If you do not receive your paper regularly, notify this office or your commission firm at once, so the matter may be rectified without delay.

Advertising Rates Furnished on Application.

Special 25 per cent commission allowed postmasters, who are authorized to take subscriptions.

WILL FEED LESS CORN.

One factor not to be ignored in figuring what the new crop of corn will be worth is scarcity of this cattle, not only in the corn belt, but west of the Missouri river, says the Chicago Live Stock World. Hundreds of thousands of tons of corn silage are being put up, and this, fed in combination with cottonseed meal, will be the main reliance of many cattle feeders during the coming winter.

ENCOURAGE MUTTON EATING.

Omaha Journal-Stockman: It was the prospect of free wool a few years ago that forced stockmen to breed up their flocks and combine mutton with wool growing. Now that there is a prospect of free wool in the near future it is up to the sheepman to produce a better grade of mutton and more of it and at the same time start a campaign of education that will teach people how to prepare mutton for the table.

Daddy's Bedtime Story

How Poor Daisy Lost the Lunch Basket

EVELYN was forgetful at times and she liked to say she was absent-minded. "Oh, fudge!" Jack would reply. "You just forget!" For Jack had small patience with long words. "What's the use of saying things if folks don't know what you say?" was one of his mottoes.

farmer in the arid belt, digging in an ancient Indian mound, unearthed a jar that contained some wheat. This he planted, and to his surprise it germinated. It stood well and yielded generously, and the berry was hard. The next year Mr. Koffoid gave some of his wheat to neighbors. Their experiments proved as successful as his own.

In 1857 Wendelin Grimm brought from his home in the grand duchy of Baden, Germany, to his new home in Minnesota a fifteen-pound bag of alfalfa seed. The climate of Baden is much milder than that of Minnesota, and the seed nearly all winter-killed; but Grimm declared that he would yet raise alfalfa in Minnesota as he had in Germany.

There are many instances like these—romantic, almost thrilling; and if it is wealth that holds the fancy, these incidents of the farm represent more millions than all the gay trappings of the court of Louis the Sun King or the Field of the Cloth of Gold—Youth's Companion.

SCIENCE BUSY IN TEXAS

Old-Time Planters Being Rapidly Converted to New Ideas.

Beaumont, Tex., Sept. 3.—Apparently unnoticed by the great mass of the people at large, and even by many agriculturists themselves, a titanic struggle has been in progress in this country for many years (though particularly accentuated during the last few years) between the methods on the one hand of the large land-poor farmer, with the old unscientific methods to which he clings with the bulldog tenacity of an American, a perseverance worthy of a better cause.

It would seem as though all the efforts put forth in teaching farmers would have been sufficient to work almost any desired transformation. But this was by no means all that was done. Newspapers, the Farmers' Union, farmers, local clubs, commercial clubs and many other organizations all added their quota in the game of farm boosting realizing that civic and industrial welfare, both depended upon farm prosperity as the very basic nucleus of national progress.

After plowing, he packed the loose soil turned up by the plow so that it pressed down against the subsoil underneath, where the water of ages was accumulated. This packing caused capillary action to set in, whereby the moisture was brought up to the plant roots. The mulch of dust on the top prevented the sun and the wind from licking up the water. Millions of acres of land that formerly were barren desert are now cultivated by dry-farming methods, and are helping to feed the people of the earth.

MISSOURI LAND CONGRESS

Truck Garden to Be Feature of St. Louis Show.

Fulton, Mo., Sept. 3.—Counties throughout Missouri are vitally interested in the Missouri National Land Congress, which will be held in the Coliseum at St. Louis during the week of Oct. 14. Many applications are being sent in from this section for display space and this demand will continue well up until the beginning of the disposition, which is to be held under the auspices of the Missouri Immigration Society.

Committees were appointed by Col. Jay L. Torrey, president of the society, are working with the county courts and the commercial clubs throughout the state with an object of having the products of each county in the states on display during the week of the show. It is expected that many of the commercial clubs will have an exhibit in addition to that of the county.

'BUG FORECASTS' TO BE MADE

Kansas University Officials Planning Tests of Weather on Insects.

Lawrence, Kan., Sept. 3.—"Bug forecasts" are to be issued hereafter by the University of Kansas so that Kansas farmers may know in the spring just what insect pests they will have to look out for during the season, and being thus forewarned, to escape damage. Extensive experiments now being conducted by the Department of Entomology at the university have furnished the possibility of such forecasts being accurately made.

Wilmington, Del., Sept. 3.—The neighborhood of Third and Adams streets was for some time in a state of siege because of the presence of a swarm of bees, which swooped down and settled on the rain spout in the rear of Charles Dennis's home, at 293 North Adams street. The spout is 20 feet long and the bees completely filled it.

HOMES BESIEGED BY BEES

Swarming Stingers Have Whole Neighborhood in Terror.

Wilmington, Del., Sept. 3.—The neighborhood of Third and Adams streets was for some time in a state of siege because of the presence of a swarm of bees, which swooped down and settled on the rain spout in the rear of Charles Dennis's home, at 293 North Adams street. The spout is 20 feet long and the bees completely filled it.

SET OF HORN FURNITURE

Missourian Completes Set After 15 Years' Work.

Independence, Mo., Sept. 3.—Fifteen years of work and 700 horns from long horn steers were consumed by B. F. Whitmer of this city in making a set of furniture. The furniture is on exhibition at the county fair here. There are two chairs, two tables, two picture frames and a hall rack with mirror.

BIGGEST FROG SWATS FLIES

Bronx Zoo Expects to Put Value at One Thousand Dollars.

New York, Sept. 3.—Peter J. Stafford of Brooklyn, believes he has the biggest frog on earth. He brought it home from Greenough Park, N. J., where he spent his vacation, and it is now swatting metropolitan flies in a specially constructed frog kennel in Stafford's house.

MULE TAKES HER LAST KICK

Drives Into Auto, Crushes Chauffeur, and Is Shot.

New York, Sept. 3.—A mule plumed through the windshield of a touring car and severely injured William A. McLean of Lewisboro, a chauffeur, in Greenville.

girth. The largest part of each leg is 4 1/2 inches thick. The head is 2 1/2 inches wide.

Stafford says several noted collectors and experts at the Bronx Zoo have told him the frog is worth at least \$1,000.

PRIMARY IN CALIFORNIA.

Chief Interest Centers in Republican Races.

San Francisco, Sept. 3.—Taft supporters concentrated their efforts in northern California yesterday in the closing hours of the campaign which will end today in a state-wide primary election. Not only will the primary nominate congressional and legislative tickets but state central committees will be selected, and the legislative nominees will have the naming of the rival candidates for presidential electors.

Interest in the election centers in the struggle for possession of the Republican party designation on the November ballot, should a majority of the Roosevelt legislative candidates win Republican nominations, they will nominate Roosevelt electors to run as Republicans and the Taft electors will have to go on the ballot by petition. On the other hand, should the Taft faction triumph, Roosevelt electors would have to go on the ballot by petition as Progressives.

MULE TAKES HER LAST KICK

Drives Into Auto, Crushes Chauffeur, and Is Shot.

New York, Sept. 3.—A mule plumed through the windshield of a touring car and severely injured William A. McLean of Lewisboro, a chauffeur, in Greenville.

St. Joseph Stock Yards Co. St. Joseph, Mo.

We Are in the Market Every day for Cattle, Hogs and Sheep.

WE are especially bidding for Range Cattle and Sheep, both for slaughter and feeding. Located on fourteen railroads, and in the center of the best corn and live stock district in the United States, we are prepared to furnish a good market for all kinds of live stock.

Our packers furnish a daily market for all kinds of cattle, ranging from Cannons to Export Cattle. Look up your R. R. connections, you will find them in our yard.

shied in front of McLean's car. It was knocked down, but jumped up quickly and tried to vault over the auto hood. It fell through the windshield onto McLean. His back, legs, and shoulders were badly bruised and his left wrist fractured. The mule, cut, was shot.

Subscribe for The Journal.

CORRECTED STATEMENT.

A clerical error was made by the packers in tabulating the statement of stocks of provisions as published in our issue of yesterday. This has been remedied, and the following is a correct statement.

STOCKS OF PROVISIONS.

The following shows the stocks of provisions in South St. Joseph at close of business Aug. 31, 1912, as officially reported to The Stock Yards Daily Journal:

Table with columns for Aug. 31 1912, July 31 1912, Aug. 31 1911, and Aug. 31 1910. Rows include items like Mess pork (new) made since Oct. 1, 1911, lard, and various types of hogs.

LIVE HOGS.

Table with columns for Received, Shipped, Driven out, and Average weight, lbs. Rows show statistics for live hogs.

FINE POINT ABOUT THE LAW.

Somewhat Curious Problem Has Been Raised by the Decision of a Learned Judge.

Suppose you owned a dog and a neighbor asked the courts to compel you to keep it from barking and yelping day and night, interfering with his business and causing him and his family loss of sleep, and suppose the court handed down a decree requiring you to restrain your dog from barking, yelping and howling, "except in cases of burglary or fire." how would you act about obeying the order?

EXCHANGE DIRECTORY.

Following is a list of the commission firms and stock cattle dealers engaged in business at the St. Joseph stock yards:

- Commission Firms. Butler, James H., rooms 337-34. Bess Bros. & Co., rooms 202-204. Clay, Robinson & Co., rooms 229-23. Crider Bros. & Co., rooms 303-307. Dally, C. M. & Co., rooms 317-19. TOO MUCH OF A GOOD THING

Duck Raiser Found Pepsin of Considerable Value, But He Has Discontinued Its Use.

Refusing to eat any kind of food offered to them, Charles Koch of Port Chester, N. Y., concluded that his flock of one dozen ducks had a form of dyspepsia and decided to doctor them himself. His method was not entirely original, for he procured pepsin tablets and dissolving them in water, he contrived to get the fluid down their throats with the aid of a metal tube. Releasing them one by one he sat down in the house to see what happened. Almost magical effects were noted. Instead of declining their usual provender, they ate it with avidity and came back for more. Scraps from the family dinner table also disappeared in a similar manner. Delighted with the success of his experiment Koch administered additional doses of fluid pepsin. Ducks eggs were one result. But now the entire flock seems to be always hungry. Seven o'clock in the morning is the customary feeding time for the ducks, but it is different now. The ducks know where Koch sleeps, and they assemble under his bedroom window and quack in chorus before five o'clock, keeping up the din until he throws some food to them. Two hours or so later they resume their clamor. So it goes all day. Koch is getting eggs, but he is losing sleep. "Take it from me," he says, "I have stopped the pepsin."

MISTLETOE - SOLD BY - The Hammond Packing Co. St. Joseph, Mo.

Pleasant Quarters for French Prisoner

A retreat rather than a prison is the new institution which has been raised at Evreux, on the road from Paris to Trouville, says a correspondent of the London Globe. It is ovoid in form, much in appearance to that of a large castle, and is surrounded by a wall over 30 feet in height. It is situated on high ground overlooking the town, and to say the least prisoners should have a very comfortable time. Each has his own cell with hammock bed washing utensils and a table for books. The cells are lighted by electricity and heated by radiators. The authorities have not forgotten the spiritual needs of their hots. The consideration of the ministry of justice for the welfare of the prisoners is seen by an electric bell at the head of each hammock, so that the detained, if he be taken suddenly ill, can communicate with the guard.

The Spider Cheat.

Many species of spiders are interesting on account of their physical construction or their habits, but the most curious specimens are probably to be found in the woods of Sumatra; and these naturalists call, not without reason, "spider cheats." This insect, in order to trap the flies, etc., on which it feeds, hides on a leaf and spins a web of neutral color, making an illusion so perfect that the prey not only does not fly, but seems attracted by the peculiar termination of the web on the edge of the leaf. This is a perfect knot in appearance and gives to the trap the general shape of a miniature palm-leaf fan with indented handle.—Harper's Weekly.

Another of the Species.

"Is this a little boy or a little girl?" a teacher asked when the new scholar, a boy with curls, came in. "He ain't none of 'em. He's a sis-ty," one of the class volunteered.—St. Louis Republic.
