

DAILY MARKETS

Official Receipts, 109 Car, 3236 Cattle; 111 Cars, 7478 Hogs; 10 Cars, 2248 Sheep.

CATTLE SUPPLIES INCREASE

Business a Little Slow But Prices Steady for the More Attractive Grades.

COMMON STEERS WERE WEAK

Good Dry Lot Fat Shee Stock Active and Steady, Common Grades a Drag

Receipts from January 1, 1911

Table with columns for Receipts from January 1, 1911, showing various livestock categories and their respective counts.

Live Stock in Sight

The following shows the estimated receipts of cattle, hogs and sheep at the five principal western markets:

Table showing estimated receipts of cattle, hogs, and sheep at five principal western markets.

Receipts by Cars

The following shows the number of cars of stock handled today by railroads centering at the stock yards:

Table showing the number of cars of stock handled today by railroads centering at the stock yards.

CATTLE

Slower Tone Noted in Fat Steer Trade, Supplies Increase.

Local receipts of cattle today, while larger than on former days of the week, were not of liberal size.

Salable offerings were mostly heavy, the proportion of butcher classes being good.

Dressed Beef and Shipping Steers.

Yearlings and calves.

Feeding Cows and Stock Heifers.

Feeding Bulls and Stags.

Packers' Cattle Purchases.

TWO WAYS OF BUSINESS GETTING

There are in this country two ways of getting business. One is decent and honorable, the other is sneaking and cowardly.

ASBESTOS NEAR LAS VEGAS

Las Vegas, N. M., May 30.—Attorney Fred L. Burgen has returned from a trip up to the mountains with him several samples of asbestos.

"BEST OF THEM ALL"

That is the compliment paid St. Joseph Market by Joe Coates.

SUGAR PAYS IN PHILIPPINES

Government Expert Notes Benefits from That Section of Tariff Bill.

CATTLE BECOMING SCARCE

Few Left on Feed Around Sabetha, Kan., Says Mr. Feldman.

VALUABLE ZINC MINE SOLD

Yellville, Ark.—The Morning Star Company of Wilmington, Del., has purchased the Morning Star, the most celebrated zinc mine in North Arkansas.

WEATHER FORECAST

Missouri: Generally fair tonight and Thursday; not much change in temperature.

ARIZONA GOLD STRIKE

Prescott, Ariz.—Further news of the big gold strike made about ten days ago by the Black River Mining Company has just been obtained.

AMUSEMENTS

At the Lyceum—Wednesday night, May 31, Ethel Barrett in "The Two-Stringed Banjo" and "The Twelve-Pointed Star."

ARIZONA GOLD STRIKE

Prescott, Ariz.—Further news of the big gold strike made about ten days ago by the Black River Mining Company has just been obtained.

AMUSEMENTS

At the Lyceum—Wednesday night, May 31, Ethel Barrett in "The Two-Stringed Banjo" and "The Twelve-Pointed Star."

ARIZONA GOLD STRIKE

Prescott, Ariz.—Further news of the big gold strike made about ten days ago by the Black River Mining Company has just been obtained.

ITEMS IN BRIEF.

J. A. Wright of Braly, Mo., had a car of hogs on the market today.

Chas. Sahlin of Forbes, Mo., contributed a car of hogs to the day's run.

A. Egger, W. A. S. Derr and C. E. Noland, of Forest City, Mo., had hogs on the market.

Y. E. Walter of Nishnabotna, Mo., swelled the day's offerings of hogs by one car.

W. W. McDaniels, Walters & Co., Cooper and J. L. Steckrod, contributed to the receipts with shipments from Rockport, Mo.

Use Molasses Feed that has won by actual test, Champion Feed Co. Tarkio, Mo.

J. T. Noble, Williams & Foley, H. S. Rhodes and D. A. Price, all had hogs here today billed from Fairfax, Mo.

Transit House enters to stockmen. M. A. Bangs and Ed. Livingston of Northboro, Ia., marketed cattle here today.

Best meals, best rooms, Transit House.

D. Burke of Horton, Kan., was noted among the arrivals today, having in a mixed load of stock.

See All Bright for Molasses Feed. C. E. Ellis and S. Okeson represented the vicinity of Fairview, Kan., on the market today, the former having in hogs and the latter cattle.

There is a profit in feeding Excella Feeds. J. W. Schultz, big feeder at Lawton, Neb., were in today with seven loads of cattle. Walter Bouton sent in a car of hogs from the same point.

Wise Feeders use Excella Feeds. A. E. Gidding was on the market with cattle loaded at Virginia, Neb., Change of management at Transit House. Try our meals.

L. E. Harding and in another consignment of hogs from Hebron, Neb.

MUSEUM OF MONSTROSITIES

Los Angeles, Cal., May 29.—A live rattlesnake, held captive in a large oil can, which, in turn, was re-enclosed with a wooden box, has arrived at the Hotel Hollenbeck, consigned to Charles Smead.

Since his capture the rare "Laloprotus Mantus," or red spotted spider, the most poisonous insect of its kind, two weeks ago, Smead has been made the custodian of an immense collection of spiders, bugs and various living things that crawl, creep or fly, the latest being the rattlesnake.

A friend, residing in Calzona, having read the fact that the hotel man had received the spider, decided on a more peculiar gift, and as a result set out to catch the snake, of which species there are many in that part of the country.

Some 3,000 carabao are imported every month for work in the sugar plantations. They resist rinder pest, the disease that attacks domestic animals, and are the original source of the principal people in most respects, but their agriculture is highly developed. They have terraced the mountain sides and developed a wonderful irrigation system, which makes these terraces, 2,000 feet up the side of the mountain and supported by stone work, highly productive of the finest quality of rice.

"Rice production is not equal to the demand at present, due to the fact that the country has not yet recovered from the demoralized conditions following the war.

The biggest material asset is the forest. They have an almost unlimited amount of timber, suitable for making the finest furniture, the equal if not the superior of mahogany. The cost of cutting this timber and its removal to the coast is very high, but as transportation facilities improve the lumbering business will be one of the best on the islands.

"Milk hemp, which is not really hemp, but the product of the banana plant, was the only industry highly profitable before the Payne-Aldrich tariff went into effect. The islands have the excellent facilities for the production of this material, which is longer and stronger than any similar material, like the sisal of Mexico.

"Tobacco is also a good money-making crop, and requires more intensive cultivation than the natives wish to give it.

"One of the best men on the island is Dean C. Worcester, who went to the Philippines to see the original collecting expedition sent out by the Minneapolis Public Library.

"I think the Philippines have as great a future before them as any tropical country. The natives are at present uneducated, but their capacity for knowledge is unlimited, and they are quick to realize its value."

At the Lyceum—Wednesday night, May 31, Ethel Barrett in "The Two-Stringed Banjo" and "The Twelve-Pointed Star."

STOCK YARDS DAILY JOURNAL

405 W. Illinois Ave., St. Joseph, Mo. City Office—Rooms 2 and 3, Rock Island Building, corner Sixth and Exchange streets.

The St. Joseph Journal Publishing Co., Publishers. W. E. WARRICK, Editor and Manager.

Largest Outside Circulation of Any Paper Published in Buchanan County, Mo.

Entered at the Postoffice in St. Joseph, Mo., as Second Class Matter, September 4, 1897.

SUBSCRIPTION RATES: Daily, per year, \$1.00; Daily, six months, \$0.60; Daily, three months, \$0.35; Daily, one month, \$0.15; Semi-weekly, per year, \$0.75; Semi-weekly, per year, \$0.50; Weekly, per year, \$0.30.

In asking change of address, please state your former position. State whether your paper is Daily, Tri-weekly, Semi-weekly or Weekly. State whether you pay for it, or some live stock commission firm, and if the latter, the name of the firm.

Do not send checks on country banks. Remit with postal order, or draft payable to St. Joseph Journal Publishing Company.

Advertising Rates Published on Application.

Twenty per cent commission allowed postmasters, who are authorized to take subscriptions.

A HEAVY RAINFALL.

The whole country from the Missouri river to the Rocky mountains has had a soaking rain within the past week. Central and western Kansas report more than four inches of water falling and from the panhandle of Texas come reports of about the same amount of rainfall.

NIGHT CROWD SOAKED.

For once it did not rain on Decoration day. The old soldiers were permitted to honor their dead comrades without having to wade mud and take a soaking from the clouds.

INCREASE IN BUSINESS.

In a talk with an official of the Federal Reserve bank yesterday it was found that receipts for the month of May this year show a gain of almost 1,400 cars of live stock received at the local yards compared with the corresponding month last year.

CATTLE STATISTICS BULLISH.

Live Stock World: Prices paid for cattle do not indicate the fact, but the supply at the five principal markets of the United States during the first four months of 1911 was far below normal, and indicative of actual scarcity.

MORE SHEEP LIQUIDATION.

Western advices are that sheep growers are facing another period of enforced liquidation. They cannot compete with the flax grower in Montana, the grain and alfalfa producer in Wyoming and the general farmer all over the range country.

FATTENING CATTLE ON BLUEGRASS.

Breeders' Gazette: During the five years from 1902 to 1907 the Missouri Experiment Station conducted a series of tests, numbering 25 in all, in which altogether 262 cattle were fattened by feeding on bluegrass pasture.

STOCKING HELPS.

Burning Hides—After finishing darning a stocking, beat down the darned places with a flat object, for instance, the end of the darning pool.

A bridge at Yarmouth, England, revolves on a bearing containing balls 6 inches in diameter.

Daddy's Bedtime Story The Queerest Birds In All the World

WHAT did you like best at the menagerie this afternoon, children? asked daddy. "The birds!" cried Evelyn. "I didn't care for them very much," said Jack, "except the big owl. I walked around and around his cage, but he wouldn't take his eyes off me even when I got around clear back of him."

NOT PREVENTED BY FORESTS. That large timbered areas at the headwaters of streams or along their banks do not conserve and regulate the flow of such rivers, thereby preventing floods, but really use up water in time of drought which otherwise would flow into the streams, and that forests do not prevent flood because forest beds do not act as reservoirs for large quantities of water in times of heavy rain, are the opinions expressed by Prof. D. W. Mead of the department of hydraulic engineering of the University of Wisconsin in a bulletin entitled "The Flow of Streams and the Factors That Modify It," just published by the state university for general distribution.

INVESTIGATOR HUNT IN VAIN. The investigator hunt in vain in the forest for the stored water which is claimed to regulate and augment the flow of streams," declares Prof. Mead. "The bed of humus and debris that develops under cover of a forest moderates the runoff from showers and mitigates the severity of freshets, and promotes uniformity of flow at such periods."

PERIODS OF EXTREME SUMMER HEAT. In periods of extreme summer heat forests operate to diminish the runoff because they absorb the sun's rays completely and give off in evaporation ordinary showers, which in the open country produce temporary increase in the streams, and, therefore, while small springs are not affected, the retention of water in the soil is not true of the large rivers.

SOIL EROSION, WHICH SO OFTEN DESTROYS deforested surfaces, according to Prof. Mead, is not the result of forest cutting itself, but of cultivation, using that term in a broad sense. The natural growth which always follows the destruction of forests is fully as effective, he declares, in preventing soil erosion, or even in retaining runoff as the forest itself.

OVER ELEVEN THOUSAND PAID OUT BY INDIAN AGENT. Guthrie, Ok., May 29.—The regular Kaw Indian annuity payments is being made by A. R. Miller, Indian agent at Kaw City. The amount paid to the Indians was \$1,482. Of this sum about \$7,500 is distributed among resident Indians of Washington. The minor Indians' money is placed in different banks and held in trust by the government to be used for their maintenance and support.

SEVEN MILLION POWER DEAL. Denver, Colo.—C. C. Chappel of Chicago left Denver for the East one night last week, after closing a deal for the purchase of practically all the \$5,000,000 stock and \$2,000,000 bonds of the Colorado Railway, Light and Power Company. Mr. Chappel represented interests closely identified with the Federal Light and Traction Company, a holding concern for numerous public utility corporations in Colorado, Wyoming, New Mexico and Arkansas, which was organized in this city last summer.

BUFFALO BONES

Relics That Formerly Saved Kansas Settlers From Destruction.

OLD TIMES WERE TROUBLOUS

Citizen Tells of Drought, Hot Winds, Plagues, Indians and Storms.

Hutchinson Kan., May 29.—Buffalo bones once passed as legal tender in Reno county, Kansas, and were exchanged by the settlers of thirty-five years ago for meat and provisions.

"I had it not been for the buffalo bones and buffalo chips, many of the settlers could not have stayed here at all," said J. W. Young of Pretty Prairie, one of the first settlers in Reno county.

"We landed in Hutchinson on the 19th of March, 1874," related Mr. Young. "Hutchinson at that time was a little place, consisting of about two blocks running north and south. We crossed the great Arkansas river, of which we had heard so much, and night coming on us, we went into camp in A. M. Stevens' yard."

"This does not end our 1874 calamities. While the cattle were cooked our crops, and the Indians tried to make us think they had a better right to the plains than we, and the grasshoppers shrouded the sun like a cloud; when we had gathered our little wheat and hay for the winter, we had the misfortune to have our sod barn struck by lightning and everything within and around the barn was burned. Not only was our barn burned, but also all of our feed, chickens, hogs, implements and our dog. Our cows were so badly burned that they were never of any use afterward."

"Misfortune did not seem to come singly, as we had a second fire just about two weeks after the first one. I had rebuilt my stable and we had made a trip to Cyster's. While we were away, there was a high wind and in some unknown way our second stable took fire and burned. These losses, together with the first, mentioned hardships, had left us in a pretty hard circumstance, financially, and we were able to build the third stable through the kindness of John McCollough, then with the W. C. Edwards lumber company, who sold me the lumber at half price. This lumber I hauled from Hutchinson to build my third stable."

STOP! Paying Hold Up Prices

Don't continue to pay over a big part of your hard-earned money to the lumber combine. Stop paying them two or three profits on every piece of lumber and other building material you buy.

Buy Your Lumber

At Wholesale Delivered Prices. We sell direct to the consumer—everything that is needed in the construction of any kind of a house, barn or other building. The quality we give you is the best to be had. Many of our neighbors are now and have been buying of us for years. You will find it to be the best and most profitable money you ever made to break away from the old way of buying lumber and

HURT BY ENGINE BLOWOUT

Bystanders Injured by Flying Pipe at Topeka Station.

Topeka, May 29.—As a new Santa Fe engine, which was being taken out for a trial test, passed the Santa Fe depot yesterday morning, the dry pipe burst and some five feet of the pipe was hurled across the platform.

J. H. Cozad of Perry, Ok., and William Smith of Topeka, a shop employee, were struck. Cozad got a bad scalp wound in which a half dozen stitches had to be taken. Smith's injuries were slight, consisting mainly of bruises about the chest.

AUTO CRASHES INTO BUGGY

Three Young Women Severely Hurt in Joplin—One May Die.

Joplin, Mo., May 29.—Miss Olive Shrigley, 18 years old, was perhaps fatally injured, her sister, Jane, 17 years old, was bruised and Miss Mary Delaney, 19 years old, was seriously hurt late yesterday afternoon when an automobile driven by Roscoe Barbee collided with a buggy, carrying the three girls. Barbee's view of the vehicle was obstructed by a building until it was too late for him to stop.

A new motor horn changes its tone at the will of the chauffeur by slightly changing the position of the bell.

In 1850 the State of Minnesota had a population of 170,000 and not a foot of railroad within its border.

Don't Stunt Pigs with Corn

Corn alone makes fat and chunky pigs because it does not supply enough Protein and Phosphates for rapid, healthy growth with strong Bone and Muscle. Stunted pigs will never swell your bank account. Good corn should always be the basis for hog rations in the Corn Belt combined with

Swift's Digester Tankage

Start the pigs with a little Tankage, gradually increasing to one-half pound a day for each pig. Feed the Tankage with Cornmeal, wet or dry, and your pigs will gain one-third more than neighbor's pigs on corn and grass.

CHEERFUL CROP OUTLOOK.

Reports from Iowa, Nebraska, Kansas and Missouri.

Tell of bountiful crops in all states which are bounded by the "Big Muddy." The weather of the past few weeks has been wonderfully productive and unless some radical change takes place 1911 will be a banner crop year.

With such bright prospects ahead every farmer in the community is busy—so busy that it's almost impossible for anyone to make trips to town.

That's when "Uncle Sam's Mail Service" and Hirsch Bros.' mail order department work in harmony to help you.

A postal card will bring samples of any dress materials in our entire stock—you can order them and they will arrive at your home before you could receive a reply from any Eastern concern. That's why we serve you better and you must bear in mind that a store of this size can offer you just as good and sometimes better prices than those concerns.

Our mail order department is well equipped—all orders are filled by expert shoppers and mailed to you the same day we receive it—that's one reason it is growing so rapidly—every mail takes out loads of mail packages from Hirsch's.

Why don't you test it? Why don't you make us prove that we do as we claim? Won't you let us have the opportunity today? A postal will do.

We are members of St. Joseph's Retail Merchants' Association and refund railroad fares as per their plan. When you come to St. Joseph get your rebate book here—it's free.

Shop where they all shop—at the Big Store—HIRSCH BROS., D. G. CO., Eighth and Felix Streets, St. Joseph, Missouri.

WEARS HAREM SKIRT

Connecticut Corset Saleswoman Has "Made Good."

Garment Does Not Expose Hosiery Like Hobble or Tube and Is Most Practical Dress for Woman, She Declares.

Chicago.—Miss Pearl E. Ziegler, a corset saleswoman from New Haven, Conn., who has "made good," has appeared in Chicago with a harem skirt suit which she says is the proper dress for a business woman.

"No one knows that I wear a harem skirt," said Miss Ziegler at the Hotel Sherman. "It does not show one's hose when one steps on a street car, like the vulgar old tube skirt or the hobble skirt. It is the most practical dress there is for women."

"I have a special design I had made in Cleveland. It has a pocket for change and the like, and the panels come together so neatly in front that no one could tell it was a harem skirt. It affords freedom in walking and grace in stepping on and off street cars, and conceals the hose. Each pantalon is as wide as the average tube skirt."

"I would wear the old-style plaits if I had to give up the harem skirt. There is no reason why a woman who must make her living cannot be a thorough business woman, practical in everything, but always feminine. I don't believe in votes for women or anything like that, but I see no reason why I can't be a good business woman, and I am now working to have a general agency of my own next year."

"Buyers are impatient; there is no sentiment; all is business with them and with me. I am not the sort of a girl who dresses in frills and decorative things."

"There is no sham about me, no puffs, ruffs or jewelry, except a watch and chain which I keep concealed. I wear no rings. I wear a coat all year around, and see no reason why women shouldn't, the same as men. A tailor-made suit is always dressy."

"There is no excuse for wearing a shirtwaist. On my business calls I wear a collar and tie."

"I never wear picture hats, plumes or things of that character in calling on my trade. I dress as simply and neatly as I can."

"It takes me twenty minutes to dress, when it takes the average woman two hours. This is because I have no frills to put on."

"It is not every woman that is suited to traveling. Some would grow lonesome, but I keep too busy for that. I travel from coast to coast, making only the big cities."

"My chief asset, I think, is the fact that I have not been angry in two years, or since I started out. I believe in having a smile ready at all times; by that I mean one should always be pleasant. Anger never sold goods."

"I never refused an interview with a buyer. I think that is about the only advantage I have over a salesman. When they refuse to buy, I do not persist. I smile and trust a future visit may get the business."

"It takes the merit of the goods to sell them, and one can't sell unless one has good goods. I merely present the merits of my line in a businesslike way."

"A business woman should be simple in her dress and manners. I think the old-style skirts are ostentatious, therefore I abandoned them for the harem skirt."

"Men don't run after a girl dressed without decorations and frills. They always pick out the dolls, whether it is in the street, at a theater, a restaurant or in a parlor."

"I think the corset is the foundation of all good dress for woman. She will wear it always and would look ugly without it. I wear long-hip corsets for my harem skirt because they give it better lines."

"I have worn a harem skirt two months, but no one noticed it until I reached Chicago. I have had to fight off reporters ever since I have been here. I am afraid to go out any more, because of the reporters."

WANTS LIBRARIES IN JAILS

Best Current Literature and Readers for Prisoners is Advocated by Alderman White of Gotham.

New York.—Apart from the voluntary contributions of newspapers, books and periodicals which are sent to city institutions and jails, Alderman John J. White, successor of "Little Tim" in the board of city fathers, wants city-maintained libraries for inmates in all city-conducted institutions with a competent staff of readers, librarians and attendants. To that end he introduced a resolution at the meeting of the aldermen the other day.

"I would have each institution equipped with a fine library of newspapers and current literature for the edification of inmates," said the alderman. "Newspapers keep us all abreast of the times. We have the material for fine libraries and library attendants on the Bowery. The Bowery boys and girls are not all dime-novel readers."

\$3,300 for "Crusoe." New York.—Walter T. Hill of Chicago bought "Robinson Crusoe," printed in three volumes in 1720 and bound in red morocco, for \$3,300 at the conclusion of the Hoo library sale the other night.

CARING FOR "ONLY" CHILD

Vienna Professor Finds Only Thirteen Out of One Hundred Are Fully Normal.

Vienna.—After a study of the problem of the "only child" extending over several years, Prof. J. Friedjung of the Society of Internal Medicine and Pediatrics has made public the result of his observations. He had under examination 100 "only" children, of whom 445 were boys and 55 girls. They range in age from two to ten years.

Each had been raised in a family where there were no other children, and therefore had been subjected to the kind of domestic isolation that accompanies those conditions.

Of the 100 children 18 were severely neurotic and 49 manifested less marked symptoms of nervous instability. Only 13 of the youngsters, according to Dr. Friedjung, were fully normal. He set off these observations against another set of studies made among families consisting of several offspring. Of these only 31 showed neurotic symptoms.

Fear was the strongest symptom in 75 of the 87 neurotic "only children." They were hysterical in their nature. Forty-nine had restless sleep and 8 were subject to more marked symptoms.

Unusual mental ability and waywardness, the professor reports, seem to go hand in hand in the case of children. Of the neurotics, 32 showed malnutrition to a remarkable degree.

The "only" child, says Friedjung, gets its morbid manifestations from the excess of tender care lavished upon it. Its parents spoil it, they take away its sentiments of self-reliance, and in this way they unconsciously encourage the child never to develop unduly. A certain amount of knocking about and hardships and necessity for self-reliance is imperatively demanded, this investigator says, otherwise a child will grow into a pampered, a nervous molly-coddle.

On this account, as well as because of the menace to the race through the limitation of population to "only" children, Friedjung urges that every family should possess several children.

GHOST IN NEW JERSEY TOWN

Apparition Keeps Nervous Residents Home at Night—Spectre Described as Boy With Limp Head.

Beverly, N. J.—Bridgeport, the home of witchlore and ghost scares, had another sensation which the residents take seriously, and after night-fall the streets are deserted. John Johnson and a party of friends, passing what is known as the Paxson pits a few nights ago, were confronted by a dwarf, which, they declared, climbed out on a pit. For a minute it lingered and then, giving a screech, vanished into the woods. Other witnesses, farmers of unquestionable veracity, substantiate Johnson's story.

The old residents say that years ago a reserved man who lived on the outskirts of the village, and whose name never was learned, as the family would not mingle with the villagers, had a deformed son.

The man was driving along the country road, when the carriage was supposed to have overturned and the child fell into the pit and broke his neck. The version of the accident was accepted, but wild rumors were afloat at the time. Those who have seen the specter describe it as a boy, whose head seems to hang limp upon his chest.

DOG WAS TIED TO HOT STOVE

Railway Station Master Made Serious Blunder in Fastening Canine to Coal Heater.

New York.—Next time Joseph Carman has a dog to care for he won't tie the animal to the stove in the railway station in Vernon, N. J., where he is master. He did that the other night and the station was nearly burned down.

Carman got the dog, with baggage he had to handle in a hurry. He had to tie up the creature and saw no place but the stove, so doggie was moored to the furnace.

When Carman was out on the platform along came the village dog. The baggage room door was open and he peered in. There was a rustle, a growl, a tug and a crash of overturned stove and falling stovepipe. Smoke poured from the doorway, and with it a great assortment of howls and growls.

Carman got the dog free from the stove, then put out the blaze, then set up the stove, and then—well, the way that dog yelped as he fled down the track showed Carman's shoe was heavy.

Farm for Social Work

Fishkill, N. Y.—A gift of \$100,000 to the University settlement of New York city from the widow of General Howland, U. S. A., is announced here. The gift includes the entire Howland estate at Fishkill-on-the-Hudson. The property consists of about 250 acres, and it is understood that the settlement will establish a model farm and summer camp there as a part of its work.

Home for New York's Needy. New York.—Work will be commenced here shortly on a million-dollar home for the needy, the gift of Henry J. Baker, a drug importer, who died two years ago leaving a large fortune. The home, a memorial to his parents, will be "for all needy persons who have passed the half-century mark."

95,824 Die in Month

London.—The official figures of the ravages of the bubonic plague in the central provinces of India show the appalling total of 95,824 deaths from the disease in March. The fatalities during February were 43,508.

FLAX IS PROFITABLE

Money to Be Made in Raising Crop on Western Plains.

Owing to Great Scarcity It is Selling Far Above Ordinary Average Price—One of the Best Crops for Dry Farming.

Topeka, Kan.—Flax averaged one-half a crop in 1909 and one-third of a crop in 1910 for the United States. The crop was short in 1910 in the flax-growing sections of the entire world. As early as November Chicago was forced to get flax from Argentine and Calcutta. Flax is now selling at two and a half times the ordinary price, and there is not nearly enough in the world to supply even urgent demands.

Flax is one of the best dry-farming crops for the plains whenever the soil in the spring is moist enough to secure rapid growth. When the soil is dry in the spring flax is a poor crop, no matter how favorable the summer season may be.

In most sections of western Texas, western Oklahoma, western Kansas and eastern Colorado the soil is in good condition in regard to moisture, and if the farmers will get good seed and thoroughly prepare the soil for it, they can probably make large profits with flax this year. The dry farmers of the southwest can market their crop before the crop from the regular flax-growing sections is ready and should get the cream of the high prices.

Flax on the plains will average twelve to eighteen bushels an acre in a favorable season, using good seed and thorough preparation of the soil. Flax in eastern Colorado commands a premium because of its high percentage of oil.

Flax demands a moist mellow seed bed that is shallow, with a firm bottom. The saxe kind of seed bed that yields the largest crop of wheat. Plowed ground should be compacted by rains or a sub-surface packer before seeding and be well firmed on the surface.

Flax is a good crop, yielding well if the ground is thoroughly prepared, and leaves the ground in the best condition for winter wheat. Sod should be cut up lengthwise, with a disk harrow and then smoothed with a spike-tooth harrow. Flax can be seeded on corn ground without plowing.

Bright, plump seed only should be used. There is much shrivelled and diseased seed on the market. Diseased seed sowed once will infect the farm for years and the winds carry this infection all over the neighborhood. Immediately before sowing treat all seed with 40 per cent formaldehyde. Spread the seed thin on a floor. After the seed has been spread mix one-half ounce of formaldehyde to one gallon of water for each bushel of seed. Thoroughly sprinkle the seed with one-fourth of the liquid, shoveling and mixing the seed, and sprinkle again with another fourth of the liquid and mix again. Repeat until the seed has been sprinkled and mixed four times, taking care that every seed is thoroughly dampened. Quickly shovel the seed into a heap and cover with a canvas or sacks for two hours. Spread out, dry quickly and sow within twelve hours.

Now after the danger of hard frost is passed, using a drill and seeding about twenty pounds of seed per acre, and putting the seed one-half to one inch deep. Broadcasting puts the seed in at uneven depths, causing uneven growth and ripening.

RACING FOR THE SOUTH POLE

Much Interest Taken in London in Expeditions Headed by Capt. Scott and Ronald Amundsen.

Copenhagen.—The race between the Antarctic expeditions under Captain Scott and Capt. Ronald Amundsen for the south pole is attracting much attention here, and is the subject of considerable comment in the press of Scandinavia.

Dr. Rensch, president of the Norwegian Geographical society, speaking with regard to Amundsen's chances, states that he can surmount the difficulties of reaching the pole if he is able to get his dogs safely over the equator. This is the main point, but he must start also under the same conditions as those found by the expedition under Sir Ernest Shackleton and Capt. Scott.

Prof. Mohr, a great Polar expert, agrees with Dr. Nansen in thinking that it will certainly be impossible to reach the south pole from Cape Adare, and that Amundsen has made a mistake in not going by some other route than that followed by the British antarctic expedition.

Rare Disease Kills

Philadelphia.—After three years' illness from a disease so rare that it is said to have been the nineteenth case in the history of medicine, James M. Rhodes, Jr., widely known socially and a former guard on the Princeton football team, died the other day at Villa Nova, near here.

The disease is known to physicians as blastomycetes, and is manifested by a malignant vegetable growth, which attaches to the intestines.

No Place to Strike Woman

Indianapolis, Ind.—"Where did this man strike you?" asked Judge Collins of Mrs. Edward Johnson, colored, who was standing beside her husband, charged with assault and battery.

"He hit me across the street in front of the saloon, judge," was the reply. "Well, that is a vital place to strike a woman, Johnson," remarked the court, gravely. "You ought to be ashamed of yourself. It will be \$1 and costs in your case."

OVER SAHARA IN DIRIGIBLE

Doctor Siegest Hopes to Prove That "King Solomon's Mines" Are Not Entirely Legendary.

Berlin.—Doctor Siegest is actively engaged in preliminary preparations to cross the great desert of Sahara in a dirigible balloon. Prominent geographers and meteorologists are helping him in his scientific calculations and his choice of an airship. Count de la Vaulx, the famous French aviator, had the same purpose a few years ago, but gave it up because airships had not sufficient protection against the sun's rays. Doctor Siegest confidently expects to make the trip he has laid out—about 950 miles—in 34 hours. His aerial vessel's engines will give the craft a speed of 18 1/2 miles an hour; besides, Doctor Siegest is counting on 12 miles an hour more by the wind.

To the unimaginative the Sahara is only an illimitable, and waste, but from it have come legends of buried cities of incalculable antiquity and tales of immense, hidden riches. Doctor Siegest wishes to clear up the mystery surrounding the expedition of Browne, the English explorer of a hundred years ago, and to investigate the romantic story of Rholfis, who found traces of a great road running out in the desert until the sand obliterated them. What lies beyond that lost track? Whether did that great highway lead, and of what character were the people who constructed it?

These questions, which have been put so often, are supposed to have inspired the plot of Rider Haggard's romance, "King Solomon's Mines," at any rate, they appear to Doctor Siegest to be well worth answering. The headquarters of this expedition will be in the Nile valley. From it the airship will sail about 210 miles to the oasis district in the desert. In an oasis a depot will have been prepared with cylinders of gas, spare screws and other fittings—everything needed to repair any damage that may have been or may be done to the craft. From the depot the dirigible will start on her real flight of more than 600 miles over the "undiscovered country." Having traversed it, Doctor Siegest will attempt either to reach the coast or to return to the Lybian oasis. The expedition's cost is estimated at \$250,000.

TWINKLING STAR MEANS LIFE

Prof. See of Naval Observatory at Mare Island Talks to American Philosophical Society.

Philadelphia.—That planetary systems similar to our own revolve about all the fixed stars and that these planets are habitable and inhabited like our own planet, which revolves about the sun, was the declaration of Prof. T. J. J. See, government astronomer in charge of the naval observatory at Mare Island, Cal., made the other day before the American Philosophical society at its annual meeting. He said life was a perfectly general phenomenon in the universe and that living beings exist wherever a star twinkled in the depths of space.

His discoveries in cosmical evolution lead to the development of an entirely new science, the science of cosmogony, Professor See asserted. Among the results announced was a link in the chain of reasoning establishing the laws of the evolution of the solar system, showing that the planets originally were small bodies forming at a great distance from the sun, and that their masses have been increased by gathering up all manner of lesser bodies from meteorites to satellites.

Professor See outlined the process by which the planets had been built up out of matter once circulating in our nebula as comets, and said the destruction of the comets was still causing showers of comical dust to fall upon the planets, as witnessed in the celebrated star showers of 1799, 1833 and 1866.

"Our system was once literally filled with comets, and Kepler was right," he said, "when he declared there was as many comets in the heavens as there was fish in the sea. And just as the planets have been captured and added to our sun from without, so also the satellites have been captured and added to their several planets. Even our moon is a planet which came to us from the heavenly space, and was never thrown out of the Pacific ocean, as was formerly taught by Lord Kelvin, Sir George Darwin, Boincare and their followers."

Airships to Find Poles

New York.—Rear Admiral Robert E. Peary believes the important work of polar exploration of the future will be done by means of the aeroplane. At the annual dinner of the Aeronautical society he said:

"In my opinion the aviator is destined to conquer the two remaining unknown areas of the globe, the regions surrounding the north and south poles."

"The balloon will not serve the purpose—the work of exploration in the future will be done by aeroplane."

Save Expense of Man and Team

The Universal Hay is a big labor saver on the farm. Operated with any 2 1/2 P. or larger, gasoline engine. Takes place of team and driver. No operator required at the host. Save the money you usually pay for hired men. Will pull rope or cable any place. Has pull-back drum attachment for returning empty hay carrier. 30 DAYS TRIAL—no risk. The Universal Hay satisfies you or costs you nothing. Write for free literature and particulars of trial offer.

HAMMONDS

MISTLETOE

Hams, Breakfast Bacon, Lard and Canned Meats

are the finest that the packing house art can produce.

HAMMOND PACKING CO.

CHICAGO, ILL. ST. JOSEPH, MO.

3 Bottles FREE!

Three bottles free? Yes, sir; three bottles free—absolutely free—if you don't find Goetz "Pale Lager" the greatest beer ever. Wow, but it's good!

Yank out the "Three-Free Order Blank" below, put your "John Henry" on it, send it to us and, no matter where you live, there'll be a full case of "Goetz" on its way to you in less than one hour after your letter reaches us.

Pull the corks and drink three cool, thirst-quenching bottles. If it "hits the spot," you've discovered something—the King of Beers at a fair price.

If it doesn't prove the most delightful draught you ever got next to, give the remaining bottles a return trip at our expense and all the money you've put up will be put back in your pocket.

Goetz "Pale Lager" has got to make good with YOU, or else we buy you three bottles free!

Goetz "Pale Lager" BEER

Most anybody can make pure beer. And the commonest beer can be healthful. But the flavor—the taste—is the real test of good beer.

We spend thousands of dollars extra, every year, to give our customers that wonderfully satisfying flavor found only in Goetz "Pale Lager" Beer.

The grain and hops we use are the best obtainable.

We propagate our yeast by the famous Laasche Pure Culture Yeast Apparatus.

Our specially constructed Hop Strainers remove every trace of disagreeable bitterness found in most beers.

Our new Malt Mill, connected to automatic scales, insures an exact, proper amount of materials. Thus, Goetz "Pale Lager" is uniform—it always tastes the same.

Yet Goetz "Pale Lager" Beer costs no more than commonplace, insipid kinds.

ORDER NOW! DIRECT FROM THIS ADVERTISEMENT. Use the "Three-Free" Order Blank below.

Write to Nearest Office **ORDER BLANK**

Date _____

Goetz Brewing Co., Dept. E. Kansas City, Mo.

Dept. E. St. Joseph, Mo.

Please deliver to me one case of your Pale Lager Beer (3 dozen bottles). I will try three bottles, and if I decide to return the balance of the case the \$3.05 deposit is to be refunded and the three bottles will cost me nothing.

If I accept same you will refund me \$1.25 when I return the case and bottles.
