**Political Payola**

We've all heard about "payola"—a device where, according to the revelations of a Congressional investigating body, disc jockeys obtained large sums of money along with valuable gifts from record companies in return for plugging the product. This, coming on the heels of the TV quiz-shows scandals, has left a bad taste in the mouths of millions of Americans.

But there's another form of "payola" that is far more important. Congressman Halleck deserves the credit for calling attention to it. He describes the avalanche of proposed multi-billion dollar spending bills as "political payola." In his words, they "simply hand out the taxpayer's money to buy votes for the next election."

If the "political payola" groups have their way, there won't be a budget surplus. In all probability, there'll be a deficit instead. Then we'll have more inflation—and, ultimately, still more and higher taxes. How does that prospect strike you?

**West Texas Press Comments**

The Upton County Golden Anniversary Celebration will be held May 28-29. Headquarters for holding the event will be the Rankin Park building.

In the new liquor district in Graza County two liquor establishments have been closed. One a tavern, closed for selling to a minor, and the other a package store. One liquor store robbed, getting off with \$4,000 worth of liquor.

The city council of Stamford have sold the street parking meters lock stock and barrel. The Stamford American says the merchants will breathe easier when the meters are out altogether.

The county seat of Matador dropped in population from 1,325 in 1950 to 1,201 in 1960. In Roaring Springs the loss was from 435 in 1950 to 326 for 1960.

Hall County's population dropped from 10,000 in 1950 to 7,241 in the recent census. The city of Memphis declined from 4,000 in 1950 to 3,329 in 1960.

A contract calls for construction of the Counce County hospital at Eden for early in June. The contract was let to A. D. Kasch of Big Spring. The contract price is set at \$326,000.

A decline of 1960 census shows 28 per cent figure in the county of Concho and a 36 per cent decline for Eden. Eden shows a population of 1,465 in 1960, and Concho County a population of 3,651.

The percentage of rise in the City of Seminole is a gain of 62 per cent. The census shows Seminole's population at 5,809, and the county's population of 12,021.

**Philosopher Admits Latest Summit Meeting Flopped, But Asks Which One Succeeded**

Editor's note: The Martin County Philosopher on his grass farm on Mustang Draw sounds a little serious this week, but he'll get over it.

Dear editor:

One of my neighbors was feeling gloomy last week after the failure of the celebrated summit conference in Paris, the one that Khrushchev walked out on and wouldn't even shake hands with President Eisenhower at, which is not much of a secret weapon, if you ask me. I've known people who got mad at each other and wouldn't shake hands for years, some-times they wouldn't even talk, although it's hard to imagine Khrushchev getting so mad he'd wind up in that condition.

But what I started out to talk about was the gloomy feeling my neighbor had.

I don't look at it that way. I mean, I've been reading about summit conferences for years, about how the fate of the world rested on the success of this one or that one, but what I'd like to ask is: has there ever been a successful one? Which one was it?

We've had lots of summit meetings that didn't bust up like this last one, where everybody shook hands three or four times a day.

My neighbor ought to take heart. A summit meeting is sort of like a P-T-A meeting. It's important, but sometimes not as important as its participants imagine.

Yours faithfully,  
J. A.

South Pasadena, Calif. Review:

"A proof that private enterprise can do it better is pointed up by the operation of the Canadian railroads. During the past 15 years the Canadian Pacific Railroad, a privately owned railroad system, earned a profit of 448 million dollars. At the same time the publicly owned and managed Canadian National Railroad system showed a loss of 633 million dollars."

"The Canadian Pacific (privately owned railroad) paid 368 million dollar in dividends to its stockholders and 340 million dollars in income taxes to the Canadian government. The Canadian National paid no taxes, but the taxpayers had to make up the deficit on its operation."

Mrs. Filmore Epley and Mrs. P. M. Bristow were in Lubbock last week.

Pvt. and Mrs. Jimmie Henderson were honored Friday night with a picnic dinner at the city park.

Friday, May 25 at 7:15 p.m. at the high school auditorium, Mrs. Edmund Tom and Mrs. O. B. Bryan will present the Rhythm Band.

PFC. H. C. Burnam is home from McClosky Hospital, where he is taking treatment. He received a leg wound while serving in France.

Mr. and Mrs. John Lattimore of Cisco arrived in Stanton to make their home. Mr. Lattimore purchased a half interest in the Gulf Service Station with Clark Hamilton.

Miss Anelia Peters, student at Texas Tech, Lubbock, was home to visit with her parents, Mr. and Mrs. S. G. Peters.

Mrs. Charley Cravens is visiting her sisters in Duncan and Oklahoma City, Oklahoma.

Mr. and Mrs. W. S. Barnhill of Stanton has received a letter from their son, Pvt. Ray Barnhill, that he has been awarded a Bronze Star. He is serving somewhere with the First Combat Cargo Command.

**Texas A&M Annual Rural Conference Opens In June**

"The interrelation of the Rural Church and the Larger Rural Community" is the theme for the 15th annual meeting of the Rural Church Conference. The meeting will be held on the campus of Texas A&M College, June 20-22.

According to Tom Prater, extension farm management specialist, Pastor Jesse W. Roberson, Carlisle Methodist Church, Price, Texas, is president of the Conference organization. The meeting is sponsored by Service, Experiment Station and A&M College and all denominations are invited to participate.

Prater said the program would include items of interest to rural church leaders including discussions on moral responsibilities, traffic safety, pastoral counseling, cancer research, the changing role of agricultural extension service, and the rural church adjustments needed to meet the changes of rural life.

Dr. Joseph Ackerman, managing director, Farm Foundation, Chicago, Illinois, will be one of the featured speakers of the Conference. Other speakers will include staff members of the sponsoring groups and pastors.

**PERSONALS**

Mr. and Mrs. Norman Wilson of Houston spent Wednesday with Mr. and Mrs. J. R. Murdock.

**No Date Set For Bracero Discussions**

Officials of the House Rules Committee said no date has been set for considering the Mexican farm labor bill recommended by the House Agriculture Committee last week.

The bill would extend for two years beyond June 30, 1961 for present law which authorizes the importation of Mexicans to work on U. S. farms.

The bill also specifies that the secretary of labor does not have authority to regulate hours and wages of the workers.

Opposition is expected from some Rules Committee members. Rep. W. R. Poage (D-Texas) said. He is a member of the Agriculture Committee and a backer of the bill.

The Texans said provisions regarding wage-hours authority was adopted because Secretary of Labor James Mitchell has claimed such authority under the 1933 Wagner-Peyser Act. Poage said the Agriculture Committee considers farm workers are excluded from coverage of that and other labor laws.

**NOW LOOK WHAT CORVAIR'S GONE AND DONE!**

The same Corvaire that tallied a thumping 27.03 miles per gallon\* in the Mobilgas Economy Run... went right on to climb Pikes Peak earlier in the spring than any car has ever tried!

We wanted to show you what the fabulous traction of Corvaire's rear-engine design and the sure-footedness of four-wheel independent suspension really mean. So the identical Economy Run car went right on to 14,110-foot Pikes Peak—and right up to the top of that savage mountain, on April 15, still deep in winter's snow and ice. No other car—even specially equipped—had ever been able to conquer that nightmare alpine road so early in the spring. But Corvaire (with United States Auto Club officials aboard to certify that not one nut or bolt was changed) purred right to the summit without chains or even snow tires! That just underscores the fact that Corvaire is totally unique. But you'll find that out the first five minutes you're at the wheel!

## This Week In Washington

With CLINTON DAVIDSON

### More Than Enough

It is apparent that this session of Congress, after two months of argument, will not pass farm legislation which would be acceptable to President Eisenhower and Secretary of Agriculture Ezra Benson.

Both the Democratic leadership in Congress and the President agree on the problem, and on the necessity for action, but they are as far apart as ever on legislation. The problem is caused by too much production.

President Eisenhower and Secretary Benson contend that the problem can be solved by removing production restrictions and permitting farmers to make their production decisions on the basis of free market prices.

Democratic farm leaders in Congress insist that this would result in more production and increased surpluses, as well as lower prices and reduced income for farmers. It would, they contend, "bankrupt American agriculture."

**A Question Of Supports**

Differences are mainly over the question of how much, if any, responsibility the government has to protect farm prices and income. Democrats who favor high supports point out that the government sets minimum wages for labor and gives manufacture tariff protection on prices.

Republican leaders contend that price supports which encourage excessive farm production and result in huge surpluses are both costly and, in the long run, damaging to farmers because they prevent "necessary adjustments in production."

There is doubt as to whether price supports have been the only, or even a major, cause of the tremendous increase in farm production in the past 25 years. Price supports have not prevented a 30% decline in farm prices and a 35% drop in farm income during the past 10 years.

"Farm income, in terms of what dollars farmers earn will buy, has dropped to the lowest level since World War II while non-farm buying power has doubled. Farmers, unquestionably, have not shared in the general rise in national prosperity."

**Economic Report**

President Eisenhower's Economic Report to Congress throws considerable light on what has been happening in agriculture over the past quarter of a century. It does not, however, offer a solution to the

problem.

Farm output per worker, he reports, has increased by almost 350% over the 1939-39 average. It is almost two and a half times the 1940-49 average. Farm production per worker is increasing at almost three times the increase by industrial workers.

Crop yields per acre in cultivation have almost doubled in the past 25 years. Farmers are using three times as much power machinery as they did in the 1930s and five times as much fertilizer. The number of farm workers has declined by almost 50%.

Mr. Eisenhower compared American agriculture with that of Russia. Production per capita in the U. S. in 1958 averaged 2,325 pounds of grain and 185 pounds of meat. In Russia the average was 1,200 pounds of grain and 70 pounds of meat.

In the United States workers spend an average of 24% of their income for twice as much meat and food grains as Russian workers buy for 40% of their income. There should be more emphasis on our food lead and less on Russia's lead in sending a man to the moon.

### Johnson Says U.S. Must Act To Get Water

Sen. Lyndon Johnson said Sunday that unless the United States takes steps now by "1975 out country will face a severe and possible disastrous shortage" of water.

The senator said the water problem is nationwide and "concerns not only arid sections of our land where water shortages are a daily fact of life. It also concerns traditionally rich regions where spot shortages of water are now appearing."

In his weekly radio talk recorded in Washington and broadcast over Texas stations, Johnson said the answer to the problem lies in sea water and in brackish water.

"Our present efforts to convert these vast reservoirs of salt water into useable form are inadequate to meet the national demand for fresh water in the decades immediately ahead," he said.

"We are in a race against time,"

## SOIL CONSERVATION DISTRICT NEWS

### OUR SOIL ★ OUR STRENGTH

MARTIN-HOWARD SOIL CONSERVATION DISTRICT  
Jack Buchanan, Bob Cox, Bernard Houston, Larry Shaw, J. D. Crawford.

A Great Plains Conservation Program contract was recently approved by the Soil Conservation Service for Hugh R. Foster's farm about 22 miles North of Stanton. Foster plans to install underground pipelines for his sprinkler irrigation system with federal cost-share assistance. He also plans a conservation cropping system for his farm.

A straight line is the shortest distance between two points and a straight furrow on rolling land is the shortest line to soil destruction.

William J. Sprawls has made application to the Soil Conservation Service for participation in the Great Plains Conservation Program. Sprawls has about 600 acres he plans to use as a stock farm and plans to develop a conservation plan of soil to be submitted to the S. C. S. for approval.

Prosperity does not start at the factory payroll window, but comes from the ground up. Soil makes big business possible.

Range reseeding was recently completed on M. H. Nance's livestock farm 20 miles North of Stanton. Nance reseeded native grasses on land that was root-plowed last year to control mesquite. Other farmers and ranchers who have seeded grasses recently include J. V. Sanders, Lila Flanagan, F. W. Henson, and Horace Blocker.

"The wealth and strength of a country are its population, and the best part of the population are the cultivators of the soil. Independent

Johnson added.

"That's the reason that this week I introduced a bill aimed at putting us in a position to meet our coming water crisis."

"The purpose of the bill is simple: It provides for a speed-up in the search for economical methods of converting saline water to everyday use. It removes restrictions of both time and money on this work. The bill also makes available loans to cities and towns wishing to build their own developmental conversion plant."

He said that studies show that by 1975 the United States will be using 90 per cent of the present available supply of water compared to the 60 per cent being used at the present.

"The water crisis is already severe in some areas. It is plain that this crisis can only get worse unless we act," Johnson said.

"To do this, we must turn to our inexhaustible sources of saline water. The water is there. It is up to us to find ways and means to tap it in time."

farmers are everywhere the basis of society and true friends of liberty."—Andrew Jackson.

Several ranchers in the Martin-Howard Soil Conservation District plan to practice brush control by aerial spraying mesquite on their land in the next few weeks. Some ranchers who plan to spray mesquite are: F. D. Broedlove, K. F. Campbell, Dick Knox, Juliette Wolcott, and Waddell Strain.

### A&M Nominates Ridgeway For Extension Job

Richard L. Ridgeway, a native of Brownfield, Terry County, will join the headquarters staff of the Texas Agricultural Extension Service on June 1 and as associate entomologist.

In making the announcement, Extension Director John F. Hutchison said, the new staff member would work with C. F. Garner on the cotton insect control program and assist county agents with their county entomology programs. He will, however, work in the broad field of entomology including livestock, vegetables and other crops.

Ridgeway was valedictorian of his Brownfield High School class and was an honor graduate of Texas Technological College where he received a B. S. Degree in agronomy in 1957. He was a member of Tech's national and international winning senior crops judging team.

He holds an M. S. degree from Cornell University in economic entomology and is now completing work for his Ph. D. degree from that same university. His doctorate is also in entomology with a minor in plant pathology.

The new staff member grew up on a Terry County farm. He holds the State Farmer degree in Future Farmer work and was a well known exhibitor at fairs and stock shows. His family still makes their home in Terry County.

Ridgeway is married and will make his home in the Bryan-College

## SOCIAL SECURITY NEWS

In order to receive social security disability benefits, only those are eligible who have a permanent disability—that is, a disability which is so severe that it prevents doing any substantial gainful work.

H. P. Thomas, District Manager of the Odessa social security office, emphasized "The disability which the claimant has must be a condition which is expected to last indefinitely and one which will not likely improve with time or medical treatment."

Many people think a partial, or temporary, disability is sufficient to enable them to receive disability benefits until they can return to substantial work and substantial earnings again. In effect, they believe that the social security disability payment is a "stop-gap" income on which they can depend until they are well enough to return to work.

Station area when he assumes his new position.

Thomas stressed that such provisions are not a part of the social security law.

"Rather," he said, social security benefits are intended to provide some relief from loss of income due to a permanent disability. "If the disabling condition will improve with time, or with medical treatment, or if the claimant can work at a job that is less demanding than his work, he will not be considered disabled under the social security law, and should not count on receiving disability benefits."

Thomas added that the local office has a booklet titled, "How Disabled Must You Be?" which sums up briefly the major points of the disability provisions in the law, and he suggested that anyone desiring further information should write or telephone the Odessa social security district office, and ask for a copy of this booklet. The office is located at 1428 East 8th Street, or telephone Federal 2-9423.

### A Comparison

A number of Americans, including Alf M. Landon, former Governor of Kansas and 1936 Republican candidate for President, see a distinct parallel between the recent behavior of Nikita Khrushchev and that of Adolf Hitler just before the outbreak of World War II.

Landon told reporters in New York that Khrushchev, by torpedoing the Paris Summit conference and engaging in tirades aimed at President Eisenhower, had put himself in the same position that Hitler was in just before the outbreak of hostilities in 1939.

Those old enough to recall those tragic days will recall that Hitler's tactics were strikingly similar to those now being used by Khrushchev. They will remember, especially, the conference at Munich at which Hitler met with Prime Minister Neville Chamberlain of Great Britain and other Allied representatives and used every means at his command to browbeat them into accepting his terms. He succeeded to a remarkable degree, so that Chamberlain went back to London with a signed agreement which he declared would guarantee "peace in our time." Shortly after that, Britain and Germany were at war, Hitler having broken the promises he had made to Chamberlain.

For years before the outbreak of war, Hitler stormed and belittled his defiance of the Western powers and made one aggressive move after another. Finally he made one too many, and the war was on.

Khrushchev is using the same tactics today. Drawing a comparison between the Russian and the Nazi, Landon said: "Both engaged in an intense propaganda drive that, as far as Hitler was concerned, ended in catastrophe for Hitler and the rest of the world."

He said history should teach Khrushchev a lesson in view of the course he is pursuing.

But dictators never learn anything from history. Each new dictator thinks he can succeed where others have failed.

Few believe Khrushchev wants war, despite his truculence and disgusting behavior. But, like Hitler, he might go too far and provoke one.

The free people are hopeful, even if the outlook is gloomy. But with the world in its present state, no one knows what may happen. Truly, these are dangerous days in which we are living.—The Lubbock Avalanche-Journal.

### Alternative To Delinquency

Former President Herbert Hoover is Chairman of the Board of Directors of the Boys' Club of America. At the organization's 54th annual convention he said: "We hear much these days as to the causes and the growth of youthful delinquency. The blame is usually put on the failure of parents; the failure of religious training and the infections from the TV and radio."

"But one cause is too often overlooked. That is that the boys in many of our slum or congested areas have no place to go for aid and play except the streets. Being self-starting dynamos of energy and also being gregarious, they join in groups. These groups too often step first into mischief and from there to crime."

The Boys' Clubs provide an alternative. The members are organized into sports teams instead of into gangs. And the clubs maintain shops and reading rooms where the boys are given the opportunity to determine their bent in life.

These clubs need financial support. It costs about \$16 million a year to maintain the present clubs, and new ones are constantly being started. Their only source of revenue is voluntary donations. And every American should give, no matter how small the amount he can afford. The same thing is true of other and similar institutions—the Boy Scouts, the Girl Scouts, the Campfire Girls, and so on. All of them, as Mr. Hoover points out, are short of funds. That is a condition that urgently needs to be remedied.

### Cap Rock Coop Gathers Steam But Off Pace

Cap Rock Electric Cooperative picked up some steam in April, but it is still running off last year's pace.

The KWIs purchased during April stood at 6,996,190 as against 7,462,530 the same month last year, and sales were 11,411,557 as against 6,629,187.

For the first four months of the year, purchases have amounted to 14,073,740 KWH as compared with 15,403,220 for the same period in 1959. Sales reached 11,411,487 through April of 1960.

Caprock now has 2,139 miles of line energized, an increase of 87 over a year ago, audit has 4,260 members connected, or 221 more than was the case at the end of April in 1959. Six miles of line were added in April of this year and 23 members were tied to the system.

Most of the decline in power consumption is attributed to the higher-than-normal moisture in the early

### Grassroots Opinion

Plattsmouth, Nebr., Journal: "It should be remembered that the United States is the most powerful country in the world, and certainly the richest, and therefore we encounter a certain amount of resentment or envy, among the people of poor, less fortunate countries. If we flout our wealth, and are loud and generally bombastic, it makes a poor impression on the more quiet, less aggressive people of more downtrodden countries."

"Therefore, the conduct of American tourists will be increasingly important in the years to come."

part of the year. Irrigators used comparatively little power until late March and early April.

Patronize your hometown merchant.

Lakes, state parks and roadside parks are indicated. Texas' history, geography, and present opportunities are summarized.

In line with the state's tourist-seeking policy, it is headed, "All of Texas Welcomes You."

To get the map, write the Texas Highway Department, Austin 14, or drop by a highway district office and travel bureau. County tax offices have cards on hand to request maps.

**OIL ALLOWABLE UP**—Texas Railroad Commission retained the eight-day production pattern for the Texas oil industry for June, but because June has one day less than May, daily permissible production will be slightly higher.

Statewide allowance for June will be 2,643,516 barrels a day, a 47,108 barrel a day increase from May.

Several major oil companies asked the Commission to set nine producing days in June, indicating they expected an increase in demand for Texas crude within the next month.

**REPAIR FUNDS OKAYED**—Leg-

Eugene, Ore., Register - Guard: "Under present law a person must forfeit his social security money if he makes more than \$1,200 a year. This is unrealistic."

"It would be different if social security were some kind of largess from the government. But it isn't. It's something the older has coming to him. He contributed to the fund, and so did his employer, while he was working. It's his money. He shouldn't have to agree to live a life of poverty in order to get it."

Board also heard a report that a state job classification study, detailing requirements for 1,225 different jobs, is nearing completion.

**MED SCHOOL MONEY SOUGHT**—A new money request awaiting the Legislature next year will be that of the University of Texas for \$100,000 for the planning of a new medical branch in San Antonio.

UT Regents said the money would be used to get specialists in medical center planning to estimate what would be required. With this information the board could draw up plans and a request for funds for the center itself from a later Legislature.

Members of the rhythm band are: Fawn Briggs, Mark Briggs, Leslie Butler, Chipper Coggin, Tommy Deavenport, Mark Eiland, Rexann Gra-

### Ask Dollar For Labor Of Braceros

The joint United States-Mexico Trade Union Committee has voted to hold its next meeting in Del Rio-Ciudad Acuna next April.

The group closed a three-day meeting Thursday with adoption of a resolution calling for a \$1-an-hour minimum wage for Mexican contract workers.

The conference said the resolution was passed in view of the price inflation which has taken place in the United States since the present minimum wage standard of 50 cents an hour was set in 1951.

The meeting also urged the United States to avoid letting braceros into the United States in excessive numbers. It said this not only displaces domestic workers, but lower wages paid Mexican workers.

Mr. and Mrs. Paul K. Jones and sons, John Calvin and Paul Allen, visited in Ruidoso, New Mexico over the week end.

ham, Mindy Haislip, Walt Haislip, Donna Hall, Karolyn Herzog, Rosalyn Louder, Jo Lankford, Carla Perry, Kathryn Pickett, Leslie Sebesta, and Debra Turner.

### LEGAL NOTICE

**THE STATE OF TEXAS**  
To any SHERIFF or any CONSTABLE within the State of Texas, GREETINGS:

J. C. EPLEY, Guardian of the Estate of William Thomas Epley, a Person of Unsound Mind, No. 587, in the County Court of Martin County, Texas, having filed in said County Court his FINAL ACCOUNT of the condition of the Estate of William Thomas Epley, a Person of Unsound Mind, together with an Application to be discharged from said Guardianship, you are hereby commanded, that by publication of this writ once in a newspaper regularly published in the County of Martin, Texas, and said publication shall be not less than Ten days before the return date hereof, you give due Notice to all persons interested in the Account for Final Settlement of said Estate to file their objections thereto, if any they have, in said Court, on or before Monday, the 6th day of June, 1960, at 10:00 o'clock, A. M., when said Account and Application will be considered by said Court.

**GIVEN UNDER MY HAND AND SEAL OF SAID COURT, at my office in the City of Stanton, County of Martin, Texas, this 13th day of May, 1960.**  
(SEAL) DORIS STEPHENSON,  
Clerk, County Court,  
Martin County, Texas.

# LIQUID FERTILIZER . . .

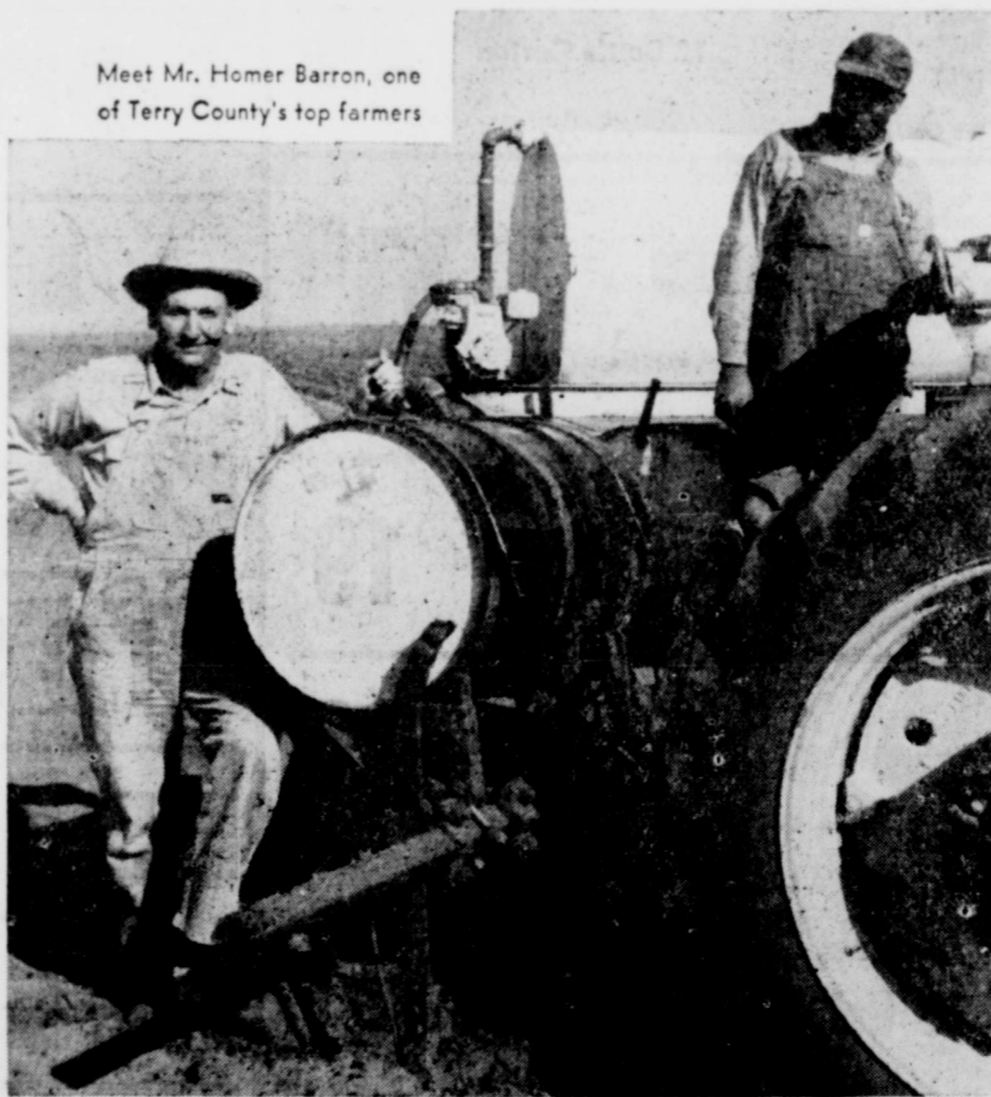

## The Best Way to Fertilize!

Stanton Chemical & Seed Co. is now dealer for Liquid Fertilizer—manufactured by the Fertilizer Division of Goodpasture Grain & Milling Co., Brownfield, Texas. Liquid Fertilizers have received wide acceptance in the past few years over the South Plains area—and have been proclaimed by many farmers as the one fertilizer "just right for every type of fertilizing job."

When you buy and use Liquid Fertilizers you are getting only the ingredients which you need. Each "nurse tank" full of Liquids is specifically tailored to your specifications. When you apply Liquids—either before or at planting time, and again as a booster at side-dressing time, you are giving the plants the needed nutrients to help produce a bumper crop. And, as the name implies, Liquid Fertilizers—by virtue of being a liquid—are ready to go to work for you instantly. There is no need to wait for moisture to break the fertilizer elements down—they are in the correct 'state' to go to work at once.

ASK THE MEN WHO USE IT . . . THEY SAY:

## LIQUID FERTILIZER Is Best

Meet Mr. Homer Barron, one of Terry County's top farmers

Shown at left, is Homer Barron, who farms a few miles northwest of Brownfield. He is just one of the many users of Liquid Fertilizers, and here is what he had to say: "It's the best for me . . . I didn't realize how easy and convenient fertilizing could be until I changed to LIQUID FERTILIZER. With the 3-row rig mounted on my tractor, we covered about 45 acres a day, and put down 265-lbs. of 16-16-0 per acre. It's so simple to apply that I hardly ever went about the rig—my driver had very little trouble with it . . . and since it is a 'service station' type of operation, only one man is needed to get the job done. Yes sir, it's 'King' with me."

Quotes like the above are continually coming to us from farmers who are now using Liquid Fertilizer. Everyone of them are very enthusiastic in their praise of the 'service station' type of operation. By that is meant, there is no heavy lifting. You haul the fertilizer to the field in a 'nurse tank', which we loan you, and it is equipped with a gasoline motor and pump to fill up the applicator on your tractor. This is the one farming operation that most of the work has been taken out of.

Another outstanding feature about using Liquid Fertilizers is the flexibility of ways it can be used. Many farmers are planting and fertilizing at the same time. Others, last year, side-dressed and cultivated, and some of them even applied insecticide, side dressed and cultivated in the same operation. The flexibility of this type of farming operation is practically unlimited.
