**WE ARE HEARING WHERE IN** some parts of Texas the area on which the local cemetery is located is having to be expanded. The reason automobiles are taking the lives of so many killed in wrecks and pedestrians losing their lives by being run over more room is needed to bury the unfortunate victims.

Whole families of five and six members are wiped out by automobile collisions.

The number of automobiles traveling on the streets of our town have increased to where few pedestrians are left to expose their lives to careless motor drivers. But that's the reason those of us remaining must exercise extreme precaution while crossing streets on traffic lights. The hazardous risk we subject our lives is the automobile cutting the corner when we attempt to cross the street.

**DAILY NEWSPAPERS** WE couldn't do without. They publish the news day by day as it happens over the world, and we'd be sitting around very much in the "dark ages" were there no daily newspapers.

## Stanton Juniors Study Short Story Writing

Stanton High School junior students wrote short stories for a final activity for English III.

Ten of the stories were then selected as the best. The final selection included stories by Carl Wright, Marga Warrington, Joyce Anderson, Porky Britton, Sandra Sale, Royce Boyce, Fred Houston, Veronica Sorley, Lee Standerfer, and Alton Robertson.

The writing of these stories followed the year's preparation of first studying the major American short story writers from Hawthorne and Poe through Hemingway and other contemporary writers.

Second, the juniors covered personal writing experiences by writing accounts of the history of Martin County and Stanton or "old timers' tales" as well as extensive study of how to relate personal experiences, depict

## Stanton FFA Chapter Wins Area Two Award

First place award in rural electrification went to the Stanton chapter of Future Farmers of America at the Area II FFA convention Friday and Saturday in Midland.

The Stanton chapter received an award of \$150 from the Texas Electric Service Company for placing first.

The Stanton chapter was also one of two chapters to receive the gold emblem chapter rating.

Martin County will definitely be the headquarters site for a six county cotton classifying station, according to an announcement made this week by James Eiland, president of the Martin County Chamber of Commerce.

The number one project on the chamber's list of proposed achievements was made possible through the hard work of Manager H. M. McReynolds, past Chamber president F. O. Rhodes, and Eiland, the current president.

Horace Blocker, a member of the area committee and another avid worker for the project made many contacts in helping bring the station to Stanton.

The cotton classifying office will be used by cotton farmers from Midland, Martin, Howard, Glasscock, and parts of Reagan and Upton Counties. For awhile Howard County farmers were undecided about entering the project, but have now decided to take part. Previously, Howard County farmers had patronized the station at Abilene.

Committee members are Ben (Continued on page 5)

## Jubilee Director Will Arrive In City June 15

Bernard Houston, member of the Martin County Diamond Jubilee Executive Committee, said today that the director for the jubilee celebration would arrive in Stanton on June 15.

The Rogers Production Company is sending the representatives to Martin County to direct a historical pageant which will be presented on the football field for five consecutive nights. The pageants will be presented by a cast recruited from home county talent.

The Old Settlers Reunion will be held in Stanton at the same time the county plans to observe its 75th birthday.

Houston stated that the director had issued a call for a meeting to be held at Caprock Electric Cooperative on the evening of June 15 to all commit-

tee chairmen and members of the executive board.

Houston requested The Reporter to make it clear to the public that the Diamond Jubilee is strictly a separate undertaking and is not related to the Old Settlers Reunion, nor is it being sponsored by the Martin County Chamber of Commerce.

The Diamond Jubilee organization has been officially chartered and an executive committee and various committee chairmen named.

Houston stated that proceeds from the Jubilee, if any, would go into a community fund to be administered by county officials for charitable purposes.

The long-time county rancher and businessman called for the complete cooperation of every man, woman and child in helping make the celebration a fine thing.

A Tribute To Teenagers

Juvenile delinquency is a grave and growing problem in this country, and should never be underestimated. At the same time we shouldn't lose sight of the legions of young people of splendid character.

Something that happened off San Francisco's Golden Gate in early May deserves national recognition. An 18-year old girl, Shirley O'Neill, was swimming with an 18-year old boy when he was attacked by a great white shark which had strayed from its normal habitat.

A soldier of long service who witnessed the tragedy from a bluff above the bay called it the greatest exhibition of courage he had ever seen.

BIBLE COMMENT

The Greatness And Power Of Love . . .

The most complete and perfect exposition of the nature, meaning and application of love in daily life is found in Paul's first letter to the Corinthians. Paul begins by contrasting love with things that men might desire to possess. These include fluency and power of speech, the gift of prophecy, wisdom to understand mysteries, a strong faith, and even sacrificial charity. But without love, all these things mean nothing.

The Stanton telephone directory is due to be published to reach you about August 1, 1959, but it isn't too early to start thinking about adding names of your teen-age children or other members of the family who may be living with you.

Vacation Hint

When you stop in the middle of your vacation this year to remember friends or family back home, why not give the "wish you were here" greeting a new twist.

Do it with a Long Distance Call. It's more fun that way, and you can catch up on the news at home, too.

And remember to call station-to-station. It's cheaper—you can make three calls for the price of two.

Busy Telephones

With school out for the summer, telephones in many houses will probably be getting a real workout.

There'll be calls from the children's friends at most any hour of the day — to round up the group for a game, to arrange to meet at the movies, or to compare notes on a new bike or the latest record album.

Whatever the call, the telephone is always there to help teenagers—and small fry, too—have more fun during vacation.

If you have children whose friends keep the phone ringing at a merry clip, make it easy for your youngsters to answer without running through the house. Extension telephones will do the trick.

Why not call the telephone company for a home extension telephone today? The cost is low, just \$1.00 a month plus installation.

Call by number. It's twice as fast. SOUTHWESTERN BELL TELEPHONE COMPANY

Philosopher Neglects His Farm While He Talks About, Of All Things, Children's T.V. Shows

Editor's note: The Martin County Philosopher on his grass farm on Mustang Draw discusses children's television programs this week. He probably should stick to farming.

Dear editor: According to an article I read in a newspaper last night which I brought home from town earlier in the day because it was dropped around a pair of shoes I'd had half-soled, the national P.T.A. is up in arms over the type of television programs the children of this country are watching.

"It's high time we stopped talking about the 13-year-old mentality of the average American," a leader complained saying television is making a mistake in assuming its programs have to be planned on that level. She added that the way to improve the programs is to have parents select their kids' shows. Make em stop looking at the bad ones.

Now I'm no expert on television programs, but it's not clear

quence are done, and whether or not there be knowledge, love will continue, for love is the true goal of all define purpose and human endeavor. The things that abide are faith, hope and love, but the greatest of these is love.

The greatest task before men of good will today is the conquest of hate. We must do all in our power to end violence, cruelty and terrorism. But after we defeat the forces and designs of evil, we shall still be far short of a real victory unless we overcome hate with the power of love.

**Martin In "Northwest Texas" In Future**

**Martin, Howard, Mitchell Now In Northwest Texas**

Martin County is no longer in West Texas.

Overnight, so to speak, it has been shifted from the historic position it has held to a new designation—Northwest Texas.

The Weather Bureau pulled the shift. It did so at the request of the Associated Press. Some members of the news cooperative felt the West Texas zone was too big for accurate weather forecasting.

This complaint was not new to the weather forecasters. Until 1951, only two forecasts for Texas were issued—one for West Texas and one for East Texas.

In those days East Texas, weatherwise, extended from Arkansas to Brownsville. Trying to write a single forecast for so vast an area was nearly impossible.

In 1951 the Weather Bureau divided the old East Texas zone into North Central, South Central and a vastly diminished East Texas segment. Now the West Texas zone is to be segregated into Southwest Texas and Northwest Texas.

The line dividing the new Southwest and Northwest Zones will be located along the southern boundaries of Howard, Andrews, Martin, Mitchell, Nolan, Taylor, Callahan and Eastland counties. The 99th Meridian will continue to serve as the eastern boundary of the two western weather districts.

Forecasts issued hereafter will be prefixed by the designation "Northwest Texas" and "Southwest Texas." Martin County will be in the former.

**SOCIAL SECURITY NEWS**

**AUTOMOBILE ACCIDENT RULES SHOULD BE MEMORIZED**

Vacation time is near. Soon millions of people will be driving about the country, and automobile accidents will occur with increasing frequency. What should a person do when involved in an accident?

At such times it is hard to keep your wits about you and know just what to do. It is therefore a good idea to plan in advance just what you would do in event of a smash-up. Here are a few simple rules that every driver should commit to memory:

1. STOP! Failure to stop can result in serious criminal consequences.
2. RENDER AID. If anyone is injured: (1) Render first aid. (2) Stop bleeding. (3) Call a doctor or an ambulance or both. (4) DO NOT move an injured person in any way that could possibly add to his injury.
3. PROTECT THE SCENE FROM FURTHER DAMAGE. You may be liable for damages to approaching drivers, unless they are properly warned. If the highway is obstructed at night, have someone turn his highlight beams on the wrecked vehicles.
4. CALL AN OFFICER. Police-men, Highway Patrolmen, Sheriffs and their deputies are trained accident investigators whose testimony may be invaluable in establishing your civil claim for damages.
5. GATHER INFORMATION. WRITE IT DOWN. Don't trust your memory. Don't guess — be specific. Measure skid marks. Step off distances. Be sure to obtain names and addresses of witnesses. You are required by law to exhibit your driver's license to the other driver—and he must do the same.
6. BE CAREFUL WHAT YOU SAY. Even if you feel you probably are to blame, it is best to make no admission. You may learn later that the other driver was equally at fault, or more so. Emotional comments can be misconstrued by others, or may be misquoted. Whatever you say, make it factual.
7. SEE YOUR DOCTOR if there is the slightest chance you may be injured. Serious injuries do not always result in immediate pain or bloodshed.
8. CONSULT YOUR LAWYER IMMEDIATELY. The sooner your lawyer is brought into the matter, the better he can advise you and protect your rights. He can obtain statements from the witnesses while their memories are fresh, and do many other things to insure that the true facts are preserved. Get your lawyer's advice before giving any interviews or statements to investigators or adjusters for the other side.
9. INFORM YOUR INSURANCE COMPANY PROMPTLY. Failure to do so may void your policy.
10. REPORT THE ACCIDENT to the Department of Public Safety. This is required by law if there is any injury, death, or total damages exceed \$25.00.

An official accident report form may be procured from the Police, Sheriff's Dept., Highway Patrol, or State Dept. of Public Safety.

(This column, prepared by the State Bar of Texas, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who is fully advised concerning the facts involved, because a slight variance in facts may change the application of the law.)

"The 1958 amendments to the Social Security Act make it easier for a disabled child over 18 to qualify for social security benefits on his parent's social security records," H. P. Thomas of the Odessa social security office said today.

Before September 1958 a disabled child who was chiefly supported by a public agency or some person other than the parent could not receive social security benefits on the parent's account. Under the new law, the disabled child is entitled to benefits if he meets the benefit requirements for a child under 18. There requirements are more liberal. It is no longer necessary, in most cases, that the disabled child be receiving at least one-half of his support from the parent.

Other requirements were not changed. Before a child can qualify for disabled child's benefits, a parent must be receiving social security retirement benefits, or must have been insured under the social security program at the time of death.

A new application is necessary on behalf of those disabled children whose previous application was denied because the child did not meet the one-half support requirement.

The social security office is located at 1428 East 8th Street, Odessa, Texas. They have a representative who travels in the territory. The postmaster can give you his schedule of travel.

Independent experts and official figures prove Chevy's ahead of its field in seven big ways

**BEST BRAKES** . . . In direct competitive tests of repeated stops from highway speeds, conducted by NASCAR\*, Chevy out-stopped both the other leading low-priced cars—and why not? Chevy brakes are far larger, built with bonded linings for up to 66% longer life.

**BEST TRADE-IN** . . . Check the figures in any official N.A.D.A.† Guide Book. You'll find that Chevy used car prices last year averaged up to \$128 higher than comparable models of the "other two." **BEST STYLE**

. . . Popular Science magazine sums it up: "The fact is, in its price class the Chevy establishes a new high in daring styling. . . It's the only low-priced car that's unmistakably modern in every line. **BEST ECONOMY** . . . No doubt about this: two Chevrolet Sixes won their class in the famous Mobilgas Economy Run, got the best mileage of any full-size car. **BEST ROOM** . . . Official dimensions reported to A.M.A.‡ make this clear. For example, Chevy front seat hip

room is up to 5.9 inches wider than comparable cars. **BEST ENGINE** . . . Every motor magazine has given Chevy's standard and Corvette V8's unstinted praise. As Sports Cars Illustrated puts it: "Indeed, this device is surely the most wonderfully responsive engine available today at any price." **BEST RIDE** . . . You'll be able to tell this yourself, instantly. But Motor Trend magazine expresses it this way: ". . . the smoothest, most quiet, softest riding car in its price class."

**Don't Get Your Wires Crossed!**

Here are the facts . . .

1. The Electric Cooperatives of Texas are a tax paying — business managed — partnership.
2. The money to build the cooperatives was a loan and the interest and the principal are being paid back.
3. For every \$1.00 spent on Co-Op lines an estimated \$6.00 has been spent by members for electrical appliances, thus the Cooperatives have created and are still creating a multi-billion dollar market for the merchants of Texas and the nation.
4. The Electric Cooperatives of Texas are owned and operated by the people they serve . . . free enterprise in its purest form.

Don't get your wires crossed. If it had not been for the Electric Cooperatives of Texas, many farms and ranches would still be dark. They transformed the rural community. They must continue to serve those areas they helped to develop.

SOIL CONSERVATION DISTRICT NEWS

MARTIN-HOWARD SOIL CONSERVATION DISTRICT

Jack Buchanan, Ollie Robertson, Bernard Houston, Larry Shaw, J. D. Crawford.

Curtis Erwin recently seeded about 40 acres of rangeland on his ranch South of Stanton to a mixture of Blue Panic, Plains Bristlegrass, Weeping Lovegrass, and Sideoats Grama. This seeding was done on land that had been rootplowed for control of mesquite.

"The day is gone, if it ever existed, when the fact that an individual holds a deed to a piece of land gives the moral right to destroy it through stupid, shortsighted farming practices."  
Chester C. Davis

M. H. Nance drilled a mixture of native and introduced grasses on about 130 acres of his rangeland last week. Nance is participating in the Great Plains Conservation Program and has already controlled mesquite on the rest of his rangeland by rootplowing. The land that was rootplowed was seeded to native and introduced grasses. Nance has a good stand of grasses on the land that was rootplowed. Other farmers and ranchers who have practiced brush control and range seeding this year include Lila Flanagan, L. O. Free, K. F. Campbell, and John Harvard. All of these places have grasses coming up to good stands following the recent rains.

Jack Bentley has developed a plan of operations for his farm North of Stanton for participation in the Great Plains Conservation Program. This plan has been submitted to the Soil Conservation Service for approval. Bentley's plan includes seeding grasses and improving water facilities for livestock.

Mr. and Mrs. Joe Stewart, Mr. and Mrs. Glenn Steward and daughter of Midland and Mrs. C. C. Thompson of Odessa, Mrs. A. T. Fisher of Odessa, Mrs. Elizabeth Foreman of Odessa, J. R. Murdoch and Mrs. Ella Henson. DISMISSED: Barbara Strickland of Midland, Joy Snedecor of Tulsa, Okla., Mrs. Faye Parum, Mrs. Clint Barrett, Mrs. C. C. Thompson of Odessa, Mrs. A. T. ### June . . .

(Continued from page 1) smashed and automobiles and windows were hammered.

A tornado played an up-and-down symphony across farm land west of Stanton and zigzagged over the town and finally trailed off toward Big Spring.

A rainy June is in sight for Martin County as early morning showers Wednesday added more relief to thirsty crops.

Courtesy gauged .10 of an inch to go with its one inch deluge Monday. The same total was measured eight miles south of Stanton and Lenorah and Tarzan received slight showers totalling .05 of an inch.

Insurance adjusters converged on Stanton residences after the Monday, May 25 windstorm to estimate the damage done roofs by the giant size hailstones which poured down during the zenith of the blow. Houses in north Stanton appeared to be the hardest hit.

The Stanton Reporter rain gauge registered seven-eighths of an inch of rainfall here Monday afternoon, June 1. Other rain reports over the area ranged from an inch to one and one-half inches.

High winds and driving rains lashed other sections of West Texas Monday afternoon and tornadoes were reported in Pecos and Upton counties. Both twisters dipped harmlessly in open fields and disappeared.

Dark clouds plowed into Stanton about 7 p. m. Monday, accompanied by sharp lightning and then heavy showers. Some light hail dropped in the downtown section of Stanton.

### Memorial . . .

(Continued from page 1) where so many others of our nation's heroes have been laid to rest.

Captain Edwards enlisted in the Marines in September of 1940 when Europe already was engaged in war and when the threat of World War II hung black over America. He had spent most of his boyhood and young years in Martin County.

He was at Pearl Harbor when the enemy rained destruction on American installations there on December 7, 1941. He spent almost the entire period of World War II in the Southwest Pacific Theatre of operations after that. He distinguished himself in numerous major operations of war in the defense of liberty and justice in the Pacific, among them the gruelling campaign to secure Okinawa.

Captain Edwards' service in the Marine Corps was of such outstanding and exemplary nature that it won him promotion after promotion in the enlisted ranks and then a commission in the regular officer corps of the Marines. As a commissioned officer, he also advanced rapidly in rank by his devotion to duty.

Captain Edwards was married to the former Lorraine Kramer of Woodsbridge, N. J., on March 20, 1955 and to this union was born one daughter, Pamela Lorraine, now three.

Other survivors include the parents, Mr. and Mrs. Claude Edwards of Stanton; four brothers, Leston, a twin brother, of Snyder; T. F. of Stanton; C. M. of Midland; and Donald of Kermit. Three sisters also survive. They are Mrs. Olga Reed of Big Spring; Mrs. Vena Fortune of Knott; and Mrs. Mozelle Gotcher of Kermit.

### Bradley Rites Conducted In San Angelo

Funeral services for James M. Bradley, 87, a resident of San Angelo for 38 years, were held at 5 p. m. Monday in San Angelo.

Mr. Bradley, who had been ill for some time, died at 1:55 p. m. Sunday at his home in San Angelo. He was the father of Mrs. Henry Ringhoffer of Stanton.

Mr. Bradley was born September 3, 1871, in Cass County. A retired farmer, he came to San Angelo in 1920.

Survivors include the widow; four daughters, Mrs. Henry Ringhoffer of Stanton, Mrs. W. E. Burleson and Mrs. Bill Thornton, both of San Angelo and Mrs. Al Harrell of Slaton; a sister, Mrs. Mattie Keese of Corpus Christi; seven grandchildren and seven great-grandchildren.

### Former Chamber Manager Visits Friends In City

Mrs. Hila (Stormy) Weathers, former manager of the Martin County Chamber of Commerce, was a Stanton visitor this week.

Mrs. Weathers, now a resident of California, paused in Stanton to renew old acquaintances before continuing to Sweetwater to visit relatives.

She stated that she expected to make several other Texas stops before returning to Stanton for the Diamond Jubilee.

### Chamber . . .

(Continued from page 1) Gollady, president; directors Carl Leonard, Jr., of Midland County; Lawrence Adkins of Howard; Doris Blissard of Glasscock; Reagan and Upton, and Horace Blocker of Martin County.

The committee will meet Thursday night to discuss plans for the building needed to house the station. It will be located on the Lamesa highway in the city limits of Stanton. The land was secured from Mr. Blocker.

After the blue prints are scanned by the committee members, bids will be accepted from contractors. McReynolds advised The Stanton Reporter.

The plant will be financed by ginners of the area who will contribute 25 cents for each bale of cotton ginned this Fall and Winter. This money will be either in cash or in form of a note, which will be cashed by the bank. The ginners will then get their money back next Fall by taking out the fee from each bale ginned.

### Stanton Juniors . . .

Final copies of the short stories written by class members were graded by the teacher, Mrs. Corrine Cagle, on the mechanics used; then they were judged by a committee of the Stanton Study Club on the basis of originality, consistency and readability.

Copies of the 47 stories written by the juniors will be placed on file in the high school library.

### Snooter Knows

(Continued from page 1) as important in its field as the daily is in its field.

A large percentage of the people who live in the rural sections are subscribers to their local weekly newspaper. The weekly performs a valuable service to the people in its locality. It publishes the comings and goings of neighbors, the local happenings as they transpire in the town and area surrounding, marriages, deaths, etc.

The Stanton Reporter is just such a weekly newspaper. It strains every point to gather all the news, and publish it in a manner that will offend no one. The subscription list to the Reporter grows weekly. If you are a newcomer to Stanton or Martin County, we invite you to become a member of its big family of readers.

SOME FOLKS ARE TALKING that people are having more money to spend than ever before. That puts this column on the spot as qualifying as a member of the plutocratic family. I don't see any change in my position of spending money than it has always been. True, I have had a couple of dimes at the same time. They were really mortgaged to the local bank.

When I got hold of a dollar its acquaintance was so foreign I had to go to Webster and hunt up its definition. If I did have any money I never had time to spend it. The boys who work four and eight hours a day and draw \$2.00 an hour do have the time—not a country newspaperman who works 12 to 24 hours a day.

When folks tell of people having more money to spend than ever, I've wondered if the country editor can be classed in the category of "people," or is an escapee from the tribe in the jungle that hang from trees by their tails.

SPRING IS HERE WITH SUMMER knocking at the door. With summer come the flies to annoy the human flesh with their landing gear, as well as sit on the table after dragging their feet up and down and around the garbage can.

The boost in the fly business has an ardent aid in the filth allowed to accumulate in unkempt premises. No matter how particular one may be to keep his own premises clean of filth, if his neighbor permits filth to accumulate and does nothing to destroy breeding places for flies, he is faced with battling the overflow of these pests from his neighbor.

A liberal amount of lime and other insect destroyer should be spread around and in garbage cans.

RAINS WHICH HAVE VISITED Martin County during the month just passed, have instilled a thrill in the farmer. He sees the makings of a good cotton crop for this Fall's harvest, also a fine feed crop. He carries along this glowing picture until he sees the leaf worm and other insects working on his plant, then he cries "the worms are going to eat up my cotton."

At considerable expense and labor he poisons them. When the cotton looks like it has been stripped of foliage to the bare stalk, and cotton picking time comes for the harvest, he laments, "I can't find pickers enough to gather

### 4-H Council To Meet On June 13

A meeting of the Martin County 4-H Club Council will be held Saturday, June 13 in the county agent's office.

The meeting will begin at 10 a. m.

Plans for summer activities will be made by the group.

Mrs. Morris Zimmerman and Betty Sue Houston of Lamesa visited during the weekend in Stanton.

Wildcat Plugged Texas Crude Oil Company No. 1-10 Kerry-Kim-Bo, Northwest Martin County wildcat, has been plugged and abandoned at 12,446 feet.

Final drillstem test, from 12-321 to 12,446 feet, open 2 1/4 hours, recovered 1,350 feet of water blanket, 30 feet of mud and 1,080 feet of salty sulphur water.

Location is 660 feet from south and east lines of section 10, block HA, B. K. Lanier survey, 10 miles southwest of Patricia.

### Second Pay Zone Found

David Fasken of Midland completed No. 1 David Fasken-Mrs. O. P. Buchanan, Northeast Midland County operation as the opener of production from the Bend section of the basal Pennsylvanian in the Azalea (Multipay) field in Northeast Midland County, 10 miles southwest of Stanton. It previously had been completed as a Devonian gas-distillate producer. It will be produced from both pay zones.

The Strawn section of the Pennsylvanian, productive in many of the wells in the Azalea area, apparently was barren in No. 1 Fasken-Buchanan.

The Bend horizon produced 73 barrels of 45.6 gravity oil in 24 hours on the potential test, flowing through a 20/64-inch choke.

Gas-oil ratio was 2,863-1. Tubing pressure was between 850 to 100 pounds and casing pressure was between 1,450 and 150 pounds. No formation water was developed.

The production was from perforated interval at 10,856-10,869 feet after a 10,000-gallon fracture treatment.

From the Devonian, the well completed about 15 days ago for a calculated absolute open flow of 2,000,000 cubic feet of gas daily, with a gas-liquid ratio of 38,000-1.

That production was from perforations at 11,343-415 feet. The well is 860 feet from north and 1,148 feet from west lines of J. W. Hines survey, abstract 573.

### Recompletion Final

Fourteen miles south and slightly west of Stanton, Tex-Havey Oil Company of Midland has re-completed No. 1-16 Mrs. B. W. Floyd and others as a Devonian gas well in the Spraberry Trend Area field in Northeast Midland County.

The well finalized for a calculated, absolute open flow potential of 1,500,000 cubic feet of gas daily, with a gas-liquid ratio of 28,300-1. The flow was through perforations from 11,192 to 11,512 feet.

No. 1-16 Floyd originally completed in 1949 from the Clear Fork. In 1950 it opened the huge Spraberry Trend Area field. In 1957 it finalized as a Devonian oiler to open that pay to production in the field.

Location is 1,980 feet from north and 860 feet from east line of section 16, block 37, T-3-S, T&P survey.

Peggy Sumner, a sophomore student from Raby, was chosen area sweetheart over seven other girls.

A total of 238 chapter members and teachers registered. Delbert Downing, manager of the Midland Chamber of Commerce, spoke to the group Saturday. He told the Future Farmers that today's surplus might turn into tomorrow's shortage.

"Man must be at his best to feed the population increase we are experiencing," Downing said. "Man at his best can do the job. But if he is at his worst, I fear for civilization."

### Mrs. Johnson . . .

(Continued from page 1) Mrs. Johnson left Tuesday for Sul Ross College, Alpine, where she is to spend three weeks completing work for her master's degree.

After receiving her degree she will return to Stanton to complete final arrangements for going to Africa.

The Johnsons resided in Midland before moving to Stanton, and still maintain a home in Midland. They have had a home in Midland since 1950.

The trip to Africa will not be the first time the Johnson family has resided out of the United States. In 1932-53 they lived in Reynosa, Old Mexico, where Mr. Johnson was employed with an oil company.

Mrs. Johnson says that while in Africa she plans to write of her experiences.

### THE STATE OF TEXAS STATE REVENUE RECEIPTS

(SHARE QUARTERLY YEARS FROM BUREAU)  
SOURCE: COMPTROLLER OF PUBLIC ACCOUNTS OF THE STATE OF TEXAS, ANNUAL REPORTS, PART I, 1948 THROUGH 1958.

**STATE REVENUE RECEIPTS**—The above chart shows sources and amounts of state government income for the period of 1948-1958. The three largest sources of state revenue are federal aid, highway motor fuel taxes and crude oil taxes (in that order). A large portion of the remainder of state government revenue comes from select sales taxes. One interesting fact revealed by the chart is the amount of revenue yielded by the natural gas tax. Five other states (New York, Michigan, Indiana, Ohio and Illinois) collect from two to nine times as much in taxes per thousand cubic feet on Texas natural gas as Texas itself collects.

Proper advertising will often sell a poor product; it will invariably sell a good one.

### Mrs. Snodgrass Attends Dallas Fall Market

Mrs. O. L. Snodgrass, Jr. was among more than 5,000 buyers and retailers who attended the American Fashion Association's Fall and Back-to-School Market in Dallas. More than 750 lines of women's and children's apparel were exhibited by the association members in the Adolphus and Baker hotels, May 24-29.

Enthusiasm ran high among the buyers and retailers, who expect an excellent Fall season, according to Miss Ruth Holland, president of the association. "Business has been good, and there is much optimism throughout this market area for even better business in the Fall," Miss Holland said.

Jerry Henson has returned home from Medical Arts Hospital, Big Spring. He returned home Saturday.

Mrs. Cora Martin left Monday for her home in Alpine after spending four weeks with Mr. and Mrs. J. D. McCress and E. M. Massey.

Some 100 are expected to attend the meeting. The West Texas Hereford Assn., and the Abilene Chamber of Commerce will co-host the event.

The WTHA was organized at Graham under a large oak tree 83 years ago to combat cattle rustlers. Norman Moser, DeKalb rancher, is president of the association.

A letter issued by the Texas Cottonseed Crushers' Association, reports that cash value from cotton and cottonseed in Texas for 1958 has been estimated at \$756,855,000 by the Agricultural Marketing Service, U. S. Department of Agriculture.

This year, the letter went on, cotton will again be the best cash crop for farmers capable of producing high yields of good quality, efficiently.

From College Station comes the information that June is Dairy Month.

The theme, "Look to the Milky Way," highlights the U. S. Department of Agriculture's support of June Dairy Month.

The campaign is built around "a galaxy of dairy dishes" designed to generate increased sales of milk, cream and cheeses, according to the Texas Extension Service.

June Dairy Month is a major national event during which Texas dairymen and other members of the industry join forces to get more dairy foods in the hands of consumers.

In May 1947 was the disastrous tornado that struck Lenora. Seventeen of the citizens were hospitalized from injuries sustained. One of the number died from injuries he received. Property damage in Lenora was severe.

In May 1957, a tornado was sighted in the Lenora area, and again many hundred acres of cotton were wiped out by hail accompanying the storm.

Two years later in this month of May, just passed, two tornadoes were reported seen in the Courtney community but they never reached the ground. Hail destroyed some cotton, but it was spotted.

Three of the months of May recorded in the past 12 years in Martin County have had their disastrous effects in the rural areas of the county.

Stanton was in the path of the Monday evening, May 25th hail storm. Hail ranging in size from large marbles of jagged slabs of ice fell on the town covering the ground. Many roofs of homes were battered until they will have to be replaced by new ones.

June 5 Rising Star starts its summer rodeo. The event will last 14 Friday nights. Performances will include goat roping, calf roping, boys and girls barrel races, bareback riding, bull riding, and the usual jackpot roping.

Shortly after the Martin County Sheriff's posse was organized, an excellent rodeo grounds, with sturdy high plank board fence encircling the grounds, judge's stand and chutes were built.

And as for wearing a white collar now, with a tie, but going up one row and down another on a tractor would still be the same. Even changing collars at noon, because the one you started out plowing in that morning is bound to be dusty by mid-day, still wouldn't fade any images of work, as far as I'm concerned.

Philosopher Doubts White-Collar Farming Would Be Less Tiring Than Present Kind

Editor's note: The Martin County Philosopher on his grass farm discusses the future of work this week. We guess that's what he's doing.

Dear Editor:

When a man doesn't know any more about what's happened in the past than I do, he hasn't got much business predicting what's going to happen in the future, but I'm always interested in what somebody else has to say about it.

For example, I was reading an article last night in a newspaper a neighbor handed me earlier in the day because he said he didn't have time to read it, too busy working, that predicted that in 10 years "the ancient image of work as something manual and tedious will be fading rapidly and most workers will be wearing white-collars."

This does not leave me altogether satisfied. I mean, while the ancient image of work as something hard may fade in the next ten years, I figure work itself will stay around quite a while longer.

And as for wearing a white collar now, with a tie, but going up one row and down another on a tractor would still be the same. Even changing collars at noon, because the one you started out plowing in that morning is bound to be dusty by mid-day, still wouldn't fade any images of work, as far as I'm concerned.

New Officers Installed At Rho Xi Meet

from the open-neck kind. I'll admit the machine has eliminated a lot of work, but what some people don't seem to realize is that it's caused a lot of other work, too.

I long ago noticed that a man who graduates from a tractor with two-row equipment to one with four-row equipment doesn't work half as much as he did before.

He just takes on twice as much land and still goes from sun-up to sun-down. I'm not equipped to figure it up myself, but it would be interesting to know how many hours of work scientists and inventors have put in perfecting labor-saving devices.

How many hours have put in building them, and how many hours consumers have put in working to afford them. The way I see it, some sort of work is likely to occupy man for some time to come.

Yours faithfully, J. A.
