

Opening Days Are Successful

Price-Foster Dry Goods Co. have one of Neatest Stores in Floydada.—Progressive Merchants.

Saturday and Monday were opening days for the new dry goods firm of Price-Foster, whose newly bought goods were prettily and artistically arranged for the first public showing when their doors were opened on Saturday morning at 8 a. m.

A combination of circumstances prevented their bestowing favors in the way of flowers or refreshments on their opening, but the courtesy and attention given individual customers were shown through their pretty new store probably compensated for the more material favors.

Friday forenoon Mr. Price feared greatly that their store could not possibly be arranged in time for the opening on the date announced in the paper, but by dint of hard work and the burning of midnight oil their store was spick and span bright and early Saturday and the sales force began the days work with the early morning custom in one of the most orderly-appearing stores in west Texas.

"We certainly appreciate the way in which our opening was received by the people of this community, and especially by the ladies," was Mr. Price's remark when seen Tuesday. "Our sales were very satisfactory, but we were and are especially anxious that the people see our bright new stock and get acquainted with the manner in which we shall attempt to cater the trade, hence our hearty appreciation of the attention given our opening days."

Married at the Court House.

Tuesday Mr. C. R. Garner and Miss Lizzie White were married at the court house by Judge Arthur B. Duncan, the ceremony being performed at the noon hour.

The contracting parties live in the northeast portion of the county.

Farmers Congress and Short Course.

Big times are being prepared for Texas farmers at A. & M. College for the summer. On July 17-18 the farmers institutes will be conducted at the College. The following Monday, July 20, the annual agricultural short course for farmers, conducted by the A. & M. College will open for a five days session. Rates of one cent a mile will be offered by all railroads and accommodations will be provided at a very cheap rate at the College. Interesting programmes of a strictly practical nature are being prepared for these three big meetings.

Red Cross Seals Report.

Mrs. O. B. Colquitt, President of the Texas Public Health Association, announces that the total receipts from Red Cross Christmas Seals on April 1st amounted to \$11,818.36. About 150 of the local chairmen have failed to report to date, and a number of individuals have not yet remitted for Christmas Seals. It is hoped that several thousand dollars additional may be received and that the total sales will be increased to at least \$15,000.

Singing Convention May 3.

The South Side Floyd County Singing Convention plan to hold their next meeting at Fairview School house on the first Sunday in May which is the third.

A number of the classes eligible to entry in the convention are practicing preparatory to the Banner Contest.

The program includes all-day singing and dinner on the ground for all in attendance, and will be announced fully before the date set.

Eiler's Minstrels.

Eiler's New Orleans Minstrels visited Floydada and showed under canvas Monday night. This was the first real negro aggregation ever showing before a Floydada crowd, and curiosity being a strong drawing card, the crowd was unusually large—be it said to the detriment of interests closer to home. (This last just by the way, however.)

The "cullud troupe" did some good dancing, had a good band and orchestra and some of their jokes were new.

Reports have it that Ralph Thacker, for a number of years telephone manager for the former Northwest Texas Telephone Company at Plainview, Tulia and Canyon, who married Miss Pearl Mitchell, of Lockney, is now in Old Mexico driving a service car for Villa. The report (which comes by way of grapevine dispatch) say that he is now in the territory near Torreon, and draws a weekly stipend of \$75. This is a good salary but Ralph's friends in the plains country deem it worth that money to be dodging the federal's bullets.

Open Program Friday Night.

The Occident Literary Society of the High School are preparing to render an open program tomorrow night (Friday) at the high school auditorium, and the program submitted contains some excellent numbers.

A feature of the evening's program will be a debate between two teams of the high school boys on the question of compulsory education.

School Trustee Elections.

The Commissioners' Court canvassed the results of the County School Trustees and District school trustee elections Tuesday.

The present members of the County board were re-elected, as follows: J. H. Tackett, precinct No. 3, J. H. Green, precinct No. 4, E. C. Nelson, county at large.

Four districts held no election and new elections have been ordered for these districts as follows: Meteor, district No. 7; Pleasant Valley District No. 2, Goodnight District No. 29, and Blanco district No. 22.

One new trustee each was chosen in the following districts: District No. 1, H. D. Ashby; Pleasant Hill No. 4, R. Cardinal; Sunset No. 8, C. A. Wilson; Sandhill No. 9, A. J. Womack; Harmony No. 10, M. W. Heard; Lakeview No. 11, F. P. Donathan; Lone Star No. 14, R. W. Smith; McCoy No. 16, W. J. Berrv; Roseland No. 17, Luther Casey; Mayview No. 18, C. J. Gray; Baker No. 19, J. N. Bartlett; Antelope No. 20, G. C. Edwards; Providence No. 21, Jas. A. Pullen; Allmon No. 23, C. C. Krause; Campbell No. 20, J. W. Barrett.

New District No. 30 created last month out of portions of three districts in the northwest part of the county, elected a complete set of trustees as follows: R. L. Brown, J. A. Weathers, Frank Walters.

Watson—Battey.

Last Sunday afternoon at 4:30 Rev. G. W. Tubbs, of this city, united in marriage Mr. R. M. Battey and Miss Effie D. Watson, a popular young couple of the southeast portion of the county. The nuptials were consummated at the home of the bride's parents, Mr. and Mrs. R. C. Watson.

A large number of friends and relatives were present at the wedding, and the Watson home was prettily decorated for the occasion.

Following the ceremonies and congratulations a fruit and cake supper was served.

The groom is a son of Mr. and Mrs. O. F. Battey, of Lakeview. He is a substantial citizen of the county. The bride's popularity among her acquaintances is attestation of her beauty and accomplishments.

They are preparing to make their home in the Lakeview community, where they will soon be at home to their friends.

The Hesperian joins in wishing them bon voyage.

Elber Gray, a Van Zandt county negro, received a Carnegie medal three years ago. The other day he received a sentence of ninety-nine years in the penitentiary. It is possible to be a hero today and a criminal tomorrow, regardless of color or condition of previous servitude.—Fort Worth Record.

Bank Embezzler Out on Bail

Memphis, Tenn. April 12.—Hunter Raines, who wrecked the Mercantile Bank here on Feb. 9 by embezzlement was today released on bail, pending trial.

A twenty-five-thousand-dollar cash bond was put up by relatives whose identify the attorneys the attorneys refused to disclose.

Mrs. Homer Steen is spending the latter part of this week in Plainview with friends.

Swat the fly.

"Texas" Greatest Warship.

New York, N. Y., April 14.—The great super dreadnought Texas passed up East river under Brooklyn bridge this morning on her way from the ship builder's navy yard at Newport News to the Navy Yard. Since yesterday this most powerful of the United States warships has been at anchorage off Tompkinsville.

On her arrival at the navy yard for the first time, there was a chance to compare the Texas with her sister ship the New York, built by the government. There has been much rivalry in the matter of completing the two vessels.

March 1 the New York was 98.1 per cent completed and the Texas 99 per cent. When it was announced that the Texas was to come into the New York yards to remain fifty days to receive the finishing touches, there was exultation among the New Yorkers, for the New York was to go into commission on April 8, and to sea immediately after.

The Texans laugh scornfully at this today.

They would like to remind the New York contingent that the Texas has had her trial run and exceeded her contract speed and the New York has yet to feel the quiver of her engines. The fifty days she is to spend here in receiving the finishing touches is the work that is never entrusted to private shipbuilders, being the installation of torpedo tubes and the sighting apparatus for the turret guns. On the New York, this has been completed.

The Texas came in under the command of Captain A. W. Grant, recently commandant of the League Island yard.

On the Texas is the most powerful battery afloat under the American flag. The main armament comprises ten 14-inch rifles mounted in five electrically controlled turrets. All can be fired on either broadside. In addition to these are twenty five 5-inch rifles to protect the vessel from torpedo boat attack.

The vessel has a displacement of 27 thousand tons, a length of 573 feet and a beam of ninety-five feet. Her boilers are a combination of coal and oil burners and like our dreadnoughts she has a wide radius of action.

The fourteen-inch rifles of the main battery have a range of 21 thousand yards. The 1,400 pound shell can penetrate sixteen inches of steel at 10 thousand yards. The muzzle energy of one of these huge guns is sufficient to lift 65,678 tons one foot in the air.

Flies, Flies, Flies.

The fly season is with us. With the advent of the warm spring days come the hordes of flies which have been breeding the past two months in the unclean places of the town and country.

Come to think of it there must be much uncleanness around Floydada, for it is said that flies will not breed in anything but filth.

Some effort has been made to offer prizes for killing flies. This may mature into something tangible soon.

An offer of 10 cents per hundred for the next month for flies is the suggestion made, the count to be made each week and the number killed published weekly.

This plan would exterminate millions of flies.

Swat the fly.

2599 Rabbit Scalps.

2599 rabbits were killed in Floyd County between the second Monday in March and the second Monday in April, according to the count of the scalps turned into the commissioners' Court Tuesday for the 5 cent bounty.

5 wolf hides were also counted and a bounty of \$1 each allowed by the court. The Commissioners' state that while the state appropriation for the extermination of wolves and similar varmints, has been exhausted, they consider it good policy to continue the bounty offered paying the full amount out of the county funds, and this will be continued indefinitely.

Doing Texas An Injustice

Fort Worth, Tex. Apr. 13.—The statistical bureau of the Texas Business Men's Association has discovered an apparent discrepancy in a recent report issued by the Federal Census Bureau at Washington. According to the bulletin, Los Angeles County, California, is the leading crop producing county in the United states and nine other counties in different states, and none in Texas, constitute the nation's ten leading agricultural counties.

No reference is made to Texas counties in report altho McLennan and Ellis Counties of Texas show a greater agricultural production than the California county, according to the 1913 issue of "Industrial Texas" which was compiled by the Association. Texas has also a dozen counties whose annual agricultural production exceeds those listed in the United States Government report. The farm production of Los Angeles County, California is \$14,720,900; Ellis County, Texas is \$15,893,187 and McLennan County, Texas is \$14,821,827.

S. C. Sludar is hauling this week for Kirk & Windsor from which place they are transferring the Lockney Supply Company stock.

Organizing for Mutual Insurance

Plan Has Been Successful a Number of Years.—Cheap Safe Insurance.

The Floyd County Mutual Life Insurance Association with home offices at Floydada, is being organized this week along the lines followed by the county mutual organizations in older settled counties in the eastern part of the state.

W. A. Robbins has been selected as the Secretary-Manager of the mutual aid association, C. Surginer is the president and E. C. Nelson is treasurer.

These with J. B. Bartley and probably one other will constitute the directorate.

Considering the fact that the insurance which will be offered by this association will be very cheap and its plans very simple it is thought that it will be a very simple matter to complete the organization with a membership of a thousand or twelve hundred in the county very easily, especially since, according to our information the by-laws of the association will allow both sexes membership and will give eligibility to persons between the ages of 16 and 60 years of age.

As soon as the necessary details have been completed solicitors will be put into the field actively soliciting members.

Johnston Millinery Have New Location.

The Johnston Millinery have moved from their former location on the east side of the square to an apartment in the rear part of the Price-Foster Dry Goods Co., store where they have their millinery and trimmings artfully displayed.

The Mothers' Club will have a regular meeting at the Public School auditorium tomorrow afternoon.

in the English language, once a
week for three consecutive weeks
immediately preceding said day
of sale, in the Floyd County
Hesperian a newspaper published
in Floyd County.

Witness my hand, this 6th day
of April 1914.

A. C. Goen,
Sheriff Floyd County, Texas.
49-4t.

NOTICE OF FINAL ACCOUNT. No. 148.

THE STATE OF TEXAS.—To
the Sheriff of any Constable, of
Floyd County, GREETING:

E. C. Nelson, Administrator of
the Estate of J. P. Barker, de-
ceased, having filed in our Coun-
ty Court his Final Account of
the Condition of the Estate of
said J. P. Barker, together with
an application to be discharged
from said Administration;
You are hereby commanded that
by publication of this writ for
twenty days in a News Paper
regularly published in the County
of Floyd, you give due notice to
all persons interested in the Ac-
count for Final Settlement of
said Estate to file their objec-
tions thereto, if any, they have
on or before the April Term,
1914, of said County Court, com-
mencing and to be holden at the
Court House of said County in

the town of Floydada, on the 20th
day of April, 1914, when said
Account and Application will be
considered by the said Court.

Witness W. B. Clark, Clerk of
the County Court of Floyd
County,

Given under my hand and seal
of said Court, at my office in
town of Floydada, this 25th day
of March, 1914.

(Seal) W. B. Clark
Co. Clerk, Floyd County Texas.
A true Copy, I certify,
A. C. Goen, Sheriff
Floyd County Texas.
4tc.

Sheriff's Sale.

The State of Texas, }
County of Floyd } By Virtue
of a certain Order of sale issued
out of the Honorable District
Court of Floyd County, on the
31st day of March 1914, by The
Clerk of said Court against R. A.
Stalcup, and E. P. Thompson
and each of them for the sum of
Twenty seven hundred and
eighty one and 24-100 (\$2781.24)
Dollars and costs of suit, in cause
No. 880 in said Court, styled
Annie Stutzenbecker, versus R.
A. Stalcup, and E. P. Thompson,
and each of them and placed in
my hands for service, I, A. C.
Goen, as Sheriff of Floyd County,
Texas, did on the 1st day of
April 1914 levy on certain Real
Estate, situated in Floyd County,
described as follows, to-wit:

Being the South East one
fourth of Survey No. 127, in
Block D, 2, Certificate No. 566,
and known as the Annie Stutzen-
becker place about 15 miles
North West from the town of
Lockney in Floyd County, Texas,
and levied upon as the property
of said E. P. Thompson. And on
Tuesday, the 5th day of May
1914, at the Court House door of
Floyd County, in the town of
Floydada Texas, between the
hours of ten A. M. and four
P. M. I will sell said Real Estate
at public vendue, for cash, to the
highest bidder, as the property
of said E. P. Thompson, by vir-
tue of said levy and said Order
of sale.

And in compliance with law, I
give this notice by publication
in the English language, once
a week for three consecutive
weeks immediately preceding
said day of sale, in the Floyd
County Hesperian a newspaper
published in Floyd County.

WITNESS my hand, this 1st
day of April 1914.

A. C. Goen
Sheriff Floyd County Texas.
42-4t.

Sheriff's Sale.

The State of Texas, }
County of Floyd } By Virtue
of a certain Order of sale issued

out of the Honorable District
Court of Floyd County, on the
31st day of March 1914, by the
Clerk of said Court against D.
J. Muncy for the sum of Three
hundred and twenty five and 82-
100 (\$325.82) Dollars and costs
of suit, in cause No. 886 in said
court, styled C. Snodgrass, J. A.
Callihan, and R. H. Baker, plain-
tiffs, versus D. J. Muncy, and
placed in my hands for service,
I, A. C. Goen as Sheriff of Floyd
County, Texas, did, on the 1st
day of April 1914 levy on certain
Real Estate, situated in Floyd
County, described as follows, to-
wit.

All the right, title and interest
in the estate of J. J. Muncy, de-
ceased, which the said D. J.
Muncy, inherits in the estate of
the said J. J. Muncy, deceased,
by reason of the said D. J.
Muncy, being a son and an heir
at law of the said J. J. Muncy,
deceased, which property is de-
scribed in said mortgage lien
aforesaid as follows to wit: An
undivided 1-7 interest (one sev-
enth interest) in a ½ (one half
interest) in 51 acres of
land out of the C. H. George
survey; and ½ interest in 68 and
3-10 acres of land out of the
Foley Griggs survey and ½ in-
terest in lot's 9 Blk. 39, B. A.
Addition, No 1, in the town of
Lockney, Floyd County Texas,
and ½ of ¼ of Lot No. 10, Blk.
39, B. A. Addition No. 1, situated
in Lockney, Floyd County, Texas,
all of said land located in Floyd
County, Texas, and levied upon
as the property of said D. J.
Muncy. And on Tuesday, the
5th day of May 1914, at the
Court House door of Floyd coun-
ty, in the town of Floydada Tex-
as, between the hours of ten [A.
M. and four P. M., I will sell
said Real Estate at public vendue,
for cash, to the highest bidder,
as the property of said D. J.
Muncy, by virtue of said levy
and said Order of sale.

of April 1914.

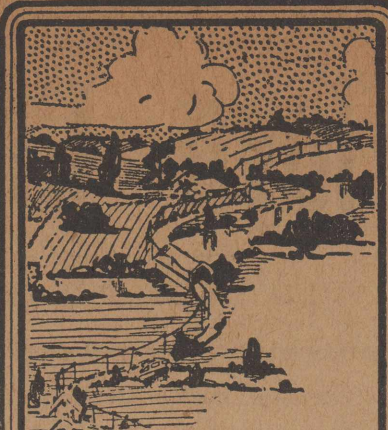

A. C. Goen,
Sheriff Floyd County, Texas
42-4t.

Notice.—Sheriff's Sale.

The State of Texas, County of
Floyd, By Virtue of an Order of
Sale, issued out of the Honorable
District Court of Floyd County,
on 7th day of April, A. D. 1914,
by the Clerk thereof, in the case
of D. J. Muncy versus E. V.
Hartman and I. J. Barrett. No.
878, and to me, as Sheriff, di-
rected and delivered, I will pro-
ceed to sell for cash, within the
hours prescribed by law for
Sheriff's Sales, on the first
Tuesday in May, A. D. 1914, it
being the fifth day of said month,
before the Court House door of
said Floyd County, in the town
of Floydada the following de-
scribed property, to wit:

All that certain tract or parcel
of land situated in Floyd County,
Texas, out of the I. N. Bradley
Homestead donation Survey No.
28, patent No. 481, Vol. 27, be-
ing 28 1 4 acres of land described
as follows, to-wit: Beginning at
a point 950 varas South of the
North East corner of the said I.
N. Bradley survey; Thence West
197 ½ varas for the South East
corner of the tract herein con-
veyed; thence North 572 varas;
for the North East corner of the
tract herein conveyed; thence
West 277 ½ varas for the North
West corner of the tract herein
conveyed; thence South 572 varas
for the South West corner of the
tract herein conveyed; thence
East 277 ½ varas to the place of
beginning, levied on as the prop-
erty of D. J. Muncy to satisfy
a judgment amounting to
\$1,350.00 in favor of E. V. Hart-
man, with interest from date of
judgment until paid at the rate
of ten per cent per annum, and
costs of suit.

Given under my hand, this 8th

Improving Town Place.

Mrs. J. S. W. Owens is im-
proving her lots in the north-
west part of Floydada this week
with a two-room and bath addi-
tion as well as the addition of
porches, which will make the
place an attractive one, after re-
painted and papered. Thurmon
& Willis have the contract.

Good By, M r. Dog.

21 dogs and 2 cats died in
Floydada last Sunday morning,
bidding good bye to things
worldly and speeding to the res-
pective dog and cat happy
abode beyond.

Some of the dogs were good
ones, while others were evident-
ly unknown and unwept when
they last came.

Stray dogs had become a
menace to young calves and to
hogs in this vicinity and a num-
ber of losses resultant from their
raids had been reported.

This wholesale slaughter of
the canine tribe, however, is
supposed to have thinned them
down to a stand.

It is probable that poison was
the means by which the dogs
and cats came to their untimely
end.

A London Baseball Report.

Gazing heavenward, he (the
pitcher) clasped the ball in both
hands to his face as if offering
an invocation. Then he raised
both hands above his head and
springing in the air hurled the
ball with terrific force at the
luckless batsman, who seeming
quite unperturbed and hitting
the ball smartly along the
ground hurled his club away and
dashed for the first base.—From
an account of the Giant-White
Sox Baseball game in London.

Community Co-Operation

Copyright Farm and Ranch-Holland's Magazine

In small towns that are adja-
cent to, or convenient to, large
cities, there is an oft-expressed
impression: "This town will
never be much larger; it is too
close to——City."

In other words, the residents
of the smaller town and its trade
territory make a large per cent
of their purchases in the stores
of the nearby city, which neces-
sarily retards the growth and
development of the home town.

This is an unwarranted condi-
tion, and as people realize more
thoroughly their folly they will
correct it by cooperating more
closely along lines that will tend
to develop and better the com-
munity in which they live. It
is a fact, proven beyond the
points of doubt, that no town is
better than its stores, and it
should not take much argument
to convince sensible, right-think-
ing people that good stores are
dependent upon liberal patron-
age.

I seriously doubt if the average
small-town resident fully appre-
ciates what good, live local mer-
chants mean to him or her per-
sonally and to the community in
general. If they did they would
consider more carefully results
that are sure to come from their
failure to patronize their local
stores.

I once witnessed a manufactur-
er's salesman endeavoring to
sell a small town merchant a
high-grade line of goods. The
merchant admired his samples
very much, but refused to buy on
the ground that the people in
his territory who were able to
buy this class of merchandise
would shop in the stores of a

large city close at hand
though they bought the
brand of goods at identically
same prices he would as
them.

This merchant no doubt
what he was talking about
though it seems a shame to
that such conditions should
allowed to exist. It goes
prove that when an appreci-
number of people send or
away for the better class of m-
chandise with which to sup-
their wants and needs their lo-
merchants will become afraid
carry stocks of high-class, stan-
ard lines.

Of course there are instances
when specific brands of article
desired cannot be found in your
local market, but there are sev-
eral standard, well-advertised
brands of nearly every article in
common use, and it is safe to
say that some one or more of
your local merchants are progres-
sive enough to carry one

brands. It is also reasonable
suppose that when good m-
chants in the smaller towns
come convinced that the peo-
ple in their respective trade terri-
ries will patronize them on the
class of merchandise—provid-
their prices are as low as
quoted elsewhere—that they
not hesitate to carry them
stock. This only goes to prove
that you can be a vital factor in
the improvement of your local
stores, which in turn will great-
ly benefit your community, there-
by making it a more pleasant
well as a more profitable place
which to live.

COULD SCARCELY WALK ABOUT

And For Three Summers Mrs. Vin-
cent Was Unable to Attend to
Any of Her Housework.

Pleasant Hill, N. C.—"I suffered for
three summers," writes Mrs. Walter
Vincent, of this town, "and the third and
last time, was my worst.

I had dreadful nervous headaches and
prostration, and was scarcely able to
walk about. Could not do any of my
housework.

I also had dreadful pains in my back
and sides and when one of those weak,
sinking spells would come on me, I
would have to give up and lie down,
until it wore off.

I was certainly in a dreadful state of
health, when I finally decided to try
Cardui, the woman's tonic, and I firmly

believe I would have died if I hadn't
taken it.

After I began taking Cardui, I was
greatly helped, and all three bottles re-
lieved me entirely.

I fattened up, and grew so much
stronger in three months, I felt like an-
other person altogether."

Cardui is purely vegetable and gentle-
acting. Its ingredients have a mild, tonic
effect, on the womanly constitution.

Cardui makes for increased strength,
improves the appetite, tones up the ner-
vous system, and helps to make pale,
sallow cheeks, fresh and rosy.

Cardui has helped more than a million
weak women, during the past 50 years
It will surely do for you, what it
done for them. Try Cardui today.

Exclusive White Crest Flour Dealers in Floydada.

Floyd County Mutual Life Insurance Association

(A Local Mutual Aid Association)

Home Office, Floydada, Texas

The citizens of Floyd County, recognizing the necessity of protection in the way of insurance, and the fact that the poorest need protection for their families more so than the better favored, and the further fact that charges in the old line companies are practically prohibitory to the class of our citizens needing protection the worst and the further fact that this money needs to remain in our own county, the citizens have gotten together and are organizing the Floyd County Mutual Life Association. This is an organization of local People, for local people and by local people for the purpose of giving insurance to the members at the lowest practical cost consistent with safety.

The directorate of this association will be men of unquestionable integrity, business ability, conservative, and yet progressive, whose business qualifications, are a guarantee of success.

Each member of this organization will be assessed one dollar on the death of any member and an initiation fee in entering to cover the cost of organization, and meet its legitimate expenses. For information call on the officers or solicitors of the company.

C. Surginer, Pres. E. C. Nelson, Treas. W. A. Robbins, Sec'y-Mgr.

West Texas Intelligence

Plainview—So enthusiastic has become the Civic League of this city over the fly swatting crusade which is being waged by a number of cities in this state that it has offered to pay 10 cents for every 100 hundred flies killed or trapped. It is expected that these pests will be exterminated at a rapid rate.

Wichita Falls—The Texas Press Association which was scheduled to meet in this city May 21-23 has changed the date of its convention to June 18 20 instead. The committee in charge of this meeting thinks a better attendance could be had in June.

Abilene—On April 9th the Democrat, a new weekly publication at this place made its initial appearance. The paper contained several pages of interesting reading matter and presented a neat appearance. L. B. Shook is editor.

Big Springs—Mr. George McEntire, owner of the "U" ranch which is located forty miles west of here, and the place selected by the Boy Scouts of Texas to spend their summer vacation, was in this city recently making

preparations for their entertainment. The boys will spend two weeks on the shores of the North Concho River, arriving at the ranch June 3rd. It is expected 400 boy scouts will avail themselves of this opportunity. Dr. L. W. Sackett of the Texas University will accompany the youngsters and will teach them scout-craft subjects. The Commercial Club of this city has made arrangements to have them hauled from here to the ranch house overland in automobiles.

Lubbock—Oklahoma parties appeared before the City Council last week and secured permission to lay gas pipe line in the alleys and streets of this city. This means that work will commence immediately on a gas pipe line into this place from a nearby gas field. A low rate will be accorded all manufacturing enterprises and other heavy users of the product.

Hurley—Farmers in this section have become to realize that there is money in tomatoes and have planted a large acreage to this product this year. They will purchase and operate on a co-operative basis, a canning factory to take care of this and other crops grown by them.

Brownwood—Kansas parties have secured permission to lay

gas pipe line in the streets and alleys of this city and natural gas has been promised for Brownwood homes within six months. The line will be constructed from the Bangs field which is located twelve miles from here. Plans are about complete for the work.

Wichita Falls, Tex. April—All except 10 per cent of last year's Texas wheat crop has been marketed, and only 1,360,000 bushels remained on the Texas farms on March 1st, according to statistics of the United States Department of Agriculture, which were revealed here today. Interior mills and elevators of Texas are holding approximately 2,320,000 bushels, while last year's stock reports showed only 1,764,000 bushels on hand at this date.

The price per bushel to consumers on March 1st was 90 cents and was the lowest quotation on this date in several years. On March 1st, 1913 the Texas product netted the growers 93 cents and \$1.04 per bushel has been the average for the past five year period.

Ford Production and Demand.

Detroit Mich.—Going up. Production figures the Ford factory at Highland Park, Mich. are shattering all records. Eleven hundred and more cars a day for twenty-six consecutive working days was the record. On March 31st, there had been twenty eight thousand seven hundred twelve Fords built and shipped during this month of thirty-one days of which five were Sundays.

Those who have been following motor car production have become accustomed to think of the Highland Park factory as the place where more than one thousand complete automobiles are turned out every day.

These will now have to accustom themselves to the new slogan of "More than eleven hundred Fords a day."

When these figures are being digested it should be kept in mind that every car as soon as built, is shipped to a waiting Ford agent. There is no storage room at the factory for there isn't any needed. The Ford factory, big as it is, has its hands full to build enough cars to supply the demand.

The fact is, that despite the unprecedented production during March, the close of the month saw the factory still many thousands of cars behind the sales department. An idea of the demand for Fords may be obtained when it is stated that on a single day early in April, the factory received orders for more than twelve thousand cars.

Those familiar with the Ford business are predicting that the demand for Ford this year, as in years past, will greatly exceed the supply. They are urging those who contemplate purchasing, to do so early and thus insure themselves of having a car during the summer months

when the demand is heaviest.

And there will be no let up during April. All indications point to this being even a larger month in the way of production than was March.

Reports from the Ford factories at Ford, Ont., and Manchester, England show that the business of these two companies is proportionately as brisk as that of the American company.

What Astonished Legal Expert.
"The Declaration of Independence is a wonderful document," said the patriotic citizen. "Yes," replied the legal expert. "It's one of the ablest documents I ever saw. And the most remarkable thing is that with all the ability it represents, nobody appears to have received a cent for drawing it up."

Brute!
Damocles saw the suspended sword. "I always take notice when my wife does her hair a new way," he observed.

Reasonable Explanation.
A magazine writer says poets are declining, but the publishers set the example.—Norfolk (Va.) Pilot.

May Do Good Work Unknowingly.
Chemists show us that strange property, catalysis, which enables a substance while unaffected itself to incite to union elements around it. So a host or hostess who may know but little of those concerned may, as a social switchboard, bring together the halves of pairs of scissors, men who become lifelong friends, men and women who marry and are happy husbands and wives.

Not Always Perhaps.
In the long run it is with a profusion as with marriage; we cease to mark anything but its drawbacks. Valerius Maximus.

Improve upon but never copy others' advertising."

"Newspaper space costs money, but it's a wise investment."

"Originality is the life of advertising."

"Attract attention and leave an argument with your advertising matter."

"Beautiful language and flowery descriptions don't sell goods. It's plain statements of facts which counts."

"No matter what you pay for your advertising, if it brings the desired results, it's cheap."

"The slogan of the successful business man of today is 'Advertise.'"

"As ye advertise, so shall ye be known."

"Advertising is the door to success. Originality and aggressiveness unlock the door."

"The more advertising, the more business; the more business, the more profit. That's what you're after."

"He's a splendid advertiser, is a mighty good reputation."

Pat Dunn County Done Away With.

San Antonio, Tex. April—According to a ruling recently handed down by W. S. Fly, Chief Justice of the Fourth Court of Civil Appeals the act of the Thirty-third Legislature in creating Pat Dunn County was annulled and that county declared out of existence. This county was carved from Duval County and according to the Judge's decision, was lacking in about 70 feet of being 12 miles from San Diego, the County seat of Duval County.

Trades Day

Second Monday last week was a brisk trades' day in spite of the fact that this is the very busiest season of the farmers' year. Large crowds were in town all day, many of them selling poultry at the Marshal Grain

House while others traded in live stock.

Merchants' sales are reported by some as especially good, all report fairly good trade.

Some good milk cows fresh, for sale. See C. C. West, 15 miles Southeast of Floydada, Texas. 4tp.

Increase Storage Capacity.

The Magnolia Petroleum Company has submitted plans for bids on the erection of an additional storage tank platform to accommodate an increasing business in distillate.

The large number of engines, both stationary and tractor, which are using this grade of gas necessitates this move on the part of this company.

City Building Notes.

By L. M. Ward, President Fort Worth Texas Commercial Executives Association.

Many a good thing has been ruptured by too early publicity.

Modern city building is founded on ideals backed up by success.

The four leaves of Luck's clover are, Boost and Build, Courage and Will.

Don't ever get dishearted, your city can do anything any other city can do.

Cities may grow, though poorly planned, if possessing real live city builders.

A city's destiny depends largely upon the efficiency of its commercial organization.

Our humblest citizens have begun to realize that co operation is the road to success and prosperity.

City building implies two things—First, an organized community spirit; Second, the cultivation of civic foresight.

City building is a name given to the science and the art of providing for the most practical and agreeable development of a town or city.

Whites 16; Cullud Folks 3.

The first ball game of its kind ever played in Floydada was witnessed last Monday afternoon by a large crowd at the ball grounds, between the local baseball team and Eliers' Minstrels, the latter team being composed mainly of "Cullud" gentlemen. The home boys walloped them in good style to the utmost satisfaction of all the onlookers.

The final score at the end of the sixth inning was 16 to 3.

Troy Cooper and Sam Baird were batteries for the local team. Their work and the work of all the team, especially in the batting line was well-pleasing and appearances now are that Floydada for once has a team of players that can play the winning variety of ball.

DECREASING IN EFFICIENCY?

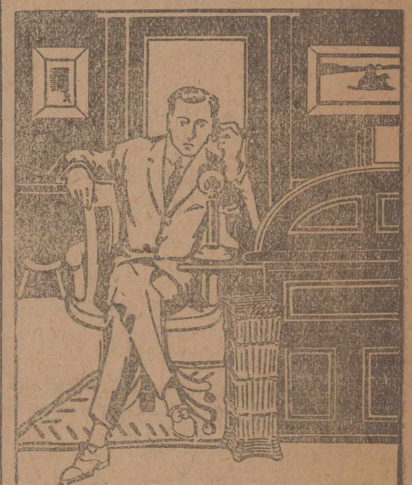

In the opinion of several heads of higher institutions of learning in the State, the graduate of the average high school in Texas today is not so well prepared to take advantage of a college education as was the graduate of the average high school in Texas fifteen years ago.

Professor Thomas Fletcher, who inspects for the University of Texas, has concluded, after interviewing the heads of various colleges and universities in Texas, that the training given in a great number of high schools in the State has deteriorated in the last fifteen years. In speaking of the causes of this deterioration, Prof. Fletcher says that the chief reason is the over-expansion of the high school programs of study, resulting in the overtaxing of both teachers and students. With a view to correcting this evil, the questions arise of how many classes a teacher can teach with a maximum of efficiency under given conditions, and how many recitations a day can the average high school student attend with profit? The practice in sixteen high schools in Texas was examined and it was found that eight of them require students to carry four subjects at a time.

The Springfield (Mass.) High School requires a minimum of three recitations per day; the St. Louis High School, four; the New York High Schools, the same. The Iowa Board of Education requires of its accredited list of schools that not more than four recitations be allowed per day. In short, the overwhelming verdict of pedagogical authority in the United States would limit the number of recitations per day per pupil to four. The trend is toward a less number.

Now, let us see what the practice is in this regard in 143 high schools of the rank and file in Texas. In thirty-eight of these schools pupils recite four times a day; in ninety, five times a day; in fifteen, six or more times a day; so, in the large majority of the ordinary high schools of the State the practice is against the great weight of reliable authority—the practice of over-burdening the pupils with work.

Wood Alcohol!

Much has been written in recent years regarding the almost criminal ignorance of the general public in the use of wood alcohol, and its injurious effect not only on eyesight, but on life itself. The importance of adequate protection of the public in this regard is emphasized by a recent tragedy in New York City. Three women died and two were made dangerously ill from drinking home made wine at a wedding feast. The wine was made by the bridegroom and was drunk by the two hundred guests present. The recipe for the beverage, the police say, was sugar, water, alcohol and a red and green coloring matter. It was first thought that the

women were suffering from ptomaine poison, but the coroner's physician pronounced death to be due to alcohol poisoning, and the police declared that the wine was made with wood alcohol. This dangerous poison often kills and even when the life of the victim is spared, he is generally blinded for the rest of his life.

Says the Old Grouch.
It's the people who have no children who like to write poems about 'em.

Height Standard of Austro-Hungary.

The new recruiting law of the Austro-Hungarian forces stipulates a height of at least 5 feet for men to be enlisted in the ordinary rank and file of the territorial forces or of the navy, while for those men who will work in the workshops or arsenals or in the offices as clerk, the minimum height will be 1 inch less than 5 feet. Furthermore, the new requirements pay increased attention to the antecedents of the men, especially the mental history, and a history of previous epileptic attacks or mental instability will make the man ineligible for the service. In the last year, when, owing to the uncertainty of the political situation, preparations for war included the recruiting of large numbers of men from apparently underfed districts, it was noted that persons otherwise quite healthy did not reach the height limit. These would be lost if the old law should continue in force. At any rate, says the Vienna correspondent of The Journal of the American Medical Association, even with the new law, the supply of men capable for service is but sparingly drawn on, not even 1 per cent of the population of fifty million being under arms in time of peace, while for war about 4 per cent are available.

F. P. A. Committee Report May 18.

The Dallas Presbytery of the Southern Presbyterian Church at Lancaster, was attended last week by E. C. Henry, of Floydada, who presented to the body in session the memorial from the people of Floydada, relative to the continuance of the school at Floydada as a college.

A committee was appointed by the Presbytery, to inquire into the conditions and return a report on the matter with the presbytery May 18th.

Mr. Henry returned home Friday. He is inclined to be optimistic as to the final outcome of the report of the committee.

The general opinion prevails among the inner circles in Floydada that the outcome will not be disappointing to the people of this section.

The committee will probably visit Floydada during their consideration of the matter of continuing the school, but until their report is filed and the Presbytery finally passes on the matter no further definite knowledge will probably be forth coming.

The Panhandle Press Association

The Panhandle Press Association held a meeting at Amarillo last Saturday, which was marked by the largest attendance in the history of the organization.

Most of the south plains towns were represented by one or more newspapermen. Homer Steen was present from Floydada going up Friday and returning home Sunday afternoon.

The manner in which Amarillo entertained the upward of 40 members present was most commendable and the occasion was thoroughly enjoyed throughout.

The next meeting will be held in Plainview. Hilton R. Greer, managing editor of the Daily News, Amarillo, was elected president for the ensuing year; Homer Steen, of Floydada, vice president; Miss Ida M. Farrell, of the Glazier Review, Secretary-treasurer; and Mrs. R. W. Morgan, of Amarillo, historian.

Overheard in Washington.
Wives of great men remind us of it pretty often—Woman's Home Companion.

Wheat Good

Wheat in Floyd County is exceptionally good for this time of the year. In fact, conditions are flattering for the largest wheat production in the history of the county.

The largest single wheat grower in the county is George Probasco, of northeast of town. Mr. Probasco has 500 acres. It has been worth several hundred dollars to him as grazing land during the winter season, and he, in common with other wheat growers anticipate the largest per acre production of the past several years.

World's Languages and Dialects.
There are 3,424 languages and dialects in use in the entire world.

U. S. Express Company is Retiring.

Fort Worth, Tex. Apr.—President D. I. Roberts of the United States Express Company, in a recent interview, announced that his company is gradually making arrangements to cease operations and when the time comes it will withdraw from the field. Mr. Roberts said, in part: "Efforts towards dissolution, so far, have been confined to notifying the different railroads that our contracts will be surrendered. The company is making no effort to induce other express companies to take over our agreements and will simply stop doing business at the appointed time."

The United States Express Company was organized in 1854 and its withdrawal from the express field means that 15,000 employees will be dismissed. These men draw \$8,180,000 in salaries and wages annually. More than 3000 of these men are in Texas and their yearly pay roll amounts to \$94,550. The company operates over 1,203 miles of Texas railroad and their Texas earnings amount to a quarter of a million dollars per annum.

\$18,000 Estimate Hogs Shipped

14 Carloads Shipped from Floydada Station Since Jan. 1st — 26 Cars in 1913.

The value of the hogs shipped from Floydada during 1913 is placed at \$30,000. 26 carloads were shipped, most of them to the Fort Worth market, and valued at from \$1200 to \$1500 per car.

1914 starts out in a fair way to beat the 1913 record very much. Fourteen cars have been shipped to date since January 1st. Several more cars are to be shipped, within April and the earlier part of May.

These facts are a part of the explanation of the fact that Floyd County people have money to spend the year round rather than just during the fall or cotton and wheat months. Fourteen carloads of hogs means \$18,000. They represent a large profit on forage feed made through marketing it on the 'hoof.'

The value of the hog industry in Floyd County is fast becoming recognized, as evidenced by the above figures. Hog cholera is unknown here. Milo and kaffir for fattening are certain crops year by year. Preparations can be made to fatten hogs with a certainty of calculation almost infallible.

These things, together with a stable market, are making Floyd County a hog producing county. They mean money and plenty of it. The prosperity derived from hog production is stable prosperity.

The Youth's Companion says: "In 44 leading colleges and universities of the United States there are this year 2,084 foreign students. China sends more than any other country, 438. Of the rest, 327 are from Canada, 263 from Japan, 102 from India, 88 each from England and Mexico, 57 from Brazil, 53 from Turkey, 42 from Russia, 32 from Argentina, 25 each from France and Norway, 23 from South Africa, and the rest from almost

half a hundred countries and islands. Columbia has the most foreign students, 183, but Pennsylvania, Cornell, California, Michigan, Chicago, Harvard, Illinois, Northwestern and the Massachusetts Institute of Technology have 100 or more each."

Another Truism.
Nobody loves to do a fat man's wash.

Not Hard to Deceive Moslems.
Times have changed since Captain Burton, 60 years ago, made a pilgrimage to Mecca at the peril of his life. A recent account of such a pilgrimage, by A. J. B. Wavell, says that with a passable knowledge of Arabic and of Moslem ceremonial, and with due precautions as to avoiding pilgrims from the country to which one pretends to belong, "the pilgrimage to Mecca may be made in disguise without running any risk worth mentioning."

It is said that there are 84,766,077 people in the United States over 10 years of age who are outside the membership of any church. This is an appalling fact and serves to emphasize the opportunity and responsibility of church members.

THE STORE OF HIGH QUALITY & LOW PRICE

STOCK MARKET

Kansas City Stock Yards, Apr. 13th, 1914. Small cattle receipts at all points last week, particularly Kansas City, did not permit of any dissembling on the part of cattle buyers, and there was a general advance here of 15 to 25 cents. Stock cattle sold with the full advance, and the yards were closely cleaned up at the end of the week, and the advance embraced bulls and veal calves, which have heretofore, been weak spots in the market. Receipts today are 11000 head, and steers are selling steady to 10 lower, cows and heifers steady, and thin grades strong. The bulk of the supply today is from nearby territory, and the scarcity of finished cattle in native territory is emphasized by the fact that Colorado beet pulp cattle sold at the top to-day, \$8.65. Nothing in native steers worth above 8.75, arrived last week, although yearling steers and heifers brought \$9, and straight heifers 8.75. Bulk of the short fed native sold at 7.75 to 8.50, native cows 6.00 to 7.50, bulls 5.50 to \$7, veal calves up to 10.50. Pulp and alfalfa steers from Colorado sold at 7.70 to 8.65 today. Quarantine receipts consisted of South Texas cake fed steers at 6.80 to 7.50, Louisiana fed steers at 6.50 to 7.05, and some low class mixed stock from Arkansas and Oklahoma, 20 cars in all. Good meal fed Oklahoma sold at 8.10 last week. From the urgency of the demand for stock cattle, owners of grass are preparing to take good care of it. Stock steers sell at \$7 to 8.25, feeders stop at 7.85. Many Kansas pastures remain empty, and quite a number of cattle were bought here last week for them by men who formerly got their spring cattle from Texas. Hog markets began to advance after Tuesday last week, and they are higher again today, top 8.80, bulk 8.55

to 8.75. Receipts are moderate, 6500 here today, and killers need material. Order buyers are taking a good share of the hogs, and Dold will begin shipping to Buffalo from here this week. When the Government and the Stock Yards Companies get settled down to handling immunized hogs on an absolutely safe basis plans are under way for the establishment of big hog feeding plants in the vicinity of Kansas City, which will make a better market for all classes of hogs at this point. Sheep and lambs are 15 to 25 higher today, following irregular markets last week, but which were satisfactory to sellers. Colorado woolled lambs sold largely at 8.30 to 8.40 today, medium lambs around \$8, clipped lambs 6.75 to 7.25, best wethers worth 6.75, ewes, 6.50, yearlings 7.50 Texas wethers worth \$6 to 6.75, ewes 5.50 to 6.25, spring lambs 8.60, goats to killers \$4 to \$4.50, brusher goats 3.50 to 4. Receipts today 12000 head.

J. A. RICKART,
Market Correspondent.

Constructives Can't Agree

Fort Worth, Texas, Apr. 14.—The conference of conservatives was called off at noon today on the ground that the conflict of personal ambitions had prevented a large enough representation.

Ferguson supporters met and adopted resolutions condemning any method of pledging the people to a candidate other than by the ballots of the July primary. It is reported the strength gathered here for the meeting will be divided between Ball and Ferguson. Some made an effort to have Judge Poindexter, who was in the city, announce, but he declined.

UNIVERSITY HOME AND SCHOOL LEAGUE

A New Movement for Improving Country Life.

How can we make living in the country more satisfactory and enjoyable to boys and girls? How can we check the

Prof. F. M. Bralley

drift of our best blood to the cities? What can the University of Texas do to promote community life and really help the 75 per cent of the population of Texas who make their living on the farm?

These are some of the big questions that Professor F. M. Bralley, formerly Superintendent of Public Instruction and now at the head of the Extension Department of the University of Texas, attempts to answer in Bulletin No. 322, which is sent free to all who apply for it. This bulletin contains the purposes and plans of the University Home and School League which Professor Bralley hopes to see organized in every country community in Texas. Through this organization it is his belief that great good can come to country folks.

THE COUNTRY SCHOOLS OF FISHER COUNTY

A County That Is Building Modern School Houses.

People are reflected, to a large extent, by the character of houses in which they live. Although good school houses do not of themselves make institutions where knowledge abounds or wisdom reigns, what people think of the value of schools is indicated by the kind of school houses they have built.

Naturally, we should expect the counties of East Texas where timber grows, or the counties of Central Texas where wealth abounds, to take the lead in the construction of modern and comfortable school buildings. However, a thinly populated county, situated near the foot of the plains where the velocity of western winds has never yet been measured by an anemometer and where the coyotes still sing their lonesome songs in the presence of chickens, preachers and farmers, can teach the other counties of our commonwealth how to provide school houses that do not harbor the germs of human diseases. Here is the record of Fisher County during the past four years: Twenty-six country districts out of a total of forty-two have voted bonds for the erection of school houses. Twenty-four of these buildings are modern, constructed according to the plans furnished and recommended by the Department of Extension of the University of Texas. Nineteen of these buildings have approved systems of heating which provide for the intake of fresh air and the outgo of foul air. Practically all have provided auditoriums for social service.

It is said that the average mind can neither discern nor digest the littleness of the magnitude of statistics. But the statistics of Fisher County's progress are so one-sided that even mental aptitude is not required to grasp them. There are forty-two country districts. All levy a local tax. No district levies less than twenty cents. The average tax for the several districts is thirty-three cents, and many districts levy the maximum of fifty cents. Every school in the county has "patent" desks.

HARDWARE

I HAVE IT

LEATHER GOODS

I HAVE IT

FURNITURE

I HAVE IT

My stock of hardware is more complete today than ever before. I would appreciate an estimate on your bill, be it large or small.

If in need of anything in the way of harness, collars, lines, bridles, etc., I have it and my prices are always right.

I am continually adding to my small stock of furniture, and when you want a bed-stead, mattress, springs, dresser, chiffonier, matting, linoleum, etc., don't forget to give me a call.

Burn Your Tin Cans

Who would ever have thought of using tin cans for fuel as an effectual way of getting rid of them, as well as receptacles made of the same material? Yet somebody did think of it, tried it and found it to be fact and a good thing to know—he or she did not keep it to himself or herself, as is often the case, when a good thing is found, but let it become known, and finally made public by means of the newspapers.

One evening last week an article in a paper, telling about burning tin cans as a means of disposing of them caught the eye of the writer, but he had doubts of the correctness of the statements made, and he resolved to give it a trial next day, and he did and was surprised to find that it worked all right, and his premises will not be filled with these repugnant articles.

Others may try this method of disposing of useless things made of tin, the article which the writer read is here reprinted, as follows:

Did you know that tin cans can be burned in your cook stove, heating stove or grate? They make a splendid fire and you can thus destroy all tin cans that accumulate at your home.

This may be almost startling news to our readers, but it is a fact. Not only can they be destroyed, but they also make a fine heat. All that is necessary to do in order to make them burn properly is to fill each can with small pieces of coal or slack, and they should be well filled. They will, of course, burn more readily if they are placed in a stove or grate where there is a good fire burning—the cans quickly become red hot and burn to ashes.

This fact should be given wide publicity, as it is a blessing from a sanitary point of view. Generally, after a can of corn, tomatoes, fruit meat—or any other of the almost countless things that are put up in cans—is opened and emptied, the can is thrown into the back yard or alley, or some other place, where it breeds flies and other insect pests.

They may become partly filled with water, and thus become not only a germinating place for mosquitos, but also for the germs of typhoid, meningitis, scarlet fever, malaria and a great many other diseases that are contagious or may become epidemic.

Another thing in connection with the burning of tin cans is the fact that the burning of tin or zinc in a stove will keep the stovepipe and the chimney practically free of soot, and thus lessen the danger of fire. One of the greatest disadvantages of burning soft coal is this accumulation of soot, and this easy way of getting rid of it and the tin cans should be appreciated by all.—Ex.

District Deputy Visits

Eastern Star

Mrs. Rebecca Robinson, of Lubbock, district deputy of the Order of the Eastern Star, visited the local Chapter Monday evening last, her visit being one on a trip over the district paying an official call to the chapters of the South plains.

Mrs. Robinson stated that she found the Floydada Chapter in

good condition and in good working order.

Honoring her visit a light luncheon was served in the early evening by the membership.

Eggs Worth \$200,000,000 Wasted

Washington, D. C., April 10.—Two hundred million dollars worth of eggs are wasted every year. This is the startling statement of the Department of Agriculture today after an examination in this particular phase of the high cost of living.

Of this vast amount fifty million is attributed to needless breakage in the transportation, and the remainder to bad handling which causes addling, spoiling, and deterioration.

Two hundred million dollars worth of eggs practically thrown away every year—or less fit, only for strong palates, tanning, or to swell the unpleasant monuments of American waste—the garbage heaps.

Uncle Sam is doing his level best just now to teach the people how to secure more and better eggs, and how to properly pack, grade and handle them. The first task is undertaken through the bureau of animal industry, the second through the demonstration cars sent to the vast corn belt. Uncle Sam has decided that cold and cleanliness are the best and most practical means of preserving eggs. Likewise, he is putting in a boost for the little gray hen. He says, "use her right, feed her right, and she will repay."

Soudan Grass.

J. L. Norris and Will McGehee will experiment with soudan grass on their farms near Lockney this year. Mr. Norris will have 20 acres and Mr. McGehee 3 1/2 acres.

Building New Home.

J. L. Norris began Monday the erection of a new house on his farm two miles from Lockney. Mr. Norris bought the Huff quarter section last fall, and these late improvements will give him one of the best improved quarters in that section. His son-in-law, O. R. McCollum, will move on the place the first of May and farm it this year.—Lockney Beacon

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarth. Hall's Catarth Cure is the only positive cure now known to the medical fraternity. Catarth being a constitutional disease, requires a constitutional treatment. Hall's Catarth Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

Better Seed.

Many complaints of mixed seed in Floyd County were made last year at planting time and in all probability the same condition will prevail among the farmers of Floyd County this spring.

Mixed kaffir and maize deteriorates from the standard of superiority of either of the unmixed plants and when so mixed are said to deteriorate in to very inferior forage crop.

To the farmer who has the pure, unmixed seed of either variety preferably maize this news should serve as a tip that he has a mint in the making provided he preserves the unmixed strain of seed.

The question of first class, unmixed varieties of the great forage crops of the plains will be a serious one in a few short years if the farmers continue their mixing as has been the rule heretofore, and the sale of high grade seeds of these varieties will be a studied occupation the same as the propagation of cotton seed nowadays.

Bob Comax is visiting in Floyd from Plain-

Young Farmer Died

of Pneumonia

S. P. Dunn, who lived in the south part of this county, died Monday morning last of pneumonia after a short illness. His condition became serious Friday last and his father, W. M. Dunn, and brother, Dave Dunn, of Bridgeport, and Mrs. Dunn's mother, Mrs. Barnett, of Bridgeport, were notified. They arrived here Sunday.

Tuesday morning the remains were shipped to the family burying grounds at Bridgeport for interment.

Mr. Dunn was only a young man being 23 at the time of his death. He was an energetic farmer and an excellent young man. He was a nephew of S. C. Splawn of this city.

He leaves a young wife to mourn his untimely death, and a number of sorrowing friends in the community in which he lived.

Doubling Human Life.

In 1866 the public health conditions of New York were in so low a state that the average length of life of the inhabitants was 30 years. In 1912 these conditions had been improved so that the average length of life was 66 years. Thus the value of human life, reckoned in terms of time alone, had more than doubled in less than half a century.—Century Magazine.

Returns From the Southwest.

Sheriff A. C. Goen returned Monday afternoon last from the southwest, where he went on official business some few days prior. While away he visited Pecos, El Paso, and the camp close by where the Mexican soldier refugees are held by the American troops. He likewise crossed the Rio Grande into Juarez.

He says that Villa (pronounced Ve-a on the Rio Grande) is a hero in the southwest and the people of that section are loud in his praise. Villa is erecting a \$100,000 mansion in the city of Chihuahua, keeps his soldiers well-fed and well-paid, which goes to prove that he is a financier as well as a fighter.

In the Library.

I never come into a library (saith Heinsius) but I bolt the door to me, excluding lust, ambition, avarice and all such vices whose nurse is idleness, the mother of ignorance and melancholy herself; and in the very lap of eternity, among so many divine souls, I take my seat with so lofty a spirit and sweet content that I play all our great ones and rich men that know not their happiness.—Robert Burton.

A. A. Dunagan will return to his work in Floydada about Tuesday or Wednesday next. See him at McCarty's drug store for jewelry repairing. 1tc.

Farmers' Institute Plans.

The District Farmers' Institute of the Panhandle is planned to be held in Amarillo during the latter part of this summer. It will include a short course in agriculture for farmers and will likewise have a course in Domestic Science.

Each county Institute is entitled to delegates to the District Meet with transportation paid.

Plans for making the occasion a complete success include the use of A. & M. equipment as well as experts from the Agricultural Department of the state and experts from A. & M. College and experts from the Rock Island, Fort Worth and Denver and Santa Fe roads and their large demonstration equipments.

Judge A. B. Duncan and daughters, Miss Mattie, Mrs. Hollums and Mrs. Pitts, attended the Joint Debate in Lockney last Friday.

Worth a Strike.

It seems about time for social leaders to rise in their might and demand an eight-hour night.

J. W. McCarty spent the latter part of last week in Plainview as umpire in the fire adjustment of the J. W. Willis Drug Store, which was damaged in a recent fire.

THE ADS IN THE SPERIAN

Diagnosing Disease In Patients 1500 Years Old.

This is an age of specialism. Some doctors limit their practice to babies, some to old persons, some to a single class of disease. Only recently has any doctor attempted to specialize on the diseases of mummies. In a recent issue of The Journal of the American Medical Association appears an interesting account of the work of Dr. Ruffer in the examination of a large number of recently-discovered mummies in Egypt. The conditions of custom and climate which have preserved the mummies of old Egypt make it possible to compare the defects produced by disease with the manifestations of diseases of the present day. Such investigations have already unfolded many facts of interest in respect to the existence of disease in bygone times, and have contributed important facts to the history of medicine.

The perfect preservation of many of the bodies which have become available in Egypt is remarkable. The peculiarities of real mummies are widely known. Coptic bodies which have recently been examined by Ruffer belong to a somewhat different class. They came from Antioch in Upper Egypt; and dated from the fifth to sixth century. They were therefore from about 1,400 to 1,500 years old. They had undergone no artificial process except that, at one time, they had been covered with salt. The real preventative had been the dry Egyptian sand in which they had originally been buried enclosed in wooden coffins. Never having been disturbed by the embalmer, the organs were all in position, and the bodies contained no resin, gum or any materials such as mud, sand, rags and etc., generally used in old Egypt for packing the body after removal of the organs. In our environment, where special precautions are necessary to preserve the body from decay, it is surprising to hear of microscopic sections from these bodies made fifteen hundred years after death show the minute structures of the glands in a remarkable fine state of preservation or to learn that the lobes of the brain and some of the convolutions were recognizable and that the fibers and values of the heart could be made out. Ruffer points out the occurrence of tubercular disease of the spine among ancient Copts as one more proof that the disease has existed from the remotest times and is independent of climate. It has been found in bodies buried close to the Mediterranean shores, in bodies from Upper Egypt and Nubia, and even in a skeleton buried in the tropics at Marawi, one of the hottest and driest places in the world. Judging from two cases of enlarged spleen which were found in Coptic bodies, Ruffer ventures the suggestion that these people suffered from malaria.

Pyorrhea appears to be as old as the human race. Evidence of such disease has been found in prehistoric skulls and in the specimens from almost all nationalities. Ruffer has found nothing to suggest that the Copts knew anything about dentistry. The long-recognized bad state of the teeth of ancient Egyptians is again emphasized in the Coptic bodies. Almost every skull has some serious dental defect. It is suggested that this may perhaps be accounted for by the fact that very little care of the teeth appears to have been taken. The thick incrustations of tartar are sufficient evidence that the Copts did not clean their teeth at all. In many peoples and animals the absence of the tooth-brush is compensated for by the fact that the food is hard, fibrous and raw, requiring a good deal of chewing, which mechanically cleans the teeth. In ancient Coptic times this does not appear to have been the case. Ruffer

concludes that the Copts of Antioch lived chiefly on cooked soft food, chewed without effort. Decay of the teeth was extremely common and was possibly due to the nature of the food consumed.

Gunmen Must Die.

Albany, N. Y., April 7.—Governor Glynn tonight refused to commute the death sentence of the four gunmen convicted of slaying Herman Rosenthal, the New York gambler or to grant them a reprieve until after the second trial of former police lieutenant, Charles Becker.

They must die by electrocution some time next week probably Monday. The exact date will be fixed by the warden of Sing Sing. The men are Frank Circicci, "Dago Frank," Harry Horowitz, "Gyp, the Blood," Louis Rosenberg, "Lefy Louie," and Jacob Seidenshner, "Whitey Louie."

Liquidating Agent for Amarillo Bank.

Austin, Tex., April 7.—J. C. Roots of Ballinger, Runnels County was today appointed by Commissioner of Insurance and Banking Collier as Special Agent to Liquidate the affairs of the First State Bank of Amarillo. Mr. Roots is here today and left tonight for Amarillo to take charge of the bank.

This bank was ordered closed a few days ago by the Commissioner.

Feterita; A New Forage Plant.

Within the last year or so the United States Department of Agriculture has brought into favor a new forage plant that is of great value as a grain producer, especially in the dryer sections of the country. This plant is known as feterita and in many respects resembles kaffir and milo; the heads are white, stand upright, and are shaped like milo heads, but the grains are larger and softer than milo or kaffir. Like milo, the stalks have a tendency to sucker and to grow new heads after the main head has ripened or has been cut. The forage is sweeter and juicier than milo and equals that of kaffir.

Feterita can be grown upon almost any soil that will produce the other grain sorghums and in feeding value is fully equal to them. It is planted and handled in the same way that kaffir or milo is cultivated.

The soil upon which it is planted should be broken in the fall or winter, or early enough in the spring to become firm. It may be planted with a corn planter or in the same way that such other grains are planted. The rows should be about the same width as for corn. In the dryer sections the plants should be from eighteen to twenty-four inches apart in the drill. In those sections having a larger amount of rain the distance can be reduced to ten or twelve inches. Where greater spacing is practiced, it will take about two pounds of seed to plant an acre; if planted more closely, about three pounds will be required.

Cultivation should begin as soon as the feterita shows above ground, and should be similar to the cultivation given to corn. When the plant has come up a smoothing harrow run diagonally across the rows will be of much benefit. Feterita does not require quite as much cultivation as corn, but it well repays good treatment.

Harvesting can be done with a row binder or with a header, although much of it is harvested by hand. The grain will absorb moisture from the air, and is apt to heat when first harvested if placed in piles, and for that reason when the heads are to be stored, it is advisable to place them upon alternate layers of straw. By making the necessary adjustments an ordinary

thresher may be used in threshing feterita, but if threshed and stored, care should be taken to prevent heating. A convenient way is to place burlap sacks half filled with straw between every four or five inches of the threshed grain.

Feterita stalks are rich in food value, and this makes the crop an excellent one for ensilage or forage. When grown for forage purposes, it can be left from four to five inches in the row and the rows can be somewhat closer together. When planted in this way upon good ground, it yields better than either kaffir or milo. It is especially valuable for forage purposes in the dryer sections of the State.—Bulletin No. 3, Texas Industrial Congress.

Pierce-Fordyce Establish Local Station.

The Pierce-Fordyce Oil Association have established a local agency in Floydada with Mr. John H. Reagan, and will have a complete line of their products on sale at an early date in this town. Their stoves, turpentine, coal oil, gas, oils and greases will be among the products Mr. Reagan will always have on hand.

Mr. Reagan has the building next door to the McandY Theatre for the purpose of handling this business.

He intends to be thoroughly prepared for the business at an early date, and will keep a good line of the company's products.

City Election at Lockney

In Lockney's City Election Tuesday of last week a new Mayor, council and marshal were chosen.

S. A. Henry, son of Judge F. P. Henry was chosen for mayor and G. W. Ford, T. B. Hill, Carl McAdams, G. T. Wade and E. E. Dyer are the new councilmen. James Turney is marshal.

The PATH of SAFETY
 in the slushy season is not of your own making. The ability of your tires to grip the slippery pavement governs the course of your car. It's straight as a "bee line" if you have **GOODRICH Safety Tread Tires**—the tire that side-swipes the slime and gets down to the bedrock of the road. It pushes the ooze out of the way and makes a clean path for its fingers to grip—and then at the critical point in the skid game, it **holds** for dear life.

We are selling and recommending these tires along with a line of other equally good auto accessories and repair materials. Come and see us or call us by phone for anything you need.

Church Notes

Rev. G. W. Shearer left Tuesday for Westbrook near Sweetwater, where he is conducting a meeting which continues for 10 days.

Methodist Announcement.

Prof. W. M. Pearce, of Seth Ward College, will occupy the Methodist pulpit next Sunday both morning and evening.

Stewards will meet April 28th when conference will be held instead of April 20th, the regular meeting night.

Geo. W. Shearer.

Rev. G. W. Tubbs filled his appointment at Cone last Sunday, with the Baptist Church at that place.

The Missionary Society met at the regular hour of 3 p. m., Monday afternoon with few present, but a good meeting and program, as follows:

Scripture lessons, read by Mrs. Robbins.

Year's work at Grandbury, Brazil, by Sister Smith.

A beautiful life, by Mrs. West. Next Monday is the Mission Study evening,—the second chapter in "The King's Business." Let every member of the society come, and let's get some good from the lesson. If you haven't a book and desire one we have several extras.

From Manu Lands.

On the basis of a late census, it is stated that 95 per cent of the children of school age in Japan are attending their educational institutions which are up-to-date in every respect. And not only is there a widespread popular educational movement, but also it extends directly along religious lines. For instance we are told that 10,000 Japanese students are now making definite preparation for the Buddhist priesthood.

Ten thousand foreign missionaries are needed in China, if there is to be one for every 25,000 of the population.

"Rooster" Foster, an old landmark in the dog history of Floyd County, was a victim Wednesday of the wholesale slaughter of dogs that has been in progress since Sunday.

Somewhere, somehow, "Rooster" who is upward of nine years old and a pug, got hold of the tainted food and very soon after it was learned he was sick he expired.

"Rooster" belonged to J. J. Foster, an avowed personal friend to his master was "Rooster."

Many other dogs classed among the "good" and valuable dogs of the town have also been lost during the past few days.

Swat the fly.

H. A. Halbert, a real farmer, of Coleman, Texas, is out for the office of State Commissioner of Agriculture.

Since this office has been established in Texas, school teachers and lawyers have been at the head of the state department of agriculture, though the law specifically states that the incumbent should be "an experienced and practical farmer."

Probably Judge E. R. Kone will be a candidate again. In this case it seems that Mr. Halbert will have a distinct advantage over him, especially if his ability as a farmer is as good as his ability as a writer.

DEBATING AND ATHLETIC CONTESTS.

That people of Anglo-Saxon breed continue to enjoy contests, athletic and intellectual, is well illustrated by the success of the Debating, Declamation and Athletic League among Texas schools that has been fostered by Professor E. D. Shurter of the University of Texas. The old-fashioned tournament that flourished until recently in Texas was but a survival of the knightly contests

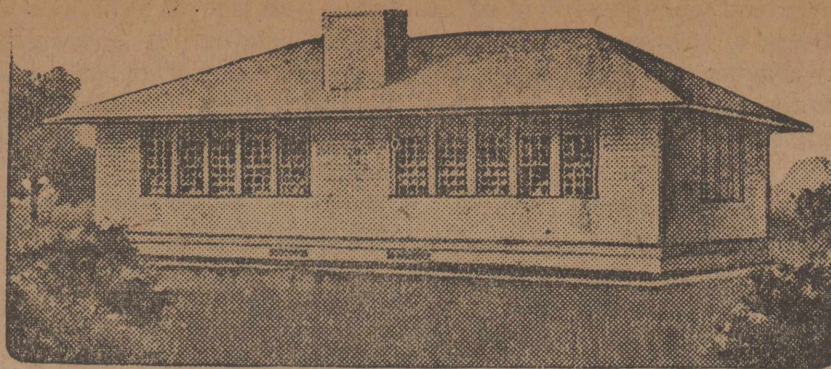

Prof. E. D. Shurter

of the days of the Crusades. In these days, instead of winning a ribbon to present to his lady love as in days of old, the young debater, or declaimer, or athlete wins a golden medal which may also soon be worn by his sweetheart.

The fourth annual meeting of this League will be held at Austin on May 1 and 2. Preparation is being made to entertain six hundred persons interested in declamation, in debating and in the various forms of out-door athletics, such as jumping, running, hurdling, throwing the hammer, putting the shot, and pole vaulting. In preparation for this final contest, county meets have been held in more than one hundred counties in the State.

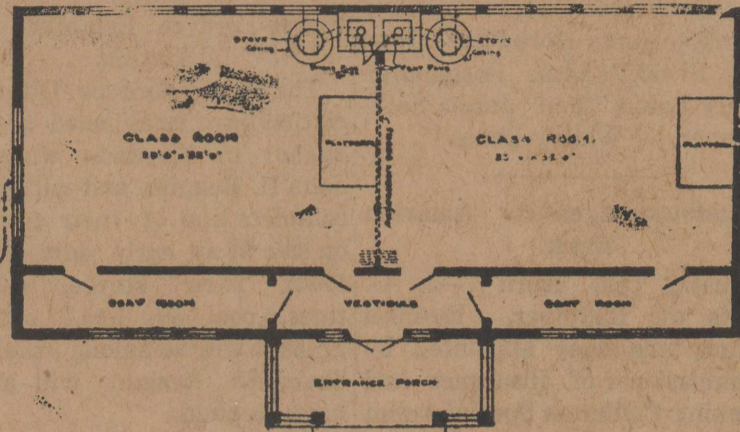

Improved Shiny Cloth.
To improve shiny serge or cloth lay it flat on the table and pass a piece of fine sandpaper very gently over the shiny part. The sandpaper will roughen up the nap again, but be careful not to rub too hard, as it may wear a hole in your material.

THE MODEL RURAL SCHOOL HOUSE

South Side of Model Two-Room Rural School

It costs no more money and no more labor to build a model school house than it does to build one of the same size but of less desirable arrangement. The construction, heating, lighting and sanitation of school buildings present special problems which the general architect and even the physician are not always prepared to meet. In the home only two or three people are in one room at the same time, and these are usually moving about. If cold, they can move to the fire; if the day is dark, they can move near the window; if the sun shines brightly on their work, they can move away; if they become fatigued, they can change

Floor Plan

seats, open a window, or go out for fresh air. The people in a crowded church or hall usually remain only an hour or two, and are not kept still and at hard mental work during this period. In the school, on the contrary, each room must contain from thirty to sixty children for five hours a day; no one can move about at will; the boy farthest from the fire must be kept comfortable without overheating the boy next to the stove; every corner of the room must be lighted well on even the darkest day, and yet no direct sunlight must fall on any pupil's book; ten to twenty times the amount of fresh air needed in a dwelling room must be brought into a school room, and yet no child must be in a draft.

The following good features are illustrated in above cut:
1. No windows are in front of or to the right of the pupils.
2. The windows are grouped on the left, with thin mullions between, allowing a strong light to come from the pupils' left. The windows behind the pupils are lowered, thus shutting out the light while providing ventilation.
3. The windows are high at the bottom so that the air passes evenly over the room; there is not more breeze near the window than passes throughout the room.
4. The windows are high at the top, allowing the air to escape from the room at the place of greatest pressure.

Any rural district of Texas that is planning to build a school house may secure, by writing to the State University at Austin, a free bulletin on one, two, or three-room school buildings. If desired, plans and specifications accompany the bulletin.

Hobo Army Picks Out Its Route.

New York, April 13.—Hoboes in the "Brotherhood Welfare association" enlisted a week ago in "General" Coxey's army, which will march to Washington, decided yesterday on the route. The New York contingent will start on May 1. The different branches of the "army" will be organized in companies of 100, each company to have a captain.

The New York army will cross the Hudson river to Jersey

City on May 1 and march to Philadelphia, where there will be a rest.

The next stop will be Baltimore, where there will be another rest, and they will proceed to Washington in time to fall in line with the other branches of the "army" on Pennsylvania avenue May 21, when a committee to be appointed by them will go to the White House with the demands for legislation to make money and work more plentiful.

Alexander Law, of the Brotherhood Welfare association said

he expected J. Eads How, who organized the "hobo" body, would be in time to lead the New York march.

Tea Plantation at Big Fair

San Diego, Cal., April 14.—Sir Thomas Lipton will be one of the exhibitors at the San Diego Exposition, his exhibit taking the form of a Ceylonese tea garden, surrounded by a tea plantation.

"Tea plants can be successfully grown in San Diego," said Sir Thomas at the time of his recent visit to San Diego. "I will demonstrate this fact during your exposition in 1915," he said and when he reached Chicago, a few days later he instructed his American agent there to come to San Diego and make arrangements for two acres of ground on the site of the San Diego Exposition.

The ground is now being prepared for tea plantation, doubtless the first of the sort in the United States of America. Tea plants of mature growth will be shipped from Ceylon, where Sir Thomas has immense tea plantations, direct to San Diego, and upon arrival here will be set out on the exposition grounds. By January 1st, 1915, on which day the San Diego Exposition will be opened, the tea plants will be ready for the first harvest of tea leaves. Visitors to the exposition in San Diego will then be given the opportunity of seeing the whole operation of the tea industry.

To make his exhibit picturesque and attractive Sir Thomas has promised to bring over a number of Ceylonese workmen, for the plantation, and Ceylonese women to serve the tea in the garden.

Their Expression.

Nothing is to me more distasteful than that entire complacency and satisfaction which beam in the countenances of a newly-married couple—in that of the lady particularly; it tells you that her lot is disposed of in this world; that you can have no hopes of her. It is true I have none, nor wishes either, perhaps; but this is one of those truths which ought, as I said before, to be taken for granted, not expressed.—Charles Lamb.

More Happy Than Sad.

"At any given moment I will produce nine happy persons for every miserable one," said the bishop of London in an address at Queen's college for women recently.

Equal in Earthquake Zone.

As far as earthquake activity is concerned, Italy and Japan are about on a par.

Purified by Love.

Man, while he loves, is never quite depraved.—Charles Lamb.

Half worn out before you get into them. Knowing how to obtain a fit is very essential. TWELVE YEARS in the business and I am not perfect, but I sell some customers right out of the large cities, therefore I believe I am above the average in obtaining fits.

A look at my woollens will cost you nothing—you may buy and I'll save you some money on a GOOD SUIT OF CLOTHES.

GLAD

Hand Sewed gloves, Hole-proof Hosiery, Ide Shirts, Fitz work clothes and a better shoe. In all America you'll find no better values than here.

Not Hard to Deceive Moslems. Times have changed since Captain Burton, 40 years ago, made a pilgrimage to Mecca at the peril of his life. A recent account of such a pilgrimage, by A. J. B. Wavell, says that with a passable knowledge of Arabic and of Moslem ceremonial, and with due precautions as to avoiding pilgrims from the country to which one pretends to belong, "the pilgrimage to Mecca may be made in disguise without running any risk worth mentioning."

Echo of the Circus.

"Oh, mamma," shouted little Eddie, as he ran to his mother in great glee, "what do you think? I was just over there where they're putting up the circus, and they're filling the ring all full of breakfast food."
