How to Manage Sheep.
BANKER, COLLEGE, LAMAR CO. TEX. 1
September 17, 1910.
A few words in regard to sheep-raising in southwestern Texas. Keep sheep on good grass. A fine variety is preferred—any mixture of greasewood, mesquite, and green grass. Dip them in lime, lime and sulphur, or tobacco and sulphur. When you dip them, dip them in two to four hours, in water (hot water) for one hour, but no so as to get thoroughly dissolved and to get the full benefit of it. It is used by the farmer to dip them in, but it is not so good as the dipper. It is used by the farmer to dip them in, but it is not so good as the dipper.
