NEWS OF ECOLOGY

PROGRESS REPORT: GIVING POLLUTION THE AIR

In the summer of 1928, thousands of weekenders and vacationers flocking to Lake Erie's sandy beaches found a strange and disturbing sight. Large areas of the lake, seemingly overnight, had become covered with a thick, green, evil-smelling carpet of scum.

Lake Erie, 42 years ago, had become one of the earliest victims of man-accelerated eutrophication—the stimulation of excessive algal growth. This is how it happened, and it is still happening all over America:

Waste materials dumped into the water stimulate algal growth by supplying an overabundance of the essential nutrients on which algae feed. When the algae die, they decay and form large masses on the surface of the water (called "mats" or "blooms"), which are vile-smelling and which foul the surface of the lakes and inundate the shore. The decay process uses up much of the oxygen dissolved in the water, making it unsuitable for many forms of aquatic life, like game and commercial fish.

Though eutrophication is a normal, and very slow, occurrence in nature, it is greatly accelerated by the unchecked introduction of the raw waste products of our society into our waters.

Though the long-term solution to this problem is a nationwide commitment to proper and complete sewage treatment, there exists today an effective intermediary means of improving water quality. Formerly polluted lakes have already been successfully reclaimed by aeration.

This man-made nature's aid has proven itself in bodies of water ranging in size from one-acre ponds to a 3 1/2 mile long, 140-foot deep reservoir and has been employed on portions of major U.S. rivers such as the Passaic and Delaware.

In the past, it was widely believed that by limiting the supply of the 15 to 20 different nutrient elements that algae feed on, effective eutrophication controls could be established. Phosphorus, in particular, was the element thought to be the easiest to control. It was even suggested that phosphates be removed from household detergents, in an effort to minimize algal growth.

It was later discovered, however, that even if it were possible to completely eliminate phosphorus input into Lake Erie, phosphates already deposited in the bottom sediments could still support algal growth for at least another 100 years. Therefore, the removal of phosphates from detergents as a "first step" would be no step at all in solving the eutrophication problem.

The American people need and deserve action—effective action—in the protection and restoration of water purity, and the key fact about aeration as an immediate answer is that it works.

U.S. Border Patrol Seeks Applicants

The U.S. Border Patrol of the Immigration and Naturalization Service has an urgent need for physically fit young men desiring a career in Federal law enforcement work. This is a career opportunity for those who like action and outdoor work.

The Border Patrol is the mobile, uniformed enforcement branch of the Immigration and Naturalization Service. Its principle purpose is to prevent the smuggling and illegal entry of aliens into the United States. The border patrolmen, called Immigration Patrol Inspectors, work along international boundaries, although their duties are not necessarily confined to these areas. They work in jeeps, cars, on foot, in boats and even in airplanes. Officers investigate violations of the immigration laws and frequently make arrests. They are often required to work irregular hours, under all weather conditions. These duties demand mental alertness as well as exceptional physical vigor and stamina.

The entrance salary of an Immigration Patrol Inspector is \$7,639 a year (Grade GS-7). There are promotional opportunities up to executive levels in the Immigration and Naturalization Service. On-the-job training offers splendid opportunities for promotion to positions of greater responsibility.

No experience is required for these positions. To qualify, applicants must pass a written test of verbal abilities, judgment, and aptitude for learning a foreign language. Candidates who pass the written test are called for oral interviews in the order of their standing on the list. The oral interview is designed to determine if the candidate has the personal qualities needed for the work. Applicants must also pass a rigid physical examination. Candidates who are selected for appointment are assigned to the Border Patrol Academy for a period of intensive training in such subjects as immigration laws, Spanish, physical training and marksmanship. Trainees receive full pay while in the academy.

Applications are now being accepted for the civil service examination for Immigration Patrol Inspector which will be held on Saturday, January 24, 1970. An additional examination is scheduled for April, 1970. However, those wishing to be tested in January must submit their applications before December 19, 1969. Full information is given in Announcement No. WAM-911 which may be secured from Interagency Boards of Examiners and from many post offices as well as any office of the Immigration and Naturalization Service. Applications should be submitted on the tearout application form on the announcement or CSC Form 50000AB and forwarded to the Interagency Board of U. S. Civil Service Examiners for Washington, D.C. 1900 E St., N.W., Washington, D.C. 20415.

Information concerning the patrol inspector position and this announcement may be obtained from the U. S. Immigration and Naturalization Service, P. O. Box 2539, San Antonio, Texas 78206, or by calling 512-225-5511, Extension 214.

Social Security DISABLED WIDOWS BENEFITS
 "Two years have passed and many persons are still not aware of the change in the social security law which provides monthly benefits for disabled widows at age 50," said J. M. Talbot, social security manager.

Since the law became effective in February, 1938, more than 32,000 disabled widows have qualified for monthly payments, Mr. Talbot estimated however that another 30,000 widows who might qualify for these benefits have never applied.

"The requirements for disabled widows' benefits are apparently not as well known as those for the more familiar widows' benefits at age 62, or reduced widows' benefits at age 60," Mr. Talbot continued.

To qualify for benefits a widow, age 50 to 60, must have an impairment so severe that it keeps her from engaging in any work. The condition must also be expected to last for at least twelve months.

The widow's disability must have begun before her husband's death or not later than seven years after his death. A widow who has previously been entitled to benefits if she becomes disabled before payments to the children end or within seven years after they end.

Mr. Talbot encourages those who may qualify to call the Social Security Office at 3000 West Harris Avenue (P. O. Box 3808) in San Angelo, Texas or see the representative when he is in your area.

LOST MEDICARE CARD

Have you lost your Medicare card?
 Your Medicare card should be in your possession at all times, J.M. Talbot, social security manager, said today. It is your proof to your doctor and to the hospital that Medicare will help pay your medical bills. The doctor or hospital can tell at what point you became entitled to Medicare benefits, and whether you are entitled to payment for both your hospital and your doctor bills—if you show him the Medicare card.

Perhaps the most important function of your Medicare card is that it furnishes your own claim number to the doctor and to the hospital. Any claims for payment on your behalf must contain this complete number in order for Medicare to assist with the payment of the bills.

If you do lose your card, call or visit your nearest social security office, and a free duplicate card will be obtained for you. However, it will take about three weeks to get this duplicate, so make your request as soon as you realize that you have lost your original. The hospital can, if necessary, admit you without your Medicare card; but, you can avoid considerable difficulty if you secure a new card before you become ill and need it.

For further information, contact the Social Security Office at 3000 West Harris Ave. (P. O. Box 3808) in San Angelo, Texas, or see the representative when he is in your area.

Most bankruptcies result from management incompetence rather than fire, flood or other disasters. That's the finding of Dun & Bradstreet, since 1920 the only organization reporting on bankruptcies. A D & B spokesman adds that between 350,000 and 400,000 concerns have been discontinued annually.
