it serve permanently as the world's trouble spot. It doesn't make any difference where it is, so long as it's sitting on a powder keg and has some woods and mountains nearby for rebels to hide out in. It also needs a palace for the official government to hole up in, and there ought to ge a good landaid in on.

Outside of this, about all they'll need is a comfortable place for the reporters to stay. and the trouble spot will be in business.

The way I see it, one trouble spot's as good as another, and it's sheer waste and a tax on a man's mind to shift it around every few months.

Yours faithfully.

of diplomatic defeats, he said. American prestige is at a low ebb all over the world. Russia is not unaware that we are experiencing

win all wars because we never lost

We already have suffered a series

"Russian military superiority is more than idle boast. Russia alone has 175 divisions that are combatready. We are in the process of reducing our Army to 14 divisions at least 4 of which are largely equipped with World War II weapons," Symington said.

Soviets Are Gaining

THIS WEEK

With Clinton Davidson

IRE WE LOSING THE COLD WAR?

-In Washington

"Russia is at least 2 or 3 years ahead of us in missiles develop-ment, and gaining. She has put into orbit a 3,000-lb. missile, more than 100 times as large as anything we can send up.

"The United States cannot airlift and properly support over-seas a single division. We would have to depend upon some miracle to transport troops where needed.

"We knew as far back as two years ago that Russia had a modern fleet of some 500 submarines, more than 10 times the number Hitler had. Russia has the capacity to launch missiles from nuclear-powered submarines.

"The facts show clearly and incontrovertibly that the military strength of the Communists is growing faster than our own. The survival of the United States demands that we embark immediately upon an all-out, top-priority research and development effort in the field of new weapons."

FREEDOM IS A MIGHTY SWORD

Americans can rightly be proud of the fact that we are a peace-loving people. That our aim as a nation is to strive to improve human welfare. with freedom and justice for all. * Such a people is always slow to anger, tolerant and patient. But when patience is exhausted, a peace-loving people can turn its peace-time skills into weap. ons of fierce and righteous wrath. There is only

one way such a nation could be enslaved. That would be through propaganda that misleads; through lack of knowledge, and of truth. America's greatest strength is... freedom of the printed word ... to give the people truth, truth that builds freedom of thought, of word, and of vision. *This great Freedom tempers the steel out of which a nation and a people can forge mighty swords

MISS BIG SPRING-Diana Dawson, daughter of Dr. and Mrs. George W. Dawson of Big Spring, formerly of Stanton, walked off with the beauty title for the Howard County city at the pageant held in City Park in Big Spring Friday night. Diana is a 1958 graduate of Big Spring High School. The Dawsons lived in Stanton for a number of years. Mrs. Dawson, the beauty winner's mother, is still very active in a number of Martin County organizations. Dr. Dawson is practicing in Big Spring.

Janis Morrison Home From Scout Camp Boothe Oaks

Janis Morrison has returned from Girl Scout Camp Boothe Oaks, near Sweetwater, where she attended a week's session. Janis left June 29 and returned home July 5.

She is a member of Stanton Intermediate Troop Two and is the daughter of Mr. and Mrs. H. P. Morrison. Camp activities include swim-

ming, crafts and different outdoor activities.

A FREE PRESS . . . and CENSORSHIP

America is at peace. While we have men in uniform st oned over the world, we are not at war. In every way, we are working to preserve our peaceful relations with other peoples whose idealogies and aspirations differ from ours.

Figuring largely in that huge undertaking is America's Free Press. Even during the peaceful years, it has become necessary that certain information regarding discoveries and inventions be protected. Security has become big business.

"Keep this out of the newspaper," are fighting words to any newspaper editor who is a conscientious craftsman. Yet editors of all newspapers, large and small, realize the re-

sponsibilities facing them, to help preserve the securities that are so important to all of

Government, the military, and the scientific fields, receive full cooperation from the men and women who, by training, are accustomed to dig out and know the news . . . and who, by instinct, strive to keep the people fully informed.

Americans have a right to expect that full freedom of the press be preserved, within the bounds drawn by these securities.

For a completely free press is the only safe foundation on which government of the people can build all other freedoms.

Can your home

IF YOU CHECKED "YES" one or more times, it's an indication of low HOUSEPOWER. You may need larger wire, additional circuits and more outlets to get the most efficient and convenient service from your electrical appliances.

You see, home wiring designed for the appliances used by the average family only a few years ago may be inadequate for the many additional electrical conveniences you enjoy today. As a result, lights may dim, appliances may operate sluggishly and fuses may blow frequently due to overloads. These symptoms are usually most noticeable during hot weather, when electricity does so many more jobs for you.

Your electrical contractor will gladly check the wiring in your home and suggest the additional wiring you may need. Call him about today. Live Better Electrically with full HOUSEPOWER.
