SIXTY-THIRD YEAR

School District Bond, Tax Vote Today

A large turnout is expected today (Wednesday) as voters of Cross Plains Independent School District go to the polls to decide the fate of the local elementary school.

Trustees are asking residents of the school district to empower the board to issue up to \$180,000 in bonds and authorize the levying of a maintenance tax to retire the bonds. Both propositions must pass to allow the other to be effected.

Polls were scheduled to open at 8 p.m. and will remain open until 7 p.m. at the City Hall in Cross Plains. Alton E. Hornsby is presiding judge.

The election was called after fire destroyed the building and contents of elementary school a month ago. That structure was built in 1926. Plans call for replacing the burned shell with a building which is modern in every detail, incorporating a new science laboratory and homemaker department for high school departments.

Those voting in the bond and maintenance tax proposals will find two ballot boxes. One will be used by those citizens of the school district who have taxable property and have rendered the same for taxation. The other will be used by those persons who have no taxable property but are otherwise entitled to cast votes. Votes will be tallied separately, and will be canvassed by trustees tonight.

It was pointed out by the election judge that registrations to be used in allowing those persons to vote will be the ones issued in 1971. He pointed out that most recent registrations do not become effective until March 1 this year. An 18 year old who registered 30 days before the election date is qualified to vote.

Board members have opined that at total tax rate of \$1.80 per \$100 valuation will be sufficient to operate the schools

and pay off old and the new bonded indebtedness. The rate as broken down shows \$1.23 for local school operation, 23 cents for retirement of old bonds, and 30 cents for retirement of the new bonds, if passed, scheduled to be paid off in 1989, 17 years.

The 30 cent figure was arrived at by expecting 95 per cent collections from the school district's total valuation, which exceeds \$5 million.

It has been pointed out that the exact cost of the new building and equipment is not yet known, but if the cost does not run the full amount asked for, which is possible since the insurance settlement of \$68,671.09 will be used, only the amount of bonds needed will be issued.

Local Cagers Drop 3 Of Last 4 Tilts

Cross Plains High School teams dropped three of four outings in season ending basketball action.

Buffettes salvaged the lone conference triumph at Ranger on February 4. Buffs bowed to De Leon and Ranger and De Leon girls upset Buffettes on Tuesday prior to season finale.

Local girls began with a slim 15-11 lead, but score was tied 44-44 after third period. De Leon claimed a final 58-51 win. Terry Edgington personally accounted for 43 points, 14 field goals and 15 free tosses, for local sextet.

Buffaloes fell behind early, trailing 18-9 after eight minutes. A 16-9 third quarter favored the Herd, but DeLeon fought off a final 65-50 win. Ricky Kirkham led Cross Plains tallying with 21 points, and Rodney Renfro added 10.

In the season finale at Ranger Buffettes romped to a 40-18 buge at halftime and coasted to a 53-41 triumph. Miss Edgington dumped in 27 points, and Margie Duncan counted 12 for the Buffettes.

Buffaloes dropped behind 20-7 in the first stanza, and the Ranger gang rolled to a 59-37 triumph. Renfro led a cold Herd attack with 13 points.

Callahan Peanut Growers Due Insecticide Survey

A survey of insecticide use on peanuts is planned to be conducted in Callahan County reports county agricultural agent, Greg Grengross. The survey will be conducted by mailing questionnaires to randomly selected producers in the West Cross Timbers area. Growers are urged to complete the brief report form and return it in the envelope provided. Instructions for completion of the form will be included in the questionnaire packet. Agent Grengross noted he will be of assistance to any grower having questions or problems concerning the survey.

This insecticide use survey is being conducted to establish documented evidence of insecticide use patterns on peanuts. Estimates of insecticide use are not adequate for present and future scientific needs. Written evidence of this type is needed by local, State and Federal planning agencies working with peanut insect control programs, Grengross emphasized.

The objectives of the survey include the establishment of recent trends in respect to number of applications, type insecticides, type formulation and method of application employed in peanut insect control practices.

The Texas Agricultural Ex-

tension Service in Callahan County has assisted with the implementation of an insect control program to use insecticide application only when needed. The program goal is to assist producers with receiving more net dollar returns from money invested in insect control practices.

Brownwood College Gives Elementary School Books

A gift from Howard Payne College at Brownwood of an estimated 50 volumes has begun the rebuilding of a library for Cross Plains Elementary School. The library was lost in the fire that razed the local school building about a month ago. It included 4,186 volumes, according to a count made recently by the school. Included were all types of books.

The volumes presented the local grammar school last Thursday from Howard Payne came from the Elementary Curriculum Library and consists primarily of supplementary material. Included in the gift, which came

unexpectedly, are dictionaries, writing and reading materials.

The donation was made by Dr. Frances L. Merritt, head of the Education Department at HPC, and Miss Myrtle Brick, also of Howard Payne. It was reported by local teachers that the two college professors expressed concern and felt that the local school might possibly use the material they brought. It was greatly appreciated by Cross Plains teachers, and is reported that it is invaluable in daily classroom work.

Many Cross Plains teachers have been taught by the two ladies.

Writer Diversifies News About Pioneer Area

By Wanetta Parson

I was told this past week by several neighbors that the Pioneer news was dull with nothing more than who visited whom. Not only that, more than one gave clippings, pamphlets and one whole magazine with things they wanted "talked up" in the paper. I didn't see the program, but another farm wife assures me that NBC scorched the farmers again for high food prices. She told me she knew for a fact that 10 years ago when they were getting 55c for oats that a box of rolled oats always on her grocery list was 37c. Today that same box of oatmeal is 77c, and the farmer is only getting 55 to 65c for his oats. She had extended comments — all unfavorable for current new stories.

I was surprised to hear via radio that a national committee is actually investigating the high price of bread because there is so little wheat content. It seems that the neighbor with the bread statistics a couple of weeks ago was right — not that we ever doubted her! The article given me ranges in subject from a humorous theory on the origin of kissing to the deadly earnest topic of farmers being the chief fighters of pollution yet being blamed for most of it by the well organized publicity of the industrial community who needs a scapegoat. Needless to say, the farmers will continue to be blamed until they organize and put on their own national campaign for truth and it will never happen.

Mrs. Earl Montgomery of Cross Plains visited Mr. and Mrs. Jess Brown Sunday afternoon.

Certify Early Farm's 1972 Set-Aside Acres

It has been determined that a producer must designate and certify his total set-aside acreage by the earliest certification date applicable to the farm. Where the farm only has corn, grain sorghum, and/or cotton, the producer could wait until the earlier of the date he certifies or July 1 to designate the set aside.

J. C. Earp, Jr., County ASCS Director, lists situations where the producer would be expected to designate his total set-aside by the earlier of the date he certifies on May 1.

Farm has wheat allotment or barley in feed grain base with crops planted or none planted. Must certify zero acreage.

Wheat planted on farm with zero allotment where acreage will be substituted for feed grain or cotton history.

Barley planted on farm which only has grain sorghum and corn in the feed grain base.

Ex-Buff, HPC Track Star Holds Records

A recent release from Howard Payne College reveals that Junior Lee, former trackster at the Brownwood school and of Cross Plains High School, holds two school distance records personally and ran on relay teams which hold two more.

Standards he set personally include the mile run at 4:05.9 and the three mile run at a 13:48.0 clocking.

Lee, son of Mr. and Mrs. Albert Lee of Cross Plains, ran the anchor leg on the record setting 2-mile relay team, timed in 7:29.8, and the distance relay team, clocked in 9:49.2.

Lee was graduated from Howard Payne last spring. The 1966 graduate of Cross Plains High School established his two personal records in 1971 as was the new mark in the two-mile relay. The distance relay standard came a year earlier.

Many Chevrolet dealers are announcing the most complete warranty ever put on a used car. Count your blessings.

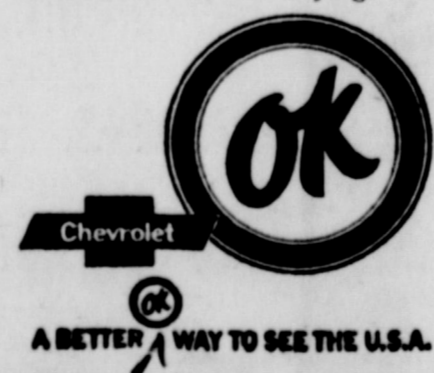

First, you're protected where it counts most: on the major mechanical parts of the car you buy. And that lasts a healthy 30 days or 2000 miles, whichever comes first.

Second, you get special savings on any parts or labor you need. From the day you buy for

24 months. Third, the special savings are good all across the country at most Chevrolet dealers. Say you're on a vacation trip and find you need service. You just get in touch with a participating Chevrolet dealership.

All you do is show an OK warranty identification card you receive when you buy your used car.

Your Chevrolet dealers' new OK warranty. It takes the guesswork out of used car buying.

HINTS

FROM HIGGINBOTHAMS

By Barbara Williams

Although no one seems to know whether or not George Washington really cut down his father's favorite cherry tree, we do know that the anniversary of his birthday is an ideal time to serve cherry-inspired dishes.

Take the baking dish you bought at Higginbothams from the cupboard and heat your MAGIC CHEF oven to 425 degrees, and create a flag-topped cherry cobbler for Feb. 22, Washington's birthday.

It's really quiet simple and is certain to delight the children of the household and adult guests, too. You may make it with your favorite cherry pie filling or use canned cherry pie filling spiced with a dash of lemon juice, cinnamon and nutmeg as shown in the recipe below. Your patriotic topping will be pastry cut to form the stars and stripes. It bakes and crisps as the cherry filling heats through to bubbling perfection. This cobbler is delicious "as is" or with a scoop of ice cream for each serving.

PATRIOTIC COBBLER:
2 No. 2 cans (2½ cups each) cherry pie filling
1½ tsp. lemon juice
1 tsp. cinnamon
½ tsp. nutmeg
Pastry for 1-crust pie
Combine pie filling, lemon juice and spices. Pour into a 10X6X1½-inch baking dish.
Roll pastry on a lightly floured surface to a 10X4 inch rectangle. Cut into three 10-inch strips and one 4X2½-inch rectangle and two 6-inch strips.

Dick Dickson, Jr. of Austin spent Saturday night and Sunday with his mother, Mrs. C. V. Dickson. Also guest in the home was Miss Karen Brooks of Cisco.

Cut small stars out of the rectangle and place star-studded rectangle in one corner of pie. Arrange the 6-inch strips beside the rectangle and the 10-inch strips over the remainder of the pie to make a flag design. Bake in a 425-degree oven for 25-30 minutes or until the crust is brown. Makes 8-12 servings.

New Peanut Planting Rule Is Explained

According to the county ASCS office, in 1972 peanuts planted in any skip-row planting pattern will be counted as all peanuts, even if the rows skipped are four or more. This will mean that where peanuts are planted in a skip-row pattern the entire field will be counted as peanut acreage. The only exception to this rule is where the skipped rows are planted to competitive crops.

If you plan to plant peanuts in any pattern other than solid, contact this office for additional information.

Last Rites Held For W. A. Huckaby, 80

Funeral service was held Thursday at 2:30 p.m. in the Higginbotham Funeral Chapel here for Walter A. (Red) Huckaby, 80-year-old long time Cross Plains resident.

He was a rig builder in the early oil boom days of this area, and owned and operated many businesses in this city.
