WOMAN'S MUTILATED BODY FOUND IN SHALLOW GRAVE IN COCHRAN COUNTY; SUSPECT IS BEING HELD

Jaunita Kelly, 21, Victim of Gruesome Death, Has Had Nearly Severed From Body; Other Marks of The Tragedy.

L. O. (Ode) Cooper, held as a suspect in connection with the murder of Jaunita Kelly, 21, whose body was found in a shallow grave last Monday, committed suicide in the Lubbock county jail Tuesday night, where he was being held by officers.

Women May Decide Presidential Race Says Mrs. L. More

Dallas, Oct. 26.—The women of the country will decide the presidential election this year, declares Mrs. Lena Gay More, Brownville.

"Women of today listen to the radio. They read their newspapers, they make grave dug in a sudan field and located in the vicinity and direction of her home. It had been horribly mutilated by some human fiend.

The throat had been slashed from ear to ear and the back of her neck cut so deeply it was almost severed from her body. The right eye had been popped out of its natural setting, probably by a blow of some kind, a deep wound showed in the right cheek and there were bruises on her back above the kidneys.

The body was nude from her waist down, and part of the clothes of the upper body was torn and slashed, showing the uncovered breasts.

Shortly after discovery the body in its 14-inch scooped out grave, J. S. Crockett, Cochran county sheriff arrested a 32-year old man whose name has not yet been made public.

The arrested man told the sheriff he found the body one morning a few days ago while hunting some cows in the field; that he uncovered the body sufficiently to identify it as that of a girl, then recovered it at another time he said he attempted to dig the body from the shallow, but not digging deep enough to get it up.

A man explaining he had gone to see five miles southeast of the night of October 17, the night girl disappeared, and had seen her dance. He said he saw the Kelly about midnight of that night get into an automobile for a drive, and riding took several drinks of wine whiskey. Upon their return to the dance hall, he claims the Kelly got into an automobile with another man, whose name he gave to the officers, but which they had not made out, both of them driving away in that, he claims, was the last saw of the woman.

he girl is said to have been of a large stature and of a husky nature. She had been picking bolls with her parents the day before. That night family went to Morton to a picture show, but the girl took the car and it on to the dance southeast of it.

the grave was also found most of woman's clothing, which was mpty identified by the deceased's parents as being the clothes she wore on the night of her tragic death. At Morton a coroner's inquest was duly held and her remains.

It is stated her parents had not worked for a few days following her absence, as it was her custom to occasionally go in search of work and not live them as to her whereabouts on such work had been obtained; but the passage of these few days began to worry. The man in custody said he hesitated about informing officers of the grave because of fear of being implicated in the matter; but only did so upon advice of some relatives.

The man now being held as a suspect implicated in the brutal tragedy, said to have one time served a jail term of 30 days for violation of the Oklahoma liquor law. He was released Tuesday night, following continuous arrest, the unnamed man being admitted burying the mutilated body of the Kelly girl and lead her to a spot where the knife was buried with which the killing was perpetrated.

THE HEADLINES NEWS OF THE WEEK PARADE

Increase The number of Government workers in Washington increased from 66,802 in 1933 to 116,022 in July of this year.

Has No Claim John W. Davis, Democratic candidate for president in 1924, says the New Deal is not Democratic, and has no claim whatever upon the Democratic party.

Americans Win Americans drew at least \$1,250,000 in prizes last Friday from the Irish Hospital Sweepstakes lottery, this sum representing nearly half the total tickets that went over the drawing grid.

Green Gold Lattice crop is virtually green gold to California growers, which is estimated to receive approximately \$30,000,000 from that crop this year. Last year the imperial valley, that state alone yielded \$2,492,000 in lettuce.

Swallows Fly Strange but true, swallows here carry Spanish mail to San Juan Capistrano, Calif., and return the same day. For 75 years they have been closely watched by inhabitants there, without fail, leave the total south October 23 and return March 19.

Record Vote It now being estimated the national vote cast next Tuesday may run to 55,427,000 ballots. Four years ago, when there was such a landslide for Roosevelt, the vote ran within 20 per cent of that total.

Gather Reindeer The annual round-up of reindeer at Point Barrow, Alaska was held Friday of last week when approximately 25,000 of these antlered ponies of Santa Claus were gathered and officially marked before being turned over to the Eskimos for winter caribou.

Denio Cash The Democratic National committee reported last Saturday campaign expenditures totaling \$2,841,616 between September 1 and October 21, bringing its total disbursements since June 1 to \$2,333,256. Campaign contributions since September 1 were set at \$1,408,947. Earlier donations raised the total to \$2,490,715.

Couzens Dead U. S. Senator James Couzens, independent Republican of Michigan, who was defeated in the recent primary, died Thursday last week from uremic poisoning. He had been a sufferer for other party workers will be busy rounding up the voters and transporting them to the polls.

Local election officials are this week making off and patching up the old ballot boxes. They also are busy checking and re-checking the official voting lists and setting up the complicated machinery through which the Nation elects its President.

Weather in this section remained cold until Tuesday afternoon, when it began to moderate as the sunshine returned.

Loomis Players Coming The Allertia Loomis show is billed to be in Muleshoe all next week, beginning Monday night with the play "Cheating Women." M. M. claiming six times he would ever do; but Dad Loomis says it is being done all over the world today, and in this opening play they will describe some of the high-handed methods—and also, how many of them fail.

The Loomis players are old time friends in Muleshoe, having been making this town on their circuit for the past 10 years, each visit being greeted by numerous friends and packed full houses. Since their last visit here some of the actors have been added, there is an entirely new line of plays, more attractive and more interesting than ever before.

Generally speaking Loomis players bring rain with them when they come to Muleshoe, and for the past three years that courtesy has been greatly appreciated; but "Pop" Glen is asked to leave it off this time.

Horse racing pays 15 states nearly \$7,000,000 a year in taxes.

Cash Income From Products In Texas Last Year Totaled \$461,030,000 (50 Per Cent More Than the 1932 Yield)

U. S. Predicts A Large Turkey Crop More Money For It

Present indications are that the nation this year will produce one of the most prolific turkey crops in history, according to available information. The U. S. Department of Agriculture estimated 19,000,000 birds in 1932 and 1933; but production fell to about 15,000,000 in 1934, due principally to shortage of feed. The prediction for this year is somewhat larger than for the years of 1932 and 1933.

While throughout the State of Texas generally, the turkey crop is said to be larger this year than generally, yet turkeys on the South Plains are reported to be less numerous. However, because of better feed crops this year, turkeys for Thanksgiving market, it is expected to be larger, in better flesh and more of them. Last year, many birds which did not grade number ones, had to be held until Christmas selling.

Somewhat better prices are anticipated for turkeys this year than was paid in 1935, and already it has been estimated the 1936 crop will yield in the neighborhood of \$6,000,000.

West Texas, and especially the South Plains area, is more and more producing larger crops of turkeys, and especially good variety is being grown. Some growers are specializing in turkey growing, producing each from 1,000 to 2,000 head, mostly of a superior variety.

LOAN CHECKS RECEIVED Nine U. S. seed loan checks were received here last week by County Clerk J. B. Burkhead, which will be used by farmers to buy seed wheat for planting. The checks ran in sums from \$40 to \$200 each, totaling \$1,240.

Old Age Pensions Total \$6,270 For The November Payment While the Texas Legislature, in special session, is still trying to find some way to raise money for paying old age pensions, the Old Age Pension commission is making out checks so as to have them ready for mailing November 1, if funds are available. In October 29,270 such checks were mailed out in Texas, and indications are that 1,500 additional new grants will be made for November, according to Orville S. Carpenter, director.

Carpenter says only about 2.8 per cent of all applications received at his office are being turned down because applicants have too much property, the law providing an applicant shall not have in excess of \$5,000 worth of property, if single, or \$7,500 if married. Ninety-seven per cent of the 16,000 applications who have been denied assistance have been found ineligible because of other statutory restrictions, such as age, residence, citizenship, income and need. Texas has the most liberal law of any of the states so far as amount of property owned is concerned.

From 1,000 to 1,500 new applications are now being investigated daily. Carpenter says, figures for last week showing \$6,270 approvals, 16,000 denied, with 67,500 applications now under investigation and 42,000 on which investigations have not yet started. Many of this latter group are clearly ineligible, he explains.

Last Saturday the sum of \$510,000 was transferred from the permanent to the available pension fund to meet requirements of the checks sent out for November, assurance having been received that total would be matched with federal funds from Washington.

BAILEY CO. OIL LEASING Interest in prospective oil seems to be spreading rapidly in this section. While thousands of acres of the southern part of Bailey county have already been leased to oil companies, both north and south, the leasing is now spreading toward the center and northwestern part of this county.

Last Monday eight leases of land located in West Camp and Progress communities, given to the Shasta Oil Co. were filed in the county clerk's office.

MRS. SIMPSON DIVORCED Mrs. Wallis Simpson, known as intimate friend of King Edward VIII of England, was granted a divorce Tuesday. Now the world is wondering who will be her next husband, some freely predicting King Edward will be next.

FAMOUS RANCH RESETTLED Announcement is made that the Federal government will take over the famous 101 ranch in Oklahoma which will be converted to a new project.

A MILLION PEOPLE WILL BE NEEDED TO MAN THE POLLS IN THE 122,390 VOTING PRECINCTS OF ELECTION NEXT WEEK

Washington.—More than 1,000,000 officials and party watchers probably will be required to man the election machinery in about 122,390 voting precincts which the Nation marches to the polls Nov 3 to choose a President.

With estimates of the vote running from 41,000,000 to 45,000,000, there are about 2,200 more voting districts than two years ago.

No exact tabulation of the number of officials needed to see that the votes are cast and counted legally has been made, but experts leave the total probably would run well beyond 1,000,000 persons.

Cochran County Oil Well Sprays Crown Block; Big Pressure Indications for a favorable oil well producer continue in Cochran county with the Masado-Honolulu No. 1 well.

Following the setting of cement plug and drilling into it, the well was deepened a few feet, and it is said to now be flowing by heads at from 200 to 300 gallons per gush. Storage tanks were set and oil is being conducted into them. There have been two or three times the oil has shot over the crown block of the rig at one time plentifully spraying about 500 people standing about the well.

At this time no definite knowledge is available as to the time required, drillers declaring it will be commercially valuable, and probably produce around 1,000 barrels per minute, though nothing definite can be known until the well is properly brought in.

COUNTY JUDGES ASSOCIATION RECOMMENDS LAW REPEALING At a meeting of County Judges and Commissioners' association held at Dallas last week it was urged that terms of office for state, county and precinct holders be lengthened from two to four years on the plea that such officers, occasioned by the short tenure of office, did not have the time required, becoming as familiar with important matters coming under their jurisdiction as needed and acting with the utmost efficiency in discharging them.

These officials also went on record favoring the repealing of all fee laws now effective. They asked that Gib Gilchrist be retained as state highway engineer, and that counties be reimbursed for money spent in looking after the insane of such counties.

The next meeting will be held at Amarillo. M. G. Miller, county judge elect of Bailey county, attended the meeting and took an active part in the deliberations.

FILE 12,826 ACRE SUIT Last Monday suits were filed in the County Clerk's office by the Longview Independent School district for collection of school taxes, same to be heard at the coming District court session in November.

The suits were against eight different land owners and embraced a total of 12,826 acres.

DISTRICT COURT NOV. 30 Bailey County District court, fall term will begin Monday, Nov. 30, according to announcement made this week by J. B. Burkhead, district clerk.

Present indications, said Burkhead, are that both civil and criminal dockets will be light for the on-coming term, with the exception of a large number of delinquent tax suits which have been filed.

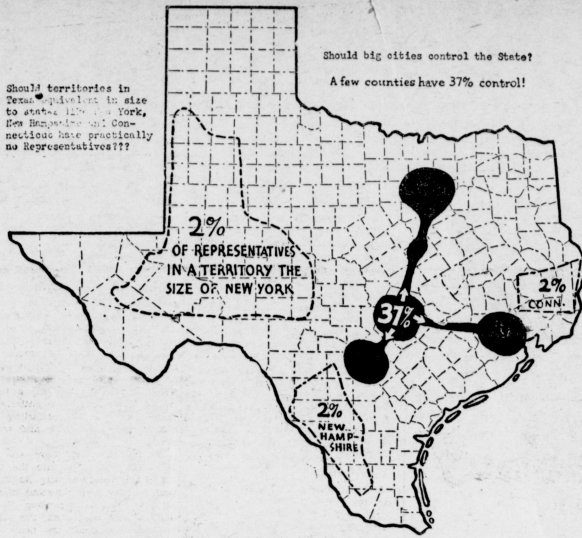

START CLAUDELL WELL NO. 2 Preparations for drilling oil test well about 30 miles west of Portales, N. M., or 25 miles northwest of Elda, in the Claudell community was begun last week, looking forward to spudding in Nov. 11.

It will be remembered that the Wilmes No. 1 well was put down in that community about a year ago, the well having been sunk 3,626 feet to the Gorieta sand, where the well was lost in salt water.

The Green Rock Oil Co. in the Kenans section is being revived and it is expected drilling will be resumed in the near future. Th Franklin test 12 miles west of Melrose is now down about 1,250 feet.

Map showing concentration of Legislative power.

Should territories in Texas be allowed in size to state? ...

The Moffet Amendment (No. 6) will prevent undue centralization of power in a few of the very largest Counties of Texas.

17,000 Die Annually In Texas Without A Need Says Officials

Though progressive in many directions, Texas has been backward in protecting its citizens' health. The Texas Planning board emphasizes that fact in reporting on its recent state-wide survey.

GET READY FOR WINTER!

Let us get your car in readiness for winter driving by giving it a thorough overhauling if needed, or at least tuning it up for cold weather service.

We will be glad to fill your radiator with Anti-Freeze.

How about re-installing your old car Heater or putting in a new one for you?

Learns New Ways To Serve Vegetables

"Since I have learned some new ways of serving vegetables, it is easier to plan our meals so the family will have one leafy vegetable daily," said Ruth Bundrick, cooperat.

CONGRESSMAN GEORGE MAHON SPEAKS IN EASTERN CITIES

Colorado, Oct. 27.—Speaking engagements assigned to Congressman George Mahon by the Democratic National committee last week included Democratic meetings in New Haven, Connecticut; New Brunswick, New Jersey; Pittsburgh Pennsylvania; and a ward rally in New York City.

Mr. Mahon had gone to New York at the request of the Democratic National committee after filling a week of speaking engagements in New Mexico. En route to the East, he stopped over in Chicago for a conference with Congressman Marvin Jones.

Home of Maritime Law Visby, Sweden's "city of roses and ruins," was once a great power in the Hanseatic league and the "Visby Maritime Law" of those days now forms the basis of maritime law in many countries.

The above may clearly emphasize what a large State Texas is. Its boundaries stretch from the pine woods of East Texas to the broad level plains of West Texas. They extend from the mild climate of Brownsville to Dalhart, which is half way to the Canadian border.

Because of this great variety of conditions it is just and right that the members of the lawmaking body be sprinkled around all over the State so that each and every part may have a proper voice in the making of the laws under which all must live.

In a state with such broad interests as Texas, it would be unwise and improper to permit the clustering of so many members of the lawmaking body.

Certainly that is enough for any one County. This limit is not unreasonable, and a similar limitation has been placed in the Constitution of more than thirty States in the Union, and has been found to be a proper balance wheel in the governmental machinery of those States.

Representative George Moffett, of Chilochoe, Texas, tried for six years to get the above Constitutional Amendment passed through the Texas Legislature so that it could be voted on by the people.

Representative Texas found it best to scatter their Representatives around among all the different sections of the State and not permit large bunches of law-makers to come from the same place? Texas should do likewise.

Representative George Moffett, of Chilochoe, Texas, tried for six years to get the above Constitutional Amendment passed through the Texas Legislature so that it could be voted on by the people.

Grammarians Had Their Public It was fashionable in the Rome of the Second century for grammarians to give speeches at which they displayed their learning; and there was a public always eager to listen to them.

P.-T. A. Program Is Interesting; Many There; Future Plans

The regular meeting of the Parent-Teachers association was held Monday evening at the High school auditorium with a good crowd of patrons and teachers attending.

The meeting was called to order by the president, and the opening song was "Battle Hymn of The Republic." Various committees made reports on the work they had been doing.

The following program was rendered by the play "The Flapper Grandmother" to be given sometime in November by various people in Muleshoe.

ser the play "The Flapper Grandmother" to be given sometime in November by various people in Muleshoe. The membership drive will close at four o'clock Thursday afternoon of this week.

Plans were made for the P.-T. A. to have a booth at the Halloween carnival to be given at the High School building Friday evening of this week.

Wilbur Gaebe's room received the picture and \$100 for having the most parents present to vote.

**WEEKLY LAY SERMON THE GENERATIONS**

By JESS MITCHELL

A generation is the average length of time human beings of any particular age live on earth. I do not know how long a generation of men may have been. I am quite sure there was a time in the past when a generation may have been fifty or seventy-five years, and that time, because of scientific improvement and medical discoveries, may come again; but the average generation of today is put at twenty-five years. It is the longest procession to our knowledge—a regiment of 9,125 days, marching onward with wonderful and regular precision, never breaking ranks, never stacking arms, never pitching tents, never taking any furious, never calling any huns—coming out of a past eternity and moving steadily toward a future eternity with regular tread, never slowing down, never double-quickenning the pace, but steadily, relentlessly, continuously marching on.

Many of the readers of these weekly lay sermons have been on earth for a generation or more, some have witnessed the closing of the previous generation, lived out their own and are now encroaching on the beginning of a new generation. Not many however, for most of us do pretty well now days if we manage to tread terra firma through all or a part of just two generations. We may see folks born; and seldom live long enough to see them die, if they fulfill the years of their own generation.

It is a notable fact that it is invariably the good of a generation that is recorded and perpetuated. Here and there may be instances of badness and ill-fortune on file, but the epitomes of life contain mostly good deeds and noble acts. Few biographers ever record the weakness and moral deficits of their subjects, and autobiographers forget such entirely. Professor lives are never recorded by their successors as they actually were, and it is much satisfaction to us of the present generation to know that those of the past generation were about the same kind of folks. Human nature hasn't changed of years. Women of this present age very much during the past thousands are quite different in their manifestations, but fundamentally about the same as Eve. Men of this twentieth century are about the same as the man Adam who got a terrible twist in his nature under that apple tree in Eden.

Jalousies, hates and revenges were about the same twenty-five years ago as they are today. Hypocrisy snuffed and looked as solemn then as it does now. The dissembler had the same marks upon him. There is just as much avarice among the cotton bales and wheat sacks of today as among the apple barrels of the first generation. Electric lights of today hide nothing that tallow candles of a couple generations ago didn't reveal. Silk and rayon is just as proud as was homespun. Crocodiles is just as haughty as grey jeans of few generations past. There is not much difference between Dallas, Chicago, San Francisco and New York City as there was between old Rome, Sodom, Babylon and Nineveh.

People of the past generations had their bereavements, temptations, struggles and disappointments, their successes, gladdens and griefs, just as we of the present generation are having. During the past generation we have seen the advent of the automobile, the airplane, the radio, television, and multiplied hundreds of other wonderful inventions—the coming generation will doubtless witness innumerable and greater events. The past generation produced its merchants, physicians, orators, statesmen, many of whom have already passed on into the future or else are awaiting in retirement that transition day. Now we are producing still another crop of such folk who will take the reins of government, business, society, science and philosophy in hand for greater achievement. There are a dozen prominent men and women today to one of a generation ago. There are 20 heroes of the present generation to one of the past—and no one has any idea how many unknown heroes there may be.

Gradually the crew of this old world-ship is being changed. New captains are constantly coming to the helms of government—we make decision on that in America next week. New lieutenants will be seen standing on the world's bridge directing its affairs, new sailors will be climbing the ratlines, sitting in the lookouts, battling down the hatches against approaching disaster, shooting torpedoes of warning, unfurling the flags of victory—all as a new generation marches on to the infinite music of eternal ages. In a little while those of this generation who have passed on. It is hoped they were born at the right time, died at the right time and did their work well while here, thus leaving the world a little better than when they found it.

I would not have this essay to be a dirge; but rather an anthem. While this world is an appropriate place for temporary stay it is not entirely suitable for permanent residence. Texas is one of the best of the 48 states of this old Union; but I would hate to be doomed to remain here for 10,000 summers and 10,000 winters, and it is indeed fortunate that the most of us remain on earth just long enough to whet our appetite for a better place of living. Here there is too much of the minor key; there it is of a major trend

with plenty of embellishments to forever make beautiful and enjoyable the topography and climate.

Perhaps there are some readers of this message who have lived their own generation and have started onto that of the younger set; they are today wondering how many miles they have to travel, what company they shall enjoy, what accomplishments they shall achieve in the future years left them for service. Some readers may feel the time has almost come for them to stack arms, others are just beginning moving up to the firing line of worldly accomplishments, still others are in the midst of life's battles so busily engaged they have no time to look backward nor forward; but there shall come a time when we shall all go down to ultimate defeat or rise up for eternal victory.

In this issue of the Journal I would put a garland on the grave of the past generation and place a palm branch in the hand of the on-coming generation. How many we have loved, honored and revered who have passed on, quitting this earth for some other homestead! Tears fell, dirges sounded and there were signs of mourning all about us. Their going left a vacancy in our hearts never to be entirely filled. Some were but dimpled darlings, while others had white hair and wrinkled features.

But a new generation has taken their place, stepping onto the threshold of the world's activity. As the years pass on they shall more and more have all this world to themselves. The living shall vacate the pulpit, the platform, the editorial chair, the place behind the counter, the plow and the machine. It will be theirs to move on from conquest to greater conquest; from success to greater success. We who have passed our generations on earth step out into the great unknown with hope of preceding generations. If that be true, then life will truly have been worth while. If we of this generation have added something to the joy and beauty, the health and wisdom, the success and glory of the arriving generation, we should be content, for that, with an immortal viewpoint, we can view all the past with wider range and keener faculty and realize that our generation of life on earth was really worth while—it was for our eternal advantage.

**Goodland News**

Rev. B. C. Smith, of Morton, filled his regular appointment at the Goodland Baptist church Sunday morning.

F. H. attended to business in Muleshoe, Saturday.

A. E. Robinson attended to business at Muleshoe, Wednesday.

Melvin Bybee and Raymond Fleming were Muleshoe visitors Saturday.—Reporter.

**Eight New Silos To Be Used For Feeding Sheep In Bailey Co.**

Eight of the trench silos dug in Bailey county this year will be used in connection with sheep feeding, according to J. B. Waide, county agent. This is proving an excellent means of providing ewes with succulent feed. "Less digestive disturbances are being found since the feeding of silage from trench silos eliminates moldy, dusty or damaged feed and may also be substituted for pasture. Silage put up in this manner is also proving very satisfactory for flushing ewes previous to the breeding season.

Other advantages of feeding silage are being noticed whereas attempts are being made to dry roughage have not resulted in securing a large lamb crop. "When an attempt is made to feed entirely on concentrates, the animals

go "off feed" and if succulent feed is not supplied serious digestive disorders develop. It is possible to success, fully overcome the difficulties of this lack of a succulent feed by using silage which is proving practical and entirely satisfactory."

THE MULESHOE JOURNAL

Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1879.

MITCHELL, Editor. F. F. MITCHELL, Bus. Mgr.

SUBSCRIPTION RATES

In Bailey County, one year, \$1.50; Outside of County one year, \$2.00.

Published every Thursday at Muleshoe, Texas.

Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses.

Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate. Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Editorial

Every Great Attempt is Glorious Even If It Fails

THOUGHT FOR THE WEEK

For a good tree bringeth not forth corrupt fruit; neither doth a corrupt tree bring forth good fruit. — St. Luke 6:43.

When men grow vicious in old age they are merely making an offering to God of the devil's leavings.— Dean Swift.

MINISTER'S RETURN (?)

It is always a healthy sign when any given town laments a minister's departure or is exorcised regarding his return at the end of a year's work.

The Portales News, voicing the sentiment of its citizens said: "Since coming to Portales, Rev. York has proven himself a good pastor, and has also identified himself with the civic affairs of Portales."

It is a blessed situation when any pastor is universally loved and appreciated by the citizens of the town where he lives.

Some preachers circumscribe their churchly activities in such a small circle, confining it to only members of their own church, and alas, sometimes to only a certain bunch of that membership, that their churchly influence radiates out in such a small sphere it is of little importance.

Christianity is a something far bigger than any one church denomination and the minister who is so little to not realize such fact and act accordingly, is far too small a species of the genus homo to stand in any pulpit.

Some preachers circumscribe their churchly activities in such a small circle, confining it to only members of their own church, and alas, sometimes to only a certain bunch of that membership, that their churchly influence radiates out in such a small sphere it is of little importance.

There are never any tears shed regarding the departure of any minister who is not big enough nor broad enough in his humanitarian interests and Christian activities to take into consideration the welfare of all people, regardless of their spiritual relations.

It is men like Rev. York, no matter their denominational connection, whom citizens love and yearn for their return at the beginning of another fiscal church year.

WASTE TO WEALTH

The United States Tariff Commission states that finished products including dyes, tanning materials, color fast colors, synthetic photographic chemicals, medicines, perfumes, flavors and other finished products run into billion dollars each year.

The basic, natural materials were once among our wastes that we put up in smoke. The manufacturing chemistry began to develop innumerable compounds of the greatest value to science and industry.

The largest volume of wall and insulation cable is a bi-product of sugar cane, called bagasse. This great industry has been built wholly upon material that was once waste.

The total national annual expenditure in research work in the United States is conservatively estimated at \$100,000,000. The Government, industries and many institutions participate the part that science plays in the social and economic affairs of our country cannot be over-estimated.

A mere glance at some of the wonders of the age show that human progress has been stepped up and been improved, through the discovery and development of products that were unknown a half and even a quarter century ago.

By salvaging things and materials that were waste in former years, new industries have been created that have furnished employment for hundreds of thousands of people.

And yet, civilization would still be known as having a company with swine, as they do in Albania, except for science, electricity, chemistry, research and our superior American brains.

FOR SAFETY SAKE

Those Muleshoe families who are accustomed to taking week-end trips to other points should pause a moment to consider the advice of a Cleveland safety expert who says they should make their plans to return early Monday morning instead of late Sunday afternoon.

Another important fact is that the week-end vacationist usually is tired on Sunday night after a strenuous day of play and is far from being at his best for driving, despite the fact that the greatest efficiency is needed to cope with the crowded Sunday night traffic conditions.

In the interest of safety, therefore, it would seem a wise idea to extend the return home from a week-end vacation until Monday morning.

BOGGING THE COLD

The common cold is just that—common. Rare is the Muleshoe citizen who escapes one at this season of the year, yet as common as the cold may be, most of them can be avoided, and should be over a seven-month period.

Scientists classified a group of 100 persons and noted the number of colds contracted over a seven-month period. Of those in good physical condition, 64 percent escaped without one cold.

Among those who were in a "run-down condition, 80 percent suffered from one to four colds within the seven months of observation. The findings merely confirm an old rule for health. One who keeps physically fit stands a better chance against the common cold—or any other disease germ.

FLY-BY-NITE BIZ.

"Fly-by-night" business is common in West Texas this time of the year, and Muleshoe and every other progressive town may begin to look for such to alight within their corporate limits. They will remain to cut prices and reduce legitimate profits and get out just in time to keep from having to pay taxes.

The late Senator Arthur P. Duggan tried to get a bill through the Texas Legislature to curb such methods of business; but failed. Some other legislator should try it, and every town and city official, as well as every property owning citizen should co-operate to keep such kinds of business out of their respective towns.

Jaunty Journalettes

If you think present day styles look silly, dig up an old family album in any Muleshoe home and have a look at it.

The trouble with some Muleshoe men who save for a rainy day is that they spend it for a wet night. There's one thing some Muleshoe men can say for their wives—that's "Yes."

Many a Muleshoe man is made to pay the fiddler who never even heard the music. Some Muleshoe women who don't know a darn thing about music, do plenty of harping.

The Muleshoe man who insists hell isn't very hot probably hasn't had a wife nor a used car very long. The reason some people around Muleshoe don't hear opportunity knock is they are too busy knocking somebody else's.

Another thing no Muleshoe husband has ever been able to figure out is why his wife lets the drawers in the sewing machine get so cluttered up. One trouble with this part of the world today is that the Muleshoe people who love most to spend money haven't any money to spend.

Some Muleshoe fellows are like some of the cigars one buys. You can't tell how bad they are until they're lit. In the olden days around Muleshoe, one reason dad and mother had an easier time was because they adhered closer to the keeping installment system than to the paying system now so common.

We've often noticed the smarter a Muleshoe man is the more readily he tells you "I don't know," while the more stupid he is the more readily he attempts to tell you all about that subject.

Pavement Pickups

Cecil Tate suggests it's got so that all our national elections now are pre-empted by the pavement pickups.

Geo. Harris says the woman behind the broom may not draw much salary; but she certainly raises plenty of dust. George Shadid says "when the meek inherit the earth" as the good book says they sometime will, he expects to make a fortune selling "high hats."

Every week or so Skeet says he shaves some young fellow who is getting his whiskers on the installment plan just a little down each week. Dr. Matthews wants to know at this distance, how many Muleshoe folks can tell now whether Dillinger was a senator, an actor or member of the Brain Trust.

C. A. Steel, Clovis mortician, who does business here occasionally, says industry may be heartless; but it never brought any more holidays to coffin manufacturers and undertakers. It is reported that Judge Vaughan has taken up the study of palmistry. Now he can look at almost any man's hand who comes into his court, and see at least 10 days of their immediate future—or \$142.

It is reported on the authority of Dick Rocky that a certain Muleshoe woman is going to sue for a divorce because she caught her husband listening on the radio to a certain female crooner. Two weeks ago Graham Chandler

sold a fellow a second-hand car. A few days ago the buyer returned to Graham and said: "I wish you'd tell me again all the fine things you said about that car when I bought it, somehow I'm about to loose confidence in it."

Kenneth Jennings says if someone would invent a way to make doughnuts, macaroni and Swiss cheese without having to pay for the holes in them it would be about the most economical food one could buy now days.

Prof. Cox says this old adage about the "wise owl" has been debunked by the Government, along with the idea of water witching with a switch. The owl, he says, is just like lots of people, it doesn't say much because it doesn't know anything to say.

A woman going into Border's grocery the other day, asked for a half-pound of fat. "Green or black?" asked Mr. Border. "Oh, it doesn't make any difference, I didn't take the woman, my husband is color-blind."

The first of this week Good Harden and John Rogers laid the foundation of another townsite on State Highway No. 7 just opposite Rogers' home. It is probable the next thing heard will be that John is entering into competition with Heavenly Hurley to have the court house moved from Muleshoe.

R. L. Brown, who specialized in growing 40 acres of okra this year—the kind that slyly and silently slides on down without any chewing, plans planting 20 acres of corn next spring on his irrigated farm northeast of town. Brown says his man, Dee Moon, this year perfected a breed of corn wherein each ear of the crop when it was equipped with a zipper, so when eating, all that was necessary was just to hold the corn to one's mouth, pull the zipper, and each grain of that row falls gently into ones facial orifice ready for mastication.

THE JOURNAL'S Weekly Scrapbook

Meat Croquettes—One and three-quarter cups chopped meat, 2 tablespoons fat, 4 tablespoons flour, 1 cup milk, salt, pepper, roasting ear, chopped parsley. Chop meat very fine, or put through a food chopper. Make a thick white sauce of fat, flour and milk. Season to taste with salt and pepper and add parsley. Add chopped beef, mix well and allow to cool. When cool shape into croquettes, roll in a beaten egg and bread crumbs and fry.

A search for the hat that is different, rich-looking yet simple, will end when you discover a model of the copper type done in gleaming inky black hatter's patent. The trim has a slight forward tilt and is banded with grosgrain, like a man's high hat.

Eggs are a great help in time of need—when the unexpected guest arrives. If you have a little lettuce or cabbage for a salad foundation, hard cook some eggs, devill them and serve them on the green. It is always relished, and easily prepared.

The Family Doctor: Says When you find you are facing a bad day with a little child lower your voice, quiet your mind and be gentle in your movements. Look at the child's tongue and if it is coated, treat him for that condition at once. Put him to bed. He will not want to go, but he must, and if you have to put everything else aside to keep him in bed, rest, do so. You will not make any headway with him going about the house in this upset state. It will be some over 11 hours to bed and treated for fatigue at once.

The Autumn Wind O autumn wind, your ways we know! O autumn wind, blow high, blow low! You bring the nuts down from the trees. You sweep the hills of dry brown leaves; The sky sends to earth you send— You are their helper and their friend.

SNAP SHOTS

There's plenty of wild life that isn't in the jungles. An open mind usually goes with a closed heart. The fellow who said "Everything that goes up must come down," evidently didn't know anything about taxes.

The trouble with most leaders is they don't start leading until they see which way the people are headed. There are plenty of diseases that never cause any trouble until they try to spell them.

Another trouble in this world is that too many fellows never start to put on the brakes until they feel their clutch slipping.

The first transcontinental trip by auto in the United States was made in 44 days, 1903.

Famed Characters Will Greet Pupils

Two famous characters from history and fiction will greet Texas school children who visit the Centennial Exposition in Dallas this fall. They are Alice in Wonderland and Queen Elizabeth. Alice, from the Tony Sarg Marionette Theatre, is seen here lighting Queen Elizabeth's pipe. Her Majesty rules over Merrie England where the Globe Theatre and Falstaff Tavern are located. Both Queen Bess and Alice have made special preparations to welcome Texas pupils from this district to the world's fair.

D. A. R. Chiefs Honor President

Members of the national society, D. A. R., met in the lounge of the Ford building at the Texas Centennial Exposition to honor Mrs. W. A. Becker, President General (center), just before she left for the seeing in Oklawaha, Fla. At the left is Mrs. Marjorie C. Turner, state regent, Texas D. A. R., Dallas, and on the right is Mrs. A. V. Lane, honorary vice president general, Dallas.

Meaning of Word "Levant" The word "Levant" is of Latin or French origin and means sunrise or east. It is applied to the countries bordering the Eastern Mediterranean sea.

Uncle Eben's View "If it had took as long," Uncle Eben, "to create de w as it has took to find a way to it, Adam an' Eve wouldn't hab gartened of Eden ready, oh, em va."

**Watermelon Not a Native**  
Many jokes have been made at the expense of the colored man's love for watermelon. As a matter of fact, the black man was probably eating watermelon long before the white man ever heard of it. It is a native of Africa and may be found growing wild on plains south of the Sahara where it is an important part of the diet of deer and antelope of that region. It is believed the pilgrims brought the first watermelon seeds to America, says Pathfinder Magazine, in less than ten years after their coming, melons were plentiful in Massachusetts. It found favor with the Indians at once. By 1665 the Florida Indians were cultivating it and ten years later tribes of the West. Bees will not drink nectar of flowers from which the petals have been removed.

## Famous Singer Tells Origin of Crooning

VAUGHN DE LEATH  
You're just a lo-ve-er, just a wan-dring lo-ve-er

### Vaughn De Leath Describes Accidental Start of New Style Singing

New York City.—Crooning, according to its originator, Vaughn De Leath, the famous radio star, was the result of a lucky accident. "In the early days of radio broadcasting, before the microphone had been perfectly adjusted to the range of the human voice," explains Miss De Leath, "a soprano's high notes often shattered a delicate tube in the transmitting panel. Tubes cost \$110 each, and the seconds it took to insert a new one meant interrupted programs. "In order to avoid this annoyance, I tried singing with a new note, a 'throaty' modulation of voice that kept within the microphone's range." The new style of singing made an instantaneous hit with the radio public. They wrote their approbation and imitative crooners began to spring up everywhere. Now many of the most loved and valuable songs of the lav, such as "You're Just a

Love," were written with the crooner definitely in mind. Miss De Leath has been singing as long as she has been talking. She made her musical debut at three in an amateur minstrel show in her native town, Mount Pulaski, Illinois. Miss De Leath is known as the "official" radio girl because in January, 1929, before the first regularly scheduled broadcast of a radio program was made from the KDKA, Pittsburgh, her voice was heard on the air in a broadcast from a stuffy little "wireless room" atop a New York skyscraper. Her "radio public" on that day was made up of a handful of radio enthusiasts, owners of crystal sets and amateur experimenters as well as she. Her voice as it came through the headphones was blurred and muffled by whistles and static, but her first broadcast was considered a success, so much so that she kept on her programs and added an accordion player as accompanist. Today, she probably has the largest following of any woman on the air and it is not unusual for her to be the soloist with a sixty-piece orchestra.

## LIFE CYCLE OF SCREW WORM

Flies have four stages in their life cycle. The adult flies mate and lay eggs and the eggs hatch into maggots or the worm stage. The maggot, after a period of feeding and growth, transforms into a resting stage called the pupal stage and from this emerges the adult fly. Thus we have in the life of a fly four stages—the fly, the egg, the maggot and the pupa. The adult female screw worm fly finds a living animal that has a wound, preferably a fresh wound. The fly lays masses of creamy white eggs on the edge of the wound. Ten to 400 eggs are placed in a single mass, and these eggs hatch in from 11 to 21 hours. As soon as the young maggots are hatched, they enter the wound and begin feeding. As the maggots continue to feed they shed their skin several times, growing larger each time this process occurs. In from 4 to 10 days the maggots complete their development and begin migrating from the wound. The maggots drop to the ground and enter the soil, penetrating to a depth of one to several inches. At this point the maggot apparently becomes inactive, but actually a great change is taking place. The maggot contracts, becomes rigid and the skin turns brown and hardens to a leather-like texture. This is the pupal or resting stage, and within the pupal case the insect is transforming into an adult fly. In from 7 to 14 days the process is complete. During the overwintering period the insect sometimes spends as long as 54 days in the pupal stage. The adult fly breaks through the pupal case, comes up through the soil and rests upon some twig or plant until its wings have dried and expanded and it is ready to fly away. For five or ten days the adult flies feed upon various substances, the males and females mate, and then the cycle is ready to repeat itself. This cycle is completed within an average of 24 days. The screw worm fly will attack any cut, wound or abrasion in livestock, fowls, domestic pets, man or other warm-blooded animals. It does not, however, deposit its eggs on carcasses or in any place other than a wound on a living animal. It will be seen readily that the screw worm fly infestation can be greatly reduced if are treated and the screw worms. Each screw worm fly is capable from 2,500 to 2,853 eggs. This maggot that is killed in the means the death also of an infinite number of potential pests. A screw worm case can be recognized readily by the watery discharge blood and blood serum which flow from the wound and the foul odor associated with it. Flies frequently lay eggs around infested wounds and the eggs of several sizes are sometimes found in the same wound. Screw worms feed with their head ends buried in the wound and with their tails turned out. Breathing occurs through the exposed or posterior end of the maggot. This habit makes it easier to reach the breathing apparatus of the maggot with the fumes of benz which the United States Department of Agriculture recommends for killing screw worms in wounds. Following this treatment, the wound should be coated with pine tar oil, gravity 1.065, to hasten healing and aid in repelling attacks from the fly.

## Legislature Votes Deliberating The Old Age Pension

The third called session of the Legislature adjourned sine die at 11 o'clock Tuesday night, after sending to the governor a bill permitting issuance of interest-bearing deficit warrants to meet old age pension for the months of December and January. The House concurred in the amendment to the proposal a few days before the scheduled adjournment. The Legislature had previously passed a bill delimiting the pension and levying additional taxes estimated at \$8,400,000 annually. Hitch can method of operating the new law.

## Loss of a Friend Is Like a Limb

The loss of a friend is like a limb. It is not the loss of the limb, but the loss of the friend, that is the real pain.

**Fashion says: MATCH UP I-E-S BETTER SIGHT LAMPS**

The newest vogue in home decoration is matching styles in I. E. S. Better Sight Lamps. They add new charm, color, harmony, and beauty to the living room. Mulshoe's Newest Dry Goods Store  
In Henington Building  
MULESHOE, TEXAS

### R. O. H. CLUB AIMS ACHIEVED

At the R. O. H. club meeting held October 22, in the High school auditorium, members discussed the aims they have seen achieved and set higher goals they want to see accomplished before this club year is past. The object of the goals set is to make more money so as to buy more and better equipment for the Home Economics laboratories. The most recent aim accomplished was the purchase of a clock and utility cabinet which were placed in the foods laboratory. The club song and yell were given. Following this was a reading by Lawrence Godson, after which the club mother, Mrs. A. W. Copley, gave a very interesting talk on "Friendship." During the talk she read several quotations of famous men. She said each club member should make bigger and closer friendships. Florence Stone gave an account of all the club has done since it was organized in 1924, after which Lola Hupp gave some helpful suggestions about the club and what it can and should do in the future. After a piano solo by Dolores Beller the meeting adjourned, and each member left with hopes of accomplishing greater things in the future.—Reporter.

### MRS. TATE IS HONORED

A surprise miscellaneous stock show was given Monday afternoon at the educational building of the Baptist church in honor of Mrs. Cecil H. Tate, by a group of friends. Various entertaining games were enjoyed after which the many lovely and useful gifts were passed around for the guests to view. A delicious refreshment course of sandwiches, cookies and coffee was served to the following: Mesdames Ty Young, Dewey Mann, Bert Mathis, Joe Howell, Finley Person, R. L. Morgan, Joe Damon, E. R. Hart, Dick Rokey, J. Manuel Reynolds, Jim Cook, Byron Griffiths, A. E. Lewis, Ray Crittendon, W. A. Mathis, H. E. Shuster, L. S. Barron, Clarence Goins, A. W. Coker, W. E. Rainrow, Clay Buchanan, Misses Helen Jones, Mildred Miller and Mrs. Cecil Tate. Many friends who did not attend sent gifts. Be proud of your home town.

### BUILDERS S. S. CLASS PARTY

Members of the "Builders" Sunday school class of the Baptist church were entertained with a Halloween party given Thursday evening of last week at the Educational building of the church by the class teacher, Mrs. L. S. Barron, and her assistants. The rooms were attractively decorated with the many Halloween features of black cats, black and orange paper streamers, lighted pumpkins, witch hats and ghosts. Various entertaining games were played and one outstanding feature of the evening was a fortune teller who entertained all of the guests' fortunes. Refreshments of cake and cocoa were served to the 18 class members who attended.

### S. S. CLASS SOCIAL

A social was given Friday evening of last week at the Methodist church annex for members of Mrs. S. C. Beavers Sunday school class. Halloween decorations of black and orange paper streamers, lighted pumpkins, black cats and other features of the occasion were used. An enjoyable evening was spent and several played 42 and other games. Delicious refreshments of sandwiches, coffee and individual pumpkin pies with whipped cream were served the following: Mr. and Mrs. Good Harden and son, Mr. and Mrs. R. Bobo, Mr. and Mrs. Powell, Mr. and Mrs. Sam Fox, Miss Elizabeth Harden, Mr. and Mrs. A. J. Gardner, Mr. and Mrs. Harold Weyer, Mr. and Mrs. Delma McCarty and Mr. and Mrs. S. C. Beavers.

### CHEV. SPENDS \$26,000,000

The Chevrolet Motor Co. has expended \$26,000,000 in retotyping, new machinery and rearranging the plants and assembly lines for the new 1937 model, which will be on display here Nov. 7, according to K. K. Smith, local dealer. Smith says the 1937 is not merely another new model of improvements and refinements, but a radically different car in every respect. Early Romans raised asparagus for food and medicine centuries before the birth of Christ.

## FACE-GUINN

Miss Billie Pace and Allen Guinn, of Muleshoe, were married Sunday morning at nine o'clock at the Baptist parsonage in Clovis, N. M., by Rev. J. P. Nix, pastor of the First Baptist church that city.

Mrs. Guinn was formerly of Easterly but has been living in Muleshoe for the past several months. She is a niece of Mrs. Will Harper.

Mr. Guinn has been residing in Muleshoe for some time and is a mechanic at the Valley Motor Co. The bride wore an attractive black suit with black accessories at the wedding ceremony. They went from Clovis to Friona where they were entertained with a wedding dinner at the home of his mother, Mrs. Myrtle Guinn.

Miss LaVerne Goodson and the groom's brother, Jim Guinn, of Muleshoe, attended the wedding ceremony. The couple will make their home in Muleshoe at the present, residing in one of the Rocky apartments located in the west part of town.

## Invisible Taxes

"We cannot buy a stick of clothing without the government's taking in taxes a part of the money we pay out. We cannot buy an ounce of food at our grocery store without being taxed to support the government. We cannot go to a movie, but to a baseball game, or ride in an automobile without this invisible tax arm of government reaching out and taking a part of the money we spend."—Alf M. London at Buffalo, N. Y., August 23, 1928.

## Wrote "Fair Harvard" Song

In 1836 Rev. Samuel Gilman, Harvard graduate and a Unitarian minister at Charleston, S. C., wrote the college song "Fair Harvard" for the university's bicentennial celebration. It was written in less than 13 hours before it was sung at the morning exercises on September 8 and is called the noblest college song yet written in America.

## The Household

By LYDIA LE BARON WALKER

ONE of our readers in a quandary about whether, when using chrome-plated electric appointments for her tea table, she should leave them out or not. The vogue of having everything in evidence has swayed in the other direction, and today it is considered better form to bring in the tea tray with its appointments when it is time to serve the tea. If after-dinner coffee is served it is prepared in the kitchen and served in cups, or from an after dinner coffee pot, tall and slender, on the tray.

When the vogue of having daily tea the afternoon which are lower than regular tables may be used equally well. It is the style today for such tables to be left bare when not actually in use, and so be ready for book or tea tray, for coffee tray, for ash trays, work basket, etc., as the immediate wishes of the occupants of the room prefer. Even in the dining room, the fitted tea tray is not in evidence, and the tea wagon is left bare.

After all this is a rather good plan, for, especially in cities, dishes, remaining out in a room do get dusty very soon. As a matter of fact this is one of the chief reasons why the vogue of having the tea things out was changed. When such changes as this occur, it is plain to see that common sense is back of the vogue.

## Garment Hangers

Those who are accustomed to keeping garments on coat hangers continually will find that the material is ruined as a part of the garments tender before the rest of the textile. This is due to the weight of the garments always coming on the shoulder portions, and also to the slight friction of garment with its hanger as the frock is jostled, however little, when it is being changed against in the closet. To reduce this wear and tear, it is important to have proper coat hangers.

The assortment of hangers is sufficient for selection of different ones for different purposes. For garments that are not in constant use but sit on hangers choose those with loop wire arms. Pad the arms to soften them, and cover the padding with silk, velvet, mouslin, etc., as the purse and preference dictate.

## Materials for Coverings

Velvet has a surface that is both soft and clinging, and is well liked. Garments do not fall from hangers so covered, as easily as from textiles with a sheen. Muslin is favored because it is not bulky and can be laundered readily to look like new. Silk is a deluxe covering and as a general all quantities is required for a hanger, the cost is trifling. This expense is reduced to nothing when remnants of material from the tailor or dressmaking are put to this purpose.

The wide wooden hangers are a second choice for garments not in constant use. These can be covered, by winding with strips of textile, or bias material can be seamed over them. The disadvantage of this type of hanger is its weight, which is a consideration when many hangers are on one rod. The narrower wood hangers can be covered with knit or crocheted strips caught with stitches about the arms. These are excellent for ordinary use, but any hanger with a very narrow top to the arms will wear shoulders much more quickly than the kind with broad shoulder supports for garments.

## Safeguard Posts

Fence posts and uprights for yard swings—as a matter of fact, any wooden post that is to be sunk in the ground—should be well protected from the moisture in the earth. The wood should be thoroughly soaked in creosote or double-coated with this material. A coat of asphalt paint may then be applied. Such treatment will prevent rotting and the destruction of the wood by insects.

## Paint Oil from Grapes

Grape seed oil, the Department of Commerce reports, is being used as substitute material in Germany for technical uses in the paint, varnish, linoleum, soap and artificial leather industries. This oil is obtained from the seeds of grapes.

## SINGING CONVENTION SUNDAY

The Farmer County Singing convention will be held at Oklahoma Lane, in the new school gymnasium, next Sunday, beginning promptly at ten o'clock in the morning.

Everybody is invited to attend and enjoy the event. Prominent song leaders and musical organizations are expected to be present.

A feature of the day will be a big basket dinner at the noon hour. Everyone is asked to bring some good eats along for themselves and some of their friends.

## MR. AND MRS. BLACK HONORED

Friday evening of last week a farewell social and shower was given by members of the Eastern Star organization and the Masonic lodge to the honor of Mr. and Mrs. Walter Black who have moved to Lamesa.

The group met at the lodge hall with the intention of having a full evening of entertainment but due to illness of Mr. Black, neither of the honorees could attend.

Delicious refreshments of sandwiches, salads, coffee and cake were served to those attending. The many gifts brought for the honorees were delivered to them.

**GNOMES SNOOP, FAIRIES DANCE AND QUEEN WAVES MAGIC WAND WHEN BIG HALLOWE'EN CARNIVAL IS HELD**

Friday night of this week the regular annual Halloween carnival will be given at the High school building in Muleshoe.

School students and teachers are making plans for an evening full of interesting fun and entertainment to be had by all who attend.

Each grade in the high school is working very diligently to elect their class queen to be queen of the High school. Tuesday morning the votes stood: Freshman queen 626; Sophomore 250; Junior, 235; Senior, 725.

The building will be fully decorated in the Halloween mode. Managers of the various booths are as follows: Mrs. A. A. Alexander and Mrs. Fowler, novelty booth; Mrs. Curtis Taylor and

Miss Adella Beavers, marionette shows; Wilbur Gaede, prize fighting booth; Flaude Gallman and Howard Keith Davis, bingo stand; Miss Evelyn Boone, food exhibit booth; Miss Lucille Beaty, rat rack and shooting gallery; Miss Lee and Miss Stella Jackson have not announced what booths they will manage; Miss Addie Belle Fort, studio; Mrs. C. R. Stevens, cake walk; C. R. Stevens, clothes pin roping and Mrs. Flaude Gallman will have charge of the musical program and the coronation of the queen. The Parent-Teachers association will sponsor a booth.

Pop corn, peanuts and candy will be sold throughout the evening by members of the home economics classes and club.

A very interesting program will be given at the auditorium, including musical numbers, readings and playlets immediately followed by the coronation of the elected queen. The voting boxes for the queens race will close at 10:00 o'clock p. m.

Everybody has a special invitation to attend.

**YOU CAN'T CHEW OFF THE MOUTHPIECE!**

**Bogs and Swamps Defined**

A bog is not a swamp and a swamp is not a bog, according to Dr. E. M. Gress, Pennsylvania botanist. A swamp is watered by a surface stream, and a bog by cold springs usually from below. In the case of the swamp the water overflows the land, whereas a bog results from vegetation encroaching upon or overgrowing the water, says Capitol News. Sometimes the matted vegetation of a quaking bog is capable of sustaining great weight. Large reservoirs of cold, pure water are to be found underneath.

**poem by Uncle John**

**CARELESSNESS**

HO, HUH! WELL I GUESS I'LL SORTA TRUST TO LUCK!

A lame haphazard method in transacting our affairs, will afford assistance and momentum to our careers. . . . An overplus of carelessness in 'tending' to our tricks, will leave the monthly balance in a mighty ticklish fix.

It ain't so much of science as it is of common sense—that concludes a man is lazy when he's allers on the fence—and to see a feller negligent in front of urgent calls, is to visualize the brambles that will prod him as he falls. . . .

There's merit in precision as the run-of-mate of bluck, and the shortest-sightest vision is the kind that trusts to luck. . . . We've got to have the pludder with the mortar on his pants, for buildin' ain't a pastime that can stop to fool with chance.

**HIGH SCHOOL HONOR ROLL**

Those of Muleshoe High school who made the honor roll for the first six weeks of school are as follows:

Freshmen—Lola Mae Barron, Viva Mae Askew, Mary Dennis, Hattie Ray Griffiths, Willie Warren Watkins, Harry Gilmore, W. G. Harlan, Claud Riley.

Sophomores—none.

Juniors—Norma Elrod, Mary Hester Glaze, Mabel Rogers, Rosa Renfrow, Florence Stone, Floyd Embry.

Seniors—Margaret Ann Cook, Tidwell Douglass, Marie Finley, Ruth Gilbreath, La Vern Goodson, Geraldine Robbins, Sylvia Wilerson, Irma Willis, Joe Embry, and Lettie Darnell.

**ANNUAL SCOUT CIRCUS**

Muleshoe Boy Scouts will take part in at least three events of the First Annual Boy Scout circus to be held at the Tech gym, Lubbock, Nov. 27 and 28, according to A. A. Alexander, local scout director.

The circus will embody about 20 different events to be participated in by Scouts from this district, about 1,600 men and boys attending, according to report.

A Court of Honor is scheduled to be held at Littlefield, Nov. 5, which will be attended by Muleshoe Scouts and officials.

Be loyal to home town interests.

**POULTRY**

**INCUBATION PERIOD UP TO AGE OF EGGS**

**High-Hatching Stock Should Be Obtained.**

By E. W. Henderson, Poultry Husbandry Expert, Iowa State College, WND Service.

Eggs laid in the afternoon may hatch better than those laid in the morning. This was one of the phenomena revealed in various agricultural experiment station tests to discover factors causing poor chick hatches.

Another unusual fact observed was that the time required for incubation is directly related to the age of the egg set. Those from 14 to 21 days old required 14 to 18 hours longer for incubation than did those held less than eight days.

Chicks slow in hatching were low in vitality, it was revealed. Only 8.7 per cent of the first 90 per cent to hatch died in the first eight weeks. On the other hand, 24 per cent of the last 10 per cent to hatch died during the same length of time.

High summer temperatures decreased the hatch materially. Sudden and sharp drops in temperature caused poor hatches four and five weeks following. Eggs laid during the week of "cold waves" were not affected.

Because the expense of getting information to determine the cause of a poor hatch is usually too great, it is advisable for incubator operators to obtain stock from high-hatching families and follow good feeding and management practices.

Hatching eggs should be stored where the temperature is below 68 degrees and above freezing. For best results they should not be kept more than eight days.

Other experimental findings revealed that high egg production during the winter and spring months did not harm hatchability. Eggs from high-producing hens hatched better than those from low producers.

Cross breeding improved hatchability. Turning eggs laid from one to seven days before setting did not significantly influence hatching results.

One station found that pullet eggs hatched better than hen eggs.

(BUT BE SURE YOU READ ALL THE OTHER WINTER OIL ADS, TOO)

You will find most of the emphasis these days, on oil that flows freely.

Well and good. You SHOULD use your correct Winter grade, but . . . You can see that the more freely any oil flows, the more freely it FLOWS DOWN OFF the pistons, cylinders, and other parts when you stop.

Then in starting up cold, where is mere free-flowing oil?

It is waiting to be pumped up on the job. And even in much warmer weather than this—according to engineering opinion—those oil-starved waits can cost you more engine wear than all the rest of your driving!

But this Winter with free-flowing Germ Processed oil, you can have your engine Oil-Plated! . . . much more than a change to OUR Conoco Germ Processed oil . . . really a change to unbroken Winter lubrication for YOUR engine. It may stand cold for hours—days—weeks. Yet the slippery Oil-Plating formed only by patented Germ Processed oil, will always be UP IN ADVANCE. Pistons slip easy. Starter spins. Oil-Plated engine obliges—and lives the good life, on a stinky diet of Conoco Germ Processed oil. Continental Oil Company

**A Wet Mash Pays**

It will pay well to feed the layers a wet mash. It will increase consumption of feed which promotes heavy egg production. If a small amount of milk is available, notes the Missouri Farmer, it will pay to mix this with the mash, otherwise plain water is beneficial. If the mash can be mixed with warm water or milk it will be relished by the birds. They should be fed all of the mixture they can clean up in about 20 minutes. A new theory among investigators as to why a wet mash causes heavier production is that a wet mash stimulates the reproductive organs of the layers rather than increasing the consumption of feed. Suffice it to say, however, that the effects are very beneficial and the extra work is a good investment.

**Poultry Matters**

Pullets hatched from large eggs will probably lay large eggs.

Students of egg quality and marketing claim that one state loses from \$3,000,000 to \$4,000,000 annually because of eggs being dirty.

New blood should be introduced into small turkey flocks occasionally according to recent results obtained at an experiment station.

Roup is contagious, and if an outbreak occurs those affected should be isolated at once and measures taken to rectify the cause.

The first requisite of an egg is superior interior quality. Size and appearance count for much in getting premium prices.

Absolute cleanliness of drinking utensils at all times will do far more in the prevention of disease than the addition of potassium permanganate to the drinking water.

### The Household

By LYDIA LE BARON WALKER

LITTLE folk deserve to be catered to as much as adults. This does not mean that they should be considered more than their elders. Not at all. But it does mean that they should be made comfortable, and have their wishes granted when they do not conflict with health or interfere with proper routine or discipline. It seems a difficult matter to keep the balance even in a home between spoiling children and catering to them in a reasonable way. They seem to rule a home or be too much ignored. Either of these things is a mistake.

The comfort of little folk is wisely considered when chairs are of the right size for their miniature physiques. A small low table, one of the folding type, is very inexpensive, and will delight the youngsters. But if this cannot be supplied, then see that a high chair supplies comfort when a child sits at a regular table, whether at meals or between meals, when looking over books, drawing, painting, etc.

Conveniences. Shelves are apt to be too high for children's books and the games, etc., that are part of their belongings. The shelves should be high secured, to the wall. A low shelf can be put below others, in a closet without the need of buying children's furniture if the pocketbook forbids.

Children should be made to feel their welcome place in a home. Often this is done by letting them realize they are helping mother or father. At first it will mean extra work on the parents' part for a child has to be instructed and guided.

#### Something to Consider.

There is a certain equation between time and money. People who have money do not always have time, while those with time do not always have money. There are those who are privileged to have both time and money, but it is only after time has been put into work to make money that leisure to enjoy the money follows. There are many instances among the wealthy where time and money both are at their disposal. These persons are enjoying the fruits of time spent in work by other people—it may be by parents, or by ancestors.

It is well for us to understand this relation existing between time and money. Then we realize if we have time that we can make use of as we will, that we are fortunate. How eagerly persons who are pressed for time long for an opportunity similar to ours! Let us enjoy our privilege. If we are "up to our ears" in work, we are transforming time into money, and for this we can be grateful. In either instance we can see there are certain benefits for us to enjoy while they last, and which have time as a factor.

#### Homemaker's Privilege.

The homemaker has the opportunity to dispose of her time to suit her needs and her wishes more than most persons. She may have little money at her command. This is all too frequently the case. Time, however, is at her disposal. It is she who decides what days she will have her laundering done, her cleaning, etc. Regularity in some things has to be observed, but in others she can dictate.

She does not have to do her ironing on a sweltering hot day. Perhaps a few pieces may be required, and must be done, but that is all. She can do many tasks in the cool of the day, and rest in the hottest part, as those living in the tropics have to. When homemakers set a true value on their time, they will discover that they have privileges that the wage earners find enviable.

#### Bedroom for Moderns

A bedroom styled to the taste of young moderns and budgeted to their income has twin beds which merely are box springs on mattresses set on legs and placed against a panel of decorative modern wallpaper in faded rose color, beige and chartreuse. The rest of the room is papered in plain beige. The dull rose color is reflected in the rug; the bedspreads are beige corded with chartreuse. A small chair is upholstered in a plaid predominantly chartreuse.

The dressing table is formed from a narrow chest of drawers with a plate glass shelf extending beyond the top at one side, and cutting across the lower half of the large circular mirror which is fastened to the wall.

This bedroom combines good taste with decorative features and modern design with economy that will appeal to the pocketbooks of the average American family.

### General News Over Texas And Adjoining States For The Week

Landscapeing of the State College of Mines, a federal project to cost \$5,500 at El Paso, was begun this week.

Washington statistics say a total of \$7,204,247.42 in loans have been made to citizens of New Mexico of which sum \$3,343,880.12 is still unpaid.

Sales of department stores in Texas increased 16.9 per cent last month over the same month a year ago. The entire seasonal gain was 33.8 per cent.

Several thousand students, graduates and friends, including about 50 West Texas editors and their wives, attended the annual Home-Coming event of Tech college, Lubbock, last Saturday.

Gov. Allred has proclaimed Nov. 4 as Will Rogers day, in memory of the fifty-seventh anniversary of the late humorist's birthday. He urges that all schools and civic organizations give it due observance.

The depression's cost to business has been estimated at \$26,630,000,000.

### ONE MONTH DUCK SHOOTING

The Fall hunting season in New Mexico opened last Sunday; but duck hunting in Texas will not be legal before Nov. 26, and ending Dec. 25, the hours being limited to between 7:00 a. m. and 4:00 p. m. Sink boxes, batteries of live decoys and baiting, as well as shot guns having more than three shells in them, are forbidden. Ten ducks and four geese constitute a day's limit of such game. Duck stamps may be purchased at the local post office.
