COTTON HARVEST OVER 1,000,000 BALES

The South Plains cotton harvest passed the million bale mark this week, according to W. K. Palmer, in charge of the Lubbock Cotton Classing Office of the USDA. The cotton harvest was 95 per cent complete in the Seminole area and the Brownfield Office closed on Friday, December 22nd, according to W. E. Cain, in charge of the Brownfield Cotton Classing Office of the USDA.

Samples from 1,005,000 bales of cotton had been received and classed by the three area classing offices through Friday, December 22nd.

Through Friday the Lubbock Office had classed 769,000 samples of this year's crop, the Brownfield Office 160,000 and the Lamesa Office 76,000. This brought the total classed this season at the three offices to 1,005,000.

The seasonal classing office at Brownfield closed Friday and samples remaining to be classed from that area will be classed at Lubbock.

Spotted and Tinged cotton continued to increase as the harvest neared completion. Light Spotted, Spotted and Tinged cotton made up 80 per cent of all cotton classed at the Lubbock Office last week.

Middling Light Spotted was the predominant grade at Lubbock last week with 28 per cent of all cotton classed. Strict Low Middling Light Spotted made up 17 per cent, Middling Spotted 19 per cent, Strict Low Middling Spotted 8 per cent and all Tinged grades 5 per cent.

Staple length improved slightly and averaged 31/32. Seven per cent of all cotton classed at Lubbock last week was 29/32, 36 per cent 15/16, 25 per cent 31/32 and 32 per cent stapled 1-Inch and longer.

Twenty-one per cent of the cotton had a micronaire of 2.6 and below, 24 per cent "miked" 2.7 through 2.9, 24 per cent was 3.0 through 3.2, 11 per cent 3.3 and 3.4 and 20 per cent was 3.5 and better.

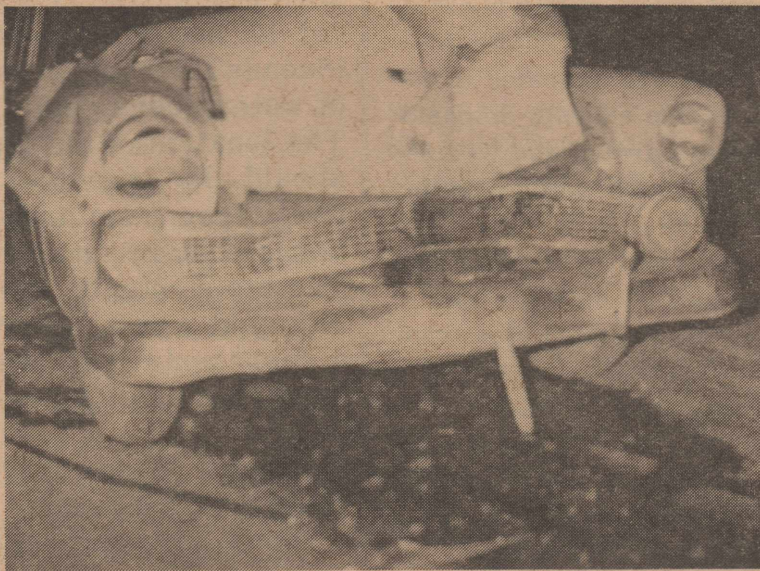

Cotton prices, as reported by the Consumer and Marketing Service of the USDA, were lower for cotton in all micronaire categories. Cotton with micronaire of 3.2 and below was generally selling at \$2.50 to \$10.00 per bale over the loan.

Average prices paid for the most predominant qualities in the 3.5 to 4.9 micronaire range were: Strict Low Middling 15/16 - 19.70, Strict Low Middling 31/32 - 22.35, Middling Light Spotted 15/16 - 19.85, Middling Light Spotted 31/32 - 22.60, Strict Low Middling Light Spotted 15/16 - 18.90, Strict Low Middling Light Spotted 31/32 - 21.55, Middling Spotted 15/16 - 17.75 and Middling Spotted 31/32 - 19.60.

Cottonseed prices ranged from \$55 to \$73 per ton at the gins. Average price was \$60 per ton.

PROTECTION of SMALL WATER SUPPLIES

Suitable water for drinking purposes seldom occurs in nature. Rain and snow waters become contaminated quickly by dust, insects, animals and man. Some of the organisms introduced into water by these means cause typhoid fever, paratyphoid fever, bacillary and amoebic dysentery. The organisms causing these diseases are excreted in human discharges and if defective excreta disposal methods or a lack of safeguards around the water source allow the organisms to reach water supplies, human illness will result.

In order that we may free ourselves of these dread diseases, certain safeguards must be provided. We cannot depend on the physical appearance of water as a measure of safety, for it is possible that clear and sparkling waters may be unsafe. For complete satisfaction, the water supply should be safe, pleasant to taste, clear and free of gases and minerals that impart disagreeable odors. Too, a good water supply is one that is adequate for needs, dependable and convenient. A minimum of approximately 50 gallons of water per person per day are required in those homes with complete plumbing facilities. In homes not equipped with plumbing, the water demand may decrease to about 10 gallons per person per day. Of course, if stock or irrigation water is to be provided from the household supply, additional allowances must be made.

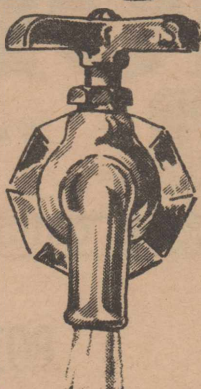

In this area particularly all of our water is obtained from wells usually from 100 - 150 feet deep. Water thus obtained is usually more often free from bacteria than from other sources; however, the mineral content on underground water is usually very high. Much of our water approaches the upper limit of 500 parts per million as recommended by the U. S. Public Health Service.

Our water has a very hard content with an excess of calcium, sulphate, and bicarbonates. Our fluoride content is usually over twice the recommended level of 1.5 parts per million. This well causes brown staining on teeth. In addition we have had wells that have been contaminated with salt water, sulfur, water, oil, and gas.

Underground water is usually safer than other sources. Tests show that we are finding more and more wells that are contaminated. Mr. Bruce, the State Water Engineer at Lubbock, said that in making a survey of privately owned wells in Lubbock County, seventy per cent were to be contaminated. Our records show that we test from fifteen to twenty wells a month with about forty-five per cent showing contamination. A great many wells are known to be bad before we test them and often we have to treat them four or five times before we clean them up. As a whole in this county, there are about twenty to thirty per cent contaminated. We can expect a higher percentage as the population increases.

Mr. and Mrs. W. M. Plue of Kermit spent Christmas Day with their daughter, Mr. and Mrs. Vernon Floyd.

Bob Keyes, Abilene Christian College student, is home for the holidays. Bob's parents are Mr. and Mrs. V. N. Keyes.

1. Select an in-side sampling tap which is in such a condition that leaking of water around the turn key does not occur. The out-let should not have threads for connection of water hoses, etc. The location of the tap should also be relatively free from dust-borne contamination. The tap should be selected at a point where a representative water sample can be obtained.

2. Flame tap for 1/2 minute with a torch made of wire and cotton soaked in rubbing alcohol.

3. Flush the sampling faucet thoroughly to remove stagnant water from the supply line, allowing the water to run for at least one minute.

4. While the bottle is being filled, hold cap through hood wrapper, usually provided by the laboratory. Do not allow the fingers or any other object to come in contact with either the cap or the lip of the bottle.

5. Complete the sample-identification-analysis report card, giving all information requested by the laboratory performing the examination.

6. Put bottle in refrigerator until you can send or bring it to the health office.

Mr. and Mrs. N. N. Calderon and family spent the holidays in Ft. Stockton with relatives.

Mrs. Dicie Hopper and Miss Bunnie Hopper spent Christmas in Odessa with their daughter and sister, Mr. and Mrs. Joe Bill Garrett and sons. Bunnie is an Abilene Christian College student and is home for the holidays.

Mr. and Mrs. A. X. Billups spent Christmas in Kermit with their daughter, Mr. and Mrs. Bill Parnell and children. Their son, Mr. and Mrs. Bob Billups and family of Ft. Stockton met them there.

To all our friends and their families.

We extend all GOOD WISHES for YOU and YOURS for the NEW YEAR!!!!

May each day hold a special meaning -- May 1968 be filled with HAPPINESS!!!

Believe it or not, Gerard Downes is Irish, from Ireland, turned Texan. "I luff these boots and I luff this hat." Gerard came home with Chester Samples and spent the Christmas holidays with Chester and his family. The 220 pound Downes was No. 2 throwing the shot in his home country with a throw of 51 feet. He is a freshman at Wayland Baptist College.

Not only was Gerard pleasant to talk to, but he made everyone around him happy. Chester's mother said it was hard to fill him up on fried chicken. (Chester's little brother is also practicing throwing the shot. Who knows--he may be a record holder in our country some day.)

M.S. DOSS CENTER

More than two hundred members of the M. S. Doss Youth Center were in attendance at the youth center Christmas party Wednesday night, December 20th. The Christmas party this year served as an occasion when the youth center members brought toys to assist good Saint Nicholas in remembering the boys and girls of this area with Christmas gifts. Along with several contributions from the public, these toys were distributed among one hundred and thirty-six youngsters.

The Junior Study Club joined the youth center in sponsoring the toy drive. Study Club members undertook the jobs of finding the names of boys and girls to be included on Santa's list and of seeing that they received the toys collected. Members of the club came to the youth center Thursday morning, put the toys into boxes, and made most of the deliveries during the course of the day. They also included in each of the boxes a variety of fruit provided by the club. Some of the deliveries were made to youngsters more than thirty miles away in the Higganbotham community. Mrs. Kenneth Bass served as Study Club toy drive chairman and put in many hours of work in all phases of the undertaking.

Gaily decorated Christmas boxes for the toys were provided by Junior High School art students of Mrs. Dave Anderson. Mrs. Anderson had originally intended that the decorating be done by students in only two classes, but when her other classes learned what was being done they all wanted to take part, and consented to their doing so. Mrs. Anderson relaxed her usual no candy in class rule for the duration of the project to permit the youthful decorators to partake of candy treats provided by the youth center. The boxes which were decorated were collected at various city stores by youth center members, Spencer Dunlap and Eddie Miller, along with Eddie's sister, Susan, on two of the worst days of the recent wintry spell.

The youth center would like to express its appreciation to the many individuals and businesses who contributed to the success of this Christmas endeavor.

The Christmas party got underway with the serving of cookies and candies to the members as they arrived. Mesdames Kenneth Bass, Kenneth Willis and Glynn Chandler of the Study Club, with Mrs. Bass serving as spokesman, began the program by commending the youth center members for their efforts in conjunction with the toy drive and for their contributions of toys.

Entertainment by Texas Tech sophomores JoAnn Craig and Suzy Benton of Pampa, and Ron Williams from Amarillo was next on the party agenda. Accompanied by Mr. Williams on the piano, Miss Benton and Miss Craig presented a variety of delightful vocal selections which won the warm acclaim of their listeners.

Mrs. M.S. Doss, accompanied by Mrs. Bill Munnerlyn, was the guest of honor at the party. Larry Cottrell and Linda Aryain presented Mrs. Doss with a Christmas gift from the youth center members. It was a hand carved figure of a horse and rider, entitled "Night Hawk," by Theresa Martin of Lubbock. Larry recalled that it was at this season of year six Christmases ago that the youth center opened its doors for business, and that its business then as now was to provide the teenagers of Seminole with a special place of entertainment they could call their own. Larry expressed thanks to Mr. and Mrs. Doss for having made the youth center possible, and extended to Mrs. Doss from each and every member of the center their wishes that she have the merriest of Christmases.

Then following a period of carol singing led by the Tech students, jolly Saint Nicholas, as portrayed by Seminole High School band director Sammie Robertson, made his appearance, and concluded the evening by distributing to the members a bucket of candy.

REFLECTIONS

Christmas Day has come and went
I'm still not broke but badly bent.
My Christmas cards have all been sent
My yearly income almost spent.

I shoved my way through kinfolks there
And wormed my way along to where
I could collect my entire share
Of what was on the bill-of-fare.

I think I'll live another year
On all the stored up Christmas cheer.
And worry all those friends so dear
Who to my gripes will lend an ear.

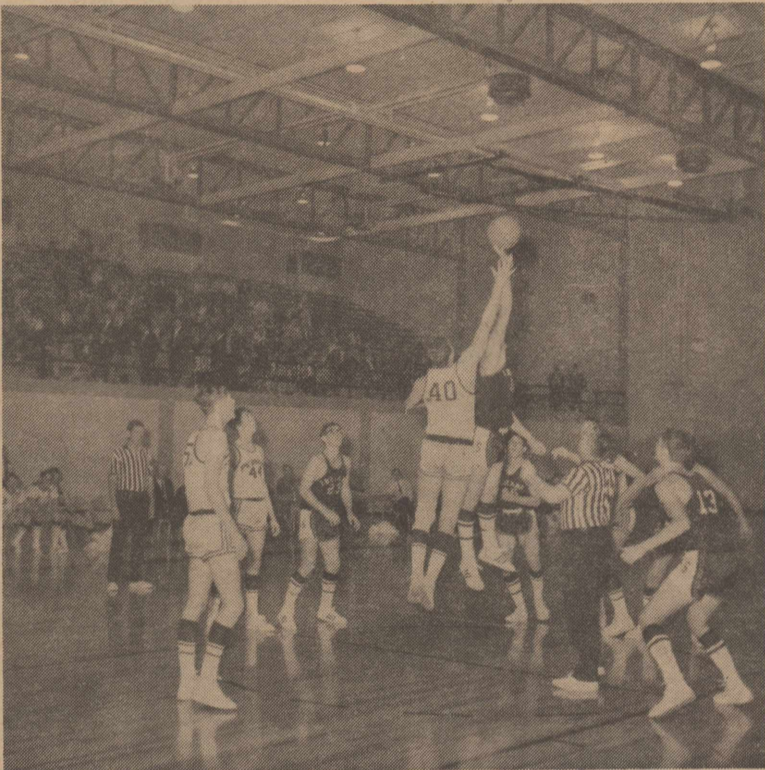

Yes, Christmas Day has come again.
With all it's happiness, joy and pain.
And tho we scarcely stood the strain
We'll always welcome it back again.

One of the few times Seminole out-jumped the Panthers.

High point man, Spencer, goes for two points.

It must be most difficult to coach against height. Coach Caffey found that out against Permian when there was three inches per man difference. Seminole was led by Spencer with 15 points, followed by Wall with 11 points, Ray with 9, and Anderson with 7 points. The scores by quarters were 16 - 14, first quarter, 28 - 35, 39 - 55 and 54 - 70.

Seminole was not only out-classed by a AAAA school, but they were out-classed in height also.

Seminole found it hard to shoot over their head.

TEXAS TOWN NAME GAME

You may have already seen this but anyway here is a Texas Town Name Game: Texas is a home where the BUFFALO roam, where the WHITE DEER and the ANTELOPE play. The HEREFORD cow and her WHITEFACE calf graze in a LITTLEFIELD, while not far away the COYOTE and the LOBO wolf lurk in a MESQUITE thicket. In the sky, the FALCON and the EAGLE PASS high above, and the call of the CROW is heard by the TURKEY roosting in an ELM MOTT. In a flowered MEADOW, every BLOSSOM is a regular BEEVILLE. The giant SALMON and the tiny SHINER swim together in the SHALLOWATER of a BIG LAKE, while a CRANE seeks insects in the soft EARTH along the shore near a MALLARD'S nest.

Mr. and Mrs. J. B. Dyess, James and Loretta spent Christmas in Monroe, Louisiana, with Mr. Dyess's parents.
