MULESHOE, BAILEY COUNTY, TEXAS, THURSDAY, JULY 9, 1931

NUMBER 23

C. E. POCHEL BRINGS IN BLACK WATER VALLEYS' BIGGEST WELL

The Last Lap Of Wheat Harvest On Will Hold Grain

Wheat harvest in the Muleshoe section went into its final Monday morning, with good weather and prospects of continued favorable conditions. Nearly one-third of the 200,000 acres of wheat grown in this vicinity remained uncut the first of this week, but it is thought by the close of the week practically every acre will have been harvested.

It is being estimated that fully one-half the wheat crop this year is being withheld from the market for the present, many of the farmers who have no efficient storage, piling it out on the ground.

Whether the price will be better seems largely guess work, and most anyone's guess is as good as another, yet farmers of this section are hopeful that it may go up some.

The Grain Stabilization Corporation has announced it will limit its sales of wheat to a maximum of five million bushels per month for the coming year, but strong pressure is being brought to bear that this accumulated government wheat be kept off the market entirely until the grown crop this year has been sold by the farmers.

Wheat growers are hopeful of such arrangement and believe the temporary holding of their grain may be worth while.

Muleshoe Citizens On Vacation May Take Autos On Trip

Muleshoe millionaires who are contemplating a summer vacation trip during this summer may now take their autos with them, according to a recent arrangement made by the Santa Fe railway system.

The change for this service will be five adult, regular round-trip All Year Tourist or Summer Tourist fares for each automobile and not more than two passengers on the train.

In other words, if you and your wife want to go to California and take the car by freight, you buy five tickets, and your wife use two of them and the other three are used for the car.

The railroad company accepts the car at the freight depot, but the oil and gasoline must be drained from it. The railroad will load it and unload it when it reaches California. The freight train schedule is three and one-half days between Muleshoe and California and the passenger schedule 36 hours.

In order that the car may reach California at the same time the passengers do, it is possible to load it on the freight train 168 hours before the passengers get on the train.

Fire Boys Have A Water Fight; Fire Lincs Are Enforced

Members of the local fire department entertained the public last Tuesday night with a water fight staged on the vacant lots near the school center. The contending fighters were: Bill Garrett, captain; David Anderson, O'Neil Rocky, Ike Thompson, Coy Burkhead; Burd Batts, captain; Herschel Alsop, Jim Cox, Delma McCarty, Leonard West.

The fight was "nip and tuck" all the way through, Chief Gardner finally declaring it a draw.

To Enforce Ordinance

It is stated by officials that the ordinance relative to handling of fire apparatus in Muleshoe will, in the future, be strictly enforced. During any run to a fire it is especially requested that people clear the streets of their autos, giving the truck full right-of-way. Also anyone driving over a laid fire hose will be promptly prosecuted for their violation.

Next Tuesday night a chemical and supply tank practice will be held.

MULESHOE vs. LAZBUDDY

The Clovis baseball team failing to meet their schedule for a game here July 4th, the Muleshoe lads played the Lazbuddy team in a game 18 to 7 in favor of Muleshoe.

Hard hitting on the part of the local lads, was the feature of the game.

John D. Sloan, coal miner of Kona, Ky., aged 64, is the father of 34 children.

E. L. CORR BUYS TAILOR SHOP FROM DAVID ANDERSON

E. L. Corr, recently of Stillwater, Okla., where he has been attending the Oklahoma A. & M. college, has purchased the Muleshoe Tailor and Pressing Shop, of David Anderson, taking charge of the business last Tuesday.

Mr. Corr has had considerable experience in this line of business and assures his customers of satisfactory service. He is a brother of Mrs. M. P. Smith, this city.

Two Inches Of Rain Since July 1st Is A Big Benefit To Crops

More than two inches of rain since the first of July has put crops of this section in excellent condition, while wheat harvesting was only halted for a day or so and no damage reported to the wheat fields because of the rains.

Wednesday of last week there was 1.34 inches of rain, and Saturday night .43 of an inch, according to the government records kept by Judge R. J. Klumpp at Muleshoe.

Practically all row crops in this section were in a flourishing condition before the rains, and since the precipitation they are growing rapidly. There is every present indication of bumper crops in the Muleshoe vicinity this fall.

Levi Churchill Has Almost Model Farm All Crops Irrigated

"Knowing your stuff" is an old expression and a trifle one. And it may be as aptly applied to farming as to many other subjects.

Levi Churchill Jr., certainly "knows his stuff" when it comes to farming by irrigation, and he is making a vivid demonstration of that knowledge on his farm about two and one-half miles due north of Muleshoe.

When a representative of the Journal visited his place last Monday afternoon he was found in the midst of a 12 acre bean field doing a first class job of cultivating, with the assistance of a couple big black 16-hand high mules who were pulling the cultivator back and forth across the field leaving it practically clean of everything but the beans, which now average about eight inches high and look as promising as could be asked.

Churchill came here last fall from Powell, Wyoming, where he had several years experience as an irrigator. That is, he has learned his stuff, and he insists this is a much better irrigation country than where he came from. The soil is richer, he says, works better, the water used on the crops is absolutely free from any deleterious salts of any kind and the climatic conditions are all that could be asked by any farmer.

In partnership with Antine Horn, he has an irrigation well that yields 1,200 gallons of water per minute, and eight inches high and look as promising as could be asked.

Churchill this year has 80 acres in cultivation. There are 12 acres planted in Great Northern white beans (navy type), 4 acres in pinto beans, 15 acres in double row sudan, 5 acres sweet clover, 10 acres Golden Hersey millet, 16 acres in Indian corn, 1/2 acre cantaloupes, 1/2 acre squash, 2 acres Irish potatoes, 1 acre cabbage, a garden that has a wonderful variety of truck in it and which looks as flourishing as the wheat growing in the Mississippi delta south of New Orleans.

Churchill is greatly pleased with his investment here, and wouldn't think of returning to Wyoming for any consideration. He is planning putting a well of his own down next year, and says he also has plans for still lessening the cost of irrigation, which is generally considered exceptionally low in this valley.

PLEASANT VALLEY CLUB MEET

The Pleasant Valley Home Demonstration club met Monday afternoon at the home of Mrs. C. R. Matthews with Mrs. I. F. Willman as assistant hostess. Seventeen members and two visitors were present. Plans were discussed for the Club Entertainment. Mrs. O. P. Burnham and Mrs. Harrell were elected delegates to College Station.

Refreshments of ice cream and cake were served at the close of the meeting.—Reporter.

BAILEY COUNTY EGG DEMONSTRATORS PROVE EGGS CAN BE SOLD AT A PROFIT WHEN PRICE IS ONLY 10 CENTS DOZEN

The poultry demonstrators of Bailey County are proving to themselves there is a profit in eggs at 10 cents a dozen.

During May the demonstrators produced eggs at six cents a dozen, and sold them at 11 cents, leaving a profit of 5c per dozen.

The cost of producing eggs in June was 4 1/2 cents, and the price received was 10 cents, leaving a profit of 5 1/2 cents. The demonstrators produce infertile eggs and get from one to two cents a dozen above fertile egg price.

The names of the demonstrators are given here: W. R. Young, Longview; W. M. Pool, Purity Seed farm; Mrs. W. M. Jant, Circleback; D. W. Danielson, J. S. Williamson, J. B. Sheriff, B. Waller, all of West Camp; Lloyd Queensberry, Y. L.; Joe Paul, Lazbuddy.

These people are keeping an accurate record of their poultry operations.

FARMING ONLY FOR MONEY IS SELDOM PROFITABLE SAYS A LOCAL REALTOR

"There are plenty other compensations for living on a farm than for the money one makes," says R. L. Brown, local realtor, and who himself owns a good 160 acre farm a few miles northeast of Muleshoe.

During the past eight years, Mr. Brown has brought hundreds of people into Bailey county who have settled on farmsteads and developed comfortable homes. "It's somewhat of a pleasure," he said, "to drive over the country and point out the various people I have located in this section, most of whom are getting along very nicely, present conditions being considered, and nearly all of whom would not think of leaving this section if they had the best chance in the world offered them."

"The farmer of today may choose to make a wage slave of himself, having nothing in view but the dollars he is to receive in the fall from his crop, but he loses sight of his opportunity to become a creative worker, a farm-maker and a home-maker, he puts himself out of harmony with the purpose of nature and eventually pays for his ideas of drudgery for mere moneymaking."

"The farmer who farms first of all to have a good farm and to make a good living from it, generally makes a good living and has some money besides. Get the other hand, how often the farmer who farms just for money makes neither the money or a happy living."

"The outlook for 'money crops' this year is not very flattering, but the outlook for health and happiness on a good farm is bright."

POSTMASTERS WILL ISSUE BURIAL FLAGS FOR VETS

Under date of May 22, 1931, the Postmaster General of the United States authorized all county seat post offices in the United States to assist the Veterans' Administration in the issue of burial flags, according to a statement made this week by Mrs. B. W. Carles, Muleshoe postmaster.

Each county seat has been designated as an issue point of all Regional Office of the Veterans' Administration as a distributing point for burial flags. Detailed instructions covering the distribution and issuance of these flags have been sent out by George E. Jams, Director of the Veterans Bureau. The new plan is to become effective just as soon as all Regional Offices are supplied with the necessary instructions and forms.

CITIZENS USING WHOLE WHEAT OCCASIONED BY FLOUR COST

It is reported many citizens in and around Muleshoe have turned to using whole wheat flour for bread making, and much cracked wheat for breakfast food, occasioned by the present cost of white flour.

A Muleshoe citizen who has had several years experience in the milling business, stated 100 pounds of flour may be reduced from two and one-half bushels of feed and have the bran and shorts left over. The wheat for this 100 pounds of flour would cost 75 cents, on present price basis, and the flour sells for an average of \$1.25 per 48 pound sack.

One hundred pounds of flour will make 160 loaves of bread, scaled off at 16 ounces per loaf, it was stated.

Turbine Pump Yields 2,000 Gallons Water Per Minute at Low Cost 12 1-2 Cents For 3 Inches an Acre Irrigation

Washington State Irrigator Who Bought 320 Acres Rich Valley Land Will Have 200 Acres Under Irrigation This Year

C. E. Pochel has the honor of bringing in the biggest irrigation well yet produced in the Blackwater valley, it being located on his farm about 10 miles east of Muleshoe. Its initial development was completed last Friday afternoon when it threw a stream of 2,000 gallons per minute.

This well was drilled by A. B. Hays, well known driller of this section. It is 16 inches in diameter and 100 feet deep. The first stratum of water was encountered at 15 feet, and the second stratum at 22 feet, which promptly raised to within 13 feet of the surface. From the 37 foot level on down the formation was practically all water bearing material, an exceptionally heavy flow being struck at the 65 foot level.

The well is equipped with a No. 14 Kimball-Krogh single stage turbine pump, located at the 30 foot level, and propelled by a McCormick-Deering 30 h. p. industrial engine. This equipment gives a standard yield of 1,800 gallons per minute at an engine speed of 1,450 r. p. m., while a slightly increased speed quickly brings the flow up to over 2,000 gallons per minute. When Mr. Pochel came here from Weta-discharge pipe is capacity filled, the water shooting out more than four feet into the main ditch where it is taken away into the laterals for crop irrigation purposes. Here the completed digging of this well in just eight days time. It contains 45 feet of perforated 16 inch and 35 feet of 14 inch perforated non-rust steel casing.

Mr. Pochel came here from Weta-tches, Washington about three years ago, where he had several years experience in farming by irrigation. Here he purchased 320 acres of rich valley land about 10 miles east of Muleshoe. R. Clark, an experienced irrigator, of 300 acres of this land in cultivation this year, 200 acres of which is being irrigated. The crop consists principally of maize, sudan, hogs and kafir, also 10 acres of alfalfa.

Some idea of the efficient service of this well may be gained in the fact that Mr. Clark is now irrigating at the rate of approximately two acres per hour. Last Saturday, as a test, one and one-third acres were measured off, and covered with three inches of water in exactly 37 minutes. Mr. Pochel states with this equipment he can irrigate his land three inches deep, by flooding system, at a cost of 12 1/2 cents per acre per irrigation. Three or four irrigations are generally considered sufficient for row crops, and corn thus irrigated in this valley has been known to produce as much as 90 bushels per acre.

Hays is this week putting down another well to be handled by a windmill for household purposes, and Mr. Pochel has started construction of another complete set of improvements on his farm which he will occupy when finished.

He contemplates putting down another irrigation well of similar size and type next year.

Pochel is wonderfully pleased with his investment in this valley, and especially happy over the big new well recently brought in. He declares the possibilities of this section to be unlimited, the big feature of this valley, in addition to its exceptionally low draw-down, which furnishes the life-giving nectar of earth to the growing crops at exceedingly low cost.

Fire Chief Warns Against Using Oil Rags; Care Needed

Spontaneous combustion may be the cause of several fires during the coming two or three months, Fire Chief A. J. Gardner this week warned.

There has already been one fire in the community this year which was traced to spontaneous combustion, and with the advancing of hot weather the danger from this source is increased, he said.

There are many housewives in Muleshoe who have the practice of using oily rags to clean the dust from floors and furniture, and when through do not leave them in a place that is well ventilated.

These rags are highly inflammable from the heat they generate when in a confined place. It is also a known fact that articles do not always become ignited when the temperature is at the highest point, but a certain condition of the atmosphere will also generate the flame which may burn down your home.

It's always better to be safe than sorry, Gardner said.

Funeral Services Of Hugh Kennedy Held Wed'n'day Last Week

Funeral services for Hugh T. Kennedy, who met his death in an automobile accident June 29, was held Wednesday of last week from the Methodist church, conducted by Rev. W. B. Hicks, Methodist pastor, assisted by Rev. C. A. Joiner, Baptist pastor. Interment of remains was made in the local cemetery.

It was an exceptionally large crowd that followed the deceased to his last resting place, paying their tributes of respect to a life so suddenly flicked out. The burial was marked by large and beautiful floral offerings.

Mr. Kennedy was born April 22, 1893, and was married November 30, 1917 to Miss Lorene Wattenborger. He is survived by his wife, two children, a large number of other immediate relatives and a host of friends.

For the past 17 years he had been a resident of Bailey county, and during recent years had been operating a bakery business in Muleshoe. His untimely death is mourned by many.

Honorary pall bearers at the funeral service were: Good Hardin, Ty Young, Homer Mardis, Connie Cupit and Arnold Morris; active pall bearers were Tom Elrod, Harold Morgan, Harold Mardis and Nolan Faulkner.

No party is a complete success these days unless somebody makes a fool of himself.

—W. B. HICKS, Pastor.

GIRL SCOUT MEET

The regular meeting of the Girl Scouts was held at the Court House Tuesday afternoon, and after the lesson members went to the H. A. Douglass farm where a good swim was enjoyed.

The Douglass sisters served delicious ice cream following the "water walk." Visitors present were Mesdames H. W. Roberts, H. A. Eckler, and Miss Billie Ferguson, of Lubbock.

The lesson for next Tuesday will be on camping. All girls over 10 years of age are welcome to attend.—Reporter.

JOINER CIRCLE MEETS

The Joiner circle W. M. U. met last Monday at the home of Mrs. Hupp, there being 15 members, three of them new ones, and one visitor present.

The devotional reading was from the thirteenth chapter of First Corinthians. The Bible study was conducted by Mrs. J. C. Weaver, finishing the book of Genesis.

The meeting July 20th will be held with Mrs. Danner at the Muleshoe hotel, and the assigned lesson will be the first four chapters of Exodus. All members are urged to come with a prepared lesson. Visitors are welcomed.—Reporter.

METHODIST CHURCH

Sunday School 9:45 a. m., Good Hardin, superintendent; a class for every age. Come and be in your place. Morning worship at 11:00 a. m. Subject "Following Christ."

All Leagues meet at 7:30 p. m. on Wednesdays at 8:30 o'clock. Subject: "Going Fishing."

For the morning service, Mr. Glen Rocky will play "Meditation," by C. S. Morrison. For the evening service, Mrs. Fay Elrod will play "Rock of Ages," by James J. Freeman.

We are planning to have a community wide revival, beginning the fifth Sunday in August.

—W. B. HICKS, Pastor.

ROCKEY GIVES FACT

Discussing the present market price of wheat, Neal Rocky converted some of his family expenses into terms of bushels of wheat which gave some interesting comparisons.

Estimating his household expenses, Mr. Rocky stated it took the equivalent of eight bushels of wheat to pay his gas bill last month; 21 bushels to pay his water bill, 22 bushels for the electric bill, 180 bushels for groceries, 90 bushels for rent, 180 bushels for clothing and similar necessities, 45 bushels for cow feed or a total of 546 bushels to defray his total monthly expenses. This would total 6,552 bushels for the year.

Mr. Rocky stated it took seven bushels of wheat to buy one of his suits of clothes, and a pair of overalls, and smoking a package of cigarets per day it would take 18 bushels to pay for a month of smokes. He estimated it would take the equivalent of 66,000 bushels of wheat, at present prices, to pay for the running of the Muleshoe schools during the 1931-32 term.

—Amarillo Club Coming

A letter was received here Monday by R. L. Brown, secretary, stating that a delegation of the Amarillo Kiwanis club would be here Friday, July 17 to visit with the local club and put on a program.

The Most Sensational MONEY-SAVING EVENT

This Community Has Seen In Ten Years
OPENS FRIDAY, JULY 10

\$40,000.00
Worth of
Merchandise

Bought at Odessa, Tex.,
at 50 cents on the dollar.
This Great Saving will be
passed on to our thousands
of friends in Eastern New
Mexico and West Texas.

A Sale That Completely Covers Your Needs!

BUY YOUR COMPLETE NEEDS DURING THIS SALE

On July 1st we announced to all our friends and good customers to whom we have had the pleasure of extending a thirty day charge account, of a change in the policy of our store. In order to serve you better from a standpoint of Values and Prices, we decided to operate entirely on a cash basis, starting July 1st. This is our first step to prove that from now on for CASH we are going to serve you in a bigger and better way.—J. E. PRICE, Manager.

Little Cans For Little Kitchens

THERE is no caste distinction in the Corner Grocery Store. Endives, artichokes and Brussels sprouts lay exposed to the gaze of the hot polloi like common cabbage, onions or potatoes. Up on the shelves a big blooming can of peaches awaited its buyer, next to a tiny can of shrimps.

"Where do you think you'll get in the world, you poor shrimp!" scoffed the big can of peaches. The shrimps trembled to the depths of its eight ounces and made no reply.

Enter—A Customer

Just then a customer entered. He looked extremely newly-wed. Handing the grocer a neatly written list of canned foods, she said, "I want the 8-ounce size of apple sauce, asparagus tips, beans, beets, blackberries, carrots and cherries—and, oh, yes—add an eight-ounce can of shrimps."

The grocer's large forelegs clinched the trembling can of shrimps and it fairly tumbled from the shelf.

In the bride's sweet little kitchenette, the can of shrimps had "arrived." It listened rapturously to the conversation as its lid was out off with a capper.

"Aren't they cute, John—these little eight-ounce cans? And they are so practical. You see they hold just enough."

ten list of canned foods, she said, "I want the 8-ounce size of apple sauce, asparagus tips, beans, beets, blackberries, carrots and cherries—and, oh, yes—add an eight-ounce can of shrimps."

The grocer's large forelegs clinched the trembling can of shrimps and it fairly tumbled from the shelf.

PERSONAL ITEMS

Rex Hammock and T. J. Findley of Sudan, spent Sunday afternoon with Miss Lela and Ellen Burnham of the Y. L. community.

Judge and Mrs. J. D. Thomas and daughter, Norma Gene, and Miss Beulah Kistler, of Farmville, spent the 4th, and also Sunday with home folks, Mr. and Mrs. W. H. Kistler, of Muleshoe.

Mrs. Mary Jones, of Tahoka, is here for a month's visit with her daughter, Mrs. L. R. Bartley.

Add to War's Costs

Among the expenses of every war, according to the Atchison Globe, must be reckoned the cost of erecting the usual war memorials. "They're sort of like framing the mortgage when it is paid off," it observes.

Farmers Who Plant Soy Beans Have An Excellent Prospect

The soybeans over the county are showing up well at this time. Very little complaint has been made of rabbits eating the plants.

According to county agent Reynolds, the varieties planted are mostly Loreda, Manchú and Virginia. Manchú is an early one, maturing in about 110 days; Virginia matures in 125 days and Loreda is a late one requiring about 140 days to mature.

Anyone desiring to see soybeans growing may do so by visiting the farms of one of the following named men below, each of whom is reported to have several acres growing:

J. E. Embry, Burnham's farm, I. F. Willman, W. M. Witterding, John Bickie and H. P. Brannum, all living in the vicinity of the Y. L. community. M. S. Stidham has five acres one-half mile southwest of Muleshoe. A Mr. Black some four or five miles northeast of Bulla did intend to plant early in the season. Ulysses King at Fairview is said to have a fine patch of the soybeans. W. M. Pool, Jr., of the Purity Seed farms, has a good stand of these beans. O. N. Robison of Y. L. has about 14 acres planted later than most of the others. It will be interesting to watch these fields and observe their growth.

Most of the men planted them for hay, while a few hope to sell some seed another year. Several men in the Y. L. territory have two or three varieties, and have a chance to observe which will be best for our purpose. For hay the plants should be cut when the seed pods are about half grown or when the pods are about full formed, but before the leaves begin to turn yellow. If waited too long the stems become woody and the leaves drop off easily. Soy beans will die after the pods are matured. Those familiar with cowpeas will remember that they continue blooming and stay green until frost.

When J. W. Wolf of Le Panto, Ark., awoke from a nap he found a large water moccasin coiled around his thigh.

Progress News Notes

The Home Missionary society met July 1st with Mrs. Ira Parker with 10 members and 3 visitors present. An interesting lesson was rendered from Numbers. We meet next week with Mrs. Peacock, and July 15 with Mrs. H. V. Snyder.

The Intermediate class met at their usual hour, with 16 members present. The Busy Bees will entertain July 19 at the home of Mrs. C. Willhite. Every member urged to be present.

Mrs. T. L. Snyder and daughter, Mary, Mrs. Gross and daughter, Fern, Mrs. H. V. Snyder and daughter, Vern Rae, went to Plainview last Wednesday to visit Mrs. Penton. They reported her doing as well as could be expected.

The people are sure enjoying the rain this last week.

Everyone remember that the revival meeting will begin Sunday morning. Everyone is urged to come.

The young people rendered a very interesting program at League, Sunday night. Come, lets make it what it should be.

Mr. and Mrs. Tracy and Enola Hall-jume spent Sunday at the Killough home.

Mrs. Chas. Elmore and children and sister and father called at the Gross home, Saturday.

Miss Ruth Burton returned to Canyon Monday, after spending the weekend with home folks.

Elsie Marcum and Pauline Burton took Sunday dinner with Oleta Kemp, Juanita and Oleta Kemp, Elsie Marcum and Pauline Burton spent Sunday afternoon with Fern Gross.

Oleta Kemp took supper with Elsie Kemp, Sunday.

Lois McDorman, Lucile Long, Esther Marcum, Margaret Gwyn and Nell McWhirter spent Sunday afternoon with Velma and Hester Kemp.

Mary Snyder and Mrs. T. L. Snyder and her two grandchildren, Charles and Verna Rae, spent Monday afternoon with Mrs. Gross and Fern.

Mr. Penton made a flying trip home to attend to business, the first of the week, after which he returned to the bedside of his wife, who is in a Plainview sanitarium.

SOME FOLKS CHASING A RAINBOW HAVE FOUND POT OF GOLD ON SOUTH PLAINS

The proverbial rainbow has a wonderful fascination for some folks, and there are always lots of people who are chasing it.

Only a few days ago we heard a group of men on the streets giving Muleshoe h---. They said the school taxes were exorbitantly high, that the cotton and wheat and poultry buyers had all gone into caboots to hold down prices, merchants had a common agreement in selling certain articles, and the Journal ought to lambast the stuffin' out of the whole bunch.

Some folks seem never to be entirely satisfied, and perhaps the present financial depression has somewhat enhanced the tendency. Farmers around Muleshoe go to neighboring towns to sell their wheat, cotton and produce, and those from neighboring towns bring their stuff here for market. Muleshoe women go to Clovis and Amarillo or Plainview to shop, and frequently pay more for their goods than they could have obtained them for at home.

So it goes—the end of the rainbow is always somewhere else. The good things always lie a little beyond. Livestock break down the fences trying to get into the other pasture where the grass looks a little greener, and humans frequently have the same tendency. Yet, after all, the fellow who makes good is generally the one who seeks out a reasonably good place in which to live and stays with it. He

Fern Gross took supper with Juanita Kemp.

Mrs. H. V. Snyder and Verna Rae, Mrs. E. C. Chitwood and Mrs. Earl Chitwood took supper with Mr. and Mrs. H. V. Snyder, Sunday.

There was a good attendance at Sunday school, Sunday.

Mrs. Parish, of Dallas, Mr. and Mrs. Beauchamp, of Matador, Mr. and Mrs. Tom Kennedy, of Matador, Miss Lillie Kennedy, of Lorenza (Mr. and Mrs. Elrod and Miss Mildred Dilahunty, of San Angelo, visited in the H. C. Kennedy home and attended the funeral of Hugh Kennedy.—Reporter.

DRY SEASON ON A MULESHOE RANCH STARTED TOM VAUGHN ON CAREER AS TWIRLER; STARRING FOR BEAUMONT

Nearly all the older Muleshoe citizens know Tom Vaughan son of J. F. Vaughan, this city, the perhaps some of them are not very familiar with his prowess as a leather twirler on the diamond field of baseball. Commenting on his meteoric rise to membership in the Texas League, the Dallas News recently ran the following story:

"A drought which hit the ranch country around Muleshoe, Texas, back in 1922 may be said to have given the Texas League a colorful pitcher and the Beaumont Exporters one of their best mound bets to figure prominently in their sensational spurt during the current baseball season. The dry spell left little for the cowboys to do, and as they had eleven men on the Vaughan ranch, they decided to organize a ball team. That started the pitching career of Tom Vaughan, who has won ten games for the Shippers this season, and who is the only real cowboy player in the circuit. Tom dresses the part too.

"Tom's performances on his ranch nine was so impressive the Patriotic club persuaded him to 'line up' and he turned thirteen victories in seventeen starts. The next year, 1923, the Las Cruces, N. M., manager, who had heard of Vaughan's prowess on the mound, made a deal with him to hurl for his club at the rate of \$5 per game with a bonus of \$1 for every strike-out Tom was with Las Cruces only two months, and he says the club still owes him \$144 unpaid bonus money for fanning opposing batsmen. He averaged fourteen per game. The lowest number he whiffed in any contest was six and the highest twenty. Hurley, N. M., grabbed him the next year and he won nine out of ten games pitched. He began his career in organized baseball with Globe, Ariz. In the Arizona State

League in 1925, and back with the same outfit in 1926 he was the ace who pitched Globe to a pennant. He spent 1927 with the same team, 1928 with Bisbee, Ariz., and in 1929 with Ballinger in the West Texas loop. It was here a scout for Beaumont found him and he joined the Shippers late in the season as the league's oldest rookie. He has been with the Exporters ever since. He was ill last season and won only nine and lost sixteen for a team that finished fourth in the first half and seventh in the second half. He underwent an operation last winter and came back this spring better than ever. He now is rated one of the best bets on the Beaumont staff. Having won ten games already, he expects to pass the twenty mark before the curtain drops in September, and this will be a sufficient number to rank him among the league's leading winning chumpkins.

"Vaughn, who spends his off-seasons on his father's ranch near Muleshoe, with his wife and three children, will be 32 years old in August, and, in spite of his late start, he believes the best part of his baseball career lies ahead, for only last year he was still classed a rookie and he has learned a lot of tricks about pitching since coming into the Texas League. He's a quiet, unassuming fellow, not the least bit self-centered, and in some respects reminds one of Walter Johnson of Washington fame."

ROCKEFELLER KNIGHTED

This year's crop of honorary degrees has been large, as usual, many new doctors of Laws and what not having been conferred. Unique among recent titles conferred was that of "Knight of the Kingdom of God," bestowed upon John D. Rockefeller, not by a college, but by Euclid Avenue Baptist Church of Cleveland, for his "distinguished services to humanity."

Time was when the head of Standard Oil was looked upon as a prince of the lower regions.

CARD OF THANKS

Friends in near and friends indeed, and the wealth of friends who came to us during our time of need and sorrow last week in the loss of our beloved one was exceedingly helpful. Words but feebly express our sincere gratitude and appreciation for all the kindly acts sympathetic words and for all the beautiful flowers and other tokens of regret and kindly feeling granted us during the darkest hours of our bereavement—Mrs. Hugh Kenney and the family. 23-11c

B. A. U. PROGRAM JULY 12

Topic—"The Two Debtors." Bible, Quiz Leader—Ray Griffiths. Group Leader—Mrs. J. C. Buchanan. How Jesus Won Friends—W. L. Shaw.

What Happened at Simons Feast?—Mrs. Ray Griffiths.

What is the Measure of True Love?—W. B. Harlan.

What Encouragement Does This Bring to Sinners?—J. A. Benson.

How May We Show our Gratitude?—Byron Griffiths.

BAPTIST CIRCLE MEET

The Townsend circle of the Baptist W. M. U. met with Mrs. Shaw in missionary study last Monday. There were eight present. Every Baptist woman west of the church is urged to come. We meet next in Bible study, with Mrs. Eason—Reporter.

The Mothers and Daughters club met with Mrs. Clara Davis Wednesday last week, where they picked grapes off the stems, cut pieces for a quilt, and tore strips for a rug. Only a few members were present. Mrs. Mamie Askew, Mrs. C. F. Finley and Mrs. Hazel Reeder. The place and time for the next meeting has not been set.

The sand storm Saturday afternoon did quite a bit of damage to the crops in this community.

There was a large number present for Sunday school and church Sunday morning. Next Sunday is the Methodist church day. Rev. Peacock will preach. We invite everyone to come to Sunday school and church next Sunday.

The "armericate Sunday school class went to the Little Six windmill on a picnic Sunday afternoon. Three mothers and quite a few youngsters went. Some went horse back and others in cars. They were served with lemonade, cake and sandwiches. Everyone reported a good time.

The Senior Sunday school class went to the Monument dam Sunday afternoon on a picnic. A truck load and a car full of young people went. They climbed the hills and waded in the lake. They were served with lemonade and cake. Everyone reported a good time.

The Thicker, Dawson and Miller families took dinner with the Terrell family Sunday.

Singing Sunday night was well attended. It was a good singing. We invite everyone to come next third Sunday afternoon for singing.

Community Building

Up-to-Date Community Looks to the Future

The planning of cities and towns is a growing city activity. It was only a few years ago that the first real city plan was worked out. Now two-thirds of American cities and towns of more than 2,500 population have plan commissions working for the orderly development of these communities. There are 218 in all, according to a report issued by the Department of Commerce. But what is even more interesting, because it has in it an element of surprise, is that of towns of less than 25,000 population, ranging down to as low as 500, there are 433 that have either plan commissions or individual commissioners planning for the growth, the facilities and the attractiveness of their respective places. While the great possibilities of courageous city planning will be realized in the large centers, some of the most interesting achievements, however, will be in smaller places, where relatively more can be done with comparatively small outlay. There is increasing incentive for town improvement of towns, large and small. There are the merits of the improvements themselves, the aspiration and satisfaction of better standards of living. But there also is the element of competition, in business and in enterprise—Kansas City Times.

Home's Value Added To by Proper Landscaping

When conditions make it possible for the family to buy or build a larger and better home, the probable resale value of the property is an important consideration either in obtaining financing for the new structure or in disposing of the old one, and the landscaping of the surrounding plot will in turn considerably affect the value of the property. Trees, shrubbery and plantings in general give to the house background of traditional hominess that is difficult to obtain in any other way and have a never-ending influence upon those who live within the house as well as those who pass by. Beauty in the development of the garden is a matter of starting right and then going on in the same direction. Beautiful gardens do not just happen. The placement of the background plantings plays an important part. Informed opinion from your florist and study of garden schemes in standard publications are easily accessible guides against mistakes. Contractors' Responsibility As a decisive move in a program launched to safeguard the public from the acts of irresponsible contractors, the bureau of contract information has been incorporated under the laws of Delaware. Data on the manner in which each general contractor in the United States has fulfilled past contract obligations is to be gathered and utilized in an effort to eliminate conditions that have made for irresponsibility in the construction industry. This was announced by the Associated General Contractors of America and comes as the culmination of several years of debate about practices involved in the writing of surety bonds. The undertaking is a venture in co-operation between surety companies and organized contractors, although it is independently organized as a fact-gathering and investigating agency. Self-Evident "Is it true that a man who sows his wild oats is bound to reap sorrow?" asks a correspondent. Well, only a fool would expect a seed of roses from his onion bed, as the Italian proverb has it!

CABBAGE HERETOFORE CONDEMNED TO KRAUT MAY COME TO ITS OWN AS A BIG RIVAL OF ORANGE AND TOMATO

New cabbage, one of the most appetizing and nutritious of all vegetables, is on the market now in such quantities that its cost is comparatively small according to the Bureau of Home Economics, U. S. Department of Agriculture, which highly recommends its use in the more elaborate as well as in the low cost diet.

Cabbage is a protective food because of its mineral and vitamin content. Calcium is perhaps its most important mineral. Raw cabbage ranks with orange juice and tomatoes among the richest sources of Vitamin C and cooked cabbage differ in their Vitamin C content for heat destroys much of this antiscorbutic vitamin. The loss of this vitamin in heating varies with different vegetables but usually much

"DOUBLE F" CLUB

The first meeting of the "Double F" club was held at the home of Miss Katherine Hobbs, Wednesday afternoon of last week. Six members being present.

The following officers were elected: Clymena Peters, president; Adella Beavers, vice-president; Myrtle Burkhead, secretary-treasurer; Jane Bucy, yell and song leader; Marguerite Hicks, pianist; Inez Peters, study director; Katherine Hobbs, grace culture leader; Mary F. Willers, reporter. Club motto: "Always 'Double F'." Colors: Blue and white. Flower, blue tulip.

After the business session a social hour was enjoyed, after which refreshments were served, consisting of cake and punch.

To enable the proprietor of a San Francisco butcher shop to keep his accounts straight, a burglar left a receipt for the 75 pounds of meat he had taken.

of it is destroyed in cooking. Fortunately, raw cabbage is a delicious as well as an inexpensive food and lends itself to many combination dishes. It can be served as a salad with other vegetables or fruits, or can be chopped fine for sandwiches. Small children, especially, relish raw vegetable sandwiches, and, since a deficiency of Vitamin C causes irritability, lack of stamina and retardation of growth, foods which offer a generous supply should be eaten by them in abundance.

Green raw cabbage leaves are richer in Vitamin A and iron than the white variety. The inner cabbage leaves are relatively poor in this vitamin but it is not destroyed to any serious extent by ordinary cooking. Both Vitamins A and C are protective vitamins since they are a defense against nutritional deficiencies that are most likely to appear when the diet is composed too largely of grain products, meats, sweets, and fats.

Children as young as two years may have cooked cabbage provided it has not been cooked too long. In preparing it for the table, the outer green leaves should not be thrown away for they are the most valuable part of the head. Any discarded leaves might well find their way into the soup kettle. Cabbage sprouts, which grow on the stalk after the head is cut, are very tender and are green practically all the way thru. When boiled, they require only five or six minutes to cook. They are especially delicious if scalloped with cheese sauce or mixed with other greens and cooked with bacon—Southwest Plainman.

SHERIFF'S SALE

THE STATE OF TEXAS) COUNTY OF BAILEY) NOTICE IS HEREBY GIVEN That by virtue of a certain Order of Sale issued out of the Honorable District Court of 96th Judicial District of Tarrant County, on the 6th day of June, 1931, by W. E. Alexander, Clerk of said Court for the sum of Four thousand four hundred and fifteen and 31-100 Dollars and costs of suit, under a Judgment, in favor of Rochester Haddaway in a certain cause in said Court, No. 89701 and styled Rochester Haddaway vs. B. D. Martin; et al. placed in my hands for service, I, H. Sterling as Sheriff of Bailey County, Texas, did on the 10th day of June 1931, levy on certain Real Estate situated in Bailey County, Texas, described as follows, to-wit:

Being 177.1 acres of land, lying and situated in Bailey County, Texas, known and described as subdivision 7, League No. 202, Roberts County School lands, according to the survey, map or plat of said League No. 202, adopted by the Commissioners Court of Roberts County, Texas, and of record in the deed records for Bailey County, Texas, and levied upon as the property of H. L. Mayhugh and L. C. McCroly and that on the first Tuesday in August 1931, the same being the 4th day of said month at the Court House door of Bailey County in the Town of Muleshoe, Texas, between the hours of 10 A. M. and 4 P. M., by virtue of said levy and said Order of Sale I will offer for sale and sell at public vendue, for cash, to the highest bidder, all the right, title and interest of the said H. L. Mayhugh and L. C. McCroly in and to said property.

And in compliance with law, I give this notice by publication, in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in the Muleshoe Journal, a newspaper published in Bailey County, Texas.

Witness my hand, this 16th day of June 1931.

H. STERLING, Sheriff Bailey County, Texas. July 9, 16, 23, 1931

by the Commissioners Court of Roberts County, Texas, and of record in the deed records for Bailey County, Texas, known and described as the property of D. Martin, Virgie Lee Martin and L. Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1879.

JESS MITCHELL, Editor.

SUBSCRIPTION RATES
In Bailey County, one year, \$1.50; Outside of County one year, \$2.00.

Published every Thursday at Muleshoe, Texas.
Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses. Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week. The right of revision or rejection is reserved by the publisher.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices of matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

days," he said, "and for the most part didn't need them. Some farmers were always a little better fixed than others and most of us could borrow from them what little we needed. And in those days when a man signed a note, the lender knew it was going to be paid. Obligations were matters of honor then. Now days a bank has to take a borrower all up in a bunch of papers for security, and then don't know whether or not he'll get his money."

"There was pretty good old days, after all," said the farmer. "Of course we missed lots of new-fangled stuff we have now, but I don't know but after all we were better off then. And—maybe some of it will be a-coming back pretty soon," he concluded.

"This little Swedish boy just made up his mind to do the very best job of sandpapering he possibly could do. And so he went up—always putting his full capacity into every job.

The difference between the few who get ahead and the many who do not is that one thinks of a job as a stepping stone to something else, to something

bigger; the other thinks of what he will do when the whistle blows at quitting time.

You may not be able to make your boy see it in this light. But if you can, you've started him on the road to success just as surely as the sun will appear in the east tomorrow morning.

THE FARM MOVEMENT

In nearly any city newspaper one can find a story about the movement back to the farm. Mainly it includes persons who left rural communities in our time to avail themselves of attractive wages offered in the cities, but also life-long city dwellers who lost their jobs in the 1929-31 depression and are ready to use their savings in starting anew at making a living from the soil.

The list includes, too, city workers who love country life, and who are buying small tracts near their places of employment for the purpose of making a part of their living from garden, poultry and a cow. The movement has been quite noticeable during the past six months.

Land prices in the eastern and middle states have been greatly reduced during the past six or eight months, but farm lands in the Southwest have not been affected much in price. These southwest lands reach their maximum price in 1929 and have held it pretty well ever since. There is no present indication they will ever become any cheaper, according to the expressed opinions of mortgage companies and bankers.

Now is a mighty good time to invest in southwestern lands, and we know of no better opportunities existing than may be found in Bailey County, on the South Plains. Large or small tracts are available in this country, and those interested in irrigation will find in the Blackwater valley the richest of land, and an abundance of pure water that may be applied to it at less cost per acre foot than anywhere else in the United States.

We believe now is an excellent time for investment in this section.

COMMON PURPOSE

Anthropologists tell us that man in his early state lived apart with his own little family, and archaeologists say the first communities were formed by confederated families brought together for a common purpose—protection against man's natural enemies.

Today, man is distinctly a gregarious animal attracted more and more by community life. And men still build cities for common purposes.

In the city one finds protection against fire, disease and the enemies of society. One goes to the city for good schools and monumental churches, paved streets, employment, art, entertainment, the society of other men and the comforts of life denied the rural citizen. There is found the front rank of civilization.

The people of Muleshoe have a common purpose. It is the advancement of the community as a whole. That common purpose is hardly distinguishable from the purpose of each individual. That which benefits the individual usually benefits the entire community and that which benefits the community reacts to the benefit of each of its citizens.

Prosperity and progress come to those communities whose citizens have their eyes upon the largest number of common purposes. Success crowns the efforts of the man of purpose, and the city with a common purpose works as one man.

"Common purpose" creates new industries, increases business, minimizes unemployment, makes cities better places in which to live and performs miracles in community betterment.

ANNOUNCEMENT

About four years ago I purchased the Bailey County Elevator Co., business, and since that time have continued conducting the business under that name.

We now deem it advisable in order to better acquaint the trade with ourselves to change the name of our business to that of the "RAY GRIFFITHS ELEVATOR."

We have been serving the Muleshoe trade in our various lines for the past eleven years and need no introduction. We crave your larger patronage.

We are now better equipped to give you service than ever before, and will very much appreciate any business entrusted to us.

Water Not Sprinkle Plants In Summer For the Best Growth

Many property owners in and around Muleshoe have planted considerable trees, flowers and shrubbery during the past winter and spring months, and County Farm Agent Fred S. Reynolds calls attention to the fact that the hot days of this month are going to have a telling effect upon their existence unless they are given the proper attention.

"In bringing flower shrubs and trees through the dry, hot summer it is more important to keep the moisture in the ground by frequent cultivations and the maintenance of a dry mulch on top than to irrigate," said Mr. Reynolds. "All small plants and roses should be worked at least once a week. The average garden should be loose enough to allow easy penetration of rootlets, yet waxy enough to retain moisture. Well decayed stable manure worked in around the plants makes an excellent mulch. A finely raked bed is dry on top, and the loose soil reduces evaporation to the minimum.

"If the soil becomes so dry in spite of frequent cultivation that the plants do not thrive, then water the beds, if water is available. Do not sprinkle them, but water them. The sprinkling of water will never reach the roots, but the roots will have a tendency to reach up for the water and this is likely to bring about the freezing of roots in the winter time.

"Sprinkling of plants every day is one of the surest ways of spoiling them. One good watering should last at least 10 days or two weeks. Wet the ground clear through at evening, then in the morning when the earth begins to dry, loosen the surface to keep the water from getting away."

Caponizing Of Birds In Bailey Co. Proves Popular, Profitable

Capon production is gaining momentum at this season, according to Fred S. Reynolds, county agent.

I. F. Willman caponized 75 Barred Rock cockerels last week. He kept 25 select cockerels for breeding purposes and another 25 for table use during the summer. Mr. Willman had a surplus of grain last year and had to sell quantities of it. He hopes to use more feed at home to feed out livestock and thought that capons would be a valuable addition to his livestock program. Mr. Willman has had an irrigation plant for several years and has perhaps as many kinds of crops as any man in the valley.

C. L. Hasemeier is caponizing his Red cockerels. This is the first time he has done any of this work. George Nelson and Bert West, in this same neighborhood, are reported to have expressed their intentions of caponizing their surplus cockerels this year. Mr. Reynolds is continuing to give demonstrations on caponizing where there is sufficient interest.

Everyone left declaring they had made a full day of it, also, each wished the hostess many more happy birthdays.

Famous English Feminist

Emily Faithfull was an English philanthropist, who lived from 1835 to 1896. She took a great interest in working women, and in 1899 set up in London a printing establishment for women. Shortly afterward she was appointed printer and publisher in ordinary to Queen Victoria. She lectured widely, both in England and the United States, on feminist subjects.

Renew Your Health by Purification

Any physician will tell you that "Perfect Purification of the System is Nature's Foundation of Perfect Health." Why not rid yourself of chronic ailments that are undermining your vitality? Purify your entire system by taking a thorough course of Calabaz,—once or twice a week for several weeks—and see how Nature rewards you with health.

Calabaz purify the blood by activating the liver, kidneys, stomach and bowels. Trial packages, 10 cts. Family package, 95 cts. All dealers. (Adv.)

It has been discovered that many much-feared varieties of sharks are harmless—except for one. The loan shark.

What worries most of us is not only what the State legislature is going to do about taxes, but what we are going to have to do about them.

It does not help so much to talk favor of your home town in conversation, if your money talks for so other town where you buy goods.

40,000

Conoco Passport Holders are on Vacation Highways

THESE motorists have requested and received free 1931 Passports from the Conoco Travel Bureau. In addition more than a million are using Conoco Road Maps. Now they are on the highways of America... fishing in the Minnesota Lakes, viewing new scenes in the Rockies, lazing thru restful days in the Ozarks, exploring historic spots in the East... swimming, golfing... enjoying vacation time to the utmost.

As these motorists travel the highways Conoco stations will be their stopping places for service and information. These stations are not merely sales points for Conoco Germ Processed Motor Oil, Conoco Ethyl Gasoline and Conoco Balanced Blend Gasoline; each is a field outpost of the Conoco Travel Bureau, rendering many special services, which include:

- Local Road Information
- Fishing Information
- Hotel Information
- Package Checking
- Mail Forwarding
- Camp Information
- Assistance in Obtaining Repairs and Making Necessary Purchases

The Conoco Travel Bureau... maintained by the Continental Oil Company... is the only free national service of its kind. It is the culmination of years of growth of the idea of service to travelers, dating from the earliest days of the oil industry. This free service is at your command, whether you plan a long trip or a short one. Stop at Conoco stations, identified by the Red Triangle; call on Conoco men for service. You'll find each a well-informed friend.

Both Divorce And Marriage Hard Hit By The Depression

Washington, D. C.—Hard times hit both marriage and divorce markets last year, leaving a trail of lean, lorn figures at the census bureau.

Of forty states on which the figuring is finished, 33 showed decreases in marriage and 30 showed decreases in divorce.

Miss Alice V. Hagan, who for five years has written the annual census bureau study on marriage and divorce ascribed the decreases to the fact that getting married and getting divorced costs money.

"It is well known that the marriage rate responds quickly to changes in economic conditions, increasing in periods of prosperity and decreasing after a commercial crisis or during hard times," she said.

As for divorce, Miss Hagan wrote to officials of all counties where the rate had fallen as much as ten per cent asking an analysis of the cause.

A large majority of the replies, she reported, laid the lack of divorces at the door of the depression.

Aside from a few flourishing Gretna Greens, and a scattering of divorce havens, there is little likelihood of a rise in the rate of linkings and partings before 1932, Miss Hagan predicted.

Reno, Nevada, of course, is on the up-grade, marrying as merrily as it separates. California's law requiring preposing of marriage intent sends the couples to Reno, while Texas sends hers to Oklahoma and New Mexico. And the six week's divorce law already has ground out such a grist that Reno has written the census bureau for more form cards to record divorces.

Of the seven states in which marriage managed to show an increase in the 1930 slump, a majority were especially blessed, like Reno, in being adjacent to a state in which couples had to wait on marriage law time limit requirements. The states showing increases were: Oklahoma, New Mexico, Arizona, Nevada, Maine, Nebraska and Virginia.

In Arkansas and Mississippi, cupid was a draught-sufferer. Marriages fell off 18.3 per cent in Mississippi and 17.1 per cent in Arkansas. Divorces decreased 15.4 per cent in Arkansas and 13.4 per cent in Mississippi.

Other decreases of more than 10 per cent were:

Marriages: Michigan, 19.9 per cent; Wisconsin 11.9 per cent; Montana 10.9 per cent; Connecticut, Utah and Colorado each 10.1 per cent.
Divorces: North Dakota, 17.1 per cent; Michigan 12 per cent; Oregon 11.1 per cent; Montana, 10.3 per cent.

COUNTRY

NO BEST WAY TO FEED CHICKENS

Emphasis Must Be Laid on Completeness of Ration.

Recent developments in rearing poultry have brought out new feeding methods, each with its supporters who see the method rather than the feed, says Prof. L. C. Norris of the New York State College of Agriculture, who adds that there is no best way to feed poultry as long as the emphasis is laid on the completeness of the ration.

When birds are kept indoors it becomes more difficult, but not impossible, to meet the hens' feed requirements because green feed of the proper type, and bugs and worms, have been automatically removed from their ration. Many food substances needed by hens may be in these natural foods, picked from the range. The only way out of such a situation is to make use of the so-called nutritive feed stuffs, such as milk and dried leafy green feeds.

The same food needs can be provided in an all-mash as in a scratch mash ration, says Professor Norris. Where an all-mash ration is used it must not be too bulky, but should be more concentrated than when a scratch mixture of cracked corn and what is fed in addition to a bulky mash. When any one of the proteins, carbohydrates, fats, mineral salts, or vitamins is lacking, then poor growth, low egg production and lowered disease resistance results.

For good growth it appears that from 18 to 20 per cent of protein is needed in the chick ration for the first few weeks. Afterwards the protein content may be gradually reduced to 15 or 16 per cent at twelve weeks of age. Laying hens need about 15 or 16 per cent of protein in their ration. Pullets during the first six months of egg laying need slightly more protein as egg production is accompanied by slow growth.

Wide variations in feeding methods are allowable, says Doctor Norris, as long as the hens get enough of a ration that has the essential nutritive values.

An Example of What Irrigation Does For A Farmer Near Lockney

The farmers south of Lockney have probably suffered more from lack of moisture this year than any other section of the immediate territory.

Last winter, Oscar Shurbet and several other farmers south of Lockney put in irrigation wells, and got them in shape to water a part of this year's crop. Mr. Shurbet planted about six hundred acres of wheat, and of this amount he irrigated about 100 acres, and dry farmed the other five hundred acres. In conversation with him Monday, he stated that the one hundred acres of irrigation wheat was going to turn out as much as the five hundred acres of dry farmed wheat, and that it would be better wheat in every way than the dry farmed wheat. He is selling the dry farmed wheat, and it has considerable smut in it, which is making it very low in price, and probably not more than paying for the harvesting. He expects to hold his good wheat, which comes off the irrigated 100 acres.

This is just one example of what irrigation will really do. It will make from twice to several times as much out of a crop every year, and now that the farmer in this immediate district can get electric power at a very cheap rate, that will pull an irrigation pump at a minimum cost, it seems to us that every farmer would make a supreme effort to get him an irrigation well and insure a much better crop than he can count on from the dry farming method every year. There is a lot more of money to be made out of alfalfa and row crops under irrigation, and even wheat will bring in a much larger return and the farmer can be assured of a good crop when he has the water to put on the land when it is needed, and it is needed at some time during the growing season every year.

The country will be far more prosperous when each farmer has an irrigation well, regardless of the price the products sell for. Irrigated wheat will come nearer paying at a price of 25c a bushel where thirty to fifty bushels are raised to the acre than dry farming wheat will at seven to ten bushels to the acre—Lockney Beacon.

Help keep Muleshoe clean!

THREE C'S OF PREVENTION

The Key to automobile accident prevention is in the hands of individual drivers. There is a point where even the best traffic laws become inoperative. At this point the individual must take up the work. Care, courtesy, common-sense these are the three C's of accident prevention which are not covered by law. The majority of accident occur when they are violated.

Last year, according to the Travelers Insurance Company, the largest single cause of accidents was failure to give right-of-way, which accounted for 31 per cent of all mis-haps and 15 per cent of all deaths. Foolhardiness, coupled with discourtesy, is steering death along the highways. The driver who cuts in and out of traffic, who drives on the wrong side of the road, who drives at excessive speed, is a menace to the life and property of all who use the public roads.

Traffic laws should be improved and modernized to the greatest possible degree. But after that is done, the rest is principally up to the driver. He will decide whether or not our horrible toll in human life increases or decreases.

U. S. TIRE VALUES UP! PRICES DOWN!

THE balance is in your favor. Never has there been so much mileage, beauty and safety built into U. S. Tires and never have U. S. Tire prices been so low. The whole country knows this fact and the Big Swing to U. S. Tires is increasing day by day.

THE BIG SWING IS TO
U. S. TIRES

Buy U. S. Tires They are about the same price as common tires and are much better.

Weaver's Tire Shop

Muleshoe, Texas

Disinfect Drinking

Water in Henhouse

A good homemade disinfectant for the drinking water in the poultry house is a calcium-hypochloride solution. To make it, take one 13-ounce can of chloride of lime, one-half pound of fine table salt, and one gallon of hot water. Mix and dissolve; allow the lime and the salt to settle, and use only the clear liquid.

Prepare the mixture in earthenware or glass jars and keep it protected from the light. The solution should not be kept more than ten days. Two tablespoonfuls of the solution for each gallon of drinking water disinfects satisfactorily.

Follow Directions

The manufacturer's directions should be followed to the letter in determining the temperature at which to keep the eggs within an incubator. The manufacturer did all the experimenting that need be done, and the recommendations he gives are as nearly accurate as it is possible to make them. The thermometer should be placed just exactly as directed, then the incubator operator will know that the temperature for the eggs is as it should be.

Proper Insulation

Proper insulation is as important as good ventilation for poultry houses. South Dakota authorities agree that while condensation of moisture is reduced with rapid changes of air, yet in thoroughly insulated houses it is not necessary to speed up circulation of air so much as in poorly insulated houses. Other South Dakota tests indicate that hens receiving yellow corn in scratch and mash lay 25 per cent more eggs and consume less mash than hens receiving white corn.

WHY FARMERS SHOULD KEEP A BANK ACCOUNT

Farmers, as a rule, keep no book of accounts. Their bank deposit book affords them a complete record of their cash receipts, while the stubs of their check book are a perfect record of expenses and payments.

Paying a laborer, a store account, or any other bill with a bank check is much safer than with money, because the person receiving the check must endorse it and the check being returned to the maker by the bank, can be preserved as a receipt.

Money deposited in the bank, is not so easily and so often "folded away" as when carried around in one's pocket.

Farmers: make the experiment of one year of keeping a bank account and see if it does not pay you. A large number of the best farmers have accounts with us.

We are desirous of having more farmer's accounts, even though small, for in this locality, where mixed farming is preached and practiced, their accounts are sure to grow larger.

MOHAIR FAVORITE AUTO UPHOLSTERY FABRIC

CAR'S INTERIOR ATTRACTS WOMEN

Upholstery May Enhance Comfort, Smartness and Ultimate Value of Car.

WHEN it comes to selecting the family automobile, a good basis of procedure is that adopted by the sight-weary American tourist who said to his partner when they came to the next important decision: "You do the inside and I'll do the outside."

In choosing the upholstery for the interior, a number of distinct features should be considered—good appearance, smart design, pleasing color, wearing quality, riding comfort, cleanliness and economy.

MOHAIR ONCE SOLE RIGHT OF KINGS NOW EVERY AMERICAN'S PRIVILEGE

MOHAIR IS CLOTH OF KINGS, PRINCES

King Solomon's Temple Was Hung With Veils Made from Hair of Goats.

IMAGINE your surprise if you walked into a shop today and asked for a purple dress, hat or tie and were told that it was a color exclusively reserved for the President and his Cabinet!

In the same way, mohair, a material made from the fleece of the angora goat, was once the privilege of royalty and quite unknown to the commoner.

Women in Industry In most cities of more than 100,000 population more than 50 per cent of women sixteen years of age or more are employed.

is easily cleaned with a whiskbroom or by vacuum. Actual grease or dirt spots are removed by washing with pure soap and warm water.

Offer Prize for Oldest Piece of Mohair

Have you a mohair-covered chair or sofa in your home? If so, you may be \$250 the richer for it!

Back of the Institute's offer is the desire of Grace Valli Gray, its director, to ascertain the longevity of mohair.

Readers who feel that they have something of interest should communicate with Mrs. Gray at the Household Science Institute, 7 South Dearborn Street, Chicago, giving the history of the piece in mind.

every private citizen. The business man comes to his office in a rain, and you cough whose seats are upholstered in the familiar red or green mohair velvet.

Worst of All The most annoying thing about hard times is the epidemic of explanations.—San Francisco Chronicle.

FARM POULTRY

SLANT ROOF AND SAVE ON REPAIRS

Too Little Pitch Is Cause of Much Trouble.

Gentle slopes may be all right in the corn field, but they are certainly out of place on the roof of the poultry house, according to H. P. Twitchell, extension specialist in agricultural engineering at the Ohio State University.

The best method of repairing an old composition roof is to convert it into a built-up roof, Twitchell points out. This roof, which consists of several layers or thicknesses of roofing paper cemented down with hot roofing asphalt, often lasts for more than 15 years.

After the old roof has been gone over and made fast to the roofing boards, tar paper or roofing felt is laid. In laying the roofing felt, hot asphalt is mopped on a small area at a lower end of the roof where it is desired to start the roll.

Producing Geese for Market and Breeding

The number of geese that should be permitted to mate with a gander varies somewhat with the purpose for which the offspring are intended. When the geese are bred for the purpose of exhibition, they should be mated only in pairs, and kept in mating yards until it is certain they are mated.

Poultry Notes

Winter egg production is often cut short by a limited supply of water.

Run the incubator for 24 hours so as to be sure that it is properly regulated.

See that there is an outlet for foul air located at the highest point in the poultry house. The opening should extend the length of the house.

The second day after hatching, the goslings can be fed on stale bread crumbs moistened with skim milk. Feed four or five times daily.

The best method of marking the hens is by use of leg bands. Sealed bands that can be used only once are the kind to use.

General purpose breeds seldom lay enough eggs to pay for their feed after two laying seasons. They are not, as a rule, good breeders.

Approximately 25,000,000 dozen eggs are exported by the United States each year. Imports of eggs not in the shell amount to approximately 25,000,000 pounds.

Heated drinking fountains should be standard equipment on all poultry farms where lights are used for birds in winter.

Slight traces of dirt may be removed by using steel wool, but eggs should not be washed, as that will injure their keeping qualities.

Fullets must be kept in good flesh if their egg production is to be maintained at a high level. Feeding a fishing mash in addition to the laying ration will help.

All-American Band Dream of Conductor

B. A. ROLFE

B. A. Rolfe Hopes to Organize Such A Unit

New York City.—To organize and lead an all-American concert orchestra, with native personnel and characteristic instruments, interpreting American music as it should be interpreted, is the paramount ambition of B. A. Rolfe, famous conductor.

THE PHILOSOPHER

The trouble with some men's heads is that the part they talk with works too fast for the part they think with.

from Africa with some of the first slaves landed in Boston.

"All members of my dream orchestra would have to be born here and if possible I would draw them from all sections—New England, the Middle West, the South and the West—so that each might contribute that distinctive something for which his environment has prepared him.

"It is impossible for any one who has not spent his life amid the tempo and rhythm of America to interpret the music which, while it is flavored melodiously with the music of other nations, is entirely American as to rhythm and time.

NATIONAL THEME SONG

Official Song of the American Legion Auxiliary Dedicated to the American Legion

(Sung to the tune of "I'm Following You" by Ballard MacDonald) You say you're on your way And think that I'll be lonely Just as sad and blue as I can be I'll say if you're going away I've just one idea only Don't think you'll ever get rid of me

Wherever you go, whatever you do, We want you to know we're following you. Wherever you climb, or tumble into, Why—all of the time we're following you. Your effort won't be half so hard if we are along to share it— We'll hold your hands, vamp the cop, or go your bond and pay it. You're part of our heart Whatever you start We will be following you.

We will follow you only in Legion work If it's to help our buddies we'll never shrink. You paid your debt to Lafayette— But your country's needs must still be met. When duty calls we stand ready to serve in any way commanded— Our funds are yours to use as you please. Though at times it may leave us stranded, No job is too small— We offer our all. For the Auxiliary's success Means the Legions' call.

Words by Rose Long Gilmore (Mrs. John G.), pioneer chairman of Radio Publicity Committee, 1930, Nashville, Tennessee.

A CHINESE VERDICT

In a village near Peking, four trades men clubbed together to buy cotton. To protect it from rats, they procured a cat and agreed that each owned one of the animal's legs. The cat hurt a paw, and the owner of that leg bound it up with a rag, soaked in oil but it came out near the fire, the bandage ignited and the terrified animal rushed among the bales of cotton, a number of which flared up and were destroyed.

The three owners of the uninjured legs sued their partner for damages. The judge ruled thus: "Since the cat was unable to use the injured leg, the cotton was set on fire by the action of the three uninjured legs upon which the cat ran among the bales of cotton. Consequently, these three legs were guilty, and their owners must pay damages—see-see!" That beats some jury verdicts all hallow!

Words and Deeds

Words are the most plentiful thing in life—and usually the most useless. Deeds are the most valuable and not of the most value.
