RABBITS DAMAGING THE COTTON; FARMERS PREPARE TO POISON

Rabbits are giving cotton farmers over the lower valley trouble, according to W. A. Wunsch, county agent of Carlsbad. They have damaged many fields in both the north and south end of the county and the growers are anxious to get rid of the pests. Rabbits have been poisoned in many instances, successfully. Farmers under the Carlsbad project and in the north section of the country are preparing to poison.

Mr. Wunsch estimates that the cotton acreage over the county has been increased twenty per cent and the crop condition at present is 105 per cent. Last year the acreage of the county amounted to 28,198.5 acres and this year it will amount to approximately 33,560 acres he says.

PECOS VALLEY BAPTIST ASSOCIATION MEETS IN HAGERMAN JULY 24-25

The following is the program of the Pecos Valley Baptist Association, which meets with the Hagerman Baptist church, July 24th and 25th:

Tuesday Morning
10:00—Devotional—W. H. Keith, Hagerman.

10:30—Organization.
11:00—Sermon by Rev. R. Peterson, Artesia.

Noon Hour
1:30—Devotional by Clayton Wyman, Loving.

1:45—Church Letters.
2:30—Report of W. M. S. by Mrs. C. M. Cole and Assistants.

3:30—Report of Associational Missionary, E. F. Woodruff. (a) Discussion by the messengers.

Evening Service
7:30—Song Service by H. M. Chilcoat, Carlsbad.

8:00—Address by Secretary of Missions, C. W. Stumph.

Wednesday Morning
9:30—Devotional by E. C. Jackson, Lake Arthur.

9:45—Report on Sunday school, by W. H. Cole, Roswell.

10:30—Report on B. Y. P. U. by H. M. Ingle, Loving.

11:15—Laymens Address by C. C. Cagle, Roswell.

Noon Hour
1:30—Devotional by J. D. Josey, Hope.

1:45—Orphans Home Report by W. G. MacArthur, Portales.

2:15—Montezuma College, by Pres. C. R. Barrick.

2:45—Our Hospital by Miss Lois Coltrin, Clovis.

3:15—Baptist New Mexican and good Literature, by Mrs. S. M. King, Roswell.

**EDDY COUNTY
SINGING CONVENTION
TO MEET HERE**

The Eddy County Singing Convention will hold its semi-annual meeting in Artesia, Sunday afternoon, July 22nd. While not announced, it is presumed that the place of meeting will be in the Central school auditorium. All who enjoy good singing are invited to attend. Representatives from Hope, Loving, Carlsbad, Roswell, Hagerman, Dexter and other towns nearby are expected to be present.

THE OILERS WIN GAME FROM ROSWELL—LOSE ONE TO FORT STANTON

The revamped Oiler line up played an improved game of ball here Thursday afternoon to defeat the fast Roswell nine by a score of 13 to 4. Purtle, Roswell's pitcher was hit hard by the locals.

The score by innings:
Artesia 340 104 10
Roswell 030 000 10
Batteries: Artesia, Eaton and Carter; Roswell, Purtle and Hedgcock.

The locals journeyed to Fort Stanton, and were defeated by the Fort Stanton team by a count of 5 to 3. The first five innings of the game was played in intermittent showers of rain, during which time the locals made three errors that cost the game.

The score by innings:
Artesia 000 030 000
Fort Stanton 300 200 000
Batteries: Artesia, Hampton and Carter. Fort Stanton batteries not secured.

CALLED TO OKLAHOMA

S. B. Barnett, manager of the Big Jo lumber yard, was called to Wilson, Oklahoma, Friday by the accidental death of his brother-in-law, Sticks Debar. The particulars of Mr. Debar's death were not learned.

A DALLAS INSURANCE MAN LOSES ARM IN AN AUTO ACCIDENT MON.

**E. E. Summerfeldt Suffers
Painful Injury When His
Arm Is Hit By An Iron
Railing On An Oil Truck.
He Will Recover.**

E. E. Summerfeldt of Dallas, representative of the Employees Casualty Co., lost an arm in an auto accident, which occurred Monday evening, about 8 o'clock on the south highway, a short distance west of Lakewood. All of the particulars of the accident are not known at this writing, however, it is understood that Mr. Summerfeldt with a companion was traveling south in the direction of Carlsbad when he met an oil truck driven by Harve Bradley of Artesia. The left arm of Mr. Summerfeldt was resting on the door of the Chevrolet coupe, which he was driving when they attempted to pass the oil truck. It is thought that both the driver of the Chevrolet and the driver of the truck misjudged the distance in passing and the left arm of Mr. Summerfeldt was struck by an iron bar on the truck; the bar severing the arm between the elbow and the shoulder.

Mr. Summerfeldt was brought into Artesia on the truck, where he received medical attention and is reported to be resting well.

Monday evening's accident is rated as one of the most peculiar to occur on the highway of this section in recent years. Neither the Chevrolet coupe nor the truck were damaged to any extent, only the door knob was taken off the coupe and the hand of the injured man was not bruised or scratched, although the arm was severed from the shoulder.

MISS BORSCHELL HERE

Miss V. Borschell, assistant home agent spent three days with County Extension Agent Wunch during the week. Miss Borschell gave demonstrations at the Hope and Lakewood ladies sewing clubs on "Clothing Design". Both meetings were well attended and much valuable information was received. Miss Borschell will meet with these clubs again in August.

Miss Borschell inspected the work being done by the girls sewing clubs in the county and stated that good progress was being made by the clubs and spoke to the girls on plans for their demonstration teams. Each club will have a team in the county demonstration to be held some time later.

PIPE LINE OFFICIAL HERE

George Purdunn, of San Angelo, Texas, general superintendent of the Illinois Pipe line, is on a tour of inspection of the field today. He was accompanied by E. H. Perry, local superintendent of the Illinois Pipe line and Glenn Bish of the Ohio Oil Co.

PECOS VALLEY GAS CO. READY TO LAY LINE IF ROSWELL WANTS GAS

**Preliminary Survey Of Line
Made To Roswell; An 8
Mile Extension To Line
Of The Phillips Petrol-
of Company.**

The Pecos Valley Gas Co., is preparing to start work on a gas line to the north valley towns at an early date, provided the franchise of the Southwestern Public Service Co. is approved by the city council of Roswell. A preliminary survey of the proposed line has been made from the field properties of the gas company northeast of Artesia to Roswell, the northern terminus of the line. The line is to pass over the bridge east of Lake Arthur and go north to Hagerman, paralleling the highway to Dexter and on to Roswell.

In the application for the gas franchise, the following rates are proposed by the Southwestern Public Service Co.

Domestic:
First 30,000 cubic feet per month, 75c per thousand cubic feet.

All over 30,000 cubic feet per month 60c per thousand cubic feet.

Commercial:
First 30,000 cubic feet per month, 75c per thousand cubic feet.

Next 2,970,000 cubic feet per month, 25c per thousand cubic feet.

Next 5,000,000 cubic feet per month, 22 1-c per thousand cubic feet.

Next 5,000,000 cubic feet per month, 20c per thousand cubic feet.

Next 10,000,000 cubic feet per month, 18c per thousand cubic feet.

All over 23,000,000 cubic feet per month, 15c per thousand cubic feet.

Minimum \$1.50 per month.

The Pecos Valley Gas Co. is also making connections with the gas line of the Phillips Petroleum Co., a distance of eight miles. The ditch of the line has been dug and two cars of pipe are on the ground for the extension.

LOOK OUT FOR THIS

At a small hotel midway on the highway between Albuquerque and Gallup, a waitress was found to have typhoid fever, last week. Her husband is cook. The assistant cook has gone to her home in Torrance county with suspicious symptoms of typhoid. Three other waitresses are said to be feeling "under the weather." Here is a chance for widespread scattering of infection. For its own protection, a restaurant ought to require physical examination and typhoid vaccination of all employees before they go to work.

EDDY COUNTY HEALTH DEPT.

NEW RAILROAD CROSSING

The Santa Fe is installing a new railroad crossing, just east of the Bullock warehouse.

WHITE DONATES SITE FOR GIRL SCOUT CAMP IN THE SACRAMENTOS

Land Commissioner B. F. Pankey of Santa Fe, was in Artesia Tuesday from Lovington, where he supervised a public land sale on the day previous. Mr. Pankey was accompanied here by an assistant in the state land office, who went to the Sacramento mountains to measure the timber on the tract of land recently purchased for the Girl Scout organization. The land, which is to be used for a permanent camp for the Girl Scouts, was purchased by Elza White of Roswell and donated for a camp site. The timber on the tract of land will be measured and sold to the scout organization.

Construction on several of the buildings in the camp will soon be complete and ready for the opening on July 28th it is reported.

MORE ABOUT METHODS OF REGISTRATION FOR THE GENERAL ELECTION

Those who intend to vote in the general election in November, should not fail to ascertain whether or not their names appear on the registration books. Important changes made in the 1927 election law passed by the last legislature, makes it imperative that the voters at least become familiar with a few of the primary provisions.

If you voted two years ago and your name does not appear on the poll list, you must sign a certificate with one witness before your name is entered on the registration books. You can register for the members of your immediate family, if their names do not appear in the registration books.

July the 27th and 28th is the first two days for registration.

Also hold in mind that the local voting precinct has been divided into two districts and you must register in the district in which you live. If you vote in this precinct and live east of Roselawn avenue and east of the highway beyond the city limits, then you should register at V. L. Gate's office. If you live west of Roselawn avenue and west of the highway beyond the city limits, then you should register at the city hall. The precinct east of Roselawn and the highway is known as district A and the precinct west of Roselawn and west of the highway is known as district B.

If you are a new resident and are not sure that you know how to proceed in order to cast your ballot in the general election, see some member of the local registration board.

SANTA FE.—Although secretary of state, Miss Jennie Fortune, yesterday advised all voters to register in person, she said there are three other ways in which their names may be placed on the registration books.

The law provides that the boards of registration shall enter the names of persons which appeared on the poll books of the preceding election. A qualified voter may register his sons, daughters, brothers, sisters, parents, grandparents and servants. He also may register by forwarding to the registration board a certificate attested by witnesses stating he is a qualified voter.

**THE TOURIST BUSINESS
INCREASES THE GAS
CONSUMPTION IN N. M.**

ALBUQUERQUE.—Gasoline consumption in New Mexico increased 22 per cent in the fiscal year just closed over the one preceding, while the number of motor vehicles licensed in the state gained but 7 1/2 per cent. Gov. R. C. Dillon said at a rally of the young men's republican club here Tuesday night.

This reflects the tourist increase, he said, declaring that highways bring this about. Federal Aid construction in the state in 1927-28 was 401.9 miles costing \$5,142,406 as compared to 251.1 miles costing \$3,114,229 in 1925-26, he asserted. Highway construction of direct benefit to Bernalillo county under his administration has reached \$1,309,000, he said.

Optimism and enthusiasm over the prospects for party success were high at the meeting which was addressed by George R. Craig, C. M. Botts, Albert Simms, Frank A. Hubbell, O. R. Dibley and Gov. Dillon. The Governor was still silent on whether he will seek renomination.

F. E. De Caster of Amarillo, district manager for the Black, Sivals and Bryson Tank Co., is visiting friends and attending to business matters here this week.

Spring Wool Clip Of This Area Valued At \$127,500

**Recent Shipments Amount
To Approximately Half
Million Pounds. One Of
The Largest Clips To Be
Shipped From Here.**

The last of the spring wool clip was brought into Artesia yesterday by Weddige Brothers of Hope. The Weddige Brothers wool clip was part of the present shipment consisting of 160 two hundred and fifty pound bags, to leave this section for market and represents final shipment, so far as known.

Practically all if not all of the spring clip has been shipped out through the Bullock warehouse. Mr. Bullock says that the wool exports up to date have amounted to 1704 two hundred and fifty pound bags, as large if not the largest wool clip ever handled by his establishment. The crop amounting to almost half million pounds, represents a cash value of \$127,500.00, figuring at an average price of 30 cents per pound.

More than half of the present wool clip was purchased by Ralph Vandawart of Roswell for Gross Kelley Co. About 600 bags of this amount was billed to the Bond Baker warehouse at Roswell, one car load was sold to a Philadelphia firm on a scoured basis and one car was bought by a Mr. Farqhar, wool buyer of Boston.

DISTRICT COURT IN SESSION

An adjourned session of the Eddy county district court convened at Carlsbad, Tuesday, District Judge G. A. Richardson presiding. The trial of civil suits will constitute the principal business to be transacted. The court is also expected to render a decision in the insanity case of Russell Crawford before adjourning.

WOOL SALE CALLED OFF

The annual wool sale at Roswell, has been called off, according to news reaching here yesterday. This action is due to the fact that the bids of the eastern buyers are not up to expectations. More than two million pounds of wool has already been stored at Roswell, which may be sold at a private sale or a general sale set for a later date.

LIGHT RAINS

A light shower fell east of town Friday afternoon, but failed to materialize an appreciable amount of the much needed moisture in town, being only enough to settle the dust. The area south of Roswell received a down pour on the same date. Monday the Dexter section received a light rain. Scattering showers are reported to have fallen in the mountains the first of the week.

FOUR MEN FORMERLY OF ROSWELL ON ROAD TO THE COLORADO PEN

The following press report tells of four men, well known to Chaves county officers, who were taken to the Colorado state pen, following a sentence to serve from 15 to 20 years on charge of robbing the Grand Hotel Cafe at Trinidad, Colorado.

PUEBLO.—Guarded by detectives four men convicted of robbery were taken to the state penitentiary at Canon City yesterday. The prisoners Carl Caywood, Pleaby Howard, Jerry Brown and Charles Davis, were sentenced to serve from 15 to 20 years each on charges of having held up and robbed the Grand Hotel Cafe at Trinidad.

Extra precaution was taken to guard the prisoners after Trinidad police had received word that an attempt would be made to liberate them on the road between Pueblo and Canon City. H. A. Rogers, alleged safe blower, escaped from the Trinidad jail last night and police were warned of a plan to rescue the convicted men there today.

See our samples of Engraving—Artesia Advocate.

Let's Get Somewhere

The real citizen does not stand on the side line and cuss the umpire; he gets behind the game and does his full share to bring progress and prosperity to the home city.

Man-made things were never perfect. They may approach perfection, but man has never reached the stage where he can construct without a flaw. He has made progress, not by lamenting the imperfection, but by constructive criticism backed by a desire and will to work.

Artesia has made progress in the past five years, but even so, one could always find fault with the manner in which the town progressed. Did you ever know of anything that has been started here but what someone has found fault?

Where would we have been today, if the citizens had listened to the fault finders?

Possibly we could have improved on our sewer system, our white way, our paving, our school system, our school buildings, but had we stopped our plans because some flaw appeared we would have still been waiting for the improvements we now enjoy.

OFFICIAL PAPER OF EDDY COUNTY

TELEPHONE NO. 7

TAX RATES TO INCREASE

The 1928 tax rolls are coming in to the office of the State Tax Commission. From those which have been filed, it is apparent that there will be little increase in the state's assessment, according to a statement of the Taxpayers' Association of New Mexico.

On the other hand, it is clear that the estimates of expenditures for the ensuing year are running at higher figures. The increases in school budgets alone indicate an average of a one mill increase over the state. At least another mill will be necessary to take care of increases in the state and county budgets. It is quite probable that the average tax rate will reach thirty-three dollars per thousand dollars of valuation as compared with \$31.34 for the year 1927.

Ten years ago the average tax rate was \$17.20 per \$1000 of valuation. Will the 1928 tax rate approach double that figure? That would mean a doubling of taxes in a ten year period.

It is said in some quarters that people are willing to pay higher taxes. That statement can not be proved in view of the resistance to adjustment of assessments and in view of the large delinquency in the payment of taxes. Increasing expenditures and tax rates are resulting in evasion of taxpaying through lower assessments and postponement of tax payments. People are not willing to pay increased taxes even for roads and schools.

The struggle to keep tax rates at reasonable levels will be a hopeless one unless the seriousness of the problem is recognized by our statesmen. Mere politicians can not be expected to do anything but promise every appropriation requested and, in the same breath, to promise tax reduction. The solution will be found in proper budgetary procedure, systematic and scientific valuations by trained and experienced assessors and a full and prompt collection of taxes.

PLEASING THE PUBLIC

The job of pleasing the public is extremely difficult, as some will testify. Occasionally, a youngster, who is fired with an ambition for service to humanity, conceives the idea that he is the chosen one to please everybody in a profession dealing with the public, but lives to see his cherished ambition crumble as surely as he remains with his work. We learned sometime ago that as long as people are different, the task of pleasing everybody is next to impossible, this despite the fact that as far as newspaper is concerned, they have broadened their service, to embrace all classes of news service.

A business that has no competition in the community it serves is very fortunate, according to some people's idea. Yet such a business is unfortunate in many respects, making it extremely difficult to give satisfactory service. People who are prone to criticize have no method of comparison. They imagine in such instances that if such and such a business had local competition that prices would be lower and that service would be better, in fact a more satisfactory situation all the way around. In the absence of competition, satisfactory service is next to impossible, in truth it is next to impossible among the lines of business with the stiffest competition, but the idea of competition creates a more desirable situation in the minds of many, whether it actually is more satisfactory or not, they imagine it is.

Neither does competition always mean cheaper prices. The price must in a large measure be governed by the demand and the volume of business.

It is also true that the paths of the non-competition business are not strewn with roses. Take the telephone and utility industries. Ask the managers if the business of serving the public in a line without competition can be carried on in a manner pleasing to all. Still we are unable to see where a half dozen telephone companies or a half dozen light companies in Artesia would increase the service or be able to give better rates. Do you?

ANOTHER POSSIBILITY

It may be news to some to learn that gypsum is classed as a fertilizer by the government, that is when properly applied. We had never thought of gyp as a fertilizer, but happen to recall one occasion in Artesia, where a small amount of gyp was placed on a main street curb, causing the grass to take on a renewed growth and thrive.

Gyp in quantities abound over this section and awaits development at the hands of capital. With the coming of natural gas, it would seem that the development of gyp beds presents a possibility for the future not to be overlooked.

ACCIDENTS THE GREAT MENACE FOR FIVE-TO-NINE-YEAR OLDS

(Eddy County Health Department)
The parents of Eddy county should be interested in the following article which should encourage them to use every effort to protect their children from all accidents:

The latest data available from the United States Death Registration Area shows that among children from five to nine years of age accidents are the leading cause of death. In the same area deaths from "accidental or undefined causes" are numerically exceeded only by deaths from diarrhea and enteritis among children from one to five years of age.

The National Safety Council reports that almost one-quarter of the 90,000 fatal accidents in 1925 occurred to children under fourteen years of age. About 11 per cent of these children were less than five years old and more than a third of them were burned to death or died as the result of extensive burns.

When we come to children from five to nine years old, where death from accident leads, we find automobile accidents responsible for a little more than 12 per cent and burns a little less than 12 per cent of the deaths. Among the older children from ten to fourteen, firearms cause 15 per cent of the large number of accidental deaths.

A review of these facts convinces the child-lover that safety first education and practice, among both parents and children, are an important part of all child health work.

A SOUND BUSINESS ATTITUDE

At a recent meeting of the Chamber of Commerce of the United States expressed a sound and progressive business attitude. One of the resolutions adopted is especially admirable, and should be the viewpoint of every American citizen who wishes to see our prosperity increase and our national character made stronger and more unified.

"The very essence of civilization," it said, "is that there shall be placed upon the individual, only that degree of restraint which will prevent his encroachment upon the rights of others, thus releasing to the utmost individual initiative in every proper direction."

"Our form of government most effectively expresses and maintains this principle. Within our basic law exists ample provision for such changes as may from time to time be necessary to safeguard our people."

"It is therefore, essential that our government should scrupulously refrain from entering any of the fields of transportation, communication, industry, and commerce, or any phase of business, when it can be successfully undertaken and conducted in the public interest by private enterprise."

"Any tendency of government to enter such fields should be carefully weighed in the light of its possible effect upon the very genius of our institutions."

The Chamber of Commerce is to be complimented on adding its voice to the chorus of informed and scientifically progressive opinion.

WOOL MEN WIN VICTORY

Wool warehouses of the state have won an important victory in the refusal of the interstate commerce commission to abolish the transit privileges for wool shipments. The action was brought by the Boston wool trade, with the state corporation commission intervening on behalf of the wool interests of the state, which would have been seriously handicapped if the in-transit rates had been revoked. It would have meant that no wool warehouses could have existed in the state, which is just now trying to build up to the point of handling more of this business in the state. Naturally, the Boston wool trade would like to prevent this loss of business, but New Mexico's wool warehouse business has been assured of a future by the decision of the commerce commission and the wool men can go ahead with a feeling of safety in their position and the stability of their business.—Albuquerque Journal.

POOR ROADS EXPENSIVE

Recently conducted experiments show that bad roads cost the motorist the equivalent of a tax of 22.3 cents on every gallon of gasoline used. This figure is reached by the assumption that a car makes ten miles to the gallon on poor roads.

On a basis of a speed of thirty-three miles per hour, tests in several states showed the cost of gasoline and tires per thousand miles over a rough road used in experiment, was \$35.10 for an average four-cylinder car loaded. The cost for the same car running at the same speed over a smooth highway was shown to be only \$12.80.

What better argument can there be for improving highways as fast as funds can be made available? Road oils are constantly playing a more important part in transforming thousands of miles of unsatisfactory roads into modern serviceable highways.

OH UPRIGHT JUDGE

A Chicago judge has ruled that no woman may equitably sue another woman for alienation of a man's affections unless the evidence is unmistakable that the woman sued went out after her prey with harpoon and a dragnet, so to speak.

In other words, according to the judge's view, man is normally the hunter in this sport and woman the hunted.

This is a view which does credit to the judge's chivalry and at the same time voices his admiration for man, strong-willed man. What becomes of Shaw's "superman" theory—which is woman? Or of Byron's "Man's love is of man's life a thing apart; 'tis woman's whole existence?" But we go along with the judge. He has paid a compliment to the male sex.—Exchange

OUR COAL RESOURCES

New Mexico is said to have more coal than Pennsylvania, the statement being based upon actual surveys of our coal-bearing areas, producing and undeveloped. Coal is a prime requisite for the development of an industrial region, and with its coal deposits, along with the great store of mineral, timber and agricultural resources, New Mexico is only awaiting its time for adequate development. Electric current, say engineers, can be made from coal as cheaply as from water, and while water power, or "white coal" is limited in extent, coal areas are sufficient to last for generations to come. New Mexico's industrial future is assured by the first requirement of an abundant coal supply.

INSIDE INFORMATION

To tell a left from a right sleeve, see which side is cut slightly higher at the armseye edge. The high side goes to the back of the garment.

Variety in texture makes the meals more appetizing. Have one food with a crisp crust, like corn fritters or scalloped tomatoes; another with a sauce; and a third simply cooked in water and seasoned with melted butter. A raw vegetable, like celery or radishes, lends further variety.

An old-fashioned remedy for a stain made by tar, axle grease, road oil, creosote oil, asphalt or asphalt paint, is to rub lard thoroughly into the stain, and then wash it with hot water and soap. The treatment may have to be repeated. Otherwise one of the solvents, such as carbon tetrachloride, chloroform, turpentine, or benzol may be used.

When making a two-piece dress for a growing girl, take a tuck in both skirt and underwaist, so that when you are letting down the garment you change it proportionately. Stitch the tucks at half inch intervals with a long loose stitch. When the first row of stitching is ripped out the dress is lengthened an inch and can be lengthened again.

Fruit drinks made from the juice of fresh fruits, toned up usually with a little lemon juice, are ideal for summer picnics. Try various combinations of orange, blackberry, raspberry, or grape juice, with perhaps ginger ale or carbonated water to give sparkle. The juices can be squeezed out at home, sweetened, chilled, and carried to the picnic in vacuum bottles or surrounded by ice.

Serve small or moderate-sized portions in warm weather and avoid waste. On warm days the appetite does not seem as active as in the cold months. Choose cooling foods, crisp in texture, for part of the meal, and give considerable attention to the appearance of the food and the table. Out-of-doors meals on the porch or lawn will be found popular and easy, if some of the preparation can be done early in the day.

Too many fools turn into angels at railroad crossings.

A little girl needs a pocket on every dress. When it interferes with the trimming or design to put it on the outer part, place it on the bloomers. Here it will also help to show which is the front of the bloomers.

TO HOLDERS OF

Third Liberty Loan Bonds

The Treasury offers a new 3 1/2 per cent, 12-15 year Treasury bond in exchange for Third Liberty Loan Bonds.

The new bonds will bear interest from July 16, 1928. Interest on Third Liberty Loan Bonds surrendered for exchange will be paid in full to September 15, 1928.

Holders should consult their banks at once for further details of this offering.

Third Liberty Loan Bonds mature on September 15, 1928, and will cease to bear interest on that date.

A. W. MELLON,
Secretary of the Treasury.

Washington, July 5, 1928.

To the Motorist

We are listing below a few of the items carried in our almost complete stock of to date Auto Accessories: Varnish, Cylinderhead Gaskets, Auto Jacks, Belts, Ring Gears and Pinions, Ignition parts, Spark Plugs, Quality Piston Rings, Eaton Auto Springs, Continental Grease and Oils, Sinclair and Quaker State Magnolia and Continental Cup and Grease, A. C. Oil Filter Cartridges, repairs. Also a complete line of Day Thorobred Tires and Tubes. ROAD CHISELED OUT OF IRON ROCK

The new road being built from Socorro toward Magdalena on U. S. Highway 70 is attracting wide interest among tourists and engineers. The line of the new route, which eliminates the famous and some times terrifying Blue Canyon, lies in some places through solid rock cliffs and in others traverses a path through embedded boulders locked in place with natural cement.

For a part of the way the road is being shot from towering rock cliff composed of a substance called by engineers "iron rock" because of its almost impregnable nature. This material is known geologically as decomposed porphyry.

Air hammers experience the greatest difficulty in drilling holes sufficiently deep to set off a charge of powder. Even after a charge is placed successfully it is necessary to again drill the huge masses of rock that are shot down and shoot them separately in order to break them up small enough to dispose of.

Huge rocks two and three cubic yards in size and weighing tons are the everyday fare of the men building the road. The powder monkeys and jack hammer men cling to the side of the cliff like leeches as they do their work. When a big hunk of the iron rock is finally drilled and shot loose it bounces down into the canyon below much as though it were a huge rubber ball.

Engineers predict that when the road is finished New Mexico will have a construction job which will attract the attention of engineers and road men nationally because of the tremendous difficulties experienced in the building.

Rachel Gilles, aged 17, saw a tree, horse, a railroad train, a motor car, a telephone, a movie, a street car and a policeman for the first time when she came to England from St. Kilda Island for a visit.

Not long ago a large and curious crowd gathered in a certain section of New York city to see a strange animal which had often been heard of but never witnessed by those who gathered to gaze upon the beast. It was a cow.

In 1920, Cox was nominated with the League of Nations as the issue, just as prohibition will be the issue this year. He was snowed under by about seven million majority. In 1924, Davis was the nominee. He made the oil scandals of the Harding administration the issue, and was defeated by about seven million votes.

In 1928, Al Smith has been named as the Democratic standard bearer. He has made prohibition the issue for the Democrats. He says he is not in favor of the return of the saloon, but wants states to have the right to have saloons, or not, just as in 1860, the Democratic platform declared that states should have the right to be slave or free.

The voter, this year, must decide whether he prefers good times or more liquor. (Political Advertisement)

N. MEX. CROP REPORT AS OF JULY 1 1928

On the first of June the soil moisture and other conditions for producing good crops were very much better than they were on May 1 of this year, and for June 1 of 1927. As a result farmers over most of the state were feeling very much encouraged. However, the month of June had an unusually large amount of hot, dry winds that dried out the soil moisture and cause rapid deterioration of crops. Local rains the latter part of June, and the first part of July, have relieved drought conditions in some localities, but crops and ranges are suffering over a large part of the state.

CORN: The acreage of this crop for the state amounts to 199,000, compared with 2,490,000 bu. estimated for 1927. The crop for the United States increased about 2 per cent over 1927, but the condition July 1 indicated 2,736,000,000 but., or about 38,000,000 bu. below the 1927 estimated crop.

WHEAT: The winter wheat crop of 171,000 acres was ready for harvest, and gave promise of producing at 543,728,000 bu., or nearly ten 000 bu. in 1927. For the United States the production was indicated at 543,782,000 but., or nearly ten million bushels less than last year. Spring wheat production for the state is estimated at 590,000 bu., compared with 420,000 bu. in 1927. For the United States the crop is indicated at 256 million, compared with 314 million in 1927. The farm supply of wheat in the United States was 23,473,000 bu., or about 2.7 per cent of last years crop. New Mexico stocks was 2 per cent of last years crop, or 11,000 bu.

OATS: The oat crop in the state is indicated at 961,000 bu., compared with 660,000 bu. last year. The United States crop is indicated at 1,320 million bu. compared with 1,184 million bu. last year.

COTTON: The New Mexico crop is larger than that of last year by 14 per cent, making the state acreage standing July 1, at 114,000. The United States crop is 11.4 per cent above last year, and amounts to 46,695,000 acres.

PASTURES: In New Mexico the pastures on July showed a condition of 77 per cent of normal, and for the United States they were 84.4 per cent of normal.

LABOR SUPPLY: In New Mexico the labor supply was 107 per cent of the demand, while in the United States it amounted to 94 per cent of the demand.

Beans: The bean crop for the state was estimated at 1,070,000 bu.,

compared with 975,000 bu. in 1927. The month of July is a critical period for the bean crop, the production will depend largely on seasonal rainfall, and at this time the crop badly needs rain.

BROOMCORN: The acreage of this crop is indicated at 34,000 compared with 26,000 acres in 1927. The production is indicated at 4,964 tons, compared with 2,960 tons last year. Like beans, the ultimate production will largely depend upon seasonal rains during the crops growth.

Speeding Motorist: "How about calling it square for \$5?"

Cop: "Trying to bribe me, eh? Do you think I would stoop so low?"

Speeding Motorist: "Well, I'll make it \$10 if necessary."—Western Tire Dealer.

What a Thrill When Your Goodies Parade

WHAT a thrill for the housewife when course after course of the foods she has prepared in the kitchen parade onto the dining table—and family and guests lavish their praise. But how sad and how unfair, if the kitchen range doesn't do its part—and how unnecessary! For you can have a Quick Meal Gas Range and know your cookery will parade with pride on every occasion.

The QUICK MEAL Gas Range

There's no bad luck with the Quick Meal Range because there's no trusting to luck or to guessing. The Lorain Oven Heat Regulator takes the guess work out of cookery.

The Radiant Broiler produces white hot radiated heat that instantly penetrates through and through. Steaks and fish and fowl that melt in your mouth—toast golden brown in an instant.

Quick Meal Gas Ranges are porcelain enameled, beautiful and sanitary, and so easy to clean. Unsightly bolts, hinges and piping are hidden from sight. Quick Meal Ranges have Top Burners which cannot clog, rust or corrode. The cooking top is porcelain enameled.

It is well worth making a special trip to our store to see these wonderful—

QUALITY AT LOW COST

IN SOCIETY

SHIPP-BRUCE

A pretty home wedding occurred last Friday evening when Mr. Bert Shipp and Miss Anna Bruce were united in wedlock. The Bruce home was attractively decorated in a color scheme of white and pink. A wedding bell was suspended from a white arch which was adorned with pink roses. Promptly at seven thirty o'clock the bridal party entered the living room. The officiating minister, the Rev. R. Peterson, pastor of the Baptist church, came first, then the bridesmaid, Miss Florence Conner, and the bride leaning upon the arm of her father, Mr. R. W. Bruce, who gave her away. They were met at the arch by the groom and his best man, Mr. Nathan Kelley, and the bridal couple took their places beneath the wedding bell, when the impressive ring ceremony was performed.

Immediately following the ceremony, which was witnessed by only a few intimate friends, refreshments of bride's cake and punch were served and the young couple left for a short honeymoon trip to Roswell. They were the recipients of a number of presents.

The bride was gowned in a beautiful white georgette dress with white veil and orange blossoms and carried a bouquet of pink roses. The bridesmaid's dress was a yellow georgette and she carried a bouquet of pink roses.

The marriage of these splendid young people is the culmination of a high school friendship. Both were members of the graduating class of '24 and have been employed in local business houses since that time. Mr. Shipp is at present employed as a book-keeper by Lowrey-Keyes. They will be at home to their friends about August 1st in the Stone cottage on Dallas street, which the groom purchased some time ago and upon which he is having a number of improvements made.

COFFIN-JACKSON

At 8 p. m., Sunday evening just as the twilight hour was blended into the shades of night, the marriage of Miss Josephine Coffin and Mr. Albert Jackson was solemnized at the lovely country home of the bride's parents, Mr. and Mrs. Charles R. Coffin, Rev. Z. B. Moon of the Methodist church officiating.

The home was made lovely with shasta daisies, gladioli, American beauty roses and ferns touched up with the soft lights making a lovely setting for the ceremony. Mendelsohn's wedding march with Mrs. Bryant Williams at the piano was used as a processional, during which Miss Helen Coffin, sister of the bride, came slowly down the stairway in a lovely pale green organdy period frock carrying a bouquet of pink rose buds and maiden hair fern. The bride, lovely and sweet followed, dressed in a pale blue hand made and hand embroidered chiffon frock with a shower bouquet of tea roses, baby breath and fern and was met at the foot of the stairway by her father, Charles R. Coffin, who gave her in marriage.

The groom accompanied by the best man, Miller Woodliff of Amarillo, Texas, came in through the opposite door and met them at the improvised altar where Rev. Moon was waiting, and the vows were exchanged which made them husband and wife.

A delightful reception followed when ices were served by girl friends of the bride. The punch bowl was presided over by Mesdames M. E. Pichke and Bryant Williams. A mammoth ring wedding cake was cut by the bride, and Miss Alice Ruth Williams was the lucky one to catch the bride's bouquet. At nine thirty the happy couple left on a wedding trip to Yellowstone Park.

The bride is the second daughter of Mr. and Mrs. Charles R. Coffin one of our most prominent families in this section. Mr. Jackson is traveling salesman for the Remington Typewriter Co., with headquarters in Amarillo, Texas.

Following guests were present: Mr. and Mrs. J. E. Robertson, Roy Spivey, Paris Damewood, Rev. and Mrs. Z. B. Moon, Artesia, Dr. and Mrs. Glasier, Carlsbad, Miller Woodliff and Isadore Fred, Amarillo, Texas, Messrs and Mesdames Bridgeman, Pichke, Williams, Johnston, Burnett, Coffin, Dostalick, Misses Alice Ruth, Mary Jane and Margaret Williams, Mary Catherine and Martha Coffin.

SWIMMING PARTY FOR MRS. JOINER

Mrs. Joiner of Lusk, Wyoming, was the honor guest at a swimming party given at the Oasis last Thursday morning by Mrs. E. H. Perry. After the swimming was over luncheon was served by the hostess. Besides Mrs. Joiner the guests were Mesdames Montague, Pearce, W. J. Haskins and Williams, and Miss Gertrude Fox from the field, and Mesdames Littlejohn, M. W. Evans, C. O. Brown, Jernigan, Abbott, Clowe, Elzie Swift, and the Misses Ella Bauslin, Ella Brown and Ruby Laney.

Advocate want ads get results.

SWIMMING PARTY

Mrs. Fred Brainard was hostess to a swimming party at the Oasis yesterday afternoon beginning at four thirty. While in the water the swimmers had balloons to play with and a "balloon man" was used for a prize for the swimmer who could reach the far side of the pool first in a walking race. Mrs. D. L. Grimm was the successful contestant. In the swimming contest across the pool Mrs. Jim Berry reached the opposite side first and won the prize, a bathing cap. After their strenuous exercise the swimmers thoroughly enjoyed the picnic supper served by the hostess. The participants in the party were Mesdames Frank Seale and her little daughter, Carolyn, Jim Berry, D. L. Grimm, Charley Mitchell, Landis Feather, C. R. Blocker, Howell Gage and Kenneth Rowan of Los Angeles, California and the hostess.

PATTESON-CLEVE

Announcement has been received here of the marriage of Oris Felding Cleve of Elk, to Miss Hazel Irene Patterson, which occurred at the home of the bride in Shreveport, Louisiana on July 14. After a month's honeymoon, Mr. and Mrs. Cleve will be at home near Elk, August 15th.

Miss Patterson was a teacher in the Roswell public schools during the past year. Mr. Cleve, a well known rancher of the Elk section, is the son of Mrs. A. L. Cleve.

T. E. L. CLASS MEETS

The T. E. L. Class, the ladies bible class of the Baptist church held its regular meeting at the home of Mrs. Peterson last Thursday. Refreshments were served by the hostess.

BRIDGE PARTY FOR MRS. JOINER

Mrs. J. M. Story entertained three tables at bridge last Thursday afternoon complimentary to Mrs. Joiner of Lusk, Wyoming. Light refreshments were served by the hostess. There were present besides the honor guest Mesdames Perry, Montague, W. P. Cox, Virgil Wells, J. M. Nellis, M. W. Evans, Charley Mitchell, Shugart, Jim Berry, and Pior.

FORMER ARTESIA YOUNG PEOPLE MARRY

A belated announcement has been received here, telling of the marriage of two members of the E. W. Roger family, former residents of Artesia. Gent Rogers, son of Mr. and Mrs. E. W. Rogers, was married to Miss Vera Snow at McLean, Texas on the 26th of June. Mary L., daughter of Mr. and Mrs. Rogers was married to Homer D. Shaza on the 26th day of May.

SECOND EVENING BRIDGE CLUB

Mr. and Mrs. Fred Hartell were hosts to the Second Evening Bridge club last Friday, serving a chicken dinner before the playing. Substitutes were Mrs. M. A. Corbin and Mrs. Kenneth Rowan of Los Angeles.

SUMMER BRIDGE CLUB

Mrs. Chester Russell and Miss Dora Russell were hostesses to the Summer Bridge club Tuesday. A cold plate luncheon was served at one o'clock and the bridge playing followed. Substitutes were Mesdames Ralph Shugart, M. W. Evans, and Howell Gage and the Misses Katherine Clarke, Vesta Frisch and Helen Mann.

FIRST BRIDGE CLUB

The club met with Mrs. Mark Corbin for its meeting on Tuesday afternoon. There was an extra table of guests and the refreshments consisted of a salad course. The special guests and substitutes were Mesdames Hartell, Beecher Rowan, John Lanning, Hegeman, Oscar Pearson, Bulot, La Garde of New Orleans, Roy Anderson of El Paso, Texas, Kenneth Rowan of Los Angeles and Stephen Wright of Burbank, California.

SWIMMING PARTY

Mrs. John McCann gave a swimming party Tuesday afternoon at the Oasis in honor of her sister, Mildred Brown, of Coleman, Texas. In addition to twenty-five or thirty young people, Mrs. I. C. Dixon and Mrs. Reed Brainard were guests of Mrs. McCann at the party. Refreshments of ice cream and cakes were served.

THE AMUSE U BRIDGE CLUB

Miss Violet Robertson was hostess to the club at its meeting yesterday afternoon, serving light refreshments. Substituting were Mrs. J. M. Story, Mrs. Elzie Swift, and the Misses Doris Albee, Moselle Gable and Ruth Smith.

Messrs. Joel and Clifford Terry, of New Orleans, Louisiana are visiting at the home of Tom Terry of this community and Rev. J. D. Terry of Dayton.

Mrs. Ola Self of California visited at the home of her sister-in-law, Mrs. H. B. Worley Wednesday. She was accompanied by Miss Evelyn Nelson and Grandpa Self, both of East Grand Plains.

Miss Olivia Greer, who has been attending school at Fountain Head, Tennessee, for the last two years, returned home for a short visit with her parents, Mr. and Mrs. Jim Greer. Miss Greer intends to return to school this fall.

Truman Howard, the nine year old son of Mr. and Mrs. Monroe Howard, happened to a painful accident Friday, while raking. The horses ran away with the rake throwing the lad from his seat. He was found unconscious. Fortunately no bones were broken, but he was badly bruised.

At the home of Helen Vera Funk Thursday, July 12, the girls, ages 12 to 20 organized a girls club called "Happy Hour Club" quite a number were present. The officers elected were: Grace Watson, president, Alma Bradley, secretary-treasurer. The next meeting will be held at the home of Miss Grace Watson, president.

Mrs. Jess Funk entertained the Cottonwood Woman's Club last Thursday. A number of the members were present. No business was transacted owing to the absence of the president, Mrs. E. P. Malone. A social hour was held followed by refreshments of ice cream and cake, the cake being a birthday cake in honor of Mrs. Charley Nelson and two sons, Harvey and Harry.

TWO YOUTHS IN STATE PEN ARE PARDONED

SANTA FE.—Cervacia Salcido, 17 years old, serving 15 to 18 months in the state reformatory at Springer was pardoned Saturday by Governor Dillon on the recommendation of Superintendent J. F. Hutchison. The boy was committed from Eddy county a year ago.

Manuel Anaya, 16 years old, was granted a conditional pardon from the reformatory. He was sent up from San Miguel county a year ago to serve four to five years.

Judge Luis E. Armio recommended clemency in the case of Anaya.

Loose-leaf binders, special ruling and stock forms—Advocate.

LAKE ARTHUR ITEMS

(Mrs. Ned Hedges, Reporter)

Mrs. Walter Walton is on the sick list this week.

C. Z. Higgins is under the doctor's care and is making regular trips to Artesia.

Frank Donahue and son, John, of Artesia were transacting business in Lake Arthur Tuesday.

Miller Ammons and family, of Artesia, were the guests of Mrs. J. Knox and Miss Myrtle Knox Sunday.

Dick Spence and Howard Beasley came in from Ruidoso Friday, where they had just completed the Beasley cabin.

Redmon Pate and sisters, Misses Montine and Anna Jo motored to Roswell Saturday to meet their brother, French.

Mr. and Mrs. R. F. Beasley accompanied by Miss Montine Pate left Monday evening for a week's stay on the Ruidoso.

Rev. Henry is to start a revival service at the Methodist church here, beginning August 13th and lasting through Sunday, August 18th.

Clyde Nihart and A. B. Flowers were Roswell visitors Monday. Mr. and Mrs. Nihart attended the New Mexico Rural Carriers Association.

Miss Maggie Lane and French Pate came in Saturday from the state normal at Silver City, where they have been attending summer school.

A Fordson pulling a road grader both belonging to the state highway department, took fire from a leaky gas tank and burned just south of here Tuesday morning.

Mr. and Mrs. A. G. Lane and daughter, Miss Alma motored to Hope one day last week to visit their daughter and son-in-law, Mr. and Mrs. Oscar Moore. Mr. Moore is ill with typhoid but is reported to be getting along nicely.

Eugene Moots and family, who have been visiting his parents and other relatives here left Thursday for their home in Chicago. He stopped over at Clovis for a visit with his brother, Howard Moots and family of that place.

Miss Velma Borschell of the Extension department of the A. & M. College was a guest of Mrs. D. A. Bradley, Monday. In the afternoon a number of ladies met at the home of Mrs. Bradley to discuss with Miss Borschell the organization of an Improvement Club in this community. She will be back August 8 to further discuss this matter with the Lake Arthur ladies.

DEPUTY SHERIFF NEAR WEED IS FIRED ON

CLOUDCROFT.—Being mistaken for another man who drove a car of the same make as his own almost cost Deputy Sheriff Doc Herndon his life, he related here Tuesday.

When he was returning from an official trip to Weed several bullets tore through the top of his roadster, and another grazed his temple and cut the band of his hat as he leaned forward to put on the emergency brake. With the car stopped, he fired three times at a figure escaping through the bushes. A car similar to the one he drove which came over the road a few minutes later carried the intended victim of the ambusher, Mr. Herndon believes.

An- important Rattlesnake e, secreting little ve- ving a large range outh. all poisonous species erica is the Eastern Rattler, which some- length of nine feet.

Its habitat extends from southern North Carolina to the Florida Keys, and west to Louisiana and the Mississippi River—commonly about swamps. Horrible indeed is its poison, but fortunately it does not like the proximity of man.

The Prairie Rattler hunts its prey (rodents) in the plains of the Dakotas, Nebraska, Kansas and Oklahoma, and even reaches west of the Rocky Mountains; and up into Canada.

Further south, from Texas to California, the formidable Western Diamond-back Rattler is abroad. This species grows to a length of seven feet, and is responsible for perhaps one-quarter of the snake bites reported in the United States, with a death rate as high as thirty-five per cent.

All over the west coast and in western Idaho, Nevada and Arizona lurks the Pacific Rattler, in the woods and mountains.

Between Arizona and southeastern California, you may find the Bleached Rattler, hiding from its enemies by day among thorny shrubs, and stalking its prey by night—like all Rattlesnakes. Near by are the Green and the Spotted Rattlesnakes.

The Sidewinder Rattlesnake pre-empt the desert sands of the plains from northeastern California and southern California to southern Utah, southwestern Nevada, and into Arizona. This curious snake appears to move sidewise by throwing out loops.

There are other species of "pit

vipers," some of very restricted distribution, others rather widespread. If one would mark on a map of the United States all the areas inhabited by the various species of poisonous snakes, it would be found that practically the whole country is covered with the exception of the extreme northeastern corner—Maine, New Hampshire and northern Vermont.

Poisonous snakes live all about us. In the cities the menace is practically negligible, yet within the actual boundaries of many of our cities there are poisonous snakes. Within sight of New York City, the New Jersey and New York Palisades shelter thousands of Copperheads. Our summer camps, in mountains and hills, are often set in the midst of snake-infested lands. Rattlesnakes line our transcontinental highways and many are destroyed by passing vehicles. One snake hunter in the west reports that fourteen per cent of the snakes found killed in the highways by automobiles were Rattlesnakes.

In the interest of protection against snake bite and the saving of life, an effort is being made to collect all information possible about the occurrence of snake bites throughout the United States, and an appeal is issued by the Antivenin Institute of America that all snake bite cases be immediately reported, giving information regarding the species of snake and the treatment applied, and whether the victim recovered or not. Reports should be mailed to the

PICKED UP ON MAIN

An Artesia lady has a pet prairie dog with a collar and all the necessary harness to make him up to date. Now the town council would like to know whether the said prairie dog is subject to a dog tax. The point at issue is contingent upon the relationship of the prairie product to his domesticated brother. Maybe Governor Clarke can answer this perplexing question.

Sometimes our motives as well as our profession is misunderstood. Mark Corbin of the B. C. hardware sells fishing license, but no other kind. Remembering what the good book said about preachers being fishers of men, a prospective applicant for the ministry became confused in Mark's limitation and asked Mark to issue him a preachers license. We have no doubt that Mark would undertake the job, provided of course that the fee was commensurate with the service rendered, but we have a curiosity to know what the denomination of the product would be after Mark had finished him up.

Wedding Invitations and Announcements, engraved or printed—The Advocate.

A New Car .. A New Car Style .. A New Zenith of Low Priced Car-Luxury and Performance

New slender profile chromium-plated radiator—Long, low bodies.—Generous room for 2 to 5 passengers, according to body model.—Luxurious deep upholstery and appointment detail.—New "Silver-Dome" high-compression engine, for use with any gasoline.—Smooth speed up to 60 and more miles an hour.—Chrysler light-action internal expanding hydraulic four-wheel brakes—no other car of this price possesses this feature.

All Chrysler research, engineering and manufacturing have been inspired by the fundamental motive of giving ever greater quality and value for each dollar of car cost. Public recognition of this principle, in four years advanced Chrysler from 17th to 3rd place in sales in the N. A. C. C. With a new product—the Plymouth—Chrysler is the first to give, at so low a price, the advantages of performance, riding ease, dependability and full adult size which characterize fine cars of higher price. The new Chrysler-designed and Chrysler-built Plymouth is so revolutionary an advance over other low-priced cars, it is such conclusive evidence that the past year's strides in the science of manufacturing have multiplied the purchasing power of the

motor car dollar, that you will surely want to see it and drive it. And above all, you must see its beautiful lines and finish, and stretch at ease in its deep-upholstered, full adult-size bodies, to comprehend how completely the Plymouth surpasses cars heretofore sold under \$1000. The Plymouth is today displayed by every Chrysler dealer. He wants you to see it and to ride in it. Please submit the Plymouth to this trial. We believe you will discover there has never been a car anywhere near its price that can approach the Plymouth for power, pick-up, smoothness, easy handling, safety, quietness and roominess—nor that can equal it in beauty and style.

Lowrey-Keyes Auto Company ARTESIA, NEW MEXICO

LOCALS

Born to Mr. and Mrs. Price Bowman, Thursday, a daughter.

Miss Verda Merle Prude was in town from Hope Saturday.

Born to Mr. and Mrs. Orran (Whitey) McCutcheon, Sunday, the 15th, a daughter.

W. E. Ragsdale and son, Wilmer, were at home from Pecos, Texas over the week-end.

Miss Lucile Morris has been here from Hope the past week visiting Mrs. Howell Gage and Miss Katherine Clarke.

Prof. Kaiser, wife and small son, Clarence, of Loving, were in town from their ranch east of Dayton last Saturday.

Mrs. J. A. Maness, arrived last week from San Antonio, Texas, to visit her sister, Mrs. R. B. Kishbaugh, for several weeks.

M. Stevenson, deputy game warden, returned the latter part of the week from an inspection tour over the eastern section of the state.

Mr. and Mrs. J. S. Sharp returned Friday from a week's vacation, spent at their cabin in the Artesia-Sacramento camp, west of Weed.

Mr. and Mrs. E. H. Perry and daughter, Juanita and Mr. and Mrs. J. M. Story spent Sunday in the mountains at the Sacramento camp and at Cloudercroft.

Mr. and Mrs. Cal Lucas, of Carlsbad, former residents of Artesia, accompanied by Mr. and Mrs. Wilcox, also of Carlsbad were visiting here, Sunday afternoon.

Mrs. J. S. Worley left Tuesday afternoon for Dallas, Texas, to attend the bedside of her brother who underwent a rather serious operation at that place recently.

Miss Inez Jones was here from Carlsbad several days last week visiting Mrs. Fred Brainard. On Tuesday Mr. and Mrs. Brainard and Miss Jones motored to Roswell.

Buck Ballard of Roswell, a former resident of Artesia, is reported to be in a serious condition at a Roswell hospital, following an operation for appendicitis, some two weeks ago.

Mr. and Mrs. M. H. Ferriman and their sons, Robert and George Holden, went up to their cabin on the Ruidoso last week. They were accompanied by Miss Barbara Hatch of Chicago.

Mrs. Anna Mae Robinson and daughter, Wilma, and Mrs. W. L. Batterton returned Friday from a month's visit with relatives at New Bloomfield, Kansas City and other points in Missouri.

Lewis Story went to El Paso, Texas Tuesday on business and will return by the way of Cloudercroft and bring home with him Mrs. Story and the children, who have been spending a week there.

Tex Polk made a business trip to Roswell Tuesday. Will Ballard went up with him to see his nephew, "Buck" Ballard, who was operated upon for appendicitis last week and has not been improving satisfactorily.

Announcements have been received here of the birth of a daughter to Mr. and Mrs. William Mead, of Youngstown, Ohio, on the 12th, they have given the name, Laura Louise to the little lady. Mrs. Mead will be remembered here as Miss Herma Welsh.

C. E. House, an employee of the Continental Refinery has accepted a position with the Santa Fe railway at Carlsbad and moved his family to Carlsbad the latter part of the week. Mr. and Mrs. House have made many friends here, who will regret to see them leave.

Chester Russell, Jr., left last Friday for a short visit with his aunt, Miss Ruth Russell, in Albuquerque. He left there for the east and sails today from New York on the Coama for San Juan, Porto Rico, where he has a position as distributing engineer for the Porto Rico Railway and Electric Co.

Mr. and Mrs. Forrest Griffith have returned from an extended trip through Texas, Oklahoma, Kansas, Arkansas and Missouri, visiting Mrs. Griffith's father at Dodenville, Mo., and Mr. Griffith's parents at Muskogee, Oklahoma. While there a number of lovely parties were given for the couple.

J. M. Jackson made a business trip to El Paso, Texas last week on which he was accompanied by Mrs. Jackson and their children, Mrs. Howard Gissler, and the Misses Mary, Lilla and Nelle, and their son "Pete." They also took with them their granddaughter, Inez Knowles, who has been with them for some time. They came home by way of Elephant Butte dam and Hot Springs and left their granddaughter with her parents, Mr. and Mrs. Oren Van Winkle, who live near Hot Springs.

THE FIRST BAPTIST CHURCH

We were delighted to see an increase in the attendance at our services last Lord's day. Our fans and good ventilation keep our auditorium pleasant for the services. Our orchestra helped us out at the evening hour. We expect them there next Sunday evening. We have a good Bible School with splendid officers and teachers. We shall be glad to see you in one of our classes next Sunday morning. Our young people are doing well even if it is warm weather. Do not forget our B. Y. P. U.'s meet at 7:00 p. m.

The pastor will speak Sunday morning on, "Hushed Harps." If for any reason you are inclined to be down hearted you should hear this subject discussed. At the evening hour the subject will be, "Life or Death, Which?" We expect to have good music. We extend to you a warm invitation to all our services. Our Association meets at Hagerman next Tuesday. We hope to have a good delegation from Artesia.
R. PETERSON,
Pastor.

CHURCH OF CHRIST

Corner 7th and Grand Ave.
Services for Sunday, the 22nd:
Bible school at 9:45 a. m.
Preaching at 11:00 a. m.
Preaching at 8 p. m.

Brother J. E. Wainwright is now in a series of meetings. He will carry out the theme "Christ Crucified," in his sermons. All of these sermons will be full of the scriptures as all of his sermons are. You will be entertained only by the pure gospel preached in power. There will be no dull moments.

We had fine attendance last Lord's day at Bible school. Let every member be present next Lord's day. Be on time. A most hearty invitation is extended to the pastors and their congregations to attend our meeting whenever possible. Come and let us study the scriptures together as they

PANKEY HAS THREE PLANS FOR PUBLIC LANDS N. M.

SANTA FE.—Following Gov. R. C. Dillon's suggestion that proposed legislation be prepared early, State Land Commissioner B. F. Pankey has made three suggestions. These are for a law providing for the disposition of 25,000 acres of land just granted New Mexico by congress; a code covering mineral leases, in the event of passage of a proposed constitutional amendment, and protection of the public interest in gas and oil development in southeastern New Mexico.

BUYERS LEAVE FOR MARKETS

W. E. Doyle, of the Joyce-Pruit Co. dry goods and clothing department, will leave Sunday for St. Louis, Chicago, New York and other eastern markets, on a buying trip. He will join buyers of the Portales, Roswell and Artesia stores and they will buy in a group. The Joyce-Pruit organization has been enthusiastic about coming prospects and plan heavy stocks for the late summer and fall trade.—Current-Argus.

will be presented by Brother Wainwright in these series of sermons.

CLOVIS-ST. VRAIN PROJECT AWARDED

The proposal of Veater and Davis, contractors of El Paso, for the construction of Federal Aid Project No. 142-C in Curry county, has been accepted by the State Highway Commission.

Bids on this project were opened June 20. The bid of Veater and Davis was \$110,304.00.

Project No. 142-M extends from Clovis west to St. Vrain on U. S. Route 70 and is 15 1-3 miles in length. Construction involves grading, building of drainage structures and surfacing with crushed material.

THE ARTESIAN WATER SUIT

Reese and Reese, attorneys, who had intervened in behalf of R. E. Whitney and others in the artesian water suit of the State Engineer against John W. Tweedy, has had their participation withdrawn and that case dismissed, and this leaves the suit as originally decided by the district court. So far no appeal has been taken and the case now stands as decided by Judge G. A. Richardson, in favor of the constitutionality of the law.—Roswell Record.

MOTOR CARS

McNally-Hall Motor Co.
Roswell, New Mexico

WHEN BETTER AUTOMOBILES ARE BUILT... BUICK WILL BUILD THEM

Don't make your car a glutton for punishment

JUST because most motors are built to withstand terrific abuse is no good reason for carelessness with regard to lubrication. Lack of oil or the use of the wrong oil sends many a good engine to an early grave.

Reason enough why you should use Conoco Motor Oil—regularly. This tried and tested oil is of the same high quality whenever and wherever you buy it. Stands up under extreme engine heat. Saves gasoline. Reduces friction to a minimum. Does a thorough lubricating job and hence assures extra life for your car.

There's a grade for your motor. Ask your dealer for the chart.

Consumer Gets the Benefit

A dozen years ago household commodities were—generally—considered cheaper than they are today; and yet electricity rates are still as low or lower.

This signifies but one thing—that economies in the utility business, resulting from elimination of waste and the use of new ideas, directly benefit the customer.

Efficiency is the key to successful operation of all institutions. When the home-manager can see how much more efficiently electric servants work they will emulate the utility's businesses by putting some of the new ideas to work.

A. OBREGON PRESIDENT ELECTED OF MEXICO IS SHOT TO DEATH TUES.

MEXICO CITY, July 17.—General Alvaro Obregon, newly elected president of Mexico, was shot down at a banquet which he attended today in a restaurant in the town of San Angel, 12 miles south of Mexico City. His assassin, known only as "Juan" was immediately arrested and taken to jail. President Calles, who was in Mexico City at the time of the shooting, rushed to San Angel to take charge of the body.

Mexico City was thrown into the utmost excitement by news of the shooting. It is thought in some circles that President Calles, in view of the death of his successor, may continue in office for another term.

The shooting took place shortly after 2 o'clock this afternoon.

Gen. Obregon's body was apparently taken secretly to his home where late this afternoon a great crowd was gathering. For a block on all sides of the house soldiers and police were thrown out as guards, and no one, not even officials, was permitted to enter.

The newspapers affirm that Gen. Obregon died almost instantly. He was shot by a 45-calibre pistol and it is said the bullets entered his body from close range.

President Calles was said to have gone personally to police headquarters to interrogate the assassin. Then he rushed to Gen Obregon's home.

Gen. Obregon's assassin was a young man somewhere in his twenties. Aaron Saenz, governor of the state of Nuevo Leon, who sat beside Gen Obregon at the banquet, was unhurt.

The assassin approached Gen. Obregon who was seated at the banquet table and pretended to show him some newspaper cartoons. Then he shot, from a distance of only a foot or so.

The horror-stricken friends of the president-elect rushed for the slayer who, it seemed, would be stabbed to death or torn in pieces. However, cooler heads prevailed and the man, whose name was reported to be Juan Escapulario, was taken to jail under a heavy guard.

Another report said that the slayer posed as a news photographer and shot the general in the back. The Obregon headquarters announced to newspapers that the president-elect died almost instantly.

The first ten commandments are the hardest.—Council Bluffs Nonpareil.

CRUDE PRODUCTION INCREASES 4,016 BLS FOR CURRENT WEEK

TULSA, Okla.—Estimated average daily production of crude oil in the United States increased 4,016 barrels during the week ending July 14, the Oil and Gas Journal says in its current issue. Only 577 barrels of the increase was light crude.

The biggest gains of the week were in the Gulf coast and Rocky mountain areas, where production in each section increased about 4,000 barrels. The Hendricks area of the West Texas fields increased more than 6,000 barrels but this was more than offset by a decrease of 11,000 barrels in the Yates field. Thus for the first time in several weeks the West Texas area production declined.

CLARKE POPULAR IN HOME TOWN

The following is clipped from the Ibberville South of Plaquemine, La., the home town of Dr. J. J. Clarke: Dr. J. J. Clarke of Artesia, New Mexico, better known to local folks as John Clarke, is slated to run for the governorship of that state. Democratic leaders and friends waited on him Wednesday night a week ago and induced him to make the race; his announcement being made Thursday morning. This good news is of especial local interest for it pleases the whole town.

John always was a good Democrat; and we Louisians know the qualities that make up a good Democrat. And furthermore he is going to make a good executive when they elect him. The only thing about the gubernatorial race in New Mexico that his home town folks do not like is that they will not be permitted to vote for him, for if they could, even though there are several political factions here, he would be the unanimous choice of everybody in Ibberville.

Now it appears what is needed is a rescue party to rescue rescue parties that get lost trying to rescue rescue parties.

GILLILAND REFINERY PROPERTIES SOLD TO JOHNSON & LODIEWICK

News of the sale of the Roswell refinery of the Gilliland Oil Co., to Johnson, Lodewick and Champion, is contained in the Roswell Record of Tuesday:

A deal was consummated here yesterday whereby Johnson and Lodewick, and John Champion, formerly of Tulsa, Oklahoma, bought the Roswell refinery of complete stock and equipment of the Gilliland Oil company. The consideration was not made public.

Mr. Champion, who has had more than twenty years experience in the refinery and marketing business, will have charge of the new business. Mr. champion for many years was head of the Champion Oil company of Tulsa.

The new business will be known as the Valley Refining company and will manufacture and market gasoline, kerosene, distillate, fuel oil and various other products, all of which will be marketed here and at other points in the state.

The present stocks on hand were included in the deal, it was said.

HOTEL WORKER HURT IN FALL

E. Walker, carpenter's helper on the new La Caverna Hotel building, was bruised badly when he fell yesterday afternoon at four o'clock, falling from the deck of the fourth floor to the deck of the third floor, a distance of about ten feet.

Walker stepped with one foot up on a joist which was not nailed and turned with him. As he started to fall, the other foot caught, so as to turn him head forward, his head striking a wooden block on the deck of the third floor. He was shaken and bruised and had a cut above the eye which required two stitches.

He fell into a group of workmen, including a brother, C. Walker, and was picked up and rushed to the office of Dr. Doepp, where his injuries were treated. It is stated that his injuries are not serious, though he is sore and bruised.

Walker has been here about a month, working on the new hotel job. Three of his brothers are also employed on the same job.—Current-Argus.

Announcement cards, blank or printed.—Advocate.

George Offer, aged 101, says the secret of long life is to drink lots of milk and never worry.

A lot of things that once were supposed to result in disgrace now result in a movie contract.—Arkansas Gazette.

WORTH WHILE

Tooth ache came into my life the other night and next morning I was in Dr. Moler's office before he had his white coat on.

Doc ushers me into his chair, rattles a few mean looking instruments on his glass tray and grins at me.

"Nice morning isn't it," he says. I just grunts. I figured if ever I hit him onct he wouldn't be in no position to help me.

Well he sticks his bent mirror in my mouth and drilled a hole in the tooth and shot in some dope that stilled the pain. A couple of days later he fixed me up with a nice plug of silver and antimony and it was all over.

But listen he says: Why can't you people ever get it thru your heads that if you would just drop in here regular it would not hurt you any and you'd never get to the point of tooth ache or big fillings? Why it's been two years since you've been here.

I said "sure." I felt so much better I'd have agreed with anything.

But a couple of days later I was in Dr. Loucks Garage when in comes that tooth puller in a snappy looking roadster. I runs over and ask him what we could do to help him. He tells us she over heats, has a flock of noisy valve tappets, she's a mass of squeaks and misses on stiff pulis. Maybe I was not looking for just such a chance. I says to him: "When will you get it thru your head that if you'd just drop into Dr. Loucks Garage regular you'd not get to the point of big and expensive jobs. Greasing, changing oil, cleaning plugs and distributor points, tappet adjustments ought to be taken care of regular.

It's been two years since you've been in a garage, now it will take them two days to get you out."

LEGAL ADVERTISEMENTS

NOTICE

State Engineer's Office, Santa Fe, N. M., June 14, 1928.

Number of Application RA 1047. Notice is hereby given that on the 13th day of June, in the State of New Mexico, J. H. Everest of Liberty National Bank Bldg., Oklahoma City, County of _____, State of Oklahoma, made formal application to the State Engineer of New Mexico for a permit to drill an Artesian Well and appropriate the underground waters of the State of New Mexico.

Such Artesian Well is to be drilled in the SW cor. NE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 15, Township 18 S. Range 26 E in the County of Eddy, State of New Mexico.

The size of casing is to be 10 inch and the name of the driller of said well is (contract not made). The water from said well is intended to be used for irrigation purposes and the following described tract of land comprising 120 acres is to be irrigated thereby: 30 acres in NE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 15, 30 acres in NW $\frac{1}{4}$ SW $\frac{1}{4}$; 30 acres NE $\frac{1}{4}$ SW $\frac{1}{4}$ and 30 acres in NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 14, all in Township 18 South, Range 26 East, N. M. P. M.

Any person, firm, association or corporation deeming that the granting of the above application would be truly detrimental to their rights in the Artesian Area shall file a complete statement of their objections substantiated by affidavits with the State Engineer and serve a copy on applicant on or before the 25th day of August, 1928, the date set for the Engineer to take this application up for final consideration unless protested. In case of protested application all parties will be given a reasonable length of time in which to submit their evidence in detail or arrange a date convenient for a hearing or appoint a referee satisfactory to all to take testimony. Appearance is not necessary unless advised officially by letter from the State Engineer.

HERBERT W. YEO
State Engineer

LETTER CARRIERS MEET NEXT YEAR CITY OF PORTALES

The 1929 meeting of the New Mexico Rural Letter Carrier's association will be held at Portales, it was determined at the close of the annual convention at Roswell Tuesday afternoon. Portales was elected as the next convention city after a lively scrap between Carlsbad, Portales and Lake Arthur.

R. G. Feipelman, of Melrose, was re-elected president, B. H. Dunlap, Quay, was elected vice president; Charles W. Beiler, of Texico, was elected secretary. The executive board is composed of William A. Nelson, Carlsbad; G. L. Hogland, Albuquerque; W. A. Welch, McAlister, N. M. and Clyde Nyhart, Lake Arthur.

Charles W. Beiler was named delegate from New Mexico to the national convention.

The sessions which closed here at a later hour Tuesday afternoon were held at the Chamber of Commerce and the sessions were well attended by delegates from various sections of the state.

TALK SURFACE PECOS ROAD

The chamber of commerce here has learned that a committee from the Pecos chamber of commerce met on Monday with the county commissioners of Reeves county and indicated a desire to surface the road leading north to Carlsbad. The county judge of that commissioners' court wrote the Texas state highway commission to arrange for a hearing, which will be given at their first meeting in August. Estimates will be made to get an idea of the cost to that road district.

Improvement of the north and south highway through Reeves county would connect with roads to be improved in Pecos county, for which a bond issue was voted. This will improve the road from Fort Stockton north to the Reeves county line.—Current-Argus.

Evangelist—Young man, you should brighten the corner where you are. Railway man—But I work in a round house.—Encino Enterprise.

U. S. COULD DOUBLE PRES'NT CRUDE OUTPUT OPINION OF EXPERTS

WASHINGTON.—If the present crude oil producing capacity of the United States were released production figures, now about 2,350,000 barrels a day would be more than doubled at once.

This estimate was advanced by government oil experts here Tuesday as an indication both of the success of the cooperative efforts in the oil industry to restrict excess production, and phenomenal progress being made with improved methods of oil exploration, particularly exploration by a system of artificial earthquakes.

Both in the Oklahoma and West Texas oil fields, with a potential producing capacity capable of repeating last year's demonstration of the crude oil market if turned loose, it was stated that plans for fixing a maximum production and prorating it among the various companies are in successful operation.

The importance of such agreements in preventing a disastrous flooding of the crude oil market, it was stated, has been greatly increased by the rapid discovery of enormous oil deposits on the gulf coast by means of a system of exploration based on synthetic earthquakes and seismograph recording.

This method of oil prospecting, it was explained, was an outgrowth of unsuccessful experiments during the war to locate artillery positions by recording the earth shock of the guns on seismographs—instruments used for locating earthquakes.

The seismograph calculations of artillery positions were constantly wrong, and it was later discovered that the reason was that the waves of the earth shock travel at different speeds through different kinds of earth structures.

By experiments in Texas it was discovered that earth shock waves which travel at about 6,000 feet a second through ordinary earth structure travel about 16,000 feet a second through salt domes, which on the coast generally indicate the presence of oil.

Equipped with this knowledge oil prospects along the gulf coast now create small earthquakes by means of dynamite explosions, and with seismographs to record the speed of the earth shocks are able to plot accurately the presence of salt domes.

This method of exploration, it was stated, is far swifter and more certain than the old system of sinking wells as the basis of surface observations, and has disclosed enormous gulf coast oil deposits, now being held to limited production by cooperation in the industry.

While the cooperative agreements are working quite well at present it is recognized that the enormous supply constitutes a threat to their continuance if crude oil prices advance sharply.

The result is that the large potential supply is holding crude oil prices to the same level of those of last year, about \$1.30 a barrel. While crude oil prices have not advanced during the last year, the average refinery price of gasoline has advanced about 2 cents a gallon since the first of the year.

Strength of mind is exercise, not rest.

Asked her age in court, Mrs. Edith Chester of Chicago replied that she was 28 years old three years before her father died at 79.

"Here's a rattle for the baby," read a note on a stolen auto left near a police station in Chicago.

See our samples of Engraving—Artesia Advocate.

ROSWELL-DEXTER ROAD INCLUDED IN FIVE PROJECTS TO BE OILED

SANTA FE.—Five new road projects have been ordered oiled by the State Highway Commission, it was announced Monday.

The sections of road in the state which get little rainfall and are proving most difficult to maintain under heavy traffic are being selected for oiling, it was explained. Officials said New Mexico is taking advantage of experience gained in ten years of experimenting in oiled roads by California, Nevada, Wyoming and other western states.

The new projects to be oiled include 17 miles between Deming and Las Cruces; Roswell-Dexter, 16 miles; 17 miles through Springer in Colfax county; part of Federal Aid project 53 between Vaughn and Abo Pass and Federal Aid Project 4 on the Albuquerque-Gallup highway in Valencia county.

Bridges which will meet the requirements of Federal Aid Projects for heavy traffic are to be installed on the Laguna cutoff, it was announced.

CHAMBER COMMERCE ACTIVITIES FOR FIRST SIX MONTHS OF 1928

A report of the activities of the Artesia Chamber of Commerce for the first six months of the present year was submitted by Dr. J. J. Clarke, secretary, at the Chamber of Commerce meeting Monday evening of last week. The report follows:

The annual banquet and election of officers. Conference El Paso parties concerning compress matters. Conference El Paso parties Methodist Assembly grounds. Conference El Paso parties hotel matters. Conference El Paso parties federal aid, state aid and subscription highway. Committee to Lovington regarding Artesia-Lovington highway. Conference with district engineer highway commission, concerning final arrangement Artesia-Lovington road, appropriation \$6,180. Building road to Getty well. Meeting with divisional officials Santa Fe. Protesting to National representatives against the Box bill. News article American Newspaper annual and directory. Entertained supt. Western Union. Questionnaire Out-door advertising Ass'n. of America. Questionnaire department of commerce. Return to Internal Revenue dept, income tax report. Assisted Hope in organization of Chamber of Commerce. Conference Roswell people on compress matters. Conference El Paso people on compress matters. Conference Santa Fe R. R. people on compress matters. Conference Methodist Assembly committee. Conference Ed Kennedy and M. K. T. representatives. Write up American Auto Association. Stock yard removal. Signs around school building. Weekly publicity Artesia Advocate. Correspondent, regular, to El Paso Post, Times and Herald, Amarillo News, Denver Post, Southwestern Dispatch and Albuquerque Journal. Contract agriculture federal hay grading. Passed subscription list White Way, and underwriting same for period of four years at a maximum of \$50.00 per month. Gas celebration, first city in New Mexico with natural gas. Entertained president and secretary-manager El Paso Chamber of Commerce, County Engineer El Paso county and chairman of highway committee El Paso Chamber of Commerce. Committee at meeting Cavern Canyon highway-Roswell. Endorsed movement to pull Highway 66 via Clovis. Attended meeting of West Texas Chamber of Commerce. Conference with Harry Hicks, hotel promoter. Honorary membership to J. B. Harp and D. L. Grimm. Conference with Southern Pacific official. Conference with Alamogordo Chamber of Commerce. Conference with General Manager of Santa Fe R. R., obtaining consent from railroad to furnish financial aid on opening and finishing road along their right-of-way and Flynn-Welch and Yates property. Prizes to be awarded in civic and suburban city beautiful campaign, cooperating with Woman's Club.

INDIAN CHIEFS OF TAOS OFFICIALLY DRESS IN SHEETS

SANTA FE.—When the casual tourist visits the Taos Indian Pueblo near here and sees an Indian walking down the street attired in a sheet, he is viewing an official of the tribe, and not an Indian fresh from his bath.

The custom of Indian officials wearing sheets has been traced back to 1692 when, in that year the Indians went on an uprising, massacred priests and Spanish colonists and captured Santa Fe. General De Vargas quelled the uprising and restored Santa Fe to Spanish rule.

But when the time came for Indian officials to be recognized at government meetings it was found the redmen lacked sufficient clothing. To solve the problem, De Vargas decreed that Indian officials wear a white sheet as a mark of dignity.

Although the Indians now have plenty of clothes, the sheet-wearing officials still are present.

"How long did it take your wife to learn to drive?"
"It will be ten years in September."

Sweet Young Thing—"Just what kind of a doctor are you?"
Junior M. D.—"I am a naval doctor."

S. Y. T.—"My goodness! How you doctors do specialize!"

"BLACK EYES" AND "BLOOD SHOT"

Suggestions for the care of the eyes prepared under the direction of the Surgeon General of the United States Public Health Service, furnish many useful hints:

To remove "something" from the eye, dip little pieces of flannel in hot water and apply constantly below the lower lid. If the substance is a difficult one like a bit of steel, go to an oculist.

For a "black eye" the swelling may be reduced by applying to the closed lids every three or four minutes, little squares or circles of clean, white, absorbent cotton or linen, fourfold, which have laid on a piece of ice until thoroughly cold. The treatment should be kept up continuously for from 12 to 24 hours, until the swelling has subsided. The removal of discoloration may be hastened by applying more or less constantly below the lower lid, little pieces of flannel dipped in water as hot as can be borne.

Treatment for congested lids is better light, rest, attention to personal hygiene, such as a balanced diet, daily baths, and plenty of sleep. A few drops of a solution of zinc sulphate made by dissolving one grain of zinc sulphate in an ounce of water, may be dropped into the eyes as an astringent.

"Blood shot" eyes are regarded as serious, and if there is a discharge from the eye which dries on the lashes and causes the lids to stick together, a competent physician or specialist should be consulted.

Statements by eye experts give attention to the necessity for proper lenses, which can only be secured from first-class eye specialists. They recommend rigid frames such as shell rims, that do not fly out of shape upon the slightest excuse, because once fitted on the patient their form is permanent and satisfying. The old style metal frames have been discarded to a large extent because they are always breaking.

For slight wounds and burns about the eyes the Public Health Service recommends a tepid solution of boric acid as helpful. Pains produced by lime should be immediately treated by a solution of one part of vinegar and two parts of water. Slight burns by acid may be washed with lime water or water to which a little baking soda has been added—one-half teaspoonful to a glass of water. Congestion of the eye lids caused by smoke or dust, or by excessive glare, or by constant reading, may be frequently relieved by resting them and by a mild instilling or an antiseptic lotion. A solution of ten grains of boric acid to the ounce or a light solution of sulphate of zinc, one grain to the ounce of water, or argyrol in a five to ten per cent solution, is recommended for "pink eye" and similar troubles.

The man who hides behind a woman's skirt today is not a coward; he's a magician.—Lord Dewar.

A Genius is a man who takes the lemons that Fate hands him and starts a lemonade stand with them.—Elbert Hubbard.

"Understand Bink's wife is going to Paris this summer for her clothes."
"Well, I wondered where she'd left them."

INCREASING NUMBER MOTORISTS TRAVELING EAST CUT-OFF HIWAY

An increasing number of motorists are traveling the short cut highway to Fort Worth, by way of the oil fields and Lovington. Local people, who have had an occasion to travel the short cut road are well pleased with the condition of the highway and say that good time can be made over practically all of the 427 mile route. The slowest travel is between the oil field and the cap rock, which is not bad, but just a bit rough due to the continued dry weather. Moisture on this stretch of road would be appreciated and would enable the maintenance crew to put the road bed in good shape.

Harry Hicks, Fort Worth capitalist, drove the 427 miles from Fort Worth to Artesia in twelve hours without any difficulty.

He: I was thrown out of a car the other day, and would have been killed if I hadn't hit on something soft.

She: Did you fall head first?

WE THANK YOU!

Grapefruit - Today's Flapper

CITRUS fruits, once the luxury of kings, now rank among the everyday necessities of life. Oranges are, perhaps, the most used of the group, although lemons always will fill their niche. But the newest one of the three sisters, grapefruit, is rapidly coming into her own. She might be called the flapper of the group.

Porto Rico was growing grapefruit in 1898 when the United States took her under her wing; but it remained for Americans to see the possibilities in the new fruit. To the surprise of New York, a new fruit appeared on the market - grapefruit. Then, a few years later, canned grapefruit was prepared. To prepare it women wash,

core, and peel the fruit and separate its segments from the pith. The segments are then packed in cans with sugar, sealed and cooked. By this method the fruit retains its original flavor, and is ready to use in the many places where its tangy flavor will fit.

Uses of Grapefruit

Grapefruit, in common with the other citrus fruits, is particularly good from a dietetic standpoint. It is high in the vitamin C which averts the dread disease scurvy. Canned grapefruit is especially good for use in the children's diet.

Syrup from the grapefruit is also the basis of many unusually delicious fruit drinks.

RELIABLE METHODS TO REMOVE STAINS

Most spots and stains can be removed at home if reliable methods are known and a few simple precautions taken says Miss Veda Strong of the New Mexico Agricultural College.

First, consider the nature of the spot as this determines its treatment. If the right method is not used, the stain may be "set" so its removal becomes very difficult, if not impossible. The kind of fabric upon which the stain occurs and the effect of stain removers upon all fabrics should be considered. Acids and alkalis often seriously affect fibers, so care should be taken in using them.

The following methods are given for removing some common stains. Blood stains. 1. If material is washable, soak in cold or lukewarm water until stains turn light brown, then wash material with hot water and soap. 2. Soak in solution of 2 tablespoons household ammonia to one gallon water until stains are loosened, then wash. For old stains ammonia is more satisfactory than soap.

Chewing gum. 1. If material is washable, soften gum with egg white and then wash. 2. Prolonged treatment with carbon tetrachloride is usually satisfactory. It may be necessary to remove the traces of sugar by sponging with water.

Chocolate or cocoa. 1. Soap and hot water, if material is washable, is often all that is necessary, but Javelle water may be used on cotton or linen if stain is persistent. 2. Soak the stained portion of the fabric in wood alcohol made alkaline with ammonia solution. This is an effective method.

Fruits and berries (fresh). If stain is on white or fast color washable material, stretch the stained portion over a bowl and pour boiling water upon it from a kettle held at a height of three or four feet so that the water strikes the stain with some force.

2. Stains not removed by boiling water may be bleached by moistening with lemon juice and exposing to bright sunlight.

Grass and other greens. 1. If material is washable, use hot water and soap as in ordinary laundering, rubbing the stain vigorously. 2. Ether or denatured alcohol may be used on fabrics which can not be laundered, applied by sponging.

Grease and oils. 1. Remove from unwashable materials by means of blotting paper and a hot iron. Candle grease may be removed in this manner.

2. Chloroform, ether, gasoline, naphtha or some commercial solvent may be used to remove grease spots from unwashable material. Place a pad of clean cloth or a white blotter beneath the stain and sponge with her and will bring his aunt, Mrs. Moyer, and children, who have been visiting in Wyoming, back with him.

3. For axle grease, tar or ear grease on cotton fabrics, cover spot with lard or butter, let stand a few minutes, then launder with warm water and soap.

HAY MARKET ADVANCES

The increasing demand for choice alfalfa hay has caused the hay market to advance, touching a new high mark for the season. Choice hay is bringing \$20.00 per ton and better. Because the past few days have been an off season, what might be termed in between cuttings, neither the local hay men nor the Association have been able to supply the demand.

A change of schedule of the Sunset Stage line, with slight difference in time, went into effect Sunday.

PARTY BOLTERS MAY NOT GET NAMES ON BALLOT IN PRIMARY

SAN ANTONIO, Tex.—Democratic candidates in Texas who refuse to support the party presidential nominee may be barred from the primary ballot, the fourth court of civil appeals ruled at San Antonio, Tuesday.

The court upheld the action of the Cameron county district court which refused a writ of mandamus compelling the county executive committee to print the name of State Senator Thomas B. Love, a candidate for lieutenant governor, on the county ballot because Love had publicly announced that he would not support the party presidential nominee, Gov. Alfred E. Smith of New York. Love had maintained that he was entitled to a place on the ballot because he had been duly certified by the state democratic committee.

The decision recognized the right of every citizen to change his political theories and to support whomever he pleased, but asserted that "when such a change is contemplated, justice to his former party demands that he should not seek its honors or emoluments."

To Supreme Court

DALLAS, Tex.—Mrs. Edith Wilms, candidate for the democratic gubernatorial nomination declared here Tuesday that she would seek a supreme court mandamus forbidding the counting of the democratic primary vote in Cameron, Galveston and Val Verde counties if her name was not placed on the ballots of those counties.

Mrs. Wilms' name, together with those of Judge Wm. E. Hawkins, gubernatorial candidate and state Senator Thomas B. Love, candidate for lieutenant-governor, were left off the primary ballot in those counties they had announced they would not support Governor Smith for president.

The court of civil appeals at San Antonio refused issue an injunction to force the democratic executive committee of Cameron county to put Senator Love's name on the ballot.

SANTA FE GETS EXTENSION

SANTA FE.—The Santa Fe railroad has been granted a 15 day extension from July 30 to put into effect lower rates on gasoline and petroleum products from Albuquerque to nearby points as ordered by the State Corporation Commission, Commissioner Hugh H. Williams said yesterday.

PLAY THE GAME

In days of depression the man who sits down and wonders where business has gone is in a hopeless and dangerous condition. Far better is it to task where business is coming from—how can it be found, stimulated, created? The prize ring has exhibited many men who could withstand a lot of punishment, but unless they packed a wallop they never entered the Champion class.

Today more than ever before we live in an age of aggressiveness. We must strive for business. The story of the man who lived in the wilderness and for some reason best known to himself, specialize in the manufacture of mouse traps of such excellence that eager mouse trap enthusiasts wore a beaten path to his door, is an allegory which should appear under the heading, 'Interesting, If True.'

More is needed for business success than mere excellence of product or service. The public must be told, interested, convinced but firmly caused to relinquish their money for the thing offered for sale.

Should you ever feel the urge to retire to a deep wood and engage in the fabrication of mouse traps, trust not to the cleverness of your contrivance, to its engaging appearance nor even to its sound economic value. It may attract mice in hordes, but buyers will be few unless you extol its merits and broadcast its worth. Millions may chew Squirmy's Gum, not because the health giving, tooth saving, dyspepsia defying, jaw developing properties of this delectable confection surpass those of other gums, but by the reason of the millions of dollars which have been expended in advertising its beneficent effect upon the human race and the unalloyed joys it yields its ardent chewers.

But to get back to our first consideration: Passive despair vs. active endeavor. It is the man who forgets the exit of business and loses no time in searching out new uses and new customers for his wares or services who make the quickest progress back to normal. Look up-stream for new business and new opportunities.

Kelley Polk and his grandfather, Mr. Ferguson, arrived yesterday from Abilene, Texas to see Kelley's sister, Mrs. Skelt Williams, who is seriously ill with typhoid in the Sisters' hospital in Carlsbad. The latest reports indicate that Mrs. Williams is slightly improved. The baby, who is here with its grandmother, Mrs. "Col." Williams, has also been sick, but is much better.

SANTA FE IS BUILDING A SCREENED GRAVEL DRIVE ON PROPERTY

The Santa Fe is constructing a modern driveway on their property near the passenger station. Beginning at the white stakes west of the station, a screened gravel driveway will be constructed to the south intersecting Main street just west of the railroad crossing. The grading work has been done by the city machine and the driveway is to be surfaced with screened gravel. When completed it will present an appearance similar to the gravel walk just south of the brick walk at the passenger station.

ARTESIAN WATER SUIT FILED

Information was received here Tuesday from Santa Fe by A. D. Hill, stating that the suit to test the present artesian water well law has been filed. The case will be under the direction of Robert C. Dow, attorney-general. The style of the case is the state versus Pearson Brothers and is designed to test the constitutionality of the 1927 well law.

HUNTING FUTURE GRAND OPERA STAR

With the discovery of a future grand opera star or radio artist in New Mexico as her goal, Mrs. George W. Frenger of Las Cruces, president, the New Mexico Federation of Music Clubs, has been re-appointed chairman of the New Mexico Sponsorship Committee which will supervise participation of this state's young singers in the Second National Radio Audition.

This was announced by Dean R. W. Goddard of the New Mexico College of Agriculture and Mechanic Arts, who again will be State Manager for the Audition.

Rewards totalling \$17,000 in cash, free musical conservatory training and 120 medals have been donated by the Atwater Kent Foundation for Audition winners, and Mrs. Frenger will start immediately to help ambitious young New Mexicans gain these benefits. All amateur singers between ages of 18 and 25, inclusive are eligible.

Thirty-three states of the Union already organized to present the Audition opportunities to their young vocalists. Mrs. Frenger, assisted by Dean Goddard, expects soon to complete a state executive committee, with members drawn from every section of New Mexico.

Local singing contests, through which ambitious vocalists will first be heard, then will be arranged in Santa Fe, Albuquerque, Las Vegas, Las Cruces, Roswell, Carlsbad, Hagerman, Tucumcari, Fort Sumner, Raton, Clovis, Dawson and other cities having promising voices.

Mrs. Joe Anderson of El Paso, her son-in-law and daughter, Mr. and Mrs. Stephen H. Wright, also her twin granddaughters, Dorothy and Catherine Connolly, of Burbank, California, who had been spending a week at the home of Mrs. Anderson's son, Wallace Anderson, returned yesterday to El Paso. The California members of the party have been visiting Mr. and Mrs. Anderson in El Paso since July 3rd. Mr. Joe Anderson, who has been in very poor health for some time past, is considerably better at present.

A DOZEN GOOD RULES

To be so strong that nothing can disturb your peace of mind.

To talk health, happiness and prosperity to every person you meet.

To look on the sunny side of everything, and make your optimism come true.

To think only of the best, to work only for the best.

To give your financial and moral support to your local newspaper and thereby indirectly help your town.

To be just as enthusiastic about the success of others as you are about your own.

To forget the mistakes of the past and to press on to the greater achievements of the future.

To wear a cheerful countenance at all times, and have a smile ready for every living creature that you meet.

To give so much time to the improvement of yourself that you have no time to criticize others.

To be too big for worry, too noble for anger and too strong for fear.

To think well of yourself and to proclaim this fact to the world—not in loud words, but in great deeds.

To live in the faith that the world is on your side so long as you are true to the best that is in you.—Ex.

Protecting an entire community against smallpox by prompt vaccination is a real contribution to public welfare. This was the accomplishment of Dr. C. B. Austin, Hidalgo county health officer, when smallpox appeared at Duncan, Arizona. Just over the line on the New Mexico side is the community of Virden. Dr. Austin offered vaccination to about one hundred persons who were likely to be exposed through their contacts in Duncan. His offer was accepted and no case of smallpox occurred in his county, as a result. Action before the event, foreseeing trouble and preventing it, is the highest exemplification of a health officer's function.

COUNTY SEEKS AID TO TOP HIGHWAY

Seeking to get the Carlsbad road, No. 17, surfaced like head, and other state highway county commissioners, last week, and decided to send two members with two citizens to the State Highway Commission for their next meeting, making their request.

A maintenance crew working on this 60 mile road, seeking to put it in better weather condition which is possible, without a good surface, phalt or its equivalent. They need rain for their work, and when they finish a mile the rain comes to force the traffic over this road, tourists wishing to see the cavern, it has become one of the most important lateral roads in the state. It is nationally known as the Gateway to the Carlsbad Caverns and Broadway. Pecos Enterprise.

A daughter was born to Mrs. Ira Lewallen, yesterday, 18th, inst.
