## Tips on Income Tax Returns

**By Your County Agent**  
Farmers, who sold livestock from their breeding herd this year are taxed only 50% of the sale value of these animals. The animal must be owned by the seller for at least six months prior to the sale. Heretofore, you were taxed 100% on all livestock sales.

The new tax range applies to livestock used for dairying, breeding and work, also covers animals raised on the farm or purchased. It is applicable whether the cash or accrual method of reporting is used.

It seems pretty certain that calves and yearlings cannot qualify for this ruling even though a farmer expects to make them a part of his breeding herd. Also market animals or this culled from the herd as feeder or slaughter animals cannot be so considered. Only animals in the

breeding herd are considered. If a farmer or rancher is not certain about some particular transaction a letter to the Collector of Internal Revenue at Austin or Dallas, Texas, may save money in the form of tax. Farmer may make final returns on or before Jan. 15, thus saving the time required in filing a declaration which is due on this date. Final returns are due March 15, but by making final in Jan. 15 you save filing one report and the tax, if any, that is due, must be paid on Jan. 15 anyway.
