

ECONOMY IS A FORD TRADITION

The first economical car from the standpoint of investment was the FORD.
 The first economical car from the standpoint of operation was the FORD.
 The FORD was the first car to be economically serviced and repaired.
 The FORD was the first to fully equip both cars and trucks with safety glass throughout as standard equipment.
 Mr. FORD's constant aim, since 1903, has been to provide economical transportation to the multitude.
 The New FORD V-8 is the finest example of this tradition yet produced. The very finest engineering known is built into this car as well as "Comfort Zone Riding" and every economical feature for which the tradition of the Ford Motor Co. stands.

PROVED BY THE PAST—IMPROVED FOR THE FUTURE

OLDEST EMPLOYEE CHRISTENS REXALL 29,000-MILE TRAIN

When the Million-Dollar Streamlined Convention Train of the United Drug Company was dedicated in Boston at the start of its 29,000-mile tour, it was christened by Miss Edith Minard, one of the 14 original employees of the Company. L. K. Liggett, President and founder of the Company (right) is an interested spectator as Miss Minard breaks the traditional bottle of champagne on the driving rod of the 350-ton locomotive.
 The train will visit 147 cities and meetings of Rexall druggists will be held aboard the "Convention on Wheels" in 109 cities on the eight-month tour.

VETERANS TO RECEIVE BABY BONDS SOON AFTER JUNE 15; THEY MAY BE TURNED INTO CASH AT POST OFFICE

Veterans who have properly filed their claims, certificates and other necessary papers will have no trouble whatever in getting their bonus money and bonds. There will be no waiting in line this time. The Treasury has announced completed plans to expedite the payment of the bonus with the least possible inconvenience to veterans and for the greatest protection to the Treasury. On June 15 two million veterans will receive through the mails checks and three percent bonds in full payment of their soldiers' bonus. According to Gen. Frank T. Hines, director of the Veterans' Administration, 2,700,000 claims for bonus payments have been filed with the Veterans' Administration, but about 700,000 have not yet been verified for certification to the Treasury. Every effort is being made to verify these before mailing time. The three percent bonds are in \$50 denominations. For any amount under \$50 the veteran will receive a check. Secretary Morgenthau insists that these bonds are a good investment and has expressed the hope that as many veterans as possible will retain them until maturity in 1945.
 A list of paying postoffices has not been as yet released, but there will be 250 or 300 of them in the U. S. It will not be necessary for veterans to call at one of these designated postoffices in order to have his bonds converted. He can make application to his local postmaster, who will certify to his identification. The bonds will then be forwarded by the local postmaster to the nearest disbursing post office, and a check will be sent back immediately to the veteran.
 The veteran's bonds are nontransferable, and cannot lawfully be assigned toward purchases. Neither can they be converted into cash at the banks. They are payable to the veteran only, and can be cashed only by him.
 All bonds will be dated June 15, 1936, and will run to June 15, 1945. They may be exchanged for cash at any time during the first year at their face value, and if held one year from the date of issuance they may be exchanged with an additional three percent interest.
 The Department is anxious that veterans receive these bonds with the least possible delay.

The Job of Living

You talk for 13 years; eat for six years; spend 25 years in pleasure; wash for 18 months, and sleep for 22 years, if you live to be seventy.

Executions Banned

Murders in Buddhist countries such as Tibet are not executed, because Buddhism forbids killing a living creature.

BRUNO HAUPTMANN DID NOT SUFFER ANY PAIN WHEN ELECTROCUTED; HIS BRAIN AND HEART QUICKLY FROZEN

Notwithstanding many people today do not believe in capital punishment of any kind for any reason, and still more do not believe in officially killing a person on circumstantial evidence, still that method of "punishment" is still employed in most of the states of this country to rid society of its undesirable after certain crimes have been committed. However, this kind of death has been made as easy as possible in many states.
 It is said the electrical shocks that killed Bruno Hauptmann had the same effect as if his heart and brain had suddenly "frozen."
 Medical authorities, explaining the physiological aspects of electrocution, said it is a "painless" death.
 With heavy charges of electricity paralyzing both the heart and brain, there is not the slightest possibility of torture after the current has been applied.
 The electrical shocks are accompanied by violent muscular contractions and those parts of the skin and muscle in direct contact with the electrodes frequently are burned—much as if they had been exposed to fire.
 Physicians pointed out that electrocution causes a breakdown in the nervous system which ordinarily carries messages to and from the brain. This breakdown is what prevents the prisoner from feeling the shocks.
 One doctor compared this breakdown of nervous tissue to the burning out of fuses. The nerves are the only body tissue which cannot regenerate when part is destroyed. For example, if the skin is bruised, new growth gradually takes place. Such a re-growth is impossible from the nervous system, so that, once the connections have been destroyed, the organism dies.
 The brain itself appears to be affected by electrocution. One autopsy report showed that the temperature of that organ had been raised to 145 degrees Fahrenheit as compared with approximately 99 degrees for the normal internal temperature. A number of hemorrhages of the brain have occurred.
 Normally the human body has a high resistance to electricity. A charge heavy enough to overcome a resistance of from 8,000 to 40,000 ohms required to kill a person. The normal resistance of an Atlantic cable is 8,000 ohms. When the skin is wet, resistance is lower. That is why a salt solution is applied to the electrodes when a criminal is electrocuted.
 Alternating current, which is used in all legal executions by electricity, is more than twice as deadly as direct current such as is frequently used for lighting, cooking and industrial purposes.
 The first criminal to be electrocuted in the United States was William Kemmer, who died at Auburn, N. Y., prison on Aug. 6, 1890. A bitter legal battle was carried into the federal court on the grounds that such a form of execution was "unnecessarily cruel" before the judges finally upheld the new form of capital punishment.

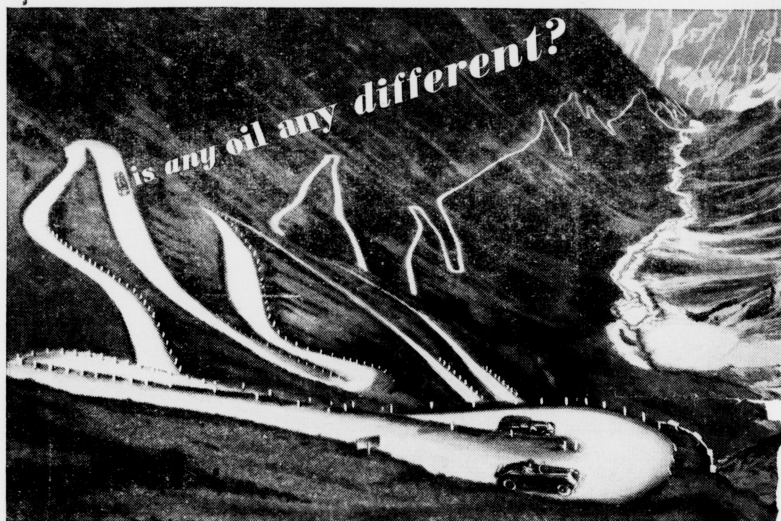

Conoco Chemist Wins Renown For Oil Researches

ONE of the most far-reaching of recent scientific discoveries—the "boiling" of oil to extend the life of automobile engines—is credited in large part by engineers to L. L. Davis, unassuming young chemist in the laboratories of the Continental Oil Company at Ponca City, Oklahoma.

With Bert H. Lincoln, the company's chief chemist, Davis patiently tested a thousand obscure chemical compounds to find one that, mixed with oil at the refinery, would establish an independent and permanent protective film on motor metal and thus permit the oil to do its work satisfactorily even under the higher stress of modern lubricating conditions.
 No such chemical substance existed, so Lincoln and Davis synthesized a quasi-magnetic chlorinated ester which they called methylchloroacetate. X-ray diffraction tests conducted by Professor G. L. Clark of the University of Illinois showed its behavior.
 Lincoln and Davis put together this compound with a low to Sir William Bragg, an English physicist who ten years earlier, while blowing soap bubbles, made observations indicating that the presence of an ester might bring about a desirable reformation of oil particles.
 First revealed to the scientific world at the last meeting of the American Petroleum Institute, the Davis-Lincoln process was a featured topic of discussion before the American Chemical Society membership in its annual meeting at Kansas City last week.

The sunny side of marriage is the outside. It's a mighty hard job to find soft snaps.

Eat up distance, but not your bearings
Get alloyed oil . . . and you'll get the difference

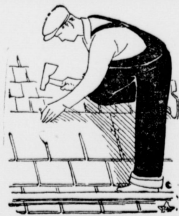

Ask your wife. The least little heat makes smoke out of some of the oily substances she puts in her frying pan. They vanish double quick, while others stay put.
 That's the sort of difference your hilliest hot-weather drive will show you in Germ Processed, the alloyed oil. Patented.
 It not only stays up around "Full," but stays right up in every working surface of your engine. Yes, the pistons, cylinders, valve gear, and any types of bearings ever used, can really take in this alloyed oil. You might say they become lastingly, smoothly "oil-glazed."
 And you can see that this added sleek oil-surfacing, together with the high-durability Germ Processed oil-film, easily doubles your guard against summer grief. Now when you want to go farthest fastest, get Conoco Germ Processed oil—the alloyed oil. Continental Oil Company.

RICHARD LOYD JONES SAYS A Lie Proves Force of Truth

Fishermen and mining stock salesmen have no monopoly on the gentle art of lying. Mark Twain insisted that lying is an inherited habit with all of us. He tells us that when he was very young he discovered that if a pin stuck into him, his anguish was appeased by the presentation of an orange, so he told his first lie by crying when the pin didn't prick.

DEAD MEN CAN BE ELECTED TO OFFICE IN TEXAS UNDER LAW

It is possible for a dead man to be elected to office in Texas. This fact is included among a number of unusual features of Texas election laws disclosed in the first compilation of the laws since 1928. Prepared by Attorney General McCraw and privately printed by him, the volume came from the press Saturday of last week.

before the election, and yet receives a plurality of the votes in the election. "The votes shall be counted and the returns made."

STAR BLADES - their keenness never varies

MADE SINCE 1889 by the inventors of the original safety razor, Star Blades have 65 years of precision experience stroped into their keen, long-lasting edges.

MOTHERS DAY

To all the Mothers of Muleshoe and surrounding area we extend our most hearty felicitations and assuring wishes of continued health and happiness. The business of this concern is to make life lighter and easier for you.

TEXAS UTILITIES CO.

Electric light is conducive to cheery spirits and electric power saves one much of the drudgery of life. On this day—which is the day that all holidays are rolled into the one all-important—we join that great host of other sons and daughters of this section in paying the highest tribute of love and appreciation to the mothers now living, and bowing our heads in reverence to that great host of mothers who have triumphantly passed into the great beyond.

HELPFUL HINTS (continued)

Flannels—Never rub soap on flannels—it will shrink them. Instead, wash them in a soapy jelly and use even that gently. Do not iron wet—or with a very hot iron. Stains on Zinc—Vinegar will remove stains from the zinc tops of kitchen tanks.

Washing Windows - A little starch put in the clear warm water with which you wash windows will make them clearer.

Nose Bleeds. There are various ways of stopping nose bleeds, but one of the most common and effective is this.

Cut Flowers may be kept a long while if a piece of green camphor is put in the vase of water.

lesing may be prevented from running if the cake is first lightly dusted with corn starch.

Fire. If by chance your clothes have caught fire remember never to run, as that will fan the flames and make them worse.

Hair—If the ends of the hair are chipped with a shears once every three or four months, it will help the growth of the hair and prevent its splitting.

Rough Hands—If your hands have become rough or chapped try this for a remedy.

Failure to pay your city poll tax can not deprive you of the right to vote in a city election.

Texas has a 6-year-old statute authorizing use of voting machines—but it has never been invoked.

The Junior-Senior Banquet Was Given Last Friday Night

Thursday evening of last week members of the Junior and Senior classes of Muleshoe High school were entertained with their annual banquet given at the High school building.

The long dining tables were in the halls of the lower floor of the building. Gold and white school colors were carried out in the many lovely decorations.

The program as follows was given: Invocation by Rev. R. S. Watkins; welcome address by Charles Alsup; response, Miss Crystal Kennedy; address solo by Miss Tidwell Douglas; reading, Miss Margaret Ann Cook; quartet by Misses Polly Glasscock, Ruth Gilbreath, Eunice Griffiths, and Mildred Chandler; address by Prof. W. C. Cox.

The delicious menu prepared by Mrs. Beulah Motheral was: orange cocktail, turkey and dressing, green beans, buttered carrots, cream potatoes, olives, pickles, stuffed celery, golden glow salad, buttered hot rolls, ice cream, cake and lead tea.

Two cars are damaged and occupants injured Sunday. An automobile wreck of serious consequences occurred on State Highway No. 7, a short distance east of Lariat, Sunday night about 12:30 o'clock, when the car belonging to and driven by Courland Paul collided with a Ford coupe occupied by three men from Lubbock.

Paul and his companions, Mrs. Ruth Mitchell, Mr. and Mrs. Gale Holt, returning from an evening spent in Clovis, N.M., while the Ford vehicle was traveling toward Farwell. Both cars were practical wrecks as result of the collision.

The Chevrolet car belonging to Paul was badly smashed on the right side, radiator smashed in, windshield glass and left rear glass of the car broken, also some of the wheels bent. The Ford, which probably was struck head-on, lost its radiator, sustained engine and wheel damage and was otherwise smashed.

Paul received minor bruises and cuts, according to report. Mrs. Holt sustained a broken nose, cut across the forehead and other bruises and body cuts. Mr. Holt was cut across the forehead and had other cuts and bruises. Both he and his wife requiring services of a surgeon's needs to close the larger wounds. Miss Mitchell suffered numerous bruises and skin abrasions.

The driver of the Ford car is said to have sustained a broken rib, while the other two men with him were badly shaken and received bruises.

Empty stomachs are dangerous things.

Beetle's Nose Our perennial pest, the Japanese beetle, can detect the odor of geranium oil a mile away. It is the lure used in most of the traps and poison baits.

CARD OF THANKS

We thank the neighbors and friends for their kind ministrations and assistance to us during the illness and death of our dear mother, also, for the lovely floral offerings. May God be with each of you. H. C. Kennedy and family. 15-1c.

Mr. and Mrs. Dick Rockey, Miss Mary Lee Williams, Mrs. Neal Rockey and O'Neal Rockey were Lubbock visitors Friday evening of last week. O'Neal and Dick attended a painters' school held there.

LOST: Chevrolet black wheel and Federal casing No. H-7861, in Muleshoe or northwest of town. Reward for return, Leo Peterman, 4 mi. N. W. Muleshoe.

Sunday afternoon a Sunday school associational meeting of this district was held in Muleshoe at the Baptist church. Several representatives from neighboring towns attended and the meeting proved to be very interesting and educational.

Friday evening of last week several young people of Muleshoe and surrounding communities had the privilege of exhibiting their talents on the stage at Jack and June Alfrede tent theatre.

New Zephyrs to Make Overnight Runs

THIS summer will see light-weight, stainless steel, disc-covered Zephyr type trains running 1,000 miles between Chicago and Denver on an overnight schedule that takes about ten hours, or one-third, of the running time of the fastest steam trains.

Two trains of ten cars each, not including two cars containing the power plants, are being built here by the Edward G. Budd Manufacturing Company, pioneer in the development of light-weight, stainless steel construction. Known as the Denver Zephyrs, they will be operated by the Chicago, Burlington and Quincy Railroad between Chicago and Denver on a schedule that calls for leaving Chicago late in the afternoon and arriving in Denver in time for breakfast next morning.

Like previous Zephyrs, the new trains will weigh only half as much as comparable conventional trains

and hence will be less expensive to operate. The first Zephyr, a four-car train running between Lincoln, Omaha and Kansas City, reduced operating and maintenance costs \$45,000 in its first year of service and at the same time increased revenue \$75,000.

Trains capable of covering 1,000 miles overnight have been inevitable ever since the first Zephyr demonstrated its ability to replace two conventional trains on a day-time run." Edward G. Budd, president of the company, said. "One of these light-weight trains could easily make an overnight run between New York and Chicago, New York and St. Louis, New York and Florida, Cincinnati and New Orleans or between many other points that are 1,000 miles or so apart."

How one of the new ten-car stainless steel Denver Zephyrs being built in Philadelphia by the Edward G. Budd Manufacturing Company will look inside the first Zephyr, inside, Edward G. Budd, pioneer in lightweight railroad construction.

Longview News

M. M. Scott, Fred Bryant and Joe Dale Scott celebrated their birthdays Sunday with a joint birthday dinner. Those present were Mr. and Mrs. Dude Scott and son, Mr. and Mrs. Shorty Scott and son, Mr. and Mrs. Neal Warren and son, Mr. and Mrs. Cliff Odum, Mr. and Mrs. Milton Scott and daughter, Brownfield, and Mrs. J. Looks Like the Erosion Is Ruining the Treasury

Phoenix, Ariz.—The WPA will spend \$30,119 to "correct" the erosion along several miles of United States Highway 50...

The following description is provided by the WPA: "The main function of the highway through this section concentrates drainage in the borrow pit so that erosion has since severed the right of way..."

Perhaps the WPA is unaware of the fact that the soil erosion service, spending millions of dollars of WPA and PWA funds, is already on the scene in this same region where it is undertaking the greatest erosion control project in the world.

New Deal Caught Spying on Itself!

Washington, D. C.—With the reverberations of liquidation charges against Arthur Kent, the committee still functioning over the capital, the Roosevelt administration found itself in the embarrassing position of having been caught spying upon itself...

A man who appeared before the committee, identifying himself as "David Stock, attorney, 170 Broadway, New York" and "associated with a firm that is counsel for many corporations," was so far opposed to the other corporation attorneys present in his defense...

The union supported the President's tax plan vigorously. When asked if he was not a lobbyist for the treasury department he refused to answer...

Washington, D. C.—The United States national debt on April 8 stood at \$13 billion 440 million dollars, nearly 2 1/2 billions over the debt on April 8 last year...

THE CRACKER BARREL Guess who said this: "If we run into such debts as that we must be taxed in our meat and in our drink, in our necessities and our comforts..."

It was no surprise to Westchester county, N. Y., whose fresh water streams are "filled up with a few bathing boys, when the county received a consignment of chloride of lime for food relief purposes..."

The days run into weeks, the weeks into months and Professor Tugwell's strange silence continues. Evidently some basis for the current report that Farley has succeeded in gagging the Number 1 Brain Trustee until after election.

Says Nation Is Facing Inflation

Roosevelt Monetary Adviser Declares Peril Here Is 'Very Great'

NEW YORK.—The danger of a wild inflation is grave, James Harvey Rogers, the Yale professor whose guidance President Roosevelt halted the gold standard and adopted the policy of a managed currency, declared...

"In the new banking legislation still further care was taken to provide additional and entirely ample power to curb any undesirable inflation which might make its appearance," he said.

"The authority of the new board of governors of our federal reserve system to raise the legal reserve requirements of the member banks from 10 per cent if necessary would seem to be a sufficiently powerful check for any probable emergency."

"With such safeguards provided in the monetary legislation and with such powerful checks in the hands of our central banking authorities, what then can be the danger from even large and continued budget deficits?"

Deficits Are Danger. "The answer is clear. Continued budget deficits reduce continued treasury financing. Treasury financing at reasonable rates requires easy and plentiful money conditions. But all the checks to inflation provided in our money and banking system are based upon reversing our easy money policy and turning it into a tight money policy."

"If, continued budget deficits and the resulting heavy government financing will lead to an inevitable clash between the policies of the treasury and those of our central banking authorities. Which policy will win? In all the post-war European inflations it was those of the treasury. The inflation itself here is very great."

Making Pile Carpets The ironclad oath It is considered fairly certain that the making of pile carpets in England was first started during the reign of Queen Elizabeth. The method of weaving was copied from the rugs that had arrived from the East, hence came the term "Turkey Wool." The pile was of wool and panels worked in this way were used for the coverings of chairs. The design was typically English, small detached floral sprays, knotted in colored woods. The colors generally used were shades of green, red and yellow, which blended admirably. The ironclad oath The ironclad oath was an oath of very stringent character required of federal officeholders by act of congress in 1862. It was designed to exclude from office any possible enemy of the Union. After the close of the Civil war this oath was required in the "reconstructed" states. The act was repealed in 1871. Baboons Travel in "Armies" Baboons are the only animals who ever have learned to travel in "armies" under the direction of a leader. They never can be depended upon, have less affection than a cat, may turn on their owner at any moment. Smoking in Churches Smoking in churches was a common custom during the use of the use of tobacco as forbidden because the air steel was so noisy.

General News Over Texas And Adjoining States For The Week

Gilmore Nunn, Pampa newspaper editor, was named president of the West Texas Young Democrats at a convention held at Pampa last week.

It is reported there will be no opposition to re-electing Vice-President John N. Garner as Democratic committee-man from Texas this year.

A \$150,000 bequest provided in the will of the late Senator Bronson Cutting in behalf of the Spanish-American normal school at El Rito, New Mexico was paid last week.

John R. Miller, five time mayor of Borger, has been endorsed by the Town and club members of the Eighteenth Congressional district as a candidate against Marvin Jones.

State Treasurer Charley Lockhart reported last Saturday that the Texas financial deficit had been reduced the past 30 days from \$8,542,144 to \$8,195,291.

Reports from the Rio Grande valley area are to the effect that the tomato and potato crops of that section are turning out well this year, some acres bringing as much as \$300 each return.

Part of the main floor of the state capitol building at Austin has been torn up to install a new and beautiful one of terrazo to cost approximately \$27,000.

The counties of Hartley, Dallam, Sherman and Moore, in the northern Panhandle will this year receive a rebate of more than \$50,000 in ad valorem taxes for soil erosion work, \$40,000 of this sum being paid last week.

It is predicted there will be a large honey crop produced in Coleman county this year, coming mostly from mesquite bloom. Catawag blooms of the Plains area is said to also be an excellent source of honey, but few bees are kept on the Plains because the frequent strong winds cause them to lose their way back to the hives.

Building throughout Texas for March increased 138 per cent over that of a year ago, according to the Bureau of Business research. Poultry and egg shipments, for the same period, increased 169 per cent, most of the gain being in eggs. No eggs were received in this state from any other state. Texas gained 1.4 per cent in consumption of cotton for that period, and an increase of 30.1 per cent in cloth production from its mills during that period. Sales rose 70.3 per cent over March last year, and unfilled orders were 19.7 percent above the corresponding period of 1935.

Goodland News

We had several new pupils in Sunday school and we are always glad to have them out. H. D. Tarlton received sad news Monday of the death of his brother-in-law, Richard Kimble, who lived in Oklahoma.

The Recreation club enjoyed an ice cream social Saturday night at Louis Ponder's. Mr. and Mrs. Clint Everetts are home after a month's visit with relatives at Electra.

Clarence Beaty was in Sudan, Saturday. H. Hanover, H. D. Tarlton and L. D. Sanderson were in Muleshoe, Saturday.

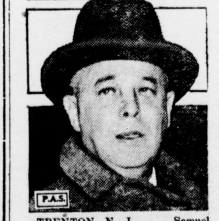

J. C. Hart and family returned home Wednesday night from a visit with relatives and friends at Dotsonville. D. S. Clarey and family moved to Arkansas last week.

Mr. and Mrs. Otto Lancaster and daughter, were in Clovis, N. M., Friday. W. D. Hart and family of Dodsonville, have been visiting his parents, Mr. and Mrs. J. C. Hart and family.

The Goodland Sunshine club met in a called session Tuesday, April 28. Miss Alma Stewart was to discuss garden planting, but as her father was in a car accident, she went to Temple to be with him. There being no business before the club, the afternoon was enjoyed in a social way.

Those present were: visitors, Mrs. T. G. Gaddy, and Mrs. V. L. Ellins; new members, Mrs. Tommy Galt; members Mesdames O. C. Kirk, E. Brumblow,

Talked to Bruno

TRENTON, N. J., June 1. Samuel Lebowitz (above), is the noted criminal lawyer whom Gov. Hoffman suggested be brought in to talk to Bruno Hauptmann and learn if possible if others were involved in the kidnapping and murder of the Lindbergh baby.

TWO KILLED 4 INJURED SAT. NIGHT CRASH

Three Car Crash Ends Lives, Brings Suffering To Others.

Mrs. Henry Hall and Mrs. Jack Carey both about 24 years of age, died shortly after midnight Saturday as result of a three-way automobile crash two and a half miles south of Amherst, four other parties in the collision being admitted for treatment at a hospital in Littlefield, all of whom were more or less lacerated and bruised from the impact.

The Halls and Careys, who live on farms near Amherst, had been at Littlefield where they attended a dance, it was reported.

A coupe in which they were returning toward Amherst collided with a car parked by Ross Montgomery of Amherst after his machine had exhausted its fuel supply. The coupe was turned around, with the front toward Littlefield. Less than 30 seconds later, an automobile operated by Homer Davis, of Amherst, crashed head-on into the coupe.

Mrs. Carey was dragged 207 feet and was killed instantly. Mrs. Hall died at 1:40 o'clock Sunday morning in the Littlefield hospital. Her skull had been crushed.

Carey was treated for lacerations and bruises and was released Monday. Mrs. Leon O'Neil of Amherst was treated for a severe scalp laceration and her husband for a fractured nose. They were occupants of Davis' automobile.

Montgomery and a son were in his car. Neither was injured seriously, it was said.

Passersby picked up Mrs. Carey's body, carrying it to Littlefield. A Clovis, N. M., ambulance which had been to Littlefield and was returning to Clovis, passed the mishap scene, stopped and carried the other victims to Littlefield.

Sheriff F. A. Loyd is conducting an investigation of the crash. Winifred Carter, J. H. Wilhoit, Cecil Creamer, Ruby Everett, Louis Ponder, H. Hanover, Orval Beaty, M. D. Gaddy, Claude Forganon, R. J. Vandever, L. D. Sanderson—Reporter.

Meaning of "Sino" "Sino" is taken from the Greek "sinita", an oriental people mentioned by Ptolemy. "Sino", therefore, is the combining form used to denote (a) "Chinese"—in nouns, as "sinology," and (b) "Chinese and—" in adjectives, as "Sino-American Sino-Japanese, Sino-Russian.

Picked Pine Picked pine is pine which has been subjected to a chemical treatment which ages it and gives to the wood surface something of the soft patina of old pine or "deal" from which the paint has been stripped. Pine was used for room interiors and furniture in England in the Eighteenth century, but it was never left in its natural state. For room paneling it was painted; for furniture—bookcases, cupboards and furniture—it was also painted, and for mirror frames, for which it was often used because it was easily carved, it was either painted or gilded.

Plenty of Coal in China There is enough coal in a single province of China to supply the entire world for 3,600 years at the present rate of consumption.

Knights of Pythias Old Lodge The fraternal order, Knights of Pythias, was founded at Washington, D. C., February 13, 1804.

While money is scarce, add to your bank account by looking up your OLD GOLD We are paying much higher than market prices so as to increase volume. KEN UMBERSON JEWELER In Western Drug Store, Muleshoe

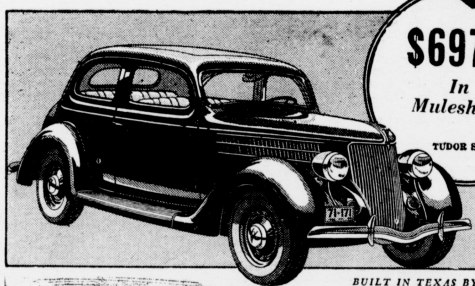

Birds are nesting. It's Spring... and it's the time of year to use Spring gas. The average temperature is several degrees higher than it was in April, and unless you're using a gas specially refined for Spring driving you're throwing dimes and dollars away. Get That Good Gulf Gasoline. Because it's "Kept in Step with the Calendar"—all of it goes to work, none of it goes to waste. Pull up at the Sign of the Orange Disc and try a tankful—today.

DELIVERED PRICE

The only price that counts!

\$697.00 In Muleshoe

BUILT IN TEXAS BY TEXAS LABOR.

TWO things above all are worth looking at carefully before you choose your new car. One is the real dollar value and motorizing satisfaction you are going to get for your money. The other is the price of the car delivered and in your garage ready to drive. Here you see the low delivered price of a new Ford V-8. You will also see at once how much greater value it gives you than even Ford has ever offered before. In performance, safety, comfort, and beauty, it is by far the finest Ford car ever built.

And all these plus values in any Ford V-8 at NO EXTRA COST TO YOU!

- Safety glass all around, and a windshield that opens.
• 6.00 x 16-inch Air-Balloon Tires.
• Free Action on all 4 wheels.
• 85 horsepower V-type 8-cylinder engine with dual down-draft carburetion.
• Silent helical gears for all speeds, including low and reverse.
• Super-Safety brakes with more braking surface per pound of car weight than any other car under \$3195.
• Center-Drive—passengers cradled between springs on Ford's 123" spring-base, almost a foot longer than wheelbase.

Ford V-8

PERFORMANCE WITH ECONOMY Terms as low as \$25 a month, after down payment, under new UCC 1/2 per cent a month plan.

BORROW A CAR FROM YOUR FORD DEALER TODAY AND GET THAT V-8 FEELING!
