, purpose, goal, individuality, concern and character. It is following definite, constructive, purposeful program never arrive. Where are you going this year?

Sunday evening Mr. Hancock will speak on "Common Ground and Common Sense." At the evening service Mr. Ethel Allen Nelson will render a violin solo and the chorus choir will sing Rodney's "Calvary." In the bible school Sunday morning the classes will study the first chapter of Luke.

Yarn Used Is Spun On An Old Fashioned Wheel

In this modern day of wonders, it seems strange to see reminders of the old-fashioned spinning wheel and other crude machinery of the past, but there is an exhibition in the window of the Little Sporting Goods company a home spun, home knit sweater.

The sweater, which was made by Miss Lena Fletcher, is of the coat type, and is of pure goat wool raised by W. J. Fletcher, six miles east of town. Although somewhat crude, it looks as though it could serve the purpose of keeping the body warm as well as a factory knit garment. The yarn for the sweater was spun on an old fashioned spinning wheel, used many years ago.

Vernon Churches

The First Methodist church, Vernon, Texas, Robert E. Dickenson, D. D. pastor, E. D. L. Killough, Sunday school superintendent, 9:30 a. m. Sunday school.

Organ Voluntary, "Psalms March in F"—Roberts. Hymn 164, "O Worship the King," The Apostles' Creed, recited by all, still standing.

Prayer, concluding with the Lord's Prayer, repeated audibly by all present. Anthem, "Nearer My God to Thee"—Mason, the choir.

The Gloria Patri. Lesson from the New Testament. Offertory, "Song Without Words"—Tchaikowsky. Hymn 18, "Come, Thou Fount of Every Blessing."

Sermon by Dr. Dickenson; theme, "A Fresh Start." Prayer by the pastor. Hymn 218, "A Charge to Keep I Have." Benediction of new members.

Prayer. Benediction. Postlude—Parker. 8 p. m., the community service in the church. Address by Rev. T. E. Milholland.

8 p. m., the young people's service. The evening worship. Prelude, "Awakening"—Engelmann. Hymn 218, "Blessed Land." Hymn 25, "Rock of Ages." Prayer.

Chorus, "Lead Me Gently Home"—Thompson. Selection 29, "I Will Take Heed to My Ways."

Organ, "Cradle Song"—Botting. Benediction by the pastor, "The Prudential Who Returned Home." Hymn 121, "I'm Coming Home." Confession Jesus Christ tonight. Reception of members.

Benediction. Postlude—Parker. Mrs. Roy McCombe, violinist. R. D. Killough, Sunday school superintendent, gave a banquet to the officers and teachers at the Vernon hotel last Tuesday night. A fine attendance, a fine turkey dinner and a delightful fellowship made every one happy.

The training class of the Sunday school is going to use as a text book, "The Pupil." The class sessions will be held at the church on Monday, Tuesday, Thursday and Friday nights at seven o'clock. The class will recite on the first chapter next Monday night. Persons wishing to enroll are requested to report to Judge Killough or Dr. Dickenson not later than Sunday.

Dr. Mims will address the Sunday school training class next Tuesday night on the subject, "The Sunday School Teacher As a Soul Winner." Mrs. C. J. Farrell will speak to the training class on next Thursday night, using as a theme, "The Value of Story Telling to the Pupil." Mrs. Robert E. Dickenson will

Peace Is Again Imminent In Irish Affairs

DUBLIN, Jan. 6.—A definite move toward peace between the Irish republicans and free states is under way, it was learned today with the announcement that a peace convention will meet here tomorrow with 150 delegates, two from each branch of the Sinn Fein organization in the city and county of Dublin in attendance.

The convention was arranged by committees composed equally of republicans and free state representatives. Its purpose is to summon the Irish, or general convention of the whole Sinn Fein body, which still includes representatives of both sides in the conflict. The plan for a truce and subsequent peace would be submitted to the Irish.

Previous peace movements looking to a compromise have not been favorably received by the free state government. It was pointed out this afternoon, President Cosgrave of the dual stream had characterized the many peace resolutions that have come to the authorities as "moonshine." The four courts building in Dublin was the headquarters of the Irishmen. They seized it last April and held it until July.

THEY FOR FIRST PLACE IN CALIFORNIA MEET SAN FRANCISCO, Jan. 6.—Joe Kirkwood, former Australian champion, and MacDonald Smith, San Francisco professional, were tied for first place with scores of 289 for 72 holes at the close today of the state open golf tournament. A play-off will take place next week at the Ingalls course here.

STUDENTS WILL UNDERGO DREADED ORDEAL - EXAMS

When the students of Wichita Falls assemble Monday in the school rooms, it will be to take the most dreaded ordeal in the school year—the final examinations. The first semester of the year closed Friday afternoon, and the week, opening Monday, will be devoted entirely to the midterm exams.

At the high school the following schedule will be observed: Monday, from 9 to 11 a. m., English; from 1 to 4 p. m., all double period subjects; Tuesday, from 9 to 12 a. m., history; from 1 to 4 p. m., languages; Wednesday, from 9 to 12 a. m., mathematics; from 1 to 4 p. m., public speaking; Thursday, from 9 to 12 a. m., co-eds.

In the junior college, English will be the first subject, followed Tuesday, chemistry and biology; Wednesday, Spanish, domestic art, mechanical drawing and music; Thursday, and mathematics on Friday.

Students taking examinations are expected to report at 8 o'clock as usual.

THE NEWS OF ALL THE SPORTS ALL THE TIME

GYOTE CAGERS TO DATE HAVE A CLEAN SLATE

With the start the high school season, many factors in the basketball season, the red and black could bring home some worth while honors from the court this year. Four city league teams, and two city, and a high school outfit, have already gone down before the season.

The season's schedule has not yet been completed. On Thursday at the American League hall the Coyotes will probably meet the undefeated low Park team of Burkhardt, although arrangements for games at that time have not been made.

On January 29 the schedule calls for a contest with Missouri at the gym hall with a return to be played at Electro the following week. Plans are also underway for games with Archer City and other nearby towns before the fourteenth.

The athletic association has been having a busy season, and is planning for the night school, providing for all games with the exception of tournament or championship contests.

The tournament, which will probably be played in this city, is to be held February second and third. Since Wichita Falls is a city of 25,000 population, the Coyotes will not be forced to enter the county matches, but they will play in the district games, February 9, 10 and 11.

The Coyotes have been showing up well under the coaching of Jim Keeler. All the games they have played have been won with apparently no difficulty, and the team-like work of the team is taking a decided effect among local fans.

KAMM IS PULLING FOR COLLINS TO REMAIN WITH SOX

By NEA Service.
SAN FRANCISCO, Jan. 6.—Willie Kamm is one ball player who hopes the deal that New York is trying to make for Eddie Collins falls to go through.

Willie Kamm, be it known, is the infielder for whom the Chicago White Sox paid San Francisco the sum of \$100,000.

Kamm is really a great ball player. "He has a fine pair of hands, and during the last two years has come out as a hitter. No player ever went to the majors with greater springs. Here is Kamm's reason for hoping Collins remains with the White Sox:

"College league players tell me that Collins is a great fellow with the recruits. They say that he goes out of his way to help them. I am positive I will make good for Chicago, but feel that Collins would greatly help me on the road to success. I hope to be selfish, but I will be mighty well pleased if New York fails to land him."

WRESTLING COMES BACK STRONG AMONG POPULAR COLLEGE SPORTS

Wrestling is staging a remarkable comeback as a collegiate sport. The man best qualified to talk about it is Paul Frenn, coach of the University of Illinois wrestling team, which has lost only one out of 15 dual meets since Frank Lock charge three years ago. Frenn himself won the middleweight championship at the inter-collegiate games in Paris in 1919 and is prominent contender for the middleweight championship of the world.

By PAUL FRENN.
During the last ten years professional wrestling has not been as popular as it once was. The fact that some wrestlers have been corrupted by gamblers, and that the sport has become a mere show, does not exist today and men of finer physique and better education are entering the game with beneficial results to the sport.

The "Hollywood" wrestler of the past is being displaced by the scientific mat wrestler of the present, and the game of mere brute strength is rapidly disappearing.

Wrestling is now a scientific study. The old rough-and-tumble wrestlers have practically vanished and men with both speed and science have taken their places.

Definite principles of leverage are applied to all the holds of the modern wrestler.

Strength is still valuable, but more basic force will not overcome the scientific expert. The scientific improvement of the last few years is phenomenal, but is due to the superior group of men who are studying the game with the idea of making it more valuable to those interested in sports. The result is that large universities are retaining it, and value in conditioning men for other sports.

It proves useful particularly in football, even assisting coaches to develop players of self fair ability, and stars.

The case of Jim McMillen, captain of the University of Illinois football team for 1932, is well worth citing.

McMillen was selected as Billy Evans' national honor roll as one of the best guards in the United States this season, although he was unheard of in 1931.

Proven Apt Player.
At the close of his first season on the football squad he took up wrestling under the advice of Bob Zuppke, Illinois' famous football coach.

McMillen took to wrestling like a duck to the water and won the heavyweight championship of the conference.

When he reported for football last fall Zuppke says he was a different man. His speed had improved, he could drive through the line faster, and kept his balance.

For developing there is no other sport like wrestling. It requires speed, uses every muscle, teaches a man poise and self-command, and makes him aggressive as no other sport will. A fine coach of the country over are beginning to realize.

Tomorrow: Coach Frenn will discuss "The Crying Need of College Wrestling."

WEAKNESS AT BAT GREATEST FAULT OF COLLEGIANS

By NEA Service.
BOSTON, MASS., Jan. 6.—Jack Hattery, who for several years has coached the Harvard baseball team with success, is the authority for the statement that might few college ballplayers have the ability to step right into the majors and make good.

"Players like Slater and Frenn are rare exceptions in the college ranks," says Hattery. "Slater came to the Browns from Michigan and Frenn to the Giants from Fordham, and both were stars from the start. They are a couple of top birds in college baseball."

"Most college players find the pitching in the majors so far better than the college brand that they are lost at the plate."

"Good college pitchers can make a great coach out of their mentor. That is one reason why I look for Joe Wood of Cleveland to be very successful at Yale."

"God, a great pitcher in his day, should be able to develop a good staff of twirlers. A college coach in all set for a prosperous season with good pitching. The fact that Wood was a big league pitcher is certain to work greatly to his advantage in his new job."

BULLSEYES OF BASEBALL

LOSES BELT IN ROUND NO. 51 AT MEXICO CITY

MEXICO CITY, Jan. 6.—Jimmy Dundee lost the lightweight boxing championship of Mexico last night to Marcel Montes of San Antonio in the fifty-first round of their bout here, when he was sent down for the count by a blow to the jaw.

The men tore at each other incessantly but were comparatively fresh when they answered the bell for the final round. The fight was head in the ball ring before a crowd of more than 2,000 persons.

The Royal Rans master, gets wired out, and won't wear out your rug. Doeh Electric, 205 Ninth.—adv.

CHAMPION SAYS LOSS OF FINGER NO OBSTACLE

CHICAGO, Jan. 6.—William Riggs, champion tennis player of the world, tonight declared he was entirely confident of regaining his old time form, despite the operation through which he lost one hand of the greatest finger of his trunk hand.

The world's greatest living tennis player was interviewed just after he had smashed his way to victory over Francis Hunter, indoor champion here this afternoon 5-4, 3-4, and 6-4.

Riggs showed the same dash and form which marked his play before the serious loss in the operation.

"Riggs said there was a slight loss in the finger while playing certain holes such as returning a hard hit ball. However he believes this was merely a hindrance, but not the knowledge that the tip of the finger was missing, rather than any actual pain.

Willie Keeler Created Many Baseball Records

By BILLY EVANS.
Willie Keeler is dead.

In his day Willie Keeler stood out as prominently as Ty Cobb of today.

No greater compliment could be paid the veteran.

Many batting records are credited to him.

His feat of hitting sixty in 44 consecutive games still stands. Ty Cobb has never done it in 44 straight games. George Sisler in 41.

During 1912 his record of 229 runs in one season stood as a record in the National League.

Last year Rogers Hornsby surpassed it with 226.

For eight years, from 1894 to 1898, Keeler established ten unique records by making more than 100 runs and more than 100 hits each season.

These are just a few of the remarkable feats that Keeler performed at the bat.

Which one of them did Keeler regard as the greatest?

A few years ago I wrote Keeler, asking him to tell me what he regarded as his greatest performance.

Keeler didn't mention one of the feats that I have enumerated. Here is his letter:

"Records didn't mean much to me in baseball. Winning ball games was my first thought.

"The record books credit me with a great many batting records, but I mention what I regard as the real feature of my career in baseball.

My Greatest Performance.
"While my memory is a trifle hazy as to actual facts, I want to let you know a few things in the National League, covering parts of three seasons, before I was struck out. My record books credit me with a great many batting records, but I mention what I regard as the real feature of my career in baseball.

"As I recall it, I started my record the last end of the season of 1894, when I hit 100 in the series of 1894 without whiffing, and played a number of games in the spring of 1897 before I was relieved of the strike-out record.

"The National League had some good pitchers in those days. Cy Young, C. C. Ebbets, R. Johnson, Iphig, Rhines, Nichols, Clarke, Griffith, Killam, Hawley and a host of others.

"I hit 100 in all my records, going to hit 100 times without striking out. It really the best in my opinion."

COACHES LAUD ABILITY OF GONZAGA HALFBACK

One year ago Gonzaga college and Houston Stockton were little known in the football world.

Today they are national dignitaries in the gridiron world.

Gonzaga college by its great game against the strong University of West Virginia last year, placed in the sporting spotlight.

Gonzaga lost 12 to 13 but treated the Northwest as a real game.

Charles Doran, an coach is responsible for the arrival of Gonzaga.

PHILADELPHIA, Jan. 16.—Three hours of police were called to suppress a riot today when a score of prohibition agents raided the saloon of Thomas Dzak, in the heart of the city. Some two hundred men were in the place when the raid occurred.

Some one seized a stack of plates from the lunch counter and started to throw them, while cries of "mob" and "throwing continued until a policeman batted his way forward and confiscated the remaining ammunition.

Things had quieted down some when one agent displayed a pistol. This was the signal for a fresh outbreak and the police were compelled to use black jacks to quell it. The Agents announced that they had found 20 barrels of unlawful beer, forty half barrels and 45 cases of bottles. It was also announced that application would be made for an injunction to close the place permanently.

THANKS BOARD FOR PLACING NAME ON RECOMMENDATIONS

R. L. Yates, who concluded his work as juvenile officer of the county Saturday night, expressed his thanks to the school board for placing his name on the list of recommendations submitted to the county judge.

He also stated that he wanted to thank the principals and teachers of the various schools for their cooperation to the parents and children of the county and the peace officers for the assistance given, and to all others who have made his term of office a pleasant one.

"If I have the ill feeling of anyone, in the county or among the boys and girls whom I have conveyed to the training school, I am not aware of it," Mr. Yates said, "and in leaving the office to Mr. Bralley, my successor, I want to say that all the inmates among the children are off the streets during school hours and in school and that the juvenile jail is absolutely empty."

Yates also stated that at the present time there are 290 more children attending the schools than at any other time in the history of the county and city despite the loss in population.

Former Minister Pleads Guilty to Breaking Jail

MALDEN, OKLA., Jan. 6.—At the expiration of the three months jail term for wife desertion, J. C. Trotter, former pastor of a church at Hildenville, today pleaded guilty to a charge of breaking jail and was sentenced to six months imprisonment.

The former minister is yet to be tried on charges of embezzlement in funds of Brooks institute, a charitable institution at Hildenville, of which he was financial secretary.

Tomorrow: The most unusual about I ever saw.

BASKET BALL QUIZ Referee

CONDUCT Who is responsible for the conduct of the spectators at a basketball game?

As in all other sports, the home team is held responsible for the conduct of the spectators.

RECKING Can blocking take place if there is no personal contact?

Yes, but there are certain limitations that are enforced by the referee. A player should not be permitted to dance in front of the play, he is guarding in order to obstruct his progress.

CONTACT Has a defensive player the right to place his hand on the player he is guarding so as to be in a position to more quickly check the play of his opponent?

The defensive player has no such right. It is a foul.

"KLAN" FREQUENTLY MENTIONED IN TRIAL, MURDER IS CHARGED

LARDO, TEXAS, Jan. 4.—Frequent mention of the Ku Klux Klan and the cross political race in Nueces county is being made here in the trial of Frank O. Robinson, former sheriff of Nueces county; Leo Petral, constable; Joe Acobo and Cleve Goff, charged with the killing of Fred Roberts, alleged Ku Klux Klan leader, in Corpus Christi on the afternoon of October 14.

Hearing of the testimony begun Saturday morning after selection of a jury had been completed late Friday.

When court opened at 9 o'clock Saturday morning, 81 witnesses answered to the call of the state and 35 to the defense call.

David Paul Corpus Christi undertaker, testified concerning burial wounds in the body which he identified at the time and was questioned on cross examination concerning the political feeling existing. Mrs. R. G. Warren told of an encounter between her husband and the former sheriff before the shooting, after which she said she went for Roberts. Her statements, which remained uncontradicted, were corroborated by her husband who took the stand next. A nearby farm hand was then introduced as witness for the state and he claimed Roberts held a pistol. Howard Grant, a deputy constable, gave his version.

At 2 p. m. a recess was taken until Monday.

Male witnesses in each instance stated whether or not they were members of the Klan.

DEPARTURE OF MAJESTIC MADE A GALA EVENT

NEW YORK, Jan. 6.—The steamship Majestic sailed out of New York today carrying a record number of midwinter passengers and with most of her first class state rooms filled with prominent persons. There was a regular "summer crowd" at the pier to see her off, and her first trip after the hard battle she had with gales on the way over she made a single event.

The Earl of Granard, first Irish senator to visit America, went back to do what he termed his bit for Ireland. He declared on sailing that he believed the republicans and the state in Ireland would soon settle their difficulties and that a united Ireland would make real progress.

Former Senator Truman H. Newberry of Michigan was aboard on the first lap of a trip around the world. His only comment on sailing was that he hoped he would enjoy the trip.

Colonel William Haskell, head of the American food administration in Russia, also was a passenger. Committed to the Canadian immigration scheme in which he has been interested.

POLICE ARE CALLED TO SUPPRESS RIOT AS RESULT OF RAID

PHILADELPHIA, Jan. 16.—Three hours of police were called to suppress a riot today when a score of prohibition agents raided the saloon of Thomas Dzak, in the heart of the city. Some two hundred men were in the place when the raid occurred.

Some one seized a stack of plates from the lunch counter and started to throw them, while cries of "mob" and "throwing continued until a policeman batted his way forward and confiscated the remaining ammunition.

Things had quieted down some when one agent displayed a pistol. This was the signal for a fresh outbreak and the police were compelled to use black jacks to quell it. The Agents announced that they had found 20 barrels of unlawful beer, forty half barrels and 45 cases of bottles. It was also announced that application would be made for an injunction to close the place permanently.

State Champions Turn Backs On 'New Organization'

WACO, TEXAS, Jan. 6.—Waco school officials will have nothing to do with the proposed new interscholastic state athletic organization, to be composed of schools in cities with more than 25,000 population, Coach Paul Tyson of the Waco High "Tigers" 1933 state interscholastic league champions, feels.

The new line up of high schools was proposed at a meeting in Fort Worth.

Twenty Robberies Occur in Kansas City in 24 Hours

KANSAS CITY, MO., Jan. 6.—Gun men bandits and sneak thieves were active in Kansas City today. Three bandits obtained \$1,000 in cash in a daylight raid of the A. F. Buttermaster Stone company.

Two negroes and a white man held up the driver of a large laundry, coming being more than twenty people. Nearly \$500 was obtained.

Police headquarters were swamped with reports of robberies and minor holdups throughout the little part of last night and early this morning. More than twenty robberies of all types were recorded.

William Jennings Bryan's Weekly Bible Talk
One of the Greatest of the Virtues

By WILLIAM JENNINGS BRYAN

Jesus never dealt with trivial things; whatever He touched upon was worthy of consideration.

JESUS' PARABLE ON HUMILITY—FRUIT OF TODAY'S BIBLE TALK BY MR. BRYAN (Luka 14:7-14)

There are those today who put form above substance and subordinate the truth to the form.

guesses and hypotheses advanced in the name of science, even though these guesses and hypotheses are unsupported by facts.

There is an unorganized effort—this is even found in scientific literature—to eliminate fundamental parts of the revealed will of God on the ground that their retention will alienate "the intellectuals."

Christ died for all. One phrase has suggested that the church is surely in need of a reformation.

All souls are alike to the Heavenly Father, as all souls were alike to Christ Jesus.

Humility is a virtue. Before honor is humility. In another place Solomon tells us that "by the fear of the Lord are riches and honor and life."

Humility is a virtue. Before honor is humility. In another place Solomon tells us that "by the fear of the Lord are riches and honor and life."

National pride, while valuable, may be carried so far as to prevent the imitation of that which is good in other nations.

After Christ had rebuked the guests who had immodestly striven for the chief seats at the table, He turned his attention to the host and said: "Let them sit here."

Christ said: "Let them sit here." The Sabbath meal was often a elaborate one and the one of which Christ was partaking was probably one of that kind.

Christ said: "Let them sit here." The Sabbath meal was often a elaborate one and the one of which Christ was partaking was probably one of that kind.

CARPENTER'S WORLD TRAVELS. (Copyright, 1923, by Frank G. Carpenter.)

FRANK CARPENTER'S VISIT TO BRUSSELS, BELGIUM. "Be the voice of the sluggard; I heard him complain. You have wakened me too soon, I must slumber again. I walked by his garden and saw the wild briar. The thorn and the thistle grew broader and higher."

If the ghost of Isaac Watts, after its one hundred and seventy-odd years of heavenly wanderings, could return to his native land, it would find about the same condition in England that he described in "The Sluggard." Hundreds of thousands, there, are idle and some of them refuse to work, educated to idleness by the government dotes.

Could Watts' ghost fly across the North Sea to Belgium it would be amazed at the thrift I see all around me. At the close of the war Belgium was in a situation very different from that of France, England, or the United States. In each of the two latter countries all the industrial machinery, and in France what was left of it, was in full swing. It had been speeded up by the war and the foreign markets were open. Belgium, owing to the German occupation, had lost all its markets. The war had taken a large part of its workers. Some had been killed, some deported, and many educated to idleness by the charities of their own government and those which came from the United States and other parts of the world. Before the war Belgium depended largely on German capital to finance her industries. After the armistice the little kingdom awoke to find herself out of money, and with most of her industrial plants either destroyed or carried away.

How Belgium Got to Work. What did she do? Did she play the part of the sluggard? No! She rolled up her sleeves, took her spade and hoe in hand, bent her back, dug her bare toes into the rich alluvial soil under her feet, and went to work. She borrowed money from her own people at home, and got a lot from abroad, on the basis of the peace treaty which provided that Belgium should pay her reparations damages in advance of France and the rest of the allies. She borrowed money from her own people at home, and got a lot from abroad, on the basis of the peace treaty which provided that Belgium should pay her reparations damages in advance of France and the rest of the allies.

Before the war Liege was exporting over 1,500,000 weapons a year, most of which were made in the homes of the workers and only assembled in the factories. The business of being assumed and greatly increased by standardized machinery and labor efficiency. The New Woollen and Linen Mills. Belgium has a great textile industry. She exports to the United States and Great Britain for export to the amount of almost eight million dollars per annum. It had a big flax industry, including 1,500,000 acres of flax, and 1,500,000 spindles of wool. The linen spindles numbered 375,000 and the cotton spindles numbered one million and a half. These industries were much injured during the war, but the cotton factories are fast coming back and the linen spindles already number two hundred thousand. A great deal more flax has been planted on account of the loss of the Russian product, and in 1925 the acreage had grown to 325,000.

The woollen mills of Belgium were famous during the middle ages, and before the war the country had one hundred and ten weaving mills from which the Germans took a great part of the machinery. Much of this came back and in 1925 the country was handling about three fourths the amount of wool used before the war. There are certain areas where the water gives the Belgian wool a peculiar brilliancy and softness not found elsewhere on the continent. Before the Germans invaded Belgium, she was exporting glass of all kinds to nearly every part of the world. Liege was making six million pounds of table glass per annum, and it had only one factory that produced on the average a quarter of a million pieces of glass every day. This factory began working on the day of the armistice, and within one year it had thirteen furnaces going. It exported 2,000 tons of glass in 1926. In 1913 Belgium exported window glass which weighed more than 200,000 tons. Two years after the armistice it had regained seven-eighths of this business. The annual output of plate glass before the war was 100,000 tons and several million square yards of glass in various sizes were made in Belgium and the United States. In 1926 the whole of this glass business had come back and the exports of polished glass exceed those of before the war.

These are but a few straws which show how the winds of prosperity are blowing in Belgium. Just now the industries are somewhat affected by the hard times and bad money conditions prevailing throughout the world, but nearly every industry is improving its plants, and there are combination of capital and movements to develop foreign trade, which make the outlook better than ever. Railways Back to Normal. Both in France and Belgium the railways have been reconstructed.

THE BUSIEST PEOPLE WE MEET. But first let me say a few words about the Belgians. They are about the busiest, and I might say also the thriftiest of all the nations on earth. They have a very high birth rate, but they have a very low death rate. They are more people than we have in the United States, and they are more people than we have in the United States. They are more people than we have in the United States, and they are more people than we have in the United States.

These people so closely crowded together, are rich in comparison with most humanity. Before the war the savings banks took in every year several hundred million dollars. Today more than half of the school children have their own savings bank books and deposits of the primary students amount to more than five dollars each. The people are well clad, and any surplus of land they may have during the war, they run to fat now. I have told something of these farms that raise so much grain in the area as we do. There are patches which produce two tons of tobacco and eight hundred bushels of carrots per acre. I am a big high prior to 1914 a farmer was able to support himself, his wife, and three children on less than three acres, and any surplus of land brought a good profit. Iron and Steel Coming Back. Belgium has also coal and iron. Before the war she was selling iron and steel to all parts of the world and in 1913 its production of pig iron was half that of France. Liege was not hurt in the first military attack, but later the Germans took the copper, then the machine tools, and finally whole plants and factories, where the workers or operators would not work them, and shipped them off to Germany. Before the war Belgium had fifty-four blast furnaces and its close only four remained intact. Last January twenty-eight were again in operation, and through a combination of the steel industry the country expects a greater export trade than ever before. Belgium is now making steel rails for Great Britain, China, South America, the Dutch East Indies, and the quotations for the rails for the British were forty per cent under the price given by the factories in England.

Over one hundred thousand acres of busy Belgium are planted to flax. Mr. Carpenter in his letter next Sunday takes you right out into the fields where the stacks of drying flax look like so many giant dance caps.

the roadways improved; and transportation generally is equal to or better than before the war. Belgium was the first country on continental Europe to build a railway. That was in 1825 and ever since then she has been noted for her excellent railway construction. In 1914 she had a greater length of railway between New York and San Francisco than any other country, with a total length of track as long as the distance between New York and San Francisco. In addition there were narrow gauge railroads which formed a network covering the kingdom. There were 2,400 miles of them running from village to village, and acting as feeders to the standard gauge railroads. During the war the Germans completely destroyed more than seven hundred miles of railroad and damaged so much more that altogether more than twelve hundred miles were put out of operation. They destroyed in the neighborhood of 1,500 bridges, and when they retreated, the country had less than three hundred locomotives and three thousand cars in good working order. After the armistice orders were placed in America and Great Britain for new rolling stock and some were given over there. The only ones promptly delivered were those from America. But gradually the roads have come back, and although they are operating at greatly increased fares and at a loss to the government, the service in many respects is equal to any we have at home.

This is true also in France. In my railway rides there I frequently had express trains which made more than thirty miles an hour. I went from Paris to Rheims over an excellent roadbed in two hours, a distance of one hundred miles, and came from Lille to Paris a distance of three hundred kilometers, or one hundred and eighty-eight miles, in four hours or at forty-seven miles per hour including three stops. Our best trains from New York to Washington make only the 27 miles in five hours which is only a little more than 45 miles per hour and they have the same proportionate number of stops. The French train was brand-new; the first class cars were exceedingly comfortable, and the fare was much lower, being about two and one-half cents a mile. The trip cost me \$12, which I remember correctly, the trip on the congressional limited is a little over ten dollars or more than twice as much although the distance is only thirty-five miles longer.

My dinner in the French dining car, at the present rate of exchange, cost eighty-five cents and it was better than the meals on our trains at home. Everything was red hot. We began with an excellent soup served in large cups, after which came fish with potatoes, followed by a course of roast beef with green beans. The meal ended with a dessert of cheese and ripe grapes. We were each charged ten cents extra for coffee, and I could have had a bottle of excellent wine for twenty-five cents. The dining car prices are about the same here in Belgium. Electrifying the Railways. In both France and Belgium they are discussing electrifying the railroads. The French scheme is associated with the harnessing of the water power of the Rhone river, an excellent report upon which has been made by Dr. William C. Huntington, former commercial attaché to the American embassy in Paris. He says that the Rhone basin is theoretically capable of producing 1,700 thousand horsepower, and that it could actually give 400 thousand horse power all the year round, which is equal to the importation of five million tons of coal per annum. France has a program to electrify more than five thousand miles of railway, covering a large part of the most important French systems. The total expense is estimated at more than two and one-half billion francs. The Belgian scheme of electrification is based upon its own mines. It proposes to begin with the Brussels-Antwerp line, and go on from there to the Luxembourg line. It will have both self-propelling trains and trains drawn by electric tractors. The speed made will be forty-five or fifty miles per hour.

I am surprised at the lack of motor car transportation in both Belgium and France. The United States has a motor car for every two families, and France even at five people to the family, which is a high estimate for that country, has only one for every forty families. It is about the same here in Belgium, where there are 3,900 cars to seven or eight million people. Nevertheless, Belgium has three times as many automobiles as she had before the war, and about one-seventh of them are of American make. There are a half dozen or more firms manufacturing motor vehicles. The three largest, the Minerva, Metallurgique and Fabrique Nationale are making only light cars. The great part of the motor vehicles made in France are also of low horsepower and light weight, each holding a little more than a car here, which far exceeds the cost of our cars at home. Gasoline in France costs sixty or seventy-five cents a per gallon, though it is much less in Belgium. We often filled our car from square cans as long as a stick of stove wood, each holding a little more than a gallon. It took ten of these cans to fill our tank, and the man or woman who sold them brought them out to the car and pour them in one by one. Occasionally we found a gasoline pump like those used everywhere in the States, and most of these were imported from America. Gasoline is called "essence" in France, the name coming from the essence of petroleum, which is just what it is. In Paris our automobile was always stopped at the gate, to see whether we had taken in any "essence" outside the city and there by avoided the payment of the octroi tax which is imposed upon all goods entering Paris. There were usually a tax collector and a policeman waiting to report to the tax gatherers the amount of gasoline they had on hand. Each motorist measured his own tank with a stick, and stated whether he had bought any more gasoline before coming back. If there was any doubt as to his own measurements, and if their sticks showed he was lying, a heavy fine was imposed. Private Cars Here Too. One striking thing about the private car is its smallness, and another its individual character. They have cars here so small that you could put one into the tonneau of an American seven passenger machine and it would rattle around.

Both in France and Belgium the railways have been reconstructed.

Even the dogs are put to work in Belgium, where they are hitched to little carts on which goods are hauled both in town and out in the country. Hogs usually act as drivers.

In which he describes Ypres and its new buildings, the reconstruction cooperative societies, Louvain and its new library, and many other phases of Belgium rebuilt.

Modest Prices Now. PARIS, Jan. 6.—The fashion plate is the latest here. Exclusive shops and police are carrying out a drive against cheap dealers who copy high-priced Rue de la Paix models and sell them abroad as genuine. Silent for 14 Years. LONDON, Jan. 6.—Fourteen years ago a street railway conductor became angry at his motorman. They haven't spoken since though they've run the same car daily. Living Cost Up. LONDON, Jan. 6.—It costs you to get more to live in London now than in July, 1914, when the world war broke out, say figures just compiled by the ministry of labor. Extraordinary Relations. LONDON, Jan. 6.—Mrs. Annie O'Reilly, 89, is on trial here charged with having contracted a bigamous marriage with her adopted son, Arthur Waters, 29.

MRS. HINCKLEY NERVOUS WRECK

Tells How She Was Restored to Perfect Health by Lydia E. Pinkham's Vegetable Compound

Memphis, Tenn.—"Two years ago I was completely run-down and my nerves were a wreck. I could not sweep a room without resting. I could not do my work. I was at a time, and the doctor's medicine did not help me. One day some one mentioned your little book on my porch, and in it I read several testimonials of women who had been like myself. I sent for it and got me a bottle of Lydia E. Pinkham's Vegetable Compound, and before I had taken the whole of that bottle I knew it was helping me. I took six bottles, and then in about three months I took two more. Now I am in perfect health. I do all of my own work and could do more. I can truly say that I know Lydia E. Pinkham's Vegetable Compound gave me my health."

Mrs. O. J. HINCKLEY, 316 Union Ave., Memphis, Tenn.

Lydia E. Pinkham's Private Text-Book upon "Allments Peculiar to Women" will be sent you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Mass. This book contains valuable information.

KATHLEEN NORRIS Woman to Woman Talks

HOW MANY ROOMS MAKE A HOME? By KATHLEEN NORRIS

A certain Philadelphia woman, who had moved to a fashionable resort in the neighborhood of Colorado Springs, determined to make her residence there permanent and therefore did exactly what you would do under the circumstances—she built herself a home.

Her particular choice was for the Tudor architecture, and the Tudor—arches, the well-known window, the massive and simple tower, the door that you see in the old world in the setting of the old world rose in this newer and not less exquisite environment.

Every woman's dream. For every woman who has ever dreamed that favorite dream of building a house with all the money we wanted to spend upon it.

Those dream houses! Mary's in colonial brick, with white two-story pillars in front, with polished floors, with white woodwork artfully turned.

Over and over and over again she would come back to the same thing: the young couple are married, and they are going to have a magnificent home. The walls and garden, the lawn and the driveway, they are all there.

But even then, I wonder if a house with more than ten rooms in it is ever a home? The number of servants that is absolutely imperative, the formality that one must observe, I wonder if these don't militate against real home making?

Over and over and over again she would come back to the same thing: the young couple are married, and they are going to have a magnificent home. The walls and garden, the lawn and the driveway, they are all there.

Over and over and over again she would come back to the same thing: the young couple are married, and they are going to have a magnificent home. The walls and garden, the lawn and the driveway, they are all there.

More You Look Like a Russian Peasant The More You're in Style These Days

To look like a Russian peasant in the last word in smartness these days.

The Chauve Souris and the Russian Revues had a good deal to do with the new style.

It is one of a series of Women to Women talks on present-day family and social problems that Mrs. Norris, America's best loved and most popular woman writer, is writing especially for this newspaper.

Smith, O. W. Casting tackle and methods. These chapters originally appeared in "The Fisherman's Magazine."

BELGIAN INDUSTRIES BOOMING FOUR YEARS AFTER THE WAR

GRAPHIC PICTURE OF ACTIVITY PAINTED BY FRANK CARPENTER; NO SLUGGARDS NEED GO THERE

A Rich Land Whose First Name Is Thrift—Visits to the Manufacturing Centers—Iron and Steel Mills Coming Back—New Cotton and Linen Mills—Acres of Plate Glass—Railway Rides Faster and Cheaper Than Ours—Automobiles of Two Horse Power—Where the Bicycle Takes the Place of the Flivver.

CARPENTER'S WORLD TRAVELS. (Copyright, 1923, by Frank G. Carpenter.)

BRUSSELS, BELGIUM. "Is the voice of the sluggard? I heard him complain, You have waked me too soon, I must slumber again. I walked by his garden and saw the wild rye; The thorn and the thistle grew broader and higher."

If the ghost of Isaac Watts, after his one hundred and seventy-odd years of heavenly wanderings, could return to his native land, it would find about the same condition in England that he described in "The Sluggard." Hundreds of thousands, there, are idle and some of them refuse to work, educated to idleness by the government dotes.

Could Watts' ghost fly across the North Sea to Belgium it would be amazed at the thrift I see all around me. At the close of the war Belgium was in a situation very different from that of France, England, or the United States. In each of the two latter countries all the industrial machinery, and in France what was left of it, was in full swing. It had been spoiled by the war and the foreign markets were closed.

Belgium, owing to the German occupation, had lost all its markets. The war had taken a large part of its workers. Some had been killed, some deported to the German camps, and many educated to idleness by the charities of their own government and those which came from the United States and other parts of the world. Before the war Belgium depended largely on German capital to finance her industries. After the armistice the little kingdom awoke to find herself out of money, short of men, and with most of her industrial plants either destroyed or carried away.

How Belgium Got to Work. What did she do? Did she play the part of the sluggard? No! She rolled up her sleeves, took her spade and hoe in hand, bent her back, dug her bare toes into the rich alluvial soil under her feet, and went to work. She borrowed money from her own people at home and got a lot from abroad. On the basis of the peace treaty which provided that Germany should pay her reparation damages in kind, she instituted new taxes and surtaxes, and at the end of 1920 found that her national revenue numbered 275,000 and the cotton spindles more than one million and a half. These industries were much injured during the war, but the cotton factories are fast coming back and the linen spindles already number two hundred thousand. A great deal more flax has been planted on account of the loss of the Russian product, and in 1921 the acreage had grown to 125,000. Many of the machines that had been stolen and taken home are now being replaced.

Already more than six hundred and fifty of the public buildings of the devastated area have been rebuilt, and even two years ago something like fifteen thousand machines had been recovered. By the end of 1920 about eight thousand tons of stolen material and ninety thousand tons of machinery and other equipment had been returned. Every industrial establishment prepared to get back to work, and by January, 1923, more than two-thirds had begun operations and more than one thousand were filling orders. Today the industries of Belgium have been practically restored. The country is on its feet, and only a part of the homes and buildings of the battle scarred area await reconstruction.

The Hottest People on Earth. But first let me say a few words about the Belgian people. They are about the thirteenth of all the nations on earth. They have here a country which is just about one-fourteenth the size of the United States. If California could have the same number for every square mile, it would contain more people than the whole of the United States were as thickly settled as Belgium. It would have one hundred million more people than the whole human race. The population here is 625 per square mile, over twice that of Germany, and just twice that of Great Britain and Ireland. The only country that approaches Belgium in density is Holland, which has one hundred and twenty-two less people for every 440 acres inside its boundaries.

Most of the Belgians live in villages and work on the land. There are only four cities of more than one hundred thousand inhabitants. Brussels, the largest and finest, with its suburbs is almost as big as St. Louis. Antwerp is the size of Cincinnati, and Ghent and Liege have about the same population as Memphis. Malines has sixty thousand, Bruges is a smaller city, and Ostend and Louvain smaller still.

A Rich Country. These people, closely crowded together, are rich in comparison with most humanity. Before the war the savings-banks took in every year several hundred million dollars. Today more than half of the school children have their own savings bank books and the deposits of the primary students amount to more than five dollars each. The people are well clad, and however lean they may be during the war, they run to fat now.

I have told something of these farms that raise twice as much grain to the acre as we do. There are patches which produce four tons of tobacco and eight hundred bushels of carrots per acre. I am told that prior to 1914 a farmer was able to support himself, his wife, and three children on less than three acres, and any surplus of land brought clear profit.

MRS. HINCKLEY NERVOUS WRECK

Tells How She Was Restored to Perfect Health by Lydia E. Pinkham's Vegetable Compound

Memphis, Tenn.—"Two years ago I was completely run-down and my nerves were a wreck. I could not sleep a wink, and I was unable to do any work without resting. I could not do my work except a little at a time, and the doctor's medicine did not help me. One day some one showed me your little book on my porch, and in it I read several testimonials of women who had been like myself. I went right out and got me a bottle of Lydia E. Pinkham's Vegetable Compound, and before long I was taken the whole of that bottle. It was helping me. I took six bottles, and then in about three months I took two more. Now I am in perfect health. I do all of my own work and could do more. I can truly say that I know Lydia E. Pinkham's Vegetable Compound gave me my health."

Mrs. O. J. Hinckley, 316 Union Ave., Memphis, Tenn.

Lydia E. Pinkham's Private Text-Book upon "Affections Peculiar to Women" will be sent you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Mass. This book contains valuable information.

Over one hundred thousand acres of heavy Belgium are planted to flax. Mr. Carpenter in his letter next Sunday takes you right out into the fields where the stacks of drying flax look like so many giant dance cops.

The roadways improved, and transportation generally is equal to or better than before the war. Belgium was the first country on continental Europe to build a railway. That was in 1831 and ever since then she has been noted for her excellent railway construction. In 1914 she had a greater length of railways to the square mile than any other country, with a total length of almost as long as the distance between New York and San Francisco. In addition there were narrow gauge railways which formed a net work covering the kingdom. There were 2,400 miles of them running from village to village, and acting as feeders to the standard gauge railroads. During the war the Germans completely destroyed more than seven hundred miles of railroad, and damaged so much more that altogether more than twelve hundred miles were put out of operation. They destroyed in the neighborhood of almost 1,500 bridges, and when they retreated, the country had less than three hundred locomotives and three thousand cars left in good working order. After the armistice orders were placed in America and Great Britain for new rolling stock and some were given to us here. The only ones promptly delivered were those from America. But gradually the roads have come back, and although they are operating at greatly increased fares and at a loss to the government, the service in many respects is equal to any we have at home.

Automobiles in Belgium. I am surprised at the lack of motor car transportation in both Belgium and France. The United States has an automobile or truck for every two families, and France even at five people to the family which is a high estimate for that country, has only one for every forty families. It is about the same here in Belgium, where there are 35,000 cars to seven or eight million people. Nevertheless, Belgium has three times as many automobiles as she had before the war, and about one-seventh of them are of American make. There are a half dozen or more firms manufacturing motor vehicles. The three largest are the Minerva, Metallurgique, and Fabrique Nationale, and making only light cars. The great part of the motor vehicles made in France are also of low horsepower and light weight on account of the high up-keep of these cars. In Belgium, however, the cost of our cars at home. Gasoline in France costs sixty or seventy-five cents per gallon, though it is much less in Belgium. We often filled our car from square cans as long as a stick of stove wood, each holding a little more than a gallon. It took ten of these cans to fill our tank, and the man or woman who sold them brought them out to the car and poured them in one by one. Occasionally we found a gasoline pump like those used everywhere in the States, and most of these were imported from the States. The name of the "pump" in France, the name coming from the essence of petroleum, which is just what it is.

In Paris our automobiles were always stopped at the gate, to see whether we had taken in any "essence" outside the city and there-by avoided the payment of the octroi which is a tax upon all goods entering Paris. There were usually a half dozen or more cars waiting to report to the tax gatherers the amount of gasoline they had on hand. Each motorist measured his tank with a stick going out and soft of cheese and if he brought any more gasoline before coming back, if there was any doubt as to his report the tax collectors made their own measurements, and, if their sticks showed he was lying, a heavy fine was imposed.

Private Cars Have Toys. One striking thing about the private car is its smallness, and another its individual character. They have cars here so small that they could get into the tonneau of an American seven passenger machine and it would rattle around.

Both in France and Belgium the railways have been reconstructed.

Spring Millinery

Of course you will want a new spring hat to brighten up the winter costume and we feel sure that you will enjoy viewing the artistic modes on display here.

Striking effects in blacks and a beautiful collection of the charming pastel shades of spring are here. Taffetas, candy cloth, metallics and haircloth are shown in delightful modes.

Prices \$7.95 to \$18.50

The Courteous Service Store

Even the dogs are put to work in Belgium, where they are hitched to little carts on which good-sized loads are hauled both in town and out in the country. Dogs usually act as drivers.

Many of the cars, small and large, have specially designed bodies. In some of the smaller cars the body hangs down to within eight or ten inches of the roadway; and in the cars on only two or three horse-power, the most popular of the cheap machines had from five to ten horse power, and the largest and best seldom have more than thirty or forty.

The bicycle versus the flivver. When a rich Parisian orders an automobile he has plans and specifications made out as though for a house. Often these fancy bodies are placed on an American chassis, the body sometimes doubling the price of the car.

The auto buses of Paris are bright green and those of Brussels the color of cream. The bus driver sits in the hood of what looks like a new plow of a Rocky Mountain locomotive, and the brass-buttoned traffic policeman who controls him uses a white club to guide the traffic this way and that. The speed of the motor cars of France is beyond conception, and the recklessness of drivers amazing. There are plenty of traffic rules but no one observes them and no one is punished unless he causes an accident. Usually the person who is run over and not killed is arrested for obstructing the traffic.

Here the bicycle takes the place of our flivver, and Belgium has more than one for every two families. The number is 800,000. They are used by men, women and children, by the rich and the poor, for work and for pleasure. They are the chief picnic-vehicle, and the boys and girls riding tandem bring youth to my eyes. They make one think of the popular song of our own bicycle craze: "It won't be a stylish marriage. We can't afford a carriage; But you'll look sweet upon the front seat of a bicycle built for two."

Model Pirates Now. PARIS, Jan. 6.—The fashion plate is the latest here. Exclusive shops and police are carrying out a drive against cheap dealers who copy high-priced Rue de la Paix models and sell them abroad as genuine.

Living Cost Up. LONDON, Jan. 6.—(Specials) You get more to live in London now than in July, 1914, when the world war broke out, say figures just compiled by the ministry of labor.

Entangling Relations. LONDON, Jan. 6.—Mrs. Annie O'Reilly, 59, is on trial here charged with having contracted a bigamous marriage with her adopted son, Arthur Waters, 29.

Wednesday Club Keep Open Home
One of the most elaborate social affairs of the holiday season was the reception given by the ladies of the Wednesday afternoon club at the home of Mrs. W. H. Myers on East Omega street New Year's afternoon.

Evening Party
Dr. and Mrs. J. A. Allison entertained the members of the Tuesday evening club and other guests with a very delightful party last Friday evening. The house decorations were very attractive and elaborate.

Supper Party
Mr. and Mrs. Guy Gossett complimented their sister, Miss Winona Gossett of Gainesville with a most delightful surprise party Monday evening. The boys quartette, composed of Messrs Tommie Easley, Jack Hassell, Raymond Jasper and Annie May Gill, entertained the evening entertainment.

Miss Neville Hostess
Primetime among the Christmas parties was the one given Friday afternoon by Miss Cora Neville. Four tables of guests enjoyed bridge in which high scores were won by Miss Dorothy Bear. She was given a pretty corsage bouquet.

Wednesday Club Entertains Husband
On New Year's evening at the home of Mr. and Mrs. W. H. Myers, the ladies of the Wednesday afternoon club entertained very elaborately in honor of their husbands. The house decorations were very attractive and appropriate for the holiday season.

Watch Party
To bid farewell to 1922 and welcome 1923, the ladies of the Wednesday afternoon club entertained a watch party at the home of Mrs. W. H. Myers on Friday evening.

Bowie News
The Sausage Meet in the basement of the M. E. church on December 29 to elect new officers, exchange gifts and be entertained.

Christmas Homecoming
One of the most enjoyable affairs of the season was the homecoming given by the Thursday club at the residence of Mrs. C. F. Hutchison on Thursday afternoon, December 22.

Winter Christmas Party
At least, after many years of vain search the seniors have found out who is better than Santa Claus. For when Santa descends then because they become a bit dignified, Mr. and Mrs. Hutchison step in to cheer and fill the void.

AMUSEMENT CALENDAR FOR WEEK AT LOCAL THEATERS

OLYMPIC FEATURE MONDAY

THOMAS MEIGHAN and LILA LEE in a scene from George Ade's Paramount Picture "Back Home and Broke"

'Human Hearts Is Empress Feature Starting Monday

Superb in strength of story and cast "Human Hearts," the Universal-Jewel which comes to the Empress theatre on Monday of this week for an engagement of three days stands forth prominently among the offerings of recent months as a drama teeming with incidents and action and of a compelling variety. House Peters, popular veteran of stage and screen, heads the notable cast. The screen version of Hal Reid's famous play presents people from the humbled walks of life who live and love, hate and fight, just as do the people we meet every day. House Peters is cast as a blacksmith, a fine specimen of manhood, a simple son of the Ozark Mountains. His father is a stern and unbending man, but just and honest, who objects to his son's courtship with a pretty maiden who plotted to beat the family out of their rich coal lands. She really falls in love with him and marries. When the romance of married life gives way to the stern facts of reality she longed for her old, free life, and the tempter comes in the person of a smooth-tongued ex-convict who induces her to flee with him. The aged father attempts to stop the elopement and is killed. The son, blamed for the murder, believes his wife was the slayer and refuses to offer any defense. He is sentenced to prison for life. In the working out of the plot to a logical conclusion the director, King Vidor, has shown a fine

sense of the dramatic. The picture is artistically photographed and splendidly acted in roles which require dramatic ability of the first order. Included in the cast are such noted artists as Edith Hallor, Mary Philbin, George Hackathorne, Russell Simpson, Saitta Edwards, H. S. Kerr, Gene Dawson, Lucertia Harris, George W. West and Emmett King. By all means see this picture, take the entire family. It will give you a new and better angle on life, even while it affords you the best entertainment you have had in many a month.

Harry Carey in 'Man to Man' at Gem Saturday

When the west's young man certainly is in "Man to Man," the Universal-Jewel production at the Gem theatre Saturday. The broad sweep of unenclosed grazing kingdoms of Arizona and California furnish the background against which Harry Carey and a strong cast of players were photographed in the action of a virile story. A stampede of five thousand head of cattle gives enough thrill to the spectator to prove that Stuart Patton, the director, hasn't lost his pep since he directed "Conflict." Patricia Dean's amazing Universal-Jewel starring vehicle, which provided theatre-goers with a flock of thrills. Opposite the star in "Man to Man" Lillian Rich shows what two years in pictures can do to a young musical star. She is a real "trouser" by

Empress on Thursday

At this time, and her work gets the meaning of the role satisfactorily across. Harold Goodwin and Willis Robards have sympathetic roles in the Arizona locale of the story, while May Giraci is the youngster the hero brings from Tiva-Tiva in the south seas to his Arizona ranch. Alfred Allan and Charles Lakoyne handle the heavy roles with commendable spirit. The plot of Jackson Gregory's novel furnished a suitable vehicle for Carey's talent and the central role giving the star full opportunity for that "human" sort of characterization for which he has become famous.

Ade Leaves Old Aesop Behind in Photoplay Race

George Ade has run Aesop a good race in the matter of producing snappy fables, but that isn't all George has done. He has gone Aesop one better, or rather two, for it is two stories he has written for the movies. The first was "Our Leading Citizen," starring Thomas Meighan and the second is "Back Home and Broke," with the same star. The latest production will be shown here for the first time at the Olympic theatre next Monday, Tuesday and Wednesday.

Mr. Meighan, who has no trouble winning popularity contests for being the best liked screen actor, will probably be a few more thousand votes ahead in the next balloting for "Back Home and Broke" is a type of vehicle particularly suited to him. It is one of those stories which reach the heart and which everyone can understand.

The latest Ade story is typically Ade, which is to say that it has that peculiarly human appeal which makes George Ade's writings so popular. Mr. Meighan has the role of a young man who is born at the top of the financial and social ladder, comparatively, then drops to the bottom with a bang. He leaves his home town for what he believes to be a field of success, determined to make good, and "show 'em"—the townspeople who regarded him with amusement and disdain.

His comes home broke, apparently, and meets with ridicule. Even the town papers poke fun at him. The general fun doesn't begin here—it bubbles all through the picture, but it riots at this point where "Tommy" turns the tables in a novel and exciting way.

Lila Lee, as Mr. Meighan's leading woman, leads an imposing supporting cast. The picture abounds with thrills. But just how far Ade leaves Aesop behind the audience will have an opportunity to judge as Aesop's fables, modernized, which by the way have become the most popular short subjects ever shown here are on the program, the Olympic every Monday, Tuesday and Wednesday.

Empress on Thursday

'Hurricane's Gal' Comes to Empress Last Half Week

Dorothy Phillips, one of the popular stars of the motion picture screen, whose attainments as an emotional actress have been previously revealed in Allen Holubar's production from "Hearts of Humanity" to "Man-Woman-Marriage," comes to the Empress theatre on Thursday, Friday and Saturday as star of Mr. Holubar's latest First National release, "Hurricane's Gal." The production has been personally directed by Mr. Holubar, who also adapted the story from a narrative by Harvey Gates.

Miss Phillips has the role of a wild, untrained girl of the sea, who inherited from her Irish father a spirit of hate and lawlessness and from her mother the warm, romantic blood of the Spanish. As mistress laid

of her late father's opium smuggling ship, she roams the seas with a rag doll, a monkey and a goat as her principal companions and rules the vessel with a ferocity that is usually balanced by an abundant good humor. Captain Danny, who had been first mate to the girl's father, a Chinese cook and a rough uncut Swede mate are the principal figures of her life on the ship. In the hold of the vessel is a crew of men, the paths of the girl and the man who first gained her love and admiration and whom she believes to have treacherously deceived her cross again. From this point the story progresses through most absorbing sequences which finally terminate the conflict between love and hate which has been raging in the girl's soul and after a pursuit across the Pacific reunites her and the man who first aroused her love.

THEATRICAL SEASON TO PROVIDE "BIG TIME" ATTRACTIONS

HIGH CLASS ATTRACTIONS ARE BOOKED FOR PALACE THIS YEAR; THREE HERE THE COMING WEEK

Famous American Opera Robin Hood Coming On Friday

The short life of the average star has always been the rub of the theatre business. Each year brings forth its endless crop of "successes of the century" "hits of the ages," "biggest sensation in twenty years," and where are they all today? Echo gives no answer, neither does the billboard, the outboard or the daily newspaper. Like Shakespeare's poor player, they have "strutted and fretted their hour or two" and then vanished into the great limbo of the forgotten.

When, therefore, a play goes on year after year showing to bigger audiences; when its score and songs continue to outsell a dozen times over all the ragtime and jazz "hits of the age," it is a matter worth special note. And this refers to "Robin Hood" written some thirty years ago by Reginald DeKoven and Henry B. Smith and which Manager of the Palace announces as its offering for January 12 and 13th on a matinee on Saturday.

Originally produced by the famous Bostonians 34 years ago it has been continually before the American public. And today it is still breaking box office records, still selling out on the first of its sale, still bringing laughter and romance and happiness to thousands.

"Robin Hood" has been the biggest seller of any single musical composition, just as it was the first year of the opera's production. The great American novel has not yet made its appearance unless Tom Sawyer fills that niche, the great American play has not yet been written, but apparently the great American opera is here, and has been here for all these 34 years.

And in its comedy element, where are there such equally famous figures as Frier Tuck and the Sheriff of Nottingham? One much goes back to Shakespeare's day to find their equal in Falstaff and Malvolio. Even Gilbert and Sullivan gave to the world no such lasting and lovable personages.

You older people—if your children do not know Robin Hood, if they haven't read the general Tuck and the strutting sheriff and thrilled as Maid Marian fled to Robin's arms in green-boughed Sherwood—you are depriving them as much of their happiness as if you deprive them of Tom Sawyer. And you are losing as much yourself if you fail to read your own youth at Robin Hood's everlasting fountain of springtime and loyalty and good fellowship.

Miss Wreck on Telegraph Service VICTORIA, B. C.—Paralysis of telegraphic service on the west coast of Vancouver island was blamed by shipping men here today for fatalities, believed to number 12, from wrecking of the steamer Alaska near Eschena point. Search where the Alaskan went upon the rocks failed to find any of her men.

Wichita Falls theater goes may congratulate themselves on the prospects for one of the greatest seasons in the history of the city from the standpoint of high class attractions. For "it is doubtful if there has ever been a list of bookings that will compare with that provided for the next few weeks. In this connection they may also thank the management of the Palace theater for having made this provision for their entertainment, involving as it does the assuming of a heavy financial responsibility, and for returns on which they must rely upon the desire of the public for, and their disposition to support, attractions equal to those provided for New York and the larger cities of the country.

The initial production will be the "Lasses" White Minstrels coming on Monday night, to be followed on Wednesday and Thursday by "The Circle," presented by a cast including some of the greatest actors in the country. This play comes with the assurance of critics in New York and elsewhere that it is one of the best plays presented in a long while.

Immediately following on Friday and Saturday will be "Robin Hood," the comic opera that has been a favorite for years and which is presented by a cast that places it among the big attractions of the Ford of the Palace announces as its offering for January 12 and 13th on a matinee on Saturday.

Other attractions include the well known and popular Olga Petrova in her own company in a dramatic production, "The Cat and Canary," a comedy drama. "Passing Show of 1920," musical comedy. "Greenwich Village Follies," musical comedy.

"The Bat," the dramatic production that has had such a long run. "Take It From Me," musical comedy. "Tangerines," also musical comedy.

My First Picture

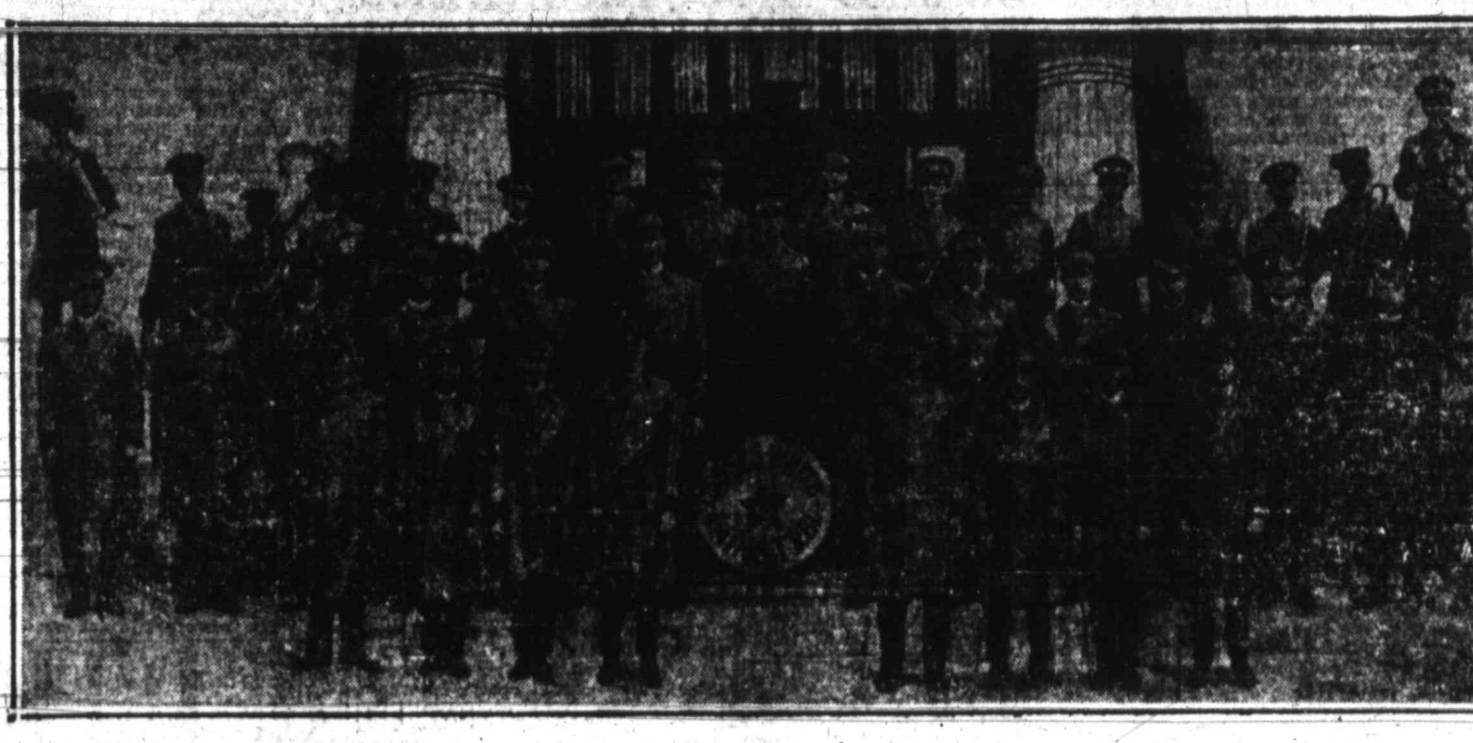

By AGNES AYRES
(Who is coming to the Olympic theatre in "A Daughter of Luxury.")

I chose the hottest day in the summer of 1912 to make my debut. The place was the Essanay studio, in Chicago. I was an extra in "The Masked Wrestler," starring Francis X. Bushman.

I was sent to the wardrobe department to put on any dress I happened to find there. I selected a black lace over-dress—I can see it yet. Nobody instructed me about it, so I just put a heavy coating of talcum powder on my face. My duty was to sit in a box and look interested while Mr. Bushman wrestled. Everything was very new to me, and it was no trouble to look interested. The camera was focused on the wrestler, and I was afraid I wasn't to see myself on the screen.

Soon I had a regular engagement as extra at the Essanay studio. Miss Ayres' first big chance came with her engagement by Cecil B. DeMille to play the lead in "Forbidden Fruit."

Operation in Vain
NEW YORK.—An unusual operation—the transplanting of sheep's kidney to a human body—was performed December 26 by Dr. Harold Newhall in an effort to save the life of Mrs. Adèle Robertson, a poison victim. She died Thursday when complications not attributed to the operation, set in.

The "Lasses" White Minstrels on parade on the streets of Wichita Falls Monday noon. Performance at Palace theater at night, January 8th.

"THE CIRCLE" AT PALACE THEATRE WEDNESDAY AND THURSDAY, 10-11

CHARLOTTE WALKER

Miss Charlotte Walker will be seen here with "The Circle" and this promising young star, who first came into prominence with "The Trail of the Lonesome Pine," will no doubt find new favor as the young wife in the Somerset Maugham comedy. Miss Walker has starred in several of the greatest successes of the stage, "The Warrens of Virginia," which was one of the New York successes, was made prominent by the clever young woman. "Tea for Three," in which Miss Walker toured as the star, was enthusiastically received by theatregoers. She was successful as the star in "Nancy Lee" at the Hudson Theatre in New York and on the road. Miss Walker appeared for forty weeks in "Call the Doctor," in which she scored one of her biggest successes.

What Noah Missed Is Found Plentiful In 'The Sin Flood'

When the world was flooded Noah only had his Ark to ride it out in. For company he had his family and a complete collection of the animal life of his time—which is fortunate for The American Museum of Natural History, and was rather a handy thing for the late P. T. Barnum.

When Colonia was flooded in "The Sin Flood," at the Strand, Monday, Tuesday and Wednesday, the characters—Richard Dix as "Billy Bear," Helen Chadwick as "Betty," and others well known on stage and screen in the other parts—found a water-proof basement safe and restaurant of the sort now vitiated out of existence as a refuge. Apparently there wasn't any ark handy.

A careful inspection of the film makes it possible to state positively that there were no animals visible anywhere in this reprehensible spot. But there was plenty of what looked on the silver sheet like alcoholic beverages. Of course, it is a matter of individual opinion which one would select as company for feeling a flood—animals or alcoholic beverages. But that hasn't anything to do with the subject in hand.

The point is that the drinkables in the picture are nothing but sarsaparilla and ginger ale—which look just as alcoholically in a photograph, it might be mentioned, as champagne and beer. Also, as a matter of fact, L. H. King, who plays the role of the tramp who realistically never drinks anything stronger than ice cream sodas in real life. He, like other actors and actresses in the piece, made necessary sacrifices to art. They would rather drink their ginger ale and sarsaparilla labelled as such. To look at them on the screen, you'd think they enjoyed drinking it labelled "Extra Dry." That's only another illusion of the photodrama.

Probate Will of George Smith
ROCKLAND, MAINE.—The will of George Warren Smith, said to have been the richest man in New England, was filed here for probate today. The document, disposing of an estate estimated at between \$50,000,000 and \$100,000,000, contains less than fifty words. Aside from two bequests of \$1,000 to a sister, the entire estate is bequeathed to a brother, Benjamin F. Smith.

TENOR IN ROBIN HOOD

GLEN LAW.
Who sings the role of "Robin Hood" was born and raised in Amarillo, Texas.

Victor Artists to Appear in Person Monday, Jan. 15

New York Press Praises 'The Circle' As One of Best

The music loving public of this community will welcome the announcement made recently by the McConnell Bros. Furniture store, that the slight famous Victor Artists will again visit Wichita Falls at the Palace theatre on Monday evening, January 15th. Last season they aroused a local audience to a high pitch of enthusiasm and Henry Burr, one of the eight artists, came in for his full share.

The brilliant critic on New York's best newspaper said at the end of his review: "The Circle" will prove a genuine test of the burning question as to whether or not folks intend to go to the theatre this season. If they won't go to "The Circle" they won't go to anything." The tremendous success of the play at the Selwyn theatre for an entire season to capacity houses is not past history—which proves that when you give the public a comedy such as Somerset Maugham's play they will give you their patronage, and for that reason the Selwyn have selected an all-star cast to present the play on tour. With Wilton Lackaye, Henry E. Dixey, Amelia Bingham, Charlotte Walker and Norman Hackett included in the cast local theatregoers are assured of a performance de luxe. "The Circle" will be the attraction at the Palace theatre Wednesday and Thursday, January 10 and 11, with matinee Thursday and not in years has so much interest been shown in a coming production.

Appearing with Burr will be: Billy Murray, tenor-comedian; Albert Campbell, tenor; John Meyer, baritone; Frank Croton, basso; Monroe Silver, monologist; Rudy Wiedoeft, saxophonist; and Norman Hackett, pianist. The ensemble work will be carried by the Sterling Trio and the Peerless Quartet.

MEXICO CITY.—The women of the state of San Luis Potosi are given the franchise under a measure adopted by the legislature. The measure was sponsored by Governor Rafael Nieto, former federal secretary of the treasury.

AUTOMOBILE NEWS

SYSTEM OF STATE HIGHWAYS PLAN OF ASSOCIATION

COMPREHENSIVE LEGISLATIVE PROGRAM ADOPTED BY ASSOCIATION.

URGES CREATION OF STATE COMMISSION

But Would Have Counties Retain All Present Powers Relating to Local Roads.

WACO, TEXAS, Jan. 7.—The creation of a new state highway commission, with powers to construct, maintain and protect a system of state highways, is the main objective of a comprehensive legislative program which has just been adopted by the legislative committee of the Texas highway association and approved by the board of directors of that body, and which will be submitted to the regular session of the legislature.

The program included a constitutional amendment, providing for the creation of such a commission and authorizing it with necessary powers, and then outlines legislation, some of which it is proposed to enact immediately, and the remainder of which is deemed necessary to provide a state system of highways and regulate the use of such highways.

The proposed amendment would authorize and direct the legislature to provide for the creation, construction and maintenance of a permanent system of connected, improved, hard-surfaced highways throughout the state, to be under the exclusive control of the state and to provide revenues, including the issuance of bonds for this purpose. It directs the legislature to create a commission composed of three persons with such qualifications and compensation as may be provided by law, to be appointed by the governor and confirmed by the senate, for terms of one year, one member retiring every two years.

It would authorize the legislature, after the designated highways have been taken over by the commission, to "make equitable reimbursements" to the counties of the value of improvements on such highways, and provides that, aside from such designated state highways, the counties shall retain all their present powers with respect to the building and maintenance of highways.

In addition to the proposed constitutional amendment, the suggested program outlines the various powers and duties which the legislature would be asked to confer on the commission after the amendment is adopted.

All the ordinary powers of appointing and dismissing the commission of necessary employees, of designating state highways, and of receiving and disbursing all federal aid are provided for. In addition to these, the following powers of the commission are proposed: To regulate the use of the state system of highways by vehicles of all kinds.

To prescribe the size, thickness, width and type of tires used, and regulate the weight of commercial motor trucks, prescribing the conditions under which corporations, companies or individuals may operate such vehicles on the state highways.

To regulate headlights. To issue licenses to, and require bond, from the operators of commercial motor vehicles, and to revoke such licenses for cause.

Other powers necessary for the proper protection of the highways are also provided.

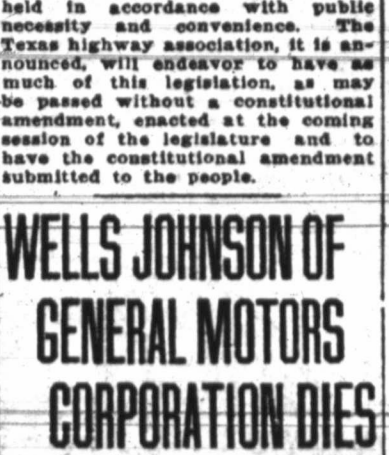

The program would authorize the commission to collect fifty cents per horse power annually from all motor vehicles and, in addition, to collect the following fees on weights of motor vehicles:

On motor vehicles weighing 2000 pounds and under, twenty-five cents per hundredweight; From 2,000 to 4,000 pounds, fifty cents per hundredweight; From 4,000 to 6,000 pounds, one dollar per hundredweight; From 6,000 to 8,000 pounds, three dollars per hundredweight. All vehicles over 8,000 pounds, five dollars per hundredweight.

It is also proposed that the commission shall collect a tax not to exceed two cents a gallon on gasoline distributed in the state. This revenue is to be used in the building and maintenance of a state system of highways.

The association has gone on record also in favor of a law requiring motor vehicles operated on the state highway for hire, to obtain a permit from the state for this purpose and that provisions be made for determining when such permits shall be issued or withheld in accordance with public necessity and convenience. The Texas highway association, it is announced, will endeavor to have as much of this legislation, as may be passed without a constitutional amendment, enacted at the coming session of the legislature and to have the constitutional amendment submitted to the people.

OWNER OF THIS AUTOMOBILE WINS LAST \$15 FLASHLIGHT

The owner of the automobile shown in the above photograph will receive the last of the \$15 automobile flash lights given away free by The Daily Times and the Langford Motor Supply Company.

WELLS JOHNSON OF GENERAL MOTORS CORPORATION DIES

Wells Johnson, chairman of the appropriations committee of General Motors corporation died suddenly Christmas day at his home near Greenwood, Va.

Mr. Johnson also held a position as an assistant to Alfred F. Sloan Jr., vice-president in charge of operations of General Motors Corporation. Prior to coming with General Motors corporation, Mr. Johnson had been connected with the Dupont company in the engineering department.

Wells Johnson was born August 16, 1874, near Louisa court house, Louisa county, Va. After primary and preparatory school work entered the Miller manual labor school of Albemarle, Va., where he graduated and where he also took up post graduate work in the mechanical department and instructed in shop work. He took special work in engineering subjects at the University of Virginia during two summers and afterward entered the University of Virginia in 1902, graduating with a degree in mechanical engineering. His experience in engineering work was extensive. He worked in the shops of the second locomotive drawing room of the Phoenix Bridge company, at Phoenixville, Pa., and in different departments in the shops of the straight line engine work at Syracuse, N. Y.

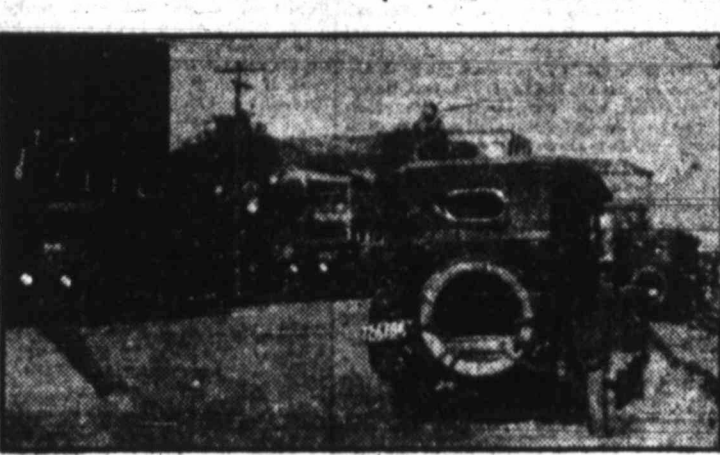

From 1897 to 1903 he was instructor and assistant in theoretical and practical mechanics and shop in laboratory work at Gleason Agricultural and Mechanical college, R. C. From 1903 to 1908 he was a student at the University of Va., specializing in drawing and shop work. For a few months in 1908, he worked as a transit man with the Deep Water and Tide Railway Co., at Herndon, W. Va. In September 1908, he came to the F. I. duPont de Nemours & Co. and was engaged as an engineer in construction work of smokeless powder plants. From September 1910 to March 1911, he acted as resident engineer at Carnegies Point. Later, he was engaged in the black and smokeless division and assistant in charge of the plant from 1914 until September 1918. He was in charge of the design division for the engineering department, and had an important place in war construction. He was active in directing the design work for the great war plants of Hopewell, Va., Colfax Point, Parlin and Haskell, N. J., and the Great Old Hickory plant constructed for the government near Nashville, Tenn. In the fall of 1920, he joined General Motors corporation.

Follow Directions. Some motorists have the impression that tires pumped up hard above the pressure recommended by the manufacturer, will roll easier and so consume less gasoline as compared with soft tires. Recent tests have proved such is not the case, as the hard tires must be pushed over the obstacles while the soft tires wraps itself around them. The analogy is that of a wooden wheel on a road with a real bump. The wheel has lifted the entire height of the obstacle and this requires extra power. The soft tire is dented and the wheel is not lifted for small obstructions.

Jungle fowl in Australia build nests about 15 feet high and 100 feet in circumference.

TIRES WITH 500 NAIL HOLES LEAK NO AIR. Mr. D. G. Coats of Chicago has invented a new puncture proof inner tube which in actual tests was punctured 500 times without the loss of any air. Increase your mileage from 10,000 to 15,000 miles without removing this wonderful tube from the wheel, and the beauty of it all is that this new puncture proof tube costs no more than the ordinary tube and does not require any special care. You can write Dr. D. G. Coats at 223 West 47th st., Chicago, as he grants the right to produce wherever. Wonderful opportunity for agents. If interested write him today.—Adv.

Of Personal Interest to the Motoring Public and Dealers.

W. G. Cook, formerly connected with the Robins and Company Insurance and H. Y. Robertson, who has been connected with the City National Bank of Commerce, have opened a tire and service store, at 311 10th St., the building recently occupied by the Dixie Tire Service company, and will be known as the Guarantee Tire Co. They will also handle gas and oils.

Mr. Keim of the Keim Motor company, stated he expected a shipment of Studebakers, consisting of three car loads. He says that they have better than averaged a sale a day since the first of the year.

Eight nations were represented at the annual auto salon held in New York recently.

Sightseeing airplanes are being operated out of Berlin.

London engineers are experimenting with cheap fuels for autos.

Nearly \$1,000,000,000 are being spent annually in the United States for new roads and streets.

Keen competition has cut the price of gasoline in Sweden.

"Maah," the slang word, comes from the egypt, "mafada," which means "to charm by the eyes."

Greatest distance from the earth the moon ever gets is 242,000 miles; the nearest, 232,000 miles.

The Randall Auto Supply Co., that was damaged by fire, will be for business in the near future in another location, which will be announced later.

Boats, said to have been the invention of Carlians, were mentioned by Homer in 967 B. C.

PACKARD MOTOR CO. ALL SET FOR NEW YORK SHOW

Nearly a score of officers and department heads of the Packard Motor Car company will attend the New York automobile show. Arrangements for the display of the company's cars are practically complete. A special display will be held. It has been announced, in the building of the Packard Motor Car company of New York on Broadway in addition to the exhibit at the grand central palace.

It is expected that the three new single-six models, a five passenger coupe, five passenger sedan, limousine and touring-sedan, will be exhibited at the show, probably with special color schemes.

The three new models are built on the standard single-six chassis of the 128-inch wheel base type.

The sedan-limousine has a glass partition which lowers into the back of the front seat and makes an owner-driven sedan or raises to cut the rear seat and compartment from the front seat for a chauffeur-driven vehicle.

In a pocket under the right arm support in the rear compartment is a compact hand phone communication with the driver when the car is used as a limousine. The movable glass partition drops into a dustless, noiseless slot.

A sports touch has been given the five passenger coupe by the installation of a luggage trunk at the rear. Body sills have been extended slightly to form the support for a platform which carries the trunk. The back of the body is protected from the trunk by an nickel plated bar fenders vertically applied. Two large suit cases and a hat box are provided with the trunk.

AUTO ENGINEERS FACE NUMBER OF PUZZLING PROBLEMS

What are the problems facing the automobile engineer? This question sounds superfluous, with the highly developed cars seen on the streets. But take it from C. C. Hanch, vice president of the National automotive chamber of commerce, there are still some radical developments to be considered in automobile research and design, before the motor vehicle can be declared perfect.

These he enumerates as follows: Development of strong, light metals; also steels and alloys with high tensile strength.

Designing of carburetors which will reduce fuel consumption and also successfully utilize low grade fuels.

Improvement of braking and spring devices.

Building of more easily manipulated transmission.

Advance in headlighting system which will minimize glare.

Simplification of construction in general.

Development of equivalents or substitutes for existing materials.

New Air Cooled Car. General Motors' latest contribution to the motor world, the Chevrolet air cooled car, will be the feature of General Motors' market at the national show. The engineers have been working on the new model for several months. Time and again when it was thought the new car was ready real or fancied imperfections developed in the minds of the engineers and it was practically rebuilt from the ground up. It will be shown for the first time at the New York show.

OVERLAND COMPANY MAKES PROMISE GOOD; FOR \$25 IT WILL KEEP UP CAR FOR YEAR

The Overland Motors company has made its promise good. Over three weeks ago the officials announced that after the first of the New Year an announcement would be made that would startle the entire automobile industry in the country. The announcement is made and it is this: For \$25 the company guarantees a year's up keep on a new car. This course does not include gasoline, oil, tires, springs and a battery. But it does include the labor and parts on everything else.

During the past year approximately four hundred thousand square feet of blue print paper are used each year in the drafting departments of the Overland Motor Car company. Pontiac, Michigan, or enough to paper the walls of more than 300 average sized homes. This paper is used by the drafting divisions of the designing engineering and tool engineering departments.

The tremendous amount of details and records to be kept by the designing engineering department.

Save the Tube. Don't carry spare tubes loosely in the foot box or under the seat; keep them in the special tube bags or wrap them carefully in soft cloth. If kept in the original box shake some powdered chalk into the box so as to prevent chafing against the sides. Oil and grease are just as bad for rubber as sharp tools and the tubes should be thoroughly protected from them.

Slow Clapping of a butterfly's wing produces no sound but when the movements are rapid a noise is produced that increases in shrillness with the number of vibrations.

PAPER FOR BLUE PRINTS NO SMALL EXPENSE ITEM

Change notices are likewise sent to each department. Approximately 20 parts list books are kept on hand, giving the details of every part that goes into the car, sub-assembly parts and large unit assembly parts. Changes are made in these books, too, each time a change is made in any blue print. Every change in design must have the approval of the chief engineer before it is presented to the head of the company for final decision.

Provide More Cars. Difficulties experienced by the Michigan automobile factories through the shortage of freight cars are passing away. The railroads are now providing nearly sufficient cars to take care of the demands of the motor car plants.

A cat-proof fence, set well beside a picturesque old wall, surrounds Birdcraft Sanctuary, a tract of 16 acres presented to the Connecticut Audubon society for a bird designing engineering department.

ELECTRIC WELDING

NO PRE-HEATING

Automobile Housings, Crank Cases, Frames, Etc. Welded without dismantling. Perfect welds on shafts.

6285 INSPECTIONS PER CAR

The faithfulness of performance so universally remarked in Dodge Brothers Motor Cars, is due, in no small part, to the thoroughness with which each unit is inspected during the process of manufacture and assembly.

A trained staff of 1100 experts is employed in this work alone, and approximately 5,285 inspections are made on each car.

So exacting and rigid are the standards applied to these inspections that the slightest variation, either in workmanship or material, is sufficient cause for immediate rejection.

Dodge Brothers are almost over-scrupulous in their constant aim to make each car as sound and perfect as is humanly possible.

The price of the "Type A" Sedan is \$1000 delivered.

RADIO ROAD WORK FEATURE OF HUGE HIGHWAY EXHIBIT

Radio is now employed to supervise highway construction. Demonstration of the methods used by the North Carolina state highway department in directing road activities from the capital will be one of the novel features shown at the thirteenth American Good Roads congress, to be held at the Congress hotel January 13 to 19, according to announcement made yesterday.

With a dozen or more women highway contractors and women road officials present as delegates, two or more Sioux Indian chiefs, Red Bird and White Eagle, in attendance as delegates from the Outer Territories Highway association, and many recently developed road building machines on exhibition, some of which are as large as Baldwin locomotives, no good roads meeting ever held will surpass in novel features the coming session.

This big event, like the exposition of road building machinery, methods, materials and appliances, to be held at the coliseum during the same week, will be under the auspices of the American Road Builders' association, the largest and oldest good roads organization in the United States.

Results of the latest research investigations in highway building by the United States bureau of public roads, the state highway department of Illinois, the national research council, and other organizations and institutions conducting highway research work are stressed for detailed description at the congress. Highway finance and highway transportation will receive in full the serious consideration they merit, as will the future of federal aid to the states and other national and state road problems, both in administration, construction, and maintenance.

QUIT TOBACCO

So easy to drop Cigarette, Cigar or Chewing habit

No-To-Tobacco has helped thousands to break the costly, nerve-shattering tobacco habit. Whenever you have a longing for a smoke or chew, just place a harmless No-To-Tobacco tablet in your mouth instead. All desire for tobacco is completely broken, and you are better off mentally, physically, financially. It's so easy, so simple. Get a box of No-To-Tobacco and if it doesn't release you from all craving for tobacco in any form, your druggist will refund your money without question.

THE MOTORISTS' PROBLEMS

By WILLIAM H. STEWART, JR.

Motor Department—Will you kindly give me the correct definition of a "full floating axle," and would also like to inquire what type of axle a Willys-Knight model 20 has. Thanking you, I remain, J. M.

A full floating axle is one where in the transverse axle drive shafts float within the axle housing and do not work other than drive the wheels. They do not support any of the weight of the car or other wise take care of side thrusts, etc. The Willys-Knight model 20 has a three quarter floating type of rear axle.

Motor Department—A friend of mine claims that the reason the clearance is greater in an overhead valve motor than in a side valve motor is because of the motor head and part of the block expanding and the push rod being outside does not expand. He says the expansion of the head is greater than on the valve stem and valve head and causes the valve head to crowd away from its seat and he says the expansion of the head chamber. Please explain why the valve has more clearance in an overhead motor when warm. B. K.

The reasoning of "A" is more logical, especially with cylinder blocks not having the removable heads. The tendency of the cylinder block to expand when heated causes the valve clearance to increase and this is the reason why the valves are adjusted very close when cold. Where the cylinder heads are of the removable type, the expansion effecting the valve clearance is not so noticeable.

Motor Department—A friend of mine argues that his Ford stopped on dead center, that it with all the valves closed and that he took the head off the motor to see if the valves and the one that was down came up and that his motor is running as good as ever and that was all he did to it. As I have worked on a number of cars it seems to me that this would be impossible unless something was wrong. Please tell me if this could be possible. G. W.

Undoubtedly your friend is mistaken. All the valves do not close at one time on all of the cylinders. Regardless of dead centers, some valves will be open. It often happens that a valve will stick in its guide and cause a lot of trouble. A warped valve stem or a badly carbonized stem often will stick. Sometimes a little kerosene injected into the cylinders will find its way into the valve guides and help to reduce the trouble. Perhaps your friend experienced trouble with a sticky valve and after it was released, fell confident that all his trouble was over. It is necessary, however, to remove the cause. When the faulty valve is located, a careful inspection should be made. If warped, it is best to install a new valve. If only carbonized, a thorough cleaning will suffice.

Motor Department—My engine has begun to skip badly. On smooth roads, slightly up hill it pulls well, but upon reaching level ground, particularly if undulating, it begins to bound forward, then check and skip alternately. It develops knock from advanced spark more readily than it should. Please advise me. C. M.

Your trouble is probably due to a loose wire that comes into con-

act and pulls away as the car shakes. The knock is probably caused by excess carbon.

Motor Department—Kindly inform me if the mica or lava spark plugs give less trouble and last longer when the motor is of porcelain. Reader.

Consistent with the policy of this column we cannot answer queries of preference in design. However, it might be said that the porcelain plug is more easily broken than a mica plug, but on the other hand it is not so likely to become saturated with the products of combustion.

Motor Department—How can I test out my magneto? My engine runs on battery but refuses on magneto. I have a high tension magneto and there is no service station near where I live. Reader.

Disconnect wire from magneto armature to switch. Run engine on battery or have some one to spin it for you. Ground a wire to screw driver and touch other end to binding post on magneto armature, touching it and drawing it away. If no spark appear the circuit breaker or the armature windings are at fault. If good spark is shown, short circuit collector—finger brush. If spark is good, disconnect wire to ends of distributor wires and spark plugs. If no spark appears at the collector ring brush, secondary winding may be burned out or short circuited. Be sure that distributor points are all right and that no dust or oil has accumulated on it.

Motor Department—One of the cylinders of my Ford has developed weak compression. As there are no relief valves, is there any way to find the cylinder at fault by watching the valves? C. M.

Disconnect in pairs Nos. 1 and 4 pistons move together, as do 2 and 3. If No. 1 is on compression, No. 4 will be on exhaust, and the exhaust valve will be open. Similarly with Nos. 2 and 3. So crank engine and when you come to the weak cylinder note which exhaust valve is moving. No. 1 moving shows No. 4 on compression, and vice versa. This method may be applied to any four cylinder engine without compression cocks (relief valves).

Motor Department—Can you tell me how to get my engine to start. I have a 40-horsepower four-cylinder engine. I have started it and ground in the valves. My spark works fine. I have adjusted my carburetor, but cannot get my engine to start. I get two explosions after priming the engine. My intake valves work by suction and my exhaust valves work by the cam shaft. The factory that made this car is out of business. If you can suggest my trouble I would appreciate it. E. M.

The trouble may be due to wrong replacements of the valve cages. When grinding valves which seat in a cage as in your car, it often happens that the cage is not set back in place right. Make sure that the openings of the valve cages face those of the inlet pipe. With the valve cages installed wrong no gas can reach the combustion chamber.

Motor Department—I have a Chevrolet with Aviatite starting and lighting systems. The lights on my car are very dim when engine is still or when engine is running slow.

but are good when the engine is speeded up. Have examined the battery connections and find them good. Have nearly new battery, is pretty well charged and will start all these easily start motor. I will appreciate your telling me about a year columns where to locate the trouble. Reader.

When the engine is dead or running slowly the lights draw current from the battery. When the engine is revved up the lights usually take current direct from the generator. From what you have stated it appears that your battery is not sufficiently strong to afford bright lights. Perhaps it will not hold the charge. Would suggest that you have the battery inspected and tested at the regular service station or by some one thoroughly familiar with diseases of storage batteries.

KNOWLEDGE FOR CAR OWNERS

Interesting and Important Facts That Every Motorist Should Know.

There is less chance of the engine overheating when the mixture is kept clean.

Faulty carburetor adjustment causes at least 50 per cent loss in every gallon of gasoline used.

When the car is left standing for a week or so at a time it is well to add water weekly.

Never use kerosene to remove dust from the body of the car as it will ruin the finish.

It is well to remove the drain plug or drain valve from the gasoline tank and carburetor occasionally to run off any sediment which may collect there.

Pipe-clay acts as preservative of rubber and makes one of the best mediums for treating rubber mats used in automobiles.

When leaks occur at the seats of the valves, it indicates poor combustion and that the valves need regrinding.

When the spring clip is allowed to become loose there is danger of the spring leaves breaking.

Turning corners at speed imposes strain on all parts of the mechanism and should be avoided for that reason. It is also very hard on the tires.

A stretched tire should never be pumped too tight, and incidentally, it is better to fit such tires with an inner lining, as this will add many miles to their useful life.

When solution has been spilled out accidentally from your battery jar, a solution of pure sulphuric acid and distilled water having a gravity of 1.200 should be added.

When stopping a car on a slippery pavement, the best result is obtained when the brakes are put on slowly. If too much pressure is put on the brake pedal, it may cause a locking of the rear wheels.

To remove end play in the pinion shaft, loosen the pinion bearing adjustment, lock and turn the adjustment to take up the end play. The bearing should be adjusted until there is no end motion, but they should not bind nor should they cause the shaft to turn hard.

When driving in the mud gear try to force the car in mud gear, causing the wheels to spin. Always shift to lower gear, then take it slowly. If the car stops, reverse the shaft to turn hard.

When the differential begins to grow noisy it may need lubrication, or even a heavier lubrication. If this does not remedy the trouble, have the wear taken up at a service station.

During the cold weather one can use to advantage a much lighter grease in the transmission and rear axle. If the grease is too heavy it will not work into the recesses of the bearings, etc. as it should. It is well to note also that some engines require a lighter oil in winter than in summer.

Often times trouble is experienced on road with broken universal joint pins on propeller shaft. Where there is no garage in vicinity a temporary repair can be made by using a bunch of iron wire or a heavy bolt wedged in the yokes of joint, to pass the power to rear axle.

Use of the word "we" instead of "I" by sovereigns began with King John in 1159 and the idea was quickly adopted by the emperor of Germany and king of France.

HELPFUL HINTS

Do not neglect the differential just because you filled it with grease once upon a time. Inspect it occasionally to make sure the grease or oil hasn't worked out. If the differential needs lubrication it absorbs an enormous proportion of the power of the motor and it will soon become noisy—a trouble for which there is no cure.

DIESEL ENGINE OPENS CHANCE FOR USE IN AUTOS

Will the Diesel engine finally be adapted to replace the spark ignition engine now used to propel automobiles?

This question, recurrent almost annually since the invention of the automobile, faces its last repetition with the announcement from Paris of the invention of a semi-Diesel type of engine for motor cars.

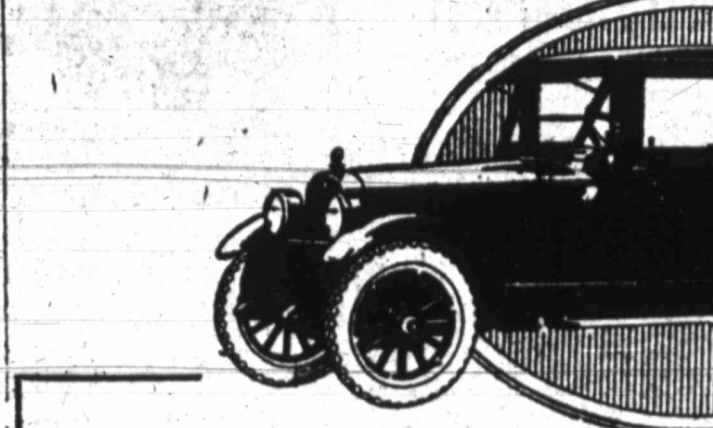

At the very beginning of the automobile industry, use of a Diesel engine was attempted on automobiles. But, although used for stationary purposes and in submarines, the engine would not work well in a moving, vibrating machine.

The engine, with spark ignition, that has replaced the Diesel, however, uses up costly gasoline, while the air-compression engine feeds on a cheap, low grade of oil. A combination of the good in both of these engines, therefore, would make an ideal power plant for automobiles.

This ideal of the nearest to a French automotive engineers believe is finally attained in the semi-Diesel automobile engine tested recently on a trip between Paris and Bordeaux, burns low-grade oil which costs 15 cents a gallon in France, as compared with 25 cents for gasoline. At the same time it retains the advantages of the spark-ignition engine now in use.

Besides, its inventors say, the semi-Diesel costs less for upkeep and is simpler and therefore cheaper to make than the present type. Experiments are still going on with the idea of installing the engine on Paris buses.

Bridge built of solid mahogany 150 feet long and 15 wide, spans the Rio Michol in the state of Chiapas, Mexico.

Hudson Sedan—All Aluminum Body

Bundy-Strong Auto Supply Co., Inc.

ANNOUNCE THE OPENING

of An Exclusively Wholesale Store at 1004 Indiana Ave.

Carrying all the standard lines of Automobile Accessories and Garage equipment. This is, and will be, in the future, one of the most complete and up-to-the-minute wholesale accessory stocks in the southwest. We invite our friends to visit our store and see for themselves that they can depend on getting their needs supplied. We are going to try at all times to give service that will justify the automobile dealers and garage men in giving us their business.

Wichita Falls is the logical distributing point for this section of Texas as well as southern and southwestern Oklahoma. We ask the dealers of this territory to try the new distributing center.

In addition to standard lines of accessories we are distributors for American Gasoline Pumps and Tube Oil Tanks, as well as all kinds of filling station equipment.

COME IN AND SEE US—WE ASSURE YOU OF THE MOST COURTEOUS TREATMENT

Overland
TRADE MARK REG.

The Most Sensational
ANNOUNCEMENT
Ever Made in the Automobile Industry

AFTER merchandising in 1922 about one quarter million dollars worth of Willys-Overland motor cars and after careful analysis of the performance records of the Overland cars on the roads of Wichita county, we make this sweeping offer which no one before has ever dared to put back of any other automobile:

WE WILL keep any new Overland car bought from us from today on in proper running condition including labor and parts—excepting only tires, springs and batteries, and such equipment not manufactured at the Overland factory and damages from wrecks and fires—for an entire year at a cost of only \$25.00.

**ONLY \$25 FOR A
YEAR'S UP-KEEP**

This Remarkable Plan Takes the Guess
Out of Automobile Up-Keep Cost

This is the first time in history that you can buy an automobile and know exactly how much it will cost to keep it in proper running condition.

Such a revolutionary measure is made possible only by the sturdy construction of today's extremely low priced Overland and its marvelous record of performance.

No other car in the world equals the economy of the Overland. No other car has ever sold under such an unlimited guarantee.

One year ago we put into operation the flat rate basis for all repairs on our cars, telling the customer just what his bill would be before he authorized the work. How many big companies are adopting this plan?

Today we give you an advance service plan never before undertaken by any company. In it we positively answer the question every automobile buyer should ask—"How much will one year's maintenance cost me?" Others may give you a figure, **BUT ARE THEY WILLING TO GUARANTEE IT?**

Buy an Overland and take the guess out of your purchase. Low in first cost. Lowest in operating cost.
