AROUND
THE
COUNTY
by

ARTHUR BARLEMANN, JR. COUNTY AGENT

The Sterling County 4-H Club Range and Pasture Grass Identification team that took part in the State 4-H Club Contest at College Station last week placed sixth. Team members were Amy Hodges, Jeff Cantrell, Russell Davis, and Steven Foster. They were accompanied by Mrs. Clinton Hodges and the county agent.

Team members were required to identify fifty range plants, give their season of growth, life span, and grazing values for wildlife and livestock. The fifty plants used were rather difficult to identify in many cases; the local team members did very well considering that three of them have had no previous experience in the contest.

Behind the 8-Ball

By the editor.

Surprised? Me, too. The paper is a day early. We always say, like the old saw, better late than never—or better early than late.

I need to be out of town for a couple of days or so, so the paper is a day early.

Will go to the Fort Worth-Dallas area and look around a bit.

Boy, that town is full up for this weekend. Due to Ex-107—a sort of religious convention of young folks—from all over. Almost could not get reservations there. I tried three popular ones with talks of full up and then got one from out of Fort Worth and due to a cancellation from some Ex-107 folks got it.

Too, there's always a lot of stuff going on in that area. Due to Six Flags, World of Animals, Lion Safari and the Seven Seas. Not to mention the Ranger Stadium and all that.

Nearly \$7 Million in Oil -- Gas Production Here in 1971

Sale of Sterling County oil and gas production accounted for \$6,814,608 of the county's economic output for 1971, according to a study by Texas Mid-Continent Oil & Gas Association.

In producing 1,718,325 barrels of crude oil and 5 billion cu. feet of natural gas, the county ranked 120 in Texas. Value of its crude oil was \$6,050,264; natural gas value was \$764,344.

The county is among 190 Texas counties with oil and gas production value topping \$100,000, although 211 counties produce oil and gas.

Sterling County oil and gas wells made a significant contribution to Texas' share of the nation's energy needs last year, but growing demand is sapping reserves in Texas faster than they can be replaced, Robert A. Buschman, Association president said. As fewer new fields are discovered, due to less drilling, the continuing strong economy and tax base of many Texas counties may now depend on updating Texas oil conservation laws to encourage wider use of new recovery technology, he said.

The Association study showed that Sterling County farmers, ranchers, and other royalty owners received \$851,826 as their share of production.

The county's wells generated \$278,312 in crude oil production taxes for state government and \$57,326 in state taxes on natural gas. Oil and gas producers spent \$1,547,010 in drilling 11 wells in the county last year, \$1,220,842 of which was lost in drilling 7 dry holes.

Texas Employment Commission figures showed 16 oil and gas industry employees in the county last year, with an annual payroll of \$54,856.

Spotlight on HEALTH

PROFILE OF A COLD VICTIM

What are your chances of catching a cold? According to a booklet on the subject, they're especially good if you're female, live in a large city in the western or north-eastern part of the U.S., and are the mother of a child under 6 years of age. Young children are the greatest cold-spreaders. Your chances are further enhanced if you're going through a period of stress and strain. "Contentment preserves one even from catching a cold," the great philosopher, Nietzsche once said.

The booklet, which discusses the common cold, is distributed by Winthrop Laboratories, the makers of Neo-Synephrine nose drops and nasal spray that are widely used in the U.S. and abroad.

Keeping up one's resistance helps to avoid the common cold, according to the publication, which advises getting sufficient fresh air and exercise, well-balanced meals, and as much sleep as possible in a well-ventilated bedroom. In cold weather areas, an extra hour a night is recommended.

Early stages of the common cold are the most contagious. Every sneeze fills the air with thousands of virus-laden droplets. To help

prevent spreading a cold to the rest of the family, to friends and to co-workers, everyone should have his own glass, cup, silverware and towels. Hands should be washed thoroughly and often, preferably with a liquid antibacterial skin cleanser, pHisoHex is the one that is used in most U.S. hospitals to help prevent spread of infections. Particularly during the cold season, it is wise to keep a handwashing preparation in the kitchen, as well as in the bathroom.

Your chances of catching a cold will be reduced if pre-

cautions are taken. However, the Winthrop booklet also states that it is not completely possible to avoid a cold. Just breathing the air that someone with a cold has merely talked into offers the possibility of infecting a healthy person.

LIONS CRIPPLED CHILDRENS' CAMP

Members of Lions Clubs throughout Texas this month are pausing to pay recognition to their camp for crippled children which has given over 12 thousand handicapped youngsters a new dimension since it was opened in 1953.

The camp, located at Kerrville in the Hill Country of Central Texas, is free to crippled, blind, deaf or mute children from the ages of seven through sixteen. The 17 permanent buildings and other improvements dotting the 504-hill-side acres represent an investment of more than \$700,000.

At the camp, these youngsters who have been denied a normal childhood through no fault of their own learn to shed their shyness imposed by their handicaps. By mutual association with other handicapped children and by skillful and gentle counseling, these youngsters have found the freedom to grow, mentally and spiritually, into useful citizens of tomorrow.

While the Lions are paying tribute to their camp, we would like to pay tribute to the Lions and their friends who have supported this great venture of the heart. We know a man never stands so straight as when he stoops to help a crippled child.

Social Security Tips

"Did you know that if you operate any type of agricultural business, the hired workers you have in that business may be covered by social security?" J. M. Talbot, social security manager, asks.

Any employee who works and earns \$150 or more for one employer during any year or works at least 20 days on a time basis for an agriculture business, is covered by social security. Even part-time employees could meet the earnings or work test. You, as their employer, would be liable to withhold social security tax from the employee's check, match that tax yourself, and report the earnings at the end of the year.

Worried about proving your age? J. M. Talbot, social security manager, said the people at your social security office may be able to help you make your claim. There are some things you can do ahead of time. If you were born in a state that kept birth records when you were born, write for your birth certificate. If the state where you were born wasn't keeping birth records at the time, the next best thing is a baptismal record.

If you were baptized before age 5, you'll be asked to find out if there is a record. If there is, it is all the proof of your age you'll need.

If you have no birth or baptismal record, the people working in the social security office will be happy to suggest some other possibilities. Some examples are an old family Bible, school records, and federal census records.

You may not recall now, but when you bought your marriage license you gave your age. You may also have some old insurance policies about the house. The list of proofs to try is quite long. When you file your claim, it helps if you have already fund the oldest thing you can that shows your age. Usually, the older the record the better it is for proving your age. It will help the people at the social security office pay your benefits sooner if you think ahead on your age.

Many times a telephone call before you visit the social security office will help. You may be able to file your claim by phone. Contact the Social Security Office at 3000 West Harris Avenue (P. O. Box 3808) in San Angelo, Texas, or see the representative when he is in your area. Persons who are unable to meet with him are encouraged to call the office in San Angelo at 949-4608.
