RAISE GIVEN TO SCHOOL EMPLOYEES

CLANTONS GIN FIRST BALE

Mr. and Mrs. John Clanton, on the right, are shown with their granddaughter, Sandy Vickers, their daughter, Mrs. A.A. Vickers, and their son, Johnny, after ginning their first bale of cotton.

NEW COMER

Neal Flathers; formerly a vocational agriculture teacher at Gruver, Texas is now an assistant vice president of the Lubbock Production Credit Association, and will be working in the Seminole office.

Flathers was employed with the Gruver schools for seven years. While in the teaching field, he received his honorary Lone Star Farmer's degree and trained four state judging teams. Flathers graduated from Perryton High School in 1957. He attended Tarleton State College, where he was a member of the

"What do you do when the gin's not ready and you have the first bale of cotton?" asked John Clanton, who lives 9 miles south and one mile west of Seminole. After trying Seminole, Mr. Clanton tried Seagraves and finally Loop and ginned Gaines County's first bale of cotton.

The bale weighed 510 pounds, producing 900 pounds of seed from a gross weight of 2,080 pounds. The bale was harvested from 10 acres of dry land cotton 9 miles south and 1 mile west of Seminole and was ginned last Wednesday. The Coop Gin at Loop, Texas is managed by Bert Davis.

Plowboy's football team. He received his B. S. degree from Texas Tech University in January, 1962. While at Tech, he was a member of the Tech livestock team. Neal and his wife, Janice, reside at 1106 SW. Ave. G. The couple have two children, Janeal, 11 years old, and Clay, 8 years old. They are members of the United Methodist Church.

School Board Meets

In a 4½ hour session the School Board okayed a 15¢ per hour raise for auxiliary employees last Monday night. The auxiliary employees cover 11 secretaries, 15 custodians, 4 maintenance men, 1 farm caretaker, 24 cafeteria workers, 2 bus mechanics, and 15 bus drivers. For a 12 month employee this would mean \$312, a bus driver \$108, for a total raise of \$14,274.00.

(2) In other school board action the 1969-70 school budget was amended and trimmed \$42,935.25. Some of the larger items left out of the budget were 1 school bus, \$6,000, 1 employee, \$5,057, 1 band trip, \$8,173 plus many smaller items.

(3) Bids were accepted for the furnishing of the milk for the school from Bordens at 7¢ for ½ pints and ice cream at \$1.35 per gallon. This bid remained the same as last year.

(4) The gasoline contract was awarded to Gaines County Oil at 18.1¢ per gallon. Five other companies bid.

(5) Bud Norris was employed as a bus driver; H.B. Patterson as a driver for the activity bus.

(6) Disposal bids were rejected on the old band truck. (\$301).

(7) The tennis program was discussed at length with Jerry Franklin, coach, in attendance. In pointing out the things important to a tennis program Coach Franklin mentioned two important phases - those who wanted to play varsity tennis and those who wanted to learn the game to carry into future life activity. He pointed out the tournaments played in during the spring, the fall and the summer. Also several underprivileged children who needed help in outfitting

Each brother had three brothers and three sisters at the RAMSEY FAMILY REUNION held last Saturday and Sunday in Seminole. The sisters were Mrs. Ettie Hopper, Ft. Farm hand

It's 320 miles from Seminole to Kerrville, Texas. That's where our kinspeople, the Lenno Nortons, are building their new home. They drew us a map and we were on our way, arriving at approximately 8 p. m. Wednesday.

Even the entrance way was extended. We had just crossed the Guadalupe River on a low water bridge and were greatly surprised when a guard stepped out from his housing post and informed us that it would cost \$1 to get in to see them. How many of you've got kinfolks that after making a six hour drive, it cost you one buck to see? (The Nortons are staying in the Kerrville State Park while their new house is being built in Kerrville, South.)

The hill country is booming in Kerr County and it's not all brought on by sheep and goats. The 65 miles distance between Houston, San Antonio and the area has encouraged weekend visitors and summer homes up and down the Guadalupe. It seems that every hill top either has a new house, a new foundation, or a for sale sign with restrictions on it. The drive up Highway 27 to Ingram, then to Hunt and on up the river would make any West Texan dream of water front property.

Thirteen deer were in one front yard, including a Christmas tree buck and another with extended spike horns. Kids were swimming, sliding down mossy dams and yelling like Tarzan as they tried out the vines over the water and going down flumes in inner tubes.

The cypress trees and cypress knees along the river would improve any drive with their lace like foliage. If the sailboats, the waterfalls, huge trees, paddle boats, spacious yards and all the youth camps and clubs were not enough to hold your attention some of the names along the way added spice. We noticed these: Helter Skelter Shelter and Hodge Podge Lodge.

production.

Elbert Harp, GSPA executive director, said, "any grain sorghum farmer in the referendum area may have his name on the ballot by submitting his nomination signed by himself and ten other grain farmers to the association office by September 4, 1969." The election of this board will be held on the same ballot which the grain farmers decide whether or not they want to expand their market development and research program. Members of this board will not receive pay for their services.

Upon approval of the referendum and election of this commodity board, five cents per ton will be collected at the point of first sale of grain sorghum within a 29 county area of the high plains and panhandle. It is a voluntary program and anyone not wanting to support it may request his money back and it will be refunded promptly without any questions asked.

Mr. John Clanton received a bonus of \$50.00 from Chamber of Commerce director Earl Bartley for the first bale of cotton ginned.

BOLLWORMS IN THE SOUTH PLAINS

BOLLWORMS ARE BEING FOUND IN MANY COTTON FIELDS THROUGHOUT THE SOUTH PLAINS, REPORTS DR. BILL CLYMER, EXTENSION ENTOMOLOGIST, AND PRODUCERS SHOULD PAY PARTICULAR ATTENTION TO AVOID ECONOMIC DAMAGE FROM THIS INSECT. HOWEVER, HE CAUTIONS AGAINST SPRAYING IF NOT NEEDED AS AN APPLICATION OF INSECTICIDE WILL KILL THE BENEFICIAL INSECTS AND PROBABLY NECESSITATE CONTINUATION OF SPRAYING AT APPROXIMATELY 5 DAY INTERVALS.

BOLLWORM ADULTS OR MOTHS TEND TO BE MORE ACTIVE IN LUSH GROWTH AND AFTER THE RECENT RAINS COTTON WILL BE IN BETTER CONDITION AND MORE VULNERABLE TO ATTACK. ALSO, DAMAGE MAY BE GREATER IN THE YOUNGER JUNE PLANTED COTTON.

ACCORDING TO PAST RESEARCH, ONE BOLLWORM

CAN DESTROY 8 SQUARES AND ABOUT 2 BOLLS, SAYS CLYMER. THIS CAN BE QUITE AN EXPENSIVE PEST WHEN HEAVY POPULATIONS ARE PRESENT. RESEARCH HAS SHOWN 2,000 - 2,500 WORMS PER ACRE ARE OF ECONOMIC IMPORTANCE. THIS IS ABOUT 1.5 TO 2 BOLLWORMS PER 10 FEET OF ROW.

PRODUCERS ARE URGED TO CHECK THEIR FIELDS CLOSELY BY CAREFULLY EXAMINING PLANTS IN SEVERAL AREAS ACROSS THE FIELD. IF AN AVERAGE OF 2 BOLLWORMS PER 10 FEET OF ROW IS FOUND, CONTROL SHOULD BE CONSIDERED. CLYMER POINTS OUT, HOWEVER, THAT WORMS OVER 1/2" IN LENGTH ARE MOST DIFFICULT TO CONTROL.

YOUR LOCAL COUNTY AGRICULTURAL AGENT HAS AVAILABLE INSECT CONTROL GUIDES WHICH GIVE THE LATEST INFORMATION ON WHEN TO SPRAY AND WHAT CHEMICALS TO USE. IF YOU ARE IN DOUBT ON CONTROL MEASURES TO NOT HESITATE TO CONTACT YOUR LOCAL AGENT.

PINK LADIES NEEDED

PINK LADIES NEEDED - but honest you wouldn't have to get in on the "deep cleaning" so says Vera Carroll, Eloise Lammons, Mary McCullough and Ruth Rodgers. Last Thursday some of the Pink Ladies decided to get their late spring cleaning done. They painted the auxiliary room and got it in tip-top shape. They also expressed a need for more Pink Ladies to serve at the hospital.

RECIPE FOR AN AMERICAN

Sift one cupful of patriotism with an equal amount of tolerance. Stir in a heaping tablespoon of ambition, tempered with a proportionate amount of restraint.

Beat well, slowly adding the milk of human kindness in bountiful measure. Fold in a half-cup of brotherly love mixed with charity.

Flavor to taste with Christian, Jews, Mohammedan, or any desired extract. Pour mixture into a mold and let it rise in the heat of competitive spirit. Bake at an even temperature.

Frosting may be any desired color: Red, white, brown, yellow.

Serve in unity. Enough for 170 million people.

TEXAS PEANUT PRODUCERS REFERENDUM

ELECTION TO BE SEPTEMBER 24

Texas peanut producers will decide in a September 24 referendum election whether or not to establish a self-assessment program, reports County Agent Calvin Holcomb.

Southwestern Peanut Growers Association of Gorman, Texas, has been certified by the Texas Commissioner of Agriculture to conduct the referendum vote which will include all 117 counties having peanut allotments.

The proposal would allow peanut producers to assess themselves a maximum of \$1.00 per net ton (farmers' stock basis) of production and permit them to elect a nine-man commodity producers board to administer the proceeds, Holcomb says.

Assessments would be collected at the first point of processing or sale and would be used for research, disease and insect control, education and promotion for production, marketing, and use of peanuts.

Any person in the state engaged in producing, or causing to be produced, peanuts for commercial purposes is eligible to vote. This includes farm owners and their tenants or sharecroppers, if such persons would be required to pay the proposed assessment.

Ballots, with a self-addressed envelope for return, will be mailed by SWPGA September 6 to all eligible voters. Producers who have not received a ballot prior to September 9 may obtain one upon request from his office, Holcomb explained.

Deadline for return of ballots is September 24. Votes postmarked after that date will not be counted, Holcomb says.

Voters will have to certify their 1968 total peanut production on the ballots. Estimates can be in pounds or bushels. Growers are urged to check their production records at the county Agricultural Stabilization and Conservation Service (ASCS) office prior to voting. If production is overestimated by more than 10 percent, the ballot will be declared void, Holcomb advises.

Qualified voters may place their names in nomination for positions on commodity producers board by filing an application with SWPGA by no later than August 24. Applications must be signed by the individual and 10 other eligible voters.

For the referendum to pass, two-thirds of the votes cast must favor the self-assessment program or votes favoring the referendum must represent at least 50 percent of the total 1968 peanut production. If the referendum fails to carry by either of these ways, it will be defeated, Holcomb explained.

Other states having similar programs to the proposed self-assessment include: Georgia, Alabama, North Carolina, Virginia, Oklahoma, New Mexico, and Florida. Holcomb urges peanut producers to consider the pros and cons of the referendum and to cast their votes during the election.

Rose Arrezola is working on the paste up board at the News. A portion of last week's paper is shown.

"First In Service"

Information From Social Security Office

BY DOROTHY FEAZELL

Mr. Ellis Campbell, Jr., District Director of Internal Revenue in Northern Texas has released important information concerning Federal occupational tax stamp requirements.

Persons who manufacture, maintain for use, or deal in or with the businesses or products requiring a Federal occupation tax stamp must, on or before July 1, 1969, register and pay for occupational tax stamps for the new fiscal year ending June 30, 1970.

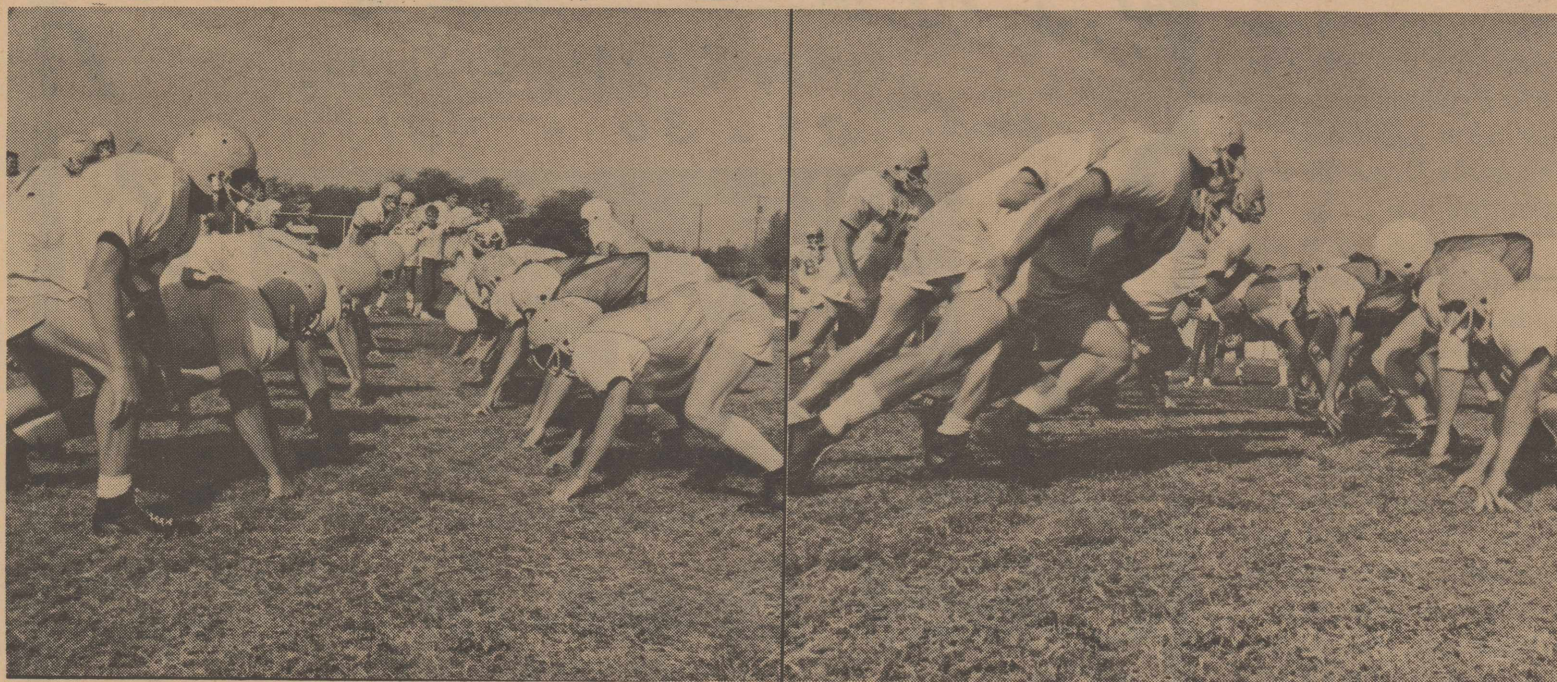

The kinds of business or products requiring a stamp involve gaming devices, wagering, narcotics, marijuana, distilled spirits, wines, beers, and firearms.

Those planning to start a business which requires a stamp should register and pay the tax before commencing business, Mr. Campbell said.

Publication 510, "Information on Excise Taxes for 1969", which furnishes detailed information on this subject, may be obtained by dropping a post card to Supply, Internal Revenue Service, P. O. Box 1738, Dallas, Texas 75221

Texas A&M University sophomore Marval G. Bailiff of Seminole has been selected as a counselor for the 16th annual A&M Freshman Camp at Methodist Lakeview Assembly Grounds near Palestine September 6-9.

The YMCA camp will host 400 freshmen students, about one-fifth of the freshman enrollment, and 97 of the university's top undergraduates were selected as counselors.

YMCA coordinator Logan Weston said the purpose of the camp is to orient students on college life, A&M customs and traditions and leadership.

The "fish" will meet with university officials, professors and learn first-hand about campus life from the counselors, Weston pointed out.

Gay Foote left last Thursday for Plainview where she joined a group of young people to go to Glorieta, New Mexico to spend a week.

EDITORIAL

No, never say "this is the biggest watermelon in the world, the biggest cow, the shortest man, the tallest sunflower," or name somebody else's mules. As was reported in last week's paper, concerning the six mule hookup and their habits, the News received a telephone call and upon further investigation was told the following story.

Lee Billingsley (deceased) lived 1 mile north of Lamesa. The picture of the six mules was taken near his hog barn on a 200 acre farm. The planter, without a tongue, was a Rock Island two row planter with a third wheel in front to support the six mule hookup.

"Walter, you got the name of the mules wrong. The mule on the extreme left was JoAnne, the next one was Susie, Ida, Kate, Chango (Mexican for monkey), and the last one was Ramblin' Pete. Walter, he was the one who ran away. He kept one ear dropped till at least 10 o'clock every morning, ready to run away any split second. You told it right when you said they were the best mules. Their price - \$250 each. Holly Woods bought two of them, V.O. Barron got two of them, me and my wife got Susie and the best one of them all. I don't know what happened to Jo Anne. I could replant that 200 acres in ten days."

Thanks to Lonnie Freyburger, a brother-in-law to Lee Billingsley.

LETTER TO THE EDITOR

Dear Editor:

There is so much written and talked in our day about discrimination- I want to express to the people how nice it was working this summer at CBX Peach Farm with Spanish-speaking, Negro and Anglos. The working condition was good, our bosses were good to us and the good feelings of the employees was perfect.

I want to say thanks to each one I worked with for making the work pleasant.

SUMMER READING PROGRAM GIVES GOOD RESULTS

This summer twelve students were enrolled in our remedial reading course. Each student had a very good attitude toward our class and each worked exceptionally hard to improve his reading ability. Several new ideas were used this summer. We used phonic records, a Language Master Machine, and film strips. These new ideas were combined with proven materials such as: Science Research Association Laboratory, a reading workbook, and Word Attack, books written especially for slow readers.

It is my opinion that combining the new materials with the materials we have used in the past has allowed us to have our best summer reading program.

Mr. and Mrs. Dee Coker have been hunting artifacts for the past 50 years. They own between 2500 and 2600. "I've never bought an artifact or I have never sold one. Nearly all I've found have come from Gaines County." Mr. and Mrs. Coker, the former Eunice Thompson, hunt together, camp together and show their collections together.

Visiting the Cokers is kind of like visiting a museum, only better. They know the history of most all the pieces and there's nothing better than a personal tour. The picture this week features 'mattas', or grinders, little ones, big ones and middle sized ones. These were used by the Indians to grind their corn and grain. A round rock was used for the beater or roller against a sandstone with a worn out place or an indentation in it. About thirty such grinders are in the collection.

"No, we've never found a cache of spearheads, arrowheads, pottery or grinders. Two or three items is the most we've ever found in one place." Cedar Lake in northeast Gaines County has proved to be the best hunting grounds for the Cokers.

PRE-REGISTRATION COMPLETED

With pre-registration completed, the staff of the Seminole school system is squared away and ready for an expected 2000 more-or-less eager pupil influx Tuesday, September 2. Last year's opening day enrollment showed 2001 in attendance.

Superintendent James Bramlett stated that all positions, both professional and auxiliary, are filled. Professional staff this year numbers 126, up three from last year. Twenty teachers new to the system will be in classrooms, either as additions or replacements, when the opening bell sounds Tuesday. There are 74 auxiliary employees, the same number as last year. This figure includes part-time cafeteria workers and bus drivers.

Tuesday will be a full day of school for all students except first graders, who attend only in the morning during the first week. The cafeteria will be open and all buses will make complete routes, both morning and afternoon. Any parent who is uncertain which bus his child will ride should contact John D. Thompson, director of curriculum and special services, at the school administration building.

Formal activities for teachers began Wednesday with an orientation session at 9:00 a. m. in the high school library for all new teachers. A general faculty meeting will get underway at 9:00 a. m. Thursday in the high school auditorium. Following this, teachers will report to their respective buildings for building meetings. Friday will also be spent in building workshops and room preparation.

Refreshments for the Wednesday morning coffee break will be furnished by the local Classroom Teachers Association while the Chamber of Commerce will provide the goodies for the Thursday morning break. A buffet for school board members and their wives and the teachers will be given in the school cafeteria Tuesday evening at 6:30 o'clock.

In addition to construction projects involving athletic facilities which were approved in a spring bond election and are presently underway, summer plant improvements include a painting of the Junior High School and a remodeling of the Primary School audio-visual room into a library.
