### NO CHANGE IN STEERS

SMALL CROP OF WESTERNS TAK-EN OVER AT GENERALLY STEADY FIGURES.

Firm - Stockers and Feeders Sluggish.

sumptive demand for beef resulted in a downward revision in prices for steers finding the killer outlet. Declines have been very irregular but as a general proposition the medium and higher priced classes have suffered the most. It has been an almost continuous performance of weak and lower markets and the close finds the trade at the lowest level in some time with the undertone of the trade suggesting further declines early next week unless receipts are held down to actual requirements. At the weekend beef steers are anywhere from 15@40c lower than a week ago. On the cattle selling at \$7.00 and upward the slump has amounted to 25@40c as a general proposition. This decline is also applicable to some of the warmed-up short-fed stuff from corn belt feedlots dropping under the \$7.90 belt feedlots dropping under the \$7.00 line. Western steers of a \$6.00 @ 7.00 class are not to exceed 15@25c lower than a week ago, while the plain lowpriced westerns, ranging under \$6.00, are hardly more than 15c off; indeed some of these latter classes sold about as high as they did during the previous week

There was nothing prime offered in the week's marketing, although there was one load better than anything seen here in recent weeks. This was a drove of six months' fed, side-branded Herefords, weighing 1,388 los, that sold at \$10.15. A drove of handy weight steers on the yearling order sold at \$9.50, the next highest figure, sellers conceding these around a quarter lower than last week. Another lot of 1444-1b, steers sold at \$9.50 that sellers claimed would have had little trouble in making \$9.50 or \$9.60 last week, had they been here. There was increased offerings of warmed-up and short-fed stuff that found slow, mean selling, some of this stuff having to go at \$6.50@7.00, and even lower. Owners of this class of cattle would do well to hold it until there is less competition from the western steers, buyers making no effort to disguise their preference for the latter. Receipts this week have been liberal, arrivals at this point totaling 14,800 head, 2,300 more than for the preceding week and 4,500 in excess of the run for the same period There was nothing prime offered for the preceding week and 4,500 in excess of the run for the same period a year ago. At the five leading markets receipts aggregate 204,000 head,

Dressed Beef and Shipping Steers.

COWS. BULLS AND MIXED. The small supply of butchers' stock offered today was cleaned up in a leisurely manner, the market ruling quiet at unchanged prices. Kansas and Colorado grassers made up a good share of the small receipts. Bulls and veals were absorbed at steady figures. Values for cows and heifers were

fairly well maintained this week it the face of a declining market for beef steers. Still there has been some recession in prices toward the close, especially on the medium to close, especially on the medium to good cows and plain weighty grades of heifers. Comparisons made with a week ago show medium cows off 10 @15c, good kinds 15@25c lower and canners and cutters very little changed. Good to choice light weight heifers, which have had a fair eastern demand, are closing up not far from steady. Medium and heavy weight heifery stock has been hard to move and closed 15@25c lower than a week ago. Packer demand has been very unsatisfactory on this class of maunsatisfactory on this class of ma-terial the greater part of the week. Continued broad demand for canners and low priced killing cows has af-forded very satisfactory outlet generally for a rather large proportion of these classes during the week at prices well up to those in force at the

close of last week,
Bulls and stags have ruled very uneven. The good fat grades are closing up about steady, while the medium and plain grades are 10@20c lower. Veal calves are closing strong with a week ago, Heavy grades are around a quarter higher.

STOCKERS AND FEEDERS. Not much doing in this department day, a few scattered odds and ends of light and medium weight stockers selling without material change in prices compared with yesterday.

Dullness and a general decline in values all along the line have been the two salient features of the week's UNEVENLY LOWER FOR WEEK

UNEVENLY LOWER FOR WEEK

Cows and Heifers Quiet Sale at Recent Levels—Bulls and Veals
Firm—Stockers and

the two salient features of the week's trade in this department, increased supplies of young native stockers and the usual liberal showing of western feeders included in the daily runs, militating against activity and maintainance of the pree schedule. Starting off the week with a 15@25c decline on the general run of stockers and feeders sellers were unable to check the lower trend of values. On the light and medium weight stockers of light and medium weight stockers of mediocre quality prices have fallen back 30@50c from one week ago, while the good feeders and breedy yearlings are about 25c lower, com-

most of the cattle here today were on the western order, comprising a varied assortment of Kansas and Colorado stock. Prices indicated no material change in any branch of the trade.

President and Cabinet Members to Attend Services.

Utica, N. Y., Nov. 1.—Arrangements for the funeral of Vice President James S. Sherman virtually were completed yesterday. The services will be held Saturday afternoon at o'clock in the First Presbyterian church, which has a seating capacity of 3,000 and will be attended by President Taft and members of his cab-inet, senators and representatives, foreign diplomats and government of-

The Rev. Louis H. Holden, Mr. Sherman's pastor, will conduct the funeral service, assisted by the Rev. M. W. Stryker, president of Hamilton college, and the Rev. Dr. Brokaw, Over a quarter of a million head of pastor of the Presbyterian church. An

posed to display, and wish the cere-monies to be as simple and unpreten-

tious as possible.

Seats in the church will be set apart for the Sherman family. President Taft and other dignitaries who are expected, as well as for the business associates and intimate friends of the late vice president. Admission of the late vice president. Admission to the church will be by ticket, as the to the church will be by ticket, as the auditorium will be hopelessly inadequate to hold the many who wish to attend.

At the close of the services, the body will be taken to Forest Hill cemetery, where it will be placed in the beautiful Babcock mausoleum, which

was completed but recently and where Mrs. Sherman's mother rests.

Advertise in The Journal and get re-pults. Prices will be gladly given or application.

#### ITEMS IN BRIEF.

G. W. Murphy, of Platte county, Missouri, one of the big farmers and feeders of that section, was on today's market with a car of hogs.

J. R. Berry, a prosperous farmer and stockman of Platte county, Missouri, was on today's market with a shipment of hogs.

Alva Courtney, a prominent young farmer and stockraiser of Caldwell county, Missouri, was among those who had hogs on today's market. Burt Allen, of Liberal, Kan., was on today's market looking after the

sale of a car of cattle. T. C. Tibbles, a veteran farmer and shipper of Worth county, Missouri, contributed a car of hogs to the local

### 'UNCLE DAVE' TAKES CHARGE

Missourian Making Money on Farm While Litigants War Over It.

Marceline, Mo., Nov. 1.-Whether or not the single tax amendment carries in the approaching election is probably of less concern to David Ed-gar, a farmer living a few miles north of this city, than any other tiller of the soil in the state. At present he is prospering wonderfully as an agri-culturist, while he pays neither ren nor taxes, nor does he own a single foot of the broad acres on which he ves and whence comes his prosper four years ago a preacher of this

city, whose success as a trader prob-ably equaled in dollars and cents the size of his professional salary, became the owner of this valuable country clace. About that time, also, a prosestate. At the same date David Edgar was growing old in a humble cabir

profitable use of the money at his command, and for three years he has prospered more each season than in any decade of his previous experience. In comparison with the first sixty years of his life, he has become actually rich, and if the case in court proves to be as long drawn out as some similar ones have been, the old man will really amass a fortune.

The cows were seen making an atscrept to cross the canon, and the engineer of the train was warned, as any accident which would result in throwing the train off the track at that his distance might result in the loss

Dr. C. E. Coats, dean of the sugar Dr. C. E. Coats, dean of the sugar school, in answering the question propounded by Senator Dymond, said that he did not think that any living man could state exactly how nitrogen causes a plant to grow.

Mr. Morse, a chemist, said that he had studied soil in its relation to plant growth for two seasons. He accumulated a mass of figures from both sides, but he was not able to translate the figures.

### PUBLIC CUP UNDER THE BAN

MacVeagh Orders Utensils Abolished in All Cars, Vessels and Depots.

Washington, Nov. 1 .- Secretary of washington, Nov. 1.—Secretary of the Treasury MacVeagh with one swoop abolished the time-honored public drinking cup from railroad cars, vessels and other conveyances operated in interstate traffic and from depots and waiting rooms of common carriers.

carriers.
This sweeping order against "any drinking cup, glass or vessel for com-mon use," effective immediately, is in the interest of the nation's health and was the direct result of an in-restigation by the United States public health service—a branch of the treasury department—which holds the drinking cup to be a menace as a carrier of disease. A drinking cup, it is said, may contain thousands of bacteria from disease-infected per-

sons, Secretary MacVeagh's action constituted an amendment to the interstate quarantine regulations. Sher-man Allen, assistant secretary of the treasury, stirred by the revelations of the public health service and the fact that twenty-six states already have laws forbidding the use of the com-mon drinking cup, recommended the move and was sustained by the solicitor of the treasury department as to the secretary's legal power to make

#### HIGH COST OF FEEDERS. Farmer and Stockman: The cattle

feeder never knows, when he puts a bunch of cattle on feed, what he is hog man is in the same boat, and so is the man who handles horses. If we or anyone else were capable of foretelling the market, we would be

that is the price is high. With feed- \$18 per head loss?

price of feeding cattle is now high, mouths to feed than cattle to feed DAY FOR BOYS AND GIRLS

after year in the cattle yards of the United States unless identified with the trade for a long time. We have reached an era of strong prices, but in order to do so it has almost required a famine to bring it about. Prices of a famine to bring it about. Prices of light by all who have to pay for them, whether it be the packer buying by the train, the butcher buying by the train, the butcher buying only a few head, or the local butcher buying a few head, or the local butcher buying by the local safe, or the consumer buying by the side, or the consumer buying by the side of t load, the small butcher buying only a few head, or the local butcher buying by the side, or the consumer buying by the pound. "Yes," said the cold and retired cattle raiser, "I see that cattle are high, but my herd did not live to see it. A new generation not live to see it. A new generation is reliting the money and the cattle southers in Minnesota, or in the same proportion as would fatten annually two million head of better housekeeping. These will be followed by an explanation of the contests and of boys' and girls' clubs by an explanation of the contest wania; but so far as we can see in passing through it fro milme to time on the railroad, it is readly no better agriculture and better housekeeping. These will be followed by an explanation of the teacher. Every pupil will be asked to enter his name in one or more of the contests. Where it is desired, clubs for boys and girls interested in repeated, and turture from piling the hams on top of each total term in the salting the hams are immersed in repeated, and turture from piling the hams are immersed in repeated, the contest. Where it is desired, clubs for boys and girls interested in the contests work will be organized. Teachers in the smaller rural schools have been urged to unite with hams are then smoked. No special than the average county in lowa, or in is getting the money and the cattle sowners who made the sacrifices have gone broke or passed away." The thought of the retired cattle man as expressed by him is largely true, yet there are many left who knew what it was to sell ripe and heavy native steer cattle at \$3.80 to \$4.00 per 100 pounds that have barely been equaled in weight and quality by cattle recently selling at \$10 to \$10.25 per 100 pounds. Think of the hundreds of Think of the cattle in Minnesota, or in the east. Where the sum and Nations, or in the east where the sum and Nations, or in the contest work will be organized. The contest work wild

Daddy's Bedtime The Two

Roasting Chestnuts

HE open fire was burning brightly in the grate. "A fine evening for roasting chestnuts," said daddy. Jack and Evelyn smiled as they set a couple of nuts close to the

"Those are fine fat fellows there in the corner," daddy added. "Shall I tell you what I think they are saying? Very well.

'What are you doing here?' says the big chestnut to the little one.

"'Warming my toes, same as you,' answers the little chap. "'Indeed; then this is my fire!' cries the big fellow.

"'I was here before you,' says the little one.

"That makes no difference. I want the fire to myself." "'So do I,' pertly replies the little one.

"'Where did you come from?' asks the big nut. "'From the little tree at the foot of the hill,' says the little one. "Then I'm older than you are, and, of course, I should be the boss, says

the big chestnut. 'Boss away then,' chirps the little one. 'I don't mind.'

"'But you should do as I tell you,' insists the big nut. "'Because you are bigger and older than I am is no reason that I should,' declares the little nut. "'If my friend, Mr. Downy, was here he would make you obey!' the big

chestnut cries angrily. "'Who is Mr. Downy?' asks the little nut. "'Mr. Downy is the woodpecker who lives on our tree and eats the worms

that come around annoying us.' "Oh, yes; I know who you mean? exclaims the little nut. 'Mr. Downy is the little black and white bird with the red bonnet who goes tap-tapping up and down the trunk of the tree. Well, Mr. Downy is just as much at home on our tree, so you needn't count on his taking your part.'

"'How could be?' sneers the large nut. 'Such a homely little thing as

"'Homely yourseif! retorts the little nut unkindly.

"The large chestnut is so annoyed that it hops up into the air.

"'Oh, you mean thing!' it cries.

"'Don't call me mean!" snaps the little nut, and it, too, hops into the air. "Then there is such a hopping and snapping that it is hard to tell the two very apt to engage in that business buts apart. They are both so angry that they miss their footing and instead of settling back on the grate nop late the are, and that is the end of them."

### **CURING HAMS IN ITALY**

METHODS EMPLOYED THERE DESCRIBED BY CONSUL GEN-ERAL AT GENOA.

#### SMOKING IS NOT CUSTOMARY

When Unsmoked No Ingredients But Salt Are Used-Cured Raw Hams Rubbed With Garlie and Pepper.

As there are at least 2,500,000 Italians resident in the United States, some American manufacturing firms are planning to cater more largely to the house hold and personal wants of this population. Extensive imports reaching in value many million dollars. reaching in value many million dollars annually are made for them, most of which might well be produced in the United States. For example, a meatpacking firm finds that "the Italian people in our district use a large amount of Italian-cured ham." Reports have therefore been secured from the United States consular service in Italy as to how the ham-curing industry is carried on in that kingdam. e in Italy as to how the ham-curing adustry is carried on in that king-

cal industry, which Consul General

Smith of Genoa describes in brief as follows in the Daily Consular:
"The period of shilling varies according to the temperature of the cooling room, but is usually for about wenty-four hours after slaughtering, are being exercised to see that the nam is thoroughly cold before the

alting begins.
"To the outside of the ham salt is As a rule the ham remains in the first sait about five adys, but this depends noist and absorption, therefore, more apid, the process is repeated sooner.

pressure. The hams cured at Naples are pressed, but they are not highly esteemed in northern Italy. During the salting process they are spread on inclined racks or shelves with the large end slightly raised so that the brine produced by the combination of the ham and the salt in subduing her frightened horses. For more than a mile the remarks of the ham and the salt in subduing her frightened horses.

which is not usual, it is placed in a bad turn in the road, where it is more brine composed of salt, pepper, and other spices to which a little saltpeter been upset. other spices to which a little saltpeter is added. In the smoking process both sawdust and rice hulls are used as a combustible, and the temperature is stage "run" early in the summer, and

statements of declared exports to the United States do not show any ex-ports of hams except from Naples, re for 1911 these shipments were moment." hams mainly from Servia with a small quantity from the United States. Im-ports in 1910-11 were valued at \$77,against nearly \$190,000 in 1909." the Leghorn district the carcas-are cooled for twelve hours, the drawn off, and fine salt and eter rubbed into the lean portion tin salt for twenty days. They are in the salt brine containing pepper garlic for about five days, then d and hung up. Few hams are d by smoking in the Leghorn dist, but when they are so treated the ke is produced by burning juniper less and leaves, chestnut leaves, and leaves, chestnut leaves, and leaves, destruct leaves, and leaves, chestnut leaves, and leaves,

Tracing the Dog's Descent.

It seems to be generally accepted by naturalists and the world at large that the domestic dog is in some sense a collateral descendant of the wolf or jackal, says a writer in Harper's Weekly.

A professor at the Natural History Museum in Paris has communicated results of his study of various canine skulls to the academy of sciences. He appears to have noticed certain perculiarities of growth which have hitherto escaped zoologists. He states that the skull of almost every species of wolf and jackal differs from the skull of the shepherd dog to an extent that makes it impossible that this dog should belong in the same classification. The skull of the Indian wolf, on the contrary, shows some points of resemblance. This, indeed, is the only "You're welcome to read books in savage canine the top of whose head

There are, moreover, other characteristics which the Indian wolf has in common with the dog, and which the ordinary wolf does not share with them, although his origin and that of the dog have long been supposed to be a common one.

The conclusion of this scientist is that the Indian wolf is the progenitor of the shepherd dog and the bloodhound. There were two primitive races of dogs analogous to these which were The erosive power of water is hard first domesticated in central Asia, whence they passed to Europe, and there seems no reason to doubt that be welcome, even if the figures may descendant of the dog spoken of by the bloodhound of today is the direct the ancients as "the dog of the age of bronze."

calls the number of vessels which Mrs. Bertha Brown Had That Trouble Before Going to the United Doctors.

> A Month's Treatment Shows Her Hov Real Cures Are Accomplished.

Mrs. Bertha Brown of Eckley, Colo other troubles, she had a very ba heart; an affliction that is come the high altitude of mount countries. Not being able to find any ordinary physician who could cure her, Mrs. Brown was obliged to seek relief away from home. Being desir-ous of obtaining the best medical skil in the country, she was directed to the United Doctors, those world-fa-mous medical specialists who have their St. Joseph office on the second floor of 720 Felix street. Now, after a short course of this wonderful new treatment, she writes:

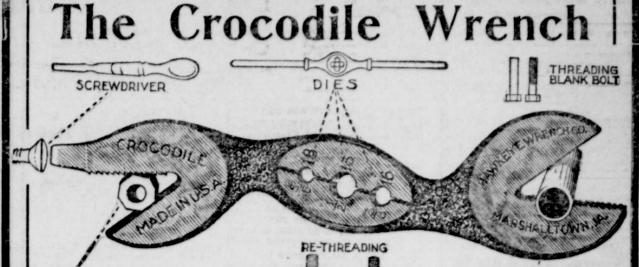

"To the Sick: I wish to make statement as to the wonderful bene-fits I have received from the United catastrophes, it is only possible to Doctors in only one month's treat-surmise. Capsizing, damage from ment. I have been suffering for years with a stomach and liver trou-ble which affected my heart so bad-ly that my pulse beat twice as fast as an ordinary person's. This made me weak and nervous and out of breath, so that I could do but very little work or exert myself in any way. I could eat very little and so lost strength.

"I treated with four doctors for

several years before I went to the United Doctors but got no relief. "Just a month ago I went to the United Doctors, and while they were not entirely sure that they could curme, I decided to try them anyway, a they have cured so many others. Wel I am certainly glad that I started with them, for I am much better already. I can now eat almost anything I want, and digest it, and am gaining fast in every way. I feel that they will cure me.
"MRS, BERTHA BROWN."

People are coming from hundreds of miles to consult the United Doc-tors, News of the many wonderful cures they are making has spread far and wide over five states, and the growth of their practice has been re-markable since they established their institution in St. Joseph. A careful examination free to any sufferer, ab-solute honesty with every patient, quick cures at reasonable rates, to quick cures at reasonable rates t those who are accepted for treat ment, these are the principles whice

An Ideal Farm Wrench

Drop forged from the finest tool steel, scientifically tempered. Every wrench guaranteed against breakage.

### Six Handy Farm Tools in One

A pipe wrench, a nut wrench, a screw driver, and three dies for cleaning up and re-threading rusted and battered threads. Dies fit all standard bolts used on standard farm machinery.

Requires no adjustments; never slips; simple and always ready for use. Will work in closer quarters than any other wrench.

Has handsome, blued finish.

Every farmer should carry one of these handy little wrenches on a binder, reaper, mower, etc. They are light, strong, compact and easily carried in

The Crocodile is also a handy household tool.

Enclose \$2.00 for six months' subscription to Stock Yards Dally Journal and wrench will be sent you free of charge.

FOUR BALES TO AN ACRE Fort Gibson, Ok., Oct. 30.—The heaviest acre yield of cotton reported in Okalhoma this season is on the farm of J. M. Pierce, near this place Pierce is counting on four bales to he acre, His farm is rich Arkansa liver bottom land.

DR. G. W. ALLAMAN, Atchison, Kansas

The monthly pay roll amounts to \$12.—chinch bugs are killed, experiments show.

Nettle stems are being used as a substitute for cotton. The coal that comes in competition with the Leavenworth product is from worked by pedal power.

far as the coal business is l. When natural gas was

BURN CHINCH BUGS NOW Farmers Should Co-operate in Firing Large Areas of Grass.

Manhattan, Kan., Nov. 1.-If the farmers on every section of land will co-operate in the burning of bunch grass and big blue stem, 985 of every 1,000 chinch bugs wintering there exist and be will have no difficulty in marketing all the coal we can mine. A great many people are going back from gas to coal this fail. The local demand is better than it has been in several years; and this, of course, means much to the business interests of Leavenworth.

"Leavenworth has gotten accustomed to having its coal mines, and not many people stop to consider what these institutions are to the city. The combined pay rolls of the mines ran into hundreds of thousands of dollars each month and this money is all velvet to the city, and none of it goes away. The men who earn the wages spend them with Leavenworth merchants. The coal business differs from other lines of business in that none of the receipts go to other centers for stock and most of the returns from the business go to the men who dig the coal."

The Carr mine now is working between 175 and 200 men and 500 tons. The monthly pay roll amounts to \$12,000.

"The only stoppage to the work."

Co-operate in the burning of bunch grass and big blue stem, 985 of every 1,000 chinch bugs wintering, there exist housands have and big blue stem, 985 of every 1,000 chinch bugs wintering, there exist housands in the busines and be killed. The bugs are leaving the cornfields now for their winter me killed. The bugs are leaving the cornfields now for their winter me he killed. The bugs are leaving the cornfields now for their winter me salong fence rows and in the patches of grass. Examination will show where burning is necessary and co-operation of neighbors will make it an easy matter. November is the time to burn the grass.

Repeated experiments made by bug experts at the Kansas agricultural college in various sections of the state burning successful co-operation of present part to be surn the grass and Smith, across the road, doesn't, the bugs will emerge from the grass should be burned as closely to the ground as possible. The closer it is burned the
