Hoosiers Laud McNutt Peace Plea At Big Welcome Home Celebration

INDIANAPOLIS.—When the folks of Indiana learned that Paul V. McNutt, their former Governor and now United States High Commissioner to the Philippines, was coming home to report to the President on the completion of his work in the Far East, they decided to give him a good, old-fashioned Hoosier homecoming.

Above is a view of the crowd that stood in Monument Circle in Indianapolis, scene of many famous gatherings, to welcome their favorite son, his wife and daughter, Louise, age 18.

Forty-three bands and drum corps took part in the procession that preceded his appearance on the balcony of the historic Hotel English. They were a representative lot. There were American Legion bands and drum corps (he is a former Post, State and National Commander of the American Legion), high school bands, girls' bands, a hill billy band,

negro bands, all kinds of bands. It was a gay time and when the tall, bronzed, native son stepped out on the balcony he was given an ovation that lasted for several minutes by the assembled thousands, many of them waving small American flags, others displaying pennants with the inscription "Welcome Home, Paul."

The ceremonies in the colorful Monument Circle were opened by William Fortune, head of the Indiana Chapter of the American Red Cross and prominent Republican.

The Mayor of Indianapolis, Reginald H. Sullivan, introduced the Governor of Indiana, M. Clifford Townsend, who had flown back from a conference of Governors at Albany, N. Y., to be present. He in turn presented Edward C. Elliott, president of Purdue University, who has just recently returned from a trip to the Philippines where he supervised the re-

vamping and modernization of the school systems.

Responding for himself and his family, High Commissioner McNutt made a ringing appeal for peace, basing it on conditions in the Orient and the problems to be faced by the Philippine Commonwealth when, under the terms of the Tydings-McDuffie Act, it attains full independence from the United States on July 4, 1946.

"Today," he said, "the Philippines are the only bright, prosperous spot in the Orient. Their people enjoy the highest wages and the best standard of living in the Far East. The deadly tropical diseases—smallpox, cholera, bubonic plague—which long decimated the population—have been wiped out.

"While our flag flies over the Philippines," he said, "no foreign power will trespass. With our flag withdrawn, the safety of this great island group would be seriously imperilled."

Enochs Echoes

Mr. and Mrs. Clarence Shearer and family of Pampa visited Sunday with Mr. Shearer's sister, Mrs. L. H. Bates and Mr. Bates.

Mrs. Carrie Shearer and Mrs. E. C. Hastings of Wilmore, Kansas, arrived Sunday and will spend a few weeks here with Mrs. Shearer's daughter and husband, Mr. and Mrs. L. H. Bates. Mrs. Hastings is an aunt of Mrs. Bates.

Mr. and Mrs. Alton Lee and children of Littleton, Colorado, spent their vacation with Mr. Lee's parents, Mr. and Mrs. Leonard Lee, with their parents, Mr. and Mrs. G. P. Howell.

J. W. Alford and two small daughters spent the weekend in Lubbock.

Mr. and Mrs. E. N. McCall and children visited Mrs. McCall's parents, Mr. and Mrs. Jim Kelly, near Moton, Sunday.

Mr. and Mrs. W. A. Snow and sons visited in Lubbock, Sunday afternoon.

Rev. John Moore filled his appointment here at the Baptist church Sunday.

Mr. and Mrs. P. F. Wooley and

children left Saturday for Stephenville.

Mrs. Patterson Entertainments. Mrs. Sam Patterson entertained at her home south of Enoch's Friday afternoon of last week with a surprise party in honor of Mrs. Reagan Seagler.

Refreshments of punch, sandwiches, cookies and olives were served to the following: Mesdames Hinton, Leonard Lee, A. E. Ford, Hugh Hinton, Chas. Mitchell, Ernest Ellison, H. H. Snow, Wade Davis, W. A. Snow, James Beck, M. J. Gibson, Chas. Vanlandingham, L. C. McCall, E. N. McCall, R. P. McCall, Frank Griffith, Carl Hall, J. T. Burns, Bill Dick, A. D. Halford, L. H. Bates, W. E. Kirkland, W. R. Adams, Roy Helson, Chas. Calvert, A. D. Calvert, A. N. Pepper, Clay Truett, E. W. Brewer.

As a complete surprise to Mrs. Seagler her mother, Mrs. R. M. Smith, her sisters, Mesdames Bessie McCallister, Verna Bartlett, Vera Bartlett; sister-in-law, Mesdames Martin Smith, Oleta Moyd and Miss Loretta Seagler, and friends Ella McCallister and Mrs. Loyd McCallister, all of Ackerly; Mrs. Lavell Bishop of Anton, and Miss Ella Faye Montgomery of Lubbock, were present.—Reporter.

Melbourne, Australia Melbourne, Australia, was founded in 1835 and was named after Lord Melbourne, the prime minister of England at that time.

Buy it in Muleshoe

DON'T SUBMIT TO HI-JACKING

T. C. RICHARDSON, Associate Editor, Farm and Ranch Breeder-Feeder Association

Most of the work of making a cotton crop has already been done, but cotton is generally from two weeks to a month later than normal in the Southwest. The insect hi-jackers may yet rob us of the fruits of our labor, if we are not on the alert to meet them more than half way with dust-guns and the proper ammunition. The "gun" may be a shoulder model or a power outfit capable of treating five to seven rows at a time; the ammunition for boll weevil, leaf worm and boll worm is calcium arsenate. If the insects get the jump on us and a heavy infestation occurs at this season, it sometimes pays to add a little Paris green to the calcium arsenate.

In the north or cotton territory of the Southwest the flea hopper may still be the most serious pest at this season of the year, for this insect migrates for considerable distances from weeds to the cotton fields, and multiplies rapidly from early spring when the first eggs hatch until late in the season. It destroys the small fruit buds before they become large enough for the boll weevil to deposit eggs, and in severe infestations, also causes the plant itself to assume distorted forms. The treatment for the flea-hopper is dusting sulphur—not just any sulphur, but sulphur prepared especially for the purpose—and applied to the plants with a machine which gives a thorough coverage of the plants and foliage.

When both flea hoppers and boll weevils are present at the same

time, as they are likely to be at this season, the dusting machine is loaded with a mixture one-third calcium arsenate and two-thirds dusting sulphur, and one application of the mixture is made about every five days until both insects are under control. Two to three applications may be required; occasionally more if the dust is "rained off" the same day it is applied.

The amount per acre for each dusting is governed by the size of the cotton. Enough must be applied to give a complete coverage each time, and in rank cotton this may run to fifteen pounds of the mixture—five pounds of calcium arsenate and ten pounds of sulphur. Records show that the cost of a season's dusting may be anywhere from \$2 to \$4 per acre, but the extra cotton saved in a three-year t it was worth about \$10 per acre. Last season many farmers did no dusting until leaf worms threatened to destroy the crop, and flea hoppers had already destroyed the "bottom crop." Some Erath county (Texas) growers doubled their yield by thorough dusting and some of those who did not dust turned the cows in to harvest the stalks—the cotton wasn't worth picking.

"Better late than never" is a good slogan to use in the fight against insect hi-jackers which threaten the cotton crop, but "do it right or not at all" should be the other part of the slogan. It is always a mistake to "try" something "to see if it will work," and experimenting with all sorts of machines and insecticides is too expensive for the average farmer to risk.

The methods and machinery for the control of flea hopper, boll weevil, leaf worm and boll worm have been thoroughly tested and worked out by the state and Federal agencies supported by your taxes for that purpose. The best available information on how and when to fight insects can be had by any cotton grower, on request to his county agent or state experiment station. Whenever new and better methods are discovered the experiment stations will test them and report on them, and until they do, the best the grower can do is to leave the experimenting to them.

Those who buy a good dusting machine to fight this year's late pests will be prepared to start the battle at the right time next year—when the insects first attack the crop.

What's Happening In Washington; Other Important Cities

U. S. Secretary of Navy Claude A. Swanson, 77, following an illness of several months, died last Friday.

An elevator holding 10,000 bushels of wheat, at Granada, Colo., went up in flames late Friday entailing a loss of about \$40,000.

Dr. Raymond Dart of the University of the Witwatersrand, South Africa, reports discovery of the first authentic "Tarzan"—a 12 year old Negro boy who had been reared by baboons.

More than 10 per cent of the nations school children are now transported between home and class room at public expense, according to the Federal Office of Education. Free transportation for 3,250,658 pupils costs the taxpayers \$62,652,371 a year.

Claiming U. S. newspaper comic strips have a "bad influence on children and adults with weak wills," the government of El Salvador has banned publication of the Spanish version of nine such features, including "Bringing Up Father," and "Charlie Chan," but such well known favorites as "Mickey Mouse," "Mutt and Jeff," and "Popeye" squeezed past the censor.

About 3,700 workmen went on strikes in General Motors plants last week just as managers were preparing molds and models for the 1940 automobiles to be put on the market within near coming months. The strike is said to have been authorized by the CIO United Automobile Workers over a wage agreement covering skilled workers. The Fisher body plant, dye and machine unit, Pontiac and Chevrolet plants were principally affected.

METHODISTS STIMULATED BY FRIED CHICKEN

Thursday evening of last week, members of the Young Adult Sunday school class, Methodist church, were entertained with a chicken fry on the church lawn. A. W. Copley, teacher of the class, being sponsor of the occasion.

Several chickens were prepared by the group on a camp fire, and a delicious picnic lunch of "Golden Glow" salad, pickles, cookies and fruit was served.

Among those present were: Mr. and Mrs. Buford Butts, Mr. and Mrs. Jim Burkhead and son Dwain, Mr. and Mrs. A. W. Copley and children, Mr. and Mrs. Chas. Holderman, Mrs. Clyde Holt and son Jimmy, Mrs. Fereal Little, Miss Cozy Burke and Bob Cantrell.

"GOOD SCOUTS" GET TOGETHER. Boy Scouts took the air in one of the highlights of National Boy Scout Week. As guests of Carson Robison, below, heard regularly every Monday night at eight o'clock, E. S. T., over the National Broadcasting System Red network, the Scouts participated in the broadcast which was dedicated to the Boy Scouts of America and developed around a Boy Scout theme. The boys got a big kick out of the occasion and are shown here going over the script with Carson. More than 100 Scouts, members of New York City Troop 704, attended the broadcast in full regalia.

LIEUTENANT COMMANDER Roland Kaufman, U.S.N., Commanding Officer of the U. S. Naval Reserve Base, presents silver wings to Kate Smith, radio star, and George Brent, star of the films, on the occasion of their designation as Honorary Commanders of the U. S. Naval Reserve Aviation Division. The presentation, left, was made at the Columbia Playhouse where Kate broadcasts Thursdays.

UPHOLDING WATER. Winchell's comment that 70% of twenty million pairs of sun glasses today are harmful. Nat Singer, President of the Soft-Lite Lens Company, cautions against the dark goggles fad, in spite of the fact that his company product deep-shaded glasses! Eye protection during the week through lenses giving mellow comfort frequently makes use of deep-shaded glasses unnecessary, says Singer, whose company is the only international specialist in absorptive glasses of quality.

ON THE MARCH! "Neither rain nor sleet nor snow, etc." — and so it is with these St. Paul marchers. Practicing for hours in the snow swept streets of the famous Carnival city, the crack Marching Unit and Drum Corps of the Cities Service Oil Company put their finishing touches on the trick formations used in the spectacular parade which recently opened the 1939 St. Paul Winter Carnival.

PRIZE WINNING SCULPTURE. "Eliaser Goes to Town," fashioned in ice by Nat Sample, won first prize at the 29th annual Dartmouth Winter Carnival. Dorothy Gardner presents the artist with the trophy.

Flag That Inspired National Anthem Made 125 Years Ago for Ft. McHenry

THE original "Star Spangled Banner" the hand-sewn flag that United States its anthem, is still a national relic. Preserved in the National Museum in Washington, it will be the center of attention next September, when the nation celebrates the 125th anniversary of its making, and of Francis Scott Key's masterpiece.

The immortal anthem was written on September 14th, 1814, as Key replaced the sun by the stars and stripes and night to complete it. He had spent the night pacing the deck of a cartel ship and watching a British fleet's bombardment of the fort.

The flag, which continued to wave triumphantly as the attack failed, was made by a widow, Mrs. Mary Young Pickersgill, of Baltimore. Mrs. Pickersgill's mother had made the "Grand Union Flag," under which Washington had taken command of the American Army at Cambridge, Mass., in 1776.

When the British invaded Chesapeake Bay, Mrs. Pickersgill was given the task of sewing a flag for the fort defending Baltimore. The order called for a mammoth banner, 30 by 42 feet. Because of the size, a large floor was necessary for the work. The mayor of Baltimore, Edward Johnson, provided the masting floor of the brewery adjoining his home. The walls of the building are still standing.

The huge flag contained four hundred yards of bunting, and Mrs. Pickersgill and her daughter, Caroline, with guidance from Mrs. Young, worked day and night to complete it. After the battle, Mrs. Pickersgill embroidered around the holes in the shot-torn flag. In 1912 the "Star Spangled Banner" was presented to the National Museum by a descendant of the Commanding Officer of Fort McHenry.

Baltimore and the nation will celebrate the famous flag's 125th birthday in September.

pasture mixtures containing a full seeding of Rhodes grass, Dallas, grama, or Bermuda grass.

3. Cultivating, protecting and maintaining (by planting if necessary) a good stand of forest trees, planted between January 1, 1936, and January 1, 1939, or if under a cooperative agreement with a governmental agency before July 1, 1939 in accordance with approved forestry practice as prescribed by the State Committee.

Each ACRE of the following counts as THREE units (\$4.50) in establishing a permanent vegetative cover by planting seed pieces of perennial grasses, on land containing sufficient moisture to start the grass.

Each ACRE counts as FOUR units (\$6) in establishing a permanent vegetative cover by planting crowns of Kudzu.

Each TWO ACRES of the following counts as ONE unit (75 cents an acre):

1. Summer legumes, excluding those classified as soil-depleting, interplanted or grown in combination with soil-depleting crops on good soil and a good growth are obtained, the legumes are not harvested, and the summer legume occupies at least one-third of the land
2. Seeding timothy or redtop or a mixture consisting solely of timothy and redtop
3. Each FOUR acres of the following counts as ONE unit (37.5 cents an acre):
 1. Contour listing, subsoiling (chiseling), or furrowing noncrop land.
 2. Strippropping on the contour, alternating with the strip of erosion-resisting crops and erosion-permitting intertilled crops.
 3. Protecting from wind and water erosion summer-fallowed acreage, from which no crop is harvested in 1939, and which is kept sufficiently free of vegetative cover so that available moisture is conserved, by either of the following methods:
 - a. Contour listing or pit cultivation to be done in the spring of 1939, not later than a date recommended by the county committee with the approval of the State Committee, in accordance with specifications set out in the regulations. This practice is applicable in Bailey County.
 - b. Each EIGHT acres of the following counts as ONE unit (18.7 cents an acre):
 1. Contour farming intertilled crops, consisting of the planting and cultivation of row crops following the contour as determined by a farm level or surveyor's instrument or following established terraces.
 2. Contour listing of cropland, with a regular double moldboard lister or with a chisel of approved design, or other implement getting the same results, according to specifications set out in the regulations.
 3. Each TEN acres of the following counts as ONE unit (15 cents an acre):
 1. Seeding small grain crops for harvest in 1939 on a contour run with a farm level or surveyor's instrument or on established terraces.
 2. Pit cultivation, when done on cropland in 1939 with an approved basin lister, which dams the lister furrows at regular intervals, or other implement getting the same result, according to specifications set out in the regulations.

World's Fair Crabmeat Salad Whets Summer Appetites

THE World of Tomorrow comes to the supper table, destined to alter the food habits of the nation for the better! Watch the eyes of your family sparkle when you set this delectable crabmeat-and-vegetable combination before them; they'll bless you for having changed the course of summer supper history with the nourishing, satisfying and yet light, main dish that fancy deep-sea crabmeat makes possible. Even though you do not go to the New York World's Fair, let its Theme Center be your inspiration for tomorrow's supper—and then sit back and receive a fanfare of acclaim. Here's how.

- World's Fair Crabmeat Salad**
- | | |
|--|------------------------|
| 1 12-ounce can fancy deep-sea crabmeat | 1 cup cottage cheese |
| 4 cup french dressing | 1 tbs. chopped chives |
| 2 cups canned peas | 1/2 cup asparagus tips |
| 1 large carrot | |
- Flake crabmeat and marinate in french dressing. Marinate peas and chill. Scrape carrot and taper to form the Trylon. Mix chives with cottage cheese, moisten with a little cream and form into a ball to represent the Perisphere. Arrange together on a large chop plate. Drain chilled crabmeat and place in lettuce cups, alternating with drained peas. Garnish with asparagus tips and tiny gherkins. Pour over it your favorite dressing. Serves 6.

SECY BAILEY CO. CONSERVATION EXPLAINS HOW SOIL-BUILDING PAYMENT EARNED BY FARMERS

The AAA has placed approximately \$26,000 at the disposal of Bailey county farmers to assist them in carrying out practices such as terracing, seeding legumes, establishing pastures and planting green manure and cover crops—that is, practices which conserve or build up the soil.

That is the maximum that can be earned by farmers of this county by carrying out soil-building practices in 1939.

The soil-building payment is made in addition to the regular conservation payment for planting within acreage allotments, and is separate, also from the price adjustment, or parity payment.

is figured take a farm with 200 acres of tilled land a cotton allotment of 60 acres 3 acres of commercial orchards 150 acres of noncrop open pasture land with a grazing capacity of 8 animal units and a total soil-depleting allotment of 135 acres.

The rate of 50 cents an acre of cropland applies to 65 acres (acreage of cropland in excess of the total soil-depleting allotment); the rate of \$1.50 per acre of commercial orchards applies to 3 acres; the rate of 2 cents per acre of pasture land applies to 150 acres and the rate of \$1 per animal unit. To get the maximum amount available for soil-building practices add the items listed as follows:

Cropland (65x50c)	\$32.50
Commercial orchards	4.50
Pasture land (150x2c)	3.00
Grazing capacity (8x\$1)	\$8.00

FARM JOURNAL-FARMER'S WIFE	1 year	SOUTHERN AGRICULTURIST	2 years

My name is _____ Address: _____

Town _____ State _____

Total \$48.00

In this example \$48 is the largest amount available to assist the farmer in carrying out soil-building practices.

Soil-building practices are measured in terms of units. For example construction of 200 linear feet of terrace qualifies as one unit of practice; seeding an acre of alfalfa counts as two units; an acre of green manure counts as one unit; each eight acres of contour farming with intertilled crops rates as one unit.

The payment rate for soil-building practices is \$1.50 a unit.

In the foregoing example then the farmer could earn his maximum soil-building allowance of \$48 (other carrying out 32 units (\$48 divided by \$1.50 equals 32) of practices.

If the farmer carries out only 10 units of practices then he gets only \$15 as a soil-building practice payment; 15 units \$22.50, and so on. In order to earn his full soil-building allowance, the farmer must carry out the required number of units of practice. Bailey County farms last year, as a group, fell \$13,000 short of earning their full soil-building allowance.

The program provides for a long list of soil-building practices in Texas. However, not all of these are adaptable to Bailey County. Those which have been and can be carried out with success in this county are as follows:

Each of the following counts as one unit (\$1.50):

1. Construction of 200 linear feet of standard terrace.
2. Contour ridging of noncrop, open pasture land—750 linear feet of ridge terrace counting as one unit.
3. Construction of reservoirs and dams—10 cubic yards of material moved in making fill or excavation counting as one unit.
4. Reseeding depleted pastures—10 pounds of seed counting as one unit.
5. Natural reseeding (restoration) of noncrop, open pasture by non-grazing (ditched and grazed) on one-half of the number of acres required to carry one animal unit for 12 months.
6. Each ACRE of the following counts as ONE unit: (\$1.50)
 1. Seeding biennial or perennial legumes, perennial grasses (other than timothy or red top), or mixtures containing perennial grasses, perennial legumes, or biennial legumes.
 2. Seeding winter legumes, annual lespedeza, annual ryegrass, annual sweet-clover, serbia, or crotalaria.
 3. Green manure crops or cover crops (excluding what, lespedeza, peanuts hogged off, and any crop for which credit is given any other practice) of which a good stand and a good growth is (a) plowed or disked under and followed by a winter cover crop if on land subject to erosion, in orchards or on commercial vegetable or potato land or on cropland in a regular cropping rotation.
7. Each ACRE of the following counts as TWO units (3):
 1. Seeding adapted varieties of alfalfa.
 2. Seeding permanent grasses or

PROGRESS NEWS

Mr. and Mrs. Dave Standefer visited in Floydada, Monday.

Mr. and Mrs. Clarence Lobein and Mrs. J. J. Wilson of Muleshoe visited in the home of Mr. and Mrs. G. C. Gray, Sunday.

Miss Christine and Lydia Mae Lockhart of Dalhart returned home last week, after spending the week in the home of Mr. and Mrs. W. M. Gaston.

Mr. and Mrs. Ernest Gray spent the Fourth of July visiting friends at Lorenzo.

Arthur Hills brother from Oklahoma, is visiting him.

Mr. and Mrs. H. O. Barbour visited in the home of Mr. and Mrs. W. M. Gaston Sunday afternoon.

Among those returning from College Station Sunday were Gordon Kennedy, Clayton Hill, Milburn and Frank Gaston, Wildon Standefer, Vanoy Tipton, and Boyd Loyd.

Mr. and Mrs. H. H. Byrd of Panhandle are visiting in the home of Alton Epping—Reporter.

Sunday School Growing

Progress Sunday school was attended by 98 members and 8 visitors last Sunday. There are now 116 on roll. Two teachers were absent.

The attendance contest, which closed at the end of the second quarter, was won by the young people class and will be entertained by the other classes of the school.

Everyone is invited to attend Sunday school which begins at 10:00 each Sunday morning.

WILL ALSO CAN BEANS HERE

Carl Case, manager Muleshoe canning factory was here last Tuesday and stated he was installing in the local factory a bean cutter, cookers and other necessary equipment for canning beans during the season.

Mr. Case said he had no idea how many beans would be offered for canning purposes; but that his factory would be ready to handle such crop as was desired canned.

To save metal, Jean has eliminated bicycle license plates.

POULTRY HYBRIDS MAY BE VALUABLE

U. S. Investigators Report Two Kinds for Farms.

Such a plain little when she was that it seemed a pity for the girls to tease her so much. She was small and meek and her hair was straight and ash blonde and the only time her face had any color it was when one of the office girls razed her about boys, and then her whole face would mantle with rebellious color, almost as though in unison with the blazing thoughts she controlled at that moment.

Sally Travis was the worst hector of all. Sally, who had not one beau but a dozen at a time, to stop and hector poor mousety little Mary Jane White, who somehow was never called "Mary" by any one in that vast office, but simply prim, proper "Miss White."

Miss White didn't go to lunch till last; she was forever finishing up some extra work for some one so that some one might "make" a luncheon date, and about three nights a week she worked overtime on a night that somebody might get away early for pleasure or what not. And today she had looked wistfully after Sally as she ran litting to meet Don for lunch. Wistfully, because somebody had just got away early for pleasure or what not. And today she had looked wistfully after Sally as she ran litting to meet Don for lunch. Wistfully, because somebody had just got away early for pleasure or what not.

SENATOR CONNALLY WOULD BOOST U. S. PENSIONS

Washington, D. C. July 12. (Special to Journal)—Senator Tom Connally of Texas has introduced in the Senate and expects to urge before that body the adoption of a proposal to secure two-thirds Federal participation in Old Age assistance payments up to a maximum of \$15.00. The State and Federal government to continue to share equally above that amount, as at present.

CONSTITUTIONAL CHANGE VOTE IS UP IN 1940

The following amendments to the Texas constitution will come up for vote of the people November 5, 1940.

HJR 8—Allowing city civil service systems to appoint officers for more than two years.

HJR 45—Allowing Red River County to levy special tax.

Mastitis Hits Two Rear Quarters of Dairy Cows

Which of the udder quarters in milk cows are most frequently infected in mastitis or garget infection? On the basis of observations made at the Wisconsin experiment station, and reported in the Journal of the American Veterinary Medical Association, F. B. Hadley, station veterinarian, has concluded that the two rear quarters are more often affected than the two front quarters, but that there is no significant difference in occurrence of the disease between the right and left halves of the udder.

Depleted by Overgrazing

Of the 728,000,000 acres of range land in the United States, supporting about 55,000,000 head of cattle, sheep, and other live stock, large areas have been depleted by overgrazing, and must be restored by better methods of range management. W. R. Chapline, chief of the division of range research, United States forest service, told the International Grasslands conference at Aberystwyth, Wales. Programs of restoration of depleted ranges will require years of determined co-operative effort, Chapline said.

Where to Keep Eggs

On the average farm it is difficult to have a satisfactory place in which to hold eggs, since they should be held at a temperature of about 55 degrees. Such a temperature will prevent germ development and retain, to a great extent, the interior quality of eggs, yet it is not cool enough to cause the eggs to sweat when they are removed from those quarters. A well ventilated basement usually affords the most desirable place to hold eggs.

Flushing Sows

Beginning about ten days or more before breeding, advises a writer, Wallace's Farmer, keep the sows in a rapidly rising state of nutrition by a liberal use of corn or similar feed, supplemented with tankage, skimmilk, buttermilk, or a combination of these feeds. A flushing mixture may be made of 50 pounds of tankage, 25 pounds of linseed oil meal and 25 pounds of alfalfa meal. Feed liberally up to as much as three-fourths of a pound daily.

'What Kind of A Girl—'

By MARY ARMSTRONG
(Released by Associated Newspapers WNU Service.)

SUCH a plain little when she was that it seemed a pity for the girls to tease her so much. She was small and meek and her hair was straight and ash blonde and the only time her face had any color it was when one of the office girls razed her about boys, and then her whole face would mantle with rebellious color, almost as though in unison with the blazing thoughts she controlled at that moment.

Sally Travis was the worst hector of all. Sally, who had not one beau but a dozen at a time, to stop and hector poor mousety little Mary Jane White, who somehow was never called "Mary" by any one in that vast office, but simply prim, proper "Miss White."

Miss White didn't go to lunch till last; she was forever finishing up some extra work for some one so that some one might "make" a luncheon date, and about three nights a week she worked overtime on a night that somebody might get away early for pleasure or what not. And today she had looked wistfully after Sally as she ran litting to meet Don for lunch. Wistfully, because somebody had just got away early for pleasure or what not.

General News Over Texas And Other States For Week

Visitors to Garlsbad N. M., for June totaled 26,878, 10,493 of them coming from Texas.

A total of 648 deaths were reported as resulting for July 4 celebration, Texas leading the list with a total of 48.

Attorney General Gerald Mann

Attorney General Gerald Mann has ruled the state ration system has no right to bid on contracts for state printing, binding and other stationary supplies.

Record Attendance at 4-H Club

A record attendance of 4-H club boys and girls at the three days course held at College Station was established this year when more than 2,500 attended.

State Unemployment Tax Collections

State unemployment tax collections in Texas from employers of eight or more have reached \$7,276,000.

Big Crowds Jam Streets Here Trades Day

Mobs! Mobs! Mobs! A veritable Coxey's army of ladies and gentlemen bargain seekers, pleasure bent, fraternalizers, good will exemplifiers, all friends of county seat business men—and all tarrying throughout the day, was here last Saturday for Trades Day, jamming the sidewalks, congesting the streets and highways until moving traffic had to circle around on secondary streets to get through to points of destination.

AGGI DEPT. ASKED FOR COTTON LABORATORY

Request for a Cotton Ginning and Fiber Laboratory for West Texas was brought directly to Secretary Wallace of the Department of Agriculture last Saturday by a committee of Texas Congressmen.

Those conferring with the secretary

were Representatives George Mahon of Colorado, Ed Gossett of Wichita Falls, and Bob Poage of Waco, composing a committee appointed by the Texas delegation several weeks ago to cooperate with the State-Wide Cotton committee of Texas in sponsoring the laboratory for the western cotton area.

Be proud of your home town.
