

BRISBANE THIS WEEK

For the Pacific States
A Good Example
It Sold for \$700

The Pacific states should interest themselves in air defense, apart from the national government.

Arthur Brisbane

had, he would build a battleship for himself.

The west coast states, California, Oregon, Washington, co-operating perhaps with their vigorous neighbors of Vancouver, and other points above the Canadian border, might well have a few flying ships of their own, a sort of air militia.

San Francisco, where they combine patriotism with plenty of money, and great civic pride and energy, might well start the idea of a Pacific coast flying force. That need not be very expensive. A hundred machines to begin with, a hundred plucky young fliers, practicing the gentle art of flying at night, and dropping bombs, practicing especially mimic warfare against other flying machines, would constitute an admirable object lesson to the rest of the country.

And if California, in San Francisco for instance, should start a little flock of one hundred machines, Los Angeles could be relied upon to hurry in with two hundred, Seattle and other coast cities also.

Such machines need not be a total loss.

In the first place, many young gentlemen with rich fathers, not knowing exactly what to do with themselves, extremely anxious to find work worth while, and preferably dangerous, would delight in each equipping his individual machine, for the service of the Pacific coast and of Uncle Sam, as the nobles in the old days delighted in equipping each his regiment, or his fighting ship, for the service of the king.

Two hundred or three hundred high powered, swift flying machines, directed by quick and courageous American brains, would be worth more to the safety of the Pacific coast than a hundred battleships. For the fighters that come, if they do come, will fly miles above the battleships.

They would come less gaily, less confidently, if they knew that trained fliers awaited them.

Hideyo Noguchi, who gave his life to fight yellow fever in Africa, will inspire many men. He was born of a proud, warlike race, intensely self-centered, for 2,000 years a hermit people. The loyalty of a Japanese was to family, clan, above all to the emperor representing his race. The rest of the world was nothing to him.

Born one generation after Japan opened her doors to the world, Noguchi felt the new spirit of the times. He was loyal to family, clan, emperor, race; but he was devoted chiefly to all human kind.

From boyhood to the last, through poverty and many perils, he studied how to wipe out disease. He discovered the germ of yellow fever, developed serums to prevent the fever of cure it, led in the work that has driven it out of America and will soon put an end to it throughout the world.

Yellow fever killed countless millions of all peoples. Noguchi's skill and devotion have saved the lives of millions, too many to estimate, most of them foreigners to whom his forefathers would have paid no attention, calling them he-min, or no-folks.

Noguchi's self-sacrifice to human welfare sets an example that is sure to be followed. Perhaps, in time, most men will see that it is better to help one another than to kill or even rob one another.

It is said the Hackensack Indians

That Man Again

(Copyright, W. N. U.)

"WAR IS HELL"

There are lots of folks who suffer an attack of holy jitters when you speak to them of the virtues of always being prepared for war.

They will tell you that war is destructive, inhuman, cruel and unchristian. To this agument, I heartily agree. Sherman said that "war is hell". Sherman was right. No condition can be imagined that could be worse than war. Yet, war is the heritage of all flesh. That is the reason that your Uncle Samuel should always be fully prepared for war. Even the bees and ants have that much sense, but some humans I have in mind do not enjoy the wisdom of these insects.

The late, wise Teddy Roosevelt taught the doctrine of carrying the "big stick" for those who refused to listen to reason. Woodrow Wilson preached the gospel of "Preparedness". Because we failed to accept his warning, we paid for it in the coin of our part in the World War.

Had we been prepared as Wilson taught us, the Kaiser would not have dared to treat his solemn treaties with us as mere "scraps of paper." Had we been prepared to enforce our treaties and natural rights upon the high seas, he would have kept his war dogs from biting our women and babies.

As it was, the Kaiser said we had no trained army, only a few ships, no guns or ammunition. He said we were a nation of "shopkeepers" so bent on making money that we couldn't be kicked into a fight. Of course he paid dearly for his mistake, and we paid dearly for not listening to Wilson's gospel of preparedness. Had we been prepared, we would have not been mixed up in that World War.

Being prepared, recalls an incident that happened in the frontier days when father lived in Wise county. A young school teacher was conducting a school in the neighborhood. At that time hostile Comanche Indians were raiding the settlements stealing every horse they could find and murdering every white person they met. This young school teacher was a Quaker and did not believe in carrying arms on any pretext.

He would often visit father at the family home. They would argue about carrying a gun. He argued that if you would let the Indians alone and attend to your own business, he would let you alone. Although he had never met an Indian he was firmly convinced that his policy was entirely safe. He scorned to carry a gun for protection, and argued that it was cowardly and unchristian in other men to do so.

Father was a strong advocate of peace. He believed in peace, even if you had to fight for it. He argued that if you carried a good, easy shooting gun and met an Indian, the fact that you had the gun and was able and willing to use it if the occasion required you to do so, the Indian would be more willing to listen to reason than if you did not have a gun. These arguments as to who had the correct theory about carrying guns was soon to be put to the test.

One evening about dusk, this young man rushed into the house almost scared to death. An arrow decorated the crown of his wool hat, while another dangled in his coat. As soon as he could talk, he

(Continued on 2nd page)

San Angelo Is Now Cheerfully Digging Out of The Slime

After crawling out of their refuges and shaking off the mud that had covered many of the citizens of San Angelo last week, they looked around and saw much waste. The cosy homes that had been the pride, joy, and comfort of many of the denizens of that stricken city, was off on a vacation to the seaside, leaving only the ground on which it had stood, made those people gloomy for a time. But when they remembered that although much of their worldly goods had been lost in the flood, no human life had been taken.

When they remembered, "we are all here," and that there were many sympathetic souls, willing hands and open purses to help them in their dire needs, they saw the smiling face behind a frowning Providence and took heart and began the work of rehabilitation. Today, San Angelo is one of the busiest places in America. They are all at work, and at night, when each worker lays his weary bones down to rest, he is happy in the thought that he is restoring his home and helping to build a bigger and better San Angelo.

Although those brave people are not asking outside help, yet, they are taking up contributions from outside towns to help the Red Cross in its noble work of mercy and rehabilitation. Those who have hearts and souls are giving of their abundance to relieve those in distress and save them from becoming public charges.

San Angelo has rolled up her sleeves and gone on a big cleanup campaign. They say there are no idlers in San Angelo. Everybody is working overtime to bring the city back to normalcy in the shortest possible time.

Within a short time, this great flood will be only a memory. San Angelo will spread out over higher ground, yet, some will go back to the low grounds, believing that this is the last of the big floods, only to be taken unaware again. But San Angelo will be a bigger and better San Angelo. The lessons taught by

the great flood will make it so.

Sterling City, San Angelo's little sister, is pouring her offerings into the lap of her big sister and standing by with a generous heart and willing hands to succor the needy and stricken. It pleases God that they do this—Uncle Bill

Aged Father of T. G. Fullick Is Dead

Charles Albert Fullick aged 83 years and well known resident of McDonald, died Saturday afternoon August 22, in the Greene County Memorial Hospital. His death was due to disease incident to his advanced years.

Mr. Fullick was born in England February 14, 1853, but had resided in the McDonald section for many years, where he was engaged as a coal operator. His wife, Margaret Eliz Fullick died in February 1932 and since her death most of his time had been spent at the home of his son, E. C. Fullick, of near Waynesburg.

Mr. Fullick was a charter member of the First Presbyterian Church of McDonald and also a charter member of the Waverly K. of P. Lodge at McDonald.

He is survived by the following sons: E. C. Fullick, Waynesburg; A. F. Fullick, Canonsburg; T. G. Fullick, Sterling City, Texas; and S. L. Fullick, of North Side, Pittsburgh.

The funeral services will be held this afternoon at 2:30 o'clock in the First Presbyterian Church of McDonald. Burial will be in the McDonald Cemetery.—Waynesburg, Pa. Times

Deceased was the father of our fellow citizen, Tom Fullick, who resides for the present at Odessa.

Defied The Drouth

Leo Radde and Vern Davis are the only two men, so they say, who had the nerve to go up against the drouth and planted a crop of small grain while the ground was just a bed of dry dust. They gambled on the weather and they won. Their crops are up and growing and will soon be ready for grazing. It was not such a gamble after all. It was faith and good judgement. They knew for a certainty that if they didn't sow, they wouldn't reap.

With The H. D. Clubs

Women in the Sterling County Home Demonstration Clubs are finding different uses for the various kinds of sacks which they have on hand. After the sacks have been washed, pressed and perhaps bleached they may be used for simple tailored or sport dresses; which when trimmed with bright colored dots or plaids are very attractive. Several foundation patterns have been made from the sacks. Other uses are: appliqued kitchen or bathroom drapes, luncheon sets, shoe bags, dress covers, and laundry bags. Many of these make attractive and useful Christmas gifts.

Mrs. Julia Fritz of the Kiowa Demonstration Club prepares a fruit ice that is very delicious. The fruit should be put through a collander or press so that only the juices and puree remain. The sugar should be dissolved in the water by boiling the two together for about three minutes. After the water and mixture has cooled add the fruits. The recipe is as follows: One doz. oranges; 1/2 doz. lemons; 1/2 doz. bananas; No. 2 can crushed pineapple; No. 3 can peaches, or 1 doz. fresh peaches; grated rind of 1 orange, if desired; 4 cups of water; 3 cups of sugar and one-half teaspoon salt.

"Choose the color of your fall wardrobe according to your personality, personal coloring, size, present wardrobe and the value and intensity of the color best suited to you."—Mrs. Everette Cope, Clothing Demonstrator, told the members of the Sterling City Home Demonstration Club when they met Wednesday afternoon in the home of Mrs. Tom Onstott. Black is known to be the outstanding color, but it should be emphasized with wine, blue, green bronze, or even British tan. A bright accent is necessary for a well groomed person. Clips, buttons or ties may be used for this.

When canning tomato juice use the water bath method. This has proven more satisfactory than canning the tomatoes under pressure.

THE BIGGEST FOOL

"Sterling City News-Record: The biggest fool that runs the range of humanity is the man who works hard and spends his wages for liquor pours it down his fool neck, goes crazy, makes an ass of himself, creates a disturbance, gets arrested, and put in jail, breaks the hearts of his wife and children, besides taking the money they need for food and raiment to pay his fine. If you know of a bigger fool, trot him out."

You have got us stymied. We can't trot out a bigger fool than the one you have in mind, although we have a few friends who might be considered rivals of your man. Always there is one who excels all others in a given contest, and is acknowledged to be the champion. Simple Simon was foremost among the simpletons in Mother Goose's great work. But Simple Simon did not get drunk and start a rough house. When he met the pie man he asked for a bite of pie, but made no attempt to rob the pastry dealer. The Bible tells us that fools and their money are soon parted. It did not go into details concerning the various types of fools. From another source we learn that fools are known by their folly. Certainly there is no folly more follyiferous than that of a man who spends his wages for drink and follows the dictates of drink into the jailhouse. King Solomon advised that a fool be answered according to his folly, but that is impossible in a case such as described by the Sterling City contemporary. There is no answer. And Solomon didn't suggest one.—Dallas Morning News

WEATHER EXTREMES

Speaking of weather, one extreme often follows another. During the great drouth of 1916-1917-1918, when crops almost failed in West Texas, the rain came in the fall and winter of 1918-19 in great abundance. In fact, December and January will long be remembered for continued rains.

The drouth that prevailed from here to Canada over the Western States during the summer, was broken last week by record-breaking floods.

Last week, one could, with reasonable certainty, predict a change in the weather, probable rain. The papers gave accounts of a great storm raging at sea to the southeast of us and advancing west and northwest. At the same time we were informed that a cold wave came out of the north and was advancing southeast. These two storms met over Texas and squeezed the water out of the clouds—bringing floods over a great area of the drouth stricken West.

Weather observers should have been able to have predicted this great rainstorm, but they were afraid they might miss their guess again, so they told us that tonight and tomorrow it would be "partly cloudy with probable showers in the south-

BANKERS WILL MEET IN ANNUAL COUNCIL

Business Men Also Invited to Present Their Views on Services of Banks to the Public

WASHINGTON, D. C.—Robert V. Fleming, President American Bankers Association, has announced that the organization's annual convention will be held at San Francisco, September 21-24, and its program will call in not only bankers but speakers from various lines of business to present their viewpoints and advice.

The plans for the convention discussions take into consideration the fact, he said, that one of the major problems of banking today is to develop its operations along lines that will create greater public understanding of its methods and services. "It is my earnest conviction that such public understanding of banking is not only an essential defense against attacks from whatever source but is also requisite to reestablishing it upon a firm and satisfactory basis of profitable operations," Mr. Fleming said.

General Improvement Cited

"The improvement in general conditions which is now taking place should be of material aid to bankers in carrying forward a constructive program for increasingly useful relationships between banking and business, as well as one of more helpful personal business services to all our people. Sound banking conducted in ways the public need and understand must be the aim of successful bank management.

"How can the banker make his operations and policies more understandable to the people of his community? How can better and broader financial services be soundly provided? How can banking improve its operating methods and income? These and many similar questions demand the earnest attention of all bankers. They call for a fresh counselling together and a new interchange of experience and advice among the members of our profession.

"With these thoughts in mind, we have built the convention program with the view of also calling into our councils speakers from various lines of business to give us their viewpoints and advice. I can say without reservation that this is to my mind one of the most crucial years in the evolution of American banking, and that we are passing through a period demanding, as never before, cooperation and mutual exchange of viewpoint among our members and others."

Radio Commencement Exercises

More than 200 widely separated chapters of the American Institute of Banking, the educational section of the American Bankers Association hold annually in September a simultaneous commencement exercise at which they listen to the speaker of the evening by radio. This is said to be the most extensive graduation ceremony held by any educational institution. The aggregate membership of the chapters, which are located in cities and towns throughout the United States, totals about 35,000 bank employees and officers. The graduates number each year more than 2,500, and total graduates are now over 25,000.

The Business Outlook

NEW YORK.—The natural forces of recovery have demonstrated their strength and have a momentum which may reasonably be expected to carry the country into new high ground, says "Banking," the publication of the American Bankers Association, in its August issue. The momentary stimulation following the distribution of bonus funds to the veterans has practically died away and is no longer an important business factor. A certain degree of uncertainty arising from the national political campaign is unavoidable, the magazine says.

Them sox which you so generously helped me buy last spring are worn out except the legs. That dollar and two-bits that is now due will help buy some more. I just thought I would let you know about it.—Uncle Bill

east portion." Not one time did they predict "rain."

When two storms approach in opposite directions, you can always look for rain.

SERENADE

Famous Explorer Tours Mexico

Carveth Wells, world traveler, lecturer and author, is pictured here as he drove over a reproduction of the Yuma Road, one of nine famous trails and highways which comprise part of the Ford Motor Company's exhibit at the Texas Centennial Exposition in Dallas. Mr. Wells has recently completed an extended motor trip through old Mexico.

Carveth Wells, lecturer, explorer and radio commentator, who also has written many popular books, found much of interest during his visit to the Texas Centennial Exposition in Dallas, so much in fact, that he will devote his radio broadcast September 27 to a description of the show.

While being shown through the Ford Exposition building, Mr. Wells expressed more than passing interest in the development of automobile trailers. He described his present tour, one which took him over a considerable portion of Mexico, as having been made in a deluxe custom-built trailer, and said the number of Americans traveling in this manner is increasing tremendously.

"All Americans love to travel and see things," Mr. Wells declared.

"and the utilization of a trailer makes it possible for the average citizen to cover much ground and live comfortably in all kinds of weather. This year has seen thousands of new trailers on the road."

The noted explorer and author found another exhibit which intrigued him, a reproduction of nine famous cattle trails and highways, known as the "Roads of the Southwest." He has traveled over some of the originals in this group and posed for photographs on the reconstructed Yuma Road.

Mr. Wells is a fellow of the American Geographical Society, Royal Geographical Society, an associate member of the Institution of Civil Engineers in England and a patron of the Chicago Geographical Society.

"WAR IS HELL"

[Continued from first page]

explained that while he was peacefully walking home from school, a band of ill-mannered Comanches on horseback approached him. He stopped and explained to them that he never carried a gun, and as gentlemen, he implored them to allow him to go his way in peace.

In answer to his kind words and amiable gestures, they commenced to shoot arrows at him and uttered derisive yells. Becoming frightened he ran for a thicket nearby and escaped. He said they appeared to be entirely lacking in courtesy, and he believed they meant him bodily harm.

When he recovered from his fright, he seemed to get angry because of his undeserved treatment at the hands of those uncultured (or Kultured) Comanche gentlemen. He begged father for the loan of a gun.

A few days after this incident this young Quaker was seen wearing a pair of Colt, cap and ball Dragoon sixshooters. He afterwards joined the Frontier Reserve and served gallantly to the end of the Civil War.

Father always said that the narrow escape of this young school

teacher brought him to his senses.

It is all right for you Vets of the World War to say that you have had enough rough stuff and that you are not going to fight any more. It is all right for the members of the Jelly Bean and Milkop societies to pass resolutions that they will take no part in any war that may come but I want to warn you that only you think so.

The next war will come out of the air from which death, hell and destruction will be rained upon all alike. Such things as non-combatants will be unknown to the enemy. Notwithstanding your peaceful declarations and intentions, the aerial enemy will be as deaf to your pacific entreaties as those Comanche gentlemen were to the young tenderfoot school teacher.

Men, women and children will be mixed alike in the next war. The air soldiers will be a mile high when they let loose their bombs, and they who are on the ground will look alike to them. All will suffer alike. All will die alike.

The only thing for us to do is to be prepared, and be prepared in the manner which modern science teaches us. The most expensive preparation will be the cheapest. If we expect to survive the next war, we must be prepared to meet the enemy, not only on sea and land,

but in mid air, with the most potent weapons that modern science has evolved.

The man or woman who teaches against preparedness, is teaching the gospel of destruction. Let us never forget that war is a human heritage and cannot be avoided long at a time, and we must be prepared for it.—Uncle Bill

THIS WEEK

(Continued from first page)

sold to the white men for so many bars of lead, and some finery worth altogether \$700, land on which now stands the entire city of Newark, N. J., and a great deal of land beyond.

The poor Hackensack chief, with his \$700, couldn't buy today enough land or a tight grave at the corner of Broad and Market streets in Newark. Land goes up wonderfully.

Doctors at Kansas City report that birth control information so much discussed does little good to the poor, and has caused an "alarming slump in child bearing among educated families."

That is how reform works, usually. But since 90 per cent of human beings worth while come from poor families, providence may be working in its usual mysterious way. © King Features Syndicate, Inc. WNU Ser.

Candidate Landon makes a mighty poor show as a public speaker. On the screen the other night, Mr. Landon spoke vociferously of "American Liberty", as if anybody had been denied his constitutional liberty under the Roosevelt administration. Landon wants to return us to the days of Hoover and starvation. He wants everybody to enjoy the liberty of starving and going naked. He wants to see the biguns eat the littleuns again as they did in the good old days of Hoover. Honestly what has Landon and the Republican Party got to promise you?

It keeps right on raining. Moisture is the eternal problem of West Texas. Give us plenty of moisture and we have a tail-hold on the world and a down hill pull.

Born: On the 17th., to Mr. and Mrs. Charlie Brite, a boy.

W. V. Churchill, of Sweetwater, visited relatives and friends here during the week.

W. F. Cole left last Sunday for Amarillo to visit his father, J. B. Cole of that city.

Phone Mrs. J. A. Revell for all kinds of flowers, bulbs or pot plants from Walker Morgan Floral Shop.

Sheriff Vern Davis landed a couple of drunks in jail last Wednesday. They were charged with driving an automobile while drunk and disorderly conduct. They are alleged to be citizens of Colorado.

J. J. Goodfellow, veteran State land surveyor of San Angelo, was a business visitor to our town last Thursday. Mr. Goodfellow escaped damage from the flood, his residence is on the highest spot in San Angelo.

Miss Agnes Abernathy, member of the faculty of the Sterling City Public School enrolled her name on our subscription list of choice subscribers this week. We always welcome the school teachers to our circle of readers.

On account of the ground being so dry and so many sinkholes in the Lacy and North Concho valleys, the flood was mild compared to what it would have been had it come when the ground was not so full of cracks and sinkholes.

Dr. and Mrs. Merle Roberts and Mrs. Robert's sister of Ellenville, New York, and Dr. Robert's mother Mrs. B. F. Roberts, are visiting friends and relatives here this week. Dr. Roberts is an old time Sterling boy who has been practicing medicine in New York for several years.

Dewey Mercer having moved into the John Walraven garage and repair shop, wishes to inform his friends and customers that he is equipped to do all kinds of automobile repair work. This includes painting, fixing flats, greasing, adjusting and everything that needs to be done to your car. All work guaranteed. Prices reasonable. Go and figure with him on your jobs.

Former Citizens Visit Here

Mesdames Joe Paschal and Virgil Jones of Brady, Texas, R. W. Dunn and C. E. McLoed of Hattiesburg, Mississippi, were visiting old time friends here last Monday. Mrs. Paschal is the widow of the late Joe Paschal who resided in Sterling City in the early 1900's. Mrs. Dunn, before her marriage to Will Paschal, was Miss Pauline Bennett. While serving on the police force at El Paso several years ago, Will Paschal was murdered by outlaws. A son by this marriage is Lieutenant Paschal of the U. S. Navy, stationed at San Diego, California. Since Will Paschal's death, Pauline married Mr. R. W. Dunn and is now residing in Hattiesburg, Miss.

H. D. Clubs

(Continued from first page)

Flavor and food value are preserved. For the tomato juice firm, fresh and well ripe tomatoes should be used. The juice may be extracted from the cold tomatoes or by pre-heating the fruit before pressing. Heat the juice to 180 degrees F. or to simmering point, and pour immediately into hot sterilized jars or cans. Process pints in boiling water for five minutes. This makes a fine product for soups, appetizers or a drink.

"The best way to keep pecans is by canning them", says Mrs. Trent Horton, of the Sterling Creek Home Demonstration club. To do this you select well developed nuts, and after shelling them, place one layer thick in a shallow pan and heat in a slow oven. Pack in hot dry sterilized jars to within one inch of the top. Place a piece of paper in the top of the jar to absorb the moisture. Process in a pressure cooker at five pounds for five minutes. Cans may be used instead of the jars if desired. By having the nuts canned, time is saved when cooking with them, and the flavor is delicious.

Dr. O. M. Roberts Is A Visitor Here

Dr. O. M. Roberts of Ellenville, New York, was an appreciated caller at this office last Wednesday. Dr. Roberts is our well known Merle Roberts who was born and reared in Sterling. He is a product of our Sterling City High School from which so many boys and girls have gone out into the world and made good. Several years ago Merle said he was going to be a doctor. He went to college and kept plugging away. He didn't have any money to speak of, but that did not keep him down. His determination and stickability to reach his goal supplied the place of money. Today, he stands high in the medical profession in New York. Has a modern equipped office—all paid for, and enjoys a large practice. He is happily married to a trained nurse who assists him in his practice. But he says he loves Texas and its people. They are his state and people and he will always love them.

The Divide Is Soaked

John Copeland was in from his ranch on the Divide last Wednesday and reported a 15-inch rain on his ranch during the big rains. John is in high feathers about the prospects which the rains brought. He says there will be plenty of grass on the range and a lot of feed made.

Mr. Copeland says a part of the Robert Lee road on the divide is out of commission. He says where the road crosses a lake, the water stands over the dump, making it impassable. He is of the opinion that instead of building the dump higher, it would be much cheaper and better to drain the lake. He thinks the job could be done cheaply.

**Famous V-8 Visits Texas Cities
With Invitations to See Expo**

Starting on a Goodwill Tour

Arms loaded with literature advertising the Texas Centennial Exposition and the Ford exhibit at Dallas, Jack Simmons is pictured (above) with the 3,000,000th Ford V-8 which is being used in a goodwill tour of Texas cities. Note the special license tags granted by states through which it passed on its trip from Dearborn, Michigan, to Dallas.

The map (below) shows where the famous 3,000,000th Ford V-8 will tour on its goodwill mission to Texas cities, to invite the people to visit the Centennial at Dallas.

Further to publicize the Texas Centennial Exposition in Dallas and aid in celebrations in various parts of the state, the Ford exhibit management at Dallas is sending the 3,000,000th Ford V-8 on a goodwill tour of twelve Texas cities. The car left Dallas Wednesday night for Houston. Other cities to be visited by the 3,000,000th V-8 during the next few weeks are Boerne, Henderson, San Angelo, Longview, Tyler, Ennis, Wharton, Yorktown, Beaumont, Graham and Harlingen. Jack Simmons, driver of the 3,000,000th V-8 which was driven to Dallas from Dearborn, Mich., will carry a generous supply of literature advertising the Dallas show and the Ford building. He also will extend greetings and an invitation to the mayors of the several cities to visit the Central Exposition.

Garden City Has Big Rains

Garden City reported a 9-inch rain last Tuesday night, Lacy Creek overflowed its valley and was reported very high in the vicinity of the Cox, Currie, and Glass ranches. The flood came down the North Concho at Sterling City at about 5 o'clock Wednesday morning, putting the river out of its banks.

Heavy rains Tuesday night were reported to have fallen on the upper reaches of the North Concho in the vicinity of Forsan, overflowing the valley in the vicinity of the W. L. Foster and U ranches.

Heavy rains fell at Garden City and Forsan again Wednesday night and Thursday, putting Lacy Creek and the upper draws of the North Concho over the valleys. The River has been running bank full here for 48 hours.

ANNOUNCEMENTS

We are authorized to announce the following candidates, subject to the action of the Democratic Primaries of 1936.

For Representative of 91st. Legislative District:

Penrose B. Metcalfe

For Judge, 51st Judicial District

John F. Sutton

For District Attorney, 51st Judicial District:

O. C. Fisher.

For Sheriff and Tax Collector-Assessor:

V. E. Davis.

For County Judge:

G. C. Murrell

For County and District Clerk:

Prebble Durham

For Commissioner, Precinct, No 1:

R. T. Foster

For Commissioner Precinct No. 2:

C. A. Bowen

For Commissioner, Precinct No. 3

W. G. Welch

For Commissioner Precinct No. 4:

BANK GROUPS MAKE NATIONWIDE SURVEY

American and State Banking
Associations Collaborate
in Investigation

LOAN SERVICES STUDIED

Activities of the Government in
the Banking Field Are
Reviewed and Position of
Banks Analyzed

NEW YORK.—Detailed bank researches, covering all phases of practical operating and economic facts and conditions related to banking, are being made by the American Bankers Association. The resulting material is being placed at the disposal of all state banking associations, which in many instances are extending the researches of the national association in their own states. These activities are said to be a part of the general program of banking development which is being carried on by the organized banking business.

Among the most extensive researches being conducted by the American Bankers Association is that of its Committee on Banking Studies, which is making a detailed survey of Federal Government lending agencies and policies. The basic material, which is kept up to date by continuing studies, shows where the Government agencies get the money they lend, what liability the Government assumes, what subsidy it extends, what return it gets, for what and to whom the money goes and on what terms it is loaned.

The Government in Banking

"It is not the intention of the committee to express its viewpoint about any agency," says the foreword to this material. "Its intention is only to determine the facts. These facts properly assembled and presented should help banks to meet Government competition if and where it exists. The committee believes the Government entered the lending field at a critical period in order to aid banks and financial institutions. If the time has come for the Government to withdraw, it is the duty of bankers to demonstrate their readiness to take care of all sound credit needs."

It adds that the banks must be equipped with full factual material as to the Government's emergency lending activities and practices, and that full cooperation has been given the committee by Government agencies in obtaining facts. Binders of the material gathered have been placed by the committee in the hands of state associations.

Investigation of Postal Savings

The Committee on Banking Studies has also made a survey of the Postal Savings System throughout the United States to ascertain to what extent it is competing with chartered banks. Questionnaires were sent to banks in all places where Postal Savings depositories are operated and their answers will be analyzed as a basis for the committee's findings.

The Bank Management Commission of the American Bankers Association has made a nation-wide survey covering the movement among banks to increase their earning abilities "through fair and legitimate rates for services they render their depositors." It has developed a plan of account analysis as a basis of fair charges.

"All business in order to justify its existence is founded on the economic principle that a reasonable return should be expected from services rendered," the commission says.

Personal Income Loans

The Bank Management Commission has also formulated methods for installing and operating personal income loan departments in banks. "This plan contemplates making loans primarily to individuals and small business concerns, based upon the character and assured incomes of the borrowers, as distinguished from the usual basis for commercial loans," the commission says.

It points out that a large part of the population is not now making use of available bank credit and that "to these people the personal loan department extends a valuable service which at the same time is profitable to the bank." It adds that it is "the duty of the banks to educate the public to come to the bank for all financial services. Small borrowers should be informed that the local bank is willing to care for their demands."

Other Researches

Other researches are being made by the Economic Policy Commission of the association dealing with shrinkages in liquid commercial loans caused by economic changes in the nation's business methods while the National Bank Division has made studies of the lending and investment powers of this class of bank, the present status of the real estate investment field and of detailed data by states on earnings and expenses.

The Savings Division has gathered the facts showing savings in banks of

all types, the number of savings depositors, the per capita savings for the country as a whole and the effects of current economic and social changes upon the savings habits of the American people.

The association's State Bank Division has issued the most recent figures available as to the detailed conditions of state banks, showing steady improvement in the position of the state banks, with marked expansion in their aggregate resources, while the Trust Division has compiled a guide to fees with a recommended cost accounting system.

Home Economics Classes' Activities

Friday afternoon Miss Abernathy took all three of the Home Economics classes to visit three of the home projects, that were completed in the summer. The home projects that we visited were Maxine Tweedle Louise Atkinson and Vinnie Fred Dearen's.

Maxine's home project was the planning of her summer wardrobe. In this project she made over several dresses and made about nine new ones. All were wash dresses except one silk. The total cost of her home project was around twelve dollars.

Louise's home project was to rearrange some of the rooms in her home. She re-arranged the furniture in the living room and also the pictures on the wall. She also made new curtains for the breakfast room. The material she selected gave the room more color. In the back bedroom she had the room repapered. The paper selected gave more light in the room. Curtains were selected to match the green in the wall paper, and a bed spread was selected to match the curtains. Louise re-painted the linoleum that was on the floor. First she put a coat of tan paint on the rug; then dipping a sponge in green, brown and purple paint she dabbed it here and there. The rug looked very nice and blended in nicely with the wall paper and curtains. Louise's home project cost around ten or twelve dollars.

We visited Vinnie Fred's home project last. It was the canning of peas, beans, tomato juice, tomato catsup, a tomato relish, chou chou, wild plums, tame plums and peaches. She already had the jars and she bought the lids and the peaches. All together Vinnie Fred canned around 138 jars of different things. The total cost of this home project was around six dollars.

These home projects were very nice. The girls did a lot of work on them. Many other worthwhile projects were completed during the summer, but we were unable to visit all of them because of the limited time.—Violet Onstott

On Tuesday afternoon Miss Abernathy took all of the Home Economics girls to the West Texas Utilities Cooking School.

The school was conducted by Mrs. Yates and Miss Hawking in the basement of the Methodist Church.

Mrs. Yates prepared an oven meal which consisted of scalloped tomatoes, cured ham, English peas, and cherry cobbler. The ham was cooked with 1/2 cup of honey, a dash of cloves and a garlic button.

The meal cooked in the thrift cooker consisted of the Arabian Stew. It consisted of six small pork chops, uncooked rice, green peppers, tomatoes and onions.

The grill consisted of tomatoes stuffed with baby limas, hamburger patties, sausage and steamed tomatoes. It was cooked in the oven at 350 F. with the door about half closed.

Mrs. Yates also did some surface cooking which consisted of boiled eggs and the steamed potatoes.

She also made some pastry, Banana Bundles, Salad Bowl, French

Dressing, Policy Stew and Rio Grande Milk Sherbet.

We learned how to be economical with electric current, what kind of utensils to use on electric stoves and how to use the thrift cooker. The calrod unit give better results than the coil units, they last longer and one can keep them cleaner.

I enjoyed the cooking school very much and hope to attend again sometime.—Violet Onstott

A Double Rescue

The double rescue made by Richard (Slim) Sturgeon, negro, during the flood here, was forced on him, but he did not fail in his task.

The negro heard women screaming from a house on West 11th St., inundated by water, and he swam the block to find a negro woman and her daughter trapped by water over their heads. He intended to make two trips but when he neared the

house the two women fastened themselves about his neck and so he swam, he said.

"They wasn't anything fo' me to do but swim, so Ah swam," he said. "When Ah got close enough to the house for 'em to land, they jumped, and there Ah was." Water was up to the women's necks in the house and more than 20 feet deep outside when the rescue was made, Slim said. The water reached a depth of 35 feet at that spot. The two women were Virginia Foster and her daughter, Addie Marie Foster. The rescue was made in the 400 block.

"Slim," a six-foot-three, 230 pound negro, is a piano mover for the Bearden-Steel Piano Co.—San Angelo Standard

Mr. and Mrs. Aaron Carpenter have moved to Pagosa Springs, Colorado, where they will make their future home.

Santa Fe Still Out

During the flood of last week, the Sterling City branch of the Santa Fe was put out of commission. It has now been over a week since a train has come to Sterling City. The bridges across Cox Hollow, Walnut, Grape, Mule and Dry Creeks are all put out of commission.

W. E. Maxon, vice-president and general manager, announced last Tuesday at San Angelo, that materials were being rushed, and that repairs to the bridges would be made in the shortest possible time. But it may be several days yet before we have a train into Sterling City.

Otto Brockman of San Antonio is visiting Mr. and Mrs. Ben Findt. Mrs. Findt is Mr. Brockman's niece.

THE PEOPLE'S

Choice

JOIN the ranks of modern women who have declared themselves for Electric Cookery. Enjoy the cleanliness, speed, coolness, economy and better results brought to women by Hotpoint's new Electric Ranges.

A million and a half American homes now prepare their meals the modern electric way.

Come in today and learn how easily you can own one of these new Hotpoint Electric Ranges, the symbol of the modern home.

HOTPOINT CALROD

What Mazda means to light, Calrod means to cookery. Calrod is the name given to Hotpoint's hi-speed sealed-in-metal cooking coil which has revolutionized electric cookery. It brings new speed, new cleanliness and new economy to the kitchen.

THRIFT COOKER

Economical. Uses only about as much current as the kitchen light. Cooks an entire meal of meat, vegetables, dessert—or bakes small quantities, like a few potatoes, without need for heating up the oven.

THE CAMBRIDGE—A New Hotpoint Electric Range. All porcelain enamel with chromium trim. Table-top model. Full size oven. Spacious storage drawer. Calrod units and Thrift Cooker.

LIBERAL TRADE-IN
LOW DOWN PAYMENT
EASY MONTHLY TERMS

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule . . . and adds only a small amount to your total bill?
