The Greenback movement has started out so cheerily, not a man has been...

Strawberries such a difference should be twisted down and twisted down; but Judge Ireland does not live in Hancock's district.

It is now said to be probable that Mr. Throckmorton will be elected to represent Collin county in the Legislature next winter.

The Galveston News, that regarded that Mr. Schleicher "was not in harmony with his people on the financial question," is the great champion of Hon. John Hancock for Congress.

There has not been an official report of a case of yellow fever nearer this place than New Orleans, nearly seven hundred miles, and the avenue leading to that place is closed guardedly.

ROBERT LINCOLN, son of the late President Lincoln, is mentioned as a Congressional aspirant in the First District of Illinois. Chicago is in this district, and it is one of the most important in the State.

It is said that during the process of counting in R. H. Hayes, Zach Chandler expended \$25,000 for the electoral commission, hotel bills, livery teams, etc. The Sun thinks that Hayes should pay this debt.

What is meant for the goose may be saved for the gander, but what is good for the people of one Congressional district is not good for the people of another Congressional district, unless John Ireland is sent to Congress.

In the politicians keep up their "democratic howl," much longer there is no certainty that the people of the whole country will not soon be in the condition of the unfortunate Lamb, whose strange conduct was noted in our dispatches of the 19th.

The Dallas Herald says exchange funds will please remember that the Memphis and New Orleans papers are on top of the pile. The Herald is badly fooled if it believes yellow fever has any tendency to interfere with the operations of the F. fraternally.

STANLEY MATTHEWS says Grant would carry out the policy of President Hayes to the very letter if re-elected President. The trouble with Stanley is, nobody believes him, and if they did he would not believe after such an assertion. It is too unreasonable.

Dr. AMERL SHUTE, Commissioner from this State to the Paris Exposition, writes: "I was interested to hear of the lion and bull fight at San Antonio, and I rejoiced in the victory of the bull. Would not a good West Texas bull be our best crest for the arms of Texas?"

STANLEY MATTHEWS is to be reported for contempt of Congress. For eighteen years the people have repeatedly expressed a contempt for Congress, and Congress, by its legislation, has punished them justly severely. By it, How Matthews is to suffer retribution to be seen.

It begins to look as though the State of Missouri, through its well-known "treasury ring," is out about \$1,000,000, its assets being a bond "not above suspicion" and \$400,000 in bonds of the Kansas City water works. The value of these bonds may be pretty closely arrived at when it is stated that \$950,000 were issued, based on works costing less than \$350,000.

The Austin Statesman says "Capt. John Bowden, the original hydro-dynamic philosopher of the Mississippi river, says he had yellow fever, and there being no doctor at hand he improvised, when the burning fever was on him, a vapor bath, enveloping himself in blankets and sitting over a tub of hot water for half an hour. His head was burning till perspiration flowed, and in half an hour, having taken half a glass of castor oil, he was sound and well, but debilitated. He treated and cured other cases in the same way."

The Herald is opposed to the resumption act, and Mr. Schleicher voted for it, and this is why the Herald is opposed to Mr. Schleicher. Thus strikes the San Antonio Herald, Judge Ireland's most blatant champion. John Hancock is in favor of the resumption of specie payment, and says "the best way to resume is to resume," and the San Antonio Herald says: "The action of the Bank convention in nominating John Hancock for Congress will be hailed with delight throughout the country." Hurrah for hurrah! And thus we go sounding down.

Forrester's department statistics show that the percentage of ordinary letters during the past fiscal year is only one-fifth of one per cent. As many as 343,642 packages of stamped envelopes and postcards, valued at \$26,325,829.47, and 41,811 packages of United States stamps, valued at \$138,147,010.45, were forwarded for the government without charge for registration. Out of the immense sum carried for the treasury not a penny was lost, and out of the amount carried for the Postoffice Department only two small packages of little value failed to reach their destination.

The little breeze of contention that has sprung up between the City Council and the physicians of the city is unfortunate, for it is certainly to the interest of the city that these gentlemen should all act in harmony when matters pertaining to the health of the city are concerned. There does not seem to be any sign of the yellow fever visiting the city if useful precautions are taken to prevent it. The Express favored giving the physicians the fullest power in the matter of looking after the sanitary condition of the city, believing the greatest good could be accomplished in that manner, but the Council declare they have no authority under the charter to grant the request of the physicians for plenary powers in the matter. But in whatever hands the matter of disinfected the city rests, not only the work will be prosecuted with vigor, but only as a precaution against yellow fever, but all other should strive to keep it so. It would be an accident should the dread plague reach us, but we cannot take too great precautions against such an accident, especially when the people all over the country are so exercised about the subject. Fifth will breed pestilence in any place; with our city in a thorough sanitary order no one would have the least fear of yellow fever reaching here, even in isolated cases, with the strict quarantine prevailing at nearly all the points between here and the stricken cities. We are free from all danger if our citizens take the precautions that should at all times be maintained against pestilence of any kind.

FOR THE VOTERS OF THE 5TH CONGRESSIONAL DISTRICT TO READ.

While Mr. Schleicher was at Washington, the general verdict among his constituents was that he was the most useful member of Congress this district ever had. His praises were heard every tongue, and not a word was heard except in his praise until he voted against the Island river bill. This brought censure from several newspapers of the district, but they, at the time, were nearly unanimous in declaring he should not be censured for this one act, especially as it was not one of party principle, but one about the wisdom of which there was a difference of opinion. Mr. Schleicher wanting the proposed new silver dollar to be worth 100 cents, while some of his constituents were willing to stop at 412 grains. His vote on this bill was the only objection of any kind heard against Mr. Schleicher until the present campaign was opened, and that was considered of little importance as against his services in direct behalf of his constituents. Thus the matter stood about the close of the last session of Congress.

But when the time came to make arrangements for electing a successor to Mr. Schleicher, what kind of a spectacle was presented? Judge Ireland, ever on the lookout for some office, determined to contest the seat with the present incumbent. He organized his forces, enlisted a few newspapers in his behalf, and then, finding nothing else on which to base an issue, raised the financial cry, and opened the battle. It is needless to repeat what has been said and done, further than to refer to the efforts made to convince the people that the financial crisis was not only past but that the people and no matter how good and pure a man might be, how faithful and efficient an officer in other respects, unless he entertained different views from Mr. Schleicher, unless, in fact, he was in effect a disbeliever, he should not be trusted, that because of what they termed his hard money views. Mr. Schleicher could be consigned to oblivion for all time to come as the friend of the hated bondholder and vampire capitalists, and that Judge Ireland, because he favored more money, no matter of what kind, should not be elected. This was the cry, and this the issue made by Ireland's friends in the convention. They claimed that they did not care for Ireland, but were opposed to any man entertaining the views held by Mr. Schleicher on the financial question.

Now, what the Express proposes to show, and to the satisfaction of every fair-minded man in the district, is that this question of finance has raised here simply because Judge Ireland had no other look on which to hang the least shadow of opposition, and that the opposition to Mr. Schleicher is based, not upon his position on the financial questions of the day, but upon the fact that he desired to elect his present opponent. That it is a personal fight on the part of Judge Ireland's friends to place him in Congress for his own aggrandizement and their own, and that no matter of public policy is taken into consideration by them. That all this agitation has not been on account of any financial or other public policy, or desire particularly to defeat Mr. Schleicher on account of his public acts, but to elect John Ireland to Congress.

First—Judge Ireland claims that he elected, and secured the nomination of, Mr. Schleicher to Congress at Galveston four years ago at San Antonio two years ago, and the handsomest compliment the latter ever received was paid him by Ireland at a banquet following the last nomination. Mr. Schleicher's financial views were the same then as now, and were well known to all his constituents caring to know them, as he had publicly expressed them. He was with the National Democratic party then, and has not changed his views in the least. This cannot be denied, and Judge Ireland has either changed his views entirely, or was then, or is now, exacting the role of a demagogue.

Second—Is Mr. Schleicher to be read out of the party for the benefit of John Ireland? In the 2nd district the Democratic nominee for Congress is Hon. John Hancock, one of the most pronounced "hard money" men of the country. Let us see how far his financial views are allowed to interfere with his popularity with his party. Let us see if he is to be condemned because he does not join in the cry with Ireland, the greenbacker, and all other opponents of the resumption of specie payment. We have heard that some of the people of this district have been urged to vote against Mr. Schleicher simply because he was called a hard money man, let us now see what papers say about electing a gentleman of similar views in an adjoining district.

First, however, to place our local contemporary square on the record and show that it accorded all honor to Mr. Schleicher and raised no objection save on account of his financial views, and that after it had enlisted under the Ireland banner, we reproduce the following editorial article from the Herald of the day following the re-election of our retiring congressman.

Mr. Schleicher may well be proud of the thought tendered him on his arrival Monday night by the citizens of San Antonio. It is a rare tribute to worth and excellence when the people, when the political opponents of a man unite with his friends and vie with them in their tributes of respect. It manifests that the people are a man of his own kind, and that they are ready to recognize, as a distinguished citizen and official, he who they differ with him on matters of public policy, they readily recognize his contributions to the public good, and his services in their behalf, his great honesty and integrity of purpose, and for these they delight to do him honor. In this they are not wrong, for it is no way compromising their principles. It was perfectly consistent, the difference between them and Mr. Schleicher being on questions of finance and upon nothing personal. They accord to him personal honor in his course even on these questions, and while they consider it wrong, they do not condemn the man in conscience, his public acts. They oppose his resolution of the Democratic party, not on account of his financial policy, but because they stand upon our side by the platform of the party, where it demands a repeal of the resumption act and a total reversal of the national financial policy that has ruined the country. They believe that the district can furnish a man for the United States Congress equal to him in ability, in integrity and industry, and who besides will be second with the party on the financial issue. These issues, the party is in every State in the Union, striving for the same result. Upon this the party is contending with its Republican opponents everywhere, and it is the whole people have a right to demand of this Democratic district a representative who can cooperate with its congressmen in effecting the reforms for which as a party it is battling. Taking this view of the contest, while Mr. Schleicher's opponents admire and honor him as a man they oppose and take leave with him on these questions.

Day after day the Herald kept the following standing at its head:

A Free Democrat will stand by his party platform, and sacrifice personal feelings and preferences for public measures which are of vital importance to the country. The Herald is for more money, and is opposed to the Resumption Act—this is the policy of the National Democratic Party. Mr. Schleicher voted against it, and that is why the Herald is opposed to Mr. Schleicher.

Referring to the nomination of John Hancock, the Herald declared: "The action of the Bank convention in nominating John Hancock for Congress will be hailed with delight throughout the country." Hurrah for hurrah! And thus we go sounding down.

Forrester's department statistics show that the percentage of ordinary letters during the past fiscal year is only one-fifth of one per cent. For congress at Breman day before yesterday will be gladly received by the people of the State. Texas has no other man in all its borders, and the Fifth district is to be heartily congratulated and commended.

Mr. Schleicher was not more than once in the city, and he did not see the people. The advice has been presented only to show the inconsistency of the limited power in making their choice, and in placing the wind bag that has been floating so gaily over this district the past several weeks.
