## Dessert Doctor

By Betty Barclay

When it's minutes to dinner and you suddenly remember "no dessert!", the best remedy we know is

Quick Chocolate Sauce, cooking time, four minutes! Here's a recipe to memorize or to cook in quantity and keep on hand in the refrigerator. A rich, delicious chocolate sauce,

poured over ice cream, ready-made cakes, puddings, etc., makes a glamorous dessert in no time at all, and with no trouble at all. It can do wonders for desserts that are too familiar, giving a luscious lift to any family meal—so why reserve it for special occasions? Every good dinner deserves a just dessert, and there's hardly an excuse when it's as easy to fix as this.

### Quick Chocolate Sauce

1 cup sweet cocoa mix; dash of salt; 1 1/2 cups hot water; 2 table-spoons butter.

Combine cocoa mix and salt in saucepan. Add water. Place over medium heat, bring to a boil, and boil 4 minutes, stirring constantly. Remove from heat, add butter and mix until smooth. Cool and serve as sauce on ice cream. Makes 1 1/2 cups.

**Narrow Town—Broad Outlook**

The wife's cousin Ben, and Belle his bride are back from honeymooning in the Rockies. Took them to dinner last night at the Garden Tavern. Ben told about the trip:

"Went through a town in Idaho that was only 100 feet wide. No kidding! Built into a long, narrow canyon. And it shares those 100 feet with a railroad track that runs right through the hotel!"

"To get gas there we had to park right on the tracks. Suddenly Belle screams—'there's a train coming!' But the gas fellow just laughs and says we were there

first. Blamed if the engineer didn't stop the train and wait, too!"

From where I sit, it's a good illustration of how people can learn to "think of the other fellow" so that the community benefits. Railroaders and townspeople, Democrats and Republicans, malted milk fanciers and those who prefer a temperate glass of beer—we all have to share the same space. Let's maintain our neighbor's "right of way."

Production for Freedom Week—September 7-13

**Electric Power**

**PRODUCTION FOR FREEDOM**

America must produce more and more to stay free! And the key to that vital production is an abundance of electric power. With only six per cent of the world's population and only a small fraction of the world's natural resources, American workers . . . utilizing enormous quantities of electrical energy . . . produce nearly half the world's goods.

That abundance of electrical power is provided by the heavily taxed, privately owned electric companies financed directly or indirectly by the savings of private citizens. Since 1945 those privately owned companies have spent \$10 billion to increase the nation's electric productive capacity 50 per cent; and in 1954 another \$8 billion will step up generating capacity 100 per cent.

Here in West Texas, your electric service company by 1953 will have increased its capacity for production 151 per cent since 1945. Yes, the privately owned electric companies have proved their ability to provide more . . . and more . . . and more *Electric Power for Production for Freedom.*

FOR ATHLETE'S FOOT A KERATOLYTIC IS A MUST. What is a keratolytic? An agent that deadens the infected skin. It then peels off, exposing more germs to its killing action. Get T-4-L, a keratolytic, at any drug store. If not pleased IN ONE HOUR, your 40c back. Today at LONG DRUG CO.

There's **NO** value like **Chevrolet** value!

...the lowest-priced line in its field!

Measure value by what you get for what you pay . . . and it's easy to see why more people buy Chevrolets than any other car.

For you get more with Chevrolet . . . fine quality features found in no other low-priced car. And yet you pay less . . . for Chevrolet is the lowest-priced line in the low-price field.

Today more and more people are looking for greater value in everything they buy. Come in and let us show you all the reasons why—in automobiles—there's no value like Chevrolet value.

(Continuation of standard equipment and trim illustrated is dependent on availability of material.)
