Marvin L. Martin, 41, Dies In Rig Accident

Marvin Louis Martin, 41, was fatally injured last Friday in an oil rig accident 4 1/2 miles southwest of Midland. A line broke as drill pipe was being set and the tongs hit him, knocking him into the railing. The accident happened at 12:30 and he died in a Midland hospital at 9:00 that night.

Funeral services were held here Sunday afternoon from the First Methodist Church at 3:00 o'clock. Rev. H. L. Bloodworth of Silver and Rev. W. J. Weimer of Sterling City officiated. Burial followed in the Foster Cemetery here.

Martin was employed by the Hall & Stewart Drilling Co. Members of his drilling crew acted as pallbearers, including Don L. Davis, Burnan and Bois Strickland of Midland, Quillah McKeehan and Joe Hale of Odessa.

Born in Moran on January 18, 1910, Martin is survived by the widow; two sons, Don and Thomas; his parents, Mr. and Mrs. R. E. Martin of Sterling; three sisters, Mrs. Alta Gartman of Sanco, Mrs. Opal Griffin of Corpus Christi, and Mrs. Fay Keesee of Bakersfield; and three brothers, Jake, Levi, and Roy all of Sterling City.

WIMODSAUSIS CLUB

The Wimodausis Club met on Wednesday afternoon of this week in the Community Center with 22 members present and three guests.

An official call was read from the district president for the district convention which will be held in Junction April 5-6-7. Also a call was read from the General Federation of Women's Clubs to a meeting to be held in Houston May 14-19.

Observing St. Patrick's Day, an Irish party was held. The roll call was Irish jokes.

Mrs. T. S. Foster discussed "The Origin of St. Patrick's Day." "Songs of Ireland" were told by Mrs. W. L. Foster, Jr., An Irish Jig was given by Ginger Lane and Harry Blaneck, accompanied at the piano by Mrs. Bill Barbee. Mrs. Kenneth Garms gave "Irish Jokes."

Refreshments of Irish punch and angel food cake were served by the following hostesses: Mrs. W. R. Morgan, Mrs. H. D. Glass, Mrs. H. A. Chapple, and Mrs. R. C. Bynum.

School Out for Easter Holidays

The Sterling schools were turned out shortly after noon on Thursday for the Easter holidays. Classes will be resumed on next Tuesday it was announced.

Joe Emery, now of Evant, spent the latter part of last week in the Shannon Hospital in San Angelo getting a check-up.

Miss Ethel Foster Named To Tech Foundation

LUBBOCK, March — Miss Ethel Foster of Sterling City is one of three women named to the Foundation of Texas Tech. The others are Mrs. Anson Clark of Oklahoma City, and Mrs. Effie Wilson of Lubbock and are the first women named to the Foundation which now numbers 17 persons.

Announcement of the appointment was made Saturday by C. T. McLaughlin of Snyder, chairman of the Foundation.

Miss Foster has been linked with women's club work for many years, extending from local to national scope. She is past president of the Texas Federation of Women's Clubs and now serves as budget chairman of the executive committee of the General Federation of Women's Clubs.

A member of the Texas Safety Association Commission, Miss Foster served on the State War Chest as a member, as member of the 36th Division Memorial Commission, a member of the state post-war planning commission, and on the State Infantile Paralysis Drive, and as a district commander in the Cancer Society of Texas. In 1945 she was named most outstanding citizen of Sterling County.

She formerly served as organist at the First Methodist Church here and is a member of the Sterling County Veterans Advisory Board. She has ranching interests in Sterling County.

Ray Willoughby, San Angelo, only member of the Foundation from this area, explained the function of the Foundation as being of an advisory nature. It meets with the directors of Texas Tech and aids in formulating policy with regard to curriculum and athletics.

"It is not on a par with the directors," Willoughby said, "but functions next under them."

Family Dinner At The Collins Home

Thirty-two were seated at a recent family dinner in the Claude Collins home here.

Other than the host family here, present were Dr. and Mrs. Elliott Mendenhall of Dallas, Mr. and Mrs. Ralph Collins of Roscoe, Mr. and Mrs. Claude Collins, Jr., Carolyn and Jimmie, Mr. and Mrs. Tom Collins, Mr. and Mrs. O. D. Collins, and Mr. and Mrs. F. E. Davidson, all of San Angelo, Mr. and Mrs. Tom Collins, Tom, Joe and Sally of Pecos, Mr. and Mrs. C. W. B. Collins, Mr. and Mrs. Cecil B. Collins, Mr. and Mrs. Bert Walker, Miss Ann Walker, Mr. and Mrs. Henry Meadows, Jr., all of Fort Worth.

Our WASHINGTON Letter

FOREBODINGS OF ECONOMY on non-essentials by the present Congress were seen by some observers in House skirmishes on bills voted on last week.

The House voted against a Reorganization measure which would have cut from 60 to 25 days the time during which the House or Senate could approve or disapprove emergency reorganization plans submitted by the President under the Hoover Commission program. I voted with a majority in defeating the proposal. It was felt the Executive already has ample powers in that regard and that the present emergency does not justify a change in the existing law. As one man put it: "Ah, emergency, what sins are committed in thy name!"

The President's plan to reorganize the RFC along the line of Hoover Commission recommendations was approved. It would place responsibility for the administration in RFC in one head instead of the present divided authority. In addition, it would set up a Loan Policy Board to determine general RFC policies on granting loans, and a Review Policy Board would screen applications for loans in excess of \$100,000. I voted for this plan, although it is hoped we may later have a chance to vote on liquidation of RFC—which I favor.

The Reconstruction Finance Corporation was created as a depression agency and served a good purpose for a long time, but with little cost to the taxpayers. But more recently evidence of loans being obtained in Washington through influence peddlers rather than on sound banking principles has been exposed, and justification for the continued life of the agency has been brought into question. Actually most individuals and concerns can now obtain needed loans, if they are justified, from banks and other private lending agencies. So here's another way to economize on a non-essential project. Essential RFC functions could easily be transferred to other government lending agencies.

THE THIRD BILL voted on last week—a Defense Housing measure—was rejected by the House. It was so drawn that much non-essential spending and waste could conceivably have resulted, estimated to cost up to three billion dollars. The bill would have permitted the President to have designated any area he might choose, without justifying reasons, as a defense housing area and permit the Government to go into those places and build houses, streets, sewer systems, recreational facilities, hospitals, day care centers, schools and everything that is needed in a community. The sky would be the limit on where, when and how much Uncle Sam could spend on such projects. I voted with a majority in disapproving this vast spending proposal. Another housing bill to meet any actual unfilled defense area needs is now under study by the committee which reported the measure that was defeated.

IF FREIGHT AND TRAVEL volume serve as a barometer of the expansion of our economy, Dr. Walter W. M. Splawn, the Texan on the Interstate Commerce Commission, told a dramatic story in a few words and figures when he spoke to the Texas delegation luncheon last week. From 1939 to 1949 the ton miles of freight moved in this country jumped from 527 billion tons to 870 billion. In trucks alone it skyrocketed from 445 to 94 billion. Bus travel went from five to 20 billion ton miles from 1939 to 1949. The biggest gain, though, was noted in airway travel when the 1949 volume exceeded the 1939 figure six-fold. It jumped from six billion ton miles in 1949 to eight billion last year, and is still zooming.

Speaking of Dr. Splawn, he is a former President of Texas University and has served for around two decades on the ICC. Widely regarded as one of the Nation's leading

But It's True

authorities on transportation, he is every bit a Texan and numbers personal friends and admirers by the thousands. Speaker Sam Rayburn eulogized Dr. Splawn as the man whose views have for years been the most respected on Capitol Hill on subjects pertaining to his specialty.

IN WASHINGTON TO CONFER with Pentagon officials last week regarding the availability of Laughlin Field as a training center by the Air Force were John Dodson, Jr., Roger Wheeler, L. B. Duke and Philip Ricks. En route here the Del Rioans ran into plenty of rain and fog which would have looked a lot better to them in Texas. They were forced to park their plane in Louisville, Ky., and proceed the rest of the way by train.

Laughlin Field, used as a bombardier training center during the last war, is still owned by the Government. It is estimated that six million dollars' worth of concrete and utilities are intact and in good condition on the field.

HEALTH TALKS

Prepared by the State Medical Association of Texas

Everyone has germs, of course, various assortments of vegetable and animal life scattered about the body, inside and out. As long as those germs stay at a certain population and behave themselves properly, they add to your growth, energy and well-being.

When they get out of line, either because they multiply too fast or the bad germs bat down the good ones, you are likely to end up with an infectious disease. And it usually runs a set course, lasting a certain time, and is capable of spreading to others for a certain length of time.

Some people catch the germs which thrive in or on them but never cause the disease to develop. Such a person was the now-famous Typhoid Mary who was able to spread typhoid though she never developed typhoid herself. Many other people did from contact with her "germ" and finally she was discovered as the source of many cases of typhoid.

She wasn't aware of her ability to spread the disease until it was proved to her and she was limited thereafter in her contacts with people, as all typhoid carriers are today; they are not permitted to prepare food and drink for anyone except themselves or to work in places where food and drink are handled. With certain other limitations, carriers are able to go about their normal routine of living without having to be isolated completely.

Leprosy and tuberculosis do require isolation, however, until the ability to pass the infection is gone.

Other diseases require definite periods of isolation in order to prevent the spread of the illness to others. Typhoid fever is considered catching for at least three weeks after the disease develops; diphtheria may be passed on to someone else for about 14 days after it shows up; and among the many diseases which are thought catching for the first week after the signs of the ailment are obvious are anthrax, dengue fever, sleeping sickness, glanders, measles, mumps, Bubonic plague, polio, parrot fever, scarlet fever, meningitis, smallpox, granulated eyelids, typhus fever and

MRS. ALVIE COLE IS NORATADATA HOSTESS

The Noratadata Club members met on Thursday night of last week at the home of Mrs. Alvie Cole. The hostess served a dinner to five tables of bridge.

Mrs. Worth B. Durham presided for the business session at which the annual club donations were voted on, and the convention delegate to Junction was discussed.

Mrs. Garlyn Hoffman and Mrs. G. C. Murrell were in charge of a Texas Day program, concluded by singing "Texas, Our Texas," in unison.

In bridge, Mrs. G. C. Murrell won high prize, Mrs. Reynolds Foster, consolation, and table cuts went to Mrs. Chesley McDonald, Mrs. Arthur Fields, Mrs. Finis Westbrook, Mrs. Hubert Williams and Mrs. Anna Lee Johnson.

Others present were Mrs. Ewing McEntire, Mrs. Neal J. Reed, Mrs. Martin C. Reed, Mrs. William Foster, Mrs. Fred Allen, Mrs. Bill J. Cole, Mrs. J. S. Augustine, Mrs. J. Q. Foster, Miss Sue Nelson, Mrs. Dayton Barrett, and Mrs. Ross Foster, members, and Mrs. Alvin Kilpatrick, Mrs. Arthur Fields, and Mrs. W. B. Atkinson, guests.

whooping cough.

You have the germs that cause those diseases in your body for some time before you come down with the illness, of course, and during that incubation period you are also able to pass the disease to some one else. That is the reason that public gatherings are banned when any bad disease seems to be spreading.

The public health officials can tell when a disease is likely to become an epidemic because each county is required to report the number of cases of a long list of diseases each week. The officials keep check on the numbers reported and when some certain diseases seem to be getting out of hand, they find the source where possible, whether it be a person, animal, water, food or what.

Different types of germs cause different diseases and sometimes the study of the germ which caused the disease will lead to the discovery of the origin of the disease. Bacteria are the plant-like germs which are part of mankind and protozoa are the animal-like germs. They may both be very good for you for some function of your body or they may be very bad, interfering with proper function.

The different kinds of bacteria may be seen with a microscope, telling the doctor what kind of germ is likely doing to be the damage. The oval-shaped germs are called cocci, the rod-shaped germs are called bacilli, and the cork-screw-shaped germs are called spirillas. They each work in different ways and they each require a different type of medicine to help get them back in line.

The cocci germs, those oval ones, also have different habits among themselves. The streptococci germs line up one after the other, forming chains to do their work. The staphylococci germs cluster around each other like a bunch of grapes, the most common picture of these "staph" germs being the plain old boil.

THE AMERICAN WAY

Booby Trap

Body Temperature Of 64 Degrees

CHICAGO, ILL. — A 23-year-old woman Mrs. Dorothy Mae Stevens, (in bed), found frozen stiff, is still alive despite the fact that her body temperature, when she was brought in to the hospital, was but 64 degrees. Her condition on arrival was described as "similar to rigor mortis." Dr. May Ann Silverman checks a 12-inch special thermometer, as Dr. Norman Sherman, (center), and nurse Charlotte Harbrecht look on. The reading is possibly the lowest ever recorded on the human body.

"Covering the County"

By Gariyn Hoffman, Co. Agent.

Being as all shows are over and the 4-H Club boys have sold all their livestock, most everyone would like to know how much the boys made from their animals. There were twenty-two different boys carrying on feeding demonstrations. Most of them were feeding lambs.

There were four calves fed out by Billy Humble and O.F. Carper. Billy's Calves were first weighed May 22, 1950 and last weighed Feb. 28, 1951. His two calves gained 1251 pounds. One was milkfed and the other dry. Billy's calves brought a total of \$898.10. O. F. Carper's calves were weighed September 1, 1950 and last weighed March 6, 1951. His calves gained 1022 pounds and were both dry lot. O.F.'s calves brought a total of \$807.90.

The ninety-nine lambs gained a total of 3770 pounds. Most lambs were put on feed September 25, 1950. They brought \$5,054.00. The

lambs that sold through the San Angelo sale averaged 58c per pound. Martin C. Reed Wool Warehouse, Sterling Motor Co., Chapple Grocery, Riley King, Forrest Foster, and Chesley McDonald were the ones responsible for the lambs selling as they did. The boys are indebted to these local people.

Boots Williams and Martin Reed sold the feed to the boys at cost which really does add up to a lot of extra profit at the end of the feeding period. Also, Ralph Bynum let the boys have oats at a reduced price, and Mrs. Grosshans took off on each bale of the hay that was fed.

Several of the ranchers carried the lambs until after the sales. This enables the boy to go into the feeding period with no actual expense and encourages him to do a better job.

Alvin Lawson donated his truck to haul the stock to San Angelo. This was very helpful to the boys, and in the long run made them realize more money from their

stock.

John Reed donated his pick-up to the club to haul hay and feed to each of the shows. Boots Williams loaned his trailer.

Everyone that contributed to the boys show helped us to the completion of a successful club year. The success of the 4-H Club lies within the hands of the local people and the energetic work of each boy.

The Horse Show has been set for June 2, 1951. Every horse breeder should begin getting his animals in

shape. Trophies for grand and reserve champions will be given. A small trophy for each first place winner in each class will also be given. Everyone still has an even chance for a trophy.

The Rodeo Committee has tentatively set the night of June 2 as a jackpot roping and a girls barrel race. The roping will begin at 7:30 or 8:00 p.m.

KUDER PREFERENCE TESTS GIVEN TO LOCAL STUDENTS

The guidance service for high school graduates provided by San Angelo College includes the Kuder Preference Test which was given without expense to the Sterling City High School graduates Thursday, March 22.

As a follow-up and personal counselling service, the San Angelo College will send a team consisting of Mrs. Madeline Berry and R. B. Dooley who will talk with each student on an individual basis. Mrs. Berry and Mr. Dooley will present the graph showing the results of the test and discuss with each boy and girl the meaning of the test and the use each student can make of the evident preference shown. This team will be in Sterling City High School Wednesday, March 28.

This test is not in any sense an intelligence test or a trial of skills, it is simply to emphasize the interests and preferences which are so important to every young person in mapping his career.

Mrs. Madeline Berry, who will counsel with the girls, is Librarian at the College. She is a native of West Texas, and graduated from High School at Sterling City. She received her B.S. degree in Education from the University of Texas. She has done post-graduate work at the University of Colorado, Texas State College for Women, and T.C. U. Her M.A. degree is from the University of Arizona, and her B. L. S. degree is from the University of Southern California.

Mrs. Berry has worked in various libraries and supervised amateur theater work, directed sports and sponsored girls organizations.

R. B. Dooley, who will counsel with the boys, was graduated from the Ireland, Texas High School. He attended John Tarleton State College and was graduated from Texas A.&M. College. He has a B.S. degree with a major in agriculture and a minor in agronomy and a Master of Science degree with a major in agricultural education and a minor in poultry.

High school teaching and one year as Assistant Professor of Agricultural Education at A.&M. have kept Dooley busy since discharge from military service as a Captain.

Mr. Dooley is in charge of the department of agriculture at San Angelo College.

Accident Victim Dies After Two Years

Joan Edwards, victim of a traffic accident two years ago on an icy road between Midland and Odessa, died Wednesday of this week at her home in Rankin. She had been in a coma since the accident and no treatment seemed to help her condition. A brain injury left her entirely helpless, even to losing the ability to speak. She was the daughter of Mr. and Mrs. M. J. Edwards of Rankin and was employed by the Midland Reporter-Telegram at the time of the accident.

HADACOL Is Requested By Nurses

HADACOL Helps Folks Suffering Deficiencies of Vitamins B₁, B₂, Niacin and Iron.

Registered nurses, in increasing numbers are showing a keen interest in HADACOL and in the results that are being secured with this great modern formula. Requests have been received from many of these nurses for professional samples of HADACOL and many of them indicated that they recommend the HADACOL formula to patients who are deficient in Vitamins B₁, B₂, Iron and Niacin.

Mrs. L. D. Lovett, a registered nurse who lives at 2205 Walnut St., Philadelphia 3, Pennsylvania, says this about HADACOL:

"I was down in Florida for the past month. I had no energy so several members of my family told me to try a bottle of HADACOL. My sister, who is a nurse, was taking a bottle so I tried a bottle. I feel fine since taking HADACOL. I do private duty here. I am 50 years old."

HADACOL can help you if you suffer such deficiencies. Ask your druggist for HADACOL today. Only HADACOL gives you that "Wonderful HADACOL feeling."

New Tire For Military Vehicles

AKRON — Here's what the well-dressed military vehicle will wear this year. These new "high flotation" tires, among the first to roll off B. F. Goodrich production lines here, are designed to help keep military vehicles from bogging down in mud or sand.

Features are low pressure operation and a special tread, outgrowth of wartime experience with tires designed for desert service. With air pressure lowered, the high flotation tire presents a broader base at ground contact than does the conventional military truck tire. When air pressure is increased to normal the tire performs on paved roads like conventional military tires.

**FORD
 WINS AGAIN!**

**V-8 TAKES FIRST PLACE IN CLASS "A"
 1951 MOBILGAS ECONOMY RUN**

Both Ford V-8
 and SIX Deliver
 more than 25.9
 miles per gallon

Gruelling
 840-mile test
 proves Ford
 Economy

Again this year... it's high honors for Ford! In the most important economy trial for American stock model cars... the famous annual Mobilgas Economy Run... A Ford 100-h.p. V-8 equipped with Overdrive took first place competing against all cars in its price class, making 54.587 ton-miles per gallon* and 25.994 miles per gallon. And its companion in quality, the new Ford SIX with Overdrive, was right up there with the winner. In fact, both cars averaged better than 25.9 miles per gallon.

Traditional Ford economy, for the second straight year, has been proved in open competition. Proved on the tough 840-mile grind from Los Angeles to the Grand Canyon... a course that included city traffic, below-sea-level desert heat and 7,000-foot mountain passes. Ford's Automatic Mileage Maker, standard equipment on all Ford V-8's and SIXES, contributed to this great achievement by squeezing the last mile out of every drop of gasoline.

Why not "Test Drive" the new Ford at your neighborhood Ford Dealer's? There's no better way to be convinced that "You can pay more but you can't buy better!"

*The AAA Contest Board determines the winner by a "ton-mile per gallon" formula to insure equal chance for all cars in each class regardless of size and weight. Ton-miles per gallon equals the car weight (including passengers) in tons, multiplied by number of miles travelled, divided by number of gallons of gasoline consumed.
