

THE MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITTERA SCRIPTA MANET—THE WRITTEN WORD ENDURES

MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY, JULY 8, 1937

VOLUME 15 NUMBER 24

THE HEADLINES

NEWS OF THE WEEK PARADE

It is estimated on good authority that \$18,000,000 has been already lost in the steel strike.

Pan-American Airways are planning a regular air passenger service across the Atlantic ocean.

Hog sales topped the market at Chicago last Friday at \$12.50 per cwt., and went to \$13 at farther east markets the highest paid since 1932.

Mrs. Josephine Forrestal, socially prominent woman of New York City, was last week stripped of \$100,000 worth of jewelry by four thugs just outside her apartment.

Fourth of July celebrations accounted for 223 deaths last Monday morning. Two hundred were from auto accidents, 74 from drownings and 49 from miscellaneous causes.

President Roosevelt has signed the so-called "nuisance" bill designed to raise about \$625,000,000 revenue annually from sale of automobiles, furs, chewing gum, jewelry, etc.

Notwithstanding the DuPonts and Roosevelts have been at political odds for many years past, Franklin D. Roosevelt Jr. and Miss Ethel DuPont were married Wednesday last week.

Albert Dyer, Los Angeles PWA worker last Sunday confessed to the mutilation and killing of the three Inglewood little girls, Madeline Everett, 7; her sister, Melba 8; and Jeanette Stephens, 9.

President Roosevelt last week appointed his son James as "administration assistant" with a salary of \$10,000 per year. Two White House secretaries were also appointed at the same time.

President Roosevelt has signed the bill appropriating \$820,381,298 to carry out activities of the Department of Agriculture and the Farm Credit Administration for the fiscal year 1938, which began last Friday.

Congressman M. Jones is quoted as saying he is confident at least \$10,000,000.

Tech College Will Hold Cotton Grade School Of Interest

Lubbock, July 6.—With the avowed purpose of improving the quality of Texas cotton, three cotton grading schools will be held in West Texas during July and August under the supervision of the textile department of Texas Technological college. The courses will last two weeks and are scheduled as follows: Texas Tech., Lubbock, July 19 to 30; Abilene, August 2 to 13; Quanah, August 16 to 27. According to M. E. Heard, head of the Tech textile department, director of the three schools in West Texas, the plan for improving the quality of Texas cotton is the main idea in the courses. At present almost all buying cotton direct from the farmers and are paying one price for all grades of cotton. By attending these cotton schools and learning to grade cotton according to government standards grinders will be able to pay a premium for the better grades of cotton, thereby encouraging the farmers to grow better grades. Poor grades of cotton, under the present plan, according to Heard, there is no stimulus for the farmers to improve the grade of his cotton.

SENATOR CONNALLY URGES SENATE TO AID FARMERS IN REDUCTION OF INTEREST ON COMMISSIONER LOANS

Washington, D. C., July 5.—In a successful effort to aid farmers who have Federal Land Bank loans, Senator Tom Connally on the floor of the Senate Tuesday pleaded for the lowering of the interest rate on commissioners' loans from 5 to 4 percent, and the continuation of the present 3 1/2 percent interest rate on regular loans. Upon the insistence of the junior Senator from Texas, the Senate rejected the amendment of the Senate Banking and Currency Committee, which would have stricken out the reduction of interest rates on commissioners' loans. "We have been through a very critical period in the United States in the way of holding on to land during this depression," Senator Connally told the Senate. "Commissioners' loans are instrumentalities that were devised to help out the man who had a farm and was trying to pay for it by giving him

200,000 of the big relief bill passed by congress will be used for dam and reservoir building in the Great Plains area, including the Texas Panhandle.

Ellis Parker sr., chief of the Burlington county, N. J., detectives has been sentenced to six years in the federal penitentiary, while his son Ellis Jr., was given three years for plotting the kidnaping of Paul H. Wendell which grew out of the Richard Hauptmann hangings.

Solemn prayers were offered last Sunday by thousands of Buddhist Japs for the souls of 100,000 bullfrogs sacrificed to the cause of science in experimental purposes during the past year. The prayers were offered at the "tombs of loads" in a Buddhist temple at Tokyo.

Religious bodies of all denominations gained 837,404 members last year for a total of 63,493,008 it was announced last week. The gain was divided in part as follows: Catholic 221,837; Baptist 140,308; Reformed 81,968; Lutheran 124,965; Methodist 41,706; Unitarian 9,026; Episcopal 21,193; Evangelical 9,390 Presbyterian 6,507; Nazarene 5,887; United Brethren 4,101; Four-square, 5,225; United Brethren, 1,973; The Church of Christ, Scientists, and the Jewish bodies, it was stated, reported the same membership for 1936 as 1935.

FLOW DIVERTED LAND BY JULY 20 IS NEW DEPARTMENT RULE

Land that is diverted from soil-depleting crops and the summer fallow practice used for compliance under the 1937 Agricultural Conservation program must be plowed before July 20 according to a recent release of ruling by the AAA state office.

Although this practice will count only three-fourths of the acreage when contouring is in combination with fallow and only two-thirds where summer fallow is practiced without contouring, some who are cooperating with the program plan to employ this practice. In such cases, they expect to divert additional acreage to make up for the desired diverted acreage.

WILLIAMS GETS 24 BUSHELS PER ACRE ON ROW PLANTED WHEAT

John S. Williams of West Camp reported to County Agent W. C. Taylor a yield this year of 24 bushels of wheat per acre from the first row of wheat planted in winter furrows on the contour after summer fallow. The row method of seeding wheat was practiced the past year by a number of Bailey county producers and other reports on yields are desired by the county agent to compare with yields from the regular drill method under similar conditions. Mr. Williams contributes some of this yield to the summer fallow practice because the yield in rows from a similar field last summer followed was considerably less.

MULESHOE CLOSED THE FOURTH

The majority of business concerns in Muleshoe "took out and closed up" last Monday to celebrate the "Glorious Fourth," some going to Clovis, N. M., some to Merton, in the adjoining county, others elsewhere nearby, some to the mountains on piscatorial quests. Drug stores, blacksmith shops, cafes and grain dealers were about the only concerns remaining open to accommodate the public. There was no celebration of any kind in Muleshoe.

MAHON AMENDMENT IS DEFEATED; 50 MILLION IS VOTED FOR TENANTS

Washington, D. C. Farm home ownership for a greater number of tenant farmers was the argument for amendments proposed by Congressman George Mahon to the Farm Tenancy Bill passed by the House of Representatives last week. His amendments would have made available \$50,000,000 for the first year and \$100,000,000 for the two years following to well drilled to farm home ownership under liberalized credit regulations. The bill as passed by the House provided \$10,000,000 for the first year, \$25,000,000 for the second year, and \$50,000,000 for the third year to be sent to farm purchasers under direction of the Secretary of Agriculture.

Mahon pointed out that the House bill was limited to only a very small amount of assistance to the tenant farmer, but stated that he voted for the bill after defeat of his amendments because he was anxious that some start be made. The Senate passed a Farm Tenancy bill last week providing approximately similar to those of the House bill but the Senate bill provides that the Government shall buy and sell it to tenants whereas the House bill provides only for loans to tenants to purchase farm lands; the Government not making an outright purchase of the land. The two bills are now pending with a Conference committee of the House and Senate.

Desel engines for motor vehicles in Germany are becoming increasingly popular.

UNIT 1 ON STATE HIGHWAY NO. 28 IS COMPLETED

Less 16 Miles Is Now Paved Through To Washington, D. C.

The state highway working crew last week completed unit 1 work, grading and drainage on 16 miles of State Highway No. 28 from the east Bailey county line to Spring Lake in Lamb county, while from there on to Oltan the top paving coat has been completed. This national highway is now completed from here to Washington, D. C., with the exception of this 16 miles in Lamb county. Late this fall it is anticipated the caliche course will be laid on this stretch with the seal paving coat to follow next spring.

About 45 miles are now working on State Highway 24 south of Muleshoe, beginning at Needmore and working toward the south Bailey county line. Grading and drainage is now being constructed on this stretch, with caliche base to follow, and eventually a paving seal coat has been promised by the State Highway Department from Muleshoe county line. This is a WPA project.

PRELIMINARY SURVEY OF WATER IN BAILEY COUNTY COMPLETED; MUCH VALUABLE INFORMATION GIVEN OUT

Austin, Texas, July 5.—The Board of Water Engineers announces the release in mimeographed form of the records of wells obtained by the Works Progress Administration ground-water survey in Bailey County, Texas.

This project is part of a statewide inventory of water wells started in 1935 being conducted to obtain information concerning existing wells, to ascertain the quantity and quality of water they yield, to put down test wells in areas where no wells or few wells exist, and to compile and publish the information thus obtained.

This inventory is only preliminary survey, and all of the information obtained can be used later in connection with a more thorough ground-water investigation by the State Board of Water Engineers assisted by the United States Geological Survey. The latter, more exhaustive study will coordinate the results of the well inventory, enabling the people of Texas to regulate more intelligently the withdrawal of water from the ground, thus assuring themselves that an essential resource will not be needlessly exhausted. The published records are of immediate practical use. They are of assistance to well drillers, water supply engineers, geologists, county agents, teachers of vocational agriculture, home demonstration agents, and prospective buyers of undeveloped land who desire to ascertain the approximate depth to water and the water's probable chemical character. The Board of Water Engineers and the United States Geological Survey refer to these records constantly in replying to inquiries from individuals or industries requesting information pertaining to ground water.

Howell Puts In New Gullet Cotton Gin Replacing Old One

Enochs in southern Bailey county, is to have one of the finest cotton gins found anywhere on the South Plains for service this fall, according to G. F. Howell, that community, who is replacing his gin burned down last January with a 4-80 Gullet type outfit, housed in a fire proof building of steel and concrete.

This is no better type of gin on the market today, said Mr. Howell, and everything will be in readiness for service long before cotton picking begins, he continued. About 17,000 acres of sod land has been turned under in that vicinity this year and planted to crops for the first year, about three-fourths of going into cotton. Crops of all kinds in that section are said to be in a flourishing condition this year.

Howell states he severed his connection with the Enochs Land Co., the first of this month; that the new gin is his personal property, and from now on he will be working for himself.

CONSIDER SOIL CONSERVATION

While the next session of the legislature of this state to be called about September will be largely for the purpose of enacting new tax measures, the regular session was vetoed by that soil conservation is just as important a matter and will also receive consideration of the law-makers.

The soil conservation bill passed at the regular session was vetoed by the governor because it did not meet with federal approval. Two previous conservation laws have been passed by this body, but because of no vote because they had no "teeth" in them.

M. JONES LEADS A TENANCY BILL THROUGH HOUSE

Senate Measure For \$135,000,000 Is Now Pending.

Scoring what many termed the greatest legislative triumph of his career, Congressman M. Jones in a dramatic, turbulent record-vote session last week battled off all amendments and passed a bill authorizing appropriations of \$135,000,000 over a 3-year period to help tenants acquire farms and to retire submarginal land from cultivation.

The bill goes to the senate where a similar measure is pending. It would authorize \$10,000,000 in 1938; \$25,000,000 in 1939 and \$50,000,000 in 1940 for liberal loans to tenants and shroppers for purchase of farm homes and \$50,000,000 over the same period for government purchase of unproductive farm land.

Advocates estimated the appropriation of \$135,000,000 for the Agriculture to make farm-purchase loans to approximately 3,000 tenants the first year. They estimated the number of tenants in the nation at 2,800,000.

The bill must be passed by the senate and signed by the President.

desire to ascertain the approximate depth to water and the water's probable chemical character. The Board of Water Engineers and the United States Geological Survey refer to these records constantly in replying to inquiries from individuals or industries requesting information pertaining to ground water. This release on Bailey County contains 38 pages giving the records of 224 wells and 2 springs, water level measurements in 38 observation wells, driller's logs of 30 wells, logs of 164 test wells, and partial chemical analysis of 160 water samples. The locations of all wells, springs, and test holes listed in the release are shown on a map in the back of the release.

More laborers needed. Practically everyone in Bailey county who wants work now has it, and still there are calls going out from distressed farmers whose crops are getting 'in the weeds' for more help. Excessive spring rains and late plantings have given grass and weeds quite a jump on planted crops.

OVER 60 CARLOADS WHEAT SHIPPED FROM MULESHOE; TOTAL PROBABLY 125; HARVEST NOW IN FULL SWING

Wheat harvest is in full swing throughout the entire Plains area, hundreds of thousands of bushels being delivered daily to market points either for sale or storage, coming in such quantities that elevators are running day and night, Sunday included. Flood county reports as much as \$246,000 worth of wheat delivered in one day, with a 4,000,000 bushel crop in sight. Hale county is cutting a similar big yield. All the North Plains area is reported to be making much heavier than expected, though grasshoppers are said to be doing considerable damage in cutting off the wheat heads before combines can do the job.

WHILE EARLY DELIVERIES OF WHEAT LARGELY WENT INTO ELEVATOR STORAGE WITH COMPATIVELY FEW SALES, OCCASIONED BY PRICE INCREASES, MORE OF IT IS NOW BEING DUMPED ON THE MARKET

While early deliveries of wheat largely went into elevator storage with comparatively few sales, occasioned by price increases, more of it is now being dumped on the market. Muleshoe dealers paid \$1.06 per bushel last Saturday and Monday, while Tuesday the price was a little weaker. While Bailey county is not an avowedly wheat producing county, yet more than 60 carloads of this cereal have already been shipped from this point, and it is being freely estimated by local dealers the total shipment for the season may go to 125 car loads. Most of the wheat produced here is of excellent quality, testing from 60 to as high as 64 pounds per bushel. While it was estimated at the beginning of harvest this territory would yield around 150,000 bushels, some now say it may go as high as 250,000 or 300,000 bushels. Some growers are reporting damage from rust, principally in late planted wheat and the spring wheat variety, shriveling the grain and cutting down the weight test per bushel; yet no one has reported a total field loss. Per acre yield of 20 and 25 bushels are common, some going as high as 30 bushels per acre, while irrigation grown wheat runs still higher yields.

GENERAL NEWS

TEXAS AND SURROUNDING STATES

Statistics show there are now 6,235 convicts in Texas penitentiaries, an all high number.

University of Texas regents last Saturday earmarked \$100,000 for increasing salaries of its professors.

The Lower Rio Grande potato crop this year brought its growers a little over \$1,000,000, returns averaging \$300 per acre.

A rattlesnake derby, participated in by 200 of the venomous creatures, was a feature of July fourth celebration at Carlsbad, N. M.

Members of the Clovis, N. M., Chamber of Commerce are staging a drive for \$6,000 to fill their annual expense budget.

Eight tons of boxes have been used during the past two weeks in Carson county to combat the invasion of grasshoppers.

Gib Gilchrist, chief state highway engineer, has been offered the deanship of the Engineering department, A. & M. college.

A rattlesnake weighing 113 pounds and having 24 rattles was killed a few days ago near Dolph, in Kennedy county, South Texas.

It is now officially estimated it will cost the State of Texas \$250,000 to vote on the proposed constitutional amendments in the specially called election in August.

The first commercially produced wine ever fermented from Texas citrus fruit will go on both foreign and domestic markets early this month from the Valley Wineries, Inc., at McAllen.

It is announced \$400,000 appropriation has been granted Roosevelt county, N. M., for construction of 240 miles of REA lines to serve citizens of that county.

Last year 12,500 oil wells were drilled in Texas, bringing a total of 69,000 producing wells, compared with 41,000

five years ago, according to statistics released last week.

An argument of long standing was settled last year by a state engineer who measured the height of the capitol building at Austin. It is 308 feet and four inches from basement to top of star on dome statue.

The famous Treaty Oak, 500 years old, including the lot on which it is located, at Austin has been purchased by that city's council for \$1,000. The ground surrounding it will be converted into a city park.

What is said to be the largest recent real estate sale was that of the Whittier ranch in Roberts and Ochiltree counties, which sold last week for a cash consideration of \$300,000 to the Panhandle Mineral Co.

A new long distance flight was established last week by a homing two-year old pigeon owned by I. W. Taubert, San Antonio, when it flew from Churchill, Manitoba, Canada to San Antonio, in 43 days, 10 hours, 51 minutes and 30 seconds.

Strongly urging the Texas Supreme court to modify its language in the anti-trust opinion recently handed down by that tribunal, the Shell Petroleum Co., Tuesday of last week filed a motion for rehearing in the \$17,000,000 oil company anti-trust suit.

Damage totaling \$500 occurred to a 15 acre wheat field 18 miles north of Clovis, N. M., Friday last week, when fire, supposedly from backfire of a combine gutted a field belonging to Dalton Rice. It was turning out 30 bushels per acre.

More butter is made on Texas farms than in any other state, according to U. S. Department of Agriculture, there being 55,816,000 pounds produced annually from 341,627 farms. In addition 25,000,000 pounds of creamery butter are produced annually in the state. Statistics show there are 1,220,210 cows on Texas farms providing an output of 410,000,000 gallons of milk annually.

Bailey Co. Clothing Contest To Be Held Here Friday, July 16

The home demonstration club members of Bailey county will enter the County Clothing contest, to be held at the Muleshoe High school building, Friday, July 16. The program will begin at 10 a. m. All club members who want to enter the contest will have an opportunity to enter a dress and slip made by the foundation pattern, or a suit or dress for a child between the ages of three and 10 years of age. Eight prizes will be offered.

Mrs. Lida Cooper, district home demonstration agent from College Station, will be the judge.

BLANTON SUES DALLAS NEWS

Thos. L. Blanton former congressman from the 17th district, having his home at Abilene, but now living in Washington, last week entered suit against the A. H. Beco corporation, publishers of the Dallas News, in the sum of \$10,000, alleging a number of editorials, news stories and cartoons published in that paper were damaging to him.

He was defeated for reelection by Clyde Garrett, former county judge of Eastland.

NATURE AS A SCULPTOR

Photo Courtesy—The Railway

NATURE has her frivolous as well as her serious moods and when she starts designing to cartooning she does a pretty good job. Three examples of nature as a humorist are portrayed above. In the upper left hand corner is seen the "Grandmother Rock" from which Grand Mere, Quebec takes its name. The thing shaped like an upturned rubber boot in the upper right hand corner is known as the Ling Rock near Glace Bay, Cape Breton Island, Nova Scotia. The lower panel depicts the famous frog shaped rock near Lunenburg, Nova Scotia.

A parent trying year after year to make his child just what he is. A ripe old age is nothing at all to be bragging about. Just look at the tomato. Hollywood has no competition in one respect. It's still the town of permanent waves and temporary wives. The government never is a still preaching economy; but most of the politicians never get beyond the preaching stage. This day in time a specialist is a man who thinks you've got what he specializes in. Maybe that Indiana farmer who preached his own funeral did so far fear some preacher would tell the truth about him later on.

Lots of movie stars marry for better or worse, but few of them seem to marry for keeps. What this country seems to need now is right now is a little more performance and a little less reform. Plenty of Americans are not so much interested in love that possess all understanding as they are in a car that will pass all others on the highway.

THE JOURNAL'S Weekly Scrapbook

To help you do things

Quickly cool gelatine desserts, puddings, etc. Dissolve a handful of soda and salt in a bowl of water and place mold in it. A little powdered borax sprinkled in fruit jars with the cover screwed on tightly will keep them sweet until another year. To men! Granite utensils, press putty into the hole and bake until brown in a hot oven.

The Seamstress Says To brighten vest dresses, brush the dress and hang it over a tub of steaming water. This method may be used for any garment, later pressing through a dry flannel. Do not press velvet but steam individual portions by placing a wet cloth over an inverted heated iron and hold garment over steam so the steam enters from the wrong side.

The Doctor Says To destroy the unpleasant taste of castor oil, beat it with the white of an egg until both are thoroughly mixed. Or dip the spoon first in milk and the flavor will not be noticed.

A Beauty Hint Warm castor oil rubbed into the hair at night before a shampoo will arrest excessive dryness. Lemon in the rinse brings out the beauty of blonde hair; vinegar should be used by brunettes. Use the lemon or vinegar in the next to the last rinse, following with one of clear water.

An Inspiration "Nothing worth while was ever accomplished that did not at first seem impossible."

Pavement Pickups Geo Harris says many a good architect has discovered, after his honeymoon, that his wife can make plans. Eco.

Ira Robinson wants to know if you

car, refilling it at each stop where fresh, wholesome water is obtainable. Typhoid and kindred ailments most frequently spring from the drinking of contaminated water, and the seriousness of such ailments are too well known to be ignored. There is good and bad drinking water in every community. Don't take a chance on your own or your family's health by guessing which is which.

TOO MUCH MUSH

Without taking a survey or sending out a questionnaire we'll warrant the prediction that about 90 percent of the American people are so disgusted with the Duke of Windsor-Wally Simpson affair that they don't care if they never hear any more of it. It's got about as stale as the Dionne Quintuplets. Speaking for this community, nobody really gives a whoop whether they "live happy ever after" or get a divorce tomorrow. The affair hasn't helped in the least to boost the sacred institution of marriage, and if it hasn't glorified divorce and caused many to look more lightly upon it, the nothing ever will when their happiness, no matter how it turned out.

Life's forget it, and turn our thoughts to other and more helpful things. The whole world has had enough of this sort of mush to last for a long time.

Jaunty Journalettes

One can count on it if a Muleshoe man dresses shabbily his wife apologizes for him; but if he always looks neat she says she picked out his suit.

About the only kind of lying that increases one's popularity in Muleshoe is saying one feels fine when they really feel rotten.

Life events things up pretty well. Almost every Muleshoe citizen has relatives he is ashamed of, also a few who are usually ashamed of him. In China the girls like their rice with chopsticks; but we've noticed in Muleshoe they prefer having it thrown at them uncooked.

Most Muleshoe people are optimists. They'd pay the doctor more promptly if they expected to need him again. Quite a few Muleshoe citizens can recall that back in horse-and-buggy days the horse had one advantage. He could get home at night without running into a lot of telephone poles.

As a rule, when you see a Muleshoe man who doesn't want any more money he's holding a fly in his hand. The fellow most Muleshoe folks try hardest to dodge is the one who always wants to tell you something for your own good. Muleshoe citizens have noticed there is at least one advantage in motoring over a rough road. It has the fewest billboards.

Middle age is that time in life when the average Muleshoe man is going to begin saving next month. One thing a lot of Muleshoe folks find out when they take vacations is where to stay away from next time. The average Muleshoe man does not object to a sermon being snappy if it doesn't snap at him.

A Muleshoe man stood before a mirror the other day and remarked he would soon be ripe enough for an old age pension. Muleshoe men generally prepare against old age by laying up money and creating an estate, while Muleshoe women do so by dieting and getting more beauty treatments.

SNAP SHOTS

The secret of real happiness is getting used to what one has and learning to like it.

Having to go back to work seems to be hurting a lot of people more than did the depression.

The politician's job is saving the country; but he always has to be on the pay roll to do it.

Normal times are those when nobody gives a darn what is happening in Washington.

Discontent usually comes from getting everything one wants without much of a struggle.

A magazine on taxes is soon to be published. It will probably feature articles on how poor men get poor. The supreme example of vanity is

THE MULESHOE JOURNAL

Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1879.

SUBSCRIPTION RATES In Bailey County, one year, \$1.50. Outside of County one year, \$2.00. Published every Thursday at Muleshoe, Texas. Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses. Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week. The right of revision or rejection is reserved by the publisher. Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices, matters not by whom nor for what purpose, or the exact rates money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue listed. Obituaries, cards, notices and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher. In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Editorial

Every Great Attempt is Glorious Even If It Fails

A THOUGHT FOR THE WEEK Every man's inheritance shall be in the place where his lot falleth; according to the tribes of your fathers, ye shall inherit.—Numbers 33:54. They who provide man wealth for their children but neglect to improve them in virtue, do like those who feed their horses high, but never train them to be useful.—Socrates.

LOOKING AHEAD

It hasn't been so very many years ago, most Muleshoe citizens will recall, when an easy way to get an argument out of a man was to mention "good roads." The auto was just beginning to become popular, though sentiment was about evenly divided as to whether it would prove a permanent mode of transportation or a passing fad. The good roads question was a national issue, and it was possible to find whole families divided as to the wisdom of building any better roads than those in use for horse-drawn vehicles. Today there is no argument about it. Everyone from coast-to-coast, and lake-to-gulf, is agreed that the auto will always be this nation's leading mode of transportation and that the welfare and prosperity of every community, large or small, hinges on the condition of the roads leading to it. Today the nation would practically collapse if it were forced to return to gravel roads and horse-drawn vehicles.

Realizing this, those who are far-seeing are insisting that every new road that is built be made wide enough to carry twice the traffic now operating over it, and that old roads as they are repaired, be made correspondingly wide. The day is not far distant when about 80 percent of the roads now in use in this country will be unable to carry safely and appreciate the amount of traffic that will be seeking to use them.

It is a good point for our roadbuilders to keep in mind. It will be of some interest to the taxpayers, in the long run, to build wide roads now on, and to make the old ones wider as quickly as convenient. Then the job won't have to be done twice, at twice the cost.

PRIDE IN FARMING

Comparatively few farmers now days manifest the pride of yore in making their homesteads attractive. In the years gone by plenty of agriculturists of the eastern and middle states spent much time and money beautifying their places. Many of them were given names and such appellations were pointed in large signs at the front or displayed on the roof of some large building. Many of them had their own stationery, in envelopes and letterheads carrying the name of a given farm and the principal products they raised. Commendable pride was manifested in keeping the place in tip-top condition, fences straight, well strung, all buildings painted, driveways in desirable condition, etc. the owners manifesting a real pride and artistic sense in their home-manufacturing plants. People driving along such nicely kept places frequently gave vent to surprise and appreciation of their well kept conditions, commenting favorably upon the shade trees, delightful lawn, clean lots, artistic garden arrangements etc.

There is no reason why a farmer should not have as nice a home, yes a nicer one than his city cousin. True, recent economic conditions have been a

hindrance; but now we are climbing up out of the depression again, the means by which we like to see the homes of this area become more attractive. The investment of a few dollars and some labor in beautification of farmsteads pays big dividends in numerous ways and is a commendable virtue wherever found.

Elderly people are always quick to notice and appreciate courtesy on the part of the young. It reflects favorably, too, upon the parents of those boys and girls who are thoughtful and polite and who gladly assist those about them with no thought of compensation. There are times when it seems courtesy on the part of the young has suffered a slump in this country. Maybe the case of the old gentleman who remembered the boy who retrieved his hat will serve in a small way to impress a few youngsters with the age-old fact that "courtesy always pays."

INDIAN PITY

Various newspaper editors are showing commendation upon the Seminole Indians of Oklahoma who recently made application for land in Mexico that they might return to their former nomadic life in the wilds. However, it is not at all likely these Indians appreciate or give thanks for the pity of pale faces. They are naturally nomadic, do not appreciate the so-called advantages of civilization, are more or less cramped with such impediments, miss the old time camp fires, huts and chases, and yearn for a spot where all such may be revived. We do not blame them. Civilization, as it is today, with its attending civic duties, innumerable taxations, attending expenses of various kinds, knotting to a mess of irrelevant mandates, is becoming vexing to plenty of white folks, many of whom would be happy to join the Indians. The contemplated Mexico hunting grounds, if they would permit. Let these editors who are wasting their sympathies on an oppressed and devastated race have a double dose of modern civilization.

WATCH THE WATER

While some states now carefully mark the source of drinking water along their main highways, as to its purity, it would be a good idea for every Muleshoe motorist who plans a drive into strange territory to keep in mind the importance of such information. Drinking any kind of water that is handy when one is thirsty is extremely dangerous, and it is much better to continue on a little further until a source of supply that is known to be pure can be obtained. Rather than take a chance on being forced to drink impure water many motorists carry a bottle or jug in their

BAILEY CO. HOME DEMONSTRATION CLUB NEWS

By Miss A. Stewart
Home Demonstration Agent

Will Finish Work Although Ill

"Even though I am not able to be up and use the sewing machine, I will enter the Bailey county clothing contest, June 16," said Mrs. Roy Helson, clothing demonstrator of the Enochs home demonstration club.

Mrs. Helson plans to make a dress on her fingers for a child. She will get some of the club women to take care of the child at the contest. She had an operation a short time ago and has not yet entirely recovered.

Mrs. Helson's husband has built a clothes closet of veneer board. He built four shelves in one end of the closet, and put a rod for the baby's clothes under the shelves. The rod for adults clothes was built across the long way. A hat shelf was added above the rod for adults. Hat and shoe racks were made of scrap lumber and ply board. He is painting the inside of the closet with a light colored paint to make it lighter and keep the moths away.

Mrs. Helson says she will have all her records and story finished before the contest.

Stadium For Park Planned Here, Work Begins During Week

Plans are on foot for rehabilitating the local athletic park and building a grand stand in same, to be located north of the Santa Fe railroad tracks, according to E. C. Smith, manager of the local baseball team.

Smith says several local citizens realizing the benefits of athletics of various kinds to the citizens and to the town in general, are taking an active interest in the proposed improvements, which are expected to be under way within the coming week.

During the several years past has enjoyed the benefits of a good ball team composed of skilled players, practically every year winning a majority of the games played. It is anticipated especially desirable for the events of the annual fair by having a suitable stadium for the comfort of attending fans.

It is also planned that the local school system will be permitted to use the improved park facilities for football and other athletic events during school year, these facilities being especially desirable for the events of the Interscholar League held annually.

In the baseball tournament held last weekend and the first of this week at Littlefield, the host town won its own high honor and first money, receiving \$175 for playing lead games of the series. Amberst won second money of \$75, while Muleshoe came in for third and Sudan fourth, each team winning \$25 and expenses.

In the games played Muleshoe won its first game with Amberst at Amberst, to I. Amberst coming back for revenge by winning the second meet, 3 to 0. Muleshoe played Sudan Saturday afternoon, winning 7 to 4. Sunday Muleshoe and Amberst crossed bats again, the score being 4 to 3 for Amberst. Last Monday Littlefield beat Amberst 15 to 4 to win the tournament.

The Muleshoe team is planning to play Littlefield some time the latter part of this week.

National Farm Loan Ass'n Opens Office In Sattler Building

Offices for the Bailey-Parmer County National Farm Loan association were opened last Tuesday in the Sattler building formerly occupied by the Aldridge beauty parlor, L. W. Jordan, Littlefield, in charge.

A. P. Stone secretary-treasurer of the Bailey county association for the past nine years is assisting Mr. Jordan in the preliminary work of getting the new office in workable condition and familiarizing him with the work.

Consolidation of these two county associations affected last week is in keeping with a state policy inaugurated several months ago by the Federal Land Bank at Houston in the interest of lowering expense operations and greater efficiency.

The combined association now has loans in Parmer, Bailey, Lamb, Castro and Deaf Smith counties.

Mr. Stone, retiring official, states that with the appointment of Mr. Jordan as successor to himself and J. D. Thomas, Farwell, Mr. Jordan has his very best wishes for success of his future administration, and he will be glad to render him any desired assistance at any time. The Bailey county association has enjoyed a flourishing growth under direction of Mr. Stone and he is anxious for such cognizance expressing his confidence such will be the case under the management of Mr. Jordan.

Mr. Jordan has had several years experience in land business, for about 10 years being closely associated with the Yellow House Land Co., Littlefield, and for the past three years assistant land appraiser for the State of Texas. He expects to move his family here early in the fall, as soon as housing accommodations are available and become a bona fide citizen of the metropolis of the Blackwater valley.

Maple News Items

Several from here attended the Quarterly conference at Amberst Sunday.

Mrs. J. F. Carter and children and Bill Lebo visited their parents at Matador last week.

Mr. and Mrs. M. B. Toombs and children, Dr. E. J. Hoy, Mr. and Mrs. D. V. Terrell and Garvin Long went to Salt Creek in New Mexico the 4th to fish.

Nearly everyone from this community spent one or more days at the rodeo at Merion.

Mr. and Mrs. Bray from Vega visited their daughter, Mrs. Willie Dale Hart last week returning to their home Wednesday accompanied by Mr. Hart and daughter, who will visit them a few days.

Work is progressing on the new gin. The press was installed last week. There was also a new office built at the other gin.

Mr. and Mrs. Grady Wimberly and son, Iva Lee Wimberly of Ft. Sumner, N. M., and Iva Wimberly and children from Hope, N. M., visited their son and brother and family, Mr. and Mrs. Ernest Wimberly, over the weekend.

The 4-H club girls met with Irene Ball Thursday July 1. Miss Alma Stewart gave a demonstration on canning beans, and judging canned meats, joint sponsors were elected who are Mrs. Chas. Shaw and Mrs. John Tyson as Mrs. Darlock is unable to attend on account of illness.—Reporter.

Alvin Farrel Is a Delegate to National League Convention

Members of the Muleshoe Methodist League received invitations of a novel type last week inviting them to a party Friday night. The invitations were a cleverly worded card on which were fastened tiny pink sacks. This being the fifteenth birthday of the league, each member was requested to fill the sack with pennies corresponding to their age and bring it to the party.

The money brought in the birthday sacks is going to be used to send Alvin Farrel, the League president, to the National summer assembly at Mount Sequoyah, Arkansas.

Clowns Are Original

Each clown creates his own style of make-up, and it becomes identified with him. No clown copies the make-up of another clown.

There was a large cake holding 15 candles. The league officers, Alvin Farrel, president, and Miss Hazel Nelson, secretary, presided as official candle lighters.

Various games were played and then the birthday cake was cut and served with ice cream to the 26 leaguers present: Misses Twila and Wanda Farrel, Marie Hundrick, Norma Elrod, Mary Hoyt, Maurine Kerr, Valine Lewallen, Nona Fay Johnson, Hazel Nelson, Jamie Lee and Janet Watkins, Wanda McGaughey, Lucille Bartley, Alvin Farrel, George Bundrick, Cecil McGee, Cloyd Skeeters, Orval and Gale Jackson, Lester Guthrie, Burgin Watkins, Paul Smith, Rev. and Mrs. R. S. Watkins, and Mr. and Mrs. R. N. Edwards.

Kindergarten in Early Days

In its early days the kindergarten was a holy cause, espoused by some of the leading thinkers of the time. Many names famous in literature and government, as well as in education, were associated with the movement. The first kindergarten in America was established in behalf of her own small daughter, in Watertown, Wis., in 1836, by Mrs. Carl Schurz, wife of the German refugee who later became minister to Spain.

H. D. News

The club met July 2 with 12 members and 5 visitors present.

Mrs. Simmons, Mrs. Chester and Mrs. Gage attended council Saturday and Mrs. Gage was elected to go to Short Course. Lela Mae Chester gave a report on Short Course which was very interesting. The club is planning entering the Clothing contest, July 16.—Reporter.

CANNING CONTESTS HELD AT BAILEYBORO, BULA, MULESHOE

The 4-H club girls of 12 clubs in Bailey county will enter canning and judging contests. The 4-H sponsors divided the county in three sections for the contests.

Bula, Circleback and Watson girls will meet at Bula school building at 10:00 a. m., Thursday, July 29 and enter the contest.

Baileyboro, Maple, Stegall and Longview girls will meet at 10:00 a. m., at Baileyboro school building Friday, July 30 to enter the contest.

Y. L. Muleshoe, West Camp and Fairview girls will meet at Muleshoe at 10:00 a. m., Wednesday, July 28.

Each girl will can two pints and one quart of beans to be used in the contests.

Each girl will can two pints and one quart of beans to be used in the contest.

The two girls that make the highest score in each of the three preliminary contests will enter the county contest to be held beginning at 2:00 p. m., Monday, Aug. 2 in Muleshoe.

Mrs. Ruth Evans Perry, Lamb county home demonstration agent of Amberst, will do the judging in the county contest.

Vampire Bat Walks

The vampire bat walks with folded wings, like a four-legged animal. It does not drag its body along, as do other bats, but carries it well up from the surface on which it is walking.

Chance Discoveries

Chance discoveries brought ether, chloroform, nitrous oxide, cyclopropane and ethylene as important anesthetics to operating rooms.

Circleback News

Several people from this community attended the 4th of July celebration at Merion.

Mr. and Mrs. Delbert Brandon took dinner Sunday with Mr. and Mrs. Rueben Shanks and family at West Camp.

Mr. and Mrs. Lester Patton and Mr. and Mrs. Alvie Patton visited Sunday.

WEEKLY LAY SERMON PAINLESS SURGERY

By JESS MITCHELL

No one likes to get hurt and one of the great tasks of the ages has been that of relieving the suffering of others. From the very beginning of human history the world has been in need of doctors and surgeons, and those with the greatest skill, who could bring relief the quickest and the easiest have always been in greatest demand.

Esculapius, one of the early surgeons, was so successful in his profession, he became deified. Ptolemy introduced phlebotomy, relief of pain by bloodletting, while Epidaurus made improvement on that system. Damocles cured the cancer of his queen and set the dislocated ankle of King Darius. Hippocrates attained quite a reputation in the setting of fractured limbs and is the first on record to apply limits that could not be cured. Praxagoras was an old-time throat specialist. Erasistratus specialized in boils and other tumors. Herophilus introduced dissection to discover causes. Celsus, the Roman expert, was an eye surgeon. Galienus, a Greek, was a specialist in the setting of dislocated joints and is the first on record to apply limits that could not be cured. Praxagoras was an old-time throat specialist. Erasistratus specialized in boils and other tumors. Herophilus introduced dissection to discover causes. Celsus, the Roman expert, was an eye surgeon. Galienus, a Greek, was a specialist in the setting of dislocated joints and is the first on record to apply limits that could not be cured.

Notwithstanding all the surgical and medical skill of the world, there is a tendency for old diseases of the human race to hang on with fervid tenacity, while new ailments are constantly being discovered, diagnosed and combated. The marvelous fact is that in these present days doctors and surgeons are not only learning how to successfully overcome numerous diseases, but they have learned in a remarkable manner how to combat them without added pain to the victim. It has been a good many years now since Dr. Jackson, Hickman and E. M. Robinson, anesthesiologists to numb patients with narcotics and others while serious operations were being performed, while new and more efficient methods are being constantly brought to use.

It has been about 2,000 years ago that a young physician of Judea by the name of Jesus of Nazareth introduced the art of painless surgery. Apparently he was quite successful in his profession, some of the most astounding cures being perfected, and, so far as we know, without the use of drugs or knives. He seemed to have a formula for chronic cases. Cases of muscular contraction where false ligatures were formed, cases of ossification, of long-time hemorrhages, of spinal curvature from youth, blindness, deafness, dumbness, all attracted his interested attention. There are innumerable instances of suffering on record where it was thought only the grave would cure; but he cured these sufferers of many years to arise from their beds with relief. However, probably not one out of every hundred of his cures were reported, for dissemination of news was not so highly organized then as it is now.

I am impressed with the fact that many of this medical physician's cures were victims of hereditary tendencies and pre-conceptions. It was not so much what they did directly that brought on their sufferings, but an inherent weakness of the mind or body which they fell a victim. That same cause of disease and difficulty exists today, as psychiatrists and psychologists will tell you. Ignorance of the laws of nature has brought many a victim within its clutches. We know today that mental reactions are frequently the

cause of physical disturbances. Mind has a powerful influence over matter, and the former must be treated to relieve the latter.

While the "old family doctor" has been an instinctive boon to the human race, treatment of homo sapiens is constantly being improved upon to the point that folks now days are not only living longer, but enjoying greater comfort of life during the added years. While we have specialists innumerable, the general physician has also become of greater service, because he has capitalized upon the ardent and intense investigations and discoveries of these specialists and used them for general human benefit.

Hospitals and trained nurses today bring to humanity remarkable curative and comfortable results of their knowledge and skill. Infirmary and sanitariums of various kinds are innumerable, and their ravages halted. New methods of sanitation and safety, more perfect understandings of protection from various dangers are being proclaimed. Young and new manifestations of old diseases are constantly being thwarted and annulled. Every year this old world and its inhabitants takes decided steps toward that perfection which is the reduction of pain and suffering. It is when this vale of suffering will be transposed into a valley of delight, where physical health will be superb.

I have noticed the human race is also affected with spiritual maladies, which divinity doctors have been combating for centuries, past, obtaining more or less favorable results. These diseases, while wide-spreading in their manifestations, go under the common cognomen of "sin." Just what sin is would take a large volume to intricately describe. Suffice it to say it is some violation, innocent or wilful, of the physical and moral laws which have existed from the beginning of time. We are all more or less victims of this disease.

I have often thought that the ideal doctor of the future will be one who can administer consolation and sedate at the same time, who can pray as well as amputate, who can administer to the needs of the soul as well as those of the body. Any physician who can traverse the intricate system of physical man and does not discover therein "the mysterious manifestation of Omnipotence is lacking in proper training is an impetuous fool.

The time will come some day when the meretricious work of doctors and hereditary sins of the past, which will have been transported to the Elysian fields of paradisaical eternity. All victims of malformation, accident and hereditary ills of earth will become bounding athletes. Victims of ophthalmia will have never-ending vision. Those bent with rheumatism will stand gracefully erect. The dumb will take part in the most beautiful celestial music, while the deaf decline nearby to enjoy those transcended cadencies. Pain, suffering of every kind will have been forever abolished. Death will be unknown, and eternally the rejoined race will enjoy the blessings of perpetual health.

Building Material in Early Days
In early days when transportation facilities were limited, the most easily obtained building material was the most commonly used, so that one section of the country used wood almost exclusively, another adobe, another natural stone.

Envy Turns to Hatred
"We desire to be envied," said Hi. He was the sage of Chinatown. "Yet envy easily turns to hatred, and we should not be surprised if success brings more loss than friends."

Don't be satisfied with ordinary baby powders that are not antiseptic. Without paying a cent more you can get Mennen's Antiseptic Powder—which not only does everything that other baby powders do, but also sets up an antiseptic condition that fights off germs and skin infections. It stops chafing and rawness, too. Buy it at your druggist's today.

TURKEY PROSPECTS PUZZLE BREEDERS

Too Early to Figure Cost of Feed for Poults.

By E. V. Smith, New York State Agricultural Experiment Station, Ithaca, N. Y.

A fair price for poults which will enable breeders to break even and perhaps make a little money in spite of high feed prices is the first point in the turkey outlook.

The outlook applies to those who buy poults from New York State breeders. Cornell veterinary college has found that pullorum disease is not important in the state's turkey flocks, and those tested have been found free of this disease. According to authorities in some other states, pullorum infestation is serious.

Second point in the outlook is that commercial growers will probably receive higher feed prices for poults the first part of the growing season, which is not so serious because total consumption is not large during the early part of the season.

Finally, if the expected good wheat crop develops, together with a good corn crop, the probabilities are that turkey rations will be considerably lower from July on through the growing season. Since that is when turkeys eat the most feed, a reduction in price is more important at that time.

These facts indicate a "more favorable" condition for the 1937 turkey grower, though not a "particularly favorable" one.

Portable Brooder House

Favored by Specialist
A round, roof portable brooder house, lighter in weight and easier to move than the ordinary shed-roof type may well be one of the factors in the success of the farm poultry enterprise in 1937, according to Cora E. Cooke, extension poultry specialist, University Farm, St. Paul.

Besides being more portable, the house is easier to heat, because of the smaller amount of heat space. Another advantage is the window arrangement, for on all four sides there are two windows, each with a sliding door. The windows distribute light over the floor evenly, preventing crowding and the development of hot spots. The windows may be opened to allow for excellent cross ventilation. In hot weather windows on the four sides may be opened to allow for excellent cross ventilation.

A double floor, which protects the young poultry from cold, is 12 by 14 feet—large enough to accommodate 400 baby chicks or 250 young turkeys. The matrix, or form, for the round roof is easily made by fitting 1-inch material together.

Sloping roosts are constructed along the sides. A 300-chick brooder stove may be used in the house. Feeding perches, 12 by 14 feet, may be attached to the house. For chicks, 1-inch mesh wire should be used; for turkeys, 1 by 2-inch mesh.

Discing for Lespedeza

Korean lespedeza may be seeded safely in oats by discing or drilling the seed into the soil with the oats or after the oats have been seeded. The method of seeding may be similar to that of red clover in wheat, with oats or in this pasture, says the Indiana Farmer's Guide. Most seedings are broadcast and covering more than an inch in depth may prohibit germination of the lespedeza. If the seed is to be discing into the ground with oats, cover as lightly as possible.

Raising Broiler Birds

The cross of Rhode Island-Red hens and Barred Rock males is a popular broiler bird. It is said that they grow faster and are easier to raise than most pure breeds. Broilers are started on a chick starting ration and can be given hard grain after a short time or raised on an all mash feed. A special broiler ration gives well fleshed birds. The loss in dressing broilers ranges between 13 and 14 per cent.

Down on the Farm

The estimated 1936 production of hay in the United States is 70,165,000 tons.

Approximately 4,000,000 acres of Texas land were terraced or contoured in 1936.

Wool increases greatly in value, the same as any farm product, when it is properly grown and prepared for market.

Any large-scale war against rats should be started with poison, gas, or blocking; never with traps.

There are two kinds of soil erosion—that caused by wind and that caused by water.

Good pasture reduces the cost of feeding live stock. Agronomists at Ohio State university say that money spent for pasture improvement should be classed as an investment rather than as an expense.

A Radio Mystery

By CARLETON JAMES
© Associated Newspapers,
WNU Service.

ON the night of September 25 John Nelson sat by the open window of his apartment listening to his radio blare forth returns of the prizefight. The window looked out into a court; other windows in other apartments faced on the same court.

Nelson's radio was making so much noise that he didn't hear the sharp snap of a discharged rifle, or perhaps he mistook it for a bit of static. But he felt the sharp burning sensation of a bullet as it plowed its way through the flesh of his shoulder. He uttered one cry of pain and slumped to the floor.

Nelson's wife found him. She kept her head, summoned the house janitor, then the police.

Inspector Homer Trask came up from headquarters to investigate. Accompanying Homer was a youth named Andy Fletcher. Fletcher was learning the profession. Hard-boiled, stern-faced Inspector Trask was his teacher. Two minutes after the officers arrived, Dr. Harry Randall appeared and gave aid to the wounded man. The inspector and his young assistant went into the room where the radio was located.

The radio, they discovered, was a wreck. The bullet had shattered it. Trask thrust his hand from the window and scratched the windows of other apartments. Those directly opposite, four tiers high, were perhaps fifty feet away.

Trask withdrew his hand and motioned young Fletcher to follow him into the other room. Dr. Randall reported that Nelson would live, and requested the co-operation of the janitor which he had extracted from the victim's body. Trask inspected it carefully and handed it to Fletcher. The policeman, then went down into the court. They searched and searched. Springfield, the electrician, had been recently fired. The weapon was pretty well shattered and dented. They examined it for fingerprints and found none.

A moment or two later they had summoned the janitor and with him as guide began calling on the occupants of the apartments directly across from that occupied by Nelson. By midnight every apartment except one that was vacant had been searched and directed the janitor to admit them to this one.

The janitor was surprised, but he complied. They had to search by candlelight as the electricity had been shut off when the last tenants departed. There was a fine film of dust over everything. In the kitchen, where the fire had burst on the window sill had been disturbed. Further investigation revealed that the window had recently been closed. Inspector Trask hunted around the floor until he found an empty cartridge jacket.

Returning to the janitor's quarters, the trio encountered a Mr. and Mrs. Robinson, returning, they said, from a movie at a nearby theater. Trask faced his youthful protégé and said: "Well, son, what did you make of it?"

"My guess is that the Robinsons are responsible for the shooting," he said at the beginning and tell me why."

"In the first place the bullet, extracted from Nelson's body was flattened on one side, which indicated to me that it struck something solid, probably in the radio."

"Good. We agree."

"I am of the opinion that the shot came from above, as the weapon used, obviously the rifle we found, was held pointed, which indicates that after firing it the user threw it into the court from a height of not less than three stories."

"The Robinsons" was the only apartment we examined that did not contain a radio, which might indicate they didn't approve of them. The kitchen and bedroom of their apartment faced on the court. Obviously Nelson's radio had proved annoying to them, probably keeping them awake nights."

"Robinson, driven to a point of distraction, had probably determined to teach Nelson a lesson. He took his rifle, went to the unoccupied apartment over head, shot at Nelson's radio from the kitchen window, intending merely to wreck the machine, and then threw the rifle into the court, first, however, wiping it off to eradicate any fingerprints."

"The Robinsons" then went out. They told us they had been attending a performance at the Palace. The Palace has been running the same picture for the past week. They could have seen it any time during the past six days, thereby establishing their alibi.

"But we can prove that one of them shot that rifle by examining the fingerprints on the empty cartridge shell. We found it under the sink. That means that Robinson had not thought to wipe it clean of prints."

Inspector Trask grinned. "Son, you win your stripes. My guess is the same as yours. Come on, let's go."

And the policemen went out and up to the apartment where Robinson, smug in the belief he had successfully covered his tracks, was preparing to retire, contentedly aware that the blatant screech of his neighbor's radio was for once not throbbing against his ear drums.

LONGVIEW 4-H CLUB NEWS

Longview 4-H club met June 29, at Miss Viola McKnight's.

We had a demonstration on how to make butterbeans, salad.

We will meet at Betty Jo and Norma Lee Pool's next meeting, July 13.

We are going to have a pie supper, Friday July 9, at the Longview school house to raise money to send a delegate to Short Course. Everyone is invited. All the ladies are asked to bring pies.

There were six members and two visitors present at this meeting, as follows: Fern Smith, Lena Belle Smith, Betty Jo Pool, Norma Lee Pool, Louise Barton, Viola McKnight, Frankie Barton, Mary Charles Barton.—Reporter.

Familiar Face

JANICE couldn't for the life of her associate a name with the young man's familiar face. It was annoying.

He had come in alone and looked around with a dubious expression at the crowded booth. Presently his glances fell on her, sitting alone, and on the empty chair on the opposite side of the table.

"Hello," said Janice, and cast about desperately for a name to fit his face. Names had always bothered her. Faces—she never had trouble remembering faces.

He gestured carelessly. "Six—seven months, this last trip. Tell me about yourself. How long are you staying? Like it here?"

"How have you been in Hollywood?" he asked. "Two weeks," said Janice. "And you?"

"This seemed to bring him back to earth. 'Eh, eh, fine! So splendid!' A waiter brought Janice her dessert and her companion his soup. He chuckled. 'Movie stars, eh?'

"But where?" Janice asked and immediately became absorbed once more trying to piece together the fragments of memory that would complete the picture on the terrace.

"Here, there, everywhere," the young man said. "In restaurants, on the street, night clubs—"

"I was introduced to him," Janice was saying to herself. "I did hear his name. It was at a dance. We went out onto the terrace together, and he kissed me. His name was—"

"He said something that night," Janice was thinking. "We were hardly speaking when he left, though he called several times after that. If I could only remember what it was he said—"

Behind her in the booth, Derek Jordan blushed to the roots of his hair. He had an uncomfortable feeling that many had heard the girl's final remarks and knew she was calling him a conceited imbecile and he didn't like it.

FARM TOPICS

URGES FIRST AID FOR FARM MISHAPS

Specialist in Health Cites the Equipment Necessary.

With the peak of farm accidents soon to be here in the rush season and the busy summer months, this is a good time for farm folks to check up on first aid treatment.

A barefooted child steps on a rusty nail, broken glass or other sharp object. A child contacts poison ivy or poison oak.

A child is bitten by firecrackers, an injury which may result in tetanus unless taken care of promptly.

A child is bitten by a rabid dog. A child has gone swimming too soon after eating and therefore is attacked by cramps or acute indigestion.

A good first aid kit which can be managed in any home will contain a good book on first aid to the injured; a small drinking glass; two gauze bandages which are 2 inches by 10 yards; two gauze bandages, 1 inch by 10 yards; one all-cotton elastic bandage, 2 inches by standard; one package of sterilized gauze of five yards; one triangular bandage; six sterilized gauze pads; one tourniquet made of a handkerchief or band; one pair of safety pins; small scissors; tongue depressors; bar of soap, ammonia; camphor, iodine, and mercurochrome.

Proso Is Recommended as a Feed for Poultry

Plan for a patch of proso this year for the poultry. Proso is also known as hog millet, broom corn millet and Russian wheat. It is an enormous yielder and matures a crop in a very short time.

Proso makes extra fine poultry feed, fully the equal of wheat. It is also an excellent hog feed. It may be fed either as clean grain or in bundle form, as the kernels are readily scratched out of the heads.

Vaccination for Mastitis

We have not found vaccination for mastitis to be satisfactory. There seems to be no satisfactory treatment for this disease because numerous kinds of viruses, vaccines and other treatments have been relatively inefficient. The acute attack of mastitis probably is best treated with hot applications, or, if necessary, a suspensory bandage. Most essential, however, is the prevention of the disease. It is contagious, and infected animals are dangerous to the rest of the herd.

Farm Notes

A farm of 97,000 acres is advertised for sale at Johannesburg, South Africa.

Veal calves should be at least four weeks old before they are slaughtered.

Depth for planting sweet corn varies with the soil and season according to the College of Agriculture, University of Illinois.

Rye, oats, millet, buckwheat, and soy beans are common annual cover crops used in the orchard.

The color of egg shells depends on the breed of the hen. It does not indicate differences in the food content.

OIL NOTES

Little definite information is available regarding oil developments in Bailey county. While leasing of land for oil speculation has slowed down during the past two weeks, yet there are said to be indications of a resumption in the near future.

Drillers for the Enochs test well in southern part of this county have installed the new test well for the past two weeks; but have not started drilling yet, reason unknown.

It is reported that contractors who said the McColvey interests \$25,000 for drilling contract, have asked a 30 day continuance for spudding in. This report has not been confirmed.

A bid for the oil test large leases is said to be formulating in the county, but no definite information is given out for publication. The seismograph crew is still working in this county.

The E. L. Wilson et al drilling south of Buia in Bailey county, is reported ready for drilling again. Some four weeks ago casing was run at 4,497 feet and standard machinery substituted for rotary type. Much interest is manifested in this well, as it had a showing of oil at 4,440 feet.

In Cochran County the Inglewight Houston No. 1 well on the Dugan No. 1 Cochran County discovery are drilling at better than 4,200 feet in red-rock and anhydrite. This well is expected to standardize within a very few days, as they are nearing the depth at which the dugan was standardized.

An unconfirmed report is that as soon as this well is completed to a standardizing depth, another location on the same tract is to be started. It is in labor No. 14, lease 55, Oldham County school land.

11,659 Acres Land And 13 Lots Change Hands In County Last June

There were 11,659 acres of land in Bailey county that changed hands during the month of June. Besides leases of various kinds, according to records at the county clerk's office there were also transfers of 13 town lots in Muleshoe last month, recorded transfers being as follows:

June 1—Moltey county to George Gray, labor 6, lease 178 Motley county school land.

June 2—Fairview Land & Cattle Co. to Jess Mitchell, 39.4 acres E. W. cor of SW 1/4, sec. 22, blk. Y. E. M. Barker to Mrs. Lonnie Barker, lots 18, 19, 21, 22, blk. 5, Muleshoe. John B. Daniel to Temple Trust Co., SW 1/4, sec. 28, blk. B.

June 4—Roy Shaw et ux to Noble R. Shaw, N 1/2 & SW 1/4 sec 51, blk B. E. R. Hart et ux to M. Courtney, N 1/2 sec 33, blk. B.

June 7—Chas. Malone et al to Ewing Halseil, labor 2, lease 189, Ector county school land.

June 8—Ewing Halseil et ux to Eva Halseil McCluskey et al, 5 interest in labors 1 to 5, lease 188; all of lease 189 except labors 5, 19 & 21; all of lease 190 and labors 1 to 5, lease 191. A. W. Copley to J. J. Williams, lots 1 & 2, blk 9, Warren addition, Muleshoe.

June 11—Temple Trust Co. to Lowell Short et al, NW 1/4, sec 21, blk B.
