County Will Birthday The Afflicted Improvements On State Highway 278 Planned

That the State Highway Department is getting ready to take definite action on State Highway No. 278 in the near future, is the gist of information received the first of this week by county Judge M. G. Miller. This highway runs from Floydada, across Hale and Lamb counties and for about four miles into Bailey county where it intersects with State Highway No. 214 running south from Muleshoe. It will eventually be extended on west to the New Mexico state line connecting with the highway system of the Sunshine state. Some preliminary work has already been done toward securing right-of-way for the proposed improvement in Bailey county, most of it having been gladly promised by land-owners residing along the contemplated artery of travel, and preparation of deeds by the Department is expected to be finished in the near future, ready for delivery and signing. The present designation for State Highway 278 is of approximately 100 miles extent, and when completed will furnish an eastern outlet for travel from the southern part of this county, as well as giving an entrance into State Highway No. 214 north to Muleshoe or south into Cochran county and on to the Bankhead highway into El Paso, or west on State Highway No. 24 into the Sunshine state, thus forming another valuable highway connection for tourist and other travelers through this part of West Texas.

Adolph Neutzler For Co. Commissioner Of Precinct 3

In this issue of the Journal A. L. (Adolph) Neutzler of Watson community, makes announcement of his candidacy for the office of County Commissioner of Precinct 3, and in support of his ambitions makes the following statement: "In coming before the citizens of my home county as a candidate for this office, I realize I am probably the youngest candidate who will announce during the election year. I am 24 years of age, married and settled in a mature manner, have been farming with my father and for myself for several years past, enjoying a reasonable return in keeping with other farmers of my community. "I have had nearly a year's experience in the Bailey county farm agent's office, and for two summers have served on the government crew in surveying farm land in this county. I have also had experience as a bookkeeper in a cotton gin. Having had reasonable success in my personal affairs, and being a young man of strong patriotic tendencies and loyal interests to the affairs of my home county, I desire to offer my services as a servant of the citizens in this direction. It is an old saying "That young men see visions, while old men dream dreams." I willingly admit I am not yet old enough to dream dreams of my past accomplishments; but I do have visions of that which I may accomplish in the coming years, and many of those dreams are associated with the general welfare of my home county. "I assure my fellow citizens that as your County Commissioner in Precinct 3 I shall co-operate in every possible manner with other members of the Court toward a greater and more prosperous Bailey county, giving of the very best that in me lies as your humble servant in this capacity. Your good will in my behalf and your favorable votes will be sincerely appreciated in the coming Democratic primary.—A. L. (Adolph) Neutzler.

West Texas Gas. Co., Lubbock has installed a \$30,000 booster station 19 miles north of Levelland in Hockley county to increase gas pressure for benefit of Levelland customers. Dr. George C. Butte, Texas educator and once Republican candidate for governor of this state, died Thursday night of last week.

Healing Dimes and Dollars

Dimes and dollars contributed at the 1940 President's Birthday celebrations to fight infantile paralysis, January 30, will help heal thousands of American children afflicted with the crippling disease. Cities and towns throughout Texas are sponsoring balls and "March of Dimes" solicitations to aid such youngsters, as depicted by Bressler in one of his noted cartoons.

BAILEY COUNTY COTTON FARMERS IN PROTEST OF REDUCED COTTON ALLOTMENT CALL MEETING

A mass meeting of interest to all cotton growing farmers in Bailey county has been called to be held at the court house in Muleshoe, Saturday, January 27, beginning at 2:00 p. m. to discuss plans for increasing the cotton quota for this county and its various cotton growers. The meeting is called by the Bailey County branch of the Texas Agricultural association, according to W. M. Pool Jr., secretary-treasurer of the association, and not only all members of that organization are expected to attend, but all farmers interested in production of the fleecy staple are urged to be present. It is explained that the Agricultural act provides that no county shall have less than 60 per cent of its 1937 quota planted to cotton, plus the diverted acres, and no consideration is being given new cotton allotments except the first year. The following year the tilled acreage in sod is added to the old acreage, thereby running up the tilled acreage total for the county. In other words, the old grower is paying for the sod allotment for the following year. Pool said, Pool suggested it would probably be necessary for an amendment to be made to the Agriculture act, which will, of course have to be done by Congress, and since that body is now in session, prompt action would be taken by growers to see their protest is recognized and such proposed amendment be placed on the calendar in time to be assured a hearing before adjournment of that body.

Missionary Women \$149,653 Payment On "Weave Threads" At Meeting Conservation Is Received Here

Members of the Maude Hart Missionary society and members of the Women's Missionary society Circle No. 1, Methodist church, met in joint session at the home of Mrs. R. N. Hucababe, with Mrs. Beulah Carles and Mrs. Pat Bobo co-hostesses, Thursday evening of last week for a pledge service. The program was opened with soft music being played by Mrs. Bobo, after which the devotional was read by Mrs. Hucababe. The subject of the program was "Spinning and Weaving," and each topic represented a thread in one's life. Mrs. S. C. Beavers gave the first topic, "Weaving of Grey Thread," giving the past history of the missionary society and discussing its foundation. The "gold thread" was woven by Mrs. Earl Hicks, who read at length on the progress and future of the missionary societies. This was followed by Mrs. R. N. Edwards "Weaving the Red Thread," which was concerning the past and future of the week. Mrs. Bonnie Isaacs read, "I Met The Master Face To Face," after which Mrs. Perel Little wove the "White Thread," telling of the purity of Jesus' life. Mrs. Finley Pierson, gave a very impressive talk as to the purpose and sincerity of making pledges, following which members present made their pledges for the ensuing year. Tasty refreshments of marshmallow whip, assorted crackers, olives and coffee were served to the following present: Miss Elizabeth Hardin, Mesdames Buford Butts, Jim Burkhead, Earl Hicks, Woodroe Goede, Beulah Carles Perel Little Irma Mitchell, R. N. Edwards, Gale Holt Alvin Farrell, C. R. Parrell Pat Bobo, S C Beavers, Sam Fox, Finley Pierson, Bonnie Isaacs, Miss Marie Gooch and Mrs. R. N. Hucababe.

JUNIORS TO GIVE FUR COAT PLAY SOON

Members of the Junior class, Muleshoe High school, this week received their play books entitled, "Girl In The Fur Coat," and parts will be assigned the latter part of the week. J. A. Lumsden and Mrs. Virginia Bredemeyer, sponsors of the Junior class will direct the play, according to report.

Russia has warned Finland if she does not return the war materials captured from her in recent engagements she will declare war against that little country, and amusing statement to Americans. The Great Bear country has also warned the rest of the world to remain neutral or they may wish they had.

The next meeting be held Thursday evening Feb. 7 with Mrs. Gale Holt and Mrs. Jim Burkhead co-hostesses, at the Methodist parsonage.

Hundreds Packed Theatre and Examine Machines During Successful Tractor Show Last Thursday

The Tractor show held here Thursday of last week was widely patronized by farmer visitors, many coming from considerable distances to Muleshoe to learn more of the merits of "iron horse" farming and to become more familiar with detail construction and operation of the various tractors shown. Free moving pictures showing construction and operation of the five makes co-operating to put on the show were given at the local theatre the house being packed with tractor-fan guests throughout the day from ten o'clock in the morning until late that evening. Picture reels of a comedy nature, one of sports were also shown, interspersing the mechanical ones, imparting much pleasure as well as valuable information. More than 90 prizes of various kinds were given guests, these prizes ranging from a pair of pliers or a screw driver to a \$10 due bill on some one of the participating concerns. W. M. Stancell, Larlat farmer was the fortunate winner of the \$10 due bill, while Bert Mathis of Fairview community won the \$5.00 due bill. As guests entered the theatre, young lady secretaries seated within asked each to fill out cards previously printed, more than 250 of such cards filled out by heads of families indicating their interest in tractor farming and desire to own one of the popular makes shown in the films. Representatives of the different companies were also present for the show, mingling with the crowd, talking business and otherwise assisting in the success of the day, one representative addressing the crowd. Five popular makes of tractors being sold in Muleshoe were represented in the following: The International, sold by E. R. Hart Co.; Ford-Ferguson, sold by Rocky Tractor Co.; Allis-Chalmers, sold by Muleshoe Elevator Co.; John Deere, sold by Carl Lambert; Minneapolis-Moline, sold by Fry & Sons Brothers. Units of the various tractors were lined up on the pavement of Main street at the curb in front of the theatre for prospective buyers to examine.

Thermometer Skids To 3 Above Zero In Blue Norther

An old-fashioned Texas "blue norther" pounced down upon Muleshoe and surrounding area Thursday morning of last week, the mercury in the thermometer sliding down the glass tube to 5 degrees above zero. The cold wave was accompanied by snow which whitened the ground for a few hours; but was dissipated gradually as Old Sol peeped up over the eastern horizon. Friday morning the government thermometer at the official station here registered three above zero and Saturday morning it had climbed up a couple more degrees to five above zero. The skidding thermometer and its accompanying coldness sent people scurrying for heavier clothing and hotter fires in homes and places of business. Several water pipes belonging to negligent citizens showed their reaction to the weather by freezing and bursting, as did also many automobile radiators whose owners had forgotten to drain them Wednesday night, keeping plumbers and garage mechanics busy the following day. Reports arriving here the following day indicate the cold wave was quite general throughout the entire state, extreme southern portions of the state feeling in decisive manner the downward sliding of quicksilver indicators. Galveston and Houston recorded temperatures of 12 above the coldest spell witnessed in the coast area during the past seven years.

Bula Entertained County Teachers Institute

Teachers and officials of the Bula school district entertained members of the Bailey County Teachers Institute Friday night of last week, about 60 people, including 32 teachers being present to enjoy the delights of the occasion. The feature of the evening was a banquet, women of the Bula Methodist church, assisted by school girls of the home economics class were caterers, furnishing a delightfully toothsome menu and greatly enjoyed by participating guests. Following the feast there was an extemporaneous program among the speakers being County Superintendent M. G. Miller, H. E. Robinson, West Camp; M. L. Gunter, Progress; Russell Crafts, Ballyborbo; C. L. Sone, Muleshoe; M. W. McConnell and Smith Edwards, Bula; John Alford, county commissioner; G. W. Davis and V. C. Weaver, Bula; Miss Elizabeth Harden, Muleshoe; Mrs. Carrie Lee Bishop, Lovelock.

Public Installation Of Mission Officers Sunday Evening

Public installation for officers of the Maude Hart Missionary society and the local Women's Missionary society Circle No. 1 was conducted at the Methodist church Sunday evening in a special service. Rev. R. N. Hucababe installed the new officers for the ensuing year, devoting the evening service to this occasion in honor of the Missionary societies and their worthy causes, according to report. Officers installed in the Maude Hart society were: Miss Elizabeth Harden, president; Mrs. Perel Little, vice-president; Miss Marie Gooch, treasurer; Mrs. Buford Butts, connectional treasurer; Mrs. Earl Hicks, superintendent of study; Mrs. Gale Holt, superintendent of supplies; Mrs. R. N. Hucababe, superintendent of "Spiritual Life" program.

Rev. Hamilton Will Lead Revival At Baptist Church

Beginning next Sunday, an eight days revival service is announced to be held at the Baptist church here, preaching to be done by Rev. F. B. Hamilton, pastor, while his brother D. C. Hamilton, will have charge of the choir and congregational singing. We plan to make it eight great days," said Rev. Hamilton in commending upon the coming evangelistic services. "Eight days in which people of all creeds and faiths may join in wholesome soul worship, rededication of soul and mental facilities to the higher ideals of life, and of their physical natures in behalf of their fellow creatures. "The church is the great back-log of society," said the minister, "and needs widespread, wholesome and universal support to accomplish the work intended for it." Services will be held each night, beginning at 7:30 o'clock, to which all people are cordially invited to attend.

CLUBBERS ATTEND BRIDAL SHOWER

Members of the NeedleCraft club met at the home of Mrs. W. E. Renfro Thursday afternoon of last week for their regular session and attended a bridal shower given in honor of Mrs. A. L. Swanson, after their routine meeting. Thursday afternoon of this week Mrs. H. A. Robb sr., will be hostess to members of the club.

Contracts have been closed for the drilling of 22 new oil wells in Hockley county.

Garner, Leader of Peace Bloc, Crystallized Anti-War Sentiment Throughout the United States

Washington, D. C.—Vice President John Nance Garner more than any other man changed the American attitude toward the European war.

When Mr. Garner returned to Washington for the special session of Congress on September 21, there was a sort of fatalistic feeling that somehow or another the United States, sooner or later, would get into war.

Travelers returning from Europe were quoted in Eastern newspapers as reporting that the most frequent question asked of Americans in England and France was "How soon will the United States join us?"

Garner never issues statements to the press, therefore his part in creating the new psychology may not be fully known to the country. But more than forty senators visited the Vice President on the first day he was in Washington.

Here is what he said to them: "The United States is not going into this war. The people are determined that we shall not get into it. We in elective office have got to quit saying that we hope the country can stay out. We have got to start saying 'We are going to stay out.'"

He expressed the same feeling at the White House later the same day when Democratic and Republican leaders met with President Roosevelt. He expressed it again and again as senators and representatives called on him later. And in a few days the Garner sentiment was being echoed throughout Washington and it spread to the country.

Garner voted for war in 1917. He believed there was no way to stay out and he still believes there was no way to stay out. He insisted that his only son go to war then.

Marquis James, Pulitzer prize-winning author, in his new book, "Mr. Garner of Texas," tells how it happened.

His son, Tully, had gone to the father's office a few days after the war resolution passed in 1917.

"Son," said Mr. Garner, "how do you feel about going to war?"

"I aim to go, Dad," said the boy.

"I'm glad to hear it—for you've got to go. I couldn't have cast that vote to send other fathers' boys to war if I hadn't known I was sending my own. And just one more thing: your mother and I will want to hear from you every time you get a chance to write, but promise you'll never ask me a favor, I might be in a position to get it, and I don't want to be exposed to temptation."

No member of Congress got a better understanding of war than Garner. Not only was he a member of the Ways and Means Committee active in the framing of laws for the four Liberty Loans aggregating \$18,000,000,000 and the \$4,500,000,000 Victory Loan and the emergency tax bills, but he was also President Wilson's liaison man between the White House and the House of Representatives.

Twice a week he went to the White House for long private conferences with President Wilson. The President sent him to confer with the British, French and Belgium missions which came to the United States to discuss methods of waging the war. Garner had for many years been a member of the Foreign Affairs Committee of the House of Representatives and a student of foreign relations.

In the writing of the new neutrality law it was he who insisted on every safeguard to prevent involvement of the United States in war.

Years Of The Locust Are Passed, The 30s Longest, Greatest Depression, High Hopes For The Coming 40s

By E. HOFNER, Portland, Ore.

One of the most eventful decades in modern history has ended. And this nation enters a new decade during which, unless all signs are wrong, its people must face and grapple with problems, issues and responsibilities of the most far-reaching character.

The 1930s will be known to the historians of the future as the years of one of the greatest and longest depressions this or any other nation ever experienced. They will be known too as years in which the democratic process was consistently attacked by those of those who called themselves its friends, as well as by those who were its frankly avowed enemies.

From the international point of view, the tragic 30s came to a cynically fitting end in that most ghastly and unending of events—a war which embraces much of the world. In nation after nation the arts of peace have of necessity been put aside, to the end that war may be prosecuted to the utmost. And war destroys more than men and materials and machines and economies and states. It destroys those essential liberties for which men have fought and died in holy causes ever since the world we know began. It destroys those spiritual values which are at the root of all artistic, cultural and humanitarian achievement. It has been truly said that in modern war there can be no victors—there are only the vanquished. It is an ironic commentary on the times in which we live that those nations which are fighting this war in the name of threatened democracy, have been forced to use the methods of the dictators in order to meet the enemy on its own totalitarian terms.

The greatest blessing which this nation possesses today is its physical remoteness from the conflict abroad. That is a position enjoyed by no other of the world's major powers. There is profound wisdom in the attitude of the great majority of the American people who say, in effect—"We can keep out of war—and we will keep out of war." There is no war party in this country—no responsible statesman urges our participation. We can all feel a deep and abiding thankfulness that this is so. Never before was it so important that we Americans keep our heads, in order that we may also keep our liberties. For should this country become involved in war, democracy would vanish here, as surely and as surely as it has vanished abroad.

Turning to our own internal problems, our task is great. The gratifying improvement that has recently taken place throughout our economic structure must not be allowed to blind us to the unpleasant truth that not one of those issues which we were forced to face at the start of depression has been solved. Most of them have become more complicated and difficult. The national debt, despite the heavy tax load in our peace-time history, has nearly tripled in the past decade and will soon reach the present legal limit of \$45,000,000,000. The immense expenditures for relief continue, even though business has much improved and unemployment has consequently been reduced. The

agricultural situation, in spite of a long series of extremely expensive "farm relief" measures, remains tangled and unsatisfactory.

On top of that, there is still a strong clique high in government whose attitude toward business can be described only as strongly inimical. This is the group which backs any and all measures designed to put government into tax-subsidized competition with heavily taxed enterprise—which stays awake nights thinking up new ways of saddling business with restrictive laws and punitive class taxes—which encourages essero ebasa-ck-t-falsOh e'p ages labor excesses to the full—and which does all in its power to prevent stability, and to keep chaos and uncertainty in the saddle. It is a remarkable tribute to the courage and staying power of American business that it has managed to progress as much as it has when confronted with such handicaps.

Summing up, we have plenty to do at home during the years that stretch ahead. The current Congress and those which follow have their work cut out for them—but satisfactory results will be secured only if the people as a whole are awake and watchful, are conscious of their needs, are deeply aware of their American heritage and way of life. For in spite of the unproven claims of extremists, our only real progress has come from productive, employing industry, working under the American system of free enterprise which brought us from a minor power to a world power in a century and a half.

Here in America we have all that is needed to bring a greater prosperity than we have ever known—the industries, the men, the resources. But unless we maintain our basic liberties, material blessings mean nothing.

Bailey C. o. Council Lays Plans For The New Year

The Bailey County Home Demonstration Council met in Muleshoe Monday afternoon with Mrs. A. E. Newton of Baileyboro presiding.

After the officers and delegates were introduced, Mrs. Newton read her appointments for the various committees of the council.

Plans were discussed for financing the work of the council and needed changes in the budget were suggested.

Mrs. W. L. Key read the 1939 expansion plans and suggested changes were given. A committee, composed of Mrs. Gordon Murrah, Mrs. E. C. Gordon and Mrs. R. B. Mescham, was appointed to investigate the purchasing of good garden seed cooperatively by home demonstration women of the county.

Mrs. Newton urged the use of better parliamentary procedures as an aid in disposing of business quickly and effectively, and asked the support of each member of the council in making 1940 a most successful year.

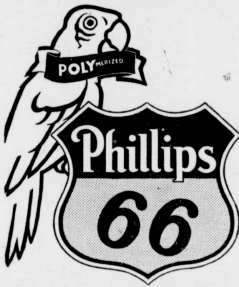

After the council adjourned, Miss L. Belle County, county home demonstration agent, gave out material to be used in the meetings with the agent for February and urged

NEW At every Phillips pump in town

HIGHER

ANTI-KNOCK

without higher price

Here is the sensational NEW that is causing all the talk! . . . with an octane rating so high it actually gives the same knockless performance for which you pay 2 cents extra per gallon. Again, Phillips leadership brings you the greatest regular in all Phillips history . . . highest test and higher anti-knock ordinary motor fuel. For a new all-time high in performance at the price, try Phillips 66 today.

Phill-up with Phillips for Instant Star

Phillips Petroleum Co. Announce New Hi Gasoline

A fifty per cent increase in power output of present day airplane engines, without a comparable increase in weight, may be possible through the use of a new 115 octane gasoline announced by Phillips Petroleum Company.

With an anti-knock rating higher than any aviation fuel ever before manufactured, this new fuel opens the way for higher compression engines with increased power but without increase in size.

This new higher antiknock fuel is the latest scientific achievement of the company's research staff in the development of the polymerization process. It has been accomplished by the commercial production of "Neohexane" which is not a trade name for gasoline but a chemical term indicating the nature of the product itself. "Neohexane" means: "A hydrocarbon fuel composed of molecules containing six carbon atoms in a new and more compact form." By the addition of tetraethyl lead, the antiknock rating of the new fuel can be increased to what would be equivalent to 115 octane by present testing methods.

Simultaneously with this announcement the Phillips Company also announced an increase in the antiknock qualities of its automotive gasolines.

Silicosis, a Disease
Silicosis is a disease to which carborators, miners, quarryers, tunnelers and rock-drillers in general are subject. Sharp particles of rock are breathed. They cause dense, fibrous masses to form which block off large portions of the lungs. Tuberculosis is inevitable. It may take only two years or it may take fifteen for the disease to develop.

Naming Mount Rainier
Mount Rainier was named after the British admiral, Peter Rainier, who figured in the American Revolution. The name was given by Capt. George Vancouver, English navigator and explorer.

each club president see that at every meeting the home demonstration program be carried out.

FARM TOPICS

GOOD MANAGEMENT TO INCREASE EGGS

Early Preparation Must Be Made for Pullets.
 By Roy S. Dearstyne, Head Poultry Department, North Carolina State College—WNU Service.

The poultryman who has a well managed flock is the poultryman who will receive the biggest returns from the fall increase in egg production.
 Pullets should be ready for the laying house in early fall. The house should be thoroughly cleaned and disinfected before the birds are placed inside. Broken window panes should be replaced, and if drop curtains are used on open-front houses, these should be checked for needed repairs.
 Cull all pullets carefully. Market all sub-normal birds, especially those with excessive bleaching of shank and face parts. These birds are usually carriers of coccidiosis.
 Do not change pullets from growing mash to laying mash until they have reached 25 per cent production. Then change the mash gradually over a period of two weeks.
 Don't buy cheap mash—it is the most expensive in terms of results produced for money spent. Keep a good grade of mash before layers at all times. See that they have plenty of fresh water.
 Practice rigid sanitation to keep the death rate down. Keep accurate records on the flock. Without records the poultry business is a hit-or-miss affair—mostly miss.
 Good breeding males are essential but scarce. If these have not been secured, get them at once.
 Early fall is a good time to plant grazing crops. A mixture of Italian ryegrass and crimson clover will provide excellent winter and spring grazing.

General News As Reported From Over The U. S.

Hon. Milton Tatum of Dalhart has been appointed by Gov. O'Daniel judge of the 69th District succeeding the late Reese Tatum.

The Amarillo Fat Stock show has been set for March 4, 5, 6 and 7. Nearly 1,000 entries of stock have already been made.

Steps are being taken at Hereford for organizing a Potato Growers association and building a warehouse there in the spring for accommodation of growers.
 Fire starting from a blow-torch used to thaw out frozen pipes, destroyed the casing and pressing equipment of the City Cleaners at Farwell Monday morning, estimated loss of equipment is \$1,600 and damage to building is \$400.00

More than 7,000 attorneys in Texas have been registered by the Supreme court under the new state bar law, according to Axel Philquist, chief clerk of the court. Present registration has brought in more than \$28,000, and it is estimated about 8,500 lawyers will register.
 Outgoing House in efforts to economize, the Senate appropriations committee last Saturday lopped off \$12,788,664 of the deficiency bill now being considered to meet cost of President's emergency expansion of the nation's armed forces, the total amount now standing at \$251,822,588.

MULESHOE HI SPLITS GAMES WITH FARWELL

The Muleshoe High school girls and boys basketball teams motored to the neighboring city of Farwell Tuesday night and played match games with the high school teams. The Muleshoe girls were victorious in their game with scores of 30 and 26, adding another check on the winning side of the season's list of games won and lost.
 The Farwell boys kept the larger end of scores at home, being 28-19. Several basketball fans from here witnessed the games.

COUGARS KNOWN AS PUMAS

Cruel, friend to no other animal, cougars, more widely known as pumas, nevertheless have a strange affinity to humans. Easily tamed, they seldom attack, never unless provoked. Though daring to tackle larger beasts, they often stand trembling and whining, allow men to kill them. Deep, however, is their hatred for dogs, which even tame ones will attack. They range farther than any other American mammals, living from Canada to Patagonia. Great jumpers, a 20-foot leap into a tree is easy for them. Over ground they can cover almost 40 feet.

Ohio, Wabash, Once One River
 The Ohio and Wabash were drawn as one river on the map of 1703, and the river was called Ohio.

Robes for "Judgment Day"
 America's greatest preparation for "Judgment Day" occurred in the early 1840's after one William Miller told his religious sect of Millerites and the country as a whole that the end of the world would take place on October 20, 1843. This activity went so far, in fact, says Collier's Weekly, that several New York stores widely advertised and sold white muslin for "ascension robes."

Connecticut's Boundary
 The north boundary of the state of Connecticut has a curious deviation from a straight boundary known as the Southwick jog. The reason for it is that in adjusting errors in the boundary line between Connecticut and Massachusetts as previously run by compass a long, narrow strip of land was given to Connecticut, and the Southwick jog ceded to Massachusetts was intended to be an equivalent area.

Soy Meal Chick Feed Is Recommended in Rations

Since soybean oil meal has become such an important factor in poultry rations, due to its economy as protein carrier, it is worth noting the results of experiments at the University of Wisconsin, says the Country Home Magazine. An all-mash ration containing 12 parts soybean meal, two parts meat scrap, and two parts dried milk plus minerals (in 100 parts) was better than one containing 16 parts soybean meal plus minerals, as measured in weight of chicks at 8 and 20 weeks, and in feed consumed for gains made.
 Another ration consisting of 12 parts soy meal, two parts meat scrap and two parts dried milk plus minerals (in 100 parts) was not so effective as one containing eight parts meat scrap and eight parts dried milk, when measured at eight weeks, but was about as good at 20 weeks. The 12-2-2 ration (above) was about equal to one with eight parts soy meal, four parts meat scrap and four parts dried milk plus minerals and one with eight parts meat scrap and eight parts milk at 20 weeks of age. With laying pullets at 11 months various combinations of soy meal with meat scrap and dried milk plus minerals gave good egg production and were better than when the sole source of protein was soybean meal.

Poultry Needs Pure Water

One of the greatest sources of infection of bacterial diseases of poultry occurs while the birds are allowed access to the poultry run or range. In their habit of drinking water from puddles which form in the low places after a heavy rain. Such water is usually teeming with bacteria and offers one of the most dangerous sources of infection. Particularly is this true in the case of coccidiosis. Keeping the birds confined after each rain until all puddles have dried up or filling in the small hollows on the range so that the water will not accumulate is the best means of preventing this danger.

Prontylin

Prontylin, the magic drug that has startled the medical world by quickly eliminating streptococcus infections in man, is now being tested with cows to clear up udder infections with mastitis, and encouraging results are being secured. Dr. Lowell Erf of Cincinnati suggested the idea to his father, Prof. Oscar Erf of Ohio State university, who is now testing it on more than 100 cows. Some cows, where the mastitis is due to streptococcus infection, have later been reported negative.—Farm Journal.

Confining Poultry

Trim the tips of chickens' wings, perhaps one wing more than the other, to keep them from flying over the fence, is the advice of the Indiana Farmer's Guide. Uneven trimming will unbalance the bird when an attempt to fly is made. Very little of the wing needs to be taken off to stop this practice and little attractiveness of the bird will be lost. This suggestion is the most economical and practical for the poultryman.

All local advertisements remain in this paper for the time specified or until ordered out. All notices & matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Editorial

Every Great Attempt is Glorious Even if It Fails

A THOUGHT FOR THE WEEK

But the that doeth truth cometh to the light, that his deeds may be made manifest; that they are wrought in God.—St. John 3:21.

If a thousand old beliefs were ruined in our march to truth, we must still march on.—Stopford A. Brooke.

SECURITY

The first checks covered by the Social Security fund are to be paid beginning in February. The plan has been in force for three years and suffered much criticism. Next month men and women 65 years of age and over, will each be paid from \$10 to \$41.60 a month, from this old age pension which has been suffered by many and not always silently.

Despite objections, the old age pension is really only a humane effort to abolish suffering and need when age comes, work is not available and support is laid at the door of Mr. Taxpayer.

The people in Muleshoe who believe they do not need someone to save their money for them in their old age are greatly outnumbered by the many who are going to find such a fund a real life saver.

PRAYER FOR PEACE

Many state executives have asked that their people unite in the movement observed by millions of citizens throughout the U. S. in calling a day of prayer for peace.

The word goes to all churches and is spread among all groups of people. Whether such a concerted and unified prayers will have an effect on influencing governments and rulers, we cannot foresee.

This desire for peace is not confined to this country alone but is a world-wide plea. Can the dove of peace be guided by love, can moral power be overcome by brute force, will the call of brotherhood sound over the cry for blood? Shall the conscience of the united world be heeded by the masters of crime?

WELCOME HOME

Those of us who reside in Muleshoe may not be as appreciative of the weight of the postman's pack as our brothers who await the city deliveries and expectantly look forward to the familiar sight of the home town paper. Not long ago a subscriber on our mailing list missed out on a weekly issue and wrote us to forward a copy "post-haste". This caused us to reflect upon how much a home town paper would mean if we were far from friends and old associations.

The mail sack of the city carried

bulges with all sizes of papers of those small towns of which the recipient was once a part. Those afar often fail to get a complete digest of the town activities from those who correspond with them. It takes long to tell of comings and goings, of the activities and discussions of inhabitants whose names arose familiarly to the homesome one. What better than to have the home town paper bring you the news?

The city edition may weigh heavier, but the home town paper carries more refreshment. The weekly may not have the large subscription list, it may not be perused by the number of readers of the city daily, but it serves to satisfy in a different way. It crowds the carrier's pack as it crowds the memories and brings a nostalgia for those folks and things that once were.

INVENTIONS vs. JOBS

In the midst of a period when for the first time in many years national prosperity seems to be on the way back, it is disconcerting to read that persons in high places are again publicly uttering an old and discredited piece of misinformation. We refer to the hoary declaration that "inventions take away jobs."

Actually, this is a time when the statement that inventions take away jobs is most meaningless, coming as it does in the face of plans being made all over the country for commemoration next month of the 150th anniversary of the American patent system. During this celebration of "Modern Pioneers' Day" nearly one thousand inventors whose achievements in recent years have created new industries and hundreds of thousands of new jobs will be honored.

Sometimes there has been temporary displacement due to technological changes, and the record abundantly shows that industry is doing everything possible to cushion the shock of this change. But over the long run, invention has created infinitely more jobs than have been destroyed by these changes.

PRAYER FOR PEACE

Here are a few facts that help to show the truth: 84 per cent of all machines invented in this country are "labor saving" rather than "labor saving." That is, they are designed to create entirely new products or services, or improve old products and services.

One out of every seven persons employed in American industry today works for one of 14 new industries that did not exist in 1870. These new industries owe their existence to invention.

Between 1900 and 1930, the period of most intensive machine development in this country's history, the number of jobs increased at the rate of 8 per cent while the population was increasing 62 per cent. The inventor was behind those extra jobs.

Today, with manufacturing industry employing more workers than it did in 1929, and with thoughtful Americans looking to invention to create still more jobs, attacks on the inventor come at an unfortunate time.

NO DIFFERENCE

They seem to resemble all too closely the attitude of the stay-at-homes who moaned that progress was at an end at the same moment that covered wagons were moving westward and the whole new world of American life was being built by adventurers with courage and faith in the future.

TRUTH about ADVERTISING

By CHARLES B. ROTH

THE RESPONSIBILITY OF SUCCESS

WE OFTEN say when we discuss various things we acquire that it isn't the original cost that counts. It is the upkeep. This is particularly true of success.

The fact is that there is a responsibility of success which failure or mediocrity never knows. The man who is successful, who achieves in whatever line he may enter, has an obligation and a responsibility which requires that he continue to do his very best.

Especially is this true of business. To make a brief success of a business isn't hard. To build a lasting success requires close application and a fine sense of the obligation which success implies and demands.

If advertising served no other purpose than to create the obligation of success it would perform a useful social and economic act, for advertising holds up this obligation of success and demands that it be observed constantly.

Whenever a manufacturer or a merchant begins to advertise he sets self-imposed standards on himself. By these standards do others judge him. By these standards do they also classify him.

He has an obligation to live up to every day thenceforward.

Charles Roth

If he hadn't advertised, he could give good quality one day and poor quality the next and get by with it. But when he comes out boldly in print and advertisements, the die is cast, and he must forever live up to the highest ideals.

Showed men have thought that they could contravert this law. By putting quality and good value into a product and then by advertising it, they have succeeded in a short time in building up a big business. And then came temptation.

"Why maintain all this quality?" they ask themselves. The public will never know. Why not cut the quality but continue the advertising and clean up? They have tried. But the public does know quality, is quick to perceive deception, and abandons the man or product which tries to substitute inferiority for honest merchandise.

There is no quicker way to ruin a business than to set up a standard and then violate it. There is no better way to build up a business than to set up a standard and then live up to it.

Advertising is the great setter of standards in American business life, and advertised goods are the standards by which you spend your income, confident of getting your money's worth every day.

The man who advertises has assumed the responsibility for success. You'd rather deal with a responsible man, wouldn't you?

country. Wise words these, "Don't give the drunken driver a break. I don't care who he is." How often the fact that he is "who he is" leads to overlooking by a judge when a traffic crime is committed!

What difference his social standing if he is a killer when drunk? The fellow may be driving a high powered, expensive car, or a bit of junk that can't make the grade, but whether in tuxedo or overalls the drunken drivers are brothers and should receive the same treatment.

This means Muleshoe and all other communities around us.

Jaunty Journalettes

How many Muleshoe people have stopped to think that with the close of 1939 "life begins at '40"?

The girl in Muleshoe with the face that is her fortune, often has a tongue that is her misfortune.

Too many children in Muleshoe think their teachers aren't smart enough to teach them anything.

One drawback to a small town like Muleshoe is that folks always know how good one is at being bad.

Plenty of Muleshoe youngsters would gladly go to the dentist if they could have their teeth given a chocolate filling.

Bailey county voters have already begun wondering which of the candidates announcing can really save the country, this county particular, in this time of crisis.

This Muleshoe citizen who says that today's youth haven't a chance, seem to forget the same thing was said about their father until he made his chance.

Even if opportunity did knock at the front door, there are probably some Muleshoe wives who would send him to the kitchen door because his shoes were dirty.

After an auto trip, a Muleshoe motorist may not be able to tell you much about his travels, but from the bill boards on the highways he surely knows what companies are doing the most advertising.

TAX FACTS

Texas has 9,000 independent civil subdivisions, every one of which has the power to issue bonds and to levy and collect taxes.

Excessive taxation has been one of the greatest causes for decline in the standard of living, according to the American Taxpayers association.

It is officially declared taxes has so increased they are now more than 200 per cent greater than the entire farm or agriculture income.

With the exception of California, Illinois and Ohio, Texas has more old age people drawing pensions than any other state of the Union.

The national debt is now in excess of \$44,000,000,000, and will

doubtless be still increased of the President's plan meets approval of Congress.

Real estate owned by the Federal government would yield close to \$100,000,000 a year to state and local governments if it were subjected to taxation, says an estimate by the Federal Real Estate board.

Tax officials say the increased tax burden is largely responsible for the thousands of people out of jobs. Taxes last year paid by 163 typical American companies were \$1,643,000,000, equivalent to \$75 per employee.

Of the \$14,811,000,000 in taxes collected by Federal, State and local governments in 1938, Treasurer Morgenthau says 32 per cent came from property, 24 per cent from customs duties, 10 per cent from gasoline and other motor vehicle taxes, 9.9 per cent from liquor and tobacco taxes and 8.8 per cent from sales taxes and other excises. Consumers taxes were 10.6 per cent.

MRS LENDERSON, SUDAN

Mrs. W. L. Lenderon of Sudan, formerly Miss Avanelle Motheral of Muleshoe was honored with a miscellaneous bridal shower, Wednesday afternoon of last week at the home of Mrs. E. R. Hart with Mrs. Beulah Caries and Mrs. Allen Guinn co-hostesses.

As guests arrived each registered in an attractive bride's book, made of white and tied with pink ribbon streamers.

Decorations of variegated colored sweet peas were used for profusion throughout the entertaining rooms and the many gifts received by the honoree were placed in a large pink and white heart shaped basket and centered on a lace covered table.

Pictures were taken of the guests as they opened their gifts by "photographer" Billy Beavers.

Refreshments of Marshmallow salad, wafers, and spiced tea were served by the hostesses, assisted by Mrs. Ray Griffiths. Plate favors were individual heart shaped candies.

A large group of friends of the honoree were present and several who did not attend sent gifts.

MANN, OTHER CONVICTS STILL AT LARGE

J. W. Mann, convicted of killing a Cochran county deputy sheriff, Robert Lacy Cash and Andrew H. Nelson, who escaped nearly two weeks ago when they overpowered a state deputy at Buffalo while being taken to state penitentiary are still at large, according to last reports.

Sunday night they were suspected of being at Stanton where a night watchman opened fire on them; but they made good their escape. Later they were reported at Lamesa, in Dawson county, still traveling in the red car with white sidewall tires. It is now thought they may have crossed into New Mexico and State police of the Sunshine state are now on the watch for them. It is agreed by officials the posse that finally surrounds them is due for a big fight before they are retaken.

POLITICAL ANNOUNCEMENTS

The Muleshoe Journal has been authorized to announce the following candidates for the respective offices named subject to the Democratic primary to be held Saturday, July 27, 1940.

For County Judge and Ex-Officio School Superintendent: JIM COOK
M. G. MILLER (Re-election)

For County Attorney: CECIL H. TATE (Re-election)
Collector: W. E. (Raz) RENFROW (Re-election)

For County and District Clerk: MELVIN G. BASS
J. J. WILLIAMS (Re-election)

For County Treasurer: HELEN JONES, (Re-election)

For County Commissioner Precinct 1: H. E. SCHUSTER (Re-election)
C. E. (Chet) LAYNE
J. A. (Allan) MCGEE

For County Commissioner Precinct 2: JOHN S. WILLIAMS (Re-election)
HAROLD MARDIS

For County Commissioner Precinct 3: D. WARNER (Re-election)
A. L. (Adolph) NEUTZLER

For County Commissioner Precinct 4: JIM CLEMENTS
A. J. (Arthur) SHAFER
W. R. (Bob) ADAMS

MULESHOE SPLITS GAMES WITH SPRING LAKE

Members of the Muleshoe High school girls and boys basketball teams motored to Springlake Friday evening of last week and participated in match games with the high school teams of that school.

The girls game was a fast moving and exciting battle throughout, concluding with the Muleshoe girls in the lead by one point 22-21 while results of the boys game was 12 and 18 in favor of Spring Lake.

Both games were nip and tuck during all quarters with players

TEXAS CITRUS DRIVE

J. Frank Grimes, IGA president, and Betty Roberts, housewife, meet the citrus-cotton surplus problem with smiles. The former explains that his organization plans a nation-wide campaign between Jan. 19 and Feb. 15 to move 1,000 cars of oranges and grapefruit, packed in cotton bags, into consumption, reducing both the state's citrus surplus and the South's cotton over-supply in the same drive. The millions of bags to be used are cotton products.

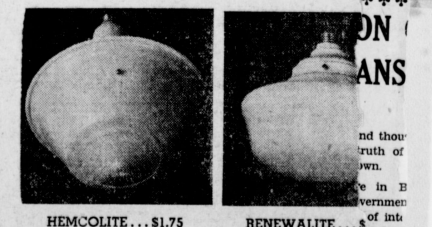

showing fast moving and clever plays. Players on the local teams were accompanied to Spring Lake by their coaches, Mrs. Virginia Brummett and Coach Jack Williams. Several local basketball fans also witnessed the games, according to report.

Edison's Trial With Phonograph Thomas Edison gathered his associates around him in his laboratory when he was ready to try out his little machine for recording sounds—the phonograph. His foreman bet the inventor a box of cigars it wouldn't work. The others looked skeptical, thought it was a joke. "Mary had a little lamb," said Edison into the machine. He then stopped the contraption, relates a writer in the Cleveland Plain Dealer, adjusted the reproducer, set the machine in motion again. And they all heard it cry, "Mary had a little lamb." "Boss, you win," said the foreman.

Russia claims to have more women engineers and scientists.

KEEP EYE YOUNG longer with GOOD LIGHT. The pupil of the eye becomes smaller with age. Consequently, as the birthdays pile up—whether you could care less or not—your eyes need more light. WEEKLY LAY SERMON USE FOR THE USELESS

By JESS MITCHELL

I well remember some twenty-odd years ago when we entered the World war we had it forcibly impressed upon us that we were a careless and wasteful people. We had been enjoying peace and taking life easy for so long a time, we had forgotten how to be thoughtful and saving. The Government told us we had to save and conserve, so we had meatless days and wheatless days. We gathered up all the old newspapers which we were in the habit of burning and sent them to the Red Cross rooms. We snooped around the streets and gutters gathering up all the tinfoil that came around chewing gum, candy and tobacco and sent it to hospitals where it was sold back to manufacturers and the money used to assist the sick and wounded.

Many of us had come to look upon the lowly penny with disdain; but we organized our school children and taught them to save every cent and buy thrift stamps. We gathered up all the peach seeds to be made into gas masks. We ransacked the work-shops for old bits of brass and copper, and the garrets for old clothing which had lain unused for many years. Everywhere we went we kept our eagle eyes watching for something of value that had been discarded. We discovered, that until the hand of industry captured the escaping mass from our cities every year, for years whole fortunes had been escaping through the funnels of locomotives and the smokestacks of great factories until conservation compelled the fugitive smoke to surrender. Its coveted treasures and do further duty. The excesses of the packing houses has been made to yield by-products which have given us thousands of useful articles. It is now said the smokers use every bit of the hog except the squeal.

Decaying logs, rotten boards and saw-mould are used as mulching or the finest grown plants. Welshack took the vast residue accumulating about his factory and turned it into manites for gas lights. William Perkins put his hand into the nightly barrel of coal tar and drew forth the most brilliant colors, along with the brilliant hues of the umbow or the gorgeous tints of the sunset. Ira Remsen found in the same noisome mass a substance which is 500 times sweeter than sugar and called it "saccharine." Madame Curie discovered that common yellow clay was full of radium invaluable for curing many diseases.

While still another scientist discovered that diamonds could be made from common coal dust.

Luther Burbank took the detested prickly cactus and taught it to grow without its sticky spines and then converted it into the most nutritious food. Prof. Daniels informed us there was not a single thing about the cotton plant, from the time it put forth its first emerald leaves until it is gathered and converted into clothing, but which has value of some kind. Thus the testimony of the universe, hand of science and industry is that there are no wastes; that the seemingly most worthless elements contain something of value, and that there is plenty of use for the useless.

When we turn our attention to humanity we also find the seeming wastes of civilization. Society is completely littered with scrap heaps and apparent human garbage. Witness the great army of incompetents the human leaches, the parasites, the criminal, the insane, the imbecile, the very riffraff, the scum, the scoria and off-scouring of mankind. Go through the slums of our great cities and look into the coarse, brutal faces, see the leering eye and the suspicious glance. Behold everywhere the hords of indolent, dispirited and hopeless—the down and outers. Take a look at the great number of well-groomed and socially unproductive who are living massing lives on inflated incomes who seldom do an honest day's work, exciting only contempt for their extravagance and reckless indulgence. They appear to fill no useful place whatever in the world.

Everywhere one sees the poorly clad and the hungry huddled in sheltered places. Some may be thieves and culprits, some professional beggars and hoboes; but many of them are respectable folks without jobs—some whose hopes are dimmed, the parasite, and now lie like a "trif of faded blossoms caught in a slanting rain." From the pampered son of wealth and fashion down to the most despicable of the lowly born all are victims of the system under which they have been compelled to live. Of course, heredity plays some part in their conditions, for many of them are not born well; but environment plus improper social customs and governmental systems is chiefly responsible for most of their misfortune.

It's easier to hand out doles and pensions under the New Deal than to adjust economic conditions so folks may keep their own morale and make their own living. Society is more interested in honoring money than manhood. Business thinks more of the dollar than it does of character. Wealth and indulgence flaunt their excesses before eyes that have become accustomed to but never satisfied with injustice. Our industrial system is honeycombed with discontent. Capital is selfish, while labor is often unreasonable in its demands, and every reasonable person knows something is radically wrong when a few are reveling in luxury and hoarding their spoils while thousands wander homeless and hungry. The situation cannot be justified entirely by the argument of ability, brains and thrift. The competitive system, built so rigidly upon the dollar basis, is fundamentally responsible for much of the distressing economic conditions of the world today.

No one can make me believe that the thousands of people today cast off from society and industry are not without their value. They have genuine worth. The great task of the Church is to assist in discovering that value and finding a place for it. No human being is entirely useless. I am certainly not one of those who believe in total depravity. There should be reclamation for all, and since we have got to the point of conserving waste in material things, of scanning the junk-pile and searching the garbage can for the useful, it is certainly high time we set ourselves to the task of salvaging humanity.

If men were only so much flesh and bone, just such masses of created habits and obdurate wills, then they might well be passed by with-

MRS. MOELLER HOSTESS TO HALF CENTURY CLUB

Mrs. Anna F. Moeller was hostess to members of the Half Century club at her home for an all day meeting Thursday of last week, a covered dish luncheon being served.

The afternoon was spent by guests playing dominoes, 42 and visiting.

Among those present were Mesdames W. H. Kistler, A. P. Stone, Beulah Carles, Mary S. Davis, T. L. Eason, C. C. Mardis, Cora Gliven and Nell Rocky.

Thursday of this week Mrs. Nell Rocky will be hostess to members of the club with an all day meeting and covered dish luncheon at the noon hour. It will be visitors day for the club and each member will bring one guest according to report.

On serious considerations, left to perish upon the scrap-heap of the world, and the sooner they perished and got out of the way, the better off the world would be, but such is not the case. These same men are perfectly amenable to the forces which understand the heart and deal with their better natures, just as atoms and molecules respond to the care and interest of the scientist, and since such is the case, they deserve the help, sympathy and encouragement their fellow creatures can give them.

No matter how scarred and worn may be the exterior, how devitalized the mind or dimmed the heart, every man IS A SOUL. The very meanness the lowliest of human beings bear the imprint of their Creator. There is hidden within him the principle of divinity, just as there is hidden within the coal-lark the sweetness and the beauty the scientist brings forth, and no child of the Eternal who walks this earth, no matter how deep may be the mire into which he may have sunk, is useless. He has some useful place in the world, and in the divine economy, should not be left out.

WPA, PWA, United Charities, soup kitchens, individual charity, penal codes, jails and penitentiaries will not solve the problem. Many of these assuaging measures do not even go half way. Too many of these governmental remedies are merely like putting salve on a cancer without removing its roots, furnishing only temporary alleviation. Back of the hunger, the malicious impulse, the crime, the depravity, there are fundamental and insipient conditions that must be changed and causes that must be removed and favorable substitutions made in their stead.

As a people, we are becoming skilled conservationists in material things, but we haven't yet learned much about dealing with SOUL stuff, and soul stuff is something entirely different from any other stuff on earth. Until we come to understand more about soul stuff, humanity will continue to lie in the scrap-heap and the world's dump-pile. Two thousand years ago there was a man came out of Nazareth who was always seeing values in men everywhere and was finding a potent use for the useless. Call him human or divine or a mixture of both. I care not which; but in all my study of history and human biography I have never discovered his equal. His whole life was one of reclamation. He invariably came into Jerusalem through the sheep gate which led him through the poor quarters of the city where the outcasts made their homes, and everywhere he went he was healing the sick, opening eyes of the blind, unstopping ears of the deaf, encouraging the weak, lifting up the fallen. His whole life was spent among the culs of humanity. He was constantly seeking those in the discard. Everywhere he saw values hidden from ordinary eyes, and his rich charities, his most gracious love was bestowed upon those who felt useless and undone. Three classes of people he was always searching for: the last that might be first, the least that might be greatest and the lost that might be found. The last, the lost, the least—these are the three greatest words in the vocabulary of the worn out and the useless.

I am not among the hopeless of worldly condition. Undoubtedly the great purpose of the Creator is one of uplift, betterment, growth, evolution toward the perfect. All Nature is engaged in that glorious enterprise. For man the flowers bloom, the birds sing, the fields grow a fleecy white or a golden brown under the autumn skies; for man struggle comes to strengthen character and disappointment comes to increase hope. Through the long and painful centuries the world has slowly but surely been moving toward the apex ideal of the Creator. Onward and upward it travels, helped along by kindly overtures of love, humanitarian interests and goodwill. Throughout the centuries God keeps tugging at the heart of mankind and gradually, through the discipline of experience, through the illumination of mind, the tendering of spirit, man learns to trust himself more fully, and, eased by increasing tokens of friendship and sympathy, is being lifted up from ignorance, selfishness, superstition and inherent weakness into the light of a more perfect day.

Army Air Corps Awaits Signal

Wright Field Nerve Center For Expansion of Plane Service.

DAYTON.—When congress gives the signal, the experimental branch of the United States army air corps for Wright field will be ready with contracts for \$50,000,000 worth of airplanes.

Final enactment of the war department's appropriation bill and the secretary of war's signature on these contracts will inaugurate an air corps expansion program that completes 3,000 new fighting planes in two years.

Wright field has been the birthplace of all modernization of the army air corps in the last dozen years, but never has the flying line, the laboratories and testing departments been the scene of such high speed activity as in the early months of 1939.

A staff of 1,000 officers and civilian employees has been working long hours for weeks in preparation for building America's greatest and deadliest sky fleet. Several hundred more employees, from engineers down to shop mechanics, probably will be added when the expansion program gets under way.

Establishment is enlarged. The main laboratory building, with 148,320 square feet of floor space, is being enlarged and rearranged. A new wind tunnel, the largest in the country, which will permit testing a 20-foot plane at unspined of 400 to 500 miles an hour, is planned.

Brake testing facilities have been installed recently. New equipment for testing engines and propellers is expected to be added. Most important tests at the moment are those being made on three attack bombers capable of carrying half a ton of bombs and heavy machine gun armament. With an estimated top speed of 400 miles an hour, these ships, designed by private manufacturers, are expected to be equal or superior to any attack planes ever built. These can be half a ton of bombs and heavy machine gun armament.

Additional strength, General Brett said, will come from the four-engine "flying fortress" bombers. These sky giants will be the answer to the most desperate attack planes ever built. These can be half a ton of bombs and heavy machine gun armament.

Formerly Wright field officers had the viewpoint development that constant advancements in aviation would make mass production of any certain types undesirable. The corps did not want obsolete planes on its hands.

European developments, however, created a demand for a large air force. The policy has been changed to one of standardization on the best of present-day military planes to provide an adequate air defense.

Much of the new personnel coming to Wright field, it is understood, will be attached to a new production department to put manufacture of fighting planes on a mass production basis. Officers to head this department have been assigned here but details of its function are secret.

The emphasis on mass production does not mean that engineering development will lag. Research work will continue on an even greater scale so that swifter, better aircraft will be ready for production when the current best ships are outmoded.

West Camp News

Sunday was regular preaching day at Mineral Wells, formerly of Levelland, is now pastor of the Baptist church here.

Misses Margaret, Nora Lee and Charlie Dotson motored to Clovis, N. M., Saturday.

Mrs. H. H. Copeland who has been at Mineral Wells, for the past two weeks taking treatments, is reported still in ill health.

● UNEXPECTED CHANGE makes available Room 112 in Bailey County. Splendid business secured in this Locality for years. Exceptional opportunity for right man. Write at once. Rawleigh's Dept. TX-533-291 Memphis, Tenn. 1-4tp

● Bob Sanders of Wilson, attended to business in Muleshoe Saturday of last week and reported to friends the arrival of a son, born December 30. Mrs. Sanders is the former Miss Catherine Hanover, who attended school in Muleshoe several years ago and later taught school in the south part of this county.

● Among those from Muleshoe who attended the provisional meeting of the Methodist Church Mission board of this district held in Plainview Tuesday were: Mr. and Mrs. Sam Fox and son Staley, A. C. Gaede, Mesdames Ferrel Little, Finley Pierson, J. F. Wallace, H. D. Bentley, R. N. Edwards Buford Butts Beulah Caries Hattie Jennings, Mills Bartfield and son Claude Wallace, Miss Norma Eirod, and Rev. R. N. Huckabee. Several prominent leaders of the district were present and spoke.

● That Muleshoe has its "high flyers" was vividly demonstrated last Tuesday when H. V. Tull, of the Plainview Machinery Co. Plainview accompanied by Art Chase, pilot dropped his new 4-passenger airplane on the Muleshoe landing field, picking up Misses Elizabeth Harden and Eunice Florence for a sky trip. The skilled pilot lifted his plane and passengers fully 2,000 feet into the air before he leveled off at a speed of 100 miles per hour and started doing aerial stunts which not only turned the ladies over, but also upset their interiors. Miss Florence declared, as they sailed closer toward heaven she could see the Plains and Russia fighting, while Miss Harden, good Methodist-like, began looking behind the fleecy clouds for the golden portals of that Celestial City and imagined she could hear the rustle of angel's wings. Both looked down upon earth in surprised manner to see so many red ants crawling about the surface, but as they gradually and grandly coasted back to terra firma, they discovered they were large bunches of cattle.

The Seasons

When it is winter in the Northern hemisphere it is summer in the Southern, and vice versa. The earth is nearer to the sun during our northern winter than during our summer. But the distance has nothing to do with the seasons. The earth's axis is permanently tilted, with relation to the sun, and it always inclines in the same direction. The equator is inclined to the plane of the earth's orbit at an angle of 23½ degrees, and because of this inclination the sun is high in the sky in summer months and low in the winter. It is the tilt which causes the seasons, for not only does the high altitude in summer cause the days to be longer, but the sun's rays then fall more directly on the earth's surface, making it hotter, instead of being spent, as in the winter, in an oblique course through the atmosphere.

FARM TOPICS

CORN IN SILO IS A GOOD WINTER FEED

Crop Makes More Succulent Roughage Per Acre.

By F. R. Farshaw, Dairy Specialist, North Carolina State College, WNU Service.

Comparatively few farmers take advantage of their corn crop in producing feed for winter consumption. Corn made into silage produces more succulent roughage per acre than any other known crop.

The trench silo is the very thing for small farms where large upright silos would be impractical. Trench silos, inexpensive and convenient, are also being used more and more on farms where large herds are kept.

There is a growing tendency toward silage in preference to dry hays. Unfavorable weather at harvesting time is less serious for silage than when hay is being cut and cured.

Silage is succulent and keeps cattle in good condition through the winter. Silage production requires less acreage and, therefore, permits the use of soil-building crops on land that would otherwise be needed for growing hay.

The construction of a trench silo is fairly simple. A narrow trench should be dug on farms where only a few animals are to be fed. A cheap roof placed over the silo will help protect the feed from bad weather and keeps the walls from wearing in.

liberal Fall Feeding of Cows Increases Profits

Liberal feeding of early fall freshening cows and of all cows during dry period will materially increase the dairyman's income, according to E. A. Hanson, extension ryman, University farm, St. Paul.

Too often the early fall freshening cow is underfed because pastures are low, and to many dairymen it seems too early to start feeding only a few cows. All records, however, show that freshened cows, well fed from beginning lead in year-round high production.

During late summer and early fall hays, alfalfa hay will serve as a supplement if pastures are lently heavy. If pastures are fresh, cows should receive a feed of hay and grain twice daily in order to maintain high production. Silage may be fed to advantage immediately after the silo has been filled.

This season of the year, fall feeding cows are being turned out, and others are rapidly going out because of poor pastures. Dairyman aim to give their cows a dry period of about 6 weeks, thin in fresh when turned dry, D. 1940, in a suit numbered on the docket of said court No. 1264, wherein H. C. Glenn, as Receiver for Temple Trust Company, is plaintiff, and H. E. Adkins, if living, and his unknown heirs and legal representatives, if dead; Mollie A. Gadberrly (wife of W. E. Gadberrly), if living, and her unknown heirs and legal representatives, if dead; S. O. Adkins, if living, and his unknown heirs and legal representatives, if dead; W. E. Gadberrly, if living, and his unknown heirs and legal representatives, if dead; Beatrice Briley (wife of Clyde Briley), if living, and her unknown heirs and legal representatives, if dead; Continental Trust Company, a defunct corporation, and the unknown stockholders of said defunct corporation, are defendants; said petition alleging that plaintiff is lawfully seized and possessed and holds title in fee simple to all of Tracts One (1) and Three (3) of a subdivision of League 184, Swisher County School land, situated in Bailey County, Texas, and containing 369 acres each, or a total of 738 acres. That the names and addresses of the defendants, if living, and their unknown heirs and legal representatives, if dead, are as follows: H. E. Adkins, Mrs. M. E. Adkins and S. O. Adkins, if living, and their unknown heirs and legal representatives, if dead, are asserting some interest in said land by virtue of certain relations contained in deed from T. B. Duggan to C. S. Brown, dated May 16, 1927, and recorded in Vol. 14 at page 546 of the Deed Records of Bailey County, and by reason of having executed an oil and gas lease to certain parts of said land, to one, Clyde Vinson, as shown by an instrument of record in Vol. 1 at pages 524, et seq. of the oil and gas records of Bailey County, Texas; that H. E. Gadberrly and wife, Mollie A. Gadberrly are claiming some interest in said land by virtue of a deed in date December 2, 1926, and recorded in Vol. 14 at page 548 of the Deed Records of Bailey County, Texas;

NOT A NEW BELT BUT A DIET

THE STATE OF TEXAS
TO THE SHERIFF OR ANY CONSTABLE OF BAILEY COUNTY, TEXAS.—GREETING:

YOU ARE HEREBY COMMANDED TO SUMMON H. E. Adkins, if living, and his unknown heirs and legal representatives, if dead; Mrs. E. M. Adkins (wife of H. E. Adkins), if living, and her unknown heirs and legal representatives, if dead; S. O. Adkins, if living, and his unknown heirs and legal representatives, if dead; W. E. Gadberrly, if living, and his unknown heirs and legal representatives, if dead; Mollie A. Gadberrly (wife of W. E. Gadberrly), if living, and her unknown heirs and legal representatives, if dead; Beatrice Briley (wife of Clyde Briley), if living, and her unknown heirs and legal representatives, if dead; and CONTINENTAL TRUST COMPANY, a defunct corporation, and the unknown stockholders of said defunct corporation, by making publication of this citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your county, if there be a newspaper published therein, if not, then in the nearest county where a newspaper is published, to appear at the next regular term of the District Court of Bailey County, Texas, 64th Judicial District of Texas, to be holden at the Courthouse thereof, in the town of Muleshoe, on the 5th Monday in April, 1940, the same being the twenty-ninth day of said month, then and there to answer a petition filed in said court on the 15 day of January, A. D. 1940, in a suit numbered on the docket of said court No. 1264, wherein H. C. Glenn, as Receiver for Temple Trust Company, is plaintiff, and H. E. Adkins, if living, and his unknown heirs and legal representatives, if dead; Mrs. E. M. Adkins (wife of H. E. Adkins), if living, and her unknown heirs and legal representatives, if dead; S. O. Adkins, if living, and his unknown heirs and legal representatives, if dead; W. E. Gadberrly, if living, and his unknown heirs and legal representatives, if dead; Beatrice Briley (wife of Clyde Briley), if living, and her unknown heirs and legal representatives, if dead; and Continental Trust Company, a defunct corporation, and the unknown stockholders of said defunct corporation, are defendants; said petition alleging that plaintiff is lawfully seized and possessed and holds title in fee simple to all of Tracts One (1) and Three (3) of a subdivision of League 184, Swisher County School land, situated in Bailey County, Texas, and containing 369 acres each, or a total of 738 acres. That the names and addresses of the defendants, if living, and their unknown heirs and legal representatives, if dead, are as follows: H. E. Adkins, Mrs. M. E. Adkins and S. O. Adkins, if living, and their unknown heirs and legal representatives, if dead, are asserting some interest in said land by virtue of certain relations contained in deed from T. B. Duggan to C. S. Brown, dated May 16, 1927, and recorded in Vol. 14 at page 546 of the Deed Records of Bailey County, and by reason of having executed an oil and gas lease to certain parts of said land, to one, Clyde Vinson, as shown by an instrument of record in Vol. 1 at pages 524, et seq. of the oil and gas records of Bailey County, Texas; that H. E. Gadberrly and wife, Mollie A. Gadberrly are claiming some interest in said land by virtue of a deed in date December 2, 1926, and recorded in Vol. 14 at page 548 of the Deed Records of Bailey County, Texas;

that Clyde Briley and wife, Beatrice Briley, are claiming some interest in said land by virtue of a defective acknowledgment to a deed dated October 7, 1926, and recorded in Vol. 17, at page 506, of the Deed Records of Bailey County, Texas; and that the unknown stockholders of Continental Trust Company are claiming some interest in said land by virtue of a transfer of certain vendor's lien notes to said corporation, recorded in Vol. 6 at page 225, of the Deed Records of Bailey County, Texas. That the claims of said defendants constitute clouds upon plaintiff's title, and plaintiff pleads the Three, Five and Ten Year Statutes of Limitation as against all said claims, and prays for judgment herein cancelling and removing as clouds upon his title to said property all such claims, and that he be quieted in the title thereto, and for special and general relief.

HEREIN FAIL NOT but have you before said court on the first day of the next term thereof, this writ, with your return thereon showing how you have executed the same.

WITNESS J. J. Williams, Clerk, District Court, Bailey County, Texas, GIVEN UNDER MY HAND AND SEAL OF SAID COURT at office in the town of Muleshoe, Bailey County, Texas, this 15 day of January, A. D. 1940.

(SEAL)

NOTICE OF PUBLICATION OF FINAL ACCOUNT NO. 102, IN THE MATTER OF THE ESTATE OF L. M. COBB, DECEASED, IN PROBATE COURT, COUNTY OF BAILEY, STATE OF TEXAS.

THE STATE OF TEXAS, TO THE SHERIFF OR ANY CONSTABLE OF BAILEY COUNTY.—GREETING:

Mrs. Minnie Cobb and Mrs. Hazel Cobb, Wiseman, Administratrix With Will Annexed, of the Estate of L. M. Cobb, deceased, having filed in our County Court, their final account of the condition of the estate of said L. M. Cobb, deceased, together with an application to be discharged from said Administration, you are hereby commanded, that by publication of this writ once in a newspaper regularly published in the County of Bailey, and said publication shall be not less than ten days, before the return day hereof, you give due notice to all persons interested in the account for final settlement of said estate to file their objections thereto, if any they have, in said Court on or before Monday, the 5th day of February, A. D. 1940, when said account and application will be considered by the Court.

Witness J. J. Williams, Clerk of the County Court of Bailey County, Texas.
Given under my hand and seal of said court, at my office in the town of Muleshoe, Texas, this 17 day of January, A. D. 1940.
J. J. Williams, Clerk, County Court, Bailey County, Texas.
By Bonnie Isaacs, Deputy.
A true copy, I certify.

People who have nothing to do are quickly tired of their own company.

First Dime Card to FDR Honors Double Birthday

"To celebrate your birthday and mine," wrote Ginger Lucas when he mailed the first birthday greeting card to President Roosevelt in Texas' 1940 March of Dimes. Ginger, attending Hockaday Junior College, in Dallas, will be 17 and the President will be 68 on Tuesday, January 30, when nation-wide celebrations in his honor will wage battle against infantile paralysis. The greeting cards, each to be filed with ten dimes, are being distributed throughout the state. Fifty percent of the contributions mailed to the White House will be returned to local chapters for direct assistance to Texas children crippled by the disease, with the balance going for national research and preventive measures.

Courtship in Mexico
Courtship is a fine art in Mexico. A young man who likes a girl at first studiously avoids her. After two or three weeks, he may give her a significant glance. Then comes a night of serenading when he stands outside her window and strums a guitar. Soon after that negotiations begin between her parents and his, and he sends her a rose.

The Groundhog
During his long winter sleep the groundhog—or white pig—uses up about a third of its fat. It needs the other two-thirds "to go on" when it comes out of hibernation, until nature provides its normal diet of growing things.

Ventriloquism
Voice cannot be produced by a ventriloquist in the stomach or anywhere except in the larynx. In ventriloquism the speaker takes a full breath, keeps the muscles of the chest, neck, lower jaw and lips as motionless as possible, and speaks with the mouth almost closed and the glottis narrowed, not allowing the air to escape through the nose. The lower lip is slightly retracted and rested against the upper teeth and the tongue articulations are greatly altered. Much of the deception depends on suggestion as to the source of the sounds.

Russia plans to double its production of electric power by 1943.

PROGRESS CLUB HONORS MRS. A. L. SWANSON

The Progress H. D. club met in the home of Mrs. Jim Cook, Jan. 16 to begin our work for 1940. Miss Lillie Gentry was with us and gave an interesting as well as helpful talk on our "Home Food Supply." She insisted that we try more and new varieties of vegetables in our gardens this year. This would help us to serve more balanced meals to our families.

We filled out our year books and the president appointed the different committees. It seems we will have a full year of interesting and educational work. A shower was given to Mrs. A. L. Swanson who before her recent marriage was Miss Margaret Ann Cook. She received many lovely gifts. Forty guests attended the meeting, and Mrs. Marie Malty was added to the club roll.

Our next meeting will be with Mrs. W. G. Kennedy, Feb. 6th. Everyone is invited to attend.

Muleshoe Will Take Part In Sudan BB Tourney

The Muleshoe High school girls and boys basketball teams will participate in Sudan's sixth annual invitation tournament to be played at the Sudan High school gymnasium, beginning tonight (Thursday) at six o'clock. Games will continue throughout Friday and Saturday with the finals Saturday night.

Sixty-three awards will be made Saturday night, and trophies are to be given for first, second and consolation winners in both boys and girls divisions.

Individual awards will be gold basketballs engraved with the word "Champions" for the winners of both divisions, silver basketballs for the second-place winners, and gold basketballs marked "1940" for players making the all-tournament teams. Referee awards in gold, silver and bronze will be presented for "best sports" in the games.

The Muleshoe teams are hoping to return home with some of the above named awards, according to report.

A schedule had not been received in Muleshoe when this paper went to press by either Coach Jack Williams, or Mrs. Virginia Brunnett, local girls coach and it is not definitely known when Muleshoe will participate in their first games.

Among teams who will participate in the tournament are girls and boys from Amherst, Littlefield, Springlake, Spade, Lazbudy and Sudan; girls teams from Lockney and boys teams from Levelland and Bula.

College Education Pays, Alumni Show Find Better Jobs, Quicker, Survey Finds.

WASHINGTON.—Proof that a college education pays dividends has been found in a survey of 46,000 alumni graduated from 31 colleges and universities in the United States. The report was announced by John W. Studebaker, United States commissioner of education.

The survey covered graduates from 1928 to 1935. The survey showed that 96 per cent of all the men and 93 per cent of all the women were employed either temporarily or permanently. Their average age upon graduation was 22 years.

Among the 46,000 who replied to questionnaires, only 2 per cent of the men and 1 per cent of the women have been on relief.

Salary scales paid to college men generally were higher than paid to women, although older college women earn more than young college men. The typical salary of a male college graduate the second year out of school was found to be \$25 a week, while the average woman graduate two years out of school could command only \$21.

Salaries paid to men were found to increase about \$15 a year until they were earning about \$45 a week eight years after graduation, while women's salaries increased only \$9 a week to \$30 after eight years.

Sixty-five per cent of the alumni reported themselves in the professional groups. Teaching attracted 17 per cent of the men; engineering, 13 per cent; law, 9 per cent, and medicine, 6 per cent.

Forty-eight per cent of women graduates found teaching positions, while 29 per cent had general occupations, including 16 per cent in domestic work.

Damages Asked of City For the Effects of 'Flu' SEMINOLE, OKLA.—Mrs. Addie Womack thinks the city of Seminole should pay her \$5,075 damages, because, she says, it is the cause of her being susceptible to colds.

She filed a damage suit for that amount against the city, and cited the following events to "prove my claim": Municipal workmen dug a ditch across the back lot of her home. She alleges the workers broke a gas line running to her home and that she was without heat for 2 1/2 days.

Mrs. Womack, 44, contends that she contracted influenza during the period the gas line was broken. This caused her, she alleges, to become susceptible to "exposure."

Texas Co-eds Slender; Weight Below Average AUSTIN, TEXAS.—Texas college girls are more slender than co-eds of the "corn belt" and the North, Miss Leah Greig, physical education director at the University of Texas, has revealed.

Average weight for college girls in America is 121 pounds, Miss Greig said, based on average height of 5 feet 4 inches. The average University of Texas freshman co-ed is 17 years old and weighs 115 pounds, at least six pounds under the average poundage for girls in Middle West and Northern colleges.

Sixty-one per cent of Texas girls are five pounds or more underweight and 42 per cent 10 pounds or more under 121 pounds.

Average Typist Expends More Energy Than Digger CLEVELAND.—The average typist, by actual scientific tests, does more work than a ditch-digger, according to Frank M. Slough, Cleveland patent attorney.

"When the effort required to strike a typewriter key is multiplied by the thousands of key-depressions per day," said Slough, "the total effort actually is greater than that required in eight hours of ditch digging."

Slough said that a young Cleveland man had invented a revolutionary electrical typewriter, "simpler, cheaper to manufacture, easier to operate—with interchangeable typeface, and many other advantages."

Future Home Life Revealed NEW YORK.—"Tomorrow Town" at the New York World's fair reveals how the community of the future will function. The "Town" covers five acres. Fifteen homes are being erected to give spectators an idea of what to expect for prices ranging from \$3,000 to \$17,000.

Two Unrelated Girls Can Qualify as Twins KEARNEY, NEB.—Miss Maxine Samuelson of Wilcox, Neb., and Miss Maxine Samuelson of Elm Creek, Neb., aren't related, but they could be twins. Both were born February 21, 1921; both are blondes; both are seniors in high school; both are of Swedish descent and both live on farms. Added to that, the middle name of their fathers is Theodore and the initials of their mothers are E. M. S. The girls live within a 25-mile radius of Kearney and have corresponded since they were young, but did not meet until recently.

An Early Treatment Of Colds Is Wise Says St. Doctor

Austin, Jan. 23.—Prevalence of colds and pneumonia at this season has prompted Dr. Geo. W. Cox, state health officer, to outline generalized preventive precautions against the disease in the hope of reducing its incidence in Texas.

"Most of us know how serious pneumonia is, but not every one realizes it is particularly dangerous for babies and young children. A child under one year of age who has pneumonia is very much more likely to die than an older child," Dr. Cox warned.

"Through the use of a new drug and serum, doctors and health workers hope to save many lives this year, which would have been lost in the past. The State Health Department is cooperating with the medical profession of Texas in using this drug to best advantage in treatment of pneumonia.

"Improvement in treatment will save many lives, but more could be saved if children and adults were protected against contraction of pneumonia in the first place.

"A few simple precautions should be followed: no person with a cold should be allowed to handle or even come close to a baby. The rule should apply to relatives as well as friends. If the mother, or other person taking care of the baby, has a cold, she should wear a mask and be especially careful about washing her hands before touching the baby.

"Children in general good health are in a much better position to fight off an infection than those not in the best condition. The best and surest way to secure good health for a child is to keep him or her under the regular supervision of the family physician.

"In short, insure good general health by having the child under regular supervision; do everything possible to prevent colds; if a cold does develop, do not use any medicines or drops except under a doctor's orders; if the child seems ill, call the doctor without delay."

A. L. SWANSON BRIDE SHOWER HONOREE Mrs. W. E. Renfrow was hostess at her home Thursday afternoon of last week with a miscellaneous bridal shower in honor of Mrs. A. L. Swanson who was formerly Miss Margaret Ann Cook.

A clever letter writing contest was an attraction of the afternoons entertainment with guests present writing a farmer's letter to his sweetheart, Mrs. Jim Cook, and Mrs. Beulah Charles won the contest, but the prize was presented to the honoree, Mrs. Swanson.

The honoree was recipient of many beautiful and useful gifts presented her by guests present and many who did not attend sent gifts.
