STOCKERS AND FEEDERS.

from 15@25c, as compared with last week's close. As usual, something good in the way of fleshy feeders have met with ready call at all times, and with hot packer competition for this

class of stuff during the week, prices are closing in about the same notches

as at last week's close. A range of \$5.25 up to \$5.50 has taken a good many of the fair to good class of feed-

ers weighing in the neighborhood of 1,000 lbs., while a little business with

something attractive in this line at \$5.75 and \$5.90 has been developed. Stock cow and heifer trade has been

featured by light supplies and a good demand. Prices have shown a ten-

dency to firm up a little under the in-fluence of the good demand, although the bulk of the week's business has

been at the sharp decline of last week.

Good to choice feeding steers are
quotable at \$5.75@6.00; medium to
good grades at \$5.50@5.75; good to
fancy stock steers at \$4.75@5.25;

Cows Steady to 10c Off-Heifers Weak to 15c Lower-Bulls and Calves Firm-Stocker Market Quiet.

An unusually heavy Friday supply of cattle reached the local yards today, attracted probably by the high prices of early half of the week, when receipts were cut down to meage, proportions on account of demoralized receipts were cut down to meage, proportions on account of demoralized railroad service as the result of the Sunday snowstorm, the worst experienced in this part of the country for several years. Early estimates called for 2,000 cattle. Later this looked a bit high. The five markets combined reported an aggregate of 10,400 cattle as compared with a normal run of 5,800 for the corresponding day a week and year ago. As was the case yesterday, the supply was made up largely of beef steers. Quality was not as good, however, and nothing equaling the top beeves of Thursday was available. The trade was slow in rounding into shape and the undedtone was weak. A number of trains were late in reaching the yards and buyers were inclined to hold back until most of the stock was yarded. A few scattered lots, embracing pretty good medium weight beeves as well as warmed up, lower priced cattle supplied. sonably brisk on this basis until practically as warmed up, lower priced cattle sold within the first hour of trading at prices quoted steady to weak as compared with yesterday's lower level. The movement did not show much volume, however, until rather late in the forenoon when sales were quoted largely weak to 10c lower than Thursday's general average. Best beeves offered sold at \$7.25, with bulk of the sales for the day ranging from \$6.25 @ 7.00, with a few light, inferior killers selling below the \$6.00 line.

The following prices on steers are quotable on the St. Joseph market:

Choice to prime, \$7.50@8.00; good to choice, \$7.00@7.50; fair to good short-fed, \$6.50@7.10; medium to fair short-fed, \$6.50@7.10; medium to fair short-fed, \$6.50@7.10; medium to fair short-fed, \$6.50@6.25.00; common to medium, \$5.50@6.25.00; common to medium, \$5.50@6.25.00; common to medium, \$5.50@6.25.00; common to medium, \$5.50@6.25.00; common to medium weight cattle were down from 15@25c, as compared with last work! Supple something to the forenoon arrivals had been cleaned up. Quality was fairly good, although there was a somewhat agod, although there was a somewhat agod at the customary week-end flainess, and salesmen experienced little difficulty in cashing their holdings at prices not radically changed, as compared with yesterday. Weather conditions militated against any great amount of activity in this department during the opening days of the week and the general trade tone was decidedly weak. Country department during the opening days of the week and the general trade tone was decidedly weak. Country department during the opening days of the week and the general trade tone was decidedly weak. Country department during the opening days of the week and the general trade tone was decidedly weak. Country department during the opening days of the week and the general area to the officulty of the forenoon artivals here we

short-fed, \$6.25@6.50 medium, \$5.50@6.25.

0....1077..6 30 7yrls. 600..5 40 4....1072..6 25 1.... 921..5 40 COWS, BULLS AND MIXED. Although there was a comparatively light quota of cows and heiters offered here today, the undertone of the trade showed weakness. Buyers were out to further reduce prices from the abnormally high level attained during the first three days of the week when the market scored sharp advances as the result of extremely scant supplies. A few early sales of cows were quotable about steady with yesterday but heifers met an indifferent demand heifers met an indifferent demand with bids all more or less lower than Thursday. When the trade got fully under way it was a steady to 10c lower deal on cows, with heifers and mixed lots 10@15c lower as compared with yesterday's closing level.

Bulls did not show a great deal of change. This class of stock is a little lower than Wednesday's high point.

lower than Wednesday's high point, but 10@20c higher than the extreme low close a week ago. Veals are closing the week around 25@50c higher than a week ago. Best vealers are selling at \$7.50 at the close of the week, as compared with \$7.25 a week

ST. JOSEPH CASH GRAIN MARKET.
Today's cash values: Receipts: wheat, 2 cars; corn, 14 cars; oats, 2 cars However, trade opened in good season with buyers taking a few odd lamb consignments at \$6.00 @ 6.25 and ewes to \$4.00 ewes at \$4.00, and quoted their purchases steady as compared with yesterday. There was a parpable scarcity of high dressing lambs included in the run, most of the offerings grading fair to good, and it was in few cases where packers were forced to go above \$6.15. Trade was reasonably active from that outset, although belated arrivals delayed the clearance until late in the session.

For the week receipts both locally and ewes steady as compared with yesterday. Barnard, Mo., was represented on the market by shipments of stock from the following prominent stocks from the

and at the five markets show a slight decrease as compared with the previous six days. At this point a total of 16,600 sheep and lambs have registered as compared with 18,482 for the previous week and 12,345 for the same period a year ago. At the five markets total receipts figure up to 1900 against 204 000 last week and 12,345 for the same period a year ago. At the five markets total receipts figure up to 1900 against 204 000 last week and 12,345 for the same period a year ago. At the five markets from Westboro, Mo. markets total receipts figure up to 200,000, against 204,000 last week and 149,100 for the corresponding time a year ago. With one of the worst blizzards of the year sweeping the cornbelt country, at the opening of the week, supplies were reduced to the minimum; in fact, during the first three days there was hardly enough mutton marketed to establish a market. Under the influence of light supplies prices gradually mounted upward, and an advance of 10@15c on best lambs and 15@25c on aged sheep recorded during early part of the best lambs and 15@25c on aged sheep recorded during early part of the week has been easily maintained and it is on that basis that values are closing. A spread of \$6.25@6.35 has taken the bulk of the high dressing Mexicans and Colorados, while a good share of the week's business has been at \$6.00@6.15 A good class of fed. at \$6.00@6.15. A good class of fed Bigley, all with live mutton, ewes have been eligible to \$4.20@ Erwin with a car of cattle.

4.05 generally.

DON'T NEGLECT SEED TESTS. Seed corn should be tested quite generally in the middle west this win. burrow. ter. A severe freeze last fall following heavy rains in many regions before the crop was husked weakened if it did not kill the germ in millions of kernels. By testing each seed ear the condition of the germ can be determined. Home-made or commercial testers can be easily operated.

THE BUSINESS FARMER.

A business farmer is not enslaved by his work. He has time occasionatly to leave home to attend institutes, short courses or other meetings at which, through eye and ear, he can better prepare himself for increasing-ly effective work with brain and hand on his farm. A rolling stone gathers no moss, but a stationary stone gathers nothing but moss, which is a low form of vegetable life.

WOOL BUYERS ACTIVE.

Chicago Live Stock World: "Activ ity in the wool trade is pronounced,' remarked a well known trader who returned from the west last week. Eastern buyers are all over the western country contracting wool on the sheep's backs and are engaging a lot of it. First contracts were made about three weeks ago with Utah wool at 14 Wife. Since then buyers have been invading Idaho and great quantitles of wool have been contracted there at 17@18%c. Small fortunes are being spent by wool buyers in telegraph and telephone talks in their efforts to contract clips. A great clip are in fine condition.

POOR RAILROAD SERVICE.

Eastern railroads are doing little if any better in handling live stock trafflo than western lines, says the Breeder's Gazette. Early last week a Chicago commission house received an order from a dairyman in centra. New York for a carload of forward springers. The shipment started eastward on Wednesday but had not ininitial initial initia reached Buffalo on the following Monday. Owing to scarcity of choice lambs at eastern markets, butchers down that way began filling their needs at Chicago, but were compelled to desist, either because they were unable to get cars or the stock shrank out so badly en route as to lose all the merit it originally possessed. Conspicuous among the offenders have been the minor roads which have little live stock traffic and are apparently not desirous of developing that traffic by giving feeders the service of essential to keeping them in business.

FIRE AT RIDGEWAY, MC.

\$20,000 Loss Accompanies Destruction of Four Buildings.

business houses were burned, how-ever, before the flames could be subdued. The estimated loss is about \$20,000. The following buildings were burned: The Ridgeway Theater building, which included the Ridgeway Theater; L. Manuel's general store and the offices of Dr. J. C.

To Keep Cake Moist—Any kind of the store and the offices of Dr. J. C. Smith; the Michaels shoe and millin-ery store, Chub Mitchell's restaurant; Frank Willcut's restaurant. The wilding was a mobrick structure while the others were a

frame.
The origin of the fire is unknown.
It started in the theater building and was not discovered until the flames had gained great headway. Ridgeway has neither organized fire department nor waterworks system and the volunteer bucket brigade found itself practically unable to combat the fire, until the use of show was begun. The fractically unable to compat the fire, until the use of show was begun. The flames spread to the Michaels store next and from there to the Mitchell restaurant. The Willcut restaurant was the last to burn.

Ridgeway is located about twelve miles north of Bethany.

The brooder is more responsible for poor results than is the incubator. The brooder has not as yet reached the stage of perfection that the incubator

Daddy's Bedtime

How the Little Groundhog Fooled

The Crows Closed the Groundhog's Door.

ROUNDHOG day was over and gone, but the children's interest in the groundhog did not flag.

Jack and Evelyn always ran to the window when they got up to see if Mr. Groundhog could view his shadow that day. They were afraid that, after all, there might be something about the weather that Mr. Groundhog mightn't like and would send him back into his hole.

"I read a funny story about some crows and a groundhog," said daddy. "The story happened in one of the middle states and was told by a farmer. "The farmer was out in one of his fields when he heard a flock of crows making a great fuss about semething. Crows are noisy creatures anyway, and

at first he didn't pay much attention to them. "Then be noticed that what they were chattering about was a little groundhog who was looking about for something to eat,

"Having made up their minds that they did not want the groundhog prowling about in their feeding ground, the crows flew over to the stone beside which the groundhog sat and gave him a vigorous scolding. Mr. Groundhog lifted up his nose as much as to say, 'Oh, who cares!

"Then the crows flew off to a tree and talked things over among themselves. An old grandfather crow, who seemed to be leader, gave his views in very angry tones, and the other crows appeared to be much taken with

"As if acting on his advice, they flew flercely down at the little groundhog, who wisked into his hole before they could reach him. "Boiling with rage, the crows pounced upon the hole and began scratching

and clawing at the earth until they had the opening closed. "Then they flew back to their trees and cawed their joy at thus having settled things for the groundhog. They thought he couldn't get out of his

"Clever crows they were, but not so clever as the little groundhog. One of the birds chanced to look at a little knoll a few feet away from the tree, and

there was Master Groundhog calmly looking up at them. "Well, those crows were so surprised and discouraged that they gave one great caw and, flapping their wings, flew off to the woods, leaving the groundhog to have everything as he liked.

"You see the groundhog, like all of his kind, had more than one door to his little home. So when the crows had closed the front door he just slipped out by the back way to see what they were doing."

ENGLAND'S BIG ARMY BILL

Estimates of Expenditures for Financial Year Enormous,

London, Feb. 29.—The estimates of expenditure of the British army for the financial year of 1912-13 includ-In ing both effective and non-effective services aggregate \$139,300,000, or an increase of \$850,000 over those of the year 1911-12. The entire increase is due to the proposed expenditure by government on the development of

WELLS FOR IRRIGATION

DERRICKS IN OPERATION MAKE WESTERN KANSAS LOOK LIKE OIL FIELDS.

BIG "UNDERFLOW TAP

some Pumps Have a Capacity of 3,000 Gallons of Water a Minute

> to Irrigate Big Acreage.

Topeka, Kan., Feb. 29 .- Western Kansas looks like oil fields of south-ern Kansas and Oklahoma just now on account of the thousands of dericks scattered over the prairies. It sestimated by officials of the Atchison, Topeka and Santa Fe railway that more than 5,000 wells are being drilled in western Kansas this winter. And every well means from forty to eighty acres of land under irrigation

ring the hot season next summer. The derricks are as thick in west rn Kansas as they ever were in the il fields," said Charles A. Walker, di-ision freight agent of the Santa Fe.

vision freight agent of the Santa Fe.
"The derricks are similar in size and shape to those used in the oil fields. They are to be seen especially in Finney, Scott, Hamilton, Ness, Logan, Haskell, and Gray counties."

The wells vary in depth from fifty to 400 feet and are from twelve to thirty inches in diameter, depending on how large the pumps are. The drills go down from fifteen to fifty feet after striking water and the wateet after striking water and the water is drawn from the bottom of the rell, so that there is always sufficient ad to the water to guarantee steady

the fields as needed.

These wells cost from \$750 to \$2,000 ully equipped with pumps and gaso-ine engines, the cost depending on engines, the cost depending on in a depth and size of the pumps. ed a The plant cost \$759 and by starting the pump in May a half section, or 320 acres of land, will be irrigated all summer, as the water is constant the summer as the water is constant. all summer, as the water is stored in eight ponds, each pond sufficient in

size to cover forty acres of land an inch deep with water when it is let J. W. Lough in Scott county has well 130 feet deep that pours out 2406 sallons of water every minute, and he s digging a well that will produce ,000 gallons a minute, and then three more wells of the same size. He has 6,000 acres to irrigate, and, while each well is now operated by a gasoline en gine, when all the wells needed to ir rigate the 6,000 acres are ready h will build a central power plant and operate all the pumps with electricity. A single colony of Quakers, or Friends, which settled in Scott county on 15,000 acres two years ago, has contracted for 200 wells to be put in this spring and five derricks are now working on these wells. All the pumps of the 200 wells will be operated by electric power from a central plant. An electric power company has been organized at Scott City to build a

ty miles of the city. Five horse power is sufficient to run a pump which draws water not over fifty feet and t less than a thousand gallons a min-At Deerfield a company is furnish-At Deerfield a company is furnishing electric power from a central plant for more than 300 wells at the present time and will supply power for 500 wells during the coming season. A gasoline engine of five to twenty howse power will pump from \$00 to 3,000 gallons a minute at a cost of leant a barsa newer an how cost of 1 cent a horse power an hour, so that the expense of getting the watr out of the earth and into the ponds

for irrigation is not heavy.

Bad Roads Cause Change of Time Savannah, Mo., Meet.

Chicago, Feb. 29.—Darius Miller, president of the Chicago, Burlington & Quincy Railroad company, sent the governors of thirteen western states an appeal for assistance in reducing trespassing on railroad property to a minimum.

Mr. Miller said in his letters that 51,083 persons had been killed while trespassing on railroad right-of-way in the United States between 1902 and 1911 spoonful of soda dissolved in a little of the molasses, one teaspoonful of salt, one pint of good buttermilk. Mix all the ingredients well together. Bake in a square of oblong bread pan for one hour.

The above recipe is a prescription The above recipe is a prescription the communication of the communication of the railways. It is constantly necession to story trains to the railways. It is constantly necession of the railways of the railways. It is constantly necession of the railways of the railways of the railways. It is constantly necession of the railways of t

200 Immigrants En Route to Hawkeye State Reach New York.

New York, Feb. 29 .- Two hundred Dutch farmers and their families are in New York en route to Iowa where they have purchased a large tract for farming purposes. These arrived here on the liner Noordam from Rotterdam. All are in possession of ample funds and the men and women and children are splendid specimens of the sturdy Friesland yeoman farm-ers, who have been the backbone of Holland in the time of trouble. Heavy taxation and high rents were the Friesland.

A CHEESE COOK BOOK.

Another Aid to Housewife Issued by Agricultural Department.

Washington, Feb. 29.-Another cook book, this one explaining how to prepare cheese in numerous ways, has been added to the list of those into it. Then I empty the pail into the rinsing water. When I rinse towels I add more of the bluing water. By putting pillow cases and other firm articles first into the rinsing water I find my clothes are never too blue.

Deafness can seldom be cured, yet many a man is given his hearing in the police court

avalation in the British army as it is proposed to spend \$800,000 for aeroplanes alone.

Viscount Haldane, secretary of state for war, said a complete military aviation school will be established soon on Salisbury Plain, the great maneuvering grounds of the army in England.

All careful poultrymen stamp their eggs, but that does not entitle them to the privilege of the mails.

CAPTURE ROBBERS' CHIEF? Live Stock Receipts.

Man Arrested Believed to Have En gineered New York Holdups.

New York, Feb. 29.—In the arrest at Memphis, Tenn., of Francis Ford, whose real name is said to be Eugene Splain, the New York police believe that the man who engineered the recent sensational taxicab robbery here and appropriated the largest part of the proceeds, has been captured. Splain, who comes from Boston, where he is known as "the Parrott," secured \$8,000, the police say, of the \$25,000 taken from the two messengers of the East River National bank.

The man was trailed from here to Chicago, where he boarded an Illinois Chicago, where he boarded an Illinois Central train, and is believed to have been bound for San Francisco.

Total. 606,187 616 232 The police assert that Splain re-hearsed the robbery in Central park with his alleged confederates, of Months whom four are now under arrest here. Three of these men are said to have confessed.

Deputy Police Commissioner Dougherty said that he expected to connect Splain with other recent holdups in New York.

top of a tin pail or old tomato can— and hang it up on a nall driven into the woodwork of the chicken house about six inches from the ground. Be sure there are no sharp edges to the can, or that the head of the nail does not protrude more than half an inch.

Also called Tetter, Salt Rheum, Pruri-tus, Milk-Crust, Weeping Skin, etc.

ECZEMA CAN BE CURED TO pumping.

For thirty miles on each side of the Arkansas river there is what is known as the "underflow," an inexhaustible sheet of water flowing through gravel make this broad statement after putand sand at the rate of 800 feet a day and from 100 to 300 feet thick. All of these wells tap this underflow and get water from it for the crops when the rains do not come. then the rains do not come.

The water is pumped into ponds cattered about over the fields to be rigated and the pumps keep going ay and night. The water is allowed or run out of these ponds and over the fields to be could not be cured—all I ask is just a chance to show you that I know what I am talking about. If you will write me TODAY, I will send you a FREE Sept.

AMERICAN PAPER BAG COOKING GENUINE STEEL POSTS

THE pasture is the mother of the farm. The permanent pasture should be divided into fields by the use of woven wire fences.

Fields should be of such size that each one will be pastured off in from 8 to 10 7 days. The number of fields will depend on the growth of the grass. By dividing the pasture the grass is evenly cleaned up and an intense use is made of the whole pasture. To save time the pasture should be provided with gates, handy, easy to open and not too small. Pasture is the mother of the farm, and live stock must have freedom.

American Fence is made of large, stiff wires, galvanized heavily, having the American hinged joint (patented), a fabric most flexible and wearresisting. A square mesh fence of weight, strength and durability -three great needs in | ess in the fine art of cake making. farm fences.

We appeal to the scales as the judge between American and other fences. Its decision shows weight of metal; and as fence is sold by the rod, the buyer gets more for his money.

Dealers in Every Place
