THE SAVANTS AT SEA.

In another column will be found a full report of recent short-horn sales in Kentucky. The prices obtained, while much lower than a few years back, seem very fair, a number of uniumls realizing \$400 and \$600. These prices, while looked upon by old short-horn men as low, certainly ought to pay the breeder better than any other class of stock. It is the value of five or six choice graded beef steers. Breeders can no longer afford to pay fancy prices for short horns. Farulers are willing to buy them, and pay a litter of the control of the contr

day, making the receipts to date seventeen bales. They sold on a basis of 9j cents for middling grade.

Country produce is reported more pilentiful to-day, but not sufficient to cause a decline in prices.

Grain is unchanged. The receipts by wagons to-day were light, 85 cents being demanded for the new crop of corn. The receipts by rall to-day included only one carload ot oats and one of wheat.

Prairie hay and fodder was in better supply to-day, but the prices are unchanged.

Wood was in light supply this morning, and an extra price was demanded.

A GOOD PLAN. The most profitable way of dealing in stocks is, y combining many orders and co-operating them a a whole, dividing profits pro rais among haveholders, according to the market, monthly
