Soaking Rains Helpful To Area Farmers

SUNFLOWERS IN FULL BLOOM . . . Looking like a garden clubber's dream, this field of Sunflowers planted by Jay Feagley in the West Camp area is in full bloom. Feagley has planted other fields in sunflowers in the Maple area. He planted his crop from April 20-24 and found the first blooms on June 24.

Feagley anticipates he will start harvesting the crop around the middle of August. "This field is actually in about 70 per cent bloom," Feagley stated. The heads will vary in size with some growing to the size of a basketball.

Brings Farming To A Pleasant Standstill

Three days of soaking rains, no washing, wind nor hail has brought a happy smile to the faces of area farmers, especially the dry land farmers who feel the rains have "made their crops."

Farmers need a break once in a while, just like everyone else. Now the dry land farmers can sit back and relax and the irrigated farmers can put off their watering for a little while.

Last year, on July 25, 1974, Muleshoe had received 3.07 inches of precipitation compared to the 12.55 inches received by July 24, 1975. Making a total of 9.48 inches more this year than last.

Spencer Tanksley, county agent, said, "it's wet and has stopped farming activities, it's too wet to plow and has stopped irrigation"

Tanksley pointed out that the rains have been beneficial

to everyone except the cotton crops. Cotton needs real hot weather. He also said that there was some hay down in the county that got wet, lowering its quality.

Further stated by the county agent was the fact that the rain has helped the corn and grain sorghum. He said he didn't know of any damage reported from the rain. It has been cool, wet, and a lot of moisture which has farming at a standstill at this time.

A Mr. Ragsdale of Stegall says he received about two and a half inches and that the rain has been pretty general at the south end of Bailey County. His rain gauge recorded rainfall since Sunday. He also reports his milo was doing real well as was the cotton. He pointed out that everyone was real glad to receive the rain. "If we can get in and plow now, lay by awhile and get another good rain in Au-

gust, we've got it made," Ragsdale stated.

Alton Morris, 11 miles west and seven and a half mile east of Muleshoe says his place received 1.40 inches over the three-day period.

Dale Vise, five miles west of Clay's Corner and one mile north, received considerably more, recording four inches. He said his farm received .3 of an inch on Tuesday.

J. T. Atkinson, 18 miles west of Muleshoe, reports they had rain on Sunday and Monday, receiving 1.50 inches.

Jimmy Weaver reports .7 of an inch Monday at his place, four miles west of Lazbuddie.

Bill Jones says water has been standing since Sunday, on his farm and they received two inches by around 11 a.m. Tuesday. His farm is located 15 miles west of Muleshoe.

Castor Feedlots at Texico reported three inches on Monday and Tuesday night, seven miles east of Lazbuddie.

Larry Simmacher, four miles north and three west of Needmore, reported a half an inch, while Vince Simmacher received only .8 of an inch on Monday. His place is located seven miles

City Million Gallon Water Tank Collapses

The city of Muleshoe experienced a major catastrophe over the weekend when their million gallon concrete water reservoir collapsed, breaking out a piece of concrete about 20 feet long and up to four feet in width out of the floor of the tank. The water washed out a gully 30 feet across the top and about 15 feet deep.

Besides the damage to the tank itself, the water rushing out of the tank damaged lines from the four water wells which feed the tank.

City Manager Dave Marr said the city is in the process of lying lines to connect the water wells directly into the water distribution system, though they will only be hooking three of the four wells into the water system.

"Assuming the demand for water does not increase substantially over our June and July demand, the city ought to have plenty of water," said Marr.

"We are in the process

of getting estimates for repair of the tank, and hopefully will begin work the later part of this week," the city manager stated.

Marr pointed out that the tank, which was built in 1970, has been a continuing problem to the city. When repairs are made, they will be building a drain in the bottom of the tank, so the tank can be cleaned annually. There has been no way to clean the sand out of the bottom of the tank previously.

During the last city commission meeting, discussion was held concerning installing a rubber lining to prevent just such a disaster as this occurring. Ironic though it may seem, the collapse occurred just one week after the discussion was held with the commissioners.

The letter received from the engineers to the city dads stated:

"We have reviewed the construction plans and have in-

pected the site of the one million gallon concrete ground reservoir south of the city.

"There were two streams of water flowing from beneath the reservoir. This is a dangerous situation since the

Sunflower Outlook Good

Bailey County Farmer Jay Feagley Pleased

Mr. and Mrs. Dale Griswald and sons, Steven and Chad returned home Friday from Galveston, where Chad had been back to the Shrine Burn Hospital for a checkup.

The doctors were pleased with his progress. Chad no longer has to be wrapped in the bandages and no longer has to wear the special shoe. If everything goes well, the doctors want them to return in two years for another check-up.

Cont. on Col. 3, Page 2.

The West Texas Sunflower Task Force, meeting in Lubbock last week, had some good news regarding the region's sunflower crop. About 50 growers, scientists and allied industry representatives met at the Lubbock Country Club to review the 1975 crop's progress and to tour area farms and research plots for a first-hand look.

The two-year-old task force is one of four in Texas, though groups in other sunflower producing areas of the nation have also been organized to encourage farmers to plant a sufficient number of acres necessary to collect reliable research data.

It is estimated by officials,

that around 1 million acres of sunflowers have been planted in the United States this year, compared with 455,000 of the oilseed varieties in 1974. Planted acreage on the High and Rolling Plains has been estimated at 300,000.

John Herzer, general manager of the Plains Cooperative Oil Mill, Lubbock, and Sunflower Task Force co-chairman, said that prices on the world market for sunflower seed have moved up in recent weeks, mainly because of floods in the northern growing areas of the United States and drought conditions in the Soviet Union.

He pointed out that floods have damaged or destroyed about 30 per cent of the planted acreage in the North and South Dakota and Minnesota region. Approximately 700,000 acres of the U. S. crop was planted in that area this year.

Herzer said reports from the Soviet Union indicate 20-25 per cent of that country's 12 million acre sunflower crop has been lost as a result of the same drought that has affected its 1975 wheat and feed grain output.

Oilseed prices have jumped \$60 per metric ton - basis f.o.b. Gulf ports - in the past month, Herzer said. Prices late this week were quoted at \$292 per metric ton, up from a low of \$232 in mid-June.

Dr. George Teates, entomologist with the Texas Agricultural Experiment Station at Lubbock, said though infestation of sunflower moths and carrot beetles has been heavy, damage has been relatively light.

Cont. on Page 3, Col. 1

Texas Farm Safety Week Proclaimed

AUSTIN-Texas Farm and Ranch Safety Week has been set by Governor Dolph Briscoe beginning July 25, 1975. The week-long emphasis will highlight farm and ranch acci-

prevention, through programs conducted by the Texas Safety Association, Texas Farm Bureau, State Agricultural Extension Service, Future Farmers and Future Homemakers, and

the Young Farmers of Texas. Records show that 285 Texas farm and ranch residents died in 1974, an increase over the 214 fatal accidents which oc-

curred in 1973. Accidents involving traffic, tractors and drownings were the leading causes of fatalities in 1974.

"Farmers and ranchers have become increasingly concerned with the various agricultural safety regulations issued by the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA)," according to Joe L. Smetana, Texas Safety Association Vice President for Farm and Ranch Safety.

"Of particular concern due to recent regulations are the certification or licensing of farmers and ranchers to use restricted pesticides, and the roll over protective structures for farm tractors," explained Smetana, who is Safety Director for the Texas Farm Bureau.

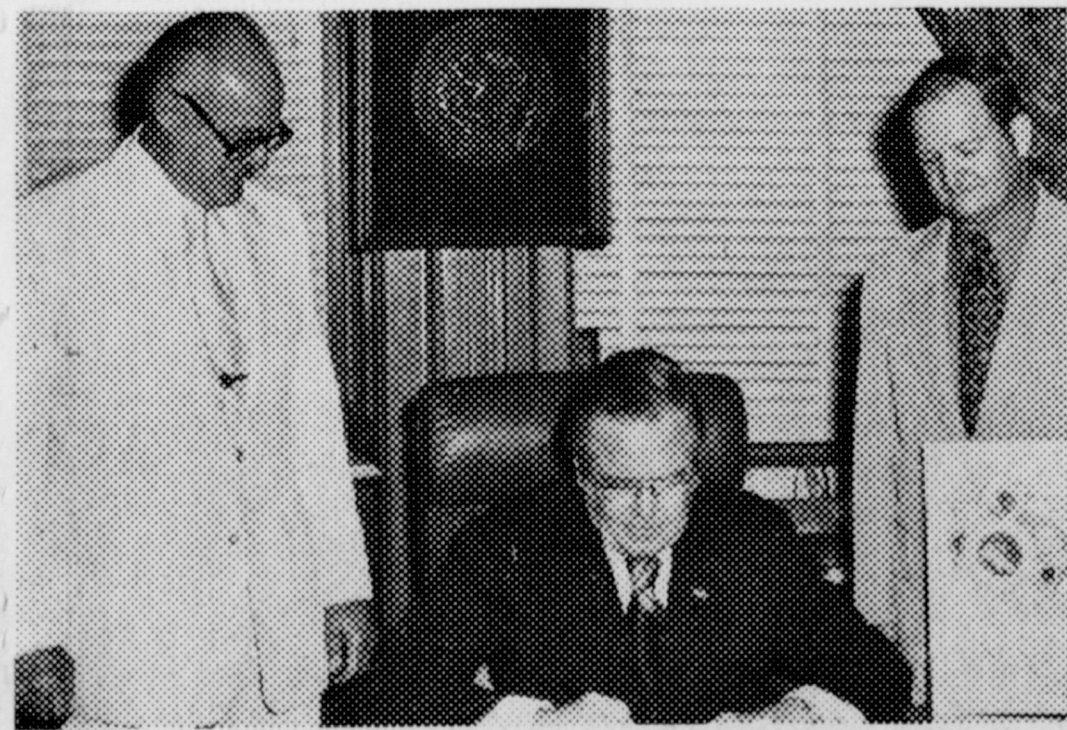

In his proclamation of the Texas Farm and Ranch Safety Week, Gov. Briscoe urged "all who live and work on Texas farms and ranches to put safety first, to plan for accident prevention and to work diligently to remove hazards in agricultural environments."

The Texas week coincides with National Farm Safety Week, as declared by President Ford.

Criminal Cases, Civil Cases Set For Jury Trial

Several criminal cases have been set for jury trial, Monday, August 11, beginning at 10 a.m.

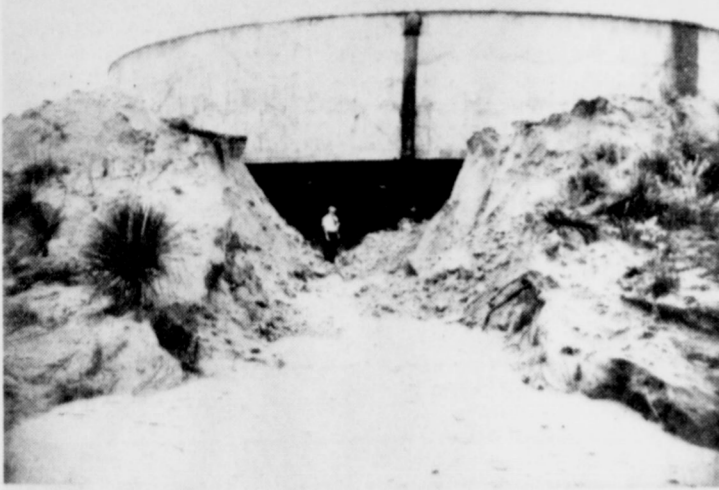

Arraignment of all defendants not previously arraigned, who have not waived arraignment, was set for Wednesday, July 23, at 10 a.m. At this time pre-trial was available for any defendants desiring to present pre-trial or preliminary matters of any kind. Final pre-trial will be available also on Monday, August 11, immediately following the call of the cases for trial, at which time all parties having motions or preliminary proceedings of any kind may present the same. Defendants waiving jury trial will be tried on Monday, August 11, following the pre-trials. The Cont. on Page 3, col. 6

PROCLAIMS SAFETY WEEK. . . Governor Dolph Briscoe is observed by Texas Safety Association President Hugh Scott (left) and Vice President for Farm and Ranch Safety Joe Smetana (right) as he signs the proclamation designating July 25-31 as Texas Farm and Ranch Safety Week.

BIRDIE B. WARREN WAS LUCKY . . . If one could call being in the hospital a lucky thing, then Birdie B. Warren, 72, was a very lucky person, as she was in the West Plains Hospital in Muleshoe around 3:35 a.m. Sunday. It was at that time that her country home was wrecked by a butane explosion, leveling the house. Mrs. Warren had been in the hospital about a week when the explosion occurred. James Warren, her son, went out to his mother's home, located 15 and a half miles southwest of Muleshoe to do some work there about 4 p.m. Sunday and discovered the wreckage of his mother's home. Mrs. Warren lives alone in the house that stood since 1926-27. James said the house had been added-on to and remodeled twice since she first moved in. One unusual sight James found when he went into the house was the fact that a case of eggs located in the bedroom were shattered, but he found two eggs that had been blown into the living room, lying one the floor, and they weren't even cracked. The home is a total loss.

WATER TANK COLLAPSES . . . The southeast side (top) of the one million gallon round storage reservoir collapsed over the weekend, breaking out a piece of concrete 20 feet long and up to four feet in width out of the tank floor. It washed out a gully 30 feet across the top, about 15 feet deep. (Middle) A feeder line, one of the four water wells that feed the tank, was also broken apart. (Bottom) The lower picture is of concrete section of a line of AC pipe that feeds the tank, as it was damaged by the million gallons of water that rushed out when the floor gave away.

Muleshoe LL Defeats Leveland

The Muleshoe Little League All Stars are champions of District 26, after defeating Leveland last (Tuesday) night at Leveland. The official score of the game was Muleshoe 6 - Leveland 3.

Muleshoe will now advance to Bi-District level of competition. The next game will be on Monday or Tuesday of next week at Borger or Pampa. Further details will be announced later.

Andy Rogers pitched brilliantly for Muleshoe, allowing only three hits. He also turned in the defensive play of the game, spearing a hard liner from a Leveland batter and turning it into a double play.

Muleshoe scored its six runs on only two base hits, including a two-run double by Ramon Guillen. Muleshoe took advantage of several errors by Leveland fielders and walks from Leveland pitchers, while playing excellent defense and keeping enemy runners off the bases for the most part.

Two of Leveland's runs came on bases-empty homers. The game was delayed for approximately 40 minutes due to a sudden rain which made additional groundskeeping necessary, and was finally stopped at the end of five and one-

half innings, due to another downpour of rain. Muleshoe scored three more runs in the top half of the sixth to take a 9-3 lead, but since the home team was not able to bat in the bottom of the sixth, the score reverted to the end of the fifth inning, and will go into the record books as a 6-3 win for Muleshoe.

Other members of the team not previously mentioned are Russell Windham, Dennis Johns, Ruben Reyna, David Lust, Philip Jesko, Todd Gregory, Raymond Brantley and William Orozco. Team manager is Scotty Windham and coach is Raymond Cabrera, Sr.

Police Report

The arrests logged in the Bailey County Law Enforcement Center this week included

11 arrested for being drunk by the Muleshoe City Police Department, one alien, one disturbance and one for having no drivers license.

The Bailey County Sheriff's Office set bond for one person charged with murder.

Around...

Everyone is welcome to attend the Dickens Reunion to be held July 26-27. There will be a fiddle contest beginning at 1 p.m. on the 26th; a dance beginning at 9 p.m. on the 26th and a barbeque slated for 1 p.m. July 27.

The Amarillo College has just the thing for adults who have been wanting to learn the

fundamentals of tennis, one of the fastest growing sports in the nation, said Charles Gaitner, supervisor of AC Community Service programs.

Three weeks of basic tennis instruction will be given at the Polk Street campus on Monday and Wednesday evenings from 7-9 beginning July 28. Students are asked to bring their own rackets. Balls will be provided for the class, which will be instructed by Dr. Christian Sparks, associate professor of physical education. Cost for class is \$15.

Persons may enroll at the registrar's office in either the Washington Street or West campus Administration Buildings.

The 12 Annual Miss Muleshoe Pageant will be held Saturday, August 16 at the Muleshoe High School Auditorium. Any girl between the ages of 16-21 who lives within the Muleshoe, Lazbuddie, Three-Way area, is eligible to enter the contest.

The contest is being sponsored by the local Jaycees. To enter the contest, you must

contact Mike Armstrong, pageant chairman at 272-4645 or Leon Logsdon, 272-3304, Hugh Young, 272-4738, or any member of the Muleshoe Jaycees.

Entries for the Little Miss Muleshoe Contest, girls between the ages 5-6, are now being accepted. To enter, the contestant must live in Bailey County or the Lazbuddie School District.

The contest will be held August 16 at the Muleshoe High School Auditorium beginning at 8 p.m.

For further information, contact Mrs. Billie Duncan, 807 W. Ave. J or phone 272-3649. Entry fee is \$3. August 8 is the deadline for all entries.

Sunday night at 10:45 a car belonging to Haney Poyner was stolen from the Statter Hilton parking lot in Dallas Texas. The keys had been left in the car.

An attendant in the parking lot noticed the car going out of the parking lot down a one way street. The car was traveling in the wrong direction

so the attendant took down the license number.

Police said not to expect anything because a gang probably took the car and stripped it down. Statter Hilton insurance will pay for the cost of the car.

Most men think well of themselves.

Automobile accidents continue to kill people but not the same ones.

Cont. from Page 1
 "Because of the heavy moth pressure and the schedule of insecticide applications, it would be impossible to keep fields entirely clean," he said. "However, the applications have been considered successful."

Teetes said carrot beetle populations during the past few weeks have been down, but expects that growers may see another peak in beetle numbers in August.

"Based on a 23-county survey earlier this month, we saw no significant damage from the carrot beetle," he said.

A research associate at the High Plains Research Foundation at Halfway estimates the number of federally approved herbicides should be larger for 1976.

"Currently we are screening a number of compounds now used in cotton," said Jim Schrib. "There should be at least three preplant incorporated herbicides available next year. Last year there were only two."

The scientist said most compounds are being tolerated well by the sunflowers, even up to twice the active ingredient normally used.

Spencer Tanksley, Bailey County Agent, said in 1974, approximately 10,000 acres of commercial oil seed sunflowers were grown in Texas. He estimates the acreage is likely to be as high as 400,000 acres in 1975, on the High Plains.

He listed several reasons for this increase in seed sunflower acreage. One is that new sunflower hybrids have low water and plant nutrient requirements with higher yield potentials; demands for vegetable oil has remained good and excellent market potential was established early in the growing season.

"With any new crop, there is always an array of production hurdles which have to be mastered to obtain maximum profits," he said. "This is especially true in the case of sunflowers. Local producers will plant between 10,000 and 12,000 acres of sunflowers in Bailey County and one of the production hurdles they must overcome is insects. Others include the curing out for harvesting, the possibility of losing some plants to wind damage in the early stages, and the type of market that will be available each year."

John Fuston with the Bailey County ASC office in Muleshoe comments that the sunflowers are a good crop for sandy and

dry lands. He pointed out that most growers seem to be happy with the rapid growth and the adaptability the plants have shown. He said he has not heard of any problems the producers are having at this time. Fuston stated that the sunflowers seem to have a rapid growth to spread for rapid ground cover to take care of blowing problems.

Bailey County farmer Jay Feagley, who planted his sunflowers from April 20-24, said some farmers are still planting sunflowers. He pointed out that sunflowers can be planted as late as August. Some farmers who lost their cotton crop to hail are now planting sunflowers, and he believes the acreage will exceed the amount quoted by Tanksley.

Speaking of his sunflower crop, Feagley said it is the easiest crop he has ever raised. "I planted and plowed one time and the crop planted on irrigated land has not been watered yet. We have had some timely rains. Sunflowers require less water than cotton."

Feagley has 300 acres of irrigated and dry land, planted in sunflowers. He commented on the rapid growth and said the plants grew three inches a day from the time they were 12 inches high, to the budding stage.

"I sprayed twice and plan to spray one more time for head moths and thus far have found no damage from carrot beetles," Feagley said. "I hope this will become a major crop for this area," said Feagley, "because of the small amount of water they require. The sunflower crops will help the irrigated farmer, because he can cut back on water for his irrigated crops and it will help the dry land farmer because of the low amount of moisture sunflowers require."

Feagley has contracted his sunflower crop to Plains Cooperative Oil Mill, at 15 cents per pound.

Tanksley stated that the yield for sunflowers should be between 800 and 1200 pounds per acre for dryland and between 1500 and 3000 pounds per acre on irrigated land. The approximate contract price for sunflowers this year is about 15 cents per pound. Sunflowers will be harvested and taken to local coops. Later they will be moved to other areas for processing.

Forty-seven different insects visiting sunflowers have been observed by research conducted at the Lubbock Experiment Station by Dr. Teetes and his

associates. Fourteen of these pests are considered potential problem pests because of their density and the nature of the injury they inflict.

Studies conducted to date, indicate the sunflower moth and the carrot beetle should be considered key pests. In addition, a number of stem girdlers, stalk borers and leaf feeders are also considered capable of reducing yields.

Researchers are currently in the process of developing a working knowledge of these insects. This is extremely important for growers who will be planting sunflowers for the first time to become familiar with what is known about the two major pests of the crop.

The larva of the sunflower moth is the most common pest of sunflower throughout Texas. The larva injures sunflowers by tunneling into the developing seeds and fleshy receptacle area of the sunflower head. The adult moth is a light brown to buff color and easily detected when resting or depositing eggs on the yellow flowers.

The young larva is a worm approximately 1/8 inch long and yellowish-green with alternate dark and light brown longitudinal stripes on its back.

The sunflower moth overwinters as larvae in the soil. Adults emerge, mate and females initiate the first generation by depositing eggs in wild flowers.

In 48 to 72 hours these eggs hatch and the larvae feed for approximately 21 days. Mature larvae transform into pupae which spend another nine days in this resting stage before emerging as adults.

Hybrid sunflowers bloom in 12 to 15 days at which time they are most susceptible to attack and damage by the insect. Eggs are deposited within the individual flower tubes. Young larva hatching from these eggs begin feeding immediately and remain on the surface of the flower for a couple of days. They spin silken webs as they feed, forming a mat of grass, silk and dried blooms on the face of the head. As the larvae develop they begin tunneling into the developing seeds and fleshy receptacle of the head.

Several chemicals have been developed and found effective in controlling this pest. Timing and intervals of applications which result in optimum protection during the bloom period has also been determined.

However, a producer should check 25 plants at several locations in the field before they apply an application, and then

only apply it if moths and young larvae are present. These insecticides are cleared for no more than three applications per season.

Growers should exercise caution in applying insecticides to grain sorghum fields because of the drift problems. Metyte Parthion is known to cause foliage injury (burn) to certain sorghum varieties.

Chester Mitchell of Lockney, member of the Board of Directors of the High Plains Underground Water Conservation District No. 1, said, according to area researchers, sunflowers have considerable potential in the area as an oil seed crop. The oilseed sunflowers grown in the High Plains are composed of 48 per cent oil, which is sold for the production of margarines and cooking oils. When crushed, the sunflower seed is also a source of protein for livestock feed.

Sunflower Production of the High and Rolling Plains of Texas, a publication of Texas A&M University, says that under normal conditions, 120 days from the date of planting are required to achieve maturity for harvest. They can be planted when soil temperatures reach a ten-day average of 50 degrees or more. Sunflowers are expected to flower in 75-80 days.

Due to its quick maturity, the sunflower serves well in a double crop system, and is recommended as an emergency cash crop when other crops are lost to hail or drought late in the season.

Another attribute of the quickly growing flower, adaptable to any area where cotton, grain sorghum, corn and soybeans can be grown, is that it demands only about half as much water as feed grains and about the same as cotton.

If planted early in the season (last week of March or the first of April) and receiving normal spring rainfall, a farmer can possibly expect to produce good yields with just one supplemental irrigation. Statistics reveal that a preplant irrigation, plus one or two summer irrigations during the critical growth stages, normally increases yields two to three times over those obtained under dryland production.

We can't answer all the problems that beset farmers, but we can say that those who raise their own foodstuffs will never go hungry.

Soaking...

All farmers reporting rain are pleased and say the moisture has been very beneficial to their crops.

City...

Cont. from Page 1
 underflow may undermine the foundation of the tank causing floor or wall failure.

The tank needs to be drained, cleaned, and inspected as soon as the summer peak is over.

While final judgement should be reserved until the tank can be inspected from the inside, it is our opinion that a butyl lining reinforced with nylon should be installed. This lining should cover the floor and the sidewalls with boots installed around each interior column, inlet and outlet.

Based on the city cleaning the sand from the structure, the estimated cost for lining is as follows:

"(1) Material, 1/16 inch butyl with nylon, complete with boots at \$14,000.

"(2) Labor for installation, adhesives, misc. at \$6,000. Total estimated construction cost would have been \$20,000.

The letter went on to say - "This would render a final solution to the leakage problem.

"If funds are not available to make a permanent repair then temporary repairs would be in order. The seams and cracks could be filled and grouted to reduce leakage; expansion and contraction of the str-

ucture as well as uneven settling of the floor due to the weight of the water will possibly cause leakage." (See pictures on Page 2.)

Criminal...

 jury panel will report on Tuesday, August 12 at 9:30 a.m.

Bailey County criminal jury settings for Monday, August 11, beginning at 10 a.m., are:

Abelardo Contreras Davila, burglary; Tyrone Blackman, burglary; Jerry Craver, burglary; Bobby Hayes, arson; J. B. Christenson, theft; James Ray Clayton, possession of Marijuana; D. H. Scott, theft; Theodore O. Washburn, burglary; David Martinez, burglary; Carol Routon and George Edward (Joe) Clark, burglary; Robert Finch, Jr., aggravated assault; Bernardo Rodriguez Olivas, aggravated assault; Jose Manuel Gonzalez, burglary; James A. Wooster, forgery; Buddy A. Quirk, theft; John C. Casady, murder; Ira Chester, Dwayne Willard and Donald Williams, burglary.

A number of civil cases will be heard before a jury on September 15, beginning at 10 a.m. and will be called in the following order:

Ruby Willman vs. Sam Fox, On-premises fall; personal injuries; H. M. Gable, vs. Bill Maddox and Donnie McCall, power line collision, fire loss; Tomas Rey vs. Matt Nix, Jr., car-calf collision, property damage, personal injuries; Leandro Saucedo, Texas Employers Insurance Assn. vs. The Atchison, Topeka and Santa Fe Railway Co., vs. Texas Seams Division Paris Milling Co., Inc., Boxcar collision, per-

sonal injuries; Ropue Puente vs. Robbie Gross, collision, property damage, personal injuries; Jenaro T. Heredia vs. Texas Employers Insurance Association, workmen's compensation; T. G. Howard vs. Hartford Accident and Indemnity Co., Workmen's Compensation.

County...

Cont. from page 1
 construction as soon as is possible.

The purpose of the meeting was to discuss with the Highway Department officials, what the Commissioner's Court was going to recommend and try to designate as road construction for 1975. George C. Wall, district highway engineer and C. W. Nall of the Highway Department were in Muleshoe to attend the Commissioner's Court meeting.

The district highway office will make their recommendation to the state Highway Commission and if they agree, they will recommend the construction to the Federal Highway Commission and if they approve, the road will be built," said County Judge Glen Williams.

The County Commissioners made application for several road projects to the highway officials, which were: beginning at the intersection, one mile west of the town of Buia and leading north on section line, through the town of Circleback and continuing north to intersect Farm Road 746, a distance of approximately 12 and a half miles.

The commissioners also included a request to take over for maintenance, the county

constructed Farm 70 Market Road that begins at the intersection one and a half miles north of Maple and leading north to a distance of about nine miles in length.

Also included was the road construction mentioned above that the commissioners and highway officials agreed to.

The commissioners proposal also included two miles, leading south from Farm Road 3125 where it turns south at the West Camp Gin and leads south two miles to connect with Farm Road 1760.

The hostess gift was stainless steel cookware.

The hostesses were Mrs.

Nation's balance of payments improves strongly.

Donald Prather, Mrs. Eldon Davis, Mrs. Jimmie Crawford, Mrs. Kenneth Precure, Mrs.

Consumer Food News

Texas grocery shoppers must "go bananas" to find any real excitement in food buying these days.

"Bananas are always in season -- and cost about the same as they did 20 years ago," Mrs. Gwendolyn Clyatt, a consumer marketing information specialist, said this week. "If you consider the increase in wages during the last two decades, this means bananas really cost less than half as much today in terms of real income," she continued.

Mrs. Clyatt, with the Texas Agricultural Extension Service, the Texas A&M University Sy-

stem, said bananas must be picked when green, because, if allowed to ripen on the plant, they split open and are tasteless.

Prince Faisal beheaded for shooting King Faisal.

"Smaller families may find it more convenient to buy bananas a bit on the green side and let them ripen gradually.

"Select those that are plump, unblemished and bright in appearance, as a dull-looking banana often won't ripen properly."

Other fruit choices this week include peaches, nectarines and plums. Also, cantaloupe, honeydew melons, watermelons, cherries, grapes and pineapples.

Fresh vegetables at the most reasonable prices are carrots, cabbage, soft shell squash, corn, purplehull peas, cushaw, cucumbers and okra.

Fluid milk and dairy products are in adequate supply, with nonfat dry milk in heavy supply due to reduced cheese production.

"Eggs continue to be reasonable, even with prices up a bit which is a seasonal trend." CONSUMER WATCHWORDS: Check ads for specials on beef-including roasts, liver and variety meats.

Trying. Anyway

"Hey, you can't turn around in the middle of the block."

"Oh, I think I can, officer; just give me time."

Jaycee-Ettes Attend Annual Salad Supper

The Muleshoe Jaycee-Ettes attended the 12th annual Salad Supper sponsored by the Perryton Jaycee-Ettes, Friday, July 18th in Perryton. Salads of all types were served and afterwards a Perryton city councilwoman gave a brief talk on the woman's role in government. Those winning door prizes from Muleshoe were Mrs. Butch Duncan, Mrs. Bill Dale, Mrs. Charles Moraw and Mrs. Larry Goree.

Clubs attending the supper were Plainview, Amarillo, Muleshoe, Pampa and Perryton. Special guests at the meal were several past state officers of Jaycee-Ettes.

Those attending from Muleshoe were: Mrs. Charles Moraw, Mrs. Larry Goree, Mrs. Butch Duncan, Mrs. Mike Armstrong and Mrs. Bill Dale.

Nothing Cheap

Piano Salesman: "A piano, sir? I suppose you will be wanting a grand piano?"

Mr. Newrich: "Grand young man, I want a magnificent one!"

BIBLE VERSE

"A good name is rather to be chosen than great riches, and loving favor rather than silver or gold."

1. Where is this verse found in the Bible?
2. Who is the author?
3. Who was his mother?
4. In what language was it written?

Answers To Bible Verse

1. Proverbs 22:1.
2. Solomon.
3. Bathsheba.
4. Hebrew.

Adams, Mrs. Carl Bamert, Mrs. John Gunter, Mrs. Kerry Moore, Mrs. Ernest Kerr, Mrs. J. W. Witherspoon, Mrs. Horace Hutton, Mrs. Woodie Lambert, Mrs. J. C. Arnn, Mrs. Eugene Black, Mrs. Spencer Beavers, Mrs. Houston Hart, Mrs. Jack Wood and Mrs. Rufus Gilbreath.

RECIPE

By Sarah Anne Sheridan

Homemade ice cream is almost a forgotten treat. There's a certain nostalgia about homemade ice cream at family gatherings.

- 3/4 c sugar
- 2 T cornstarch
- 1 c milk
- 2 egg yolks
- 1/3 c coffee cream
- 2 egg whites
- 1 1/2 c whipping cream
- 2 t vanilla extract
- pinch of salt

Mix sugar and cornstarch. Add scalded milk gradually, stirring constantly. Cook in double boiler 25 minutes. Stir several times during cooking. Combine with well beaten egg yolks. Cook for 5 minutes, stirring constantly. Add salt and coffee cream. Mix well, strain and cool. When custard is cool, whip cream and fold into custard.

Pour into refrigerator trays and freeze. Before the ice cream has frozen solid enough to serve, remove the tray from refrigerator. Stir well with a spoon from front to back of tray. Then carefully fold in stiffly beaten egg whites. Freeze. If you like churned ice cream increase amount of custard needed and use your hand or electric churn. Freeze according to your churn's directions.

Amy Cornillion

Mr. and Mrs. Randy Cornillion of Borger are the proud parents of a new baby girl born July 21, 1975 at 5:15 p.m. in the Borger hospital. The baby weighed seven pounds and seven ounces and was named Amy Cornillion. She is the couple's first child.

The maternal grandparents are Mr. and Mrs. Bernis Camp of Muleshoe. The paternal grandparents are Mr. and Mrs. Ray Cornillion of Borger.

An attic fan (thermostatically controlled) to keep attic temperatures from rising above a set limit will take some of the load off your air conditioner.

Bailey County American Heart Association Meets

The Bailey County Unit of the American Heart Association had a noon meeting Thursday, July 17, at the Corral Restaurant.

The meeting was presided over by President, Dean Sprayberry. A report was given on the state meeting by Sandy Bass.

Joyce White, regional director from Lubbock, was present and made several suggestions that will be helpful in fund raising and Public Education.

Dr. Gary Albertson discussed plans for CPR Training Program to be held in Muleshoe in the near future. There are also plans being discussed for a Blood Pressure Clinic.

In 1974, Bailey County citizens raised \$5,675 for the Heart Association. The 1975 campaign goal has been set at \$6,000.

FARM SAFETY WEEK JULY 25-31

JOHN'S CUSTOM MILL

523 East American Blvd.

272-4373

From The Journal File

10 Years Ago

Glen Williams, Muleshoe's present county judge, first took office January 1, 1955. A farmer and rancher, he came here in 1929, and served for four years as a county commissioner and for six years was on the county school board.

Rest of the world increased production of cotton in the crop year ending this spring. The Texas crop of four million bales was down to about 8 percent, while U.S. production dropped to about 29 percent of world production.

Den Mothers in Pack 620 were asked to call their Den members and inform the Journal how many in their den are expecting to attend the outing. This information is needed for purpose of buying food.

Mrs. J. G. Arnn and Mrs. Pat Childers are visiting relatives in Childress this week.

District Attorney and Mrs. Jack Young will leave Sunday for the National Attorney's Convention in Houston, returning the following Sunday.

20 Years Ago

Mr. and Mrs. John Crim spent sometime in Dallas the past week. They returned home the first part of this week.

Luther Ham returned Thursday from a business trip to Brownwood.

A party honoring the Senior class was held in the home of Mrs. Joel Treider with Mrs. Bert Gordon as co-hostess. Games were played and refreshments of angel food cake and cold drinks were served to everyone present.

Mr. and Mrs. Charles Mayhugh were in Houston over the weekend.

Mrs. Lucille Cherry, proprietor of the Muleshoe Beauty Shop, attended a hair dressers convention in Oklahoma City last week, where she received instruction in the very latest hair styling.

30 Years Ago

Lt. J. G. CC Griffiths of the U.S. Navy has been here for a visit with his parents, Mr. and Mrs. Ray Griffith, Lt. Griffith left Thursday of this week for Rhode Island where he will take on more schooling. He has been in the South Pacific for 17 months.

Mr. and Mrs. Morris Douglas were in Amarillo on business.

R. L. Ritchie, who recently held a farm sale and retired from the farm, has accepted employment in the local office of the Soil Conservation Service.

More than sixty cars of new season wheat have been shipped out of Muleshoe according to local estimates. This was said to be about one third the normal shipments from Muleshoe. Dry weather in the spring cut down the wheat yield also.

Bailey County Commissioners Court was in session, Monday. Routine matters occupied attention of the court at the session.

40 Years Ago

Mr. and Mrs. Vance Wagon are the proud parents of a baby girl born Sunday and named Joe Adine.

Roland Matthesen purchased a new 1935 Master Deluxe Tudor Chevrolet sedan from the Valley Motor Co. in Muleshoe the later part of last week.

Mr. and Mrs. Scott Morris and children returned home the latter part of last week from Saint Jo where they spent several days on a fishing trip.

Members of the Intermediate Epworth League of the Methodist Church are planning to spend Friday and Saturday of this week at Ceta Canyons near the city of Canyon.

Members of the Progress home demonstration club will serve dinner Saturday noon of this week in the American Legion Hall in Muleshoe.

They invite Muleshoe people to come and eat good country cooking served family style in a country way.

50 Years Ago

Scott Morris and wife are the proud parents of a fine eight pound baby boy.

Chester Layne and wife were in Amarillo on business the first of the week.

Raymond Gaede is sporting a new Chevrolet coupe purchased from the Valley Motor Co., Inc. He left the Checker Service Station loaded up with Gulf gas, Mobil oil in the crank case and shod around with Good Year casings.

Ray Griffiths and family returned Sunday night from their vacation. They visited various places down in the state. Griffiths is manager of the Bailey County Elevator and is now back on the job. C. H. Long his assistant has had to "step" during the absence of his boss.

David Anderson came in last week from Waco, where he has been attending college.

Innocence Abroad
A bride went to the butcher shop to buy a ham. "Here are some fresh smoked ones," said the butcher.

"But haven't you any that have never been sick?" asked the bride.

Usually the victim of gossip has something others are jealous of.

MAKING PLASTIC FLOWERS . . . L. to R, Stacy Vandiver, Dana Smith, Cora Patterson, Rhonda Mills, Brenda Flowers, and Stacy Smith. Not pictured, Missy Baldwin.

YL 4-Her's Makes Flowers

The group began on Thursday shaping their floral wire into flower petals and leaves. Friday, they met and concluded the project, by dipping the shaped petals and leaves into the liquid plastic formula.

Members of the YL 4-H Club arts and crafts project met Thursday, July 17 in the home of Mrs. Tom Flowers. Those members attending were Stacy Vandiver, Dana Smith, Stacy Smith, Brenda Flowers, Rhonda Mills, Cora Patterson and Missy Baldwin.

Not Sure
The trouble with being a leader today is that you can't be sure whether people are following or chasing you.

-News, Savannah.

TODD GREGORY . . . Muleshoe Little League Allstars, batted in a run in the first inning to score, when the champs played the Plainview Americans Little League for District Championship, Friday, July 18, at Roger Miller Park in Muleshoe. The Muleshoe Allstars beat the Plainview team by a score of 12-4. They played the Levelland team at Levelland Tuesday night and if they win there, they will travel to Borger to play for the Regional Championship. Gregory plays centerfield.

TAKES OWN LIFE
SANTA MONICA, CALIF. --Dan Dailey III, who shot himself to death in front of a hospital recently, was the third offspring of a famous Hollywood parent to commit suicide within the past two months. James Arness' daughter took an overdose of sleeping pills, and Gregory Peck's son shot himself to death.

FARM SAFETY WEEK

JULY 25-31

A FARMER WEARS MANY HATS...

But The "Safety Director" Hat Is The Most Important. This Week, And Every Week, Be Safety Conscious We Don't Have A Single Customer To Spare!

Every year, thousands of lives are lost and thousands of persons are injured in accidents on the farm. These accidents cause suffering, disabilities and financial hardship to the families involved, as well as reducing the productive capacity of our farm industry. No farmer can afford not to practice farm safety!

Santa Fe **Wheat Report-1975**
New Harvest: During recent weeks the harvest of more than 680 million bushels has been underway in the five major wheat states served by Santa Fe. That's almost half of all the winter wheat grown in this country.
Car Supply: Santa Fe's part of the harvest job will be about 29,000 carloads. Our fleet of jumbo hoppers along with regular hoppers and box cars are now rolling throughout the harvest areas handling this big load.
Santa Fe Operations: The millions invested each year to improve Santa Fe's facilities, cars and locomotive fleet, makes it possible for us to get the job done in the most efficient way. We are ready to do even more than our share in wheat-growing states along the Santa Fe where problems may arise from inadequate transportation services.
Wheat train of new 100-ton jumbo hoppers
Under normal conditions the railroads plan their operations to move with the harvest as it advances across the wheat belt.
This year, old man weather has upset the timetable. Rain has delayed the new crop about two weeks, and the wheat became ripe and ready in all growing areas of the Midwest, at the same time!
Santa Fe has a long and proud record of moving wheat. We do our best to prepare for each year's harvest. For example, we have almost 13,000 jumbo hoppers in service, including 1,000 brand new ones just received from the builders. That's the largest fleet in the nation.
1975 will be a near-record wheat harvest year along the Santa Fe; and, although the weather has created problems, we are doing our best to move each bushel. We are about to complete the harvest movement, and we appreciate the cooperation of growers, shippers, elevator operators and government inspectors which has helped Santa Fe handle another big wheat job.
The Atchison, Topeka and Santa Fe Railway
A Santa Fe Industries Company
Rail cost is only a thin slice of the price you pay for bread. It averages about—
1/2¢ a loaf
Moving wheat for making bread is an example of how a modern railroad handles volumes of foodstuff at low costs.
This is one way Santa Fe works to hold down the price of food where it counts the most for family shoppers, at the checkout counter.

TOURISTS OF THE WEEK. . . Ron Sylvia, his wife Elaine and two sons, Jason and Brian, of Red Bluff, California, were stopped by Muleshoe Police Chief Buddie Black, last Friday, taken to the Mule National Monument for pictures, and presented certificates entitling them to special services while in the city. They received a fillup of gas from Redwine 66 Station, a nights lodging at the Valley Motel and their evening meal at the Corral Restaurant. Shown with the Sylvias (center) is (l-r) Sheryl Stovall, C of C Ambassadorette, Police Chief Buddie Black, Homer Redwine, chairman of the Tourist Committee, Tommy Black, Chamber manager and Perri Poyner, C of C Ambassadorette. Mrs. Sylvia said the family was enroute to Proctor, Tex, to visit her mother. They left California Thursday, about 1 p.m., and drove all night, so they were ready for a stop.

Screwworm Infestations On Increase

AUSTIN--Current moisture and temperature conditions throughout most of Texas are ideal for the spread of screwworms, a parasite which infests the wounds of livestock.

Agriculture Commissioner John C. White said that 1975 infestation reports to the U.S. Department of Agriculture (USDA) Screwworm Eradication Program in Mission had risen to 85 by April 21. Fifty-four of these came from 15 Texas counties during early April.

April cases have been recorded as far north as Val Verde, Kinney, Uvalde, Frio, Atascosa and DeWitt counties. According to a USDA representative in Mission, these infestations pose a direct threat to the Big Bend, Trans-Pecos, Hill Country and Coastal Bend regions.

Serious Crime Up 18 Percent

Serious crime in the United States rose 18 percent during the first three months of 1975 over the same period a year ago, Attorney General Edward H. Levi announced today. This compares with a 15 percent increase during the first three months of 1974 over a similar period in 1973.

Mr. Levi said the latest increase is consistent with preliminary figures for all of calendar 1974, which show that serious crime last year was up 17 percent over 1973.

"The statistics released today again point up the need to improve the Nation's criminal justice system," Mr. Levi said.

Today's figures were contained in the FBI's Uniform Crime Reports that were released by FBI Director Clarence M. Kelley. They are based on information furnished by the city, county and state law enforcement agencies throughout the Nation.

The violent crimes of murder, forcible rape, robbery, and aggravated assault, as a group, increased 18 percent. Robbery increased 28 percent, aggravated assault 10 percent,

murder 7 percent, and forcible rape 4 percent. Property crimes also were up 18 percent. Burglary rose 20 percent, larceny-theft 19 percent, and motor vehicle theft increased 6 percent, Mr. Levi said.

Law enforcement agencies in the rural areas reported a 21 percent rise in the volume of crime. Suburban areas reported an increase of 19 percent. Cities with 100,000 or more inhabitants reported a 17 percent increase.

Geographically, the Northeastern States reported a 21 percent increase in crime. Crime in the Southern States was up 20 percent, the North Central States 17 percent, and the Western States 13 percent.

Calling the latest figures "one of the terrifying facts of life, which we have come to accept as normal, and which we must not accept as normal," Mr. Levi said they again demonstrate the need for major new programs at all levels of government.

"Currently law enforcement is solving only about 1 of 5 known serious crimes," Mr. Levi said. "But of even greater concern is the down-

grading of charges from felonies to misdemeanors at the prosecution stage, regardless of the defendant's past criminal record."

Mr. Levi pointed out that about two-thirds of all persons arrested are repeaters, and therefore the identification of career criminals was particularly important.

President signs housing measure.

Grain-Finished Lamb Declining

AUSTIN--Sheep and lambs on feed in Texas as of Jan. 1 have declined 48 percent from the same date a year ago. Agriculture Commissioner John C. White has announced.

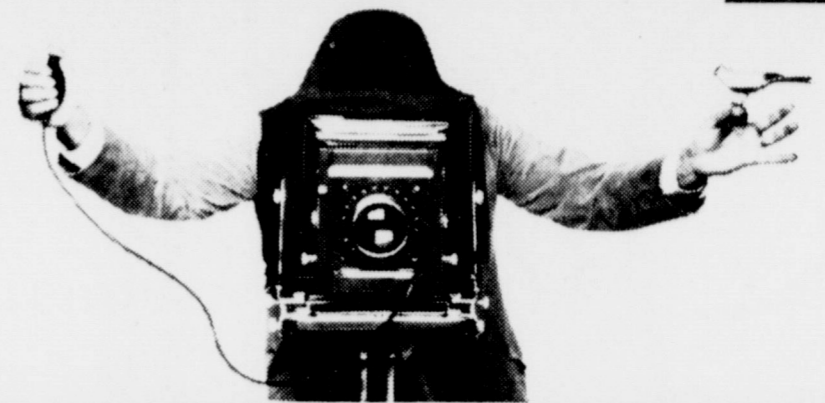

This compared with a 22 percent decrease nationwide. Only California, among the top seven producers, showed an increase.

"The same problems

confronting other livestock producers are hitting the sheep and lamb industry," White said. "High grain and marketing costs are making it unprofitable to finish animals on grain."

Texas is the nation's second-largest producer of sheep and lambs. In January 1974, the state had a record 390,000 animals on feed. The 1975 count was 204,000.

HOMETOWN USA

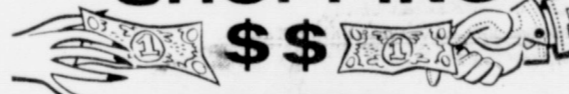

"It's your money and you can spend it anywhere you want to. But I always consider that there is a big difference - when I spend my shopping dollar at home.

I like to do business with people I know. And, I know my local merchants, and I also know he appreciates my patronage, so that is worth something to me.

The friendly service I get is a bonus, and I know my merchant appreciates my business, and I am not just a "sales slip" to him.

The fact that my shopping dollars stay at home and add to the betterment of the whole community is heart-warming to me. I like to shop in my own hometown."

LET YOUR SHOPPING

WORK FOR YOU

These local dollars make the rounds in form of payroll and city and county taxes that help provide all the good things we enjoy in HOMETOWN U. S. A.

ALMO ALL STARS AT STATE. Four Muleshoe boys, Gary White, Dusty Davis, Kyle Kimbrough and Mike Bland are on the team which is presently in Graham vying for the state championship. The team which is made up of teammates from Muleshoe, Morton, Amburst, Sudan and Littlefield. The above picture was made of the team when they played in Olton recently, beating the Olton team by a score of 8-5 on July 12.

Wimberly Earns Honor Award

COLLEGE STATION -- William F. Wimberly of Muleshoe has earned "Distinguished Student" ranking at Texas A&M University, announced Registrar Robert A. Lacey. The undergraduate honor is awarded students who have excelled academically. Recipients must earn at least a 3.25 grade point ratio (out of a possible 4.0) during the most recent grading period. "Distinguished Student" ranking is limited to 10 percent of TAMU's undergraduate enrollment.

Wimberly is the son of W. F. Wimberly of 337 West Ave. J. He is majoring in agricultural economics.

STATE CAPITAL Highlights AND Sidelights
by Lyndell Williams
TEXAS PRESS ASSOCIATION

AUSTIN — Extension of the federal Voting Rights Act, expected to be approved soon by the U. S. Senate, will have a dramatic impact on states, cities and counties, warns Texas Secretary of State Mark White Jr.

White is waging a kind of crusade to alert Texas officials and news media representatives what to expect and trying to rally last-ditch opposition.

The act, White emphasizes, would mean far more than federally-monitored voter registration and election procedures.

It would also require that every change in state voting laws, all legislative and local boundary line redistricting and even municipal annexations affecting voting precinct makeup would

have to be approved by the U. S. attorney general.

White says Texas has done everything called for in the federal bill to protect voting rights — including passage of a law requiring bilingual ballots and registration materials.

However, the state still would be brought under the act, due to a retroactive provision. That section applies the law to states where fewer than 50 per cent of voting-age adults were registered in 1972 or voted in the last presidential election.

White insists there is no substantial evidence of voting rights violations in Texas, and that applying punitive provisions of the

act to the state is an injustice, "a fraud and an insult."

Impeachment Launched

The first impeachment action in 44 years was launched in the House—against 229th District Judge O. P. Carrillo of Duval County.

A select committee unanimously approved a resolution containing 11 articles of impeachment. The House will recieve August 4 at 10 a.m. to consider the resolution. If it, or any similar version, is approved, the Senate will be called into session within about a month to sit in trial of Carrillo.

The judge's Austin attorney, Arthur Mitchell, said he was notified, meanwhile, the Texas Judicial Qualifications Commission, has filed a complaint against Carrillo.

Mitchell said legal action will be taken in an effort to prevent ouster even if impeachment is voted.

AG Opinions

Atty. Gen John Hill held

gas producer sales to pipelines should be counted as Texas transactions in figuring franchise taxes due the state, and Comptroller Bob Bullock predicted the decision will bring millions of dollars in new income.

In other recent opinions, Hill concluded:

A legislative act abolishing the county school superintendent's offices in Travis and Gonzales counties is unconstitutional.

Library records identifying those who checked out books and art are not subject to disclosure under the open records act.

Student evaluations of a faculty member should be disclosed to him on request.

Courts Speak

Third Court of Civil Appeals held big corporations cannot decrease their franchise tax debt to the state by manipulation of subsidiaries. The case is expected to mean \$24.4 million in additional state revenue. Texaco Inc. brought the action for return of taxes paid under protest.

Texas prosecutors were told by the Court of Criminal Appeals they cannot make a big issue when an accused person refuses to testify during trial. The Court ordered reversal of a life sentence given a Waco man for rape.

Wire Taps Checked

The Criminal Justice Division of the governor's office plans a check of city police and county sheriffs to see they aren't doing illegal electronic surveillance with equipment purchased with federal funds channeled through CJD.

A total of 28 grants have been received to buy \$100,000 worth of equipment.

Audits followed an inquiry from the U. S. Law Enforcement Assistance Administration.

A state appropriations bill rider prohibits use of any appropriated funds, including federal money, to buy wire-tapping devices.

The Department of Public Safety has some equipment used in electronic surveillance of organized crime, but funds to buy it did not come through CJD. DPS spokesmen said the Department does not make a policy of tapping telephone lines.

Appointments

Luke E. Robinson will succeed Kenneth Cook, who

is retiring, as administrator of the Alcoholic Beverage Commission August 1.

Sen. A.M. Aikin Jr. of Paris and Rep. Bill Sullivan of Gainesville were named chairman and vice chairman of the 14-member legislative committee on implementation of the new state constitution.

Robert C. Flowers, director of the Governor's Criminal Justice Division, was selected as a member of the executive committee of the National Conference of State Criminal Justice Planning Administrators.

Former State Rep. Jake Johnson of San Antonio has been appointed legislative historian.

Short Snorts

State Board of Education Chairman Joe Kelly Butler of Houston predicted Texas school districts will have to raise property taxes \$200 million to \$400 million a year under the new school finance law.

A statewide steering committee of prominent Texans has been named for the upcoming nonpartisan Salute To John Connally

plate dinner will go for support of Connally's nationwide speaking engagements.

Texas liberal Democrats will outline presidential campaign strategies at a meeting here September 20. They plan to organize as "Texans for Somebody Else" (besides Sen. Lloyd Bentsen or Alabama Gov. George Wallace, that is).

Secretary of State Mark White Jr. abandoned plans to buy a new state printing press to produce a voters guide to the new constitution, and decided to take a commercial printing bid.

Comptroller Bob Bullock sent checks totalling \$11.4 million to Texas cities representing July local sales tax collections.

THE SCIENTISTS TELL ME ...

By Robert L. Haney, Science Writer
The Texas Agricultural Experiment Station

**Agricultural Land May Purify
the Sewage of Our Cities**

More than 150 cities in Texas have been applying sewage to agricultural lands for a number of years. A sort of magic change was expected from exposure of sewage to sunlight, air, growing plants and the teeming life in the soil. Nature would clean up the water for irrigation and other use and reclaim the nutrients in the sewage for food production.

Does this method really work, or is it a dangerous practice that poisons the soil and threatens our health? A team of scientists with The Texas Agricultural Experiment Station (TAES) and Texas A&M University are evaluating the effect of applying municipal sewage to agricultural soils.

The Environmental Protection Agency is funding the 2-year program of research and Dr. Richard Weaver, TAES soil microbiologist, says it is the most comprehensive of its kind undertaken in the Southwest.

Both the chemical and the microbiological effects of applying sewage to the soil will be studied. The nutrients in sewage can be used by growing crops, according to Dr. Lloyd Hossner, soil chemist. These nutrients are in short supply and are needed for crop production.

However, Hossner cautions that care must be taken in such use since toxic metals such as arsenic, mercury and lead could be present. The level of these elements in some sewage waters and the quantity that soils and crops can tolerate will be studied.

Many human and animal disease organisms are present in sewage according to Weaver. The microbiological problems associated with such use of sewage waters needs careful research. If the disease organisms survive in the soil, in the runoff water, or on the plants, the application of sewage to soil may be a health hazard.

The presence of viruses in treated soils will be studied by a virologist, Dr. Fred Heck. He'll find out if such treatment inactivates the viruses or whether they represent a continuing threat to animals and humans.

And there are multitudes of disease-causing bacteria in sewage water. What's the effect of spreading these on agricultural land; do they die or multiply? A medical microbiologist, Dr. Bill Foster, will find out.

And what about the animals' grazing lands treated with sewage? Are they picking up both toxic metals and disease

organisms that they can pass on to humans? A

veterinary microbiologist,

Dr. Richard Hidalgo, will study such problems.

It's thought that intestinal parasites are likely to be one of the major health problems associated with grazing livestock on treated lands.

A parasitologist, Dr. Norman Dronan, says proper precautions should solve this problem, and he'll doublecheck to in-

sure it. He'll also be investigating the presence of parasites in wild animals on treated lands to find out their possible role in transmission of parasites to other areas.

Water from the sewage-irrigated farm being studied seeps into the Concho River. Weaver says possible contamination of the river will be checked by analysis of water samples taken at regular time

intervals from the river above and below the farm. And, in addition, samples of water from both deep and shallow wells in the area will be regularly analyzed.

The site chosen for this research has been used by the City of San Angelo for secondary sewage disposal for 15 years. City officials are cooperating with this research team to insure

that all possible health precautions are taken.

As the population of the state and nation continues to grow, pressures on our environment (such as sewage disposal) will increase. If a way can be found to safely neutralize and salvage such wastes, all of us will benefit.

Editor's Note -- Any questions regarding this column should be addressed
