## STEER TRADE SLIPPERY

DEMAND A SLUGGISH ONE AND PRICES SUFFER FRESH BREAK OF 10@15c.

### NOTHING CHOICE ON SALE

Cows Generally 10c Lower-Heifers Holding Up Well-Stockers and Feeders Fully 10@15c Lower and Trade Dull.

Conditions over which local dealers had no control rendered trade in steers dull here today. A fair Tuesday run get in 1rt advices 1cataing the country yesterday rending the mean outlook for the balance of the which had the effect of cutting down the run somewhat, a large number of orders for cars being cancelled when shippers learned of the state of the market. Around 2,700 cattle got in during the day as compared with offerings of 4,032 last Tuesday and 2,228 a year ago. Aggregate receipts at the five leading markets fell 15,000 short of last Tuesday at 30,000 head but this last Tuesday at 30,000 head but this was rather excessive in view of conditions surrounding the trade.

The general market has been paralized by the heavy run of cattle that hit Chicago yesterday and there is imperative need of conservative marketing until the first of the year to prevent worse demoralization. The Chicago Drovers' Journal, commentation the steer trade there yesters. ing on the steer trade there yester-day, reported the most completely demoralized market in months. The Journal said in part: "At 2 o'clock hardly 25 per cent of

the beef steers here today had been sold. Bids were still on the 25@50c lower basis shown earlier. Cattle which cost \$7.50@8.50 in the country had bids \$1.00 cheaper here. Strictly fat beef steers sold at \$7.75 and a lot of light steers had bids no better than \$6.50@7.00. Choice heavy steers worth \$10.25@10.50 last Monday had bids at \$9.40@9.55."

The market at Chicago was reported dull and weak this morning with 5,000 fresh receipts. Kansas City with 12,000 fresh arrivals also wired out a dull opening following a decline of 10 40 40c there yesterday. Thus the situation locally was logically bearish and action was hard to get on the light and medium weight short-fed steers that formed the bulk of the day's receipts. Early bidding was very unsatisfactory and trade was practically at a standstill in the early morning hours. It was a foregone conclusion that prices were due for a trimming. The only question to be trimming. The only question to be settled was the extent of the decline sellers would have to accept. When business was finally gotten under way prices looked 10@15c lower than yesterday on the general run of steers, putting the market around a quarter lower than last week's close and a flat half a dollar lower than the open-

Dressed Beef and Shipping Steers.

COWS. BULLS AND MIXED. Female killing stock is holding up well as compared with beef steers this week. Fat light and medium weight heifers came in for a fairly good demand today and prices on the general run of such offerings was well maintained at yesterday's level. Slower action was noted when it came moving the common and half fat kinds and in some cases these were quoted weaker. The slump in cows continued. Buyers were indifferent and bid lower from the outset. Tradand bid lower from the outset. Trad-ing was slow and for the most part prices were around a dime lower than yesterday, making a 15@25c break in values for the two days. Good cows were subject to more pressure than the common and canner grades. Most of the canner and cutter stuff showed comparatively little change. snowed comparatively little change.
Bulls were slow in sympathy with
other butcher stuff. Prices were quoted steady to easy. Veals were in
moderate supply and held steady with

STOCKERS AND FEEDERS. Increased supplies of young thin stockers and a more liberal showing of medium to strong weight feeders included in today's cattle run, con-nected with a restricted country de-mand were two factors that militated against the maintainence of last week's price schedule.

week's price schedule.

The general run of feeders and ordinary stockers were subject to lower bids from all quarters, these classes selling 10@15c lower generally, the decline putting the feeder grades 15@25c lower compared with last week's close. A pretty decent class of heavy cattle suitable to go in the feedlot or delivery sold up to the feedlot on delivery sold up to \$6.75@6.95, with bulk of the medium \$6.75@6.95, with bulk of the medium and lighter offerings at \$6.35@6.65. Up to \$7.00 was paid for a few bunches of good yearlings with bulk of the stockers selling at \$5.75@6.50. Little change characterized trade in stock cows and helfers, yard dealers and country buyers affording a ready

outlet for the moderate fresh supply at generally steady prices. Spots, however, on the higher priced grades looked 10c lower.

### THE NINE IN THE CALENDAR

The Figure, Which Came on Jan. 1.

1889, Will Stay 111 Years. The figure 9, which came into the calendar on Jan. 1, 1889, will stay with us 111 years from that date, or until Dec. 31, 1999. No other figure has ever had such a long consecutive run, and the 9 itself has only once be-fore been in a race which lasted over a century—that in which it continu-Dec. 31, 1999, a period of J11 years. The figures 3 and 7 occasionally fall into odd combinations, but neither of them has ever yet served for a longer period than a hundred consecutive years in our calendar since the prestheir relative positions among the nu-merals it is an impossibility for either of them to appear in date reckonings tinuously for a longer period than

Bulls and Stage. a falling off of 26,000 head. Despite the deficiency in numbers, buyers were out to lower prices at all points and met with general success. Locally, the trade displayed greater activity than for several days but it was largely because of the fact that sellers and buyers were able to come to terms early. Prices ranged 5@10c terms early. Prices ranged 5@10c lower than Monday, the drop carrying quite a few hogs below the \$7.00 line. The top was \$7.15 but quality of the hogs making that price was not up to that represented in the \$7.25 sales yesterday. Only a few odd loads were unsold at 11 o'clock. Average quality

was good. Pigs were stationary with \$6.00 the popular figure.

Prices for hogs averaging 140 lbs. and up ranged from \$6.70@7.15, with the bulk selling at \$6.90@7.07½. The bulk yesterday sold at \$7.00@7.45, a week ago at \$7.55@7.75, a month ago at \$7.65@7.89, a year ago at \$5.85@6.10, two years ago at \$7.55@7.80, three years ago at \$8.15@8.40, and four years ago at \$5.25@5.55.

For Production of Beef, Pork and Mutton It Has No Equal.

For the production of beef, mutton, pork or milk this wonderful crop has no equal. It is the greatest soil fer-tilizer known to science. With proper seed selection, careful preparation of the seed-bed, intelligent cutting and curing, the twentieth century farmer can be absolutely independent on a fifty-acre alfalfa field. Oregon is rich east are the recently developed irrigation projects, while the river bot-tom soils in the western valleys are capable of from two to four cuttings a year, producing from 8 to 12 tons of hay. As an upbuilder of northwestern animal husbandry alfalfa will be the most important factor. Fed to live stock it is worth more than a ton of bran, and nets from \$35 to \$60 per acre. That eminent authority, H. D. Coburn, has compiled a valua-ble work called "The Book of Alfalfa," which contains questions, answers and practical information gleaned from successful farms all over the United States, and ought to be in the library of every American farm home, The book is published and sold at the low cost of \$2, postpaid, by the Orange-Judd Co., New York.

## COLORS IN FLAMES.

And Why Candle or Lamp Light Appears White to the Eye.

color of flame and the energy of the combustion causing it. The more combustion causing it. The more vigorous and complete the combustion the higher the refrangibility of the light. A flame burning in a tardy and restricted way emits rays that are red. When burning in a more complete and effective manner the

complete and effective manner the emitted rays change to violet.

The flame of a candle or a lamp consists of a series of eccentric luminous shells surrounding a central dark core. These shells of flame emit light of different colors, the innermost one—that in direct contact with the dark core—being red and having a temperature of exactly 977 degrees F. Upon this and in their proper or F. Upon this and in their proper or der of refrangibility are shells of ligh which are orange, yellow, green, blue,

The reason that such a flame does not appear to us as a nest of cones of different colored light is this: When we look upon such a flame all of the rays issuing from the different layers or strata of concentric luminous shells are received by the retina of the eye at one and the same time. This can only impress with the sensation of neutral or white light.

## WORK ON CHICKEN TEST.

Kansas College Would Determine Value of Breeding.

Manhattan, Kan., Dec. 16.—Which are the more profitable—purebred chickens or scrubs? The agricultural colleges throughout the country are advising the farmers to use only purebred chickens. No authentic records are available that will answer this question. The poultry department of the Kansas agricultural college has undertaken an experiment to learn which of the two kinds the farmers should have.

The method used in this experiment is to learn what influence will be experiment to the transfer of the two kinds the farmers that the stock yards and the fact that the stock yards and the f

is to learn what influence will be ex-erted by purebred males upon mongrel the females and upon their offspring in the state bureau of labor succeeding generations. First, upon the uniformity of the offspring in regard to size, type and color; second, upon their earliness of maturity; upon their earliness of maturity;

Plymouth Rock cockerel, whose dam laid 232 eggs in her first laying year, and whose grand dam, on his sire's side, laid 209 eggs in her first year.

The second group is mated with a white Orpington cockerel from a hen imported in January. This hen laid 187 eggs the first 10 months she was in this country. The third group is mated with a single comb white Leg-Plymouth Rock cockerel, whose dam mated with a single comb white Leg-horn cockerel whose mother laid 252 "By far the largest industrial" horn cockerel whose mother laid 252 eggs her first laying year. The fourth group is mated with a mongrel cock-output of the five packing plants

Records are to be kept of the food 073,810. Records are to be kept of the food consumed by each flock, the eggs laid by each hen, the fertility of the eggs as well as their size, shape and color, the weight of the chicks at birth and also at the end of each succeeding fourth week until the pullets begin to lay, and the cockerels are fattened or sold. Onehalf of the cockerels produced will be crate-fattened as soon as their size and the season will perdict the food of the cockere and workshops 11,175 men, women and children, of whom 8,474 were men, 2,660 women, 28 boys, and 13 girls. To these workers were paid

sold. Onehalf of the cockerels produced will be crate-fattened as soon as their size and the season will permit.

The second year the experiment will be carried on with the offspring of the pens in the same manner as in the first year. The pens in this second year will, of course, be made up of birds that have one-half of their blood from a purebred, with the exception of the pen mated with the mongrel cockerel. The third year the offspring will be three-fourths pure blood, and the fourth year, seven-eighths. This experiment will be carried on for as many years as will be necessary to obtain definite results.

SPENCE HOGS AT TOP.

women and children, of whom 8,474 were men, 2,660 women. 28 boys, and 35.063,357 in salaries and wages for 1911. Of the great working force 1,430 men and 288 women were classed as salaried employees and did clerical work, while 7,044 men, 2,372 women, and 41 children belonged to water was a working proprietors; but who did not receive regular wages.

"The total operating expenses, which included raw material valued at \$62,782,418; amount paid for salaries and wages, \$6,063,357; rent, taxes, and insurance, \$659,066; and general miscellaneous expenses, \$2,-157,660 totaled \$71,662,501 in the expense column, as against \$73,966,711

Nodaway County Feeder Realizes \$7.15 for Load of Butchers,

E. L. Spence, an enterprising farmer and feeder of Nodaway county, Missouri, was at the yards today with a load of good butcher weight hogs of his own raising and feeding that topped the market, 80 head averaging 229 lbs. selling at \$7.15. About a year ago Mr. Spence topped the market here with a load of hogs. He handles Poland-Chinas and makes it follows: a rule to finish his porkers before heading for market, with the result that he usually lands top prices for Automobiles, bicycles

"Oh, dear!" the prin-

cess cried.

The White Cat and Little

VELYN was prinking in front of the mirror. If Jack had seen it he very likely would have had something in the very likely would have had something to say, but just then Jack was very busy with something else, so it was only daddy who noticed. "I'm going to tell you a story tonight of the little pink princess," 2.00 daddy said.

"She was a very commonplace little girl, but because she was a princess people made a great deal of fuss over her.

"Whenever she had anything to say the folks would exclaim, 'Now, isn't that clever?' or 'How bright she is!' until the little princess thought she knew more than her father's prime minister, who was a very nice man,

laughed at her, and the lords and ladies of the court called her Little Princess "The only person around the court who did not flatter the princess was the

white cat. The cat had been a gift to her from her fairy godmother. "One morning as it came in the princess asked the cat where it had been. "'To the woods,' answered the cat. 'I'm sick listening to the silly talk around this court."

"'Silly! What do you mean?' demanded the princess. "'All this foolish talk about your being the most beautiful and cleverest princess in the whole world.'

'You're jealous, white cat,' answered the princess. "'What, jealous of a peacock!" answered the white cat. 'Just listen.' And the two leaned over the balcony to look down into the garden, where the lords and ladies were walking, and they could hear them plainly laughing and making fun of the plain little girl who thought she was the most beautiful

"'It isn't true!" indignantly cried the princess. "'Yes, it is; at least it's partly true,' insisted the cat. 'Just look into this magic mirror which your godmother has sent you for a present. You're not very good looking, and you are only fairly clever.'

"The princess looked, and for the first time she saw herself as other peo-" 'Oh, dear" she cried. 'Oh, dear!" "'You're a very ordinary little girl, and if you wish to really deserve praise

you must try to be deserving of it,' the cat purred. 'If you will carry the

magic mirror in your pocket it may keep you from really being a Little Prin-

cess Peacock."

## TIONS OFTEN UNSATISFACTORY

Case of Nebraska Farmer Upholds Views Advanced by the United Doctors.

He Survived the Operation at Failed to Get Relief Until Treated By Medicine.

Ed. Wahaven, a prominent farmer ving on Rural Route 3, North Bend, leb., is another convert to the theory dvanced by the United Doctors, who have their St. Joseph institute located on the second floor of 720 Felix street, that many surgical operations are not only dangerous to life, but are also unnecessary and are frequently rushed into without due consideration and, what is worst of all, when unnecessary they fail to cure even if the patient survives the shock of the surgeon's knife.

In regard to his own case Mr.

In regard to his own case Mr. Wahaven has written the following open letter for publication:
"One year ago I was operated upon for appendicitis and the operation left me in a bad shape. I still had the pain in my side nearly as bad as before and my stomach and bowels were left in a had condition. I supposed left in a bad condition. I suppose when I got through with the danger

## **Bowsher Combination Mill**

The best built, best appearing, most convenient to operate, and the lightest running mill made. Content-shaped grinders—an entire departure from all other mills. Can run empty without injury to the grinders. Are suitable for crushing chr cern, with of without shucks on; also for grinding all ginds of small grain, cotton seed, off cake, etc. Divided hopper allows two kinds of grain to be mixed into any proportion. Does 25 per cent more work than any other. PATTERSON MACHINERY CO. J. B. Patterson, 9th and Jackson, Oman Neb., agent for Neb., Iowa and S. D.

PROUD OF HIS NEW CLOTHES

Rhodesian Native, Returning From Mines, Was Scandalized By Unclad Relatives and Friends.

A town in Rhodesia is not generally a town, declares Mrs. M. L. Woods in "Pastels Under the Southern Cross." A few scattered shops, a broad road deep in red dust, down which a sudden miscellaneous herd of blacks occasionally pours, constitute a town. Of these natives, Mrs. Woods gives the following descrip-

They are collected from all parts of Rhodesia, from Portuguese terri-tory, even from Nyasaland. Dressed ing, some like young colts bounding into the air as they go. These happy 65 fellows are probably rejoicing because Mo ...... 199 they are being their friends and acres, improved, near Rea, Mo 120 where certain of their friends and 100 they are being sent to some mine relations are already working.

This is the native as he appears entering on his term of service at the mines. I once saw a group of black men who had completed their 

relatives and friends had come from 960 acres in Marshall Co., Kan., good bottom, second bottom and fine upland, can be divided in three tracts, 5 miles from town, two A No. 1 set of improvements. Price \$67.50 per acre if taken before Dec. 1, 1912. Present owner wants to retire; good terms can be had. Praile Bros. Realty Co., Bremen Kanss. the kraal to meet the returning one, withdrew from the platform to the foot of a neighboring tree, and beckoned his bewildered friends to approach. In a few minutes, before the eyes of the passengers in the train, he had clothed his whole party with decency, and surely, in their eyes with splendor. Then, and only then, did he condescend to return their greetings; and, exceedingly joyful, all marched off together in the direction of their

EGGS COOKED TO SUIT HIM

How John Randolph Had Them Boiled With Assistance of String of Servants.

Most persons who eat eggs at all are particular about them. The boiling of an egg seems a simple matter, but many a breakfast has been spoiled and many a temper rasped by the cook's failing to observe the precise number of minutes and seconds that the process should occupy.

That very original man, John Randolph, is said to have invented a method of getting his eggs cooked exactly to his taste that worked perfectly. As in the case in many country homes in the south, the kitchen was in a separate building at some distance from the house, and servants

were plenty. When the "sage of Roanoke" too! is seat at the breakfast table there vas a line of servants from the din ng room to the kitchen. Mrs. Ranolph, the mother of the statesman, eld an open watch in her hand.

"In!" exclaimed Mr. Randolph, and he word "in" was passed from mouth o mouth until it reached the waitin ook, who dropped the eggs into the ater. After the requisite number o econds the holder of the timepiec ignified that the cooking was done 'Out!" went forth the command in like manner, and the eggs were quick

removed. The system required six or seven ervants to cook one egg, but Ranolph was accustomed to declare that this was the only way that he could get it cooked to suit him.

His Position Explained. One of the curiosities of the British house of commons, very rarely seen. was Erle Drax, for many years member for Dorsetshire borough. Once at a general election, on the day previous to the nomination, he put out the following address to his constituents: "Electors of Wareham! I understand that some evil-disposed person has been circulating a report that I wish my tenants, and other persons dependent upon me, to vote according to their conscience. This is a das tardly lie, calculated to injure me I have no wish of the sort. I wish, and I intend, that these persons shall vote for me."

Tolerably Well.

The last pig-tail has disappeared from the Chinese embassy in London. It belonged to the majordomo of the Chinese ambassador, and it is now on its way to China as a present to that functionary's wife. A story is going the rounds that at an official reception recently a member of the Chinese embassy was presented to a well known

"We no talkee Chinee velly well," she said. "Never mind, your ladyship," was the smooth reply, "I can converse tol-erably well in English!"

World's Rubber Production. About one-half the world's supply

of rubber comes from the Brazilian sections of Ceara, Manaos and Para. Their product sets the price for the raw material in the consuming markets. The trees grow wild. No systematic preparation of the ground has ever been necessary, and the entire care of the rubber gatherers has been given to obtaining only the juice from the rubber tree and getting it to

Neckwear,

We Rebate Railroad Fares-Your Trip Costs You Nothing

We have spared neither pains nor expense to make our showing of Gift things more varied than ever before, and we have succeeded far beyond our expectations. There are literally thousands of gift things for man, woman and child, and for the home here now; so varied is our stock, in fact, and so appropriate our selections that any woman doing Christmas shopping can select most quickly and easily here. Stocks are conveniently arranged, plenty of extra salesfolks to see that you're waited on promptly; better service than ever.

Another thing: it costs no more to shop at Hirsch's in December than it does any other month in the year, and that's a fact well worth remembering. Store Open Evenings Until Christmas.
