THREE SAMPLES OF WATER GIVEN O K BY STATE HEALTH DEPT.

Dr. O. E. Puckett, county health officer recently received a return on the samples of water sent to the state health laboratory for analysis, to determine if the water supply contained typhoid bacteria. Three samples were taken, one from the Lawrence ranch, one from the Midvale camp and one from the city water supply. Dr. Puckett states that a very satisfactory report was received on all samples sent, as there was positively no pollution found in any of the samples.

GOVERNORS WILL MEET IN CARLSBAD FOR W. T. DIST. CONFERENCE

CARLSBAD, Aug. 2, 1928.—One thousand visitors in Carlsbad Cavern on August 7, is the forecast of the superintendent of the Carlsbad Cave National monument and local Chamber of Commerce officials, upon the occasion of the visit of Gov. and Mrs. R. C. Dillon and the State Highway Commission of New Mexico, who will come to Carlsbad to formally welcome Governor and Mrs. Dan Moody, the entire highway commission of Texas and the president, general manager and other officials of the West Texas Chamber of Commerce, who will hold the Inter-mountain district convention of the organization in Big Room, in Carlsbad Cavern, 750 feet undernearth, on Tuesday, August seventh.

Governor Dillon has extended invitations to the governors and the highway commissioners of Arizona, Colorado and Oklahoma and Chihuahua, Mexico, to join the assemblage in the cavern, believing that a personal visit to such a magnificent creation of nature would give impetus to a co-ordinated interstate road building program between the neighboring states and New Mexico.

Sensors Sam G. Bratton and Bronson Cutting and Representative John Morrow also have been asked to attend the Carlsbad festivities.

The West Texas Chamber of Commerce Motorcade will be in charge of A. M. Bourland, president, and Homer D. Wade, general manager of the organization and numerous directors also will be present. The Motorcade will leave Snyder, Texas, Monday morning, August 6 and arrive at Carlsbad in the late afternoon of the same day. A program will be held that evening in the American Legion Pavilion at Carlsbad Bathing Beach and will be followed by swimming and boating.

The Inter-mountain district of the West Texas Chamber of Commerce includes Chambers of Commerce at Alamogordo, Artesia, Cloudcroft, Elida, Fort Sumner, Hot Springs, Las Cruces, Lovington, Portales, Roswell and Carlsbad, New Mexico, and all cities will have large representation at the district convention.

The program in the cavern will include addresses by the visiting congressmen, governors, highway commissioners and other distinguished guests and it is generally conceded that the large auditorium of Big Room offers the most startlingly beautiful setting anywhere in the world for such an occasion. Superintendent Boles will personally conduct the visitors through the cavern and will be assisted by Jim White, the native Texas cow-boy discoverer-explorer and chief guide. Numerous hotel reservations already have been made for the convention dates and with the regular large crowd of daily visitors, Carlsbad anticipates that private homes will be opened to accommodate the hundreds of tourists.

NEW SANDWICH SHOP OPEN

Tommy Spivey has opened a sandwich shop in the quarters formerly occupied by the C and B confectionery, the first door east of the Sanitary Barber Shop. The interior of the building has been remodeled, new floor coverings have been laid, the walls have been repapered and booths have been installed in the rear of the shop. The shop is electrically equipped. Mr. Spivey will serve all kinds of sandwiches, pies and cold drinks. The public is cordially invited to call by and inspect the new shop. See the announcement appearing in this issue.

BIG COTTON CROP

The Palo Verde Valley Riverside County, is due for a 16,000-bale cotton crop, based upon estimates of ranchers, ginners and others in that district. The planting embraces about 24,000 acres. Lack of frost and with water for irrigation little risk is taken in that favored section.

SCATTERING SHOWERS FALL IN MOUNTAINS RANGES ARE ALL GREEN

Five-foot Rise in Pecos Monday—Good Rain Fall In Y O Crossing Country And Shower East of Hope.

Scattering showers have continued to fall during the week in portions of the valley and have been especially heavy in parts of the mountains. Both the Ruidoso and Sacramento sections have received several showers, one of the heaviest rains for the week falling in the foot hills west of the Ruidoso.

A heavy bank of clouds in the west materialized moisture for the Y. O. crossing country Monday afternoon and more than an inch of rain is believed to have fallen within a short time. Monday's rain caused about a five foot rise in the Pecos to flow in the Pecos river. Tuesday afternoon a good rain is reported in the section just east of Hope.

Continued precipitation over last week has made a wonderful change in the appearance of the range, where it once looked bare and brown it has assumed a green carpet like appearance in many places. While the cloudy weather has been bad for the cotton growers, who are fighting the army or cotton worm, a few more showers will practically insure plenty of grass for winter.

VISITOR FROM ENGLAND

Miss Daisy Stone sailed from Liverpool, England Saturday for a fortnight visit at the home of her brother, Ed Stone, whom she has not seen for many years and is expected to arrive here next Wednesday or Thursday. Miss Stone is a teacher in Somerset, England, where the schools have only one month's vacation in the summer.

TEN MILES OF PIPE LINE LAID ON RANCH NATIONAL LIVESTOCK

The National Livestock Co., with headquarters in Carlsbad has recently completed one of the longest water pipe lines ever constructed in this section. The line about ten miles in length will be used to supply the ranch house and range, situated in the Guadalupe mountains. The cost of the line is said to be around \$30,000.

The source of the water supply is located near the head waters of Last Chance canyon. From the spring at Last Chance canyon, the water is lifted 1042 to the highest point with a pressure of 800 to 900 pounds at the intake. A large crude oil engine operates a pump, which supplies the water to the various parts of the range.

The ranch of the National Livestock Co., consists of about 300 sections, on which about 3500 head of high grade Hereford cattle is run.

ARTESIA CHURCHES TO HOLD UNION SERVICES DURING THIS MONTH

Meeting Place Will Be At Baptist Church — Plans Have Union Orchestra For Services Each Sunday Evening.

The Methodist, Presbyterian, Baptist, Nazarene and Christian churches will follow the example of other valley communities and hold united services for the Sunday evenings of August as arranged by the local pastors the other day in council.

In order to avoid the confusion of changing from building to building it was decided to have these services in one place during the four nights and the Baptist church was selected. The pastors will have charge of the services, though the preachers will not be announced. People are urged to come not so much to hear a certain man as to worship God.

A united orchestra composed of members of the various churches will lead the singing. Members of this orchestra are urged to attend rehearsal (tonight) Thursday evening at 8 o'clock in the Baptist church. A committee is working on special music and it is hoped to make singing a big feature in these services. Services will be from 8 to 9 each Sunday evening. They will be brief, bright and brotherly.

Here is an opportunity for the churches of Artesia to unitedly testify to the community that "man liveth not by bread alone." We need closer co-operation between the various churches of the community and this is a good way for it to be furthered.

In these days when church attendance is usually small, let us crowd one of the church buildings and get the added inspiration which comes from being together with one accord in one place.

ARTESIA GIRL INJURED WHEN ROADSTER IS OVERTURNED ON ROAD

One injury is reported as result of a car accident, which occurred on the north highway, just beyond the Midvale filling station, about 11 p. m. last night. A young man by name of Sue Bell of Roswell, in some manner lost control of his car while driving at a rapid rate and turned over with disastrous results. With him were Garland Rideout and Miss Marjorie Wingfield, the latter sustained a broken collar bone and minor injuries. Rideout escaped without hurt, but Bell was slightly injured. He was taken to Roswell and the extent of his injuries are not known at this writing.

While the car, a Ford runabout was damaged some, the auto is reported to have gone through the accident without breaking the windshield.

Advocate want ads get results.

EIGHT BIRTHS, FOUR DEATHS RECORDED FOR MONTH OF JULY

Eight births and three deaths were recorded by S. E. Ferree, sub register for the Cottonwood, Atoka and Artesia districts, during the month of July as follows: Births, Mr. and Mrs. W. E. Bushy, daughter; Mr. and Mrs. S. R. Emmert, daughter; Mr. and Mrs. Sam H. Henderson, son; Mr. and Mrs. Price Sterling Bowman, daughter; Mr. and Mrs. O. T. McCutcheon, daughter; Mr. and Mrs. Ira Lewallen, daughter; Mr. and Mrs. Jack Cunningham, son; Mr. and Mrs. Walter Nugent, daughter. Deaths: P. Gonzales, A. Villado and Floyd Gill.

OILERS TO MEET THE BAILEYBORO, TEX. BALL TEAM HERE SUNDAY

The Artesia Oilers won a one sided game here Sunday from Lake Arthur by a score of 17 to 2. The locals secured 17 runs from 18 hits, while the visitors garnered 2 runs from 3 hits.

Next Sunday at 3 p. m. the strong Baileyboro, Texas team will meet Artesia on the west Main diamond. This is Baileyboro's first invasion of the Pecos valley and a good game is expected.

QUARTERLY CONFERENCE AT DAYTON SATURDAY

Rev. A. L. Moore, presiding elder will hold the fourth quarterly conference of the Lake Arthur-Dayton charge at the Dayton Methodist church, Saturday August 4th at 1 p. m. Rev. A. L. Moore will preach at the Dayton church at 11 a. m. on the above date.

The Lake Arthur-Dayton charge embraces the Methodist churches of Lake Arthur, Loving, Dayton, Malaga, and Lakewood.

NATIONAL HIGH SCHOOL ORCHESTRA

The Etude, one of the leading music journals of America, featured a picture of the National High School Orchestra in the August number.

The editorial article was headed "The Most Remarkable Orchestra in the World" and stated there was thirty-seven states represented in the organization.

The names of the orchestra members and their addresses were included in the article.

New Mexico was represented with two members, Reed McCaw of the Artesia High School Orchestra and Ernest Harp Jr., of the Roswell High School Orchestra.

HOPE RODEO AUGUST 29, 30, 31

W. M. Coats of Hope, manager of the Hope rodeo was a pleasant caller at the Advocate office yesterday and informs us that the annual rodeo at Hope will be held this year on the last three days of this month, August 29, 30 and 31. The Hope rodeo has always proved an attraction for this community and Mr. Coats hopes to make it more so this year. "It will be bigger, better than ever," he says. See his announcement in this issue.

SMALL SON OF MR. AND MRS. O. L. GILL DIES

Lloyd, the three months old son of Mr. and Mrs. O. L. Gill, died Tuesday night about 8 p. m. following an attack of acute indigestion. Burial was made the following day in the Woodbine cemetery.

NEW CLEANER AT ARTESIA CLEANERS

O. C. Glover has accepted the position as cleaner at the Artesia Laundry and Cleaners, succeeding C. M. Goodman, who has removed with his family to Carlsbad.

An Explosion Wrecks The Joyce-Pruit Office Friday

Three Injured, Two Severely Burned—All Will Recover—Damages to Building Will Run Into Several Thousand Dollars.

Three men were injured and the office of the Joyce-Pruit Co., wrecked by a mysterious explosion, which occurred about 7:30 o'clock Friday morning. Two employees of the store, Willis Morgan and Crowl Allen, escaped with severe burns, but were not seriously hurt otherwise. Ruben Dunn, a customer who was standing near the office window, was blown to the ceiling, but save for a severe shake up, escaped with minor injuries. The force of the explosion rocked the entire building and wrecked the part of the building occupied by the office, blowing brick into the alley from near the top of the building and the plate glass from the show window in the grocery department. The floor in the office was torn from the sleepers, the office furniture and fixtures was piled in a heap and the rear end of the roof was lifted from the walls.

One peculiarity of the incident was the fact that some residents living near the store did not hear the explosion, while others living several blocks away distinctly heard a noise resembling a dull thud.

In an effort to determine the origin of the explosion, Tuesday the officials of Joyce-Pruit Co. obtained the services of Sam Albee of the American Glycerin Co., high explosive expert. After an examination of the premises, Mr. Albee stated that there was no evidence of either nitro-glycerin or dynamite having been used. In his opinion the explosion was the result of natural gas.

No estimate was made public as to the probable loss sustained by the Joyce-Pruit Co., as a result of the explosion, however, it is known that the amount of damages will run in the neighborhood of \$6,000 or better. Work repairing the building is underway and expected to be completed within a short time.

Despite the fact that a financial loss was sustained by the Joyce-Pruit Co., it is generally regarded as very fortunate that no employee or customer of the company was seriously injured as result of the catastrophe and that save for a slight interruption Friday, the business went on as usual.

In making the necessary repairs special care will be exercised to prevent the recurrence of the catastrophe and plenty of ventilation will be provided both in and under the building.

BUICK SEDAN STOLEN

J. E. Bowman is offering a \$25.00 reward, for the recovery of his Buick sedan, which was stolen in the oil field Saturday night. The car, parked near the old Denton store was stolen about 11 p. m. The car was located south of Carlsbad Monday.

FIFTY REGISTER ON THE FIRST DAY; BOARD TO SESSION EACH SAT'DAY

About fifty voters registered, Saturday, the first day of registration, says S. E. Ferree of the local registration board. There are now approximately 610 voters registered in this precinct. Two years ago there were 760 voters registered for the general election in this precinct. This number, however, does not represent the voting strength of the precinct, as there was different means of voting other than by the registration system, at this time. The names of two hundred voters were stricken from the 1928 list because the local board of registration did not know the address of these voters.

If your name does not appear in the registration list, you should register at your earliest convenience. The board will convene each Saturday from now until the 25th of this month. The two places of registration are at the city hall and the V. L. Gates cotton office.

Community Vision

No community will ever rise above the vision, intelligence and ability of its citizenship. Community building must start with the individual citizen. It must be kept up by cooperation to attract two other elements necessary for growth and expansion—MEN and WEALTH!

If you go out ter plow some day when the weather's sizzling hot,
You'd better take the grace of God fer you'll need it like as not.
Fer when you stoop behind yer team ter hook a tug er chain,
You're purty apt ter feel a touch uv anger and uv pain.
When the ole mare wasps her long tail across yer sweaty face,
Oh there's the time my friend you need the power uv savin' grace.
Don't kick her in the belly now, don't punch her ribs er thigh.
She didn't switch her tail at you—she aimed it at a big hoss-fly,
Who with his little gimlet-sharp is perched on her bloody side.
With both hind legs a stickin' up, lance pushin' through her hide.
If her ole tail kaint make you cuss you've got religion shore;
Yer soul is full uv it—you don't need any more.

—Swiped

STABILIZATION AND PROGRESS
IN OIL INDUSTRY

The oil industry is making strides which will, in a comparatively short time, enable it to solve the problem of conservation of its resources, declared Edwin Higgins of the California Chamber of Mines and Oils.

Mr. Higgins calls attention to the rapid progress that has been made in producing, refining and marketing; to the experiments dealing with repressuring of old wells by pumping surplus gas back into the oil zones; to the cracking process which has enabled refiners to increase greatly the gasoline recovery per barrel of crude, and to the constant improvement of motor fuels, as outstanding recent developments.

He points out that during the past two years the oil industry has devoted a great deal of study to standardizing oil field equipment, a matter which, by the elimination of much odd sized material will considerably reduce the cost of field operations and cut down overhead expenses, thus keeping the cost of finished petroleum products within reach of the consumer, even in the future when exploration for, and production of petroleum may become much more expensive than it has been in the past.

"I know of no industry which is making a more serious endeavor to solve its major problems," said Mr. Higgins, "and certainly none has made such progress in that direction in a few short years as the oil business has made."

WHAT THE NEW MEXICO
EDUCATIONAL ASSOCIATION WANTS

The New Mexico Educational Association, through J. R. McCollum, representing the executive committee, has submitted the following measure to both political parties with the request that the same be adopted:

"We believe that the welfare and safety of our public school system demand that the management of the funds, lands and other property, and the administration of the business and affairs, of our elementary and secondary public schools should be entrusted to a single unit or department of state government, administered by a board continuous in its tenure, with only a possible change in a minority of its members by any incoming administration; with the sole power of appointment and dismissal of a state superintendent of public instruction, a commissioner of public lands, both of whom shall be executive officers of such board, and such other executive and clerical officers and employees as shall be necessary for the effective exercise of the powers and duties of such board; and we commit ourselves and pledge the candidates of this convention to an honest effort to consummate such a program, including the enactment of such legislation and the submission of such constitutional amendments as may be necessary or proper for its fulfillment."

APPORTIONMENT LESS

It is estimated that the state apportionment for the public schools will be less than \$8.00 per child says J. R. McCollum, representing the New Mexico Educational Association, executive committee, in an address at Albuquerque last week. The apportionment, which is derived principally from the land office receipts was \$9.10 in 1926 and \$8.47 in 1927.

A survey by Mr. McCollum shows that New Mexico has 9,500,000 acres of common school lands and its state institutions have 3,500,000. These lands if sold by a minimum price allowed by congress would bring \$52,000.

TOURIST CAMPS

(State Health Department)

The population of this state must be doubled every night, if all of the new automobile camps are occupied to capacity. Where once prairie dogs and rattlesnakes held full sway under the cactus, we find Drive Inn has met the automobile tourist more than half way on his long trek to the next town. All of them have more or less "modern conveniences". But an inspection will disclose that some of these "conveniences" are decidedly primitive.

As a matter of self protection every village in this state needs to keep close watch on these camps. The volume of tourist traffic increases amazingly. Every newcomer is a possible source of disease, especially typhoid fever. Danger from such a source can be obviated, and the visitor made more comfortable, by maintaining regular supervision over all camps and enforcing the regulations. Civic pride alone would seem to demand this, for a town's reputation spreads over every trail by word of mouth. Clean, well-kept camps will advertise the town and attract business. An insanitary camp will disgust those who care for common decencies.

There is a state law that prescribes the minimum sanitary standards for these camps. Casual observation on the road makes it apparent that this law is completely shattered in many communities. For one thing, it is required that a copy of the law be posted prominently at the camp. One observer needs to have his glasses changed, for he was unable to see a copy at any camp that he visited. Another requirement of the law is that toilets be absolutely fly proof. Comments on this point are not fit for publication in a "family" paper such as this.

A card, bearing the law in full, will be furnished every camp. But merely posting it will not work a miracle. The health officer will have to bring to bear all of his oratorical powers to persuade some proprietors. In the end it may be necessary to close a few camps, which would not be an irreparable loss if they are that bad.

DO NATURAL RESOURCES MAKE A TOWN?

Natural resources help; but do not always make a town, as has been illustrated time after time in various parts of the United States. It is to be admitted that the town possessing natural advantages has the edge over less fortunate neighbors, but the mere fact that a community may be rich in potentialities does not always assure their growth. Neither do the most intelligent children develop into the most influential citizens.

There is such a thing as a community literally pulling itself out of the mire by the boot straps. This, we'll admit, happens but rarely, although there are occasions when properly directed effort combined with the opportune moment will turn the trick.

There is one thing sure, we can't all stand idle and wait for the other fellow to build the community for us for usually such fellows are too busy building wherever they live.

There is many a western city that can not account for the growth of the community through the surrounding natural resource, for the so-called natural resource isn't there, at least not present enough to account for the rapid growth some of them are experiencing.

MORAL OR FINANCIAL SUPPORT?

John W. Wells, former resident of the Pecos Valley and now editor of the Olathe Register at Olathe, Kansas, has gained quite a reputation as a writer through his attack on the chain store system as an economic evil. Trade journals thought so much of Mr. Wells' writings that a New York concern had them syndicated. You would have thought that the idea would have appealed to the individual merchants, and they did give him their moral support, but he states that the advertising of the individual merchants as a group fell below what it amounted to before he started his campaign against the chain system.

In commenting on the plans of Mr. Wells, a trade journal remarks:

Perhaps J. W. W. was wrong in ever attacking the chain stores. Perhaps the idea is universally unpopular, but we don't think so, and it will take more than the countless reams of chain store propaganda we have seen to convince us that the chain store is not an economic evil and one of the swiftest methods of reducing our nation to an army of "clerks" and our small cities to "whistling posts".

But—if that's what our folks want, we want them to have it. The aim and ambition of any newspaper should be to assist the people in securing or accomplishing that which the people themselves think is best. Here's how!

LIVIN' ALONE

Just another little essay on how nice it is to live alone. You've no doubt read about it before. And this is how it appeals to me: When you get up in the morning you go in and sit down to the table to eat breakfast. Yes you do, fat chance! You dress and go down town. Some one asks you what you want for breakfast and for the life of you you can't think. You're not in the habit of having anything to say about what you eat for your morning meal—or any other. Finally, after somehow managing to select a meal, you finish and go on to work. That part is all right because its the regular routine. At noon you have to go through another session of guessing what would be best for you to eat. Then you seek your couch to take the customary noon snooze and the house is so doggedly quiet you can't sleep a wink and so give it up and go back to work. Comes five o'clock and you load up your golf outfit and go out for a round with friends. You take your time and it is well after 7 when you return to town. Does anyone care? Does anyone ask you what your permanent address is—golf links or office? No one says a word. And then you must go through that ordeal of picking out something to eat. You go home and get a rousing welcome from the accumulated dust, the shadows and the silence. Very thrilling. You pick up the day's papers, but you can't read because there's no one pulling and hauling at you and trying to get up in Daddy's lap to see the pretty pictures—and no one suggesting that the lawn needs mowing. Oh, yes, it's a great life for those who like it, of which I am NOT one.—Ridin' Rudolph in the Deming Headlight.

The chief reason one feels more like work after taking a vacation is because they have spent all their surplus cash and must go to work to accumulate more.

OUR EYES—3
Trachoma

"Granulated lids" is the name that is popularly applied to the more technical disease known as trachoma. An eye specialist is quoted in a circular issued by the United States Public Health Service as saying "that three-fourths of the people who have granulated lids and do not have them treated will eventually become blind." If blindness does not follow the eyesight is apt to be affected.

Trachoma is "catching." It is often unknown when it occurs among children because it is called "sore eye."

Symptoms of the disease frequently cause children—and grown people as well, to think they have a cinder, or some said, or dirt in their eye. The eyes soon become red and painful and discharge water.

"Many years ago," says the United States Public Health Service "the United States Government realized the dangerous communicable nature of trachoma, and it will not allow any foreigner who has the disease to land in our country."

The Public Health Service has published the following: "Advice to Those Having Trachoma:"

1. Apply at once for treatment to the nearest hospital, dispensary, or to your physician.
2. Follow the directions of the doctors and nurses as to treatment and prevention.
3. Do not stop treatment until you are cured.
4. Wash the face and hands several times a day and keep the finger nails clean.
5. Have your own washbasin, soap, and towel.
6. Boil your handkerchiefs before adding them to the wash.

CUT ALFALFA AT AT PROPER TIME

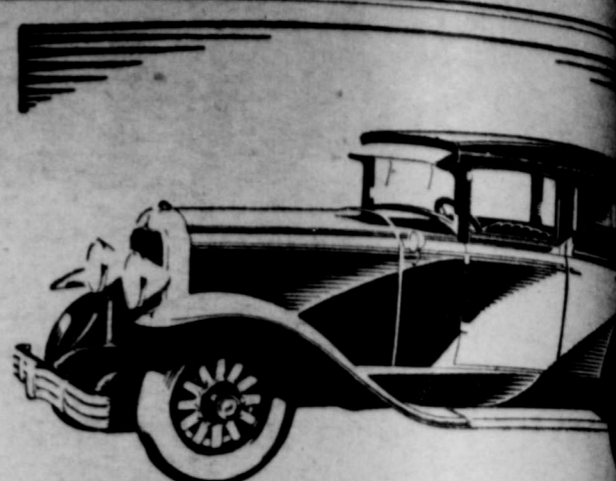

Many alfalfa growers, who cut the hay at full bloom or in the early post-stage of maturity—a practice especially common in the north central and Rocky mountain states—could produce hay of better quality if they would cut it when 1-10 to 1-4 in bloom or when new growth starts from the crowns, irrespective of the bloom. This would advance the time of cutting a week or so for the first cutting and increase the seasonal tonnage because of the longer period given to subsequent cuttings. Large quantities of late-cut alfalfa are marketed annually in the United States and most of this type of hay grades only U. S. No. 2 or No. 3 because of insufficient leaves or lack of color. Late-cut alfalfa also has hard and somewhat woody stems, which, although not very objectionable to horse or stock-cattle feeders, are not wanted by dairymen who are the chief buyers of alfalfa hay.

A Scotchman found it necessary to notify his wife that he might not be home that evening, in which case he would phone her. This is what he told her:

"I'll ring you at 6 o'clock. When you hear the bell you'll know it's me. Don't answer it, and I'll get my nickel back."

Republican State Central Committee)

Governor Hannett quotes appropriations by the last session shows no apparent deficit by his side. He would have the deficit left none.

He has a very efficient State Treasurer. When he signs a statement, the efficient Republican is testifying that the appropriation, at the end of the period, June 30, 1927, of \$315,000, does Hannett it is not true?

He is a Democrat, and he is a faithful and so recognized by Republicans alike.

Mr. and Mrs. John Boren returned the last of the week from a fortnight visit to relatives in Oklahoma.

Dr. O. E. Puckett, of Carlsbad, county health officer and Mrs. Hardy, county health nurse were in Artesia Friday.

Born to Mr. and Mrs. Walter Nugent, Saturday afternoon, the 28th inst., a daughter, whom they have named Patricia Louise.

The little five years old son of Mr. and Mrs. Muma underwent an operation for the removal of his tonsils and adenoids Monday morning.

Mr. and Mrs. Lloyd Schyrock of El Paso, former residents of Artesia, spent a few days in the valley last week, visiting friends at Artesia and Hope.

Miss LaRue Mann returned Sunday evening from the Artesia-Sacramento camp, where she was the guest of Miss Ruth Bigler for a couple of weeks.

Miss McKinney, who is here from Nebraska, guest of her aunt, Mrs. S. O. Matteson, has been visiting her sister, Mrs. Fred Knowles, in Carlsbad this week.

Mr. and Mrs. T. L. Hillard and baby, Mr. and Mrs. Harry Hazlett and Mrs. Crow were in town from Roswell Sunday afternoon calling on friends, Mr. and Mrs. H. S. Berry.

Waldo Johnson, nephew of Mr. and Mrs. J. S. Jones, arrived from Saugus, California, on business Friday and returned west Monday. He expects to come back here with his family to spend the winter.

Mrs. E. B. Bullock and small daughter, Laura Elizabeth, left Tuesday for a visit with relatives at Ft. Worth and Weatherford, Texas. Mr. Bullock, Miss Edna Bullock and Miss Mary Jackson drove with them as far as Pecos, Texas.

Prof. Dixon and family arrived last week from Tucson, Arizona to visit Mrs. Dixon's parents, Mr. and Mrs. T. J. Stagner, on the Lawrence ranch. There was a re-union of the family on Sunday, Jim Stagner and Mrs. Will Edd Carter and family being here from Carlsbad.

Jim Cowan returned home the last of the week from Ft. Sill, Oklahoma, where he has been attending the R. O. T. C. since the close of the regular school year at Oklahoma University at Norman. He expects to be at home until the opening of the fall term at the University.

Miss Irma Green, captain of one of the Girl Scout Troops, with two scouts, Juanita Denton and Evelyn Cobble, left Saturday for Scout camp Mary White in Bear Canyon, near Weed. Miss Green's parents, Mr. and Mrs. Arba Green, and Miss Helen Green drove them to the camp last Saturday and returned Sunday.

Miss Vella Spivey returned the last of the week from Las Cruces, where she graduated from State College and has been attending summer school. She has been engaged to teach the commercial work in the high school at Melrose. Miss Spivey was accompanied home from Las Cruces by Miss Lou Cox and George Robertson, both of Las Cruces, and on Sunday, in company with Jesse Morgan of Hagerman, they all went through the Carlsbad Cavern. The young people left for their homes on Monday morning.

SHOE STUDIES

Each of us buys, theoretically at least, three pairs of shoes a year. This means some 350,000,000 pairs annually. Half of the hides and skins that go to make leather for these shoes are imported, principally from Asia, South America, and Africa, where people do not wear shoes so much. The United States is not self supporting in the matter of leather and leather goods, and in case of war the chances are that many of us would have to go without shoes if imports of raw materials were interrupted. The U. S. Department of Agriculture believes that our dependence upon foreign supplies can be very greatly reduced through better practices in the domestic production of leather-making raw materials, through more judicious or common-sense selection by the public of leather goods, and finally through proper care of such leather goods, with elimination of their abuse and misuse. The hide, leather, and tanning investigations carried by the department all aim at conservation along these lines. Each year millions of dollars are lost in this country in hides and skins, much of which can be prevented by the application of correct methods of preparation and marketing, which would result in making available to the tanner not only more hides and skins but better ones, from which in turn would result more and better leather.

SUNSHINE

New Yorker (incredulously): "And you mean to say that in California you have three hundred and sixty-five days of sunshine a year?"
The Man from Los Angeles: "Exactly so, sir, and that's a mighty conservative estimate."

YES!

WE HAVE THE FINEST BREAD TO BE HAD!

And we want you to taste it. It's a treat! Because it's made of the very finest ingredients, mixed by first class bakers and baked in the most modern ovens, it can't help but be the finest. Every loaf is a rich golden brown—excellent for sandwiches and delicious for table use.

AMERICA ACCEPTS AND ACCLAIMS THE NEW PLYMOUTH

It Discovers at Last Real Size, Style, Performance and Safety in the Lowest-priced Field

The sales record of the new Plymouth, established in two weeks' time, is without parallel or precedent for a car in this field—not in a few retail centers but all over the whole country.

Hundreds upon hundreds of thousands—yes, millions—eager to see the new Plymouth, built by Chrysler to compete in the lowest-priced field, throng Chrysler sales-rooms everywhere.

They compare it with the three or four other

cars catering to the same great market.

They see contrast in size, style, performance and safety so sharply in favor of Plymouth that curiosity bursts into enthusiasm, enthusiasm is transformed into sales.

In fine, the millions seeking a low first cost now discover in the new Plymouth the one car in the lowest-priced field which is and does everything that they have long hoped a low-priced car would be and do.

You, too, owe it to yourself to see it, ride in it, drive it. All doubt as to the highest dollar-for-dollar value in the lowest-priced field ends right there.

ARTESIA METHODIST CHURCH

Mims J. Jackson, Pastor
Austin Brown, Supt. Sunday School

The Christian religion is not a transient endowment, a temporary emotion or a passing mood, but a living reality.

"Our Greatest Need" is the subject of the 11 o'clock service. The evening service will be the "union service at the Baptist church at 8 o'clock. You are especially urged to attend both these services.

The Sunday school convenes promptly at 9:40 A. M. Parents why neglect the great value of this school for the future making of your child.

FIRST PRESBYTERIAN CHURCH

Fourth and Grand
Rev. John P. Sinclair, Pastor

Sunday, August 5th.
9:45 a. m., Sabbath school and Bible classes.
11:00 a. m., morning worship.

Sermon Subject: "Sitting in the Balcony or Fighting in the Arena— which?" A sermon on the value of effort.

7:15 p. m., Christian Endeavor.
8 p. m., we join with the other churches in first of four united Sunday evening services in the Baptist church.

Wednesday, 7:30 p. m., Praise, Prayer and Bible study.

"The secret of life is not in owning beautiful things but in thinking beautiful things."

THE FIRST BAPTIST CHURCH

Quite a number from out of town attended the rally for Montezuma College last Sunday afternoon at our church. President Barrick delivered the principal address. He gave us some valuable information and pointed out the splendid outlook for our college. President Barrick was a missionary in Africa for a number of years. At the evening service he spoke to us on Africa, giving us some very interesting facts about our work in that dark continent.

Next Lord's day the pastor will speak at the 11 o'clock hour on "God's Message to Men." We will have good music. We shall be glad to see you in this service. At the evening hour we will have a union service with a number of the churches of the city uniting in the service.

One of our pastors will bring the message of the hour. The orchestras from all the churches will unite in furnishing us some first class orchestra music and a choir made up from all our churches will furnish the vocal music. This choir will bring us some special music which will be very much enjoyed by all we feel sure. These evening services, each Sunday evening, will continue through the month of August. We shall be glad to have as many as possible in these services. Every one will find a warm welcome. We believe you will enjoy the services.

Do not forget our Bible school at 9:45 A. M. Our young people meet at 7 p. m. Good programs will be rendered. All young people are invited to our B. Y. P. S.

R. PETERSON, Pastor.

NEW CARBON BLACK PROCESS FOUND

Experiments looking toward improvement in the present process of carbon black burning by bringing about a greater recovery of the carbon element in natural gas have been persistently carried on by manufacturers ever since a practical method of making the black was evolved and the demand for the product became heavy enough to warrant production on an ambitious scale.

Numerous methods have been devised but invariably these methods demanded investments so large or processes so involved that the expense of employing them more than offset the saving to be effected in gas consumption.

However, what appears to be a successful step toward more economical operation is seen in a plant recently installed by the General Atlas Chemical Company, just south of Pampa, where a secret method of gas decomposition is in use. That a considerable difference between the ordinary process known as channel burning and the process used in the Atlas plant exists, is indicated by the fact that the burning houses are of different shape and are built of different materials, these being square and about the size of an ordinary room, practically air tight, whereas the burning houses of the ordinary plant are rectangular in shape, about 120 feet long and 12 feet wide. The plan of the latter house was made necessary by the fact that they shelter long steel strips, about 80 or 90 feet in length suspended over a series of gas jets from which flames impinge on the undersurface to deposit the black, later scraped off into troughs by a series of horizontal scrapers transversely arranged. The strips of steel, or channels, are moved with a compensating motion by machinery.

Just what evolution of the old process, or what revolutionary methods the Atlas company has put into effect in its Gray county plant, are jealously guarded, but it is known that the product is gray in color instead of black, is more bulky than ordinary black, and that the smoke residue of its manufacture is white indicating what is practically a complete recovery of carbon. A recent shipment of 6,000 pounds of black was made from the plant, which is small, having only about 25 or 30 houses in contrast to the 40 or more burning houses composing a one-unit plant of the ordinary type.

The product of the plant is known as "Velvetine."

The location is in the southwest corner of the southeast quarter of section 137, block 3 Gray county.—Amarillo Globe-News.

RUSSIAN GEOLOGIST PREDICTS SHORTAGE

That the United States is faced with a serious oil shortage within the next five years is the prediction of Prof. John M. Strigeoff, Russian geologist, who recently returned to Moscow after having surveyed oil conditions in this country. It is his opinion that Russia will then step to the fore as the world's leading producer of petroleum.—Inland Oil Index.

Billie: "Did you know I'm a member of a very big family?"

Marjorie: "Indeed! How many of you are there?"

Billie: "Well, there are 10 of us boys and each of us had a sister."

"Good gracious! Then there were 20 of you?"

"No. Only 11."

COTTONWOOD ITEMS

(Miss Alma Bradley, Reporter)

Mr. Basil Bobo made a business trip to Roswell, last week.

Albert Watson returned Wednesday from his visit to Las Vegas, Albuquerque and Santa Fe.

Mr. and Mrs. H. A. Denton, Mrs. B. D. Briscoe and Miss Hannah Briscoe, of Artesia, visited Mr. and Mrs. A. D. Hill, Sunday.

Mr. and Mrs. Monroe Howard and family left this week for Moorwood, Oklahoma to visit the parents of Mr. Howard and are also visiting relatives in Texas.

The J. R. Norris family visited the McNary family at Lake Arthur, Sunday. Miss Nannie McLarry returned with them to spend a few days on the Cottonwood.

Mr. and Mrs. Bill Sterret returned Wednesday from their to the northern part of the state to their newly furnished home on the Cottonwood. Saturday night a crowd gathered to chivaree the newly weds. Refreshments were served by the host and hostess.

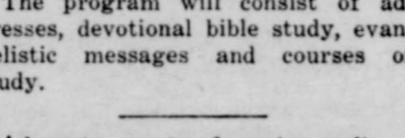

The young girls' Happy Hour club was entertained with a swimming party at the home of the Misses Helen, Lucille and Ruby Waldrop. All the members and a number of guests were present. A picnic supper was served on the lawn. The next meeting will be at the home of Miss Alma Pearson.

RUIDOSO BAPTIST ENCAMPMENT

Plans are going forward to hold the annual Ruidoso Baptist encampment August 11th to 19th. Those who expect to camp on the grounds will be expected to bring their tenting and camping outfit. Free dining room service will be offered the campers, however, a small entrance fee will be charged. Those who do not care to camp out may rent a cottage and have their meals served at the dining hall.

The program will consist of addresses, devotional bible study, evangelistic messages and courses of study.

Rev. John P. Sinclair, Pastor
Sunday, August 5th.
9:45 a. m., Sabbath school and Bible classes.

11:00 a. m., morning worship. Sermon Subject: "Sitting in the Balcony or Fighting in the Arena—Which?" A sermon on the value of effort.

7:15 p. m., Christian endeavor.
8 p. m., we join with the other churches in first of four united Sunday evening services in the Baptist church.

Wednesday, 7:30 p. m., Praise, Prayer and Bible study.
"The secret of life is not in owning beautiful things but in thinking beautiful things."

THE FIRST BAPTIST CHURCH

Quite a number from out of town attended the rally for Montezuma College last Sunday afternoon at our church. President Barriek delivered the principal address. He gave us some valuable information and pointed out the splendid outlook for our college. President Barriek was a missionary in Africa for a number of years. At the evening service he spoke to us on Africa, giving us some very interesting facts about our work in that dark continent.

Next Lord's day the pastor will speak at the 11 o'clock hour on "God's Message to Men." We will have good music. We shall be glad to see you in this service. At the evening hour we will have a union service with a number of the churches of the city uniting in the service. One of our pastors will bring the message of the hour. The orchestra from all the churches will unite in furnishing us some first class orchestra music and a choir made up from all our churches will furnish the vocal music. This choir will bring us some special music which will be very much enjoyed by all we feel sure. These evening services, each Sunday evening, will continue through the month of August. We shall be glad to have as many as possible in these services. Every one will find a warm welcome. We believe you will enjoy the services.

Do not forget our Bible school at 9:45 A. M. Our young people meet at 7 p. m. Good programs will be rendered. All young people are invited to our B. Y. P. S.

R. PETERSON,
Pastor.

NEW CARBON BLACK PROCESS FOUND

CHRYSLER AUTO PLANT UNDERGOES CHANGES TO PUT OUT NEW CAR

After August 1, all Chrysler "65" cars will be built in the company's Detroit Jefferson Avenue plant, J. E. Fields, vice-president in charge of sales, said yesterday. Removal of the "65" output from the Chrysler Highland Park plant is necessitated by the steadily growing demand for the new Chrysler-Plymouth and by the large production of the new DeSoto Six—announcement of which will be made next month.

Simultaneously, the company will put in operation at its Jefferson plant the most modern assembly building in the industry. This new unit consists of a two-story mezzanine structure 1000 feet long which has been added to one of the main buildings of that plant to make a total assembly line of 1400 feet.

Following completion of the work of removing the "65" output to its Jefferson plant, that unit will be producing all Chrysler "65", "75" and Imperial "80" cars, with the Highland Park facilities devoted exclusively to the Chrysler-Plymouth and the DeSoto Six.

The Highland Park plants also have undergone considerable rearrangement and expansion during recent months to care for the extraordinary demand for Chrysler products by the public and to prepare for DeSoto Six production, Mr. Fields pointed out. Early in July Chrysler formally opened one of the finest engineering laboratories in the country as an enlargement to its facilities there. Further additions to handle maximum production have also been provided, including a modern shipping building to facilitate car handling in all weather conditions.

That these plant adjustments have been accomplished without production interruption is shown in the company's report a few days ago that retail sales during the first six months were 14 per cent higher than the previous record first six months of 1927. This continues the remarkable strides of the last five years, every one of which has shown a substantial increase over its predecessor. Since the announcement July 5 of the three new Chrysler products—"75", "65" and Chrysler-Plymouth—production has again surpassed the highest previous total in the company's history in its effort to meet the greatest demand Chrysler has ever enjoyed.

SCOUTS GREAT CHUCK WAGON FEED

Over two hundred girl scouts, leaders, camp staff and drivers of cars, taking same to Mary White Camp, were fed by Elza White at his great chuck wagon dinner Saturday. A whole young beef barbecued to a turn, "scoundrel" baked beans, onions, bread, coffee, etc., were served with a lavish hand by Mr. White and his assistants, in true cowboy style. The food was served in a beautiful grove this side of Elk. The whole gang reached Camp Mary White without accident and found a beautiful and ideal camp in Bear Canyon with a large group of permanent buildings erected and fifteen large army tents set up to care for those who could not be placed in the shelters. Next year the shelters for all six units will be built so that none of the scouts will have to sleep in tents. Camp Mary White is one of the thirteen National regional camps and when completed will be the very finest pioneer camp in the country. Next Sunday at eleven o'clock in the morning Emily Ingraham Hall will be dedicated at which service will be present Governor R. C. Dillon, Mrs. Dillon, U. S. Senator Cutting and State Land Commissioner Pankey and other distinguished people.—Roswell Record.

Killing fleas on a fly with a ball bat.
Pull a flea's whiskers with a pair of ice tongs.
Bail out Niagara Falls with a sieve.
Shooting a pimple off a flea's nose with an old-fashioned musket.

The Browns were calling on their new neighbors, the Smiths, for the first time and had brought little Alice with them. At a lull in the conversation the child turned to her mother and said:
"Mother, you were wrong. Mr. Smith has them on."
"Has what on, my dear?" asked Mrs. Smith.
"His pants," answered the child.
"Mother said you wore them."

RESULTS OF THE TEXAS DEMOCRATIC PRIMARY

In the democratic primary held over Texas Saturday, Dan Moody, present governor of the state was re-elected. Earle Mayfield, candidate for reelection to the U. S. Senate, received a plurality over his nearest opponent, Tom Connelly and will go into the second primary with Comely August 25th. Other returns are:

Returns from 245 of 253 Texas counties, including 94 complete, as compiled by the Texas Election Bureau Tuesday, gave:

For United States Senator: Mayfield 172,272, Connally 156,291, Owsley 111,456, Blanton 106,095, Cunningham 25,915; McLemore 8,971.
Governor: Moody 375,862, Wardlaw 210,367, Hawkins 27,916, Wilmans 15,625.

Lieutenant Governor: Miller 259,089, Love 168,818, Parnell 64,078, Darwin 39,238, McCall 35,072.
Comptroller: Terril 381,408, Jones 151,317.

State Treasurer: Hatcher 334,505, Harris 190,448.
Superintendent of Public Instruction: Marrs 260,402, Garner 109,479, James 94,697, Davis 82,612.

Land commissioner: Robison 257,626, Terrell 150,356, Britton 69,399, Flynt 47,451.

Railroad Commissioner: Lon Smith 384,057, Jefferson Smith 139,288.
Judge Court of Criminal Appeals: Morrow 338,401; Pierson 187,775.

Incomplete returns gave the following totals in the races for congress and the Court of Civil Appeals:

Congress:
First district, 11 counties—Returns from all counties, including 3 complete: Batman 20,067, Black 17,370.
Second district, 14 counties—Returns from 12 counties, including two complete: Box 21,338, Sanders 13,984, King 3,513.

Fourth district, 5 counties—Returns from four counties, including two complete: Rayburn 15,910, Hughston 7,374, Andrews 2,604, Sherley 1,829.

Fifth district, 3 counties—Returns from all counties, none complete: Summer 22,409, Ray 3,831, McCallib 1,040.

Seventh district, ten counties—Returns from all counties, one complete: Briggs 19,706, Holbrook 5,411.

Eleventh district, six counties—Returns from all counties, four complete: Cross 16,744, Maxwell 16,234.

Fourteenth district, eleven counties—Returns from all counties, two complete: McCloskey 21,505, Rogers 13,669.

Fifteenth district, 23 counties—Returns from 21 counties, seven complete: Garner 14,045, Hardin 7,363.

Sixteenth district, 38 counties—Returns from 30 counties, seven complete: Hudspeth 15,985, Reid 4,028.

Seventeenth district, 19 counties—Returns from 17 counties, seven complete: Lee 14,112, Perkins 8,934, Calaway 8,358, Shanks 7,038, Grisham 5,919.

Eighteenth district, 53 counties—Returns from 44 counties, 13 complete: Jones 37,716, Bell 21,388.

Court of civil appeals:
Fourth district, 47 counties—Returns from 42 counties, 12 complete: Smith 33,714, Thomas 26,005.

Sixth district, 18 counties—Returns from 15 counties, seven complete: Williams 33,206, Levy 32,536.

Eleventh district, 19 counties—Returns from 13 counties, 4 complete: Funerburk 12,408, Patterson 9,406, Stephens 6,956.

A Scotsman rang up a doctor in a state of great agitation.
"Come at once," he said: my wee bairn has swallowed a saxpance."
"How old is it?" asked the doctor.
"1894."

NOTICE!

We are prepared to serve the public the same as ever in the Dry Goods, Hardware and Grocery Departments. Aside from suffering a slight inconvenience Friday, we have been open for business as usual.

Owing to the fact that our office is now undergoing some repairs we have established temporary office quarters in the rear end of the Hardware Store.

We shall appreciate a continuation of your patronage and promise the same courteous and efficient service.

NOTICE

In the Probate Court of Eddy Coun-
ty, State of New Mexico.

IN THE MATTER OF THE ES-
TATE OF WILLIAM MCGINN,
Deceased.

No. 550.
Notice is hereby given that Ruth
Doyle, formerly Ruth McGinn, ad-
ministratrix of the estate of William
McGinn, deceased, has filed her final
report as administratrix of said es-
tate, together with her petition pray-
ing for her discharge; and the Hon-
orable D. G. Grantham, Probate
Judge of Eddy County, New Mexico
has set the 20th day of August,
1928, at the hour of 10 o'clock A.
M., at the Court room of said Court
in the City of Carlsbad, New Mexico,
as the day, time and place for hear-
ing objections, if any there be, to
said report and petition.

THEREFORE, any person or per-
sons wishing to object are hereby
notified to file their objections with
the County Clerk of Eddy County,
New Mexico, on or before the date
set for said hearing.

THELMA T. LUSK,
31-4t County Clerk.

IMPROVE QUALITY OF SUMMER EGGS

The great bulk of the eggs mar-
keted through late spring and sum-
mer shows the influence of the warm
weather, often to a very marked
degree, says L. N. Berry of the
New Mexico Agricultural College.
The result is a lower price to the
producer and an inferior product to
the consumer. This amounts to a
large waste which all poultrymen
should be interested in reducing.

When the temperature at which
eggs are kept rises much above 65
degrees the eggs show the effect in
a very short time. Heat causes a
more rapid shrinkage, making a
large air cell. It makes the white
more watery, giving the yolk a dar-
ker appearance and also allowing
the yolk to settle. If the egg is fer-
tile, these changes take place more
rapidly than in an infertile egg, and
if the temperature rises to near the
incubation point, some germ develop-
ment will start. The rapidity at
which an egg will deteriorate when
kept at a warm temperature, as
about 80 degrees can well be illus-
trated by comparing it with a cold
storage egg. Good quality eggs kept
at 30 degrees in cold storage for six
months will come out and candle
as better quality eggs than those
kept at 80 degrees for six days.
When it is remembered that a week
is a comparatively short time for
eggs to go through the trade chan-
nels to the consumer, it will be easily
understood why these eggs are of
no better quality during the summer.
It should be borne in mind, then,
that every day at 80 degrees equals
one month in cold storage. Just be-
cause eggs are only three days old
may not guarantee their quality, for
they will not be a quality product
unless they have been kept properly
during these three days. Eggs should
be kept below 60 degrees and lower
temperatures will be still better. It
will pay a commercial egg producer
to provide some such storage place
for eggs.

Fertility is important from the
fact that it intensifies the effects of
heat. Fertile eggs deteriorate very
rapidly when kept at 70 degrees and
above. Breeding pens should be
broken up promptly at the end of
the hatching season.

21 ACCIDENTAL DEATHS IN STATE DURING JUNE

SANTA FE.—Twenty-one persons met
accidental death in Mexico in
June, and there was one homicide, a
report issued by the state health de-
partment Friday showed.

Five persons were killed in auto-
mobile accidents and three each by
gun wounds, drowning and falling
rock. Two were killed by the fall of
horses and one each by burns, light-
ning, a train, falling down steps and
a power explosion. All of the per-
sons killed were males with the ex-
ception of two girls who were
drowned.

His letter read: "I'm enjoying
Florence immensely."
His wife replied: "You can stay in
Europe. I am having a good time
with Oscar."

UNIVERSITY TO OFFER MANY ADVANTAGES THRU EXTENSION DEPT.

The following press dispatch has
been received from the State Uni-
versity and concerns J. T. Reid, for-
mer superintendent of the city schools
here:

With the employment of Profes-
sor J. T. Reid, former superintendent
of city schools, Artesia, New Mexico,
as director of extension work, the
University of New Mexico is prepared
to carry its work to every part of
the state and to offer the advantages
of supervised study to more people
than it ever has reached before, ac-
cording to President J. F. Zimmer-
man.

The new extension division will
offer ten distinct types of instruc-
tion, Dr. Zimmerman said.

A large number of correspondence
courses will be given which will carry
full University credit. Group study
courses will be organized wherever
there is a demand for them, and will
be conducted by University instruc-
tors by visitation at regular inter-
vals. Regular credit will be given
for satisfactory completion of these
courses.

Club study courses will be provided
wherever local groups or organized
groups wish to study a pertinent
problem based on a text supplied by
the University loan library. Such
courses will be presided over in ab-
sence by a University professor who
will visit the club upon its comple-
tion of the work to deliver a lec-
ture. No tuition or fees is charged
for this work, and no credit is given.

Similar to the club study courses
will be the parental instruction
courses, open to any group of par-
ents desiring the service. It will
deal with special problems in child
training and education.

A loan library service will be in-
stalled which will attempt to supply
any book or other reading material
possible to any individual or group
who may make application for the
service according to the regular li-
brary rules. This service will be
particularly valuable to high school
debating teams throughout the state.

The University's policy of service
to high school debating, oratorical,
declamation, and athletic activities
will be continued, and will be so far
as needed and desired by the high
schools of the state.

Professor Reid received his A. B.
degree from Howard Payne College

INSIDE INFORMATION

Cooked liver makes a good salad,
combined with sliced cucumbers.

Pineapple and cream cheese sand-
wiches are dainty for afternoon tea.

Broiled peaches, either fresh or
canned, are appetizing to serve with
meat or for dessert.

Always successful for a porch sup-
per is a menu consisting of egg
salad, cress sandwiches, iced tea, and
any fruit shortcake.

Cottage cheese contains all the
constituents of milk excepting the
cream. It is therefore high in food
value and is a particularly rich
source of protein and minerals.

In summer time give the refrig-
erator extra care, and wash it
thoroughly with hot water and soda
once or twice a week. See that any-
thing spilled is promptly wiped up,
that the drainpipe is not clogged or
slimy, and that the ice chamber is
clean. Keep the doors shut tightly
and do not open them oftener than
necessary. Do not wrap the ice in
paper or cloth.

THE DIFFERENCE

Good printing, like good, fat, ten-
der fried chicken, comes a little bit
higher than an old, poor rooster, in
whose carcass you can't make an
impression with a two-bladed axe.

To keep a Scotchman from becom-
ing seasick, tie his hands in back
of him and put a quarter in his
mouth.

and his M. A. from Baylor Univer-
sity. He has taught in a number of
high schools in Texas, and has been
superintendent of schools at Tularosa
and Artesia, New Mexico.

BANK RESOURCES HIGHEST IN HISTORY. OFFICIAL REPORTS

SANTA FE.—The capital, the de-
posits and the total resources of the
banks of the United States are larg-
er than ever before, a report from
B. M. Sims, secretary-treasurer of
the national association of super-
visors of state banks, received by
State Bank Examiner Lawrence
Tamm Friday says.

His report, based on figures avail-
able February 28, says in part: Tot-
al deposits in all banks were 1,140,-
283,297, above the previous high re-
cord of March 23, 1927, and total re-
sources \$3,693,662,613 above resources
of that date."

Mistress: "Mary, your young man
has such an air of braggadocia about
him."

Mary: "Yis, pore lad, he worruks
in a livery stable."—Pure Oil News.
