STANTON, MARTIN COUNTY TEXAS (79782), THURSDAY, JUNE 30, 1966

8 Pages—Price 10c

VARIETY

By NEAL ESTES

A judge in Washington has granted MRS. WILLIAM O. DOUGLAS a divorce from SUPREME COURT JUSTICE DOUGLAS and ordered him to pay \$500 monthly to her. She charged cruel treatment in her divorce petition. The American people can't legally divorce DOUGLAS, but some of us would if we could and on grounds greater than those used by the ex-MRS. DOUGLAS. The Justice is one of the last living legacies bequeathed to the people of that nation by the late FRANKLIN ROOSEVELT, the architect and original creator of the blueprint of the Great Society.

The BELL TELEPHONE SYSTEM has developed a new device to trace obscene telephone callers. This is a fine step forward. A story appeared in state newspapers this week telling of the catching of two users of obscene language by the telephone trap. It appears elsewhere in this issue of the paper. Of all of the underhanded messages in the world, none could ever surpass the cowardly obscene and often intoxicated telephone caller. Now they can be caught, jailed, and the privilege of having a telephone denied them.

History tell us that we have elected two school teachers to the presidency, WOODROW WILSON and LYNDON JOHNSON. Both teachers found their administrations leading to escalated war. WILSON justified our fight in World War One as being one to "Make the World Safe for Democracy." JOHNSON administration is waging war in Viet Nam to "Stop Aggression." Under WILSON we had the help of France. Under JOHNSON we have lost the help of France. WILSON won the war and lost the peace. JOHNSON is going to win too and let us hope that LYNDON wins the true peace we have always sought. Let us further hope and pray that peace comes before another American Independence Day.

With the approach of July 4, 1966 the anniversary of American Independence, declared on that date in 1776, let us remember to examine our heritage again. This country is the greatest in the world. It will continue to be as long as we cling to the cherished concepts of the freedoms we have always been willing to fight and die for. We must maintain progress and we must accept change but not to the drastic point of completely surrendering all of the fine things that made America truly the great and beautiful.

In the day of the horse and buggy, editors did not anticipate the day when they would be cautioning motorists and travelers to be careful on the highways over the Glorious Fourth. Old-time editors simply penned a few lines warning against the over-running of the horse. We wish to appeal to the operators of the horseless vehicles to control their cars on the highways during the long week-end. Drive soberly and with care and concern for your fellow car owner. Take it easy on the Fourth so you will be around on July 5.

A telephone call from the Sheriff's Department advised the press to inform the people that the office will be closed on July 2, 3 and 4. But, an officer will be available for any emergency.

We deeply appreciated the fine compliment paid the newspaper, the editor and staff by MARTIN L. GIBSON, Justice of the Peace, Precinct One, Martin County. JUDGE (Continued on page 8)

"Hear ye, Hear ye!" And so began the greatest story of our nation . . . the story of our independence, of our forefathers' fierce pride and fighting spirit for the freedom, the rights and privileges they believed belong to men. This freedom is our shining inheritance, our banner among nations . . . to be carried and preserved with watchful vigilance by each generation of Americans. This is the debt we owe this great land of ours. Proudly do we discharge it so that joyfully we may always celebrate this anniversary of Independence.

Pan American Slates Elma L. Slaughter Test

By JAMES C. WATSON
Pan American Petroleum Corp. proposes to drill No. 1-B Elma L. Slaughter as a 10,500-foot Wolfcamp explorer 12 miles north of Lenorah in Martin County six miles east of the Wolfcamp area.

It is 1,320 feet from south and east lines of section 80, block B, Bauer & Cockrell survey, 1 1/4 miles north and slightly west of the same company's No. 1 Slaughter, a re-entry of a former 12,075-foot Ellenburger failure which Pan American cleaned out to 10,510 feet and then set 5 1/2-inch casing at that point.

No information has been released on No. 1 Slaughter since it was reported several weeks ago that the project was testing on perforations between 9,106 and 9,442 feet, which at one time were thought to be opposite the Strawn.

Greathouse, Pierce & Davis of Midland No. 1 Armstrong, five miles southeast of Ackerly has been completed as a Pennsylvania pool opener in Northwest Howard County.

On the 24-hour potential it yielded 203 barrels of 41-gravity crude flowing on a 12-64-inch choke with gas-oil ratio of 501-1 from open hole at 9,080-87 feet.

Southwestern Natural Gas Inc. of Midland has completed one project and staked location for another in Southeast Glasscock.

No. 1 M. E. Holder was potentiated as a 1 1/4-mile northeast extension to the Spraberry Trend Area for 232 barrels of 40.1-gravity oil per day flowing through a 16-64-inch choke. The perforated interval between 7,761 and 8,295 feet was fractured with 80,000 gallons. Gas-oil ratio was 980-1 and surface pressure gauged 225 pounds.

Location is 990 feet from south and west lines of section 15, block 35, T-5-S, T&P survey, 13 miles southwest of Garden City.

Southwestern spotted No. 2-A Criesman as a 1/2-mile east outpost to the area, 14 miles southwest of Garden City.

It is 1,330 feet from north and east lines of section 12, block 36, T-5-S, T&P survey, and is to be an 8,600-foot test.

Local Milk Price Hike Gets Action

An unprecedented, quick, no-advance-notice, price hike in sweet milk sales was heavily protested by Martin County housewives here Monday.

Prices on one brand jumped eight cents for a half-gallon carton to an all-time high of .63 cents.

Milk prices, at the retail level, in Big Spring and Midland had been pegged at .52 cents per half-gallon. The increase, by the same company, in those towns amounted to one-cent per half-gallon carton on the retail level. The same company bringing on the unheralded prices here Monday was selling their milk through retail outlets in Big Spring and Midland for .53 cents a half-gallon Wednesday morning.

The same price-hiking distributor had been bringing milk into Stanton where it could be retailed for .55 cents per half-gallon.

Why Stanton mothers must be penalized even three cents per half-gallon was more than a lot of folks understood, but the price hike was out of reason.

Dollar Day Slated July 5 In Stanton

There will always be a Dollar Day in Stanton and Martin County.

Ordinarily the special day in the month is held on Monday, but this time Monday is a holiday. Most stores will close Monday, July 4, to observe Independence Day. So, Dollar Day, will be held on July 5.

Merchants have bought space to bring you a list of their special July bargains in this issue of the paper. We suggest you patronize them. They are holding Dollar Day on the same date, as usual, in nearby cities too, but please stay at home and shop with merchants who advertise in the hometown paper.

We may be a day late but there is no necessity to suspend July 5 values altogether. Dollar Day is about the only regular business promotion we have left in Stanton. It was established by The Stanton Reporter. Let's hold on to it!

Merchants doing business in the county who belong to the Chamber of Commerce voted this day to close at the beginning of the year. Merchants who do not belong to the chamber usually take off for a day or a half day too. Some firms, either due to over-work or lack of business, are going whole-hog and closing up from Friday night until Tuesday morning. We can't identify them because the place for them to establish their identity and closing intentions was in the columns of the official county newspaper.

Old Settlers Reunion Slated For July 11-12

Bob Cox, president of the Martin County Old Settlers Reunion, said Wednesday dates had been selected for the traditional annual gathering of old-timers here on July 11-12.

Stores Will Close For July Fourth

Stanton is due to be closed up tighter than Dick's hatband here Monday, July 4, in observance of Independence Day.

The day is a traditional closing time all over the country. Merchants doing business in the county who belong to the Chamber of Commerce voted this day to close at the beginning of the year. Merchants who do not belong to the chamber usually take off for a day or a half day too. Some firms, either due to over-work or lack of business, are going whole-hog and closing up from Friday night until Tuesday morning. We can't identify them because the place for them to establish their identity and closing intentions was in the columns of the official county newspaper.

Important Notice To Subscribers

We have assumed that the delinquent subscribers on the mailing list desire to continue taking the paper or they would have notified us otherwise. We do not want to abruptly terminate the subscription of any person, but paper, ink and labor costs now make it essential for us to remove all past due subscribers by the 15th of July.

Press Time Bulletin

WASHINGTON, D. C. — Congressman George Mahon, this district, has advised Neal Estes, editor of The Stanton Reporter, that a full investigation at the federal level will be made to determine why milk prices were drastically increased in Stanton on Monday of this week.

Stanton Lions Hear Springer At Tuesday Meet

Stanton Lions met in the regular session Tuesday at noon at Belvue Restaurant. Accompanied by Sweetheart Pauline Wood, roaring Lion Johnny Rouché led the group singing.

Committees have been meeting for sometime working out details for what is always a good local celebration. The last committee meeting was held on the evening of June 27 at Cap Rock auditorium. Another vitally important meeting will be held sometime next week, according to Mrs. Morgan (Buelah Mae Houston) Hall, long time faithful and efficient secretary - treasurer of the reunion.

Cindy Britton Attended State 4-H Council

Cindy Britton attended the State 4-H Council in Houston, which was held on the campus of the University of Houston, this past week. Cindy is secretary of the state organization.

LCC Registers Record Speaking Enlistment

A record-setting 224 students signed up for summer school classes at Lubbock Christian College June 1.

Thirteen foreign students are included in the group, representing 10 different countries. Paraguay, Zambia, Ireland, the Philippines, Japan, Iran, Lebanon, Panama, Syria and Sauda Arabia all have representatives in the student body.

Residents of 14 states are also attending during the first session. The majority of students, of course, are from Texas, with Lubbock boasting 54 enrollees.

Local Women Attended BSP Convention

Mrs. Bob Thrallkill, Mrs. Wallace Kelly, Mrs. Butch Cain, and Mrs. Nolan Sorrels have just returned from flying down to Corpus Christi to attend the Beta Sigma Phi State Convention, with headquarters at the Driscoll Hotel, June 24, 25 and 26. They attended the various forums, dinners, campaigns, business meetings, and entertainment.

Over 1,400 Beta Sigma Phi registered, and had the opportunity to meet the guests, and speaker from the International office headquarters in Kansas City, Missouri. While there, they also enjoyed the wonderful sea food, swimming, boat excursions, and other tourist attractions. The convention will be held in El Paso next year.

found printed in the columns of The Stanton Reporter over the signature of local firms in the next issue of The Stanton Reporter.

We urge our readers, both in the county, and those residing out of Stanton to be on the lookout for these fine early day bargains.

The chief story on page one next week will feature the Old Settlers Reunion. Be sure and get the next copy to read all about the big doings the reunion folk have in store for you.

Insurance Rate Hike Possible

The average motorist in Martin County will pay \$4 more for automobile insurance if the proposed change in rates is made by the State Board of Insurance, according to the Southwestern Insurance Information Service of Dallas.

Present cost of insurance on a new Ford or Chevrolet private passenger car driven to and from work and not driven by a male under 25 years of age is \$138. The new cost would be \$142. This includes basic liability coverage of \$10,000 for injury or loss of life of one person, \$20,000 for two, and \$5,000 property damage; \$100 deductible collision; and full coverage comprehensive insurance.

Under the new rates, motorists would pay \$1 more for bodily injury and property damage liability and \$5 more for comprehensive. But the cost of \$100 deductible collision would be reduced \$2.

Cost for the same coverage but with \$50 deductible collision would be increased \$4 also, from \$151 to \$155.

Other types and older cars would have differing rates. Texas has 26 rating territories and eight automobile classifications. The cost estimates given are for cars in classification 1B, which includes about half of the private automobiles in Texas.

For cars in this classification and insured under \$100 deductible collision policies, insurance would cost less in nine territories and remain unchanged in two. Costs for \$50 deductible policies would be lowered in seven territories and unchanged in one.

Even with the rate increases, Texas would rank about 30th among the states in the cost of automobile insurance to policyholders.

The Letter Box

BIG SPRING STATE HOSPITAL
P. O. Box 231
Big Spring, Texas
June 24, 1966

Stanton Reporter
Stanton, Texas
Dear Sir,

Your response to our recent letter asking for a subscription to your newspaper for the patients' library was very gratifying. News from a patient's own home town newspaper keeps him aware of life outside the hospital, which is a step toward better mental health.

We appreciate the subscription and on behalf of the patients and staff, thank you for your interest in our hospital.

Sincerely,
Mary Cochran
(Mrs.) Mary Cochran
Volunteer Coordinator.

New Telephone Device Helps Nab Obscene Caller

New telephone equipment to help trace obscene phone callers netted its first offender in Dallas early Saturday. Southwestern Bell Telephone officials reported.

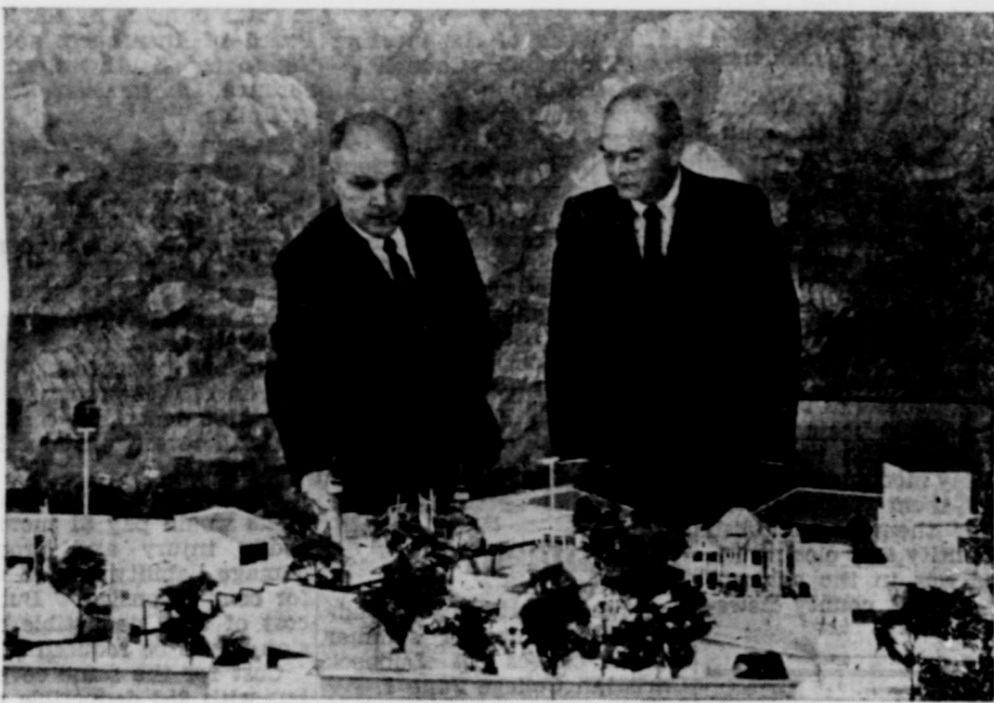

Richard Bates, 21, was charged with making an obscene and indecent telephone call to a Mesquite housewife. Telephone officials said the new polarity trap which ties up the offender's phone line was used to trace the call to the woman's residence.

An obscene phone call was placed at 1:21 a.m. Saturday

to the housewife and the phone call lasted until 1:50 a.m. Bates was arrested shortly after 2 a.m., sheriff's deputy A. D. McCurley said.

Bates was the second person charged in the North Texas area with making obscene phone calls since the new phone tracing equipment has been installed, phone company officials said. The first was arrested in Fort Worth Thursday.

HEMISFAIR PREVIEW—HemisFair president Marshall Steves (left) points out features of a HemisFair scale model to Nelson Jones, a director of Humble Oil & Refining Company. Mr. Jones announced that Humble will restore one of the historic buildings in the fair area. He said the building, which will be a place for fair-goers to relax, will also have a travel service, a movie theatre, and space for art and cultural exhibits. Domestic and foreign governments and major industries and services from throughout the world will be represented with exhibits at HemisFair's 92-acre downtown San Antonio site. The first major international exposition ever scheduled in the Southwestern United States, HemisFair will run from April 6 to October 6, 1968.

The Exchange Desk

STAMFORD AMERICAN: "Final preparations were taking shape this week for the 36th annual Texas Cowboy Reunion slated here July 1, 3 and 4."

THE GRAHAM REPORTER: "Jack Kultgen, State Highway Commissioner from Waco, was guest speaker for the Rotary Club Friday at noon. Mr. Kultgen gave an informative explanation of the duties, plans, and difficulties of the State Highway Commission."

THE MEMPHIS DEMOCRAT: "Citizens of Memphis were reminded again today by members of the Chamber of Commerce committee for community improvements that time is drawing closer for judging the city beautification contest. Prizes of \$25, \$15 and \$10 will be awarded and judging is based on the total appearance of the premises."

THE MUNDAY TIMES: "Starting a full week of activities in the vegetable industry for this area, the Mun-Texas Cold Storage Corp. plant in Munday was officially opened last Monday, the first of many varied activities of Vegetable Week. This plant had been in operation for several weeks, however, and potatoes and other vegetables were in storage there."

THE McCAMEY NEWS: "June has proven to be a rainy month in McCamey for this year. Moisture received for the first five months in 1966 totaled 2.99. Rain in June so far totals 3.10, making a total of 6.09 inches for the year."

THE MITCHELL COUNTY NEWS: "Cotton growers in Mitchell County have failed to approve transfer of upland cotton allotments out of the county, Curtis E. Latimer, chairman ASG, said. The voting took place in a mail referendum during the period of May 16 to May 25."

Charlene Bevers Becomes Bride Of Leonard Jones

Charlene Bevers of Stanton became the bride of Leonard Don Jones of Midland in a double ring ceremony at 8 p.m. Friday in the First Baptist Church.

Mr. and Mrs. C. S. Bevers, Jr of Stanton are the parents

of the bride, a senior student at Stanton High School.

The bridegroom, a graduate of Midland High School, is employed in Midland by Williams and Lee Scouting Service, Inc. He is the son of Mr. and Mrs. A. E. Jones of 2411 W. Washington St., Midland.

The Rev. W. H. Uhlman performed the ceremony. The organist was Mrs. Ernest Hock.

Chantilly Lace Gown
Given in marriage by her father, the bride wore a gown of white Chantilly lace over satin fashioned with an ankle-length sheath skirt. The long sleeves of the bodice came to petal points over the hands. The front waistline was accented with a bow design, and her bouffant veil was of silk illusion. She carried a cascade of white carnations atop a white Bible covered with pearls and sequins.

Mrs. David McClure of Midland, sister of the bridegroom, was the matron of honor, and Carol Callaway of Odessa was bridesmaid. They wore street-length dresses of white lace over blue with Empire waistlines. They carried white carnations.

David McClure of Midland was the best man, and Bobby McKandles of Midland was groomsmen. The ushers were Pat Springer and Mike Springer, who also lighted the candles.

Church Decorations
Decorating the church were baskets of white gladiolus with blue ribbon.

The reception was in the Fellowship Hall. Margaret Clardy and Suzanna Poe served the cake and punch. Jerrie Webb of Midland registered the guests.

After the reception, the couple left on a wedding trip to Fort Worth and Six Flags Over Texas. They will reside at 405 St. Joseph Street.

The southern stargazer is a fish which lives near the bottom of the ocean, has eyes on top of its head and an almost vertical mouth.

Bible Comment—

Even Paul Sought Training For His Life

Paul was not long in finding Christian friends although at first the disciple feared him because of the recent zeal he had shown in persecuting them.

But Ananias, a saintly Christian in Damascus, welcomed Paul as a Christian brother. Ananias had been prepared in a vision for the coming of Paul but he doubted, at first, that so terrible a persecutor as Paul would become a disciple so suddenly.

The disciples in Jerusalem were a little harder to convince. They had suffered much more from the fury of the persecutor and were suspicious. It was Barnabas, the rich disciple who had given all his wealth for the Christian cause who vouched for Paul.

It was not unnatural that Paul's former associates in persecution should have been aroused to a high pitch of anger at Paul's defection.

Their fury was so intense that Paul's newfound Christian friends had to help him escape, letting him down from the walls of the city in a basket.

Paul made his way to Jerusalem and again boldly proclaimed his new faith in the Lord Jesus. But he did not stay very long in Jerusalem and his public preaching was interrupted while he sought fuller preparation for his life's mission.

It is difficult to think of a man as intense as Paul being in retreat for any length of time. Probably the years of his preparation were spent in studying, praying and conversing with other men. In this way he would have the opportunity to feel his way into the fullness and richness of his activity as a missionary.

There is a very good lesson for all of us in the fact that so wise a man as Paul felt that he needed preparation. Zeal, even in a man of Paul's stature, is not enough.

Philosopher Finds A Few Flaws In Statements By Gen. De Gaulle And Some Others

(Editor's note: The Martin County Philosopher on his grass farm on Mustang Draw takes a certain look at human nature in his letter this week. The ideas are his, not ours.)

Dear editor:
I don't know how it happened, but I was sitting under a tree out here on this Martin County grass farm yesterday afternoon and looked up and saw a newspaper floating down, must have fallen out of an airplane although it's the first time I've known it to happen, and I kept my eyes on it as it drifted down and memorized where it landed and after I got through resting walked over and picked it up.

According to the main headline on the front page, President Charles DeGaulle of France had just landed in Moscow for a visit with the Russian leaders, but what interested me was his first statement as he got off the plane.

"The whole universe," he said, "knows what importance is attached to the visit I am about to make."

I asked a neighbor what importance he attached to it and he said: "Who's DeGaulle?"

This got me to figuring, and I estimate you can safely say there are hundreds of thousands of Americans who don't know who DeGaulle is or did.

J. L. Sullivan is a patient in the Veteran's Hospital in Big Spring. He is the father of Mrs. Sonny Currie of this city.

Guests of Mrs. Lois Powell recently were her mother, Mrs. Ward Parks of Big Spring, and Mr. and Mrs. Willard Humphry from San Antonio.

EFFICIENT FEEDING AND LIVESTOCK MANAGEMENT

By Dr. Gustav Bohstedt
Emeritus Professor of Animal Husbandry
University of Wisconsin

Molasses A Popular Feed

Anything sweet, like candy or syrup, suggests high calories or fattening properties. Actually the same weight of starch by way of bread, potatoes or corn is even higher in energy. Blackstrap or cane molasses is a justly popular livestock feed, but we must appraise it and use it correctly.

Dr. Bohstedt

Where corn or milo, with 85 to 90% dry matter have about 80 therms of net energy per 100 pounds, cane molasses with 73% dry matter has 56 therms net energy.

This means that on the basis of those figures molasses has only 80% as much net or productive energy as corn. Under some circumstances molasses may have a higher value than that, in other cases even lower value. A rather common rating is that blackstrap molasses has 75% of the feed value of corn or comparable grain, and must sell at that price differential to be economical.

In areas of cane sugar production the abundance of molasses prompts the tendency of feeding as much molasses to an animal as possible, thus putting the animal in a very laxative condition, and resulting in a rather low feed value for the molasses. I heard a prominent Hawaiian stockman wish for

good old mainland corn instead of having to feed so much molasses.

But where used more sparingly, molasses serves also as an appetizer, especially with low grade forage, and may be worth as much as corn or milo.

With urea rations, molasses serves as a source of the necessary energy for the rumen organisms, enabling them to convert urea efficiently into protein. In this respect experiments have shown that ordinary grain, which releases energy more slowly, serves fully as well as molasses.

Molasses supplies other nutrients, including minerals, that, unless fed in too large amounts, seem to help in the digestion of forages or fibrous materials. Also molasses reduces the dust in rations.

So, however molasses may be rated in terms of grain, it is bound to continue popular as an ingredient in modern livestock rations.

Question: Instead of salt, isn't it possible that limestone, gypsum or oyster shell might be used as a carrier of trace minerals, or as an appetite regulator or protein supplement consumption?

Answer: Of all possible carriers, salt is the most frequently required, also the safest nutrient. California researchers concluded that in comparison with salt, "gypsum (calcium sulfate) was not considered a satisfactory regulator of feed intake."

The intensity of sound is measured by decibels. The reign of Queen Victoria was the longest in British history, 64 years. During World War One, two Comanche Indians were used to transmit messages by telephone. Their language was stranger to the Germans than a code.

RUPTURE-EASER

"WE'LL HAVE THE VOTES"

Dirksen Optimistic Over School Prayer Amendment

Senate GOP leader Everett M. Dirksen has the confidence of an evangelist that his constitutional amendment to permit voluntary prayer in the public schools will pass both Houses of Congress this year.
 "We'll have the votes in the Senate," he said Saturday in an interview. "It will come out of a blue sky. I've already put Mike Mansfield on notice." Mansfield is the Senate Democratic leader.
 Dirksen has almost 50 co-sponsors on his resolution, now pending in the Senate's constitutional amendments subcommittee. He said he has assurances from additional senators that they will vote with him.
 A two-thirds majority vote in each house and ratification by three-fourths of the state legislatures is required to

Fertilizer Tonnage Down — Fertilizer tonnage bought during spring planting months of March and April was down from last year. Texans bought 264,594 tons for the two-month period compared to 306,646 tons last year. C. D. Welch, extension soil chemist at Texas A&M University, says reduced cotton acreage allotments account for part of the decrease.

New Members For 4-H Talent Club — Sixteen new members are ready for initiation into Texas' nationally known 4-H Talent Club. Ceremonies will be held in Amarillo in July. After initiation, the group will go on an educational tour including the American Institute of Cooperation conference held at Colorado State University, Fort Collins.

Dairy Cattle Shortage Forecast — A critical shortage of dairy cows is seen by Shannon Carpenter, Texas A&M University extension dairy specialist at Tyler. Carpenter says dairy replacements are down about 7 percent from a year ago and numbers of cows in milk is smallest in 50 years.

Soil Moisture Tested By Atomic Energy — Agricultural scientists at Texas A&M University's Livestock and Poultry Research Center, McGregor, are using a neutron scattering light to test soil moisture. It sends neutrons out into the soil and captures them as they bounce back. The number of neutrons bouncing back gives an indication of soil moisture, A&M researchers say.

"Thumping or tapping" is not a satisfactory method to use when choosing melons, says Mrs. Gwen Ciyatt, Texas A&M University extension consumer marketing specialist.

It is much safer to devise a few simple external ways to test for melon ripeness. When choosing watermelons, look for deep solid green to grey color with a yellowish color on the underside. Melons that are greenish or white on the underside are usually immature.

Select a watermelon that is symmetrically shaped with a dull, velvety appearance. Slick, shiny surfaced melons are a risk because they are usually overripe.

Americans take automatic washing machines for granted, whether we own them or use them in the automatic laundries, says Mrs. Elsie Short, Texas A&M University extension home management specialist. In many countries, however, any washer is considered a luxury, as well as a major investment. In Europe, the average person must work anywhere from two to almost five times as many hours as a U. S. worker to earn the price of a washing machine.

Planning to retire within the next several years? If so, now's a good time to decide how you will spend your time, says Miss Leota Lane, Texas A&M University extension family life education specialist. Have something to retire to, as well as from, she adds. For good mental health at any age, a person must have a feeling of achievement. All too many people drift without a purpose after retirement, and start feeling sorry for themselves because there are no longer "needed." Hobbies can help you keep alert and young in spirit, and they are outlets for creative self-expression.

Mr. and Mrs. Bob Thrallkill had as their guests recently, Mr. and Mrs. D. P. Turman from Charleston, Mississippi, and Joe McNulty and Mike and Sammy from Holly Springs, Miss.

Hershey Opposes Draft By Lottery

Lt. Gen. Lewis B. Hershey told a congressional committee that selecting draftees by lottery — as has been suggested — would only be substituting "chance for judgment."
 Hershey, the Selective Service director, said he is opposed to this, as well as any centralized computer method of picking youths to serve in the military.
 "I'd be willing to put up with mistakes of the human, local board, rather than relying on a computer," he said.
 Hershey's testimony came as the House Armed Services Committee opened hearings into operations of the Selective Service system in the wake of recent demands for a review and a more equitable method of determining who must serve.

clear. We do need a draft law for now and the foreseeable future. This unpleasant fact of life cannot be wished away."
 The draft law authority to induct young men does not expire until June 30, 1967, and the possibilities are that these hearings will lay the groundwork for any changes before Congress acts then on its future.

Hershey said it is an illusion that such a method will solve any problems in the way draftees are selected. He said the "gravest weakness" of such a system is "the substitution of chance for judgment." Director of the Selective Service for 25 years, Hershey said you can never have true equality in the draft or anything else.
 "No two cases are alike," he said and stoutly defended the system whereby local boards determine the classification a registrant receives. Hershey also strongly defended the deferment system.

The Texas Forestry Association was organized at Temple in 1914 as a non-governmental, non-profit, statewide, privately supported, educational organization, promoting the fullest economic development and utilization of our forests and related resources.
 Earliest existing rings are those found in tombs in Egypt. They were of simple design, made of pure gold. Heavy and massive, they bore the names and titles of their owners.
 Base of the Pyramid of the Sun, near Mexico City, is larger than that of the Great Pyramid built by chops in Egypt.
 In the 1964-65 school year, the nation's 88 medical schools had a total enrollment of 32,428 students and graduated a record 7,409 new MDs.

Texas MD Population Now Exceeds 11,000

At the beginning of 1966, there were 11,218 physicians (doctors of medicine) in Texas and 292,088 in the United States. With the recent graduations from the nation's 88 medical schools, the physician population will reach a new medical milestone and go over the 300,000 mark.

as Medical Association, will, of course, also continue to grow. In addition to the fact that Texas is one of the major "growth" states, new medical programs such as "Medicare" will put an increased load on the present physician population.
 Individual physicians, through their county medical societies, the Texas Medical Association, and the American Medical Association, have done much to increase the physician population through extensive medical career promotion programs, developing medical school scholarship plans, supporting legislation to establish additional medical schools, and other activities designed to attract more young people into the practice of medicine.

The number of physicians in the United States has been increasing faster than the general population for several years. The population of Texas is currently estimated to be 10,700,000. At the present time, Texas has a ratio of one physician for every 954 people. The physician population growth in Texas is expected to be even greater in the very near future with the opening of the new University of Texas South Texas Medical School in San Antonio. The admission of its first class this fall will give Texas four medical schools.

According to the American Medical Association, there are more applicants to medical school, more students enrolled and more MDs being graduated than ever before.

The demand for medical service, according to the Texas

THE FAMILY LAWYER

MRS. R. H. CAFFEY
Librarian

Library Lines

Library Hours: Monday, Tuesday, Wednesday, Thursday 1 - 5 p.m.; Saturday 9 a.m. - 1 p.m.

Memorial donations given the past week in memory of Mr. J. W. Blocker, were from Mr. and Mrs. J. R. Allison of Hereford, Eva Walla of West, and R. S. a and Kathleen Lewis.

Someone suggested that it would be well for you young adults in high school to get ahead with your reading for next semester. Some are trying to do just that, they read a classic with maybe one or two "fun" books to sandwich in between. You profit by both types really. It could prove interesting to try to outguess the teacher and be through with some of the required reading, why not try it?

Laquana Jones has read 12 books on the Reading Club Program, Judy Shippy has read 17, and Debbie Caffey 22. A number of others will finish this week with their first 12. It isn't too late to get started reading, it won't be until the last week or so of August.

Harry Standefor of San Diego, California, has been here visiting friends and relatives, and has joined Mr. and Mrs. Edgar Standefor for a trip to Hot Springs, Arkansas.

constantly for several days and nights, making no effort to hide what they were doing. The detectives denied that this amounted to defamation. But the court agreed with the plaintiff, because the detectives had shadowed him so openly. The judge said their actions, proclaiming to one and all that this man needed watching, spoke more insultingly than words.

A public service feature of the American Bar Association and the State Bar of Texas. Written by Will Bernard.

Louder Than Words

Suppose you walk into a coffee shop, point to the doughnut tray, hold up two fingers. And suppose, after being served, you decide that you aren't hungry after all — and refuse the doughnuts. Could the proprietor make you pay anyhow?

Theoretically, he could indeed. Even though you haven't uttered a word, you have entered into a binding legal contract.

As a rule, contracts are created by oral or written language. But the law recognizes that actions may speak louder than words. If the situation is right, just a nod of the head may mean anything from "do" to "I bid \$100 for that oriental rug."

You can not only enter into a contract but even commit an assault, merely by gesture. The law will weight the surrounding circumstances to decide how much menace the gesture conveyed.

For example:

It was held not an assault for a man to shake an angry finger at his hostess, since she was safely seated eight feet away. And it was held not an assault for a motorist to make a leering grimace at a pretty girl, walking at a considerable distance from his car.

But it was held an assault for a landlord to brandish a stick ominously over the head of his tenant. And it was held an assault for a man, known to be trigger-happy, to reach suddenly for his hip pocket.

Can denatation of character, too, be committed by acts instead of by words? It is possible, wrote Jonathan Swift.

"Convey a libel in a frown, And wink a reputation down."

In one case, a man charged that his character had been besmirced — wordless — by two clumsy detectives. It seems they had followed him

Few Texas Nursing Homes To Qualify For Medicare

Unless things change by next January, few licensed Texas nursing homes will qualify for elderly patients under Medicare's "extended benefits."

Only some 100 of the state's 745 nursing homes are even expected to try.

This forecast comes from nursing home officials who currently view this second phase of Medicare with either extreme discouragement or a wait-and-see attitude.

"This is just not going to be the great White Father people are expecting, admitted a state health official.

Biggest problem is the glaring shortage of licensed personnel required by new federal regulations. Only 245 nursing homes in Texas employ a registered nurse — one prerequisite for Medicare participation.

"Not that they don't want them," explains John Crawford, Jr., executive director of the Texas Nursing Home Association. "But you can't get them with a nationwide shortage of more than 20,000 RN's."

Nursing home administrators also complain about the federal provisions paying for convalescents. Basically, the Medicare bill pay the home "reasonable costs" plus 2 percent overhead or profit.

Another problem results from the requirement that patients must spend three days in a regular hospital before qualifying for nursing home benefits.

"Some people envision a fleet of ambulances backing up to a nursing home, taking all the patients there to a hospital and returning them back in three days, eligible for Medicare," observed Crawford.

"The general public is going to be disillusioned," he added.

The extended care portion of Medicare provides for full nursing care for 20 days after an acute ailment is treated

in the hospital. Partial coverage after that is limited to another 80 days.

"The intention of Congress was that this service act as an extension of acute care," explained Dr. J. B. Copeland, deputy commissioner of the State Health Department.

Persons are eligible for nursing benefits on Jan. 1 if they go into the hospital after July 1, according to a recent federal interpretation.

"What people forget is that a lot of nursing home residents will not qualify for Medicare anyway," said Crawford. "The average age is 80 or more and very little surgery is planned for them then."

Nursing home care in Texas is geared, therefore, to long-term chronic patients. The average stay is 18 months.

Herbert Wilson, assistant director for the State Welfare Department, acknowledged that a problem would exist if only 1,000 nursing homes were okayed for Medicare.

If an aged indigent living in a non-Medicare home goes into the hospital for serious treatment and wants nursing Medicare, he probably will be transferred into another nursing home for recovery.

Some administrators observe this dislocation is psychologically upsetting to elderly persons.

Wilson explained that under the Kerr-Mills insurance plan, a federal-state program already in effect, the patient or family pays only \$40 - \$60 monthly for nursing care. Under Medicare, \$150 monthly is charged after the 20 days.

The LVN Association in Texas is presently protesting a federal requirement which prohibits a "waivered" LVN from qualifying for supervisory. These are nurses who did not complete a formal 2-year LVN course.

Medicare requires other trained personnel which is un-

available, according to nursing home officials.

A seldom-mentioned worry of nursing home administrators is the racial integration requirement. Many of their patients are products of Reconstruction Days which followed the Civil War.

"Is it really medically sound to try and change a person's racial beliefs at age 80?" asked one administrator. "An old man could have a coronary if he was forced to share his room with a negro patient."

WTCC Urges Continuation Of Infocades

West Texas business leaders met at Monahans Sand Hills State Park Friday to discuss the state affairs activities of the West Texas Chamber of Commerce.

The group presented ideas concerning how the regional chamber can be a more effective voice for West Texas business in Austin through the use of legislative bulletins and conferences between legislators and their constituents.

The meeting was the fifth in a series of nine idea and planning sessions called by John Ben Sheppard of Odessa, president of the WTCC.

The group recommended that the grass roots level in West Texas be better informed concerning state legislative matters, that the annual Infocade programs of the West Texas chamber be continued and that the legislative image of West Texas be improved.

The urgent need of support for adequate financing of basic water research and basic brush control research was strongly pointed out. It was recommended that the WTCC be especially active in the dissemination of information to West Texans concerning legislation in the fields of water, education and taxation.

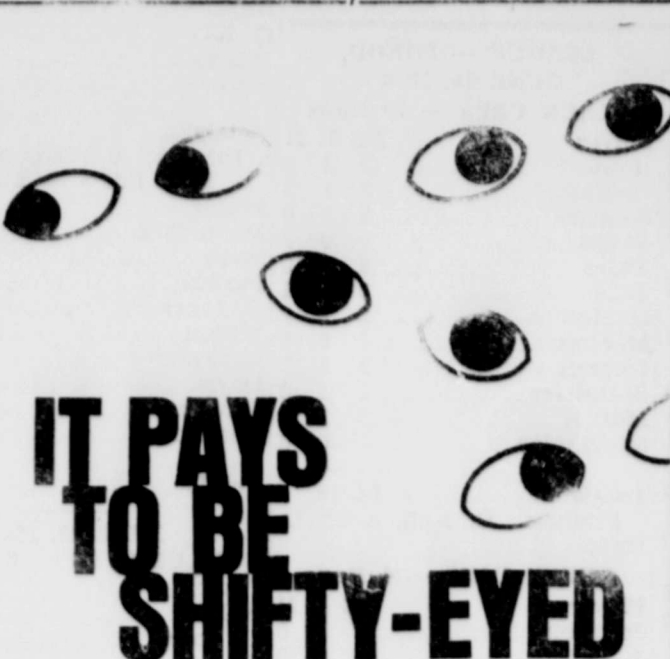

West Texas businessmen were urged to become more aware and informed concerning state legislative matters in order to insure the development of the growth potentials of all areas of West Texas.

Howard Rose, Midland attorney and chairman of the state affairs of WTCC, presided during the five-hour session.

President Theodore Roosevelt signed the order returning the captured Confederate regimental flags to their respective states.

"Ad valorem" duties on imported goods are those duties placed on products according to their value.

AMERICAN ROAD BUILDERS' ASSOCIATION

Parks Chairman Reveals Fund For LBJ State Park

Though gingerly picking his words, Chairman Will Odom of the State Parks and Wildlife Commission has made the first public revelation of the fund for the proposed Lyndon B. Johnson State Park.

Odom said that as of last November, when the first plot of land was condemned, there that the commission offered \$450 an acre for all the 245 acres originally designated for the park and for a portion of an additional 399 acre set aside.

This involves a minimum of \$110,250 that probably has risen much higher in the seven months that have gone by since then.

Remained Noncommittal He was hesitant to give any information concerning the park.

Meeting with reporters who requested a meeting to explain the commission's practice of divulging little of its activities to the press or the public, Odom remained noncommittal.

As in previous encounters with the press, Odom answered "no comment" to all questions about the number of donors, the amount of money now on hand in the fund or the amount needed.

Trustee Of Fund Odom is trustee of the fund, to be gathered entirely from private funds. Land purchased will be deeded over to the state, which will develop and maintain the park.

He told newsmen that so far only one plot of land had been purchased. That involved the 18.37 acres of Richard Sturgill of Chillowite, Va., who agreed to the \$450 an acre judgment of a Gillespie County condemnation jury last

Blanket Banker Gets 4 Years On Guilty Plea

Morris Ray Hill, president of the Blanket State Bank when it folded January 26, and the bank's cashier, Richard William McDaniel, were sentenced to terms in the federal penitentiary in San Angelo.

Hill once served as a school board member, community center member, Sunday school superintendent and mayor.

Numerous character witnesses testified that both Hill and McDaniel were dedicated community servants "above reproach," but U. S. District Judge Joe E. Estes assessed Hill with a four-year sentence and McDaniel a term of one year.

Hill received two years for mail fraud and two more years on a charge of making a false entry in records of Blanket State Bank. Another charge of false entry at First State Bank in Bangs, in which Hill was also president, drew Hill a two-year sentence to run concurrently with the other false entry sentence.

McDaniel was given concurrent one-year sentences on the same two false entry charges.

Both men pleaded guilty to the three charges May 24.

Stanton Woman Attended Annual Houston Meet

Seventy-seven Texas educators attended the 9th annual Petroleum Institute for Educators June 6-24 at the University of Houston, which covers all aspects of petroleum from production to merchandising.

The institute included daily classes under leading specialists in the area of oil. It was co-sponsored by the University's College of Education and Oil Information Committee of the Texas Mid-Continent Oil and Gas Association.

Attending from Stanton was Mrs. Florazene W. Decker, Box 627.

Tax Man Sam Sez:

What are the requirements for filing and estate tax return? This question bothers

comment on its reasons for not signing the agreement.

Last week, a news release from the area officer of the Social Security in San Angelo listed the hospital as one of 14 which had complied with the regulation.

many taxpayers, but the rules are fairly simple. Your administrator will have to file an estate tax return of the fair market value of your estate is \$60,000 or more on the date of your death. However, if there is a surviving spouse and the estate is community property, you do not have to file unless the estate exceeds \$120,000, since 50 percent of the community prop-

erty belongs to the surviving spouse. Getting the correct evaluation on your estate is important since this evaluation affects all future tax transactions on the property.

Mahon Criticizes Air Force Laxity In XB70 Incident

Granting permission for a picture - making formation flight of the huge XB70 experimental aircraft showed "inexcusable laxity," said Rep. George Mahon, D-Texas.

The XB70 collided with a smaller jet during the June 8 formation flight over Edwards Air Force Base, Calif. Two fliers were killed.

The flight was scheduled at the request of General Electric Corp., the manufacturer of the jet engines.

"The nation has sustained a severe loss, not only of the men involved, but of several hundred million dollars in equipment," Mahon, chair-

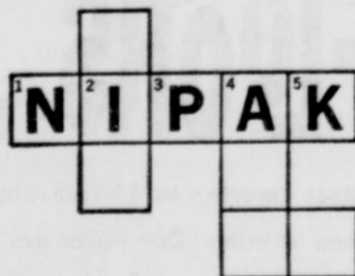

man of the House Appropriations Committee, told Air Force Undersecretary Norman Paul at a closed hearing June 10.

Testimony released Thursday showed Mahon added "it seems to me there has been inexcusable laxity" in permitting such a flight.

"The Air Force definitely does not put its stamp of approval on this sort of business," Paul said. "Had we been aware, I think it is safe to say it would not have happened."

"All future flights of this sort" have been ordered canceled, Paul said. The hearing was before the House Defense Appropriations subcommittee.

What's the best 5-letter word for fertilizer?

And for cotton—NIPAK 45. Get better cotton production and earn bigger profits. Sidedress your cotton with NIPAK 45 right now — for greater yield. (You may get more than the average \$6 return for every \$1 invested in fertilizer, depending on your farm. Experiment station tests averaged this.) NIPAK 45 — 45% nitrogen fertilizer from Urea — gives you one-third more nitrogen per pound than any other form of solid nitrogen fertilizer —

which enables you to handle less fertilizer and cover more ground in less time. NIPAK 45 is uniformly prilled, too. It flows easily, won't cake, clog or corrode your equipment. NIPAK also dissolves in the soil moisture and moves quickly to the root zone where it stays put until your crops need it. So for more grow power, ask your local NIPAK dealer about NIPAK 45. He can help you plan a complete fertilizer program because he can provide a complete fertilizer service.

Texas Farm Bureau Plans Second European Tour For September '66

GERMANY — Rhinestein Castle, one of the ancient fortresses overlooking the Rhine River in Germany.

FRANCE—Members of the 1965 Market Builder tour in Paris, with the famed Eiffel Tower in background.

The Texas Farm Bureau will conduct a second Agricultural Market Builder tour of Europe Sept. 15-29, according to Walter Meyer, Waco, Farm Bureau director of trade development.

The TFB - sponsored tour will include sight-seeking and marketing activities in seven countries in Europe — England, Holland, Belgium, Luxembourg, Germany, Switzerland and France. At the end of the original tour, tours will be available on an option basis to Scandinavia, Spain and Portugal, and Italy. Tour members may choose to take a special one-day excursion to Berlin.

Tour members will meet with farm groups and visit farming operations in the various countries as well as the traditional scenic attractions. They will visit some of the famous market places of the world — including Smithfield and Covent Garden in London, and the Grossmarkt in Frankfurt.

More than 40 persons have already signed up for the two week tour. According to Meyer, there is still space for some 50 persons on the tour. For those who are interested in details of the trip, a request for a brochure should be mailed to Walter Meyer, Texas Farm Bureau, P. O. Box 489, Waco, Texas.

The group will fly via Pan

American Airways from Houston and Dallas to London. They will return Sept. 29. Cost of the tour is \$995. This includes all transportation, two meals a day, sight-seeing tours and tips. Other personal expenses are not covered by the tour fare.

The first Market Builder tour conducted by the TFB was hailed as a great success. The tour led to the development of an export market in Europe for fresh, chilled Texas beef. This in turn initiated planning for development of export programs for Texas vegetable and citrus commodities.

The Market Builder tour scheduled for this September drew this comment from Governor John Connally.

"As your Governor, I give me pleasure to see the largest general organization of farmers in this state embarking on a second Agricultural Marketing tour. First and foremost, you are building friends for Texas. New markets will naturally follow if we will but use the same principles that have made our state the number one exporter of farm products in the nation.

"Of course, Western Europe knows of our cotton, wheat and feed grain. But it needs to learn more about our canned and frozen food products, our poultry and turkey, winter vegetables, melons, citrus, flax, beef, pecans, peanuts, seeds and feed products, just to mention a few.

"May I urge you — the farmer, the rancher, the agriculture businessman — to take advantage of this opportunity to promote an appreciation of Texas and its many fine products to our neighbors in Europe."

Outdoors In Texas

Do you enjoy "hitting the bottle?" Same here! But we're not talking about the indoor pastime of guzzling liquor.

We're talking about that great outdoor sport of target practice.

It's worlds of fun to fire a .22 rifle or pistol. It's even more thrilling to hit the target dead-center and see it explode fragments in all directions.

Of course, you have to go outside—even out of town to partake of this pleasure. But surely you have a friend, or a friend who has a friend, farm, or ranch, or lake place where you can test your talents as a marksman.

Pick a spot where there's a high bluff, if possible, or a steep hillside, or a solid backdrop of some kind. Don't shoot over water or at the water or where the bullets might at any time skip across a pond or lake. That's about as dangerous a stunt as you could pull.

A second precaution — don't load the gun until you're ready to fire.

And don't point it at anything that you don't want to shoot.

Shooting can be a great pleasure, but it's no fun to injure someone through oversight or carelessness.

So be careful!

Gather up a batch of old non-returnable beer bottles or cans. They make excellent targets.

We prefer to build a dirt mound in front of the back stop—just dirt, no rocks—so that the target pieces will collect around the mound. There they can be picked up with ease and disposed of readily.

Note that we said "dirt mound." No rocks, or stones or metallic objects that might deflect a bullet and send it whining over the hilltop and injure someone.

A good feature of the dirt mound is that low or wide shots will imbed themselves in the dirt and stop there harmlessly.

Usually we will space the bottles on the top of the mound, 10 or 15 bottles to the row, and see how fast we can take them — one after another.

While glass bottles perhaps provide the greater thrill, metal cans last the longest. It takes quite a collection of both to provide an hour's entertainment for four or five shooters.

Youngsters like to collect these types of targets, especially if they are going to be in on the shooting. A little reward money will speed up the collection, too.

Health And Safety Tips

From The American Medical Association

With the return of warm, sunny days, millions of Americans are once again toasting exposed skin at the beach, beside the pool, in the backyard, almost anywhere out of doors.

Many of the sunbathers are using one of the sunscreen lotions and creams that are now available, in an effort to acquire a tan with a minimum of burning and discomfort.

Actually, your doctor will tell you that suntanning has little or no beneficial effect on your health. Excessive tanning can cause premature aging and wrinkling of the skin, and can be the trigger that brings about skin cancer. But, if you insist on tanning, you will be interested in some facts on sunscreen lotions and creams.

Sunscreens are chemicals which absorb various wave lengths of ultra violet rays to various degrees. They do not shut out all radiation, else you would never tan. Among the most effective sunscreens are some long, technical names — para - aminobenzoic acid and its derivatives, the solicylates, and a digalloyl trioleate compound. Read the label to be sure the product you select is a sunscreen.

Apply the sunscreen product at least every two hours, after each swim, and whenever the protecting film may have rubbed off. Give vulnerable areas such as neck, shoulders and nose a double dose.

Also available are artificial suntan lotions which produce a color change on the skin simulating a natural tan. It is important to realize that artificial suntan products do not provide protection against sunburn unless they also incorporate a sunscreening agent.

Lubricate the skin to help prevent excessive drying effects of the sun. Apply an emollient cream or lotion before retiring.

The board of directors of Plains Cotton Growers, Inc., will meet in Lubbock at 6 p.m. June 30 to adopt the organization's budget for the 1966-67 fiscal year, according to PCG President John D. Smith of Littlefield. The meeting is scheduled in the Johnson House, 4801 Avenue Q.

"The primary purpose of the meeting is to set up our 1966-67 budget, but other cotton-interest matters will also be discussed and all producers and cotton related businessmen are invited to attend," Smith said.

The PCG finance committee, of which M. A. (Rip) Elms, also of Littlefield, is chairman, will meet in the PCK offices at 3 p.m. just prior to the board meeting. It is the job of this committee to work with the staff in outlining budgetary items and amounts and recommend an overall budget to the board.

PCG has two directors, one cotton producer and one businessman, from each of its 23 counties. Support for the organization is largely from cotton producers who pay 15 cents per bale dues through their ginner, and Smith is urging all directors to attend the meeting and represent their county's producers in the budget adoption.

Donald A. Johnson, Executive Vice President of Plains Cotton Growers, Inc., has announced the probability of a new service to the cotton producer organization's 25,000 members.

Johnson says a personal newsletter, called "The UCG Cotton Review" will be mailed monthly to each of the members beginning in July. He refers to the service as a probability rather than a certainty because this item of expense is yet to be approved by the PCG finance committee and board of directors.

"However," Johnson said, "the lack of sufficient communications between the organization and its members has in the past been criticized by various members of the board, and I believe this monthly newsletter, written especially for and mailed directly to the members will be hailed by the board as a valuable addition to PCG services."

He also pointed out that adjustments are planned in other parts of the budget to offset additional cost.

According to Johnson, the letter will be used to keep members informed of all PCG activities, promote the adoption of proven cultural practices in cotton production, analyze legislation affecting cotton producers and for whatever other purposes will serve the interests of the High Plains cotton industry.

Exact date of publication has not been decided on.

Dr. L. L. Ray, agronomist at the South Plains Research and Extension Center north of Lubbock, has issued some valuable advice to cotton producers who have had to replant cotton late in June because of hail, wind or rain damage.

He points out that it is unlikely that cotton planted this late can utilize additional fertilizer and that it will need no more than one summer irrigation. And the cotton that gets one or two more timely rains will need no irrigation at all, he says.

Defoliant or desiccants should not be used, according to Ray, because the late-planted crop will need the full growing season.

Using less water, less fertilizer and no harvest-aid chemicals has the double advantage of improving chances for producing a mature crop and at the same time reducing expenses. And Ray says the grower should remember that the income from the replanted cotton at this time of year is almost sure to be relatively low, so keeping expenses to the absolute minimum will be an important factor in the producer's net income position at the end of the year.

An old hymn says "we'll understand it all bye and bye." But sometimes we begin to doubt it when we study the actions of some on Capitol Hill.

Dr. W. Allen Wallis, president of the University of Rochester says, "Inflation can be generated only by government." Here's how he explained it: "Business firms, labor unions or consumers with excessive market power can do many objectionable things that are contrary to the public interest. But one objectionable thing that they cannot do is to cause inflation—or for that matter, prevent it."

The national flag of Cyprus bears a map of the country.

The scorpion uses its poisonous stinger to deliver a lethal jab to insect prey and to defend itself.

The Senate-House conference committee met in Washington June 21 on the cotton research and promotion bill (H. R. 12322) and agreed to disagree.

Senate conferees, for some reason completely beyond us, stubbornly refused to give up a Senate amendment which would require another Act of Congress before the amount of the \$1 per bale producer assessment could be changed.

House conferees were just as adamant in their position—that the amount should be subject to change by vote of the cotton producers who would be paying the bill.

That they didn't agree is not news. What is hard to comprehend is why the Senators on the committee, or for that matter the Senate itself, should want to require another Act of Congress and all the political wrangling that goes with it before the amount of the "check-off" could be changed.

Passage of the bill by the Senate in the first place was tacit admission that cotton producers are capable of deciding for themselves whether they want the program, and, more important, whether they want to pay for it.

And if they are capable of making this decision, why then is the Senate so reluctant to let them decide at some future date whether they want to increase or decrease the amount of the per bale self-assessment?

The committee has agreed on the Senate's version of the requirements for passage of the referendum that will be held once the act has passed Congress. It will require either (1) two-thirds of the producers voting in the referendum or (2) two-thirds of the cotton volume represented by the voters plus a simple majority of growers voting.

As of this writing no date has been set for further consideration in the near future.

What they'll do and how they'll break the apparently senseless deadlock, is anybody's guess.

Probably no one seriously doubts that the committee will reach a compromise on the \$1 per bale amendment. But timing is of the utmost importance, and the question is, when?

It has been the hope of the act's proponents that the program could be initiated with this year's crop. Some are already saying it is too late in view of the many details that will have to be worked out before the act become effective. But there is still hope if the conference committee and both houses of Congress will, for the time being at least, skip the political pettifoggery and get on with the business at hand.

HAIL INSURANCE AT LESS THAN 1/2 COST

Additional Insurance Endorsement is offered for the fifth year in a row which makes it possible for growers to increase the amount of the coverage on their crops beginning July 1st, at less than half of the full season rates, with even further rate reductions each day thereafter. This is offered only to Ranger Insurance Exchange policyholders.

The Launching Pad

By NEAL ESTES

SHERIFF BILL DECKER of Dallas County has barred television from his jail. It is now 'off limits' in Tarrant County too. Prisoners in the Dallas jail are not even allowed to watch regular television shows. Recently, in Ft. Worth, some prisoners escaped and then were permitted via tv to watch how their fellow inmates made good their escape on the tube. SHERIFF DON EVANS of Tarrant County said after the Ft. Worth jail-break, according to press reports: "My goose is cooked. Everybody in jail here now knows how to get out." The television news cast had described the escape route used by the prisoners. The Tarrant County inmates removed a light fixture and crawled through an 18 by 18 inch fixture hole, removed a window and shinned down a bedsheet rope to freedom.

ONE of the best informed men in government in Austin left the services of Texas last week. WELDON WATSON, affiant administrator of the State Parks and Wildlife Department is out. The three men who make the policy of the body include: Will ODOM, A. W. MORSUND, and JAMES DELINGER. ODOM was described this week by JERRY HALL, an Austin newsman as "a tart-tongued Austin petroleum engineer." All three men got their appointments from CONNALLY. At least one of the board members, A. W. MORSUND is a product of the LYNDON JOHNSON-JOHN CONNALLY political axis. MORSUND has long been identified with buying land for JOHNSON, et al, and the Johnson City man was named by CONNALLY. More recently the Parks Board has been interested in securing contributions to purchase land for the LBJ proposed park. To date, nothing official has been announced about these activities. The names of the donors have not and possibly will not be made public. Two versions of the WATSON affair are going the rounds in Texas. One rumor says he was fired. The other view is that he quit. In any event, where there is smoke there is fire. This whole affair needs to be surfaced, probed and publically announced.

RIGHT now is the time to start thinking about the type of legislation you want to see written into law next in Austin. The West Texas Chamber of Commerce sponsored a meeting in Manahans last week of vital importance to the people of Texas and especially the people of West Texas. The Chamber is calling for an informed grass roots level population. We have advocated the idea for years. The chief reason we got such sorry legislation at the last session of the Texas Legislature, including the almost infamous Code of Criminal Procedure, was because nobody cared. Start writing letters to Austin right now. Send your mail to your state senator or your state representative. Write as many senators and representatives as you know. Write your governor. Write PRESTON SMITH, your lieutenant governor. He used to be our state senator, he will possibly someday run for governor. Get to know him now by writing concerning the legislation you are interested in to help make West Texas come out of Austin after the next session with a better image. We need to particularly follow the suggestion of WTCC in watching legislation on taxation education, and in the field of water.

WITHOUT being accused of being disinterested I think it is sufficient to comment that in addition to being concerned about the future water supply of the nation in the year 2020 I am also concerned to know whether the country will be around as we have known it for the past 50 years. In other words, we had better concern ourselves about preserving some of the freedoms we are so easily surrendering to the political people who are prostituting our sacred rights. Gaint water meetings have been held all over Texas in recent weeks concerning the water supply in the year 2020. The plan being advocated covers a 50-year-span and will cost \$2.5 billion dollars. It appears that the origin of the huge system is in the Sulphur River Basin in northeast Texas. The water from there flows into the Trinity and it is estimated that in the year 2020 that 2,405,000 acre-feet of water will enter the project system from the upper sources basin. Project water will flow down the natural channel of the Trinity for about 70 miles, then be diverted into Richland Reservoir and then Tehuacana Reservoir. It will then be diverted through a conduit to the Brazos River and flow about 170 miles to the vicinity of San Felipe. At this point it will be pumped over the divide into the Colorado River. After flowing about 16 miles in the Colorado River channel the water will again be diverted near Garwood to Palmetto Bend, the heading of the 190-mile Coastal Aqueduct which transports water along the Gulf Coast to the lower Rio Grande Valley. Project water will then flow through Confluence Reservoir near Victoria and a line-regulating reservoir, distributing water for irrigation, industrial use, etc. We can see why the mayor of Texarkana is opposed to the plan. The water starts from his area, and he might say what the hobo from the Lone Star state said one night while standing in the freezing rain on the sidewalks of New York, and we quote: "It's a long ways from Taxarkana."

FOREMOST ICE CREAM and MILK products are distributed all over the country. STANTON DRUG has used their ice cream exclusively for years. Another important announcement will be made through the paper in a few days concerning FOREMOST.

NEAL'S NUGGET: Your country editor worked this week with fever going as high as 102. We were felled with a sudden seizure of virus in the chest area. The thing struck like a tornado. With the aid of the phone we made the press and postal deadline. Telephones are pretty wonderful. But some of the people who use phones to pour their personal complaints on the ears of an already over-taxed editor ought to have to listen in reverse and get out a county paper just one time with the red mercury mark on the thermometer ranging from 100 to 102.

Outdoors In Texas

Careless boat trailering can depreciate the value of your rig in a hurry.

Even more important . . . if you should be involved in an accident . . . it can cost you not only repairs but possibly even a lawsuit. Both cost money!

Texas law requires that your boat trailer have a license, lights and a safety chain. If you're hauling an unusually heavy rig, the trailer also must have brakes.

Let's consider trailering a boat from start to finish. To begin with, make sure the boat is properly seated on the trailer. Don't try to balance it in such a manner that you can pick up the trailer tongue with your little finger.

When hitched to the car bumper a tongue should exert a downward pressure of at least 50 pounds. This so the trailer won't have a tendency to jump and free from the hitch when going over a bumpy road or when stopped abruptly.

By all means snap on a sturdy safety chain. Even the best of trailer hitches have been known to snap.

Check your hitch and boat tie-downs every time you stop for gas.

If the boat and trailer are to be parked for any length of time, loosen the tie-downs to reduce strain on the boat. This is an absolute must if your tie-downs get wet and you park the rig in the hot sun. Lines tighten when wet.

If you carry a motor on the stern of the boat, be sure the motor is securely fastened. Above all, be certain that the motor doesn't make the trailer or rear-end-heavy in such a manner as to cause the tongue to lift off the car bumper.

Remember you're driving two vehicles, not one. Consequently allow ample room for passing. Also remember that you have less maneuverability when hauling a trailer so always allow the right-of-way to faster vehicles.

Allow plenty of room to brake to a smooth stop when hauling a trailer. Extra momentum due to the weight of the loaded boat and trailer means that you will need extra distance in which to stop.

Best thing to do is to practice driving at various speeds and then note the distance required to come to a complete stop.

A boat and trailer will cause "blind spots" behind you. This can be greatly overcome by using an extension-type side-view mirror on your car.

When trailering a loaded

boat, you should reduce your normal driving speed considerably. At high speed trailer have a tendency to swerve. This swerving is more pronounced with small-wheel trailers.

It takes some practice for one to learn to back up a car and trailer combination. A simple rule, however, is to place your hand at the bottom of the steering wheel and turn the wheel in the direction you want the back end of the trailer to go.

Sand, and particularly salt water, play havoc with wheel bearings. All bearings should be packed with grease before you start your trip. And remember you may lose a little of that protective grease during the trip.

Play it safe. As soon as you haul your trailer out of the water, check the wheels carefully for any sand or mud that may be clinging around fittings. If you have access to a hose and fresh water, wash down the trailer before heading for home.

That, however, is not the last of the washing. On the trip home your trailer will pick up road dust and grime. This, too, should be washed away with another hosing at home.

A final note in storing the boat and trailer. Remove all

tie-downs and thoroughly wash and dry them. Then store them in a dry place to prevent rotting.

Our experience prompts the further suggestion that you use inner tubes in your trailer tires. Tires will leak even when just standing still. Eventually you'll have a flat tire. If it's flat very long the tire will lose its shape. Then it's hard to inflate, if not impossible. With the tube inside the tire, the matter of inflation is quickly solved with a tire pump and possibly a new valve core.

A final recommendation is the addition of a spare tire holder on your trailer, complete with tire and tube. It's mighty good insurance!

Then add a lock to prevent theft of the readily accessible spare.

Pasadena, Calif., San Marino Tribune & News: "Today's crystal gazing concerns insurance. Already the federal government is knee-deep in various kinds of underwritings but one of these days there is likely to be a vast expansion, unless the insurance companies take steps to forestall this action. . . . We suggest a different course for insurance executives. Instead of waiting to be forced out of business by the rabble and

ther political handmaidens, they should take forceful action now. We propose a hard-hitting educational campaign, to remind decent Americans of the rangers of mobocracy, and to call for necessary corrective steps. Since politicians don't show much interest in true civic responsibility, the field is wide open for private

enterprise to promote it. To us, it would be good insurance."

First cities in the world were built around 5,500 years ago around Mesopotamia.

Pocahontas is buried at Gravesend, England, where she died in 1617.

by Vern Sanford

STRING CHASES INSECTS AWAY—If you are being bothered by insects and have no insect repellent, try this trick.

Attach some pieces of string to your hat band, long enough so the strings hang down over the hat brim.

As you move about the dangling action of the string will keep the insects flying.

GATHERING GRASSHOPPERS—An ordinary flyswatter works just fine when collecting grasshoppers for bait.

Just swat them lightly and they'll be stunned enough to pick them up.

SNAP HOOK SPEEDS FISHING—It takes time and caution to get a catfish off a hook without getting fanned.

When cats are biting fast and furious attach the hook to the end of your line with a "snap" rather than a knot.

This way you can remove the hook and the fish together, then snap on another hook and continue your fishing.

Later on, when you clean your catch, you'll have time to remove the hook with ease and safety.

(Continued from page 1) GIBSON expressed admiration for the editorial manner in which the county newspaper is being handled and was especially complimentary about our many recent articles on law enforcement.

Some medical facts concerning sugar pills proved interesting when released this week. Victims of rather severe hypertension have kept their blood pressure down to acceptable levels for years by taking injections of inactive substance they thought was medication. The success of the inactive substances is known as the placebo effect. Doctors have known for many years that substances containing no medicine, but administered as medicine, are often effective in producing remissions in diseases. In other words, a lot of this illness business is in the head.

(Continued from page 1) ed Mrs. Stanley Reid and Mike Springer. Mike reported on a 12-day trip he made to Washington, D. C. Young Springer and Brenda Dyson, local students, won the trips to Washington as a result of an oratorical contest sponsored by Rural Electric Cooperatives. Mrs. Reid accompanied them to Washington.

Your figure is TAMED but not caged!

The TAMER by fortuna

The look of luxury and beauty . . . the feeling of control with comfort is all yours. Fortuna does it with diamond-front counter-elastic panels and split-hip control to slenderize and firm your tummy and hips. You'll look so lovely, feel so free but never feel caged. Chemstrand BLUE "C" Spandex gives power without weight . . . concealed, adjustable garters. ALL TAMER styles in White and Skin Tone, sizes: S-M-L-XL.

Tamer girlie . . . \$9.00
Tamer average panty . . . \$9.00
Tamer longleg panty . . . \$11.00

We Will Be Closed Monday, July 4th.

NEWSPAPERS

MAKE A BIG DIFFERENCE IN PEOPLE'S LIVES

It makes a big difference to you and your family . . . to know you can rely on your newspaper for ideas, information, entertainment you need and want. Your newspaper keeps you informed . . . about local, national and international events. Socially, economically, politically, and in every way, your newspaper is your guide to what's going on in today's big, busy world.

It makes a big difference to you . . . to know where to find what you and your family need, and how to get the best values for your shopping dollars. And it makes a big difference to the merchants who serve you . . . to know where they can "meet" you and best tell you about what they offer. In the pages of your newspaper, you and your local merchants get together. Newspaper advertising is your guide to intelligent shopping and wise spending.

It makes a big difference to you . . . to know the facts, to know the truth, and to know that your newspaper is dedicated to bringing you all the facts, all the truths so vital to the preservation, and the strengthening, of our way of life. A free press in a free country is your guarantee of your right to know. Yes, newspapers do make a big difference in people's lives!

Freedom to Print the Truth, Freedom to Know the Truth . . . Newspapers and Readers Are Partners in Freedom!
