Know What You Are Eating

When you sit down to partake of the pure foods purchased from a PIGGLY WIGGLY store, you know what you are eating. PIGGLY WIGGLY sells only advertised brand of reputable manufacturers.

The most successful food manufacturers are those who think enough of their products to put their own name and brand on the package. Their trade mark is their coat of arms. It insures uniform quality at a fair price.

If PIGGLY WIGGLY should sell the unknown brands of groceries, PIGGLY WIGGLY would need a lot of clerks to palm off inferior merchandise to customers who demand the wellknown advertised brands.

So PIGGLY WIGGLY protects your health and your pocket book by carrying only fresh stocks of pure foods of known quality and by cutting out the extravagant methods of selling. You get the benefit of what we save.

en lifted by the warmth of new and dying flames, and then I have gone to my warm covers to dream of the rising sun that would warm another day as it armed the day before.

But of all warmths in all this world, there is no varmth, that can approach the warmth of a warm heart—a heart theil understands, that fathoms, that eaches, that forgives, that touches every fibre of your being and inspires you to be just a little more than you have ever been.

How the mother bird spreads its wings may keep warm its little brood!

So long as the world goes on, love will always remain the deepest and strangest of all mysteries. But there is one thing about love that is as plain and clear as the very light of the sun and moon and stars, and that is that it always warms the heart into which it is poured, When God climbs into a life, He first warms

It is perfectly proper, of ourse, for this country to assert its right on every part of the ground. But it will put its own life in Jeoparty if it indeprintes to even remotely rule the world. For a true democracy is not the assertion of ampire; it is the gractice of liberty, more liberty and yet more liberty. To a certain type of mind thereals costacy is every ambittion of power; some among us would apof pawer; some among us would spparently repeat the career of Rome
under the Cassars—If not so, then
ther are fearfully and wonderfully
ignorant of the danger there is in
a centralised system of government
and in the use of the military arm
of government. Within the limits of
the Roman amptre under Augustus
there may have been in all one hunused millions of humain beings. Not
less that one half were in a condition of slävery; and the rest, only
that small proportion who, under the
ouvied name of Roman citizen, inhabited italy, enjoyed political independance, or had the smallest
share in the povernment. The various lands and peoples were ruled
by Roman legates, and as laugustus
appointed them, we may readily
see that the Roman government was
a vast centralised system—absolute
frominion in the hands of a single
individual. It was during the reign
of Augustus that Jesus of Nanareth
was lepra. Positius Pilats was the
representative of the Roman govserment in Jesussian at the time
of the crucifixion; it was the sentence of Filate, who had the power
of life and dath is his own hands.
that was responsible for the transstronge on the hill of Caivary. The
atrugule of the centrite has been
to get away from that sort of government, and the growing glory of
America is the security it gives to
the individual—sives it to him by
placing sovereignty where it propsery blongs, towit: Under his own
hat. Is that saying toe much?
Lasten to Henry Grady: "Exalt the
sitizen as the state is the unit of

shrining in his own heart the uttermost temple of its liberty." That is
the meaning of America—borne raile
and individual liberty. If we quit
that ideal, wen't we inevitably drift
backward—back some two thquannd
years, and thus have to begin all
over again the long, hard climb toward the heights of freedom? Look
at the drift. Either by act of congress or amendment to the constitution, we are minimizing, state authority and are thereby execting the
osters into provinces such to be
ruled by some modern Pontius Pilate. And on top of that, a considerable commany, well-meaning

It has been "standing room only" at the Strand theater this week for the night performances and they have been delighted audiences. If one may judge from the expressions heard as the patrons leave the theater. "Three Wise Scois" is proving one of the most popular films shown in this city in some time. It is a wonderful production in photography, includes a cast of real artists and is filled with clean and wholesoms humor, the kind that provokes a smile here and laughter there, at the same time carrying along the threads of an intensely interesting story;

Eleanor Bograman, in the leading Taminus roll, is seen at her best, while William E. Crane, Alec Present and Called. One article is about Lingoln and the other Edward W. Sowards, multi-millionairs of Cincinnati. Mr. Edwards first lob paid him \$1.00 a week. \$2.50 of this want to his mother and he put the other fifty centr in a hullding and limit appointion where spaller medium and their interest accumulations ETILL ARE. Mr. Edwards says that roung Books there days seem to score small savings, but that he who apends has than he cares and puts the difference where it will be safe and draw interest, can not be a TOTAL fallure—to must and will amount it SOMETHING.

Mr. Edwards says that he has further observed that the young man who CAN notherwood that the young man who CAN notherwood that the young man who CAN notherwood that the institution has issued it's investment shares for hearty eleven hundred THRIFTT people. If you are not one of them, you can be and that easily. We are indicting approximately two hundred citizens of this city to own homes. We will gladly senior you. Tour ions application received new will be acted on by our Directors within the next few days. Come to see us now,

Cement

In 1824, an English meson wanted to produce a batter comment than any then in use. In do this he burned finely ground resulted were ground to a fine powder. When a mixture of this dull gray powder with water had hardened, it was the color of a popular building stone quarried on the late of Portland off the coust of England. So this mason, Joseph Aspdia, called his discovery "portland" cement.

That was less than one hundred years

Portland cement was not made in the United States until fifty years ago, The average annual production for the ten years following was only 36,000 sacks, Last year the country used over 470,000,-000 sucks of portland coment. Capacity to manufacture was nearly 600,000,000 sacks.

Cement cannot be made everywhere because raw materials of the necessary chemical composition are not found in sufficient quantities in every part of the country. But it is now manufactured in 27 states by 120 plants. There is at least one of these plants within shipping distimee of any community in this country.

To provide a cement supply that would always be ample to meet demand has meent a good deal in costly experience to those who have invested in the cement industry. There have been large capital investments with low returns.

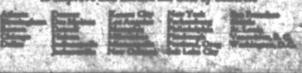

In the last twenty-live years, 328 co-ment plants have been built or have gone through some stage of construction or financing, 162 were completed and placed in operation.

Only 120 of these planes have survived the fittencial converting and a scholing risks of the period. These connector is marrly 30 per concentrate than the record past's cleanant.

These are a lew Jimportant facts about in fedurity that is still young Advertisament to follow will give you more of these facts, and will sell actuaching of the important place comme occupies in the welfact of every individual.

Up to Thesday afternoon approximately 500 pickers had been sent through Mr. Hudson's office at the city shall to various causties over the attac to relieve the shortage of pickers. The increased demand and the shortage of labor Tuesday resulted in a 25 cent raise in the wages for picking. Farmers from Hitl. Kaulman, Johnson and Young counties were at the city hall with bids for pickers. The Hill sounty, farmers, in order to get the necessary number, offered to pay pickers \$1:25 a hundred; the other pianters met the pribe.

Two weeks ago Constable Mor-gan and Banger Sergent McCor-mick discovered the location of a still near the Clay county line east of the city. of the city. A large amount of much was on hand and it was left indisturbed and a watch kept over it. Bunday night, however, a num-ber of young men happened across the still and brought it in.

The second still was found near Call Field but no one was with this having been in use for the past week or ten days.

Lake Kemp Rises Over Five Feet Result of Rains

Is tetal sine of five and one bath fact. In the level of the water in Lake Kemp, the big body of water just above the storage dam, resulted from the two most recent rains, according to reports received Wadnesday morning by J. L. Lochridge, resident engineer of the Wichita County Water Improvement District No. 1.

The take is becoming a great attraction for motorisis, as it is ai-

traction for motorisis, as it is al-ready a remarkably beautiful body of water and gives premise of soon attaining the position of the finest "inland see" in the southwest.

There has been an epidemic of law violations in our own county in the last few

weeks—illegal sale of liquor, burglaries, thefts, whippings and many other crimes. Governor Davidson is making an effort to arouse public sentiment against all

forms of crime. Every good citizen who believes in law enforcement against ev-

ery and all violations of law should be present tonight and give Governor David-son their moral support in his most commendable effort to suppress crime.

If you are in favor of law enforcement, come out tonight and show your colors, at
