

Have you ever run over a big broken bottle and cut your casing so badly that it was unfit for further service? Well, this is one of the accidents you are protected against by the Lee Tire 12-months' guarantee against road hazard. Sure, it's an unusually liberal guarantee! And adjustment under it is just as liberal... at Phillips 66 stations... or at any Lee dealer from coast to coast.

RESERVES GUARANTEED

Petroleum Cocktail For Motorists And Industry Constantly Refilled By Increasing Oil Reserves

PIONEER oilmen of Pennsylvania who boasted of their ability to drink every drop of oil produced west of the Ohio River, started a game that has been popular ever since. Periodically the nation is warned to prepare for an oil shortage.

The pessimistic Pennsylvanians made no attempt to carry out their boast. The motor car and other machines powered with internal combustion engines took over the job. In recent years the machines have been "drinking" about 1,000,000,000 bbl. of petroleum and its products annually. Yet to exhaust reserves of oil known to be stored underground and recoverable with today's methods, they would have to drink another 17,348,000,000 bbl.

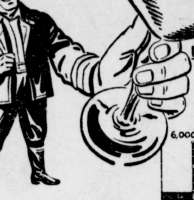

Since the first prediction of no oil west of the Ohio River, about 20,000,000,000 bbl. have been taken from the ground. Almost 90 percent of it came from the area west of the Ohio River! Known reserves, proved by actual drilling have been increasing at almost twice the rate of consumption.

Prophets Confounded

Petroleum technologists seem to take delight in confounding the prophets of doom and disproving their scares of scarcity.

Commercial production of oil began in Pennsylvania in 1859. Oil was located at a depth of 69 feet. By 1895 wells were drilled to a depth of 1,200 feet, by 1909 to 5,600 feet, by 1930 to 10,000 feet. In 1938 the world's first 15,000-foot well was brought in.

To make life more difficult for the exhaustion experts petroleum scientists attack the problem from several angles. Old fields are given

youngful producing vigor by a blood transfusion technique. Gas or water is forced into the wells; additional oil comes to the surface. For instance the old Bradford field in Pennsylvania had a peak production of 23,000,000 bbl. in 1881. Production fell to about 2,000,000 bbl. in 1910. Repressuring with water lifted production to about 20,000,000 bbl. in 1937!

New fields annually augment the nation's reserves as scientific and precision instruments probe underground secrets so thoroughly the driller has almost a photograph of the geologic formations his drill will encounter. The seismograph, the torsion balance, the magnetometer and the gravity meter detect the presence of domes, anticlines, synclines, arches, faults and other formations in which oil may be trapped.

Refiners Progress

Petroleum refiners have joined in the sport of making the prophets miserable. They have developed scientific methods of manufacture which curtail the volume of crude oil needed for a given quantity of refined products. Only a few years ago they doubled the quantity of useful products so obtained, and still newer methods indicate that

again. It is estimated that about 36 gallons of gasoline now can be obtained from a 42-gallon barrel of crude oil. About 20 years ago nine gallons was the average yield.

Poor Guessing

The score of those who have been courageous enough to predict the day of exhaustion has been incredibly poor. In 1914 imminent exhaustion was predicted. Only 5,000,000,000 bbl. was believed to be in reserve; 18,000,000,000 bbl. since have been produced. In 1925 only 5,000,000,000 bbl. were known to be available, but 13,000,000,000 bbl. have been brought to the surface since then. For January 1, 1939 reserves are estimated at 17,348,000,000 barrels, the greatest in history and actually proved by the drill as "oil in sight."

Predicting petroleum exhaustion is no sport for the amateur. The competition from the petroleum technologist is too tough! Furthermore, if in some distant year, exhaustion actually should materialize, there is a gigantic supply of oil shales and coal from which products can be obtained at no great trouble or expense. Proper handling of a surplus rather than work over a shortage, appears to be the petroleum industry's solution.

Washington Snapshots by JAMES PRESTON

Washington, so the tourists say is never remembered for its restaurants. In fact, the lack of good eating establishments in the Capital City is the subject of much "beefing" by most Washingtonians.

Nevertheless, the natives are eating their breakfasts with more than usual vigor these days and the argument now is not over the quality of the beef.

Cause of it all is an argument between the President, the Navy Department and Congress over the relative merits of American grown beefsteaks, and the beef shipped in from the Argentine.

The President contends in an official statement that Argentine beef is cheaper and better. So strong does the Chief Executive feel about the superiority of foreign beefsteaks that he has ordered the Navy Department appropriate a bill stipulation prohibiting purchase of anything but American beef.

About 48,000 pounds of beef are involved in the official dispute. And the saving that would be effected by purchasing the South American product would amount to less than \$4,000.

The whole argument has most Capital observers puzzled.

They are asking just what kind of economic the government is practicing when it curtails American farm crops in order to boost prices, fixes arbitrarily wage rates and work hours, adds new taxes that further raise prices, and then refuses to buy American goods because the

price is too high. They can't understand, either, why the government should bring the wrath of American cattle raisers and processors down on official heads to save a few dollars, and at the same time think nothing of pouring millions into economic theories, schemes, experiments and projects.

Ptomaine Poisoning Season Is Here; St. Dr. Says Beware!

Austin, June 5, "It is a matter of vital importance, particularly during the warm summer season, that sanitary measures be applied to prevent the contamination of perishable foods," stated Dr. Geo. W. Cox, state health officer. Various intestinal disorders result from food which has in some way been rendered unwholesome. Summer diarrhea or "summer complaint," affecting young and old, is a serious type of stomach and bowel condition. So called "ptomaine poisoning," in nearly all cases, is none other than a food infection due to the presence in food of harmful bacteria or germs.

"Perishable food, if contaminated, endangers human health. This hazard is greater in warm weather, because germs or their products multiply or develop more rapidly at high temperature. Some of the most valuable foods are of perishable nature. Such foods demand the exercise of safeguards. Among well known precautions, which need to be used if perishable foods are to be kept wholesome, are the following: Some form of modern refrigeration or cooling is necessary to preserve food from day to day. Lack of an effective cooling process causes meat to spoil and milk to contain a dangerously large number of bacteria.

Resort to thorough cooking or boiling is the simplest and yet most useful in the simplest and yet most useful food-borne character. This precaution applies especially to food prepared for infants and children.

Contamination of perishable food is avoided through the constant exercise of cleanliness on the part of those who handle food.

Pastries and other food products make a far greater appeal to the consumer or patron if there is an entire absence of flies. Adequate provision for screens and application of every known means to fly and insect examination are worthwhile.

Beware Of Spoiled Custards Says The H. D. Agent

Some people depend on their nose to tell them when food is spoiled, but sometimes a custard has no detectable odor and yet will make one ill, says Miss Lillie Gentry, Bailey county home demonstration agent. This is because it has been improperly stored and has developed certain bacterial organisms, and don't make the mistake of looking for this danger only in hot weather, Miss Gentry further warns, for it can happen any time of the year.

When a custard is made, it should be kept cold until used, and used as soon as possible. The Food and Drug Administration of the United States Department of Agriculture is often called on to ascertain the cause of food-poisoning outbreaks. Too many times it has been traced to some moist food such as custard, custard pastries, a gravy or sauce, or some

leftover meat or fish that has not been properly kept before eating.

In case it is necessary to serve custard pies later than the day they are baked, Miss Gentry suggests that the custard part and the pastry be combined just before serving.

MULESHOE VS. DIMMITT LOCALS LEAD, 14-6

Sunday afternoon, at Cobb park, the Muleshoe baseball team met the Dimmitt team in a fast moving game. Muleshoe came out with the larger end of the scores, it being 14-6.

McWilliams, Brackett, and Totten pitched for the Muleshoe team and Walker was catcher.

Bell pitched for the Dimmitt team and N. Newman caught. McCarty was high point man, being up to bat five times and making five hits.

Garlic-Parsley an Aid in HIGH BLOOD PRESSURE

Medical reports say that Garlic-Parsley concentrate has a double action in reducing high blood pressure. First, it tends to relax hardened arteries. Second, it checks or inhibits decomposition of waste matter in the bowels, a contributory cause of high blood pressure. To get concentrated garlic and parsley in odorless, tasteless form, ask for ALLIMIN. These tablets, used at regular intervals, aid in reducing blood pressure and relieving headache and dizziness caused by excessively high readings. To learn what raises your blood pressure, and for medical treatment consult your doctor. ALLIMIN is for sale by all druggists. Large box, 50c. Special economy size, \$1.00 for sale by Western Drug Co.

### CONGRESS PUTS UP A LONG FIGHT TO KEEP US OUT OF EUROPE AND TO KEEP EUROPE FROM US

Few Congresses in history have produced as little in so long a time as the current one. Of the dozens of major bills introduced (to say nothing of the thousands of minor bills, of which a considerable percentage falls into the crackpot category, less than half a dozen have been definitely acted upon. But that doesn't mean that Congress is lazy or incompetent or is more than ordinarily dominated by buck-passers. It does mean that one issue, of the most immense significance, has been uppermost—and so far no one has offered a solution that has met with really widespread approval. That issue is the role of the United States in today's complicated world affairs.

As Newswick puts it, "The 76th Congress offers more striking contrast than the calm unanimity with which it votes hundreds of millions for defense, compared with the hectic uncertainty with which it parries and postpones decisions on foreign policies. Senators and representatives can agree on the number of ships, planes and guns needed cannot agree on what they are needed for."

The conflict between the isolationists and the nationalists has been going on for a long time. Today it is more bitter than ever—and seems destined to become constantly more so in the future. It is a well known fact that this Administration definitely falls into the internationalist classification—the most potent Presidential advisors, such as Ambassador Bullitt and Kennedy, seem convinced that we must eventually throw in our lot with France and England, and the sooner we do that the better off we shall be. The Republicans in Congress, led by stern isolationists Boah, Johnson and Nye, are convinced that this course is suicidal, spells the participation of the U. S. in a possible war which is not our concern. Republican opposition is not particularly important to the White House—in spite of GOP gains last November, the Democrats still have a handsome majority. But this issue has split party lines wide open. Effective Democrats such as Clark of Missouri, are as strongly isolationist in feeling as Borah. And many lesser lights in Congress, whose views have not yet been put on record, will vote for isolation when the time comes.

Still more important, judging by all the available indicators, the

American people are tending isolationist in view. A recent Gallup, Institute of Public Opinion Poll overwhelming disapproval of U. S. involvement in Europe's troubles. The Gallup polls have accurately indicated the drift of public feeling in the past, and many a Congressman whose prime interest is in the pleasing his constituents, irrespective of what he personally thinks, is certain to cast his vote according to their findings.

Summing up, the advocates of the strictest kind of U. S. neutrality have the edge at present. Whether or not they will hold that edge depends upon many potentialities, tangible and intangible. But the force they expect today is indirectly indicated by the Administration's recent hands-off policy in the matter of neutrality legislation. Mr. Roosevelt is not giving orders now—Washington observers say he apparently feels that Congress is in no mood for dictation.

In the meantime, practically every one seems agreed that we must build up our national defense to the limit. And Congress has voted military appropriations with a lavish hand. So far more than \$1,500,000,000 has been appropriated for this session for national defense purposes. A recent bill (passed by the House, and apparently sure of Senate approval) shows the kind of fighting tools we are making. It provides for two 45,000-ton battleships—larger than anything we now have—two big cruisers, a number of submarines and destroyers, hundreds of naval planes, etc.

If the Navy gets its way, the shipyards will be kept even busier. In addition to the two 45,000-ton monsters, the Admirals have asked for six 35,000-ton battleships, 18 heavy cruisers, 23 light cruisers, 150 destroyers, 56 submarines, and 8 aircraft carriers, plus 3,000 planes.

And the Army is not being neglected. Its force is to be increased to 400,000 men, this figure includes more planes, and tremendous quantities of weapons, including the new Garrand semi-automatic rifles of which amazing reports are heard. So—while Congress fights to keep us out of Europe, the lawmakers are doing everything possible to make sure that Europe keeps away from us.

### General News Over Texas And Other States For Week

The state Highway Commission, Austin, will offer employment to 48 civil engineers graduation from school this spring.

Clifford B. Jones, president, Tech college, received the honorary doctor of laws degree from McMurry college, Abilene, June 1.

Gov. O'Daniel has signed the old agent pension bill calling for an increased appropriation as passed several weeks ago by the Texas

### Extra Bargains Cash Feature Trades Day

Saturday are becoming real again days in Muleshoe, a time when everybody kicks off from their chosen vocation, turn the teams out to pasture, give the chickens enough feed and water to last them throughout the day, polish their shoes, don their best bib and tucker, and pile in the old bus, truck or wagon and journey to the county seat for a day of fraternal, convivial enjoyment, meeting and greeting old friends and neighbors—and hoping the gods of fortune will smile upon them sweetly regarding one or more of the cash awards which are bestowed by business men here every "Trades Day."

And some one gets them. The Chamber of Commerce financial committee is very secretive about the matter. Apparently sewed up tight regarding its plans and intentions, there are not any leaks in the matter, and no one ever gets any inside information as to who the fortunate beneficiaries are likely to be.

Last Saturday there was the usual bumper crowd here and Roland Bigham was the fortunate recipient of the \$10 award. Frank Lee received \$7, while F. M. Hawkins, Mrs. D. J. Harris, Mrs. O. D. Troutman and Lester Tandy were recipients of \$2 each.

Another \$25 will be dropped in the box for next Saturday, to be divided in similar awards and bestowed upon customers of Muleshoe business concerns. Of course, if it don't snow or a big cloudburst arrive during the day, another big bunch of visitors is expected. It is also reported there are to be some extra buying bargain sales listed for that particular day which most folks will wish to patronize.

Legislation; but no means has yet been provided to furnish the money for such payments.

The million dollar state hospital recently completed at Big Spring was opened to inmates last Monday. Many insane now being confined in county jails were transferred there.

Smoking and drinking of Texans has increased, according to a statistics. In May cigarette tax collections were \$52,980 more than May a year ago, indicating 1,768,023 packs of cigarettes were smoked. Hard liquor tax receipts for May were \$50,100 over a year ago while beer taxes were up \$25,000.

Texas' 9,400,000 sheep and 75,600,000 pound annual production of wool, makes her the leading sheep and wool state in the nation, with more than twice the number and production of the second ranking state. The industry contributed \$31,158,000 to the agricultural income of the state in 1938.

In a bill passed by the Legislature providing withdrawal of authority for review of trial court cases in a civil appeals court by means of a writ of error, vetoed by Gov. O'Daniel, it was repassed over his veto in a vote of 106 to 22 by the House and 17 to 8 by the senate.

That the San Jacinto monument is actually five inches shorter than that of Washington in the Capitol city is the surprising news now slipped out. It was reported to have been taller than the Washington monument which is 555 feet and five inches high; but now officials claim in deference to Washington in the Texas spire was made five inches shorter.

Dr. A. B. Cox, University of Texas expert, predicts a 50-year low for U. S. cotton exports. Texas farmers received \$27,006,000 in cash income during April, a fourth more than in April last year, and nearly four per cent above the 5-year average. State university statisticians report, Egg shipments from Texas poultry during April nearly doubled those of April last year.

The Texas House has passed a bill requiring physicians who issue health certificates to make an actual technical examination of applicants to determine if they are free from contagious or communicable diseases. The bill fixes a fine of from \$15 to \$200 for violation and removal from office of any state, county or city health officer who does not comply.

The holiday death toll for Memorial day, May 30, was reported as being 374.

Following his expressed idea of expense curtailment, Gov. O'Daniel has signed a bill which will wipe out several state departments setting them up under one administrative agency, the State Department of Public Welfare, effective Sept. 1. Effectors are the Old Age assistance commission, the Texas Relief commission, the Child Welfare division of the Board of Control for aid to needy blind and destitute children, which will fall under jurisdiction of the three-members board to be named by the Governor, subject to Senate confirmation.

### FRIED CHICKEN OR FAT PORK

By T. C. RICHARDSON, Secretary Breeder-Feeder Association

Fried chicken is a luxury for which city people willingly pay high prices. Probably not one person in ten ever had enough fried chicken to get tired of it, for few are able to buy it regularly. It passes through the hands of dealers and caterers, yet farm folks who raise it and can have it every Sunday and in between at a fraction of the money cost to city people, are too much inclined to treat fried chicken as a luxury only to be served when company comes.

Whether you set the hens on their own eggs, hatch them in a home incubator, or buy baby chicks from the commercial hatchery, the cash return for raising a two-pound fryer is only a few cents. Any well managed farm raises at least a part of the grain which chickens need, and for which they will pay a good price, either for home consumption or sale. The mash feed required for raising a two-pound fryer is only a few cents. Any well managed farm raises at least a part of the grain which chickens need, and for which they will pay a good price, either for home consumption or sale. The mash feed required for raising a two-pound fryer is only a few cents. Any well managed farm raises at least a part of the grain which chickens need, and for which they will pay a good price, either for home consumption or sale.

It is nothing short of tragic that some farm families deprive themselves and their children of all the eggs and chickens they can eat and enjoy, sitting down day after day to fat pork shipped in from Wisconsin or Iowa. Of all people who ought to live well the farmer who produces the food is that one, and he lives well in just about the proportion that he grows what he can use at home without paying tribute to handlers, processors, haulers and merchandisers.

All these people render an essential service and farmers can no more do without the cities than the cities can do without the farmers. It is worth thinking about, however that every dollar a farm family saves by producing for its own use is a dollar that can be spent for something else they cannot produce. Some of the things farm folks too often do without because they are not indispensable.

Now the farm poultry business is different from the specialized poultry business in many respects. There is less cost, less risk of disease, less cash outlay all along the line. At the same time it brings returns for time and labor that would otherwise have no market, and since their time and ability is the principal thing many farm families have to sell, those who do not find some profitable activity for the hours not needed in crops, lose something that is irreplaceable.

Besides the good eating there is always some kind of a market for the surplus and many a farm flock buys the flour, coffee and other

WEEKLY LAY SERMON  
HUMAN CONSTELLATIONS

By JESS MITCHELL

Last Sunday night I lay on the grass of the lawn at my home looking up into the heavens, finding them full of scintillating points of light, wondrous and mysterious to hold. I have studied astronomy, just enough to convince me I know only a very little about this inexhaustible universe, yet those myriads of stars became to me a strange fascination. A few of them seemed to stand out independently of others; but most of them were in groups of more or less sizable proportions. So closely were they located to each other, some seemed to lay over and merge into one another, yet when I went down to my house and brought out a telescope to enhance my vision by bringing them slightly closer, I saw that every star possessed an individuality of its own, though some stood out much more independently and were much brighter than others.

As I lay there upon the velvety grass contemplating those innumerable twinkling points of heavenly illumination, I thought of this world and the millions of humans dwelling in it. They were like the stars of the heavens. Here and there are individuals standing out quite distinct in their mental brilliancy and accomplishments; but the most of us belong to the Milky Way, being an innumerable cluster of human entities scarcely distinguishable from another. However, I am told by scientists that when one looks at the Milky Way through a telescope every one of the stars composing it stands out clear and distinct in its individuality, while far and beyond that Milky Way are other milky ways just as far away as the one beheld with the naked eyes.

Dropping The Living Costs Still A Big Unsolved Problem

All of us are searching for "an answer to the yet unsolved puzzle of the widespread war prevailing in a land of teeming plenty," as the Cornell Law Quarterly phrases it. And the Quarterly observes that it is not inconceivable that the answer might be provided by "the removal of the present prohibitory bans on those commercial ventures which have made the greatest strides in solving the problems of distribution."

Maple News Items

School closed Wednesday of last week. A picnic lunch of cake, cookies and sandwiches and ice cream was served to the large number present. The school plays and seventh grade graduation exercises were held Monday night. Judge M. G. Miller gave the address. The diplomas were presented by the teacher, R. Finch. Members of the class were Wynon Smith, James Edwin Davis, Calvin Davis, Louise Martin, Wanda Mae Johnson, Mary Nell Richards, Joyce Vanlandingham, Dorothy Kelly, Pansy Harrison, Leon Hart and Carl Dupler. Wynon Smith was the salutatorian and Louise Martin valedictorian.

LARGE HOG SUPPLY IS IN SIGHT

Much larger supplies of hogs and lower prices are forecast for this season by the United States Department of Agriculture. With indications for spring and fall pig crops in 1939 amounting to 80,000,000 head or more the report shows the need for careful selection of rations to reduce costs in feeding and increase the chance for a margin of profit.

● Mr. and Mrs. L. S. Barron and Mr. and Mrs. Chester Anderson left Saturday of last week for Ruidoso, New Mexico on an extended vacation trip.

● Miss Helen Jones and Mrs. Morris Childers made a trip to Plainview Saturday, where they were met by Mrs. Vivian Guthrie of Turkey who accompanied them home.

at nographer with a Lubbock firm, has joined her parents, Mr. and Mrs. W. B. Lee at the new home in Tucson, Arizona. The Lees formerly resided a few miles northeast of Muleshoe.

● E. E. Dyer, business man of Lockney, has rented the room in the Gupton building formerly occupied by Selbert Variety store, according to available information. A messenine floor is being erected in the rear, and occupancy with a hardware store is expected about Jun. 15.

● Mr. and Mrs. Buford Butts, accompanied by Mrs. Sallie Harden and Mrs. Bulah Carles left Saturday afternoon for various points in California. They will visit the World Fair in San Francisco, make an extended tour north through Oregon and Washington, returning by way of Yellowstone National park.

● County Judge M. G. Miller took his sister Mildred Miller to Lubbock last Sunday where she has entered Tech college to do graduate work, looking forward to receiving her Master's degree. While there he visited with Miss Hazel Weaver, daughter of Mr. and Mrs. Vern Weaver, of Buda community, who has been seriously ill in a hospital there; but is now recovering.

● Information was received here Monday announcing the death of Mrs. McClary, oldest daughter of J. G. Johnson. She lived at Bryan, this state and had been ill for about two weeks, her sickness originating with the flu, then running into pneumonia. She died last Sunday and funeral services were held the following day. Her sister, Miss Weltha Johnson, Amarillo, was at her bedside when she expired. She was well known in Muleshoe by many of the older citizens.

**CIRCLEBACK CLUB IN EASY HOUSE CLEANING**

A demonstration of "House Cleaning Made Easy" was given to the Circleback H. D. club members June 1 by Mrs. Jim Clements when the club met in her home.

Refreshments were served by the hostess to Mrs. George Garner, Mrs. Alice Damron, Mrs. E. J. McCollum, Mrs. Robbins, Mrs. Smith and Mrs. Lena Carpenter.

The next meeting will be June 15 with Mrs. E. J. McCollum—Club Reporter.

# CAMERAGRAPHS

**CHICAGO BEAUTY.** Miss Jeanne Brown, tops one of those smart new Zenith portable wave-length radios to the beach at Miami. Inset shows how barrel drops to reveal dial and controls.

**GOODWILL AMBASSADORE** (right), Miss Lillie Opal Nichols, of Mt. Vernon, Texas, receives her official badge as representative daughter from her state to the New York World's Fair from Grover Whalen. Miss Nichols is one of the many attractive sales girls employed at R. H. Macy & Co. in New York City to be appointed as Ambassadors of their home states by Mr. Whalen.

"THIS IS THE AMERICAN WAY," says Comedian Eddie Cantor as he throws switch that starts \$5,000,000 worth of road-building equipment exhibits moving and officially opens the 35th annual Convention-Exhibit of the American Road Builders' Association. Helping him is Michigan State Highway Commissioner Murray D. Van Wagener, association president.

**STATUE EXHIBITED IN SOVIET PAVILION** at New York World's Fair. Made of concrete and metal, and designed by the Soviet artist, Tzenet, this heroic statue of a miner is one of the feature exhibits in the Soviet Union's Pavilion.

**IN A PREVIEW PARTY** at the "Wonder Bakery of Tomorrow" exhibit building at the New York World's Fair. Benny Venuta (left) and Jane Pickens, screen and radio stars, pose before some decorative cutouts. Supported by M. Lee Marshall, president of Continental Baking Company, the stars "dressed up" a wheat field—the most expensive in the world—which adorns the exhibit building by planting a border of cornflowers around it.

**MORE THAN 27,000** entries were received in this year's competition for all-American package awards. James M. Elliott, vice-president of Carstairs Bros. Distilling Co., Inc., is seen with the plaque presented to the company for top honors in the field of labels and seals.

## ALL-BLONDES BAYMID

# Cadets Favor Brunette Beauties

Upsetting various theories and the hopes of all blonde entrants in the competition for the six most beautiful girls at Texas State College for Women, the five gentlemen from Ageland who made the final choices not only picked four brunettes but left out the blondes entirely. Selected from the sixteen nominees from all four classes, the dark-haired beauties are Misses Margie Smith, senior from Llano; Doris Harrison, freshman nominee from Tuckerman, Ark.; Naomi Boutwell, Terrill sophomore; Edith Eppright, senior from Charlotte, selected at large. Miss Elsie Black of Hallsville, junior chosen at large, is auburn-haired; and Miss Corinne Zimmerman, Dallas junior, is a brownette.

Each of the girls will be featured in full-page pictures in the Daedalian yearbook. Their identities were kept secret until they were presented at the Senior Formal Prom by Editor Doris Coats. Cadets W. D. Barton, Longhorn editor; Andy Rollins, scholarship society president; Joe Boyd, outstanding football player; Bob Adams, senior president; and Bill Smith, Battalion manager, were the blonde-banning judges.

### HALF CENTURY CLUB ELECTS OFFICERS

The Half Century club met Thursday June 1, with Mrs. J. C. Givens. The following new officers were elected: Mrs. T. L. Snyder, president and Mrs. Lela Burton, secretary.

The afternoon was spent quilting for Mrs. Homer Marks and playing Chinese checkers.

The next meeting will be an all day meeting at the home of Mrs. C. C. Mardis, Thursday June 8. Each member is to bring a covered dish for the luncheon at the noon hour. Those who enjoyed the meeting were: Mesdames Mary Davis, T. L. Eason, C. C. Mardis, Clara Young, J. F. Wallace, T. L. Snyder, Nell Rocky, Lela Burton and the hostesses Mrs. Givens.

### REV. YOUNG PREACHES FOR NEGROES

Rev. E. M. Young, pastor colored Baptist church, Muleshoe; also of Loveland and Littlefield churches, preached here last Sunday morning and night under the church arbor erected in the north part of town. A colored choir also sang several religious numbers at the Methodist church at the evening hour.

HERE THEY ARE, FOLKS

## Meet the WESTINGHOUSE QUIN-TEMP-LETS

Reading from top to bottom:

"FROSTY" is the mighty little man who keeps your foods frozen—and plenty of 'em.

"CRISPY" sees to it that your fresh vegetables are kept garden-fresh.

"BUTCH" does the big job of keeping all of your meats as fresh as your butcher can.

"FORTY" controls the cold at 40 deg., the right temperature for almost anything.

"HEALTHY" keeps all dairy products fresher, longer, and better.

Visit our office and see how these mighty little fellows do their jobs to give you better refrigeration as only Westinghouse can give

## Texas-New Mexico Utilities Company

Three new members were added to the church and \$33.25 was reported raised toward a church building.

### UNION LEAGUE MEET HELD AT EARTH

Thursday evening of last week the young people of the Methodist church attended a union league meeting at Earth. This being the end of a church school year the following officers were elected for the ensuing year:

Johnny Lippard, Littlefield, president; W. O. Jones, Earth, vice-president; Wanda Farrell, Muleshoe, secretary; Waitall Givens, Amherst, treasurer; Ethel Claire Rainey, Amherst, publicity superintendent.

The following places were represented at this meeting: Earth, Littlefield, Amherst and Muleshoe. Those who attended from Muleshoe were: Mrs. R. N. Edwards, Misses Wanda Farrell, Helen and Ora Sharp, Evelyn Jennings, Clea Nell Bayless and Lucille Bartley, Alvin and Willis Farrell.

### SHERIFF'S SALE THE STATE OF TEXAS County of Bailey

Notice is hereby given that by virtue of a certain Order of Sale issued out of the honorable District Court of Bailey county, on the 2nd day of June 1939, by J. J. Williams Clerk of said Court for the sum of Two hundred Thirty-Eight and 70/100 Dollars and costs of suit, under a judgement, in favor of James A. Gowdy in a certain cause in said court No. 1169 and styled James A. Gowdy vs. W. H. Riddle, Roy Whittington and wife, Nettie Elma Whittington, Irene Marie Riddle, Louis Alvin Riddle, Ollie Mae Miller, James Berkeley Riddle, Weldon Howard Riddle, Wallace Winford Riddle, and William Eugene Riddle, placed in my hands for service, I, W. E. Renfrow as Sheriff of Bailey County, Texas, did, on the 2nd day of June 1939, levy on certain Real Estate, situated in Bailey County, Texas, described as follows, to-wit:

All of that part of tract No. 6 of League No. 191 of the Ector County School Land lying east of the center of the Highway across said tract No. 6 and containing 148.1 acres of land bounded as follows: Commencing at the South East Corner of said tract No. 6, thence running North 1000 yds. Thence West 829 yds. to the center of said highway, thence South 1000 yds., thence East 843 yds. to the place of commencement and levied upon as the property of W. H. Riddle et al and that on the first Tuesday in July 1939, the same being the 4th day of said month, at the Court House door of Bailey County, in the City of Muleshoe, Texas, between the hours of 10 A. M. and 4 P. M., by virtue of said levy and said Order of Sale I will offer for sale and sell at public vendue, for cash, to the highest bidder, all the right, title and interest of the said W. H. Riddle, et al in and to said property.

Witness my hand, this 2nd day of June 1939.

W. E. Renfrow, Sheriff, Bailey County, Texas. (SEAL) June 8, 15, 22, 1939.

### Parable of the Sparrow and Dirigible

A miserable little snip of an English sparrow was flying about over a city one day when suddenly it chanced to notice that all the people below were looking up to where it was. The conceited sparrow, believing that the looks were addressed to itself, grew dipped and executed quick turns and chirruped in response to the frendards, and in general outdid itself in flying.

As it ducked and dodged and chirruped in response to the frenzied cheering of the crowd below it noticed a great shadow on the ground, and, looking up, it perceived a huge airship droming overhead. At this the cocky little sparrow retired to a telephone pole, sadly shaking its head.

And indeed there are many persons among us whose conceit is such that it magnifies them in their own eyes out of all proportion. "What a dust I am raising!" quote the fly on the stagecoach. 'Tis not the secret service men on the running board whom the people come to see and cheer. He who believeth that the whole club house looketh at him as he tees off from the first tee is fortunate indeed if his own caddy should follow his ball.

Van Diemans Land Van Diemans Land is an island name for Tasmania, the large island south of Australia, which constitutes one of the states of the Australian commonwealth.

## "I'D LIKE AN ADVERTISEMENT PLEASE!"

Suppose you had to buy each advertisement you see in the newspapers now! Suppose you had to pay to learn where and what and how about food, furniture, clothes!

You'd be mighty sure to read each advertisement thoroughly—digest every bit of important information it offered!

It's still a good plan to absorb all the facts from advertisements—even though they come to you free along with your news! For here merchants tell you how to make a dollar do more work... how to spend wisely... how to go farther on less. Through the printed word, they proffer their finest wares. It's much to your advantage to listen as they speak.

WE THANK YOU

### Farmers, Scientists Disagree About Moon Planting

For many years past there has been more or less controversy between scientists and farmers regarding the influence of the moon upon plant life growth. Scientists declare there is no such influence, while farmers are just as persistent in their contention there is. Perhaps neither one of them are able to explain in rational detail a solution of their contentions.

It is a well known fact the moon can jerk the ocean around, causing tides to ebb and flow. Astronomers have proven conclusively the influence of the moon has on neighboring planets, and farmers, practically men they are, continue to insist the moon may have various other influences of which mankind does not know.

"Planting in the light and dark of the moon," is a favorite expression among many farmers. Plenty of other farmers insist upon killing stock for winter meat when the Zodiac sign is just right, contending there is more blessing of the animal when the sign is high, consequently the meat is clearer, firmer and less rubbery. Likewise, in selecting animals, many stock raisers wish to do it when the sign is low, as they express it, claiming there is much less of blood and less likelihood of serious consequences from the operation.

Right here in Bailey county there are plenty of farmers who insist upon planting cucumbers, peas, potatoes and corn when the moon "is right," many of them contending they have abundant proof of their theory. Planting crops "in the moon" is an old, old theory that has never yet had a rational explanation. Science and agriculture work together harmoniously in many things; but when it comes to influence of the moon upon vegetation they simply cannot agree. This subject will frequently stir up an argument as quickly as does politics. Try it on the next farmer or truck-grower you meet and see for yourself.

However, it may be now said that many scientists are coming to admit the farmer may be right in his contentions.

**MRS. BARBER HOSTESS TO SEWING CIRCLE**  
 The Sewing circle met with Mrs. J. W. Barber, Wednesday, May 31. Mrs. W. G. Kennedy gave a very interesting talk on her trip to Washington, D. C. Everyone reported a very enjoyable time.

Those present were: Mesdames Bruce Burrisson, J. J. Lawler, Johnnie Johnson, J. L. Welch, J. E. Day, W. H. Astrey, W. H. Kistler, J. A. Welch, R. L. Jones, W. G. Kennedy. We will meet again Wednesday, June 14, with Mrs. W. O. Barber. —Reporter.

**Used to Designate Children**  
 Several centuries ago, says a writer in Collier's Weekly, the words maiden, wench, girl and damsel were used to designate children of either sex.

### What's Happening In Washington; Other Important Cities

**All Landon, former Republican presidential candidate, has definitely removed himself as a possible future nominee.**

Russia has refused to join France and Great Britain in a pact against Germany, claiming the terms offered her are not satisfactory.

Present indications are that both President Roosevelt and Vice-president Garner, as well as most congressmen will support the bill to take relief out of politics offered by Senator Hatch of New Mexico.

Fifty-three pupils and seven adults were killed or injured in an explosion occurring at Babberton, Ohio, resulting from a broken gas line. The accident was similar to the one at New London, this state a few years ago.

A shipload of Jews from Germany, loading 917, have been refused permission to land and make their homes in Cuba. The German liner on which they took passage has been ordered by the Cuban president to return them.

The Townsend old age pension bill went down to defeat in Congress last week in a vote of 302 to 97. Many congressmen were elected last year on promise of support for the \$200 monthly payment measure.

Ignace Jan Paderewski, famous Polish pianist, following a heart attack, has returned to his exile home in Switzerland. All dates of the 78-year-old musical genius were canceled, and it is feared by his friends he will never again appear in public.

Following sinking of the U. S. Squalus submarine, the British Thetis, sub has gone down in the Irish sea, landing in 132 feet of water and mud. It is now thought 90 lives may be lost, four having made their way out with safety methods.

Lou Nova scored a technical knockout over Max Bear, former heavy weight pugilist champion, Thursday night of last week. The referee stopping the fight in the seventh round of a 15-round bout. Nova is now in line to meet Joe Louis, the champion.

A military rifle said to hold 11 shots and will shoot sixty times a minute has been invented by a Vermont man. It is said to be far superior to the Garand rifle now in use. It operates entirely automatically, has simple construction and is very rugged. It weighs nine and a half pounds.

Mount Veniaminof, Alaska is on a rampage of fire, shooting ashes and thick sulphurous smoke five miles in the air and covering the earth two inches thick in a radius of 20 miles. The eruption is accom-

panied by numerous earthquakes and native of that vicinity are greatly frightened.

Farm income in 1938 totaled \$9,220,000,000, a drop of \$1,130,000,000 from 1937; but \$3,650,000,000 more than in 1932, the Department of Agriculture announces.

Persimmons Sent by Japan  
 Persimmons were introduced into the United States from Japan about 1875.

# "I JUMPED AT THE DEAL"

the Ford Dealer made on my old car!"

**"How much? says I to the FORD Dealer"**  
 My wife has been crazy for a FORD V-8. Figured I could swing it if I got a good trade on my old car. So I took the old fuss-maker around to the FORD Dealer.

**"DID I GET A TRADE!"**  
 The figure I had in mind was good enough. Imagine my surprise when the FORD Dealer paid me even more for my old car. Said he needed some used cars right now. You bet I jumped at the deal.

**"HAS IT GOT STYLE!"** Drove home in a brand new FORD V-8. Man, that is the sweetest running car I ever handled. And is my wife proud? She says the FORD V-8 was designed for women!—the last word in style and luxurious comfort. We are the envy of the neighborhood—but not for long, I expect. Tom, Jim, Dave, Henry and Bill have already talked to me and the FORD Dealer is going to have a busy day.

**FOR MATCHLESS V-8 PERFORMANCE • BIGGEST HYDRAULIC BRAKES  
 TRIPLE CUSHION COMFORT • STYLE LEADER IN THE LOW-PRICE FIELD**
