## Novel Egg Dispensing Device . . . . Helps Farmer Solve Production Problems

By IRA MILLER  
 Farm Electrification Bureau

There are two good ways for farmers to sell agricultural produce. One is to deliver it to nearby stores and have it sold for them over the counter. The other way is to attract customers to the farm where they can deal directly with their buying public.

When one way doesn't work, the other might. At least that is how one New Jersey poultryman thought about his sales problem.

Eggs weren't going so well at neighboring stores and he decided to do

something about it. His answer was a road-side "egg-o-mat"—a small building, heated in the winter and air-conditioned in the summer, where customers can buy eggs when they want them.

Medium, large and small sized eggs are stored by the dozen in cardboard boxes which fit snugly into the "egg-o-mat's" ceiling-high, square metal containers which look very much like narrow filing cabinets. Each time a customer puts the correct change in a slot in the proper cabinet, a door opens and out pops his box of eggs. The "egg-o-mat" even has an auto-

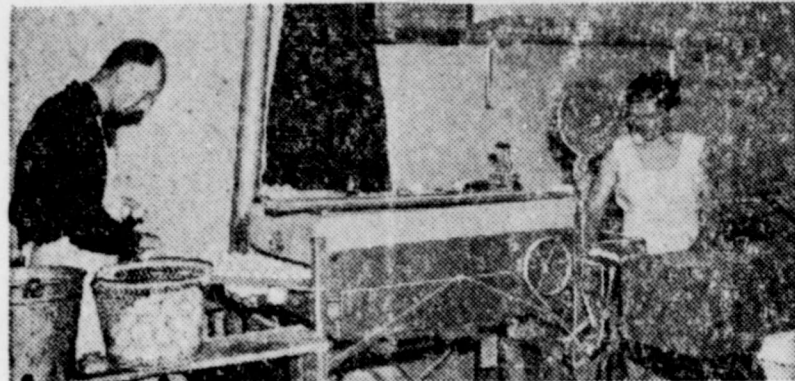

matic coin changer which enables customers to get out of each 50 cent piece inserted, the exact number of quarters, dimes and nickels needed for their respective purchases.

The "egg-o-mat" is located adjacent to this farmer's egg room. The egg processing building includes a room where the temperature and humidity are thermostatically con-

Right—view of roadside "egg-o-mat."

Below—farmer and wife working in "front office" of egg processing plant.

trolled for the proper storage of newly gathered eggs and a "front-office" for candling, grading, cleaning and packing eggs.

The farmer and his wife work in the "front office," providing a novel and most interesting behind-the-scenes look at a poultry farmer's job—an idea which helps attract customers to the road-side store. An added sales touch is the fact that this farmer's poultry houses are located directly back of the "front office" so customers can watch fresh eggs being brought into the processing room on their way to the "egg-o-mat."

Mr. and Mrs. Luther Hallmark visited the C. J. Dunns in Alpine and the Joe Pools in Fort Stockton during the holidays. Luke said he accidentally turned a button on his radio before he left and the thing came on at 5 p.m. the day they left and played all the time they were gone—evidently giving the empty house some Christmas carols during that time.
