

### Hance Discusses Cotton Gin Dust New Regulations

"One of the prime examples of government meddling can be seen in the occupational safety and health administration's anticipated control standards on cotton dust in gins and textile plants," Kent Hance, State Senator now campaigning for Congress in this district for the seat being vacated by George Mahon, declared this week.

"The greatly increased cost of ginning, cotton oil mills and textile mills is going to price cotton out of the textile markets, and it is going to cost the farmer in the West Texas area most of all," Hance added.

Mills will be turning to synthetic fibers, cotton imports will increase, and many older gins and plants will have to go out of business because the stan-

dards being set by OSHA are unreasonable and cannot be complied with by older plants," Hance said. "It's not only our farmers, ginners and cotton industry that will suffer, either. Increased imports will greatly damage the nation interest, the trade balance will worsen, businesses will close, jobs will be exported.

"We certainly understand the importance of health and safety in every industry. But in the cotton business we should strive to the best of our ability to have both without sacrificing the entire cotton industry and the prosperity it has brought to our area," Hance said.

Effective date for the new standards was September 4 and include projects controlling respirable cotton dust through oil additives and new air filter methods in gins and oil mills. Cost of the new

facilities is estimated at between \$1.8 billion and \$2.6 billion.

The most costly diagnostic tool developed in recent years in the medical field is the computed tomography machine or "CAT" scanners. Scanners cost \$700,000 a piece and they have an annual overhead of \$300,000. On average, they represent less than one half of one percent of a large hospital's equipment costs. But because they are so expensive and are used for relatively few patients, their value has been questioned.

The Scanner is a combination X-ray machine and computer. Through multiple angle pictures, it produces clearer views of

the brain than conventional machines and reveals anatomical structures which previously were seen only by exploratory surgery. Because of the multiple pictures taken, it delivers a high radiation dosage. Hence, they are limited to patients whose symptoms suggest a serious disease that cannot otherwise be pinpointed.

For those who might have to undergo painful surgical procedures and lengthy hospital stays, the Scanner is worth its weight in gold. Most specialists regard them as essential. But for those who are not candidates for Scanners, the cost of health care increases with each one purchased.

The market for Scanners was a red hot one in 1972. Within four years, ten companies have introduced Scanners. In Atlanta there are eight hospitals

with more than 200 beds serving a population of 1 1/2 million. Twelve Scanners were installed in Atlanta hospitals and five more in doctors' offices. Industry experts said that only a total of eight were needed. But then HEW stepped into the field, sharply limiting the number of Scanners which hospitals could install.

Scanner manufacturers are now going overseas where the market is booming. Japan is one of the biggest markets with twice as many Scanners per capita as the U.S.

### Consumer Food News

Budget buys at Texas grocery markets include turkey parts, several fresh vegetables and items "on special" along grocery market aisles, according to Mrs. Gwendolyn Clyatt.

Also, more beef features are available, she says.

Mrs. Clyatt is a consumer marketing information specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

This week's price-quality trends are the following:

**Poultry**--Turkey parts are the best value. Fryer chickens are a good value--with whole birds the better value. Medium-size eggs are the better egg buy.

**Fresh vegetables**--Better-than-usual buys are cabbage and potatoes.

More plentiful items with more attractive prices are eggplant, broccoli, cauliflower, cooking greens and turnips. Also, consider carrots, dry yellow onions, green peppers and squash.

**Fresh Fruits**--Red grapes have lower prices. Also consider bananas, cantaloupe and pears, along with apples.

**Grocery market aisles**--Look for special prices on processed tomatoes and tomato products, such as juices, sauces and stewed tomatoes. Other features include pastas, pork and beans, tuna fish and peanut butter.

**Frozen Foods**--Specials include meat pies, fruit and pumpkin pies, bread dough, orange and grapefruit juices and French fries.

**Beef**--Features include chuck roasts and steaks, shoulder roasts, round steaks, ground beef and liver--along with ground beef with protein.

**Pork**--Prices are fairly stable. Consider Boston Butts, smoked and fresh picnics, semi-boneless hams, loin roasts and steaks.

**Consumer watchwords**--Although milk prices are higher, milk is always an important food. Buy according to use for economy--especially nonfat dry milk for real economy.

## STATE CAPITAL HIGHLIGHTS

By Lyndell Williams  
TEXAS PRESS ASSOCIATION

AUSTIN—A new Austin-based group headed by former Texas Attorney General Waggoner Carr is gearing up for a statewide fight to check taxes and government spending.

Carr announced here hundreds of invitations have been sent to citizens and groups over Texas in an effort to form a far-reaching organization dedicated to fiscal responsibility and economy.

Acknowledging a kinship to California's "Proposition 13" crusade for a property tax rollback, Carr said the "Texas 13 of Travis County" group is interested in all kinds of tax cuts.

"We find the situation is now so out of hand that we cannot turn the tide individually," said Carr. "The job is now so massive that so long as we act individually, we remain ineffective, confused and frustrated. We will organize in order to be heard. We shall not rest until our government returns its spending and taxing to a level of sanity and reasonableness."

Goals of "Texas 13" in the 1979 legislature include:

—A "reasonable but strict ceiling" on state government spending, with no increase for the next two years beyond available revenues from existing tax sources, and return to taxpayers of any surplus funds beyond current revenues.

—No new state taxes for the next two years, and a constitutional requirement that a two-thirds record vote of the entire House and Senate be necessary to pass future tax bills.

—A constitutional amendment giving Texas voters the right to initiate and veto legislation at state and local levels.

—Creation of a blue ribbon commission of citizens to investigate waste and excessive bureaucracy in state government.

**More Income Goal**  
A committee studying money management will recommend substantial changes in state investment practices aimed at increasing govern-

ment income \$30 to \$50 million a year.

Rep. Frank Hartung, following a committee session here, said he is still far from satisfied with the state's return on deposited funds by the State Treasury.

Treasurer Warren G. Harding told the Money Management Committee that the treasury department has earned an all-time high of \$117.76 million in depository interest during his administration. The income increased by \$27.7 million or 30.8 per cent over the previous fiscal year.

Harding also told the committee an average of 93.7 per cent of more than \$2.4 billion in state deposits earned interest during the last fiscal year, and the state depository board has raised the interest rates on state deposits from six to seven and a half per cent in four stages since last October.

Hartung said he expects the committee to recommend competitive interest bidding, a requirement that a "maximum amount of state deposits be placed at interest in Texas banks and securities.

### Law Blamed

A new "speedy trial" has confused prosecutors and influenced district attorneys in San Antonio and Wichita Falls to dismiss cases against six accused felons.

The law allows the state 120 days to try felony charges.

Cases were dismissed in San Antonio and Wichita Falls when prosecutors announced they were not ready for trial when they were unable to produce key witnesses.

### Courts Speak

The Court of Criminal Appeals is studying an attack on constitutionality of the speedy trials act after hearing oral arguments last week.

The State Supreme Court upheld dismissal of two Pasadena policemen for planting a gun along the path of a fleeing theft suspect.

The high court turned down another effort of a Houston television reporter

to stop a Nazi telephone recording that offered a bounty for non-whites.

The Supreme Court also ordered El Paso's city water company to supply a restaurant nearby in New Mexico, and concluded a Port Arthur family didn't move fast enough to enjoin leaking sewer gas from a municipal sewer system.

Public employees, the Supreme Court held in a Corpus Christi case, are entitled to present grievances through a non-striking organization.

Texas Municipal League and Houston filed suit to reverse a Public Utility Commission decision ordering \$31 million in city franchise taxes on telephone services included only on bills of customers within city limits.

### AG Opinions

Local school districts are not authorized to pay required employee contributions to the Teacher Retirement System, Attorney General John Hill said.

In another recent opinion, Hill concluded a commissioners court has "reasonable discretion" to permit bills and other government payment of office expenses for official court reporters.

### Hearing Begins

The Public Utility Commission last week began hearing testimony in Hous-

ton Lighting and Power Company's \$174.9 million rate increase request.

PUC staff members recommended a \$40.5 million increase with a 13.8 per cent return on equity.

### Short Snorts

The Department of Public Safety expressed serious concern about a traffic death toll which has jumped 11 per cent over last year and an increase in violent crimes.

Texas AFL-CIO Executive Board announced unanimous opposition to the tax relief amendment on the November 7 ballot because it would grant tax breaks to corporate farms, ranches and timber interests.

The Alabama-Coushatta Indian Reservation near Livingston proposes to administer its own federal grants, including manpower training funds.

Not all homeowners will get relief from the sales tax on utilities this month. It all depends on the billing cycle. If the cycle is September 25-October 25, the tax must be paid through October 25. But if the billing period is October 3-November 3, the tax went off October 3.

Joe Carter, veteran chairman of the Texas Water Commission, died here last week.

## Xi Omicron Xi Business Meeting

## UT Austin gets Gutenberg Bible

AUSTIN, Texas (Spl.) — A copy of one of the first books ever printed by movable type has been acquired by The University of Texas, largely through efforts of the Chancellor's Council.

Printed in Mainz, Germany, in the 15th Century, it is a Gutenberg Bible, which is considered a primary landmark of civilization. Scholars revere the work not only because printing was to revolutionize all of education but also because the Gutenberg is regarded as the finest example of printing

 Minor amendments were made to the 1978-79 school budget and they approved an application for Foundations Funds for 1978-79 as received from the Texas Education Agency.  
 They heard reports on current school enrollment, which showed a loss of 30 students over last year, with 1,674 reported attending the four local schools, compared to 1,714 at the same time last year.  
 Discussed was a Federal Court injunction against the State of Texas and Tyler ISD which required the Tyler ISD to admit all undocumented age school children of Mexican origin residing within its boundaries.  
 Approved was the "Offer vs. Served" concept for Type A lunches, for Grades six through 12. It was explained that this concept requires that students in both junior and senior high school be offered all five items comprising the full Type A lunch, but with the student having the option of choosing as few as three of the food items.  
 Next meeting for the school board will be on Monday, November 13, at 7:30 p.m.

 Marr explained that when SPS originally sought an increase in rates, they asked for a \$21.9 million increase. Public Utility Commission approved \$17.2 million and said that examiners could not look at TUCO, a subsidiary of SPS.  
 However, an examiner's report said \$17.2 million was too high and ordered \$15.9 million, and granted a look at the books of TUCO.  
 Then the Utility Commission said a \$13.1 million increase would be feasible. The negotiations are expected to continue for some time, with no settlement in sight, according to Marr's report.

**Memory strategies**

AUSTIN, Texas (Spl.) — A University of Texas psychologist says repetition is not an effective way to learn.  
 Dr. Robert K. Young, an advocate of memory prompting strategies as an aid to learning, says persons who use imagery when learning to associate two words do 60 per cent better than those who learn by rote memorization. The more bizarre your images

are, he says, the easier they are to recall.  
 Dr. Young notes, for example, that his daughter was having trouble memorizing the capitals of states until he told her to make up a little story about each. Now she remembers Oregon with the imagery of "I smoked a Salem cigarette on the Oregon Trail."

Government of the people seems to be for the people represented by pressure groups.

### Lawn Weeds Are Stopped By Herbicide

Remember those unsightly weeds and grasses that emerged in your lawn last winter? Now is the time to take action to prevent a similar situation this year. Winter weeds begin to germinate as the temperature drops in October or November. Weed seedlings emerge from November through January but remain small and often don't become obvious until January or February, points out Dr. Dave Weaver, weed specialist with the Texas Agricultural Extension Service.

A number of herbicides will control winter weeds in St. Augustine and bermudagrass if applied before weed seeds begin to germinate. This means applying preemergence herbicides in early October. Benefin (Balan), bensulide (Betasan, Pre-San; and DCPA (Dacthal) are all available in granular formulations and will give good weed control if properly applied, says Weaver. Granular materials are easier to apply than sprays because calibration is more simple. Drop type applicators are better than spinner type distributors because of uniformity of coverage and ease of calibration.

All these herbicides are available mixed with fertilizer (weed and feed products), but these mixtures must be used with care, cautions the specialist. Areas that need fertilization, such as flower beds and gardens, could be damaged by the herbicide, depending on what is growing there or what will be planted later. Proper application rates are more important when applying a herbicide than when fertilizer only is applied. Two other effective pre-emergence herbicides are atrazine and simazine, but these are labelled for use only in fertilizer mixtures. Never apply fertilizers containing atrazine or simazine near young trees or ornamentals or injury may occur, emphasizes Weaver.

Unless there is rain soon after herbicide application, the lawn should be watered thoroughly to carry the

**STONE SOUP...** We saw the movie "Stone Soup" this week. We decided to make our own Stone Soup. Each one of us brought a carrot, a potato, some celery, an onion, a tomato, or some cabbage. Our soup was really delicious! Our special guests were Mrs. Ragsdale, Mr. Herrera, Mr. Grimes and Mr. Anders.

herbicide down into the soil to contact the weed seeds.  
Before buying and using a herbicide, check the

label for the exact rate and specific weeds and grasses to be controlled as well as precautions for use, adds the specialist.

### Hill Boosts Amendments

Attorney General John Hill is urging Texas voters to cast their ballots Nov. 7 for the proposed tax relief constitutional amendment. "Adoption of the tax relief amendment is an essential first step toward reform of our tax system and tax relief in Texas," Hill said.

"I have consulted with Lt. Gov. Bill Hobby and House Speaker Bill Clayton about expediting the tax relief implementing legislation during the 1979 legislative session, and they have agreed to my plans for giving this matter and the companion school finance legislation 'emergency' status. "I am optimistic that this early agreement by the presiding officers of the two houses of our legislature will provide the clear signal we need to our legislators that tax relief and school finance will go hand-in-hand during the next legislative session, and that they will be at the

head of the line when we begin taking action on bills.

"But our attention first must be directed toward the Nov. 7 election. Unless the voters approve the tax relief amendment, we will not be able to make any meaningful progress toward tax relief.

"That is why I am campaigning for adoption of the amendment, and that is why I will devote part of my campaign resources to getting out a big vote for the tax relief amendment."

Saudi Arabia's Help

Without the highly influential support of the Government of Saudi Arabia, the bedeviled U.S. dollar would have fallen much further in recent weeks. Also, without the quiet opposition of Saudi Arabia, the price of Mideast oil would have risen this year, with extremely damaging effects not only on the U.S. dollar but on the entire U.S. economy...

Amend NLRA!

Many Americans are coming to believe the National Labor Relations Act of 1935 must be amended if big unions, some corrupt and others irresponsible about the overall public and national interest, are not to strangle individual freedom and enterprise among American workers. NLRA contains many worthwhile features. But it and subsequent labor legislation allow big unions much special power and privilege...

NITRITE & CANCER

Sodium nitrite, a food preservative used to combat deadly botulism bacteria in meats, probably causes cancer, Food and Drug Administration

Commissioner Donald Kennedy said. FDA plans to phase out use of the additive, used for decades to prevent botulism.

SPEAKING OF CONTROLS

WASHINGTON NOTES

BEGIN & U.S. BASE

Prime Minister Menachem Begin said Israel would welcome the establishment of a U.S. naval base or other military facility on its territory.

TUITION & TAXES

Senate and House conferees have agreed on a bill that would allow a tax credit of up to \$250 per student each year to help offset college tuition costs.

VANCE IS HOPEFUL

The United States and the Soviet Union failed to reach agreement on the remaining

obstacles blocking a new arms limitation treaty and decided to suspend negotiations for three weeks.

TRADE DEFICIT DROPS

The United States' trade deficit narrowed to \$1.6 billion in August as the nation made some headway in selling its products abroad, the Commerce Department said.

GAS BILL VICTORY

The Senate handed President Carter the first major victory on his energy program in more than a year when it approved a compromise bill to lift federal price controls from natural gas by 1985.

ARMS BAN LIFTED

President Carter has lifted the U.S. arms embargo

against Turkey, saying the action is in the best interests of the United States and its allies in NATO.

TO AID EXPORTS

President Carter, in an effort to narrow the U.S. trade deficit, has announced a series of steps designed to reduce export barriers and make it easier to sell American goods abroad.

ON TAX RELIEF

The Senate Finance Committee raised the possibility that this year's tax cut bill will provide less relief for middle-income Americans than had been expected. The problem is that the committee, having voted special tax reductions for business, the poor and high-income investors, is running out of money.

### The Sandhills Philosopher

Editor's note: The Sandhills Philosopher on his Johnson grass farm on Sandy Creek examines a new investigation of a government agency this week.

Dear editor: Although it is getting a little monotonous, another government scandal has hit the headlines, this time involving what is known as the General Services Administration, which, as I understand it, is the Federal government's purchasing agent. It places orders in the millions of dollars for what the various bureaus need, such as filing cabinets, desks, wall paint, thicker rugs, pen-

cils, paper, red tape or whatever. Investigators claim the outfit has been careless, like ordering, say 10,000 new filing cabinets, I guess to tide them over till next week, then paying for 10,000 but getting only 5,000. Then it is a year and two investigations later before the other 5,000 are even missed. Apparently were not needed anyway. This has outraged the investigators. If you order 10,000 and pay for 10,000

you ought to get 10,000, they say, and then ask where the money for the undelivered 5,000 filing cabinets went. There is an angle to this I believe the investigators are missing. From the tax payer's standpoint, the cost is the same, the national debt is increased by that much, whether the government got 10,000 or 5,000 filing cabinets. There is little satisfaction in getting the full 10,000

when only 5,000 apparently were needed in the first place. Try as hard as I can, I don't find my happiness increased one bit by knowing the government has 5,000 extra filing cabinets it doesn't need. Somebody ought to be concentrating on the guys who ordered the surplus. However, on second thought, all may not be lost. If investigators and newspapers keep investigating all phases of government, those 5,000 filing

cabinets may come in handy to hold what they uncover. I assume the cabinets are rust-proof, because the custom is to file all investigation reports away for 15 or 20 years, not to be opened till it is too late anyway. Yours faithfully, J.A.

### FFA Boosters Met To Plan Fund Raising

The F.F.A. Boosters met Monday night, October 9, in the High School Ag. Department. President, Robert Hunt, conducted a short business session in which minutes were read and approved. A treasurer's statement was accepted and a lengthy discussion was held on

projects for the Ag. Department. The membership drive will begin October 20, thru November 20, under the leadership of Mrs. Eugene Shaw and Mrs. Charles Farmer. The boosters will serve Spudnuts and hot chocolate at the pig sale this Saturday at the High School Ag. Department. Howard Watson, By-Laws Chairman, presented a proposed set of by-laws. These will be discussed and adopted at the next meeting, November 20. Bickel showed a slide presentation of the Ag. Department crop display at the Lubbock Fair. Ribbons were received on the entry. The Ag. Boosters voted to finance two swine projects for two F.F.A. members. This will be under the direction of the advisors and with the co-operation of the boys and their parents. Other projects and fund raising activities were discussed and action will be taken on final discussions, which will benefit each F.F.A. member. The Ag. Boosters authorized the advisors to purchase panels to be used at the Ag. Farm for swine projects. The next meeting will be November 20 and pictures of officers will be taken.

### Alumni honored
