Under the present county administration, the county porthouse is leased, and the lessee furnishes creything required to conduct the institution. A under the previous administration, a superintenent was employed for 875 per month to run the institution, and the county furnished everything. It is claimed that the expensus under the new method have been greatly increased, and that an examination of the two plans will prove this. Some one should be appointed by the county court to examine into the relative coats under the past and present administrations, and report upon the same, that it may be known whether there is A Possible Chance for Reform

Tou can get a pair of speciacles that will keep your eyes in as good condition forever after as when you first use them. These Medirated Glasses have been thoroughly assembled and analyzed by Prof. Berger, the great French coulist, and Ir. Carl Hollawder, the famous German centlist, and pronounced as far superior to any glass as vet made, and recommended as the only glasses to be used to save the eye. American occulists claim that the Medical Glasses have no equal and can in some cases restore the eye to its original sight when used in time, and in ocase can the eye become impaired by the use of these glasses, if properly a tapted, for the following reasons:

1. The chemicals soften the light to the eye, completed doing away with all tiresome sensation that is experienced in using glasses after one or two hours' use.

2. The medicated proposities contained in the glass make it as hard as a diamond. It will retain its polish and never become duil or dire, hence you will always see through it as bright and clear as at first.

3. The chemicals keen the glasses cold as 'ce-result is your optic nerves are always cook, doing away with any feverials semantions to the eye.

4. Those classes have no equal for night redding or rewing. With them you can ait up all night, and the light has no effect to the eye, with no tiresome assessation whatever, which necessatily continues to import when the work, or money refunded. Persons tiving at a distance desiring the Medicated Glasses can be the dot senting address with pestage atmap. The Medicated Glasses can be the dot senting address with pestage atmap. steresting Reports From General Griesson Regarding the Campaign Against the New Rexican Indiacs.

Gen. E. O. C. Ordy commanding the departiment of Texas, with headquarters in this city, has sufficient the country of his report for the past text. It is very voluminous and exhaustive. We make the following extracts:

—THE TROOPS, THEIR OFERATIONS, ETC.—
There are thirteer sub-posts or camps in the department, eight in the district of the Pecos and three in the district of the Bravo. Their object, in addition to keeping the Indians from water, and controlling their movements, is to protect, the ranches, settlements, mines, rall-road surveying parties and mail router against Indians and other marsuders, and at the same time to sain a full knowledge of the vast region embraced within the two districts. In the region referred to there have been eight murders by marauders during the year—during the previous year there were three. The distance marched by expeditions and scouts was 40,515 miles, an increase over the present year of 9,435 miles. There were killed by Indians a Mossican sheahend boy, James Wyani, and Mis. H. Graham, Simon Olquin, a Fuebio Indian scout, private soldier, Martin Davin, E. C. laker, a stoge the properties of the properties of Fort Worth, an Energy the properties of Fort Worth, and Energy the properties of Fort Worth, and Energy the properties of Fort Worth, and large the properties of the regord on the regord, one. The number killed is three less than the year before.

Attention is directed to the regord of the judge advocate of trials by courtsmarties, which show that described nave less than the year performance of the properties of the properties, and that described hear offenses increase under the judge advocate of trials by courtsmarties, which show that described her offenses increase under the suffuence of demoralizing localities. Lasg year a regiment strived from the lake region, and was distributed to e-tablished posts, where they were comfortable, and no described posts, where they were comfortable, and no described posts, where it suggested under which regiments could take their

the marier of disarming had been quietly effected.
Soon after this, however, some unnoual sir, or confusion, was noticeable. Indians were plassing in and out, and I called Gen. Hatch's atteinted to a party of Indians, reone mounted and others on foot, leating or driving horses and posits up to the mountain. I secondard the chief, Nautzila, as one of the nutiber, and asked permission to take or send out troops, at once, in pursuit. Gen. Hatch thought that the troops had better not go, believing that the chief was endeavoring to set his people in, and that he would return with them. Possibly this was the chief's intention, but it was evident that he was not succeeding, as the Indians continued to ascend the municial. Still greater commotion was observable in and about the camp, and a about half past two, thirty minuces after the time specified or fixed upon, the rignal shots were firred. The cavalry was then
