Marker May Soon Be Placed At Site of the Penasco Battlefield

An announcement in the columns of Will Robinson's "Side-lights on the News," says that the Chaves County Historical Society intends shortly to mark the site of the battlefield on the Penasco, in which Captain Stanton (after whom Fort Stanton was named), and several of his men were killed in an encounter with the Mescalero Indians. The statement of Mr. Robinson, presumably taken from the records of the war department, has been elaborated on by local historians, who tell us the site of the battlefield spoken of in the article reprinted below is located near the Boyd Williams ranch house in the Elk community, and therefore, is of interest locally:

"The official report of Captain Ewell, in charge of the expedition against the Mescaleros, addressed to General Garland, commanding the District of New Mexico, filed at Los Lunas on February 10, 1855, unfolds the whole narrative in an understandable way. Captain Ewell was advised at Anton Chico, on his way south with a command of 61 men, infantry and dragoons, that a cooperating force was setting out from Fort Fillmore, just south of Las Cruces. Another body was to be formed at or near Fort Stanton, of the troops from the Mesilla and those of Captain Stanton, all dragoons, with supporting infantry. After a trying march down the Pecos and up the Hondo and Bonito, this junction was made just east of the present town of Captain, and under the command of Captain Ewell, took up the march to the Penasco, on the mission of punishing the marauding Mescaleros, making the first camp on the Penasco on the 17th of January. This was at or close to the C A Bar headquarters built by James F. Hinkle, while manager of that great brand."

"Up to this time no 'sign' of the Indians had been seen, but on the making of camp only a little while passed before they attacked the camp, using arrows and fire-arms and through the night the soldiers fought against these projectiles and attempts to burn them out. Next day fighting steadily continued, many Indians being killed. On the 18th Captain Stanton with his company and some additional men, were directed to make a reconnaissance of a small open valley (which must have been about four miles down stream) and were there ambushed, and Captain Stanton and two of his men were killed. A rescue party under the command of Lieutenant Moore dispersed the Indians, and brought in the bodies of Captain Stanton and his men. The Indians were not again seen and the scouts were unable to track them. They probably fled to the higher reaches of the mountains, possibly into the Guadalupe."

The last stand of Captain Stanton and his men, referred to above, was, according to local version, at the Boyd Williams spring, across the river from the Boyd Williams ranch house, and the same spring that supplies water to the present ranch house. It is presumed that Stanton and his men who stopped here to get water, were surprised by the Indians, who had hidden near the spring.

So rapid were the events of the fight, the captain and his men were taken by surprise and Captain Stanton was killed. Several years ago, children playing in the yard of Mrs. A. L. Cleve at Elk, unearthed a brass button. Mrs. Cleve, knowing of the battle down the river, assisted in uncovering parts of a blue uniform and a skeleton, which were probably the remains of the soldier who had been wounded or fallen sick and died in the march from the battlefield.

"The body of Captain Stanton was taken on a pack horse to Fort Stanton, and later to Fort Fillmore, where it rested in the military compounds until later removed to the federal cemetery at Santa Fe. Worn to a shoe-string by his long march from Anton Chico to Fort Stanton, thence to the Penasco, and the two days of fighting there, with the Mescaleros dispersed, Captain Ewell apparently considered that the objective of his expedition was accomplished and he started back to his post at Los Lunas, which he reached after real hardships, being compelled much of the way to lead his footsore horses, and care for his wounded men as best he might. The maps of the expedition, which

have been much simplified and made legible by drawings by Mr. Hinkle, show the scenes of the battles, and also correct several natural mistakes made by the clerks of the Ewell forces.

"After reaching Fort Stanton the Mesilla command under Lieutenant Moore (with the body of Captain Stanton, took up the long march to their headquarters, and Captain Ewell, proceeded, as stated, to his post at Los Lunas. The story of the expedition, unearthed by Captain Fulton, after nearly a hundred years in the dusty record rooms of the war department, carries with it some most interesting information, which is supplemented by a study of the accompanying map. That takes time and a strong magnifying glass. In his report, Captain Ewell does not fail to give credit. He mentions being joined at Bosque Redondo (Fort Sumner) by J. Giddings, with four Mexican trackers who proved the "only reliable guides." Mr. Giddings was tucked out by the ride to join the Ewell party, and remained at Bosque Redondo as recorded in the archives of Fort Sumner, but the Mexicans stayed through the entire movement. The infantry was also praised, and it is recorded that they were toward the last able to outmarch the dragoons, whose mounts had been given a terrific ride, probably with only the native and desert grasses for food. In order to grasp something of what the march meant, take your handy road map, start from Los Lunas, south of Albuquerque, go thence to Anton Chico, and down the Pecos to where Roswell now stands, thence up the Bonito to Captain, thence across the headwaters of the Felix to the Penasco. After that the return to Los Lunas. That is hundreds of miles, over mountain chains, deserts, mountain chains, then desert again."

TWO MEN ARRESTED NEAR CARLSBAD

Two men were arrested near Carlsbad last week on the highway east of the Cavern City on information from Hobbs officers that the men whose names were not learned, were implicated in a plot to rob a Hobbs cafe and dance hall. One man was forced to surrender to Sheriff Dwight Lee. The men were lodged in the county jail and will await results of finger prints made by the sheriff's department and sent to Washington.

RED BLUFF DEPOT OPENED BY SANTA FE

The depot, formerly at Orla, Texas, has been moved to Red Bluff, Texas. Western Union telegraph service, freight, express, and passenger service is provided at the new depot.

One train each way provides service for passenger patrons of the road.

Locals

A daughter was born to Mr. and Mrs. N. F. Wilson Tuesday morning.

Mr. and Mrs. T. J. Berry of Hope were trading in town Saturday.

J. A. Santo of Hope was attending to business matters here Saturday.

Joe Wertheim, Carlsbad cotton buyer, was a business visitor here Monday.

Mrs. A. L. Cleve and F. G. Irvin, Elk merchant, were attending to business matters here Saturday.

Mrs. J. H. Jones of Belen arrived last week for a visit with her daughter, Mrs. Nola Phillips, and other relatives.

Mr. and Mrs. W. C. Autrey of Ruidoso spent a few days here the first of the week visiting Mrs. Autrey's sister, Mrs. W. P. Pistole.

F. S. Donnell, Santa Fe abstractor, spent Friday in this section inspecting the oil area with a view to starting additional developments soon.

Mr. and Mrs. Lester Henrichsen of Hagerman visited their mother, Mrs. Carrie Henrichsen here Sunday and attended the meetings at the tabernacle.

Louis Root of Indianapolis, Indiana, former oil operator of this section, was visiting friends and attending to business matters here the first of the week.

John Major of El Paso, Texas, early-day resident of Artesia, spent a few days here the past week attending to business matters and looking after property interests.

James Womack, young son of Dr. and Mrs. C. L. Womack, who was taken seriously ill with pneumonia last week, is recuperating nicely, according to late reports.

J. P. Hare of El Paso, Texas, sales representative of the B. F. Goodrich Rubber Co., spent the latter part of the week here calling on the local trade and visiting friends and relatives.

Miss Catherine Douglas, daughter of the Rev. and Mrs. A. C. Douglas, who is a student at McMurry College at Abilene, Texas, spent Friday and Saturday with home folks, returning Sunday.

Mrs. Albert Glasser left last Thursday with her mother, Mrs. Combs, a younger sister and friends, Mr. and Mrs. Reese, all of Pennsylvania, and who had arrived here a few days previously. They expect to be gone a month on a vacation and sightseeing trip, visiting California and other states.

San Jose Scale Control for 1935

San Jose scale continues to be one of the most serious pests of deciduous fruit trees in New Mexico, says Dr. J. R. Eyer of the New Mexico State College. In most parts of the state, orchards have been under a severe strain during the past year, due to high temperatures, lack of moisture, and heavy crops of fruit. Protection against the spread of scale is exceedingly important at this time.

In general, oil sprays are recommended instead of lime sulphur for the control of San Jose scale. As a rule they are more thorough in control, are cleaner and more pleasant to handle, and cost less to prepare. The oil spray which has given consistent and satisfactory results in New Mexico is "cold-mix" Kayso-oil emulsion. The formula and method of preparation are as follows: Red engine-oil, 4 gallons; Kayso, 4 ounces; and water, 4 gallons. Slowly stir the water and Kayso into a creamy paste. Then, using a bucket pump or barrel sprayer, pump the mixture back and fourth until soapy. Next add the oil slowly, and while adding continue the pumping process until a thick creamy yellow emulsion has been obtained. Continue mixing until all the oil has been added and no scum of free oil remains on the surface. Excess oil on the surface indicates that sufficient pumping has not been done and more thorough pumping will usually remedy this. The finished product represents a stock solution which is sufficient for 100 gallons of spray. To dilute, first fill the tank with water and start the agitator. Pour in the stock solution slowly, keeping the agitator running. Emulsions may break down if allowed to stand for several hours, and should be used as soon after dilution as possible.

For small orchards, commercially prepared oil emulsions are more convenient than the homemade ones. They may be purchased from local seed and feed companies, florists, and farmers' cooperatives, and should be applied as directed by the manufacturer.

Where it is desirable to control both scale and such fungus diseases as peach leaf curl or apple scab, lime sulphur may be used. Liquid lime sulphur is preferable to the powdered or so-called "dry lime sulphurs" because of more careful standardization. Use 12 gallons of concentrated liquid testing 32° Brume or 1.28° specific gravity to 88 gallons of water, thus making 100 gallons of spray. If dry lime sulphur is used, follow the manufacturer's directions for making the "dormant strength."

If additional information is desired, write for Press Bulletin No. 750 of the New Mexico Agricultural Experimental Station.

Typewriters for rent—Advocate.

Penasco Items

Madie Frank Reeves was quite ill last week.

Mrs. A. L. Cleve and F. G. Irwin went to Lincoln Sunday.

Mr. and Mrs. Bernard Cleve were Artesia visitors Friday.

Mr. and Mrs. Jake Cox returned from Hot Springs this week.

Mrs. M. Schrier is visiting with her daughter, Mrs. Leslie Bates.

The Stevens family has moved from the Cleve to the Powell farm.

The snow of the twenty-fifth was much colder than the one on the tenth.

Services will be held at the Lower Penasco church Friday, March 8th, at 7:00 p. m.

Jack Vicars severely injured his eye with a pair of pliers last week while trying to get a cow out of the fence.

Mr. and Mrs. Harold Dunn of Artesia visited with Mr. and Mrs. Bernard Cleve and family the first of last week.

Austin Reeves and son Loren went to Amarillo Sunday to get a heifer which Mr. Reeves bought while at the Tri-State Stock Show the sixteenth.

Mr. and Mrs. Clifford Longbotham entertained with a dance Saturday night. About thirty-five persons were present. At midnight cake, coffee and sandwiches were served.

The Ladies club met with Mrs. Earl Paxton last week. Those present were Meses. Tom Runyan, Austin Reeves, Albert Davis, Boyd Williams, Bernard Cleve, Orla Cleve and Misses Agnes Ann Williams, Edna Davis and Florence Savoy.

Virginia Longbotham has transferred from the Hope to the Lower Penasco school. The Stevens children have also entered the Penasco school. Last week the Dunken bus

ran for the first time since the snow of the tenth. It will probably not run this week.

Friday night Mr. and Mrs. Leslie Bates celebrated Washington's birthday with a dance and play party. Most of the Elk school pupils were present and enjoyed the play party very much. There is no need to say how much the adults enjoyed the dance, especially the more elderly persons who were there particularly to hear Henry York play the violin. Mr. York helped to initiate the celebration. There were about forty persons present.

LOVING STORE ROBBED

Several hundred dollars worth of merchandise was stolen from the Snyder store at Loving last week. The thieves entered the building through a skylight and left through a rear door. A quantity of groceries and dry goods were taken in the robbery.

Cook Vegetables And Make Them Easier To Digest

Why do we cook vegetables? Some people say we shouldn't, and it is true that cooking usually takes away some food values. For this reason the bureau of home economics of the U. S. Department of Agriculture advises eating at least one raw vegetable or fruit each day—to get food values you might lose in cooking.

But there are good reasons for cooking vegetables. You cook them to soften them, reduce their bulk, and make them easier to digest. At the same time, of course, you cook them to change the flavor, to something you may like better than the raw taste. Also, you can cook them in such a way as to save practically all the food value.

With most vegetables, it is the fibrous structure you soften when you cook them. This fibrous structure is the invisible framework that gives shape and form, and holds together the other substances of the vegetable. In scientific cookery, this material is called cellulose. It is what we commonly call "roughage." It cannot be digested in the human body and is useful for that very purpose. Its job is to furnish bulk of a kind that helps to eliminate the waste products of digestion.

In potatoes and sweetpotatoes, the cellulose is already so soft you can afford to forget about it. In kale or string beans, it is so coarse and there is so much of it you want to soften it to make it palatable. But whether the vegetable is a root like the carrot, a tuber like the potato, a bulb like the onion, stalks like celery, chard, brocoli and asparagus, seeds like peas, or fruit like the tomato; the cellulose is there in some form or other, and you cook the vegetable or eat it raw, according to the flavor you prefer, and also according to whether you want your roughage soft or not.

You cook vegetables to soften the cellulose just enough to make it an agreeable carrier or container of the nutritive substances and the flavor in the food. Softening the cellulose also makes it less bulky. Incidentally, if you enjoy cooked vegetables and cook them in the way to avoid unnecessary loss of food value, you are likely to eat more of them than you would get of the raw ones. Thus you get almost as much in food values, all told, as from most of the vegetables you would want to eat raw.

One important point here for the cook, of course, is to know what cooking does to minerals and vitamins, and therefore how to save all she can. So far as the minerals are concerned, they may cook out of the vegetable, but you need not lose them if you save the juice and use it, either with the vegetable, or in soup or sauce. If you "pour the water off," you pour off valuable calcium, phosphorus, iron, or some other mineral, maybe all of these. If you cook the vegetable very long, you may destroy two vitamins, B and C, that do not stand much heat or water. For vitamin C, vegetables are the best source, excepting only some of the fruits. Therefore add as little water as possible in cooking vegetables, cook only until the vegetable is just tender, though still a little crisp, and use all the liquid.

This is a good rule to follow even if you are thinking only of how they taste, without reference to food value. Long cooking makes the cellulose soft and mushy. And it changes, sometimes destroys, the original flavor of the vegetable. This happens with cabbage, or cauliflower, or brussels sprouts, or brocoli, or any of the cabbage family. Cabbage cooked for only five to fifteen minutes has a very delicate flavor and practically no odor. But cooked too long, a chemical substance in the cabbage decomposes into bad-smelling sulphur compounds, which go all through the house.

There are other vegetables in which too much cooking not only cooks up the cellulose too much but destroys the flavor, and leaves them more or less tasteless. The flavor may dissolve in the cooking water. Green peas, carrots, squash, onions and other vegetables containing sugar lose sweetness because the sugar dissolves so readily in water. For this reason steaming keeps in the flavor better than boiling—there is no water to take away the sugar.

Hope Items

Mr. and Mrs. R. L. Cole motored to Las Cruces the latter part of the week and spent several days there visiting their daughter and son-in-law, Mr. and Mrs. Kenneth Goddard.

Mrs. Charley Cole, Floyd Cole and Delma Ruth Cole returned the first of the week from El Paso where they spent the week-end visiting Mrs. Cole's sister, Mrs. Pearl Wilson.

Mrs. Hal Hammel entertained with a dinner Sunday noon honoring Mrs. Tony Dostolick. Guests invited were former schoolmates of Mrs. Dostolick. Those present were Mrs. Bob Means, Mrs. Dick

The Connally Bill Becomes New Law

WASHINGTON—Armed with a new and presumably supreme court proof grant of authority, the oil administration Saturday rushed plans to revive the federal tender board with which it once almost drier up production and shipment of Texas contraband petroleum. Before the new Connally law was 24 hours old, however, Secretary Ickes said once more that it did not "go far enough." He announced he would press for legislation authorizing federal regulation of production. President Roosevelt signed the measure Friday night a few hours after final congressional action.

Section 9-C of the recovery act, declared illegal by the supreme court, left it to the president to regulate interstate shipments in excess of state quotas. Designed to meet the court's objections, the Connally law declares all such shipments contraband.

Because of the president's absence from the capital, officials said it might be several days before the federal tender board in Texas will be set up although the necessary executive order already has been prepared.

TYPEWRITERS

New, second hand and factory rebuilt in portables and standards—See us before you buy. Artesia Advocate.

Carson, Mrs. Johnny Prude and Mrs. Irvin Cox.

L. H. Hauter, senior agricultural economist of the Agricultural Adjustment Administration of Logan, Utah, and Dr. McGinnis, geologist of the University of Arizona, Tucson, Arizona, spent a short time here Saturday and Sunday attending to business with H. B. Elmendorf, project manager on the Hope Irrigation Readjustment Project.

Helen Jordan entertained at the home of her parents, Mr. and Mrs. Charley Coffin, Thursday evening with a dinner-dance. Guests invited were Marjorie Johnson, Ozella Tarrant, Olive Blanch White, Frances Johnson, Raymond Buckner, Virgil Henry, Claborn Buckner, Wallace Johnson, Rex Seeley and Mr. and Mrs. Tony Dostolick.

Livestock Numbers Decrease in State But Increase in Valuation

A decrease in the number and an increase in the value per head, of each species of livestock in New Mexico on farms January 1, 1935, compared with January 1, 1934, are shown by the annual inventory estimates of livestock on farms according to a report issued by Fred Daniels, statistician, for the U. S. Department of Agriculture. The total value of all livestock in New Mexico on January 1, 1935, was \$31,578,000, a decrease of 10 percent over the value of all livestock on January 1, 1934.

The total value of all mules and sheep was greater than a year ago in spite of a 5 percent decrease in mule numbers and a 11 percent decrease in sheep. The total value of all cattle was about 19% less than a year ago, due to a 27 percent reduction in numbers largely because of the government's purchases of drought cattle. The total numbers of swine showed a second sharp annual drop in numbers but the value per head showed a substantial increase in price.

HORSES: A further decrease of 5 percent in horse numbers was again shown with 108,000 estimated on farms January 1, 1935, compared with 114,000 a year ago. The number of horses shipped out of the state during 1934 was possibly larger than the large number moved out in 1933. The value per head was \$40 compared with \$39 a year ago.

MULES: The number of mules on January 1, 1935, was 18,000, a decrease of 5 percent from the number a year ago. The demand for mules during the past year caused prices to increase to \$66 per head on January 1, 1935, as against \$54 a year ago.

CATTLE: The number of cattle on January 1, 1935, was 1,050,000 or 27 percent below the revised figures of January 1, 1934, of 1,445,000 head and 18 percent below

the January 1, 1933, revised number of 1,280,000 head. The sharp decrease during the past year was due largely to heavy government purchases of drought cattle. The average price per head is \$15.80 compared with \$14.20 last year, and the total value \$16,552,000 against \$20,544,000 on January 1, 1934.

SHEEP: The total number of sheep on January 1, 1935, was 2,460,000 head, a decrease of 297,000 head or about 11 percent from the number on hand January 1, 1934. Government purchases of about 300,000 old ewes assisted materially in reducing numbers and relieving many producers of aged sheep. This year the value per head was \$3.80 per head and a total value of \$9,350,000 compared with last year's value per head of \$3.20 and value of \$8,803,000.

SWINE: The total number of all swine on January 1, 1935, was 34,000, a decrease of 42 percent from the January 1, 1934, number of 58,000. The total value of swine was \$162,000 compared with \$211,000 a year ago.

TIMBER SALE COMPLETED

Forest Service timber sale with the Southwest Lumber Co., made November 19, 1929, will be completed this week, says the Alamogordo News. This involved 800 acres of timber in Dark Canyon. The harvesting of the timber was under supervision of the Forest Service officials.

ARTESIA AUTO CO.

Phone 52 "Watch the Fords Go By" America's Fastest Selling Car Artesia, N. M.

No Wool Shortage Now In Prospect

Many sheep growers are wondering about the outlook for wool during the present year. A letter from H. W. Maginot of Sheldon and Company, Boston, Massachusetts, addressed to E. B. Bullock of Artesia, explains the viewpoint of the wool buyer. Because of the information this letter contains we are reproducing part of it, which is self-explanatory. The letter: "E. B. Bullock, Artesia, New Mexico. Dear Mr. Bullock: We are glad to have your letter of the 19th. Since writing you on the 14th the Wool and Mohair Advisory Committee had a long and protracted meeting. They have decided, with the large weight of 1934 wool on hand and the 1935 clip about to be thrown in their laps on top of it, to lower their

prices more in keeping with actual market conditions. New Mexicans are to be sold in the range of 58 to 61 cents clean basis but if the market does not permit of their ready sale at these figures we may expect another downward revision shortly. The committee also discussed various ways and means of handling the 1935 clip, took under advisement certain recommendations presented to them by the trade and we may expect some decision in this regard before very long. We note how your customers feel about selling their wool and that they think it better business to hold what they have instead of trying to raise some more high priced wool. Their viewpoint may be correct, but we think they have overlooked the fact that no matter what they do there will be plenty of wool raised in the United States this year and together with what we have on hand today there should be no shortage for some time to

come. We still feel that wool should be continued to be sold whenever market value is obtainable. While we do not want to place any of our consignors in a position where their wool would be forced on the market, nevertheless, we must face the facts as we see them. We do not want to fool you, the growers or ourselves about the situation." Mrs. Finn Watson and small son, John Marvin, of Albuquerque, arrived by bus Monday evening. They will visit her sister, Mrs. Carl Lewis of Artesia and her parents, Mr. and Mrs. John Prude at their ranch home, and other relatives.

Drawing Completed For District Basketball Tournney Saturday

Twelve coaches were present at the drawing for the district basketball tournament to be held at Roswell March 1 and 2. Four strong teams were placed in the upper bracket, including Hope, Roswell, Artesia and Carlsbad. There were four seeded teams in the district, based on the number of games won and lost during the season. Carrizozo drew number one; Carlsbad, number two; Capitan, number three, and Roswell, number four. Seeded teams were placed in different brackets so as to prevent their meeting in the first round. Starting at 8:00 a. m. Friday morning, Artesia will meet Hondo; Hope will meet Lovington at the same hour. Roswell will meet Cloudcroft at 9:00 a. m.; Lake Arthur will meet Dexter at the same hour. Carrizozo will meet Tatum at 11:00 a. m., and Corona will meet Hagerman at the same hour. Capitan will meet Weed at 10:00 a. m., and Hobbs will meet Vaughn at the same hour. Friday afternoon at 1:00 p. m. Carlsbad will meet the winner of the Artesia-Hondo game. Winner of game three will meet winner of game four at 2:00 p. m. Winner of game five will meet winner of game six at 3:00 p. m. Winner of game two will meet winner of game nine at 8:00 p. m. Winner of game seven will meet winner of game eight at 9:00 p. m. Saturday morning, winner of game ten will meet winner of game twelve at 9:00 a. m. Winner of game eleven will meet winner of game thirteen at 10:00 a. m. Winner of game fourteen will meet winner of game fifteen Saturday evening at 9:00 p. m. for the championship. If Artesia wins under these drawings, the local

Locals

Mrs. Lula Riley of Carlsbad was a week-end visitor of her sister, Mrs. E. N. Bryan and family. Mr. and Mrs. Jess Truett and boys drove to Lincoln Sunday for the dedication service of El Torreon. T. H. Flint is a patient at the St. Francis hospital in Carlsbad. Mr. Flint is suffering with a relapse from the measles. Sam Marshall, Los Angeles, California, oil operator, spent a short time here last week looking over his oil interests in this section. Senator Ed Gage of Pinon stopped overnight here Tuesday en route home from Santa Fe, where he attended the closing session of the state legislature.

Mrs. Edith Hardy, county health nurse, reports interest in the home hygiene class conducted at the home of Mrs. Alvin Payne each Friday evening, is holding up well.

Mrs. Robert Fall and Mrs. Hester Cutler drove down from Roswell Friday with Mrs. H. V. Fall and Mrs. Aetha Phillips. Mrs. Cutler visited her granddaughter, Mrs. Wm. Compton, and Mrs. Fall, Jr., spent some time with her friends, Mrs. Van Welch, Jr., while the other ladies attended the P. E. O. meeting.

WANTED—Clean Cotton Rags at The Advocate. Squad must play five games.

Deeper Pay—

(Continued from page one) Woolworth No. 11, sec. 26-24-36, has been drilled in at 3498 feet for an initial production of forty-eight barrels per hour with 500,000 feet of gas. Two Phillips wells, the Woolworth No. 12, sec. 26-24-36, has been given a drill stem test at 3462-90 feet and flowed at the rate of 100 barrels per hour with 500,000 feet of gas. The Worth No. 1 of the same company, sec. 3-25-36, has been given a drill stem test at 3478-97 feet and made 150 barrels per hour. Drilling the Ogg No. 2 of the Texas Company, sec. 35-24-36, forty-four feet deeper from 3497 to 3541 feet failed to materially increase the output. The well flowed at the rate of twenty-five barrels per hour with 37,000,000 feet of gas. The Texas Company, Ogg 5-A, sec. 35-24-36, drilled to 3410 feet was given a drill stem test at 3396-3410 feet and made fifteen joints in one hour. In Eddy county the Getty Oil Co., is plugging its Malone No. 1, sec. 5-20-29, after developing a hole of sulphur water at 1407 feet. The Skelly Oil Co., is cleaning out its Dow No. 1, sec. 15-17-31, after a shot of 100 quarts of nitro. The well is estimated good for thirty barrels per day natural.

Chavez-Cutting—

(Continued from first page) The petition holds that a certificate of election issued by the board and held by Cutting "was based upon fraudulent conduct of election officials, void ballots and illegal votes." Chavez charged a large number of ballots were cast in San Miguel county by voters who are not registered. The petition added they were cast, counted, and canvassed with the knowledge, consent and connivance of election officials. His petition alleged "there was a general conspiracy in the county of San Miguel and the state of New Mexico to defeat the will of the people of the state of New Mexico in the election between the petitioner and Bronson M. Cutting."

WATSON RETURNS State Senator Hollis G. Watson returned from Santa Fe Sunday night, after the state legislature adjourned Sunday afternoon at 1:00 o'clock. Senator Watson thinks prospects are good for another short session.

SHIPS CALVES Two cars of calves were loaded out of the local pens today, shipped to Courtney and Herbert at Elida, this state. Advocate Want Ads Get Results
