

## Warren Opens New Pay Zone In Pecos Pool

Joe H. Warren Jr. of Dallas has filed potential test with the Railroad Commission of Texas office in Midland for his No. 1 Mobil Fee, recently completed San Andres oiler in Pecos County.

The well, bottomed at 4,170 feet and plugged back to 2,461 feet, was completed for a 24-hour flowing potential of 67 barrels of oil per day, through a 20-64-inch choke and perforations from 2,290 to 2,301 feet.

Operator set 5½-inch casing at 1,804 feet.

No. 1 Mobil Fee is one location northeast of Clearfork production in the Four C field.

Wellsite is nine miles east of Imperial, 660 feet from south and west lines of section 35, block 9, H&GN survey.

## Reentry Tests Set In Howard

A pair of wildcats, both reentry projects, have been announced in Howard County.

Earlboro Oil & Gas Co., Inc., of Oklahoma City will drill a 7,300-foot operation ¼ mile southwest of the depleted O'Daniel (Wolfcamp and Canyon) field.

The new test is No. 1 McGillis, 1,980 feet from north and east lines of section 10, block 30, T-1-N, T&P survey, and six miles northeast of Coahoma.

The project originally was drilled by Shell Oil Co. as No. 1 McGillis and plugged and abandoned in 1952 at 8,666 feet.

Tom D. Fowler of Midland will reenter a former Fussell producer in the Morgan Ranch field five miles southeast of Big Spring and test above 4,250 feet.

The project is No. 1-E Morgan, 540 feet from north and 2,177 feet from west lines of section 34, block 32, T-1-S, T&P survey. The well was recompleted in June, 1975 as a Sparberry discovery in the Morgan Ranch field.

## Amoco Sets Site In Winkler Area

Amoco Production Co. spotted location for a 12,500-foot project in the Flying W, Southeast (Ellenburger) Field of Winkler County, 17 miles northeast of Kermit.

Drillsite is one location southeast of the lone Ellenburger well and one location southeast of Devonian production in the multipoint field.

Location is 1,200 feet from north and 301 feet from west lines of section 26, block 46, T-1-N, T&P survey.

## Sterling Gains Wildcat, Gasser

Sterling County has gained a wildcat location and a new well in the Conger (Canyon) gas field.

The wildcat is Marathon Oil Co. No. 1-6 Hannah B. Bailey.

Scheduled for an 8,400-foot bottom, it is 1,320 feet from south and 6,000 feet from west lines of Moses Herrin survey No. 6 and 20 miles southwest of Sterling City.

Site is 4½ miles southeast

## Whisky Heir Found Safe; Two Men Charged In Plot

By HENRIETTA LEITH

NEW YORK (AP) — Kidnapped whisky heir Samuel Bronfman II was in safe seclusion at his mother's mansion today as officials showed the press the authorities discounted an alleged kidnaper's story that two men still at large planned the snatch.

Dominic Byrne, 53, who with Melvin Patrick Lynch, a 37-year-old city fireman, is being held on charges of extortion and illegal use of the mails, has reportedly told police and the FBI the two unidentified men commanded his car for the caper.

Despite Byrne's claim that two other kidnappers remain at large, FBI assistant director J. LaPrade said no other penalties of life imprisonment.

suspects were being sought and no further arrests were expected.

At a news conference Sunday, his mother's mansion today as officials showed the press the authorities discounted an alleged kidnaper's story that two men still at large planned the snatch.

Bryne and Lynch, both Irish-born, naturalized American citizens, were to be arraigned today. Authorities said federal charges of kidnapping were not filed because the victim was not taken across state lines.

But there remain possible state large, FBI assistant director J. LaPrade said no other penalties of life imprisonment.

New York City Police Commissioner Michael Codd said law enforcement officials and U.S. State Department intelligence agents are checking the possibility that the two men intended to give part of the ransom to the Irish Republican Army. LaPrade discounted any IRA connection.

Samuel Bronfman, 21, after shaving his eight-day beard and showering at the Fifth Avenue apartment of his father, Seagram chairman Edgar Bronfman, went by helicopter to the family estate at Yorktown Heights in Westchester County Sunday afternoon, accompanied by his father.

There the young man was met and embraced by his di-

vorce mother, Ann Margaret Leob Bronfman. He spent the night at her home in nearby Purchase, where he was living at the time he was seized.

A family friend, Jonathan Rinehart, said that at the news of Samuel's rescue, "there was a lot of smiling, a hell of a lot of smiling."

Another family friend in Yorktown Heights, Peter Kaufman, told reporters that family members came together in the middle of the living room and "almost went through the ceiling" in a burst of joy." Jose Louis, the family butler, opened champagne for the celebration.

Both at the apartment and the estate the Bronfmans declined to talk with newsmen, but the 6-foot-2 younger Bronfman, clad in work shirt and jeans, appeared unharmed.

LaPrade said it was "absolutely" untrue that Samuel had been "buried" with a 10-day supply of water and air as the kidnappers had claimed in a ransom note to Edgar Bronfman last Monday.

The young heir to part of the billion-dollar Seagrams whisky fortune was found in Lynch's Brooklyn apartment early Sunday. He was rescued about 24 hours after his father had delivered the ransom, one of the largest in U.S. history, to two men in a car in the Woodside, Queens, section of New York City.

A woman FBI agent in the car with the elder Bronfman reportedly got the ransom car's license number and city police traced the license to Lynch. The car was found parked outside his apartment house.

The FBI staked out the car, but it was not until Byrne's 17-year-old daughter, Mary, appeared in a stationhouse with a note from her father that the case was cracked.

City detectives returned with the girl to the Bryne home, around the corner from the Lynch apartment where, unknown to them, young Bronfman was staying.

### END OF CONTROLS ANTICIPATED

## 3-Cent Fuel Hike Seen

WASHINGTON (AP) — The petroleum products in the United States.

But President Ford has said he would soften the blow by removing fees of \$2-per-barrel which he imposed on imported crude oil earlier this year. Zausner said this would reduce the consumer price by about three cents per gallon.

This official estimate was presented by Deputy Administrator Eric Zausner, who said he thought the world oil market would not allow price increases that would cancel out the removal of U.S. import fees.

The official estimate was in line with earlier unofficial reports on the expected impact of the removal of controls.

The controls, which now limit the price of about 60 per cent of U.S. domestic oil to \$5.25 per barrel, were due to expire Aug. 31. This would allow the price to increase to prevailing market levels of around \$12 per barrel.

He said the price increase would prompt Americans to conserve some 700,000 barrels of oil daily by the end of 1977. This increase alone, Zausner said, would add about six cents per gallon to the average price of gasoline, fuel oil and other

consumption by the end of 1977 could be held about 1.5 million barrels per day below forecast levels.

Congress has voted to extend oil price controls beyond the Aug. 31 expiration date, but President Ford said he would veto the extension and Zausner said the administration thinks the veto would be sustained in Congress.

Presidential energy advisors predicted that the price increase would be "roughly three cents" shortly after Ford announced his intention Friday to veto the bill to extend price controls.

Energy Administrator Frank Zarb and economic advisor Alan Greenspan said the increase would not come quickly, but would be a gradual rise over a period of one to nine months.

Zausner said the full impact of the resulting price increases could be felt within one or two months or could stretch out as long as six to nine months depending on market conditions.

## 27 States Holding Back Social Security Money

WASHINGTON (AP) — Twenty-seven states are withholding a total of \$206 million from the Social Security Administration in a dispute over the government's new Supplemental Security Income welfare program. The Washington Star said today.

The newspaper contends it has found records of some \$403 million in overpayments in the SS program, but Social Security

officials say the overpayment figure is about \$265 million, much of which has been or can be recovered.

In a list of states that the government says owe the SSI program money, New York and California were the leaders. The Star said New York owes the program more than \$100 million and California has not paid more than \$80 million.

Jerold A. Prod, until last month California's acting director of benefit payments, said he estimates that \$25 million in payments were made in his state to persons who were ineligible for aid, the Star said.

The newspaper quoted Prod as saying he found the federal officials reluctant to change errors and that the easiest way to hold down overpayments was for California to withhold paying its share of the SSI bill each month.

Stephen Berger, acting commissioner of the New York Department of Social Services, said an audit of state and federal records showed that New York owes about \$25 million, but most of the state's debt is accounted for by subtracting federal overpayment errors, the Star said.

Officials said three of the inspected vessels were in complete compliance with the law; five others had minor infractions which were referred to Soviet inspector ships.

If convicted, Nikonoroff faces a maximum one-year prison term and \$100,000 fine. The government also could confiscate the vessel and its catch.

The seizure was the sixth this year since the government stepped up enforcement of the vessel and its catch.

### LATE BULLETINS

AUSTIN (AP) — A Senate committee preparing rules for the impeachment trial of District Court Judge O. P. Carrillo voted today to make provisions for live radio broadcast of the proceedings.

OMAHA, Neb. (AP) — American Beef Packers (ABP) president and founder Frank R. West and Robert E. Lee, ABP vice president of livestock procurement, surrendered to Douglas County authorities Monday morning under a multicount indictment handed down last week by a Pottawattamie County, Iowa, grand jury.

When the price the farmers gets for his raw milk, which has been steadily rising since early July, makes its seasonal decline in the spring, processors and bottlers of the milk probably will not pass on that decline to the retail market because of the need to pay for higher marketing costs, Healy predicted.

The boost at the farm level now, however, will be reflected as soon as the industry structure allows — probably in about two months.

### Milk Prices Due To Rise

WASHINGTON (AP) — The price consumers pay for milk at supermarkets will increase by up to four cents a half gallon by winter and stay there, a milk industry spokesman said today.

Patrick Healy of the National Milk Producers Federation said the trade association felt consumers should know about the coming price hikes now, before they begin to see them next month.

When the price the farmers gets for his raw milk, which has been steadily rising since early July, makes its seasonal decline in the spring, processors and bottlers of the milk probably will not pass on that decline to the retail market because of the need to pay for higher marketing costs, Healy predicted.

The boost at the farm level now, however, will be reflected as soon as the industry structure allows — probably in about two months.

By WILLIAM P. BARRETT

PHILADELPHIA (AP) — Three firemen caught in a sudden flash of flames during a spectacular refinery blaze were turned into human torches. All three died.

At least three more firemen were missing and five firemen were among the 13 persons injured in the fire that started Sunday and still burned out of control today at the Gulf Oil refinery.

The blaze at the second largest refinery on the East Coast could be seen for 20 miles. Flames covering an area about a half-mile square roared into a Co. refinery spreading cloud of black smoke.

"The flames just engulfed them," said Fire Commissioner Joseph Rizzo, describing how dawn when an 80,000-barrel

storage tank ignited while being filled with oil from a tanker. The ship was not damaged and the fire was brought under control by 9 a.m.

Clean-up crews moved in. They spent the day pouring chemical foam onto the smoldering tank. The firemen were relaxed. There was no apparent danger.

But according to Jack Burk, manager of the refinery, the facility's sewage system failed to drain off oil that was spilled

Within minutes the fire jumped to 11 alarms, activating 600 fire fighters.

Flames scorched the Penrose Avenue Bridge over the Schuylkill River, a key commuter artery into the city and the main route between downtown Philadelphia and Philadelphia International Airport.

Inmate at Huntsville has first visitor after 43 years in prison.

U.S. Rep. George Mahon (right) confers with Midland oilmen Ford Chapman, center, and Bob Bailey before a session on petroleum legislation at the Midland Petroleum Club today.

**Mahon Says**

## **Oilmen Need To Influence Voters, Not Congressmen**

By GEORGE MASSEY

U.S. Rep. George Mahon, D-Lubbock, told Midland oilmen that the petroleum industry is going about things the wrong way in trying to influence legislation concerning the decontrol of oil prices.

Mahon indicated the oil industry should be trying to influence the voter — not congressmen.

The Midland oilmen, as a majority, voiced opinions that if members of Congress would "just come out here and take a look at what we're faced with," then they would support us with good petroleum related legislation.

But the 40-year senior congressman indicated time and again that the individual congressmen are going to be "swayed" by their "constituents." He said the constituents are the voters, and those congressmen are going to be very "careful" in the way they vote because they "have to please their constituents — the voters who elect them to office."

Congressman Mahon stood at

**Former Midlander Dies At Lubbock**

E. C. "Buster" Lester of Levilland and formerly of Midland died Sunday in a Lubbock hospital. He was 68.

Services will be at 3 p.m. Tuesday in Levilland.

Lester was a Mobil pipeline employee and a resident of Midland for many years before moving to Levilland.

Survivors include the widow, a son, four daughters, one brother, two sisters, Mrs. Minnie Richman and Mrs. Thelma Rinehart, both of Midland, 13 grandchildren and three great-grandchildren.

The majority of the House

was given away to exresidents of the house. The two left are Cognac and Blackberry.

"We may run out of brandy names and switch to fine wines," says Ryan.

Doug Ten Eyck, 33, who has lived at the home since last September, keeps a loving eye on all the dogs. Instead of an empty bottle, a "Handbook of Dog Care" sits on his dresser.

Ryan takes Brandy home, but the rest of the dogs — 15 at present — share Ten Eyck's small room.

"When I came here I was really bad. I didn't trust nobody," he said. "I was lonely. I didn't talk to nobody. I was in a shell."

Now his face lights up and his voice becomes animated when he tells anecdotes about the dogs. Ryan credits them with helping Ten Eyck stay sober since he's been at the home.

Ryan says the Guenster Home, a former convent on a residential, tree-lined street, is a "home, not an institution." He says he's tried to create a happy atmosphere by dishing out good food, buying new furniture and keeping the house clean. The dogs help make the atmosphere more like home, he says.

## **Brandy, Cognac Assist Alcoholics**

By HOWARD ULMAN

BRIDGEPORT, Conn. (AP) — A halfway house for alcoholics has found a slightly tipsy way to help win the battle of the bottle — dogs named Brandy, Ginger, Blackberry and Cognac.

Many people turn to alcohol because humans are not satisfying their emotional needs, says Bob Ryan, executive director of the Guenster Home and himself a reformed alcoholic.

"Feed a dog, watch him shake his tail ... they never take you for granted," he says. "Everybody's been telling you what you've been doing wrong. A dog doesn't say anything. He just loves you."

Ryan bought a Labrador retriever for the house the day after Christmas in 1973 to help the residents get through the post-holiday drowses. Appropriately, it had been named Brandy, he says.

Three months later, a woman offered Ryan a female Labrador and the residents called her Ginger, "because of ginger brandy," Ryan says.

Ginger had a first litter of 10 pups last October and a second litter of 12 on July 10. Most of the first litter

was able to make this thing fly." Lamesa will build, equip and administer its own school. However, the school will draw heavily from area colleges and universities for teaching personnel.

Colleges are located in Big Spring, Lubbock, Snyder, Midland, Odessa and Hobbs—all of which are about 50 miles

from Lamesa. The first courses offered by the center will be coordinated by Howard College of Big Spring. Crawley said Howard College has operated an extension program in Lamesa since January, 1973. The ex-

## **Boston School Officials Expected In Court Today**

By The Associated Press

Boston school officials were ordered to appear in federal court today to explain their plans for beginning classes next month under the second stage of a desegregation program that will include expanded busing.

In Detroit, meanwhile, civil rights leaders prepared for appeals of a school desegregation order that ruled out any immediate busing program and a federal judge was scheduled to review a Kentucky desegregation plan later this week.

The Boston busing program began last fall and prompted racial tension and violence that continued over the summer. U.S. District Court Judge W. Arthur Garrity already has postponed the opening of school for five days to allow time to prepare for classroom assignments.

On Friday, he ordered members of the Boston School Committee and 13 other officials to appear in court after being told that schools might not be ready to open on time, even under the revised schedule.

A little more than 30 per cent of the 84,000 pupils in Boston's schools are scheduled to be bused this fall, about 8,000 more than last year.

The Detroit ruling, by U.S. District Court Judge Robert E.

DeMascio on Saturday, rejected two proposed desegregation plans that would have involved busing this fall for the 260,000-pupil school system, 74 per cent of which is black. DeMascio gave the Board of Education responsibility for achieving racial balance in the schools and issued guidelines for officials to follow.

At least three cities — Dayton, Ohio; Louisville, Ky.; and Jackson, Tenn. — are beginning court-ordered busing for desegregation this fall and authorities in Philadelphia and Dallas are considering integration plans that could result in busing later.

Jefferson County, Ky., Judge Todd Hollenbach has asked that

a review of the desegregation plan this week.

An Associated Press survey has shown that most of the opposition that greeted pre-1974 busing plans has died down, although there has been a sharp decline in white enrollment in a few cities.

Officials in Denver, Colo., are preparing for the second year of a busing program that sparked a one-day boycott before the plan went into effect, but caused little stir after classes actually opened.

## Warren Opens New Pay Zone In Pecos Pool

Joe H. Warren Jr. of Dallas has filed potential test with the Railroad Commission of Texas office in Midland for his No. 1 Mobil Fee, recently completed San Andres oiler in Pecos County.

The well, bottomed at 4,170 feet and plugged back to 2,461 feet, was completed for a 24-hour flowing potential of 67 barrels of oil per day, through a 20-64-inch choke and perforations from 2,290 to 2,301 feet.

Operator set 5½-inch casing at 1,604 feet.

No. 1 Mobil Fee is one location northeast of Clearfork production in the Four C field.

Wellsite is nine miles east of Imperial, 660 feet from south and west lines of section 35, block 9, H&GN survey.

## School Budget Hearing Scheduled Tomorrow

A public hearing on the \$18-million budget proposed for the schools' trustees will consider the adoption of the budget, which is a 17.4 per cent increase over the \$15.4 million expended in year will be held at 1:30 p.m. Tuesday in the Administration Building, 702 N. N St.

Following the airing, the

stands at \$1.42½ per \$100 valuation on assessments of \$580 million.

The collection rate is estimated at 97 per cent.

Additional school board business outlined on the agenda

includes action on petitions requesting the board to call a bond-issue election to air-condition the schools, bids on school equipment, and the setting of the minimum number of days a student must attend class to receive course credit.

Following the airing, the

trustees also are to set the school year's tax rate, which

is a 17.4 per cent increase over the \$15.4 million expended in

1974-75.

In regular session, the

trustees also are to set the

school year's tax rate, which

is a 17.4 per cent increase over the \$15.4 million expended in

1974-75.

# Kissinger Says New Mid-East Talks May Produce 'Significant' Results

By BARTON REPPERT  
Associated Press Writer

WASHINGTON (AP) — Secretary of State Henry A. Kissinger says his new round of talks for Israel and later meet shuttle diplomacy stands a good chance of achieving an interim Israel-Egypt accord that will be "a significant step toward peace in the Middle East."

Negotiations have progressed to the point where all parties believe it would be useful for him to return to the Middle East "in an effort to bring the talks to a successful conclusion," Kissinger said Sunday.

However, a communiqué issued after a four-hour cabinet meeting in Jerusalem said there are "important issues

still to be settled" in trying to reach a new interim accord for disengagement of Israeli and Egyptian forces in Sinai.

Informed sources said several cabinet ministers were dissatisfied with terms of the agreement, contending that Israel was being shortchanged.

Israeli Foreign Minister Yigal Allon said later that he welcomed Kissinger's return to the Mideast but "there are still problems of clarification and agreement."

"I have worked many hours with the secretary of state analyzing and assessing the situation in the Middle East, and I have now directed him to return to that region in an effort to bring the discussions to a successful conclusion."

"I am hopeful that the parties will successfully conclude an interim agreement which not only would be in the best interest of the parties involved,

but also in the best interest of the entire Middle East region and indeed of the whole world."

At the Rocky Mountain resort where he is on a two-week working vacation, President Ford said in a statement Sunday:

"I have worked many hours with the secretary of state analyzing and assessing the situation in the Middle East, and I have now directed him to return to that region in an effort to bring the discussions to a successful conclusion."

"I am hopeful that the parties will successfully conclude an interim agreement which not only would be in the best interest of the parties involved,

"American participation would be entirely technical."

Kissinger noted there would also be a United Nations force interposed between Egyptian and Israeli troops "in a zone of greater depth than has ever existed between hostile forces in the Middle East."

Israeli sources said that in return for Israel's withdrawal eastward in Sinai, under the proposed agreement Egypt must pledge to ease its diplomatic and economic warfare against Israel and formally declare "non-use of force" to solve Mideast disputes.

## Doris Martin, Gary Horne Married In Shreveport

SHREVEPORT, La. — Doris Ann Martin, daughter of Mr. and Mrs. Leo E. Martin of Chopin, and Gary Allen Horne, son of Mr. and Mrs. Morris Horne of 2409 Camarillo St., Midland, Tex., were married at 2 p.m. Saturday in the Shreve City Baptist Church. The Rev. Charles Byles of the Berean Baptist Church officiated.

The bride has a bachelor of science degree from Northwestern State University and a master of science degree from Louisiana State University.

The bridegroom, who is a lieutenant in the U.S. Air Force, attended North Texas State University and was graduated from Texas Tech University. He is stationed at Barksdale Air Force Base.

After a trip to New Mexico, the couple will reside at 1709 Capt. Shreve Drive.

Betty Martin of Marion, Ala., sister of the bride, was the

Lady Bird's Gown  
Added To TWU  
Historical Exhibit

DENTON — A formal gown worn by Mrs. Lyndon B. Johnson in the White House, while her husband was President of the United States, has been put on display in the Historic Costumes and Furnishings Collection of Texas Woman's University.

The dress was created by the well-known couturier Stratropoulos of New York and Greece.

The floor-length gown, which has a bateau neckline, is made of pale green lame with soft pink flowers, covered with one layer of pastel green chiffon and one layer of ivory chiffon. The unusual sleeves are floating panels made of two layers of chiffon, with the top layer being the same ivory as the gown and the underlayer a soft lime green.

"This gown is a perfect example of understated elegance," according to Dr. Bethel Caster, associate professor of textile design at TWU. "I would say that is probably the simplest garment in the collection. Yet it is wonderful to see how it is made."

The display of Mrs. Johnson's gown is an important addition to TWU's Historic Costumes and Furnishings Collection, which, among other things, includes either the actual garments or faithful copies of the gowns worn by the wives of most of the governors of Texas and the presidents of the Republic of Texas at their inaugurations.

Mrs. Johnson's gown becomes the second dress worn in the White House by the wife of a president to be displayed at TWU. In 1974, Mrs. Dwight D. Eisenhower donated a formal gown created for her in 1950 to the TWU collection. In addition, a dress worn at a White House formal dinner by Mrs. John Nance Garner, wife of the vice president of the United States 1933-1940, has been on display in the collection for many years.

The TWU collection, the only one of its type in existence, is being updated to include gowns, accessories and other historic items connected with famous Texas women.

## HOROSCOPE

By CARROLL RIGHTER

(Aug. 20)

**GENERAL TENDENCIES:** Despite an early morning annoyance the rest of the day you will be able to handle your personal demands. Make yourself available to a new contact who can be helpful to you.

**ARIES** (Mar. 21 to Apr. 19) Avoid an irate associate in the morning and the rest of the day goes smoothly for you. Be more positive minded.

**TAURUS** (Apr. 20 to May 20) Do not let partying get in the way of what needs to be done. Strive for happiness with love.

**GEMINI** (May 21 to June 21) You can make real progress where new situations are concerned. Early in the day you will be able to do what you now. Show increased devotion to mate.

**CANCER** (June 22 to July 22) Hypnotically it is wise to be on the morning. Keep any promises you have made to an affectionate mate.

**LEO** (July 23 to Aug. 22) Know what is expected of you by associates and then you can coordinate efforts more intelligently. Use common sense.

## Dear Abby Grandparents Should Accept Decision

— By Abigail van Buren

DEAR ABBY: Here is our maid of honor, and Mrs. Samuel Hollingsworth of Memphis, Tenn., sister of the bride, was the bridesmatron.

Bill Horne, student at Texas A&M University, was best man for his brother. The groomsman was Capt. Christopher Kurle of Barksdale AFB, and the ushers were Lt. Douglas Williams and Leo Martin of Barksdale AFB.

Organist for the ceremony was Allen Kelly. Mrs. Allen Kelly was the soloist.

Presented in marriage at the double ring ceremony by her father, the bride wore a gown of white silk organza with appliqued Venise lace. The bodice had a wedding ring collar and sheer yoke. A Juliet cap held her chapel-length veil. She carried an orchid bouquet.

The reception was held in the church.

### One-Day Deadline Given For News

The Women's News Department of The Reporter-Telegram announces a one-day deadline for submitting reports on parties, club meetings and other news items for the women's pages.

Due to limited space and the continuing rise in cost of publication, the department is publishing only news of current events.

Tuesday

Alamo Heights Baptist WMU, 9:30 a.m. church.

Ashbury United Methodist WSCS, 9:30 a.m. church.

Midkiff Baptist WMU, 9:30 a.m. church.

### Altrusa Club Conducts Business

The Altrusa Club of Midland, Inc., met recently in Sheraton Inn for a business session and to hear a report on the organization's international convention attended by Mrs. W. N. Keisling in Houston.

Mrs. J. P. H. McMullan Jr., president, presided. The club voted to conduct game parties at the Permian Lodge Nursing Home three nights each month and to pay the state board examination fee for a licensed vocational nurse, who will graduate from nursing school in August.

A donation to the International Founders Fund Vocational Aid program was made in memory of Mrs. Linnie Davidson, former past president of the club.

### White Elephant Exchange Held In Country Club

The Permian Basin Geological-Geophysical Auxiliary had a brunch and white elephant exchange recently in Midland Country Club. "Kome to the Kounty Fair" was the theme of the meeting, attended by 58 members and guests.

Mrs. William E. Hendon and Mrs. John C. Ryan were co-chairmen. The hostesses were Mrs. Carl Dean Flatt, Mrs. Billy G. Finch, Mrs. Carl F. Geron, Mrs. Reginald L. Lyle, Mrs. Tom Moore, Mrs. L. Kelly Turner and Mrs. G. F. "Bud" Wilson.

Debbie Wolfe, Mrs. H. A. Waters, Mrs. Pat Newbrough and Mrs. D. H. Cramer were the guests.

Mrs. Leo Denny was welcomed as a new member. The membership prize was won by Mrs. Hugh Frenzel.

DEPUTY — Mrs. Al Leigh of Midland, pictured, has been appointed as a deputy to the Big Spring Veterans Hospital for 1975-76 by Mrs. Henry Rodriguez, department president of the American Legion Auxiliary of Texas. Mrs. Leigh is a member of Woods W. Lynch Post No. 19, American Legion Auxiliary.

### Hints from Heloise

#### How Heloise's Daughter Cleans Her Apartment

Dear Friends:

Today we are going to hear from someone who keeps her home clean without the use of any schedule whatsoever.

You have already learned from other readers how to run your house on a schedule, but today, I want you to see how the "other" half does it.

I have asked my daughter who is single, works all day, and lives in an apartment by herself, to tell us how she manages to always have it neat and attractive. Her answer follows. — Heloise.

Dear Mother:

I simply follow your philosophy, which is "pick up the big chunks."

I don't see how anyone can keep house on a schedule. There are just too many interruptions and unplanned "happenings."

If I want to go out Wednesday night, and Wednesday is laundry day, it would throw my entire week off, and make me nervous.

No one says I have to mop the floor on Monday and Friday. What if it isn't dirty Friday — that would mean I would have to mop it anyway? Why should I?

I plan my housekeeping around my life pattern. My favorite saying is, "You should keep a house, don't let a house keep you."

I have a little routine that I go through in the mornings before going to work.

I make the bed, check the living room to see that it is neat. (Papers put away, things in place, ashtrays and coffee table clean.) This is done before bedtime, too.

If I don't have time to wash the dishes, I at least put them in the sink, and wipe off the counter tops.

I put on my make-up and dress and see that everything is put away in the bathroom.

This means towels hung, make-up and grooming needs put away and that the mirror is clean. If it isn't, I just wipe off the water spots with a tissue and wipe out the sink.

It is so nice to come home to a neat apartment in the evening. I don't have to worry if someone drops by — I know that things look good.

They won't know that my refrigerator needs defrosting, or my oven is dirty, but will notice if the living room is messy.

The kitchen is cleaned in the evening with the dinner dishes.

I have any. Otherwise, when I am talking on the phone, I do the kitchen cleaning and it sure makes that chore pass by quickly.

I do one major cleaning job a day, when it is needed. Clean the bathroom, vacuum, defrost the fridge or clean the oven, etc.

I know a lot of people who have a set day for washing and ironing. I don't. I wash when I have a basketful. Sometimes, I wash only once in 10 days; other times, twice a week.

I do my ironing as needed, but I have been taught by my mother to shop wisely and buy things that don't need ironing. (Yeah, Mom, all those lectures paid off!)

There is one thing that I do which saves a big cleaning job in the long run the bathroom.

I always rinse the sink and bathtub out when I am finished. I wipe off the shower door after each bath and it always looks great. (You women with families might find this a difficult task to teach your children, but it sure is a time saver.)

Whenever I am going to throw a soiled towel in the hamper, I first wipe off the sink, drainboard and any other dust collectors in the bathroom.

I do grocery shopping after work when I feel like it, or see specials that I need and use.

Maybe one Saturday a month when I am in the mood, I give my apartment a top to bottom cleaning.

Sundays are my day to relax. I get the paper, a cup of coffee, and spend the morning doing nothing.

If someone drops by Sunday morning and my apartment isn't neat like it usually is, I don't apologize. They should do the apologizing for dropping by unannounced.

I also follow the philosophy of "keeping house all day long." When I see dust, I dust. If the end tables need polishing, I do it then.

Believe me, I am not a fanatic, but I do like things neat. I figure I have better things to do with my time than spend it constantly working myself crazy cleaning.

They won't know that my refrigerator needs defrosting, or my oven is dirty, but will notice if the living room is messy.

P.S. Too bad I wasn't like Heloise II when I was living at home, this when I was living at home, evening with the dinner dishes huh. Mother?

### Here We Go Again!

No, it doesn't seem possible, but it is . . . and sure enough, Midland public schools today opened their fall semester, in mid-August.

Why, we know persons who yet haven't planned their summer vacations. They undoubtedly do not have children in school. But it still is mighty early to start a new school term.

This is a trend which has gained in popularity, at least in this part of the country, the last several years, undoubtedly with sound reasoning. It has altered vacation patterns and other family schedules, seemingly without too much opposition.

But there still must be those who favor the old, automatic "day after Labor Day" start-of-school schedule, which held for so many years.

It must be, however, that having a "vacation break" during the school year has its attractions and advantages for students, parents and teachers. This is perfectly all right with us, since we hadn't planned anything anyway.

But the thing which does make us wonder is the pace acceleration which always accompanies the beginning of school. There is a community-wide reaction . . . a quickening of the normal routine in many homes, as alarm clocks

sound earlier and as family members move a bit faster in meeting deadlines.

This also expands quickly from home to neighborhood, to community-at-large, and before you know it, we will have moved back into fall and winter schedules with their multiple, ever-increasing activities and objectives.

It is this stepped-up activity part that produces some concern . . . wondering if one can maintain the faster "beginning-of-school" pace over that of the summer of '75.

This really has been a most unusual summer. Things never did slow down as they usually do at this particular season of the year. Activities — business, social and otherwise — have functioned at a more rapid pace than is the usual custom. Even the weeds have grown much faster and taller than usual, as is evident throughout the city.

The above normal rainfall and the cooler weather of the last six weeks or so have had a great deal to do with moving things along — faster and faster.

And all of a sudden school bells have sounded . . . and here we go again, looking forward to the greatest school year ever in the Tall City and throughout Wonderful West Texas!

### 'No Sun, No Pay'

El Paso long has been known far and wide as one of the Southwest's great convention cities . . . but it isn't resting on its laurels.

Capitalizing on El Paso's "Sun City" reputation, the El Paso Board of Development is planning to attract conventions in the new Civic Center rent-free if the sun does not shine.

The program would allow one day's free rent in the huge Civic Center for each day the sun fails to shine, as an incentive to potential convention managers to select El Paso.

Funding, at this point, appears to be a bit more uncertain than the sun shining. Where is the usual confidence of the "Sun City" boost-

ers? This shouldn't be much of a gamble.

By Frank A. Clark

### Looks Like Annual Event From Here On Out

By EDWARD NEILAN  
Copley News Service

WASHINGTON — There are several ways to look at the recent heavy sales of American grain to the Soviet Union:

—The sales are good because they help the U.S. balance of payments, offsetting high oil prices, and stimulate the U.S. economy.

—The sales are bad because they trigger more inflation; a situation could develop in which the Soviet Union (and other nations) could regulate U.S. inflation just by deciding to buy or not to buy heavily in the U.S. grain market.

—The sales are, as AFL-CIO President George Meany says, "a ripoff of the American taxpayer."

—The heavy sales disrupt U.S. domestic market factors and could drive the price of a loaf of bread at the corner grocery store to dizzying heights—perhaps to \$1 a loaf.

Wherever one chooses to place emphasis in the admittedly confusing debate—government officials deserve criticism for their failure to be more candid and informative on the relationship of export sales to consumer prices—it should be realized that the problem is going to be a recurring one.

This year's grain ruckus follows the 1972 "Great Grain Robbery," in which 19 million tons of U.S. wheat were sold to the Soviet Union for \$1.1 billion.

But the impact felt on Main Street was in the form of shortages and increases in food prices.

So far this year major American firms have sold slightly more than 10 million tons of U.S. grain to Russia.

Some agricultural economists say the bountiful American harvests can meet both foreign and domestic needs.

Other forecasts, from other "experts" just down the hall in the Department of Agriculture, are more pessimistic: prices will indeed go up—and up, and up—as a result of the sale.

But even if the government decides to control exports, prices are expected to remain high because the U.S. market cannot be protected from international pressures.

That is precisely the reason why the fuss over grain prices is going to be repeated year after year: the United States has the food; the rest of the world has the hungry people.

American agricultural technology is so far advanced over other nations that the possibility of their catching up is almost out of the question.

Populations are growing, especially in the developing nations, and those countries' ability to keep pace by providing enough food is not improving. Meanwhile, U.S. agricultural productivity is increasing each year.

## Sandwich

### The Washington Merry-Go-Round

By JACK ANDERSON

With Les Whitten

WASHINGTON — The world's greediest ruler is Anastasio Somoza, the pot-bellied potentate who runs Nicaragua as if it were his private estate.

This is no casual observation; we have spent months making the selection. After a thorough study of the available evidence, we nominate Somoza as the most grasping of the world's great grabbers.

Through his family and his flunkies, he controls every profitable industry, institution and service in Nicaragua. Directly or indirectly, he owns farms, factories, banks, newspapers, radio-TV stations, ships, planes, and the name-it.

He produces much of the food his people eat, the cigarettes they smoke, the coffee they drink, the sugar they put in their coffee, and even the ice cubes they use to cool their drinks.

He literally bleeds his people and sells the plasma for profit. He even sells his troops the boots they march in.

When a Managua housewife drops a coin in a laundromat or when a motorist buys time on a parking meter, Somoza gets his cut. He owns the laundromats and operates the parking meters.

Almost everyone in Nicaragua with the wherewithal drives a Mercedes-Benz, because the Somoza family owns the Mercedes-Benz franchise.

The police patrol the streets of Managua in Mercedes-Benz cars. The city even uses Mercedes-Benz trucks to collect the garbage.

As the Big Banana in this little banana republic, Somoza not only grows bananas but produces the cardboard boxes they are shipped in. Then they are loaded, invariably, aboard cargo vessels of his shipping line.

Not satisfied with the millions he squeezes out of his own countrymen, he also fleeces the U.S. taxpayers. Millions of dollars in U.S. aid are piped into Nicaragua every year. Somoza has

developed a dozen ways to siphon a generous share into his own pocket.

All of this has made him one of the world's wealthiest men, with millions stashed in American banks, Swiss banks and other financial institutions. In addition, our sources estimate his commercial investments outside Nicaragua run into the hundreds of millions.

Yet while Somoza has been accumulating most of the wealth in his country, his dirt-poor subjects live in ramshackle shacks and earn an average wage of about 30 cents an hour.

We carefully have documented Somoza's holdings, which are hidden in a financial maze. He controls many enterprises through front men, whom he manipulates like the pieces in a monopoly game. His intricate, intertwined financial empire can be traced through Nicaraguan documents, which we have translated from the original Spanish. The U.S. government also has compiled a secret economic profile of Somoza. We have been able to compare our information from Nicaragua with these findings.

Of course, Somoza doesn't deserve the full credit for amassing his vast fortune. He got an excellent start from his father, who seized power in 1936 and began helping himself to the property of others.

The elder Somoza usually observed a certain legal formality. He acquired property through dispossessions and forced sales. He also filed claims for government land and expropriated the

commodity traders who dislike any controls and want to let prices fluctuate so that they may continue to make profits.

This is all fine except that when such large sales are involved, it is the American consumer who feels most of the negative impact.

Out of all the conflicting statements and uncertainties, the one conclusion that stands firm is that the "great grain debate" is not going to be a sometime thing; it is more likely to be with us on an annual basis as more and more of the world comes to depend on Uncle Sam to put food on its dinner plates.

The challenge is for U.S. government officials, economists and private-sector executives to learn how to handle this continuing—but sometimes wildly fluctuating—high level of grain sales without throwing the U.S. economy into a tailspin at regular intervals.

This is where the argument for a program of grain reserves enters. This theory would set aside reserves under some sort of government-guaranteed stable price, for use when disasters—either natural ones or those concocted by mismanagement in Socialist states—occur and the grain is needed.

Countering this argument are the

## INSIDE REPORT

### Portugal: Crisis

### For The Communists

By ROWLAND EVANS  
And ROBERT NOVAK

LISBON — The staggering, humiliating defeats that have put the Communist party in a remorseless political squeeze portend a climactic new stage in the Portuguese revolution, and ending, at least for a time, the politics of near-anarchy.

Well-informed Soviet-bloc Communists here say privately it is "an unhappy fact" that the Portuguese Communist party, by far the most disciplined and best organized force in this stolid land of nine million, has "stupidly" damaged itself by moving too fast in its reach for total power.

The result: the extraordinary influence of the Catholic church has been unleashed in full fury against the Portuguese Communist party (CPC); youthful military revolutionaries, fired with emotional zeal to impose new forms of some vague, undefined political system following a half century of fascist dictatorship, are suddenly frightened by the spectre of full-blown Communism, and numerically dominant socialists, though fragmented by ideological conflicts, have taken a new offensive.

The abrupt halt of the CPC's steady climb toward total power in Western Europe's only underdeveloped country (and a member of NATO) may prove temporary. Nothing is certain here except uncertainty. But as of today, it is surely not illusory.

The well-publicized, systematic trashings of CPC headquarters in the moderate-conservative northern regions are no longer a phenomenon. The Com-

munist-dominated press long since gave up any attempt to conceal these nightly assaults by inflamed, anti-Communist mobs (and in fact has futilely tried to stimulate a backlash).

Tuesday night in the heavily Communist city of Evora 100 miles east of here the CPC attempted a tactically brilliant maneuver in which hundreds of Communist-allied peasants were secretly trucked into town and concealed until an anti-Communist socialist rally ended.

As the outnumbered socialists were breaking up their rally in a narrow, twisting street half a block from the CPC headquarters, the pro-Communist forces suddenly appeared marching against them, banners flying and chanting, "Fascists . . . reactionaries."

Here was planned a bloody piece of revenge for the anti-CPC trashings up north. A dangerous confrontation, in which the socialists would have been overwhelmed, was avoided only by the sudden appearance of the army's security forces in troop carriers with mounted machine guns. These security forces, so conspicuously unable or unwilling to protect CPC offices in the north, threw a protective cordon around the socialists. The night passed without a shot fired, and the Communist marchers were unable to spring their clever trap.

The incident at Evora was symbolic of the decline of CPC influence over the powerful and dominant Armed Forces Movement (AFM), which has been the CPC's passport to power ("Kiss the fanny of the AFM, that's the Communists' strategy to take over," one Western diplomat told us).

The CPC revenge in Evora probably would have succeeded had it not been for last week's momentous split in the Armed Forces Council, a split engineered by former foreign minister Ernesto Melo Antunes. One of the shrewdest of the youthful military officers — and a key actor in the April 1974 overthrow of the fascist regime — Antunes issued a powerful manifesto against an East European-style "socialist society" for Portugal.

Antunes and eight other members of the 30-member council were expelled for signing the manifesto. But since then the anti-CPC manifesto has become the hottest political development in revolutionary Portugal, endorsed by 80 to 90 per cent of all local military councils and two of the four top-level regional commanders.

The growing anti-CPC militancy of the Catholic church must be added to this heavy setback for the CPC and its political godfather, prime minister Vasco Goncalves. Priests tell their communicants: don't let the Communists steal your vote (a reference to the huge anti-Communist vote in last spring's constituent assembly election), your freedom or your schools.

As for the socialists, both Socialist Party leader Mario Soares and the moderate Popular Democrats have boycotted the newest provisional government (the fifth since the revolution).

In prospect, then, is a precipitous decline of CPC control of the revolution, with Antunes and Soares probable leaders in the next phase. Either that, or this tortured country will inexorably slip into bloody civil war.

## THE BIBLE

Can you quote it?

By LAVINA ROSS FOWLER

1. The letter of the law may have held in check man's relation to man, but it did not in any way span the gulf between God and man, nor improve man's dealing with his fellows. The doctrine which Jesus taught did that. Whose doctrine was it? John 7:16

2. Which apostle's name is related to the Zealots? Luke 6:15

3. For what young girl did the Israelites observe four annual days of mourning? Judges 11:35-40

4. How did Rahab hide Israel's spies? Joshua 2:6

5. Quote the phrase with which Jesus and John the Baptist both began their ministry. Matthew 3:1-2, 4:7

Four correct . . . excellent. Three correct . . . good.

## Bible Verse

The curse of the Lord is in the house of the wicked: but he blesses the habitation of the just. — Proverbs 3:33.

# Many U.S. Agencies Directly Involved In Energy Program

By JAMES CARY

Copley News Service

WASHINGTON — Almost two years after the Arab oil embargo of October 1973, the United States still has its energy program widely diffused among an almost uncountable number of government agencies, bureaus and offices.

There is no one single administrator or power center with the authority to rule over and coordinate the full sweep of this effort, not even the President.

At least 10 agencies and Cabinet departments, plus numerous subdivisions of these 10, are directly involved in some phase of production, regulation, research or distribution of energy.

And indirectly every Cabinet department, numerous councils, commissions and offices in the Executive Office of the President, and many of the independent regulatory agencies play some role in dealing with the energy issue.

Not all of this is bad, and not all of it is avoidable. But even a cursory examination of the fragmentation of the program creates the impression that there is massive duplication of effort involving the unnecessary expenditure of millions of dollars.

Two major pieces of legislation have attempted to deal with this problem—a bill signed by President Nixon May 7, 1974, creating the Federal Energy Administration (FEA), and the energy reorganization bill sent to the White House Oct. 10, 1974.

But neither was designed to fully centralize the energy program.

Furthermore FEA was intentionally established as a temporary agency whose authorization expires June 30, 1976. All indications are the White House hopes by that time to be able to propose establishment of a new Cabinet department of Research and development of an alternative automobile power system.

All this has provided the most centralized and workable energy organization the nation has ever had, but it also has left intact a number of major energy functions in other areas of government.

The Federal Power Commission, for example, is particularly powerful. It regulates interstate transportation of electrical energy and rates for sale of that energy at wholesale prices in interstate commerce. It has jurisdiction over consolidations and acquisitions of electrical companies.

It regulates the interstate transportation and sale of natural gas, and must approve the rates charged for power generated at certain

the Department of Interior—the government-owned hydroelectric projects.

Almost equally powerful in the energy field is the Department of Interior. It handles the leasing of offshore and onshore federal lands for oil and mineral exploration.

It is responsible for the Alaska Power Administration, Bonneville Power Administration, the Defense Electric Power Administration, the Southeastern and Southwestern Power Administrations, the Office of Emergency Minerals and Solid Fuels, the Mining Enforcement and Safety Administration, and the Bureau of Land Management.

Under the act's main provisions the Atomic Energy Commission was abolished. Its nuclear regulatory functions were given to a new nuclear regulatory commission, and its civilian research activities were placed in a new Energy Research and Development Administration (ERDA).

Also given to ERDA from the Interior Department were programs administered by the Office of Coal Research, the fossil fuel research function of the Bureau of Mines and research on underground transmission of electricity.

Likewise transferred to ERDA from the National Science Foundation were the geothermal and solar heating and cooling development programs, and from the Environmental Protection Agency authority for Research and development of an alternative automobile power system.

All this has provided the most centralized and workable energy organization the nation has ever had, but it also has left intact a number of major energy functions in other areas of government.

The Federal Power Commission, for example, is particularly powerful. It regulates interstate transportation of electrical energy and rates for sale of that energy at wholesale prices in interstate commerce. It has jurisdiction over consolidations and acquisitions of electrical companies.

Nevertheless FEA is now the key and the most broadly based unit of government dealing with energy.

By one count, at the time it was founded, there were 63 separate government offices dealing with energy. It took over four of the most important from

the survey, for instance, prepares estimates of the nation's reserves of crude oil, natural gas and natural gas liquids. Undiscovered, recoverable oil reserves are estimated by the survey to be

still not at hand.

## WHAT IS THE TRUTH?

"Thy Word Is Truth" (John 17:17)

by Betsy Best

Jesus is coming again! This is the basis of Christian hope. Prepare for his coming! This is the message of the New Testament.

When Jesus comes again, it will be a time of joy and terror—joy for his obedient followers and terror for those who have disregarded him. In Luke 17 Jesus compares his coming to two events in the Old Testament in order to warn us to be ready. First, he brings to mind the flood and how that people wouldn't listen to Noah's warnings.

"They ate, they drank, they married, they were given in marriage, until the day when Noah entered the ark, and the flood came and destroyed them all." The people of Sodom turned completely away from God. God destroyed them and their city, sparing only the godly Lot and his family. "Likewise as it was in the days of Lot—they ate, they drank, they bought, they sold, they planted, they built, but on the day when Lot went out from Sodom fire and brimstone rained from heaven and destroyed them all." Jesus' conclusion is "so will it be on the day when the Son of man is revealed."

When Jesus comes again, it will be the day of judgment. What will matter then is our response to the gospel of Jesus Christ.

**SOMETHING BESIDES OIL** — Everything on exhibit in the Permian Basin Petroleum Museum, Library and Hall of Fame does not have a direct association with oil. This reconstructed windmill fan was reconstructed by Charles Reynolds of Monahans and presented to the museum. It occupies space in the entrance exhibit room. President Gerald Ford will be the honored guest and opening-day speaker Sept. 13.

## Permian Basin OIL & GAS LOG

(Continued From Page 1A)

of the Deck (Cisco) field and 8½ miles southwest of the Conger (Canyon) field.

The new well is W. C. Blanks of Midland No. 1-17 R. T. Foster. It was drilled on a calculated, absolute open flow potential of 1,650 million cubic feet of gas per day, with a gas-liquid ratio of 108,888-1.

Production is from pay behind perforations at 6,947-7,063 feet after an 80,000-gallon fracture treatment.

Hole is bottomed at 8,500 feet and 5½-inch casing is set at total depth.

Wellsite is 1,650 feet from north and 990 feet from west lines of section 17, block 13, SPRR survey, 10 miles south of Sterling City.

## Wildcat Projects Set In Mitchell

A pair of wildcat locations have been staked in Mitchell County.

Barron Kidd of Dallas No. 1 Mary Womack will be drilled as a 3,250-foot wildcat two miles east of Cuthbert and 1½ miles northwest of the recently opened Westbrook, East (Clearfork) field.

Drillsite is 2,173 feet from west and 467 feet from south lines of section 67, block 97, H&TC survey.

Clifton Thomas of San Angelo No. 1 Henry Hole and others is to be drilled in an attempt

to reopen production in the depleted Hurlbut field.

Scheduled for a 200-foot bottom, it is 1,000 feet from north and 165 feet from west lines of section 1, block 13, H&TC survey.

## FTC Attacks TV Ad Claims

WASHINGTON (AP) — The makers of GE and Panasonic color television sets would be prohibited under a proposed government order from claiming superiority for their appliances unless the claims are backed by valid data.

In complaints filed Sunday, the Federal Trade Commission alleged that General Electric Co. and Matsushita Electric Corp. of America were guilty of false advertising when they claimed their sets were more reliable than those of other manufacturers.

The agency's action resulted from responses by six major TV producers to an FTC order to substantiate their advertising claims.

The four other companies — Zenith Radio Corp., RCA Corp., Philco-Ford and GTE-Sylvania Inc. — were not named in the complaints.

The FTC said in its complaint against GE that there was no "reasonable basis" for claims that its color sets required less service than those of Zenith or RCA.

## Suit Claims Hughes Dead

NEW YORK (AP) — Two Manhattan stockholders have filed suit contending that Howard R. Hughes is dead.

If the recluse billionaire doesn't surface to respond to their suit, they intend to ask the courts to appoint an administrator for his estate.

The civil complaint in state Supreme Court alleges that while Hughes is reputed to be residing at the Hotel Xanadu in the Grand Bahamas, he has been dead for an indefinite period and is claimed to be alive "for the personal profit of various and sundry persons."

The suit was brought by Victor and Ellen Kurtz, minority stockholders of Air Liquidation Co., formerly known as Air West Inc. In the suit, they seek from the company's stockholders as a class, damages of \$100 million. Air West was taken over by Hughes in 1969.

"You're kidding," was the only comment from an attorney for the New York law firm of David Cox, which represents Hughes in Air West matters.

And in Los Angeles, Hughes spokesman Richard Hanna

## Amoco Project May Confirm Major Strike Off Louisiana

NEW ORLEANS, Louisiana — Discovery of a possible new major oil field in federal waters in the Gulf of Mexico may be confirmed by a test now being drilled on an Amoco Production Co. lease, the company reported today.

The project is a sidetrack hole from a well drilled by Amoco Shell Oil Co. and partners in Mobile South No. 2 T-1 complex off the Louisiana Coast. The earlier drilling resulted in the discovery of 125 feet of net oil pay and eight feet of net gas pay in four productive sandstones, Amoco said.

The sidetrack test is directed toward unexplored parts of the potential pay zones within the structure in which the initial discovery was made, an Amoco spokesman said.

Drilling and platform plans are being formulated to develop the northwest tract on the productive structure in which Amoco owns a 70 per cent working interest.

The lease is one of four considered "potentially significant" and prove productive out of seven purchased by Amoco in the March 1974 lease sale for a total gross bonus of \$226.7 million.

The sidetrack test is directed

tension to the Roy Baker (Canyon) field in Edwards County, 14 miles northwest of Rock Conger (Canyon) field.

The new well is W. C. Blanks of Midland No. 1-7 R. T. Foster.

It was finalized for a calculated, absolute open flow potential of 2.1 million cubic feet of gas per day, through perforations from 2,964 to 3,235 feet after a total acid treatment of 106,888-1.

Production is from pay behind perforations at 6,947-7,063 feet after an 80,000-gallon fracture treatment.

Hole is bottomed at 8,500 feet and 5½-inch casing is set at total depth.

Wellsite is 1,850 feet from north and 990 feet from west lines of section 17, block 13, SPR survey, 10 miles southwest of Sterling City.

### Wildcat Projects Set In Mitchell

A pair of wildcat locations have been staked in Mitchell County.

Barron Kidd of Dallas No. 1 Mary Womack will be drilled as a 3,250-foot wildcat two miles east of Cuthbert and 1½ miles northwest of the recently opened Westbrook, East (Clearfork) field.

Dillsite is 2,173 feet from west and 467 feet from south lines of section 67, block 97, H&TC survey.

Clifton Thomas of San Angelo No. 1 Henry Hole and others is to be drilled in an attempt to reopen production in the depleted Hurlibut field.

Scheduled for a 200-foot bottom, it is 1,000 feet from north and 165 feet from west lines of section 1, block 13, H&TC survey.

### TeePee Project Testing In Pecos

Texas Pacific Oil Co., Inc., is taking four-point production tests at No. 6 Montgomery-Fulk, outpost to production in the Elnor (Devonian-Fusselman) field in Pecos County.

Tests are through perforations from 12,971 to 13,263 feet.

Three 2-hour tests included: through a 12-64-inch choke, 1.75 million cubic feet per day; through 21-64 choke, 6.1 million, and 31-64, 9.0 million.

Tests continue.

Location is 100 feet from north and 1,500 feet from east lines of section 87, block A, G&SF survey, 25 miles south of Fort Stockton and one-mile west of production.

### Field In Edwards Gains Extension

North American Royalties No. 7-18 Roy Baker has been completed as a one-mile west ex-

### Amoco Project May Confirm Major Strike Off Louisiana

NEW ORLEANS, Louisiana — Discovery of a possible new major oil field in federal waters in the Gulf of Mexico may be confirmed by a test now being drilled on an Amoco Production Co. lease, the company reported today.

The project is a sidetrack hole from a well drilled by Amoco, Shell Oil Co. and partners in Mobile South No. 2 T-1 complex of the Louisiana Coast. The earlier drilling resulted in the discovery of 125 feet of net oil pay and eight feet of net gas pay in four productive sands. Amoco said.

The sidetrack test is directed toward unexplored parts of the potential pay zones within the structure in which the initial discovery was made, an Amoco spokesman said.

Drilling and platform plans are being formulated to develop the northwest tract on the productive structure in which Amoco owns a 70 per cent working interest.

The lease is one of four considered "potentially significant" and prove productive out of seven purchased by Amoco in the March 1974 lease sale for a total gross bonus of \$226.7 million.

The sidetrack test is directed

### Ford To Inspect Oil Shale Mine

RIFLE, Colo. (AP) — President Ford, considering western resources to help meet the nation's energy needs, was to inspect an experimental oil shale mine and extraction plant here today.

It is President Ford's first look at oil shale, an energy resource that has gained national attention in recent years.

Ford's two-hour tour of the Anvil Points oil shale project is part of a two-day trip during his vacation at the Colorado resort town of Vail.

The President previously has visited offshore oil rigs, coal areas and oil fields.

During the weekend it was announced that the 17 companies participating in the project have approved a \$1-million hike in funding for the project, making the total cost \$8.5 million.

"We are very pleased to obtain unanimous approval for this increase from our participants," said Harry Pforzheimer, director of the project. "This extends the time for completion ... into May 1976."

The 30-month project will test the Paraho-developed system for producing synthetic oil from rock at the federally owned Anvil Points Naval Oil Shale Reserve.

Oil shale extraction and development have been held back by high costs, but rising oil prices have again made oil shale a possible alternative for the nation from the high price of Middle East oil.

The federal government is already in the oil shale business, having leased four tracts of federal land, two each in Colorado and Utah, for oil shale development. Those leased lands developed shows of oil and gas on a drillstem test.

The zone tested was from 6,790 to 6,810 feet. Tool was open two hours. Gas surfaced in 1 hour and 35 minutes and burned a five-foot flare throughout the remainder of the test.

Recovery was 633 feet of heavily gas- and oil-cut mud and 279 feet of salt water.

Hole was being made below 7,385 feet.

On 24-hour potential, it flowed 565 barrels of 39-gravity oil, plus 33 barrels of water, through perforations from 8,004 to 8,248 feet. Gas-oil ratio was 2,770-1. Pay was acidized with 3,000 gallons.

## Drilling Report

CRANE COUNTY—Superior No. 1-N, 12,311, moving off rotary; 5½ sec at 11,600 feet.

CROCKETT COUNTY—Texas Pacific No. 1 Half Estate, drilling 2,600 feet, sand; 5½ sec at 2,600 feet.

DAWSON COUNTY—Gulf No. 1 Deep sand, drilling 6,910 feet.

GAINES COUNTY—CITGO No. 1-A Schumacher, drilling 6,625 feet, chert.

GARZA COUNTY—Conoco No. 5 Thru 10,000, 29 barrels of water per hour; 20 barrels of water 24 hours; perforations 4,602-54, still testing.

HOWARD COUNTY—Gulf No. 1 Branon, drilling 7,385 feet, shale. Drillstem test, 7,790-8,610 feet, open 2 hours; 5½ sec at 8,610 feet; 20 minutes, burned a five-foot flare; remainder of test recovered 633 feet of heavily gas-cut mud; oil-cut sand; 279 feet of salt water.

KENT COUNTY—V.F. Petroleum No. 2 Copell, drilling 4,942 shale, lime, sand. Lario No. 1 Self, id 7,285, taking drillstem test.

LODGE COUNTY—Hunt No. 1 Lindsey, id 21,367, preparing to swab perforations 10,000-10,500 feet; 20 barrels of water in 1½ hours; fair gas kick last pull of swab.

ROOSEVELT COUNTY—L. Brown No. 1-B Federal, id 6,320, 5½ sec at total depth; perforations (corrected) 6,017-6,061, 2,600 gallons; running four-point tests.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

WICHITA COUNTY—Miss No. 1 Red Hills Federal, drilling 7,615, 5½ sec at total depth; 2,600 feet, 20 barrels of acid water, slight show of gas; perforations 10,444-459, 2,100 feet; 5½ sec at 10,444 feet.

# Ageless Blanda Leads Oakland Over Steelers, 24-21

By The Associated Press  
When George Blanda broke into the National Football League with the Chicago Bears, he was the third-string quarterback behind Sid Luckman and Johnny Lujack.

Luckman and Lujack are just fond memories now, but Blanda is still winning NFL games, although he's still the No. 3 quarterback.

Sunday, the 47-year-old Blanda passed to Morris Bradshaw for a 53-yard touchdown after Ken Stabler, Oakland's starting quarterback, connected with Fred Biletnikoff for a 40-

yard TD. Blanda got his chance. He responded with the scoring pass play to Bradshaw.

Sunday night, fullback Joe Wilson, given a chance when Sam Cunningham was injured, sprinted six and 34 yards for touchdowns as the New England Patriots crushed the Minnesota Vikings 36-10.

Blanda, who holds the NFL record for most completions in a game, now usually sees action only as a placeholder. But

At Foxboro, Mass., Wilson got his chance when Cunningham suffered a bruised hip on New England's second series of

downs. The Patriots other TDs were scored by Mack Herron and rookies Alton Carter and Steve Grogan, while John Smith added a 31-yard field goal. Minnesota's Sam McCullum returned a punt 79 yards for a

underwent surgery Sunday and may be lost for the season.

Tony Baker's four-yard scoring run and Grant Guthrie's 19-yard field goal gave the Rams the victory.

John Hadji and Jerry Tagge each passed for touchdowns as Green Bay defeated the Bears. Barry Smith caught a 12-yard TD pass from Hadji while Tagge combined with Eric Tarkelson for a one-yard TD. The Rams lost rookie guard Greg Horton, who suffered ligament damage to his left knee. Horton

Norm Bulaich helped Miami to victory. Winfrey scored the winning touchdown in the third period on a 39-yard run. Bulaich caught an Earl Morrall pass for a nine-yard score.

Hitting on eight straight

passes, Craig Morton led the Giants by San Diego with first period scoring tosses to Walker Gillette and Joe Dawkins. Archie Manning found the target on 23 of 29 passes for 212 yards and two touchdowns as New Orleans knocked off Denver.

# Cubs Split With San Antonio Brewers

By TED BATTLES

Midland's Cubs muffed an opportunity to pick up some ground on idle Shreveport when the Texas League West Division leaders split a doubleheader with San Antonio at Cubs Stadium Sunday night.

Mike Kruskow, 11-6, threw a five-hit shutout in beating the Brewers in the opener, 3-0, but the Cleveland Indians farmhands who have given the Cubs more trouble than Shreveport this season, bounded back to win the nightcap, 3-2.

The second game loss was a disappointment since the Cubs had tied the score in the fifth on Bill Droege's two-run homer.

However, Bill Hiss singled and if they do in doubleheaders what another. Gary Cleverly doubled off Domine Moore in the sixth to pull it out.

Joe Flanagan, 1-1, and Dave Kinney, five saves, combined to limit Midland to seven hits in the nightcap.

The split left Midland a game and a half ahead of Shreveport and combined with Saturday's 10-9 loss to the Captains which cost Midland two games in the Games Behind column, the Cubs' position is precarious.

While most folks assume that Shreveport will suffer under a five-straight doubleheader load it also was the 6-4 righthander's second route-going shutout. He combined with Dennis Lamp for

## Prof Turns Cop

By FRANCIS B. KENT  
The Los Angeles Times

TALLAHASSEE, Fla. — For a criminologist with impressive academic credentials, George L. Kirkham entertains some highly unorthodox ideas about crime and criminals.

Kirkham believes, for example, that some people are just plain bad, that they should be locked up permanently or, in a small number of cases, even executed.

His views are not widely shared in what he calls the ivory tower environment of the college campus. Until fairly recently, the views he holds today ran counter to what he believes and passed on to his students in the classroom.

What turned him around was a foray into what he now calls the real world. He became a cop.

### Bold Venture

Kirkham, 33, an assistant professor of criminology at Florida State University, with degrees from California State College at San Jose and a doctorate from the University of California at Berkeley, might have been satisfied with a weekend or two playing policeman. He would not have been the first academic to venture out as an observer.

Instead, he went all the way. He sweated through the Tallahassee Police Academy with the other recruits — four hours a night, five nights a week — for four months.

He spent the next four months as a patrolman in Jacksonville, Fla., in a crime-ridden area that was not one of the more sought after assignments. This summer he is doing undercover work with the Tallahassee Police Department, dealing with pimps, prostitutes and pushers.

The experience, he told an interviewer, has changed him as a person and as a teacher.

At the same time it has meant trouble for him with some of his university colleagues, who think it is somehow degrading for a faculty member to be associating with criminals and — almost as bad — with pimps.

"It doesn't fit," Kirkham said, "with the professional image — the pipe, the three-piece suit."

In the classroom, Kirkham fits the image, leaning toward pinstripes and what used to be called "sincere" ties. As an undercover cop, though, he looks altogether different. He wears jeans and a windbreaker and his hair is a bit long.

Kirkham is convinced that being a policeman has given him a degree of insight into his profession that few others have, an appreciation of police problems that only a policeman can have.

### Views Given

"For one thing," he said, "it makes you more conservative. I have always talked with my students about the vital need for court decisions that preserve democratic freedoms. As a cop, I curse those decisions. They're frustrating."

"And take capital punishment. I know as a scientist that it is not a deterrent to homicide, but I came away from Jacksonville firmly advocating capital punishment for certain crimes — for persons who kill in the commission of a felony. Society just does not need those people."

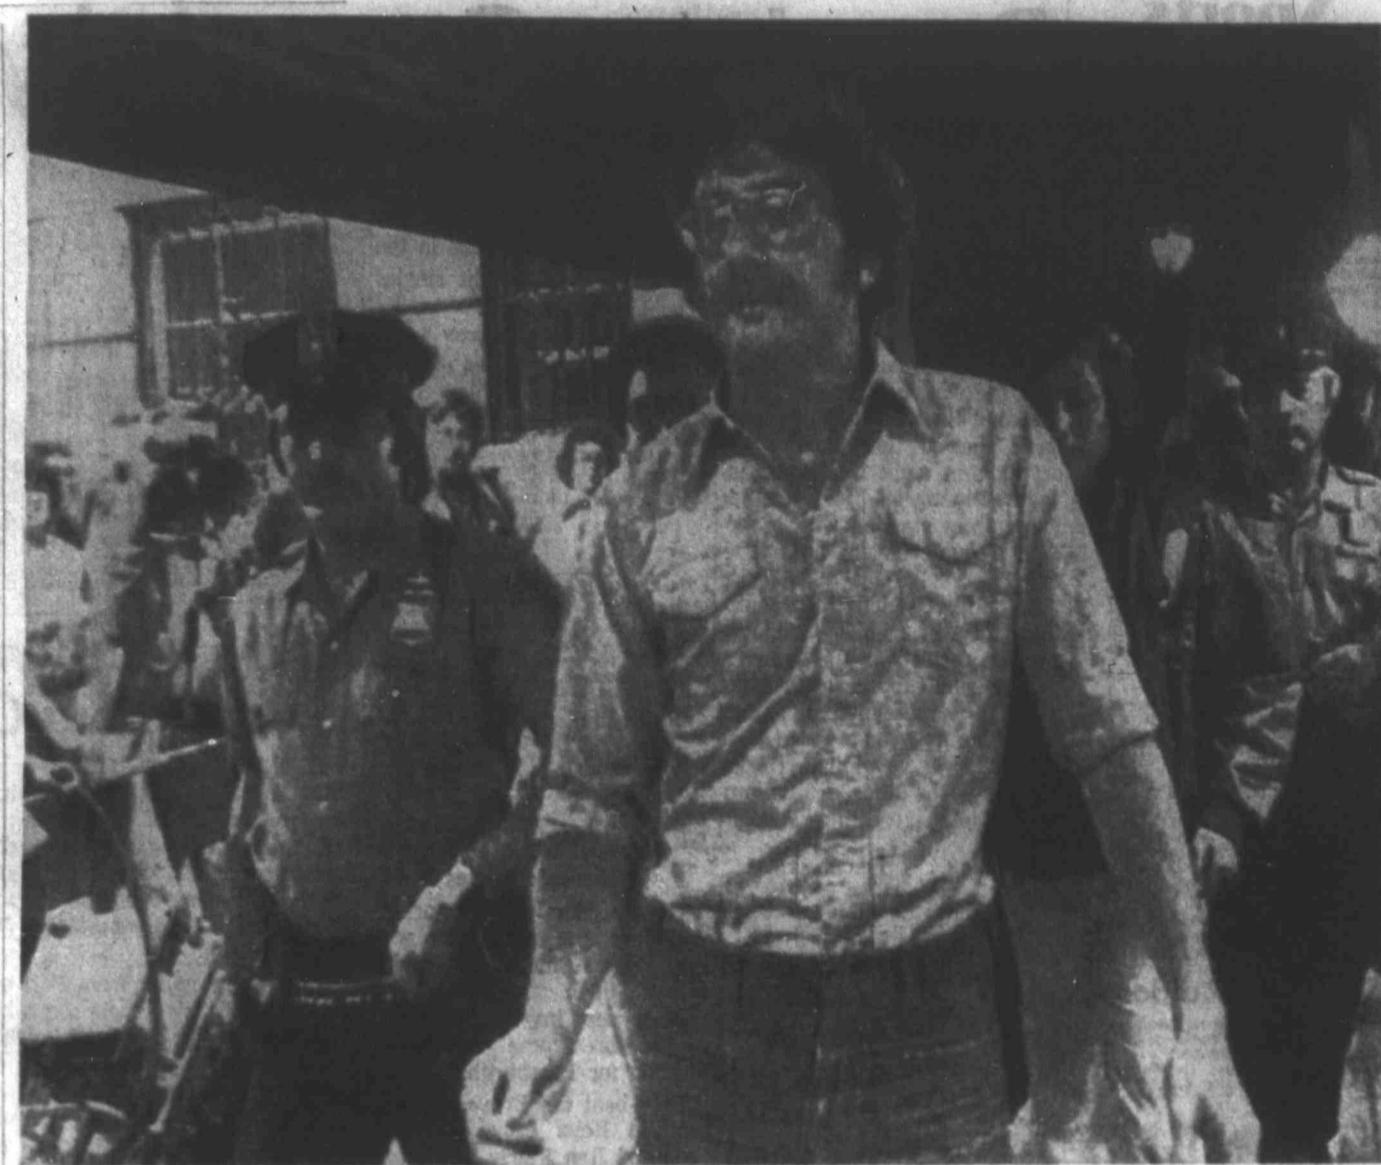

"I can't justify it. It's personal, emotional. Call it retribution or vengeance."

Since taking to the streets with uniform, gun and badge, Kirkham has found himself growing short-tempered, easily irritated and suspicious of almost everybody and everything, "bordering on paranoia."

"I know, statistically, that the chances of my being robbed are small," he said, "but I have a burglar alarm system at home and I sleep with a gun nearby. Once you see the kind of things that can happen . . ."

With his new perspective, Kirkham sees the criminal justice system as "a nonsystem." People in one part of it, he said, don't know what's being done in other parts. If he could, he would make major changes.

"For a very small minority of offenders, the violent people, we need superpolicemen, real beatilles, where they will go and never come out," he said.

## Venezuelans Get Sympathy

By JOANNE OMANG  
The Washington Post

CARACAS — Ana Jaramillo waited six hours in line for a chance to tell Mayor Arias that her house had partially washed away in the mudslides that occasionally devastate the slums around this capital.

"He said he couldn't help me," she reported afterward, "but he's certainly sympathetic."

The oil-rich Venezuelan government is offering sympathy in the short run, along with buses and sewer line, to those who have left the farms for the bright city lights. The long haul against its urban migration crush, one of the worst in Latin America, Venezuela has created a back-to-the-countryside program, but it is slow getting started.

The depopulated farming areas are "very depressed," according to Finance Minister Hector Hurtado. They are supplying food to the cities on a day-to-day basis with meager reserves.

Every other Thursday, Mayor Arias opens up city hall to hear the problems of the 2.5 million residents of Caracas, seeing 400 or so on a good day. "Jobs and housing are what they want most," said Arias, who at 36 is considered by some to be future presidential material.

"We recommend them for elevator operators or cleaning jobs, or get things started for a house, but we really can't do much there," he said. He specializes in prodding stalled bureaucrats to pick up garbage or send pension checks, and most visitors on a recent Thursday appeared satisfied that at least they were heard.

The mayor's open house is an attempt to give the new homeless and the old poor alike a stake in the impersonal city, which has nearly doubled in population since 1940 and will double again by the year 2,000. Eight of every 10 Venezuelans now live in cities, and more markets "Chiquita" bananas.

## Women Elected To County Jobs

Austin Bureau

AUSTIN — Ladies, if you are thinking about running for public office, your best bets are races for district clerk, county treasurer, county clerk and county tax-assessor collector.

The Texas Women's Political Caucus reports that women now hold 2,316 of 16,393 or 14.1 per cent of all elected positions above the municipal level.

Women now hold 63.7 per cent of all the district clerk jobs, 65.7 per cent of the county treasurer posts, 52.5 per cent of the county clerk positions, and 34.7 per cent of the tax collecting jobs.

Areas where the campaigning is tough include the major statewide offices, the legislature and the judiciary.

Only one woman serves in the state Senate, Sen. Betty Andujar of Fort Worth. Only seven are House members. They are Reps. Sarah Weddington of Austin, Chris Miller of Fort

Worth, Kay Bailey of Houston, Eddie Bernice Johnson of Dallas, Wilhelmina Delco of Austin, Susan Gurley McBee of Del Rio and Senfronia Thompson of Houston. On the national level, Texas has one female congressman Rep. Barbara Jordan of Houston.

In other areas, women hold 325 of the 7,058 school board posts in the state and three have been elected to the 24-member state board of education. Fifteen women serve as county school superintendents.

Only a few women hold judgeships and none serve as district attorneys or criminal district attorneys and none serve as sheriff, according to TWPC statistics.

The TWPC said that in the 1972 general election women captured 6.4 per cent of the state's elective positions and increased that to 14.1 per cent since. That increase represents a 220 per cent increase in the number of offices held.

agriculture is subsidized with \$300 million a year to encourage production of sesame seeds, coffee, cotton and tobacco, and to insure cheap sugar and milk for the city dwellers. Still, a record \$500 million in food was imported last year, much of it wheat from the United States.

Caracas was declared off limits to new industry. Delayed taxation, land credits and other incentives were offered to induce businesses already in everything but wheat, the import figures are rising.

The statistics do not include 300,000 head of beef cattle that reportedly walk in illegally from Colombia every year. Henry Loud, an American-born cattle rancher and one of the three dozen or so who own 60,000 acres or more, said the Colombian cattle supply about a fifth of the country's needs, especially during the dry season.

Government spokesman deny that border control is so lax.

The business federation Fedecamaras, said Venezuela's overall farm situation is rapidly becoming "the biggest disaster of its history."

The government's solution is to make it both profitable and pleasant to live in the country," said a top member of President Carlos Andres Perez's Democratic Action party.

All debts of farmers grossing less than \$16,000 a year were cancelled in February and private creditors were repaid by government bonds.

The small farm Ortiz left behind near Altamira, south of the city, was one of the two-thirds of all Venezuelan farms that are less than 12.2 acres in size, the result of land reform 15 years ago. The reform defused rising discontent among the peasants, but the resulting parcels are no longer large enough to produce at prices competitive with larger mechanized farms.

As a result, Venezuelan

farmers grossing less than \$16,000 a year were cancelled in February and private creditors were repaid by government bonds.

Many Venezuelans question whether it is feasible or even practical to try to move the rural dwellers back to rural areas. Several agricultural experts said the rural problem was not one of personnel but of efficiency.

In the last two months, the radio has reported several meetings between administration representatives and those of Christian and Buddhist organizations, the authorities seeking cooperation and the religious bodies pledging it.

## Grand Jury Probe Of Grain Company Reportedly Asked

DALLAS (AP) — A North Dakota official has reportedly asked the Justice Department to convene a federal grand jury to probe American Grain and Cattle, Inc. (AGCI) and three of its former top officials.

In a copyright story Sunday, the Dallas Morning News said the official had written to the Justice Department asking that a grand jury look into formation of AGCI's marketing branch in North Dakota during 1973.

AGCI, a Texas-based farm cooperative, is currently in federal bankruptcy proceedings here.

The author of the letter, attorney Ray H. Walton of the North Dakota Public Service Commission, said the former AGCI officials named in his letter are San Antonio financier Morris D. Jaffe, former manager Harold S. Nelson of the Associated Milk Producers, Inc. (AMPI), and former AGCI President Robert Boyd of Plainview, Tex.

Walton was quoted as saying the probe initially would be aimed at how solicitations of co-op farmer members were made through the interstate mails.

Walton said he didn't expect a grand jury would be in session until after a background investigation is completed by the Justice Department and possibly by the U.S. Securities and Exchange Commission.

AGCI went into bankruptcy proceedings last January when five North Dakota farmer members of the co-op filed an involuntary bankruptcy petition. Earlier, Texas Agriculture Commissioner John C. White discovered large amounts of AGCI-stored grain missing from Texas elevators.

### Support Urged From Vietnamese

Agence France-Presse

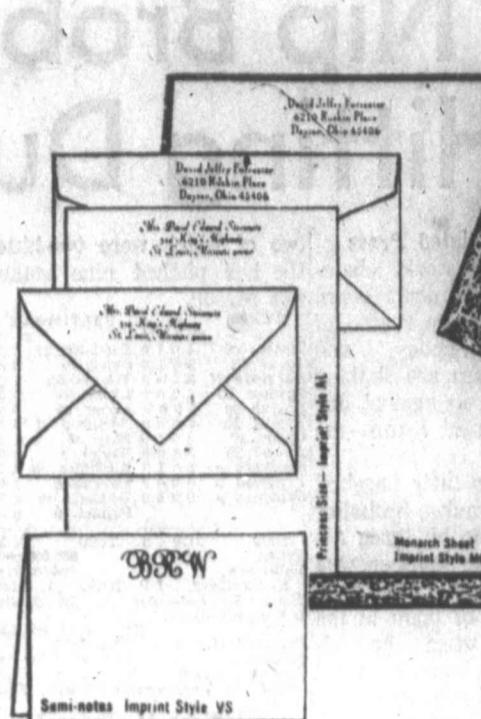

HONG KONG — Two Vietnamese officials in Saigon have called on Catholics in South Vietnam to support the revolutionary authorities and the nation in healing the wounds of war and rebuilding the country.

In a broadcast monitored here Sunday, Radio Saigon said this appeal was made two days ago by the vice president of the military administration and the vice president of the National Liberation Front (NFL) in Saigon.

The centerpiece and the most controversial aspect of his project, however, was a special agricultural loan fund of \$250 million. Offering 20-year credits at 2 and 3 per cent interest with no principal payment for the first five years, the loans last year were discovered to have gone overwhelmingly to large cattlemen instead of small farmers.

Many Venezuelans question whether it is feasible or even practical to try to move the rural dwellers back to rural areas. Several agricultural experts said the rural problem was not one of personnel but of efficiency.

In the last two months, the radio has reported several meetings between administration representatives and those of Christian and Buddhist organizations, the authorities seeking cooperation and the religious bodies pledging it.

### Ambassador's Ouster Still Unconfirmed

WASHINGTON (AP) — Sec-

retary of State Henry A. Kissinger has refused to confirm a report that W. Beverly Carter Jr. has been fired as U.S. ambassador to Tanzania.

The published account reported that Carter was removed from the post because of his involvement in negotiations to free three Stanford University students and a Dutch woman kidnaped from Tanzania by Zaire rebels.

When questioned Sunday by newsmen at the Western White House in Vail, Colo., Kissinger denied that Carter had been transferred out of the State Department, but avoided a direct answer when asked if Carter had been relieved as ambassador.

He said, however: "We are trying to maintain a principle that terrorists cannot negotiate with American officials."

"We want to protect the thousands of Americans who could become victims all over the world once we started that process — not only American tourists and students but also American officials," he said.

The published report said the black diplomat was being resigned to the U.S. Information Agency, with a reduction in status and pay.

Members of the congressional black caucus said they plan to question Kissinger about the matter at a meeting on Tuesday.

Capt. Frank Cannava was quoted Saturday as saying that the Army wouldn't transport the refugees to Guam until the Saigon government agrees to accept them. Lt. Col. O. B. Donaldson said Sunday that report was in error and apparently resulted in a misunderstanding.

"We haven't sent any (refugees wishing to be repatriated) out of here in awhile, but that has just been because we haven't had enough to warrant a flight being sent in," Donaldson said.

Donaldson also said the refugees who had applied for repatriation "are in no hurry to go. Once they get to Guam, they'll just be sitting there."

# Stir In A Little Bit Of Everything And ...

By STEPHEN KLAIDMAN

The Washington Post  
LANTANA, Fla. — The recipe goes something like this — take a generous helping of offbeat crime, a dollop of history and a sprinkling of bloopers, and mix with a human interest roux of rags to riches and good Samaritans. Stir in a tablespoon each of UFOs and the occult.

According to "Uncle Frank," biography of the racketeer Frank Costello, "Each week, Costello would loan (sic) his young friend (Pope) \$10,000 to meet operating expenses. Pope would repay the loan promptly the following week in two \$5,000 installments as revenue from newstand sales rolled in."

Pope believes that "the best writing" and he has a cardinal rule that "everything we run must be of interest to more than 50 per cent of the readers." Brian Wells, a senior editor who was running the newsroom in the absence of editorial director Iain Calder, described the process by which the lead story is selected every week, a decision, like all others at the Enquirer, in which Pope has the final word.

"We don't say 'which is the most important story,'" Wells said. "we say to ourselves, 'Which one will sell more?'" It's our shop window.

We give 'em things they want. Jackie O is the hottest thing at the moment. She pushes us up to 4.8 million. There's a difference of 800,000 on a

JACKIE O or a Christian (Onassis) headline. To see a figure of 4.8 million come up on the board, that's a satisfaction."

"Circulation had stalled at about a million and conventional

newstand sales rolled it together on Saturdays.

"The first year, I lost \$100,000 and, the second year, another \$100,000. I borrowed money from friends every Friday to pay the employees, who would only take

language editions. The current market, which is reached entirely by trucks — they used to come into Florida loaded with manufactured goods and go back empty, now they go back loaded with Enquirers — is all over the United States and part of Canada, but the highest sales are on the East and West coasts of the United States.

The Enquirer is the opposite of conventional newspapers in that 80 per cent of its revenues are generated by the sale of the paper and only 20 per cent by advertising. Ninety per cent of sales are over the counter and 10 per cent subscription.

Pope's ambitions for the paper go beyond just increasing circulation. "Hopefully," at some time, we can become the champion of the public," he said.

The Enquirer crusades against excessive government spending, frequently with by-lined articles by members of Congress such as Les Aspin D-Wis., and the paper is negotiating with Secretary of the Treasury William Simon for a contribution.

When asked about those discussions, a spokesman in Simon's office indicated that the secretary would be happy to contribute something and that "we treat them (the Enquirer) the same way we would any other publication — with 4 million circulation."

Meanwhile, the Enquirer, which has published a fairly good string of medical exclusives, is preparing to expose wasteful spending at the National Cancer Institute.

It also has a series in the works that Pope says, "goes into the entire, complex, massive, antitrust picture in this country."

When asked how the Enquirer would deal with such a sophisticated and technical subject in easily comprehensible terms, Pope said:

"We'll simplify it to the extent that we'll present it as we see it."

**Hartke's Offices Bugged In 1970, Paper Charges**

INDIANAPOLIS (AP) — Sen. Vance Hartke's offices were allegedly bugged before the 1970 election by persons trying to gain information on the Democratic contributors, the Indianapolis Star said today.

It also has a series in the works that Pope says, "goes into the entire, complex, massive, antitrust picture in this country."

## Weekend Deaths Decline Slightly

By The Associated Press  
Texas recorded a somewhat smaller violent death toll during the weekend than often is the case.

The number of fatalities between 6 p.m. Friday and midnight Sunday reached a total of 21, including 13 in traffic, five homicides, two drownings and one from lightning.

These were among the victims:

Three members of a Dallas family burned to death Saturday night when their station wagon and a car collided in North Dallas. Killed were Horace B. Williams, 26; his wife Fanci, 26, and his stepson, David Crann, 6. David's sister, Jennifer Crann, 5, suffered only minor injuries as she was thrown clear.

Charles Nanny, 16, of Barnhart was killed Sunday night when the car he was driving ran off Farm Road 2469 about 15 miles west of Metron in Iron County and rammed into an embankment. His injured brother Roscoe was taken to a San Angelo hospital.

Mark Davis, 20, drowned Sunday afternoon in the Trinity River west of Moss Hill in Liberty County.

Passersby found the mangled body of Miguel Gutierrez, 18, of Port Lavaca beside Farm Road 755 at a point 14 miles west of Rachal in South Texas. Officers said he apparently was run over by a vehicle but none was found at the scene.

Carl J. Pedigo, 47, of Beaumont was killed Saturday when his car ran off Texas 59 near Splendora and hit a tree.

Lightning struck and killed Higinio Benites, 36, of Highlands as he was working on a construction job Saturday near Barbers Hill in Liberty County.

A San Augustine man, Kenneth Ray Lover, 20, was shot to death in a restaurant early Saturday. Another San Augustine man was arrested, police said.

Ted Estep, 65, of Dallas was

### Soldier Drowns In Lake Altus

ALTUS, Okla. (AP)—Allan W. Hopkins, 27-year-old Ft. Sill soldier, drowned Sunday in Lake Altus, authorities said.

The Highway Patrol reported Hopkins and four companions were swimming about 100 feet from shore in 12 feet of water when Hopkins shouted for help.

A rescue attempt by Hopkins' nearest companion failed after he was almost pulled under by the victim. The body was recovered about three hours later.

### Consulting Firm Employs Ziegler

NEW YORK (AP)—Ronald L. Ziegler, White House press secretary during the Nixon administration, has taken a job with a consulting engineering firm and will have "extensive responsibilities" in the Middle East.

Ziegler, whose salary was not disclosed, will have "lots to do with Tehran" as manager of international services for Syska and Hennessy, the firm's executive vice president, Arnold Windman, said Friday. Ziegler is tirely dependent on American aid."

### No job is too tough for a Payne Air Management Specialist.

That menacing beast you're looking at is a tourist attraction in the desert near Palm Springs, California. It didn't scare us a bit.

With all its king sized problems (large rooms, small rooms, tunnels, stairs), a Payne Air Management Specialist was able to air condition it.

Without any problems.

Which makes our point.

If a Payne Air Management Specialist can expertly air condition this monster, he can air condition your home as well.

## Inmate Has First Visitor After 43 Years In Prison

AUSTIN, Tex. (AP) — Raul Morales, a 79-year-old Mexican migrant worker, has spent 43 years in prison in the Texas penitentiary at Huntsville. Until recently he had never had a visitor or even a letter from anyone.

Then Mary Lou Martinez, 43, a mother of five children, read about Morales in the Austin American-Statesman. She visited him. And she offered to let him live with her and her children.

"They won't let me go," Morales responded when Mrs. Martinez offered to take him home. "This is where I'm supposed to be. I have to get permission from my mother."

Morales, sentenced to life in prison for a West Texas murder in 1927, is deaf, uneducated and speaks an old-style Spanish that is difficult for most young Mexican Americans to understand, the Austin newspaper reported.

Mrs. Martinez was his first visitor, accompanying Albert Sample of the Comprehensive Offender Manpower Program (COMP) to see Morales.

"If I have enough love for five children, I surely have enough love for him, too," said Mrs. Martinez.

The State Board of Pardons and Paroles has offered to release Morales if COMP, a Texas Bar program, can find a home for him.

Before Mrs. Martinez, a medical clerk who has worked in volunteer programs, left the prison, Morales asked her to sign a slip of paper.

He told her he wanted to prove to other inmates that he had a visitor.

## Announcing BAKER'S ENTOMOLOGY & PESTICIDE SERVICE

Now open to serve you—temporarily located at 2406 W. Indiana, new building under planning

### Commercial & Residential Exterminating

Dennis J. Baker—Owner

Graduate of Texas Tech University, B.S. Entomology Member Entomology Society and American Phytopathological Society

Licensed for General Pest, Termites, Fumigation Lawn & Ornamentals

Complete Consulting Service. Identification and control of insects and plant diseases also is offered.

Combined with the latest equipment, Baker's gives you expert knowledge of insects and experience to serve and satisfy you.

When dealing with Pest, call the Best.

# COM KEY 1434 for small and medium-sized businesses... it's an intercom, a paging system, a telephone plus!

With COM KEY 1434, anyone in your office can pick up any of 14 lines... from up to 34 phones.

It works as an intercom, with a speaker built right into each set.

It also becomes a paging system, carrying your message over wall-mounted speakers.

And, as an additional option, it can even play music when you put someone on hold. You choose from your own music or program source.

It also offers multi-line conferencing. Night transfer to a pre-selected phone. A privacy feature that prevents accidental pickup of a line in use.

There's a smaller COM KEY system that handles up to seven lines from up to 18 phones. It's called COM KEY 718.

Both COM KEY systems offer the businessman one more important feature—economy for the business on a budget.

COM KEY is part of a new generation of communications equipment. Call the telephone business office and ask to have a communications consultant contact you with details.

Before you get down to business, call the experts in the business.
