COUNTY AGENT'S NOTES

have not yet filed your return of the Federal tax. It might be a good idea to get it done right away. September 30 is the deadline for filing and all claim forms are available from the County Agent's office. One of the claim forms is a card and I will send you one if you wish.

Harvesting of cotton can be a real pain to the farmer. This year's cotton crop is expected to be a bumper crop. The following suggestions are: When cotton is wet, it should be kept in good condition. Do not allow grass to be cut with the cotton as the grass cannot remove the lint cotton, defoliating machinery will help prevent green rot and aid in preventing quality which lowers quality. It is worth a little extra effort to do the best job after taking the whole crop of cotton.

Application of fertilizer on cotton will help it to go into the soil in a vigorous condition. Complete fertilizer with a 1-1-1 ratio, and should be applied about a month before the first expected frost. Grasses are pushed forward by late fertilization. Also, applying fertilizer too late prevents the grass from getting the most out of the soil. About 200 lbs. of actual nitrogen per 1000 sq. ft. and soak the soil to a depth of 6 inches.

Bulletin No. 203, Home Economics, is a good discussion on cotton and it is available at the County Agent's office.

Motorists Warned To Stop For School Buses

Three state agencies joined this week in urging the continuation of a state-wide program to acquaint the public with the Texas law requiring all vehicles to stop when approaching a school bus loading or unloading children.

The Texas Education Agency, the Texas Highway Department, and the Texas Department of Public Safety are making a joint request that school superintendents, newspapers, radio stations, and television stations participate in efforts to acquaint drivers with the school bus law.

"Superintendents and news editors performed an outstanding public service in this safety campaign last year," said J. W. Edgar, Commissioner of Education. "Yet seven lives were lost during the school year in collisions involving school buses. There is a continuing need for a program of safety education."

There were two more fatalities during 1956-57 than were reported to the Department of Public Safety in 1955-56. The total number of accidents reported declined, however, from 379 to 335. (During the past year the Highway Department erected signs on all major roads warning motorists of the safety measure.) The law says in effect, that upon meeting or overtaking a school bus which has stopped on the highway for the purpose of receiving or discharging children, the driver of any vehicle shall stop immediately before passing. After coming to a stop the driver of the vehicle can proceed with due caution at a speed which is prudent and does not exceed ten miles per hour. The law does not apply within city limits.

All public school buses are painted yellow and have "School Bus" written in large letters on the front and rear of each bus. They are equipped with flasher lights usually mounted high on the front and rear of the bus. These flashing lights are used only when the bus is in the process of stopping or is stopped to receive or discharge children.

The optimist sees things as they should be -- not as they are.

"HOW COME THE FLOOR IS PAINTED RED?"

on highways with separate roadways when the bus is on a different roadway from that of a passing vehicle. Vehicles are not required to stop if the school bus is stopped in a loading zone which is a part of or adjacent to a controlled-access highway and where pedestrians are not permitted to cross the roadway.

PATSY IRENE CUMBA WEDS WILLIAM D. BEENE IN DOUBLE RING CEREMONY

Miss Patsy Irene Cumba, daughter of Mr. and Mrs. L. E. Cumba of Route 4, Cisco, Texas, became the bride of William Duane Beene of Brownwood, Friday evening, September 27, at 7:30.

Parents of the bridegroom are Mr. and Mrs. J. W. Beene of Route 2, Rising Star.

The double ring ceremony was read by Rev. T. D. Whitehorn in the Sabanno Baptist Church, before an arch covered with greenery and centered with a white satin bow and white wedding bells. Palms and baskets of white gladioli flanked with candelabra holding white tapers, completed the altar decorations.

Candlelighters were sisters of the bride, Mrs. R. L. Sanson of Grapevine and Mrs. Ray Gage of Cisco. Mrs. Sanson wore a pink dress and Mrs. Gage was dressed in blue and each wore a corsage of white carnations.

Mrs. Earl Cumba, soloist, sang "I Love You Truly" and "The Lord's Prayer," accompanied by Miss Melba Raye Harrelson who also played the wedding march.

Given in marriage by her father, the bride wore a waltz-length dress of white Chantilly lace and net over taffeta. The fitted bodice was fashioned with a Peter Pan collar outlined with seed pearls and long sleeves which came to points over her hands, and the full skirt was of white net. Her fingertip veil of nylon tulle fell from a white tiara.

She carried a white Bible topped with a bouquet of Flor de maur.

Miss Janie Cumba, sister of the bride, was maid of honor. She wore a waltz-length dress of light blue taffeta with net overskirt and blue lace jacket and carried a bouquet of Flor de maur.

Mrs. Billy Cumba presided over the guest book.

For a wedding trip to New Orleans, Louisiana, the bride was dressed in a gray sheath dress with black accessories. She wore a corsage of Flour de maur.

The bride is a 1953 graduate of Cross Plains High School and Draughon's Business College in Abilene and for the past three years has been employed by the Prudential Life Insurance Co. in Abilene.

The bridegroom is a graduate of Gustine High School.

The couple are at home in Woodland Heights in Brownwood where he is employed by the Santa Fe Railway Co.

Mrs. Roger Watson and Mrs. Clyde Bunnell visited in Stephenville Saturday with Max Watson, a student at Tarleton State College.

This is the month that separates the outdoorsmen. Some are hunters, some fishermen, some both. How does a "both" man decide

where to go—field or stream? I'll guess with you. He goes dove hunting, if in reach of the North Zone; his mind's ear hears the shotgun blast, and his mind's eye

sees the birds fall.

But some of our outdoorsmen will stick to their fishing. They'll figure that now September's here the fish will be a little bit more cooperative, maybe. Also, shrewdly, they'll think the best fishing spots may be less crowded, what with the hunters gone to the sunflower patch.

Let's talk about both of those guys—the fisherman first.

He is concerned about the black bass, and that fish has been suffering his usual case of the summer sulks.

He has been playing it cozy, down deep where the water is cool, moving around very little, using up not much energy and requiring a minimum of food. But he can be had.

Old time anglers are getting bass, these hot days, by fishing deep with minnows or plugs. Deep trolling also pays off.

The Hellbender has been a productive lure at Lakes Whitney, Texhoma, Possum Kingdom, and the Highland Lakes of Central Texas. Work it deep and slow.

The big bass are down deep as they can get to keep cool, but they have to stay above the "dead" water where the oxygen content is too low.

That may be 20 to 30 feet down, but you'll have to experiment to find the right depth in your own favorite fishing hole. All depends on the water temperature and the oxygen content of the water.

If the first norther of autumn hits before this gets into print—change signals.

When that happens, your lake or stream will "turn over." That means when the surface is colder than the bottom, the top, cold water will sink and the bottom, warmer water will rise to the top.

Look for that day! When it comes, get out your water lures

and be confident of getting bass if you are fishing in good water and using your bait adroitly.

Meanwhile, the bass will hit surface lures, even in hot weather. Try them early in the morning or in late afternoon. Or at night.

Now About Whites

That's black bass we've been talking about. Now, what about the white bass?

All summer, these fish have been congregating in the swift water below dams, eating their fill of shad that abound in such waters.

Many fishermen have caught limit strings of white bass all through the summer, fishing in the fast water. But now, this kind of fishing has dropped off. What's the trouble?

Well, the spring-born shad are now getting a little too big for the whites to handle. So the fish are drifting downstream, looking for other food.

They will be moving around a lot. But if your minnow or spoon is there—in the right place at the right time—you will be in business in a big way.

Work your bait deep, where the water is cool, using the same technique as for blacks.

Work Lures Slowly

I suspect that most anglers work their lures too fast.

Fish like action, but they like it slow. To give an example, my fishing partner and I catch good strings of bass in the Highland Lakes of Central Texas, using minnows, either free swimming or with a light split shot.

This is the procedure: toss the minnow out there in bass water and let him swim. Put the rod down and pour a cup of coffee out of the Thermos. Maybe you get a strike, maybe not.

But pick up that rod and begin reeling in—very, very slowly. Pretty soon, here comes a little tug. Don't get excited. Wait.

Reel in some more—very slowly. Another tug, maybe harder this time. Don't strike yet, wait him out. You can feel when he is on. Then strike, hard. Results: bass.

Trotline Technique

Well, about catfishing: how often do you run your trotline?

The experts are at odds on this point. Some of them give the line a test every hour or two—others allow much time for the catfish to get themselves hooked.

One experienced trotliner of my acquaintance belongs to the long-wait school of thought.

He reasons that a big, heavy, lazy catfish will take his own sweet time with a bream or other bait. He nibbles at it, nudges it around, contemplates it, and takes it (maybe) when the notion strikes him.

I am inclined to go along with this easy-does-it kind of catfishing.

Fishing is not much of a hurry up proposition, anyhow. You've got to relax to catch fish. And learning to relax is maybe the best thing about this sport.

Dove Shooters Prosper

Turning to the hunting situation—reports coming in here say the North Zone shooters are doing pretty well, and there are plenty of birds, though some are small. Scattered rains around the state

Texas In Review

Highlights from four important Southwest Conference games will be featured on Humble's "Football Review" next week (October 7). Kern Tips will devote half of the interesting program to describing films of deciding plays and highlights from the Arkansas-TCU, Rice-Stanford, Texas-Southern, and Texas Tech-LSU games to be played this Saturday.

In addition, Tips will have Darrel Royal, Texas Coach, as guest on the program. Royal will diagram and demonstrate one of his key plays. Also to be seen on the program showing the vast organizational effort that goes into an athletic program. This story comes from Waco and the Baylor campus.

The training of tackles and guards at TCU will also be seen as cameras follow training and practice sessions that make TCU linemen outstanding.

have not been heavy enough to change the birds' watering habits. One complaint of the dove hunters is that their birds fall in the dense sunflower patches and can't be found.

Whitewing hunters will be numerous in the Valley about now; the season being Sept. 13-15-17.

Tomorrow is the greatest labor-saving device of today.

State Capitol NEWS

Mr. and Mrs. Clem Horn of Lohn and Mr. and Mrs. Bill Finley of Coleman visited Mr. and Mrs. George Jowers Sunday afternoon.

Mr. and Mrs. E. B. Webb returned home the past week end after spending two weeks in Pierre, South Dakota where they looked after ranch interests. Enroute home they visited their daughter, Jacqueline, who is a student at Texas Tech in Lubbock.

AUSTIN, Tex.—How much will Texas' drought-shocked farm economy be able to come back, thanks to 1957 rains?

U. S. Bureau of Crop Estimates say Texas' 1957 cash income, from all farm and ranch products, may be as much as \$200,000,000 higher than last year.

Actual statistics now are not so rosy. Reports from the University of Texas Bureau of Business Research show cash income, as of July, down 13 per cent from July of last year. Farm income for July is 70 per cent of the 1947-49 average.

"Farm income," says a BBR analyst, "is still the most depressed sector of the Texas economy, although rising prices and a better outlook for crops give some grounds for optimism."

Some attribute the poor cash showing in reports thus far to lateness of crops in areas where continued spring rains delayed planting.

Whatever final statistics show, most farmers and farm observers seem to regard 1957 as the beginning of better things. It rained. And though the rains may have washed out cotton, rotted melons and mildewed grain, it "put a season in the ground."

LITTLE ROCK REPRECUSSIONS—News from Little Rock, Ark., brought expressions of concern and disapproval from the Texas Capitol.

Gov. Price Daniel, on hearing the President had sent in federal troops to enforce school integration, fired off a telegram to the White House. Such action, said Daniel, was "reminiscent of the tactics of Reconstruction Days."

"Does this mean you will occupy with troops every nonintegrated school in the South?" the Governor asked. "If so, your action will destroy the public school systems and good will among the races which most of us in the South have labored so hard to preserve."

U. S. Sen. Lyndon B. Johnson, who was in the State Capitol at the time, for a Democratic women's gathering, said he was "concerned and disturbed."

"I think there should be no troops from either side patrolling our school campuses," said Johnson.

NEW LAWS SUGGESTED—Spectators of the ICT investigations are no longer interested in what Ben Jack Cage did or didn't do. Or in what he says or doesn't say. They are more interested in the effect the ICT matter will have on future insurance regulations.

Cage answered a few general questions for the Senate investigating committee. But he refused to answer 90 others on grounds of possible self incrimination.

However, officials of the State Insurance Department spoke to the committee specifically and without hesitation. Commissioner William A. Harrison suggested need for possible legislation in four areas:

1. Broad authority to determine the competence of management and to pass on management contracts. (Jack Cage Co. had a management contract with ICT.)

2. More broad control over financial record keeping by companies.

3. Change in the minimum capital requirements for organizing a company (presumably to require more capital).

4. Changes in insurance investment restrictions.

FLU FUROR FADES—After the shock of the first flare-up, most Texans seemed resigned to living with the Asian flu threat for awhile.

Although cases tripled (to 9,151) in a week, health officials in some areas reported a decline. Some said they felt they were "over the hump."

SHOEMAKE'S POLICY DROPPED—An Austin district judge has ordered the state receiver to stop paying premiums on A. B. Shoemaker's giant insurance policy. Value of the gradually diminishing policy was down to \$719,000.

At one time the policy would have been worth \$1,000,000 on Shoemaker's death. Money would have been added to the assets of the bankrupt US Trust and Guaranty Co.

Shoemaker attempted to kill himself after his company collapsed. His death seemed imminent, and the \$20,000-a-year premiums were kept paid. Now, doctors say Shoemaker may live another 15 years.

TUG O' WATER—Water contests are back in the news.

City of San Antonio has been trying for more than three years to get permission to take 100,000 acre feet of water annually from Canyon Dam to be built near New Braunfels. Guadalupe-Blanco River Authority opposed the request, and last July the State Water Board turned down San Antonio's application.

San Antonio has now filed suit in an Austin court to get the board's decision nullified.

Fort Worth had better luck with the Water Board. It gained permission to take 365,000 acre feet a year from tributaries of the Trinity. Enough, presumably, to care for the city's needs until the year 2000.

But there were protests, both from within and without Fort Worth. Board said permit is a new type which will protect the supply of downstream users.

SCHOOL PANEL—House Speaker Waggoner Carr added three more

to the committee which is to study means for handling Texas' growing school population. They are Mrs. Will Miller of Corsicana, Nat Williams of Lubbock and Stone Wells of Houston.

Appointment of six persons by Governor Daniel will complete the 24-member committee.

SCHOOL BUS LAW — There still are people who don't observe Texas school bus law, say state officials. Seven were killed in school bus collisions last year.

Wide publicity on the provisions of the law are urged by Education, Highway and Safety Department officials. Basically, the laws say:

1. A driver meeting or overtaking a school bus that has stopped to load or discharge passengers must stop immediately. He may then proceed cautiously at not more than 10 miles per hour.

2. Law does not apply in city limits or on a divided highway where the bus is on a different roadway from the other vehicle.

Mr. and Mrs. Lester Barr were in Wingate Tuesday to attend the funeral of Mrs. Barr's aunt, Mrs. J. M. Huckaby, former resident of Cross Plains.
